HERO3+ FEATURES

1. Camera Status Lights (Red)
2. Shutter/Select Button
3. LCD Status Screen
4. Wi-Fi Status Lights (Blue)
5. Power/Mode Button
6. Micro HDMI Port (Cable not included)
7. MicroSD Card Slot (SD card not included)
8. Mini-USB Port (Supports Composite A/C cable/3.5mm stereo mic adapter, not included)
9. HERO Port
10. Battery Door
11. Wi-Fi On/Off Button
12. Audio Alert
13. Microphone
CAMERA LCD STATUS SCREEN

The LCD screen displays the following information about HERO3+ modes and settings:

1. Camera Modes/FOV (Field of View)
2. Capture Setting Modes (not shown)
3. Resolution/fps (Frames Per Second)
4. Time Interval Settings: (not shown)
5. Counter
6. Time/Storage/Files
7. Battery Life

NOTE: The icons displayed above will vary depending on what mode your camera is in.
*Playback only appears in LCD Status Screen if camera is connected to a TV or LCD Touch BacPac™ (optional accessory, sold separately).

**White Balance only appears if Protune™ is turned ON.
CAMERA SOFTWARE UPDATES

⚠ To get the latest features and best performance from your HERO3+ camera, make sure you’re using the most current camera software. To check if software updates are available, visit: gopro.com/update.

USING YOUR HERO3+: BASICS

GETTING STARTED

1. Remove camera from housing

2. Remove camera side door and insert a microSD, microSDHC™ or microSDXC™ card into the card slot. A microSD card with a Class 10 speed rating is required.

3. Open camera back door, insert battery, close camera back door.
5. **Charge the battery.** The included lithium-ion battery comes partially charged. To charge, connect the included USB cable to camera and connect the other end of the cable to a power source such as a computer, GoPro Wall Charger or GoPro Auto Charger. No damage will occur to the camera or battery if used prior to a full charge.

**PRO TIP:**
When camera is OFF and charging:
- Red **Camera Status Light** will turn **ON** when camera is charging.
- Red **Camera Status Light** will turn **OFF** when charging is complete.

▶ See **BATTERY LIFE** for more information.
▶ See **PROTUNE** for more information.

### CAMERA DEFAULT SETTINGS

The HERO3+ Black Edition camera powers up with the following default settings:

<table>
<thead>
<tr>
<th><strong>Video Resolution</strong></th>
<th>1080p SuperView 30fps</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Photo Resolution</strong></td>
<td>12MP</td>
</tr>
<tr>
<td><strong>Burst Photo</strong></td>
<td>30 photos in 1 second</td>
</tr>
<tr>
<td><strong>Time Lapse</strong></td>
<td>0.5 seconds</td>
</tr>
<tr>
<td><strong>Wi-Fi</strong></td>
<td>OFF</td>
</tr>
</tbody>
</table>

**PRO TIP:** Want to change your **VIDEO** and **PHOTO** settings?  
▶ See **SETTINGS** menu to make changes.
POWERING ON AND OFF

To power ON:
Press the **Power/Mode Button**. The red **Camera Status Lights** flash three times and the **Sound Indicator** emits three beeps.

To power OFF:
Press and hold the **Power/Mode Button**. The red **Camera Status Lights** flash several times and the **Sound Indicator** emits seven beeps.

**PRO TIP:**
Want to turn your HERO3+ into a “one-button” camera that automatically starts recording **PHOTOS** or **VIDEOS** once it turns **ON**? Set the camera to **ONE BUTTON** mode.

▷ See **ONE BUTTON** mode for more information.
OVERVIEW

The HERO3+ features several camera modes. To cycle through the modes, press the **Power/Mode Button**. The modes will appear in the following order:

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>VIDEO</strong></td>
<td>Record <strong>Video</strong></td>
</tr>
<tr>
<td><strong>PHOTO</strong></td>
<td>Capture a single <strong>Photo</strong></td>
</tr>
<tr>
<td><strong>BURST PHOTO</strong></td>
<td>Capture up to 30 <strong>Photos</strong> in one second</td>
</tr>
<tr>
<td><strong>TIME LAPSE</strong></td>
<td>Capture a series of <strong>Photos</strong> at timed intervals</td>
</tr>
<tr>
<td><strong>SETTINGS</strong></td>
<td>Adjust camera <strong>Settings</strong></td>
</tr>
<tr>
<td><strong>PLAYBACK</strong></td>
<td>Playback <strong>Video</strong> and <strong>Photos</strong>. Appears only if camera is connected to a TV or LCD Touch BacPac™ (optional accessory, sold separately).</td>
</tr>
</tbody>
</table>

**PRO TIP:**

Use **BURST PHOTO** to capture fast-moving subjects.

See **PLAYBACK** for more information.
USING YOUR HERO3+: CAMERA MODES

VIDEO

To record Video, verify the camera is in Video mode. If the Video icon on your camera’s LCD screen is not showing, press the Power/Mode Button repeatedly until it appears.

To start recording:
Press the Shutter/Select Button. The camera will emit one beep and the red Camera Status Lights will flash while recording.

To stop recording:
Press the Shutter/Select Button. The red Camera Status Lights flash three times and the camera emits three beeps to indicate recording has stopped.

The HERO3+ automatically stops recording when the memory card is full or the battery is out of power. Your video will be saved before the camera powers OFF.

▶See VIDEO mode for instructions on how to change resolution settings.
PHOTO

To capture a Photo, verify the camera is in Photo mode. If the Photo icon on your camera’s LCD is not showing, press the Power/Mode Button repeatedly until it appears.

To take a photo:
Press and release the Shutter/Select Button. The camera beeps two times and the red Camera Status Lights flash.

See PHOTO modes for instructions on how to change resolution settings and other PHOTO features.
BURST PHOTO

In **Burst Photo** mode your camera takes multiple photos in short time intervals—
3 photos /1 second, 5 photos /1 second, 10 photos /1 second, 10 photos /2
seconds, 30 photos /1 second, 30 photos /2 seconds or 30 photos /3 seconds.

To capture a **Burst Photo** series, verify the camera is in **Burst Photo** mode.
If the **Burst Photo** icon on your camera’s LCD screen is not showing, press the **Power/Mode Button** repeatedly until it appears.

**To take a Burst Photo series:**
Press the **Shutter/Select Button**. The red **Camera Status Lights** flash
and the camera beeps multiple times.

**PRO TIP:**
Sometimes **30 photos /1 second** is too fast. Try a slower **BURST PHOTO** setting to better match the action.

▶See **BURST PHOTO** for instructions on how to change the interval settings.
**TIME LAPSE**

**Time Lapse** mode captures a series of photos at 0.5, 1, 2, 5, 10, 30 or 60 second intervals.

To capture a **Time Lapse** series, verify the camera is in **Time Lapse** mode. If the **Time Lapse** icon is not showing on your camera’s LCD screen, press the **Power/Mode Button** repeatedly until it appears.

**To take Time Lapse:**
Press the **Shutter/Select Button**. The camera initiates countdown and the red **Camera Status Lights** flash each time a **Photo** is taken.

**To stop Time Lapse:**
Press the **Shutter/Select Button**. The red **Camera Status Lights** flash three times and the camera emits three beeps to indicate that **Time Lapse** has stopped.

▶ See **TIME LAPSE** for instructions on how to change the interval settings.
The Settings menu allows you to adjust a variety of camera settings including:

- Video Resolution
- Photo Resolution
- Time Lapse
- Burst Photo
- Continuous Photo

See **SETTINGS** menu to make changes, learn how to navigate menu options and read more details on each setting.
Playback **Video** and **Photos** by connecting your HERO3+ to a TV (requires Micro HDMI, Composite or Combo Cable, sold separately). You can also playback **Video** and **Photos** on the LCD Touch BacPac™ (optional accessory, sold separately). The **Playback** icon appears only if camera is connected to a TV or LCD Touch BacPac.

▶See **PLAYBACK** for more information on viewing your **VIDEOS** and **PHOTOS**.
CAMERA SETTINGS

SETTINGS

To enter the Settings menu:

1. Verify the camera is in the **Settings** mode. If the **Settings** icon on your camera’s LCD screen is not showing, press the **Power/Mode Button** repeatedly until it appears.

2. Press the **Shutter/Select Button** to enter **Settings** menu.

3. Use the **Power/Mode Button** to cycle through the various **Settings** options.

4. Press the **Shutter/Select Button** to select desired option.

5. To exit, hold down the **Shutter/Select Button** for two seconds or cycle through to **EXIT** and press the **Shutter/Select Button**.

**PRO TIP:** If at any time you wish to exit from the **Settings** menu, press and hold the **Shutter/Select Button** for two seconds.
VIDEO RESOLUTION/ FPS/FOV MODES

You can change Resolution, fps (frames per second) and FOV (field of view) in the Video mode menu. You can also turn Auto Low Light mode ON/OFF.

Once in the Settings menu:

1. Press the Shutter/Select Button to enter ☰.
2. Use the Power/Mode Button to cycle through options.
3. Press the Shutter/Select Button to enter desired menu.
4. Use the Power/Mode Button to cycle through each sub-menu option and the Shutter/Select Button to select it.
5. To change additional options, repeat step 4.
6. To exit, hold down the Shutter/Select Button for two seconds or cycle through to EXIT and press the Shutter/Select Button to select it.

Turn AUTO LOW LIGHT mode ON when shooting in low-light environments or if quickly transitioning in and out of low-light conditions. The camera will automatically adjust fps to achieve the optimal exposure and best results.
CAMERA SETTINGS

<tr>
<td>720p SuperView</td>
<td>Good for body- or gear-mounted shots. More vertical 4:3 content is automatically stretched to full-screen 16:9 for greater viewing enjoyment.</td>
</tr>
<tr>
<td>WVGA</td>
<td>Good when super slow motion is desired and standard definition is acceptable.</td>
</tr>
</tbody>
</table>

**PRO TIP:** Setting the **PROTUNE** mode to **ON** allows for high-quality capture, neutral color and 24 fps video for professional video production.  
▶See **PROTUNE** for more information.
CAMERA SETTINGS

PHOTO RESOLUTION MODES

The HERO3+ can capture photos at **12MP**, **7MP** and **5MP** resolutions. Any change to photo resolution also affects photos captured in **Photo**, **Photo Burst** and **Time Lapse** modes.

<table>
<thead>
<tr>
<th>Photo Resolution</th>
<th>Field of View (FOV)</th>
</tr>
</thead>
<tbody>
<tr>
<td>12MP</td>
<td>Wide (Default)</td>
</tr>
<tr>
<td>7MP</td>
<td>Wide</td>
</tr>
<tr>
<td>7MP</td>
<td>Medium</td>
</tr>
<tr>
<td>5MP</td>
<td>Wide</td>
</tr>
</tbody>
</table>
Continuous Photo mode allows you to capture a series of Photos continuously while holding down the Shutter/Select Button button.

3 photos every 1 second

5 photos every 1 second

10 photos every 1 second

**NOTE:** Your camera will remain in Continuous Photo mode until you return it to single Photo capture mode.
BURST PHOTO OPTIONS

Burst Photo mode captures a series of Photos when the Shutter/Select Button is pressed. Photos can be captured at the following rates:

- 3 photos in 1 second
- 5 photos in 1 second
- 10 photos in 1 second
- 10 photos in 2 seconds
- 30 photos in 1 second (Default)
- 30 photos in 2 seconds
- 30 photos in 3 seconds

TIME LAPSE

Several time interval options are available for Time Lapse mode, including 0.5, 1, 2, 5, 10, 30 and 60 seconds.
Capture Settings allows you to adjust the following advanced capture options:

- Camera Orientation
- Spot Meter
- Simultaneous Video and Photo
- Looping Video
- Protune
- White Balance

See Capture Settings section for a complete list of capture options.

*NOTE*: White Balance menu appears only when Protune is turned ON.
The **Set Up** menu allows you to adjust the following camera settings:

- Default mode at Power Up
- One Button Mode
- NTSC/PAL
- On Screen Display
- Camera Status Lights
- Sound Indicator
- Month/Day/Year/Time

▶ See **SET UP** menu section for a complete list of set up options.
The camera’s built-in **Wi-Fi** allows you to connect to the Wi-Fi Remote or smartphone/tablet via the GoPro App. When **Wi-Fi** is **ON**, a **Wi-Fi** status icon will appear on the camera’s **LCD Status Screen** and the blue **Wi-Fi Status Lights** will blink intermittently. When you turn **OFF** the **Wi-Fi**, the **Wi-Fi Status Lights** flash seven times.

**To turn Wi-Fi ON/OFF:**

Press the **Wi-Fi On/Off Button** 📡 to turn **Wi-Fi ON/OFF**. The most recently used **Wi-Fi** mode will be active when **Wi-Fi** is **ON**.

› See **WIRELESS CONTROLS** section for a complete list of wireless functions

**NOTE:** Your camera cannot connect to the Wi-Fi Remote and GoPro App at the same time.
CAMERA SETTINGS

DELETE

Delete the last file or all files and format the memory card. During delete LAST or ALL, the Camera Status Lights blink until operation is complete.

CANCEL  (Default)

LAST

ALL  (Formats SD card)

To delete LAST or ALL:

1. Verify the camera is in Settings mode. If the Settings icon on your camera’s LCD screen is not showing, press the Power/Mode Button repeatedly until it appears.

2. Press the Shutter/Select Button to enter Settings menu.

3. Use the Power/Mode Button to cycle through Settings to locate the Trash.

4. Press the Shutter/Select Button to enter Delete.

5. Use the Power/Mode Button to cycle through options.

6. Select highlighted option by pressing the Shutter/Select Button.

7. To exit, hold down the Shutter/Select Button for two seconds or cycle through to EXIT and press the Shutter/Select Button.

PRO TIP: Use caution—by selecting ALL, the memory card will be formatted, deleting every file on your SD card.
From the **EXIT** screen, press the *Shutter/Select Button* to exit the **Settings** menu.

**PRO TIP:** If at any time you wish to exit from the **Settings** menu, press and hold the *Shutter/Select Button* for two seconds.
CAPTURE SETTINGS

To enter the Capture Settings menu:

1. Verify the camera is in **Settings** mode. If the **Settings** icon on your camera’s LCD screen is not showing, press the **Power/Mode Button** repeatedly until it appears.

2. Press the **Shutter/Select Button** to enter the **Settings** menu.

3. Use the **Power/Mode Button** to cycle through **Settings** to locate the **Capture Settings** menu.

4. Press the **Shutter/Select Button** to enter **Capture Settings**.

5. Use the **Power/Mode Button** to locate the desired option to change.

6. Press the **Shutter/Select Button** to select the desired option.

7. Some options have a sub-menu. Use the **Power/Mode Button** to cycle through the sub-menus.

8. Press the **Shutter/Select Button** to select a highlighted option.

9. To exit, hold down the **Shutter/Select Button** for two seconds or cycle through to **EXIT** and press the **Shutter/Select Button** to select it.
CAPTURE SETTINGS

You can customize the way your HERO3+ camera captures Video and Photos in the Capture Settings menus, such as Upside Down, Looping Video and White Balance.

**UPSIDE DOWN**

Mounting your HERO3+ **Upside Down** but wish the files to appear upright when viewing or editing? This setting eliminates the need to flip your Video or Photos after recording.

- **Camera right side up (Default)**
- **Camera upside down**

**SPOT METER**

Turn on **Spot Meter** when filming from within a dark space pointing the camera into a brighter setting, such as filming the outdoors from within a car. When **Spot Meter** is set to **ON**, 🕳️ appears in the LCD window.

- **OFF** (Default)
- **ON**
Simultaneous Video and Photo mode, allows you to simultaneously capture both Videos and Photos. You can set the camera to take a Photo every 5 seconds, 10 seconds, 30 seconds or 60 seconds while you record Video. To set your camera to Picture In Video mode, verify that a supported Video resolution is selected and that Protune is turned OFF.

- OFF
- 5 seconds
- 10 seconds
- 30 seconds
- 60 seconds

**NOTE:** You can capture Simultaneous Video and Photo in one of the following resolution settings: 1080p24 fps, 1080p30 fps, 720p60 fps or 1440p24 fps.

<table>
<thead>
<tr>
<th>PRO TIP:</th>
<th>Video Dimensions</th>
<th>Megapixel</th>
</tr>
</thead>
<tbody>
<tr>
<td>16:9 (1080p, 720p)</td>
<td>8MP</td>
<td></td>
</tr>
<tr>
<td>4:3 (1440p)</td>
<td>12MP</td>
<td></td>
</tr>
</tbody>
</table>

While capturing Video you can manually take a Photo at any time by simply pressing the Power/Mode Button 🌟.
**Looping Video** mode allows you to record a continuously looping video that overwrites itself until you press the **Shutter/Select Button** button to stop it. **Looping Video** is not available if **Protune** mode is turned **ON**.

**Looping Video options include:**

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF</td>
<td>(Default) Camera records until memory card is full, then overwrites with a new video.</td>
</tr>
<tr>
<td>Max video</td>
<td>Camera records until memory card is full, then overwrites with a new video.</td>
</tr>
<tr>
<td>5 min video</td>
<td>Camera records for 5 minutes, then begins a new video, progressively overwriting the previous 5 minute video.</td>
</tr>
<tr>
<td>20 min video</td>
<td>Camera records for 20 minutes, then begins a new video, progressively overwriting the previous 20 minute video.</td>
</tr>
<tr>
<td>60 min video</td>
<td>Camera records for 60 minutes, then begins a new video, progressively overwriting the previous 60 minute video.</td>
</tr>
<tr>
<td>120 min video</td>
<td>Camera records for 120 minutes, then begins a new video, progressively overwriting the previous 120 minute video.</td>
</tr>
</tbody>
</table>

**PRO TIP:**

Multiple chapter files are written to your memory card. This allows for small segments of content to be overwritten during loop recording. When viewing on a computer screen, you will see separate files for each time segment. Use video editing software if you wish to combine files into a longer video.

**NOTE:** **Looping Video** is disabled in **Protune** mode.
Protune is a video mode that unlocks the camera’s full potential, yielding stunning image quality and cinema-caliber video optimized for professional productions. Protune gives content creators more flexibility and workflow efficiency than ever before.

**PROTUNE KEY BENEFITS:**

**High-Quality Image Capture**
Protune’s high data rate captures images with less compression, giving content creators higher quality for professional productions.

**Neutral Color**
Protune’s neutral color profile offers more flexibility during post-production color correction. Protune’s log curve captures more detail in shadows and highlights.

**Film/TV Frame Rate Standard**
Record video in cinema-quality 24 fps and easily intercut GoPro content with other source media without the need to perform fps conversion.

Turning Protune **ON** affects several settings and features, such as Video Resolution, fps, FOV and Simultaneous Video and Photo.

<table>
<thead>
<tr>
<th></th>
<th>(Default)</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF</td>
<td></td>
</tr>
<tr>
<td>ON</td>
<td></td>
</tr>
</tbody>
</table>
CAPTURE SETTINGS

**PROTUNE RESOLUTIONS (continued):**

*Protune* is available in the following HERO3+: Black Edition resolutions:

<table>
<thead>
<tr>
<th>RESOLUTION</th>
<th>fps</th>
</tr>
</thead>
<tbody>
<tr>
<td>4K / 4K 17:9</td>
<td>15/12.5,12</td>
</tr>
<tr>
<td>2.7K / 2.7K 17:9</td>
<td>30/25, 24</td>
</tr>
<tr>
<td>1440p</td>
<td>48, 30,25,24</td>
</tr>
<tr>
<td>1080p</td>
<td>60, 50, 48, 30, 25, 24</td>
</tr>
<tr>
<td>1080p SuperView</td>
<td>48, 30, 25, 24</td>
</tr>
<tr>
<td>960p</td>
<td>100, 60, 50</td>
</tr>
<tr>
<td>720p</td>
<td>120, 100, 60, 50</td>
</tr>
<tr>
<td>720p SuperView</td>
<td>100, 60, 50</td>
</tr>
</tbody>
</table>

**COMPATIBILITY:** *Protune* is compatible with professional color correction tools, editing programs and GoPro Studio.
**WHITE BALANCE**

*White Balance* adjusts the overall color tone of videos. Standard video records in **AUTO White Balance** only. Advanced users can make adjustments to the *White Balance* settings when in **Protune** mode. Videos recorded with **Protune** turned **ON** require that you post process the video with an editing program to achieve your desired finish.

<table>
<thead>
<tr>
<th>PRO TIP:</th>
<th>Consider manually setting <strong>WHITE BALANCE</strong> to the following settings when operating in the following conditions:</th>

**Cam RAW (Camera RAW)**

The HER03+ camera can record **Video** in **Protune** mode in **Cam RAW**. GoPro **Cam RAW** mode yields a minimally processed data file direct from the image sensor that allows for more precise adjustments to be made in post-process. Working in this mode takes full advantage of the image sensor’s capabilities.

| PRO TIP:           | If you’ve changed your **WHITE BALANCE** settings in **Protune** and then switch back to Standard recording, the **WHITE BALANCE** settings will automatically revert back to **AUTO**. |
From the EXIT screen press the Shutter/Select Button to exit the Capture Settings menu.

PRO TIP: If at any time you wish to exit from the CAPTURE SETTINGS menu, press and hold the Shutter/Select Button for two seconds.
To enter the Set Up menu:

1. Verify the camera is in **Settings** mode. If the **Settings** icon on your camera’s LCD screen is not showing, press the **Power/Mode Button** repeatedly until it appears.

2. Press the **Shutter/Select Button** to enter the **Settings** menu.

3. Use the **Power/Mode Button** to cycle through **Settings** to locate the **Set Up** menu.

4. Press **Shutter/Select Button** to enter **Set Up**.

5. Use the **Power/Mode Button** to locate the desired option to change.

6. Press **Shutter/Select Button** to select the desired option.

7. To exit, hold down **Shutter/Select Button** for two seconds or cycle through to **EXIT** and press **Shutter/Select Button** to select it.
You can set the camera’s **Default** mode at power up to any of the following modes:

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Video" /></td>
<td><strong>VIDEO</strong> (default)</td>
</tr>
<tr>
<td><img src="image" alt="Photo" /></td>
<td><strong>PHOTO</strong></td>
</tr>
<tr>
<td><img src="image" alt="BurstPhoto" /></td>
<td><strong>BURST PHOTO</strong></td>
</tr>
<tr>
<td><img src="image" alt="TimeLapse" /></td>
<td><strong>TIME LAPSE</strong></td>
</tr>
</tbody>
</table>
SET UP

ONE BUTTON

With **One Button** mode selected, the camera automatically begins recording when powering the camera **ON**. **One Button** mode can be configured to start in **Video** or **Time Lapse**.

**OFF** (Default)

**ON**

To turn **One Button** mode **ON**:  

1. Verify the camera is in **Settings** mode. If the **Settings** icon on your camera’s LCD screen is not showing, press **Power/Mode Button** repeatedly until it appears.

2. Press the **Shutter/Select Button** to enter the **Settings** menu.

3. Use the **Power/Mode Button** to cycle through **Settings** to locate the **Set Up** menu.

4. Press the **Shutter/Select Button** to enter **Set Up**.

5. Use the **Power/Mode Button** to cycle through to locate **One Button** mode.

6. Press the **Shutter/Select Button** to enter **One Button** menu.

7. Use the **Power/Mode Button** to cycle through options.

8. Press the **Shutter/Select Button** to select a highlighted option.

9. To exit, hold down the **Shutter/Select Button** for two seconds or cycle through to **EXIT** and press the **Shutter/Select Button** to select it.

The next time you power your camera **ON**, it will begin recording in its **Default Power Up Mode**. To stop recording, push and hold for two seconds.
ONE BUTTON MODE (continued)

To exit One Button mode:

1. Power camera ON.

2. Press and hold the Shutter/Select Button until shows in the LCD window.

3. Press the Shutter/Select Button to enter.

4. Use the Power/Mode Button to highlight OFF.

5. Press the Shutter/Select Button to select it.

6. To exit, hold down the Shutter/Select Button for two seconds or cycle through to EXIT and press the Shutter/Select Button.

PRO TIP:
To stop the capture process (VIDEO or TIME LAPSE) when in ONE BUTTON, press and hold the Shutter/Select Button for two seconds. You will return to the ONE BUTTON menu where you can turn ONE BUTTON mode OFF.

NOTE: One Button mode is disabled when connected to Wi-Fi Remote or GoPro App.
## SET UP

### NTSC / PAL

The **NTSC** and **PAL** settings govern **Video** recording frame rate and playback when viewing **Video** on a TV/HDTV. Select **NTSC** when viewing a TV/HDTV in North America. Select **PAL** if viewing on a PAL TV/HDTV (most televisions outside of North America) or if viewing on a PAL TV/HDTV in any region.

### ONSCREEN DISPLAY

To display or hide the recording icons and file information on **Video** or the viewing screen during playback, turn **Onscreen Display (OSD)** **OFF** or **ON**.

SET UP

MONTH / DAY / YEAR / TIME

Set the HERO3+ clock to ensure Video and Photo files are saved with the correct date and time.

To change Month/Day/Year/Time:

1. Verify the camera is in Settings mode. If the Settings icon on your camera’s LCD screen is not showing, press the Power/Mode Button repeatedly until it appears.
2. Press the Shutter/Select Button to enter the Settings menu.
3. Use the Power/Mode Button to cycle through Settings to locate the Set Up menu.
4. Press the Shutter/Select Button to enter the Set Up menu.
5. Use the Power/Mode Button to locate the Month/Day/Year/Time menu.
6. Press the Shutter/Select Button to enter Month/Day/Year/Time menu; Month (MM) will be highlighted.
7. Press the Shutter/Select Button to access the list of months (1 to 12).
8. Use the Power/Mode Button to cycle through list until desired selection is highlighted.
9. Press the Shutter/Select Button to select it.
10. To advance to the next option, press the Shutter/Select Button.
11. Repeat steps 7, 8 and 9 to make selections for day (DD), year (YY), hour (HH) and minutes (MM).
12. To exit, hold down the Shutter/Select Button for two seconds or cycle through to EXIT and press the Shutter/Select Button.

NOTE: If the battery is removed from the camera for an extended period of time Month/Day/Year/Time will need to be set again.
From the **EXIT** screen, press the **Shutter/Select Button** ☺ to exit the **Set Up** menu.

**PRO TIP:** If at any time you wish to exit from the **SET UP** menu, press and hold the **Shutter/Select Button** ☺ for two seconds.
The built-in **Wi-Fi** allows your HERO3+ camera to connect to the Wi-Fi Remote or to the GoPro App using a smartphone or tablet.

**To turn Wi-Fi ON/OFF via the Wi-Fi On/Off Button**:  
Press the **Wi-Fi On/Off Button** to turn **Wi-Fi ON/OFF**. When turning **Wi-Fi ON**, the **Wi-Fi** mode will be set to the most recently used mode.

**PAIRING YOUR HERO3+ WITH THE WI-FI REMOTE**

Before using the Wi-Fi Remote for the first time, you must pair it with your camera.

**On the camera:**

1. Ensure both camera and remote are powered **OFF**.
2. Press the **Power/Mode Button** to power **ON** your HERO3+.
3. Press the **Wi-Fi On/Off Button** to turn **ON** the **Wi-Fi**,
4. Press the **Wi-Fi On/Off Button** again to access the **Wi-Fi** menu .
5. Press the **Shutter/Select Button** to enter the **Wi-Fi** menu .
6. Use the **Power/Mode Button** to cycle to **Wi-Fi RC**, then press the **Shutter/Select Button** to select it.
7. Use the **Power/Mode Button** to cycle to **NEW**, then press the **Shutter/Select Button** to select it.
8. You will see .
On the Wi-Fi Remote:

1. While holding down the **Shutter/Select Button** 🔗, press and release the **Power/Mode Button** ⚪ once to power the remote **ON** into pairing mode.

2. When you see ➔⬅️ on the remote’s screen, you can release the **Shutter/Select Button** 🔗.

3. ✅ will appear on both screens once the devices have paired.

4. The remote will now ask if you want to **CONNECT ANOTHER?** camera.
   a. If you want to connect additional cameras at this time, press the **Shutter/Select Button** 🔗 to select **YES**, then repeat the pairing process from the beginning.
   b. If no, press the **Power/Mode Button** ⚪ to cycle to **NO**, then press the **Shutter/Select Button** 🔗 to select it.

The remote’s LCD screen will mirror the camera’s LCD screen. You can now use the remote to control your camera.
WI-FI + WI-FI REMOTE

USING YOUR HERO3+ WITH THE WI-FI REMOTE

Once you have paired your camera with the Wi-Fi Remote, follow these steps the next time you want to use the remote to control your camera. You only need to pair the camera and remote once.

On the camera:

1. First, ensure both camera and remote are powered OFF.
2. Press the Power/Mode Button to power ON your HERO3+.
3. Press the Wi-Fi On/Off Button to turn ON the Wi-Fi.
4. Press the Wi-Fi On/Off Button again to access the Wi-Fi menu.
5. Press the Shutter/Select Button to enter the Wi-Fi menu.
6. Use the Power/Mode Button to cycle to Wi-Fi RC, then press the Shutter/Select Button to select it.
7. Press the Shutter/Select Button to select CURRENT.
8. You will see.

On the remote:

1. Press the Power/Mode Button to power ON the remote.
2. You will see on the remote’s screen.
3. will appear once camera and remote are connected.

The remote’s LCD screen will mirror the camera’s LCD screen. You can now use the remote to control your camera.
USING YOUR HERO3+ WITH THE GOPRO App (FREE)

The GoPro App lets you control your camera remotely using a smartphone or tablet. Features include full camera control, live preview, playback and sharing of select content and more.*

Follow these steps to connect your HERO3+ to the GoPro App.

1. Download the GoPro App to your smartphone or tablet at the Apple App Store, Google Play or Windows Phone marketplace.

2. Press the **Power/Mode Button** to power camera **ON**.

3. Press the **Wi-Fi On/Off Button** twice, then press the **Shutter/Select Button** to enter Wi-Fi menu.

4. Use the **Power/Mode Button** to cycle through options, press the **Shutter/Select Button** to select **GoPro App**.

5. In your smartphone’s or tablet’s Wi-Fi network settings, connect to the camera’s Wi-Fi network. The network name will begin with “GOPRO-BP-”, followed by a series of letters/numbers.

6. Enter the password “goprohero”. (This is the camera’s default password. You can customize the password at gopro.com/update. If you’ve already customized the password, enter that password instead of “goprohero”.)

7. Open the GoPro App on your smartphone or tablet. You will now be able to control the camera with your smartphone or tablet plus view, playback and share select content.*

**PRO TIP:** See what your HERO3+ sees by viewing it on your smartphone or tablet’s screen.

*For device compatibility, please see [gopro.com](http://gopro.com).
STORAGE/MICROSD CARDS

The HERO3+ camera is compatible with 4GB, 8GB, 16GB, 32GB and 64GB capacity microSD, microSDHC and microSDXC memory cards. You must use a microSD card with a Class 10 speed rating. GoPro recommends using brand name memory cards for maximum reliability in high-vibration activities.

**To insert microSD card:**

1. Slide memory card into card slot with label facing front of camera.

2. The card will click into place when fully inserted.

**To remove microSD card:**

1. Place fingernail against edge of memory card and lightly press further into camera.

2. Card will spring out far enough to be removed.

**PRO TIP:** Use care when handling memory cards. Avoid liquids, dust and debris. As a precaution, turn off the camera before inserting or removing the card. Check manufacturer guidelines regarding use in acceptable temperature ranges.
The HERO3+ camera is compatible with Microsoft® XP (Service Pack 2 or later) and Mac OS X 10.4.11 or later.

**PRO TIP:** Want to see your Video and Photos on the big screen? Connect your HERO3+ directly to your TV/HDTV using a Micro HDMI Cable, Composite Cable or Combo Cable (optional accessories, sold separately).
TRANSFERRING FILES

TO TRANSFER VIDEO AND PHOTO FILES TO A COMPUTER

On a PC:
1. Connect the camera to the computer using included USB cable.
2. Press the **Power/Mode Button** ![mode] to turn **ON** the camera.
3. Double click “My Computer” and locate “Removable Disk”.
4. If “Removable Disk” is not showing, close “My Computer” folder and reopen it. The “Removable Disk” icon should appear.
5. Double click “Removable Disk” icon.
6. Double click “DCIM” folder icon.
7. Double click “100GOPRO” icon to view all **Photo** and **Video** files.
8. Copy files to the computer or external hard drive.

On a Mac:
1. Connect the camera to Mac using included USB cable.
2. Press the **Power/Mode Button** ![mode] to turn **ON** the camera.
3. Icon will appear on desktop. Double click the icon to access files.
4. Copy files to computer or external hard drive.
TO VIEW VIDEOS AND PHOTOS

Videos and Photos can be viewed on a TV/HDTV or the LCD Touch BacPac (optional accessory, sold separately).

PLAYBACK ON TV/HDTV

To browse Videos and Photos:

1. Plug the camera into a TV/HDTV with a Micro HDMI Cable, Composite Cable or Combo Cable (optional accessories).
2. Turn camera ON.
3. On your camera, press the Power/Mode Button to cycle to Playback. Press the Shutter/Select Button.
4. HERO3+ displays thumbnail previews of all Videos and Photos on the SD card. Photo sets taken in Continuous Photo, Photo Burst and Time Lapse display the first Photo in a series.
5. While in thumbnail preview, use the Power/Mode Button to cycle through thumbnails. Press the Shutter/Select Button to view.
6. Use ← and → to navigate backward and forward to see more media files on your memory card.
7. Depending on whether you are viewing Videos or Photos, different control options will appear. Use the Power/Mode Button and the Shutter/Select Button to navigate.

NOTE: Burst Photo and Time Lapse files will display the first Photo in the series. To view all Photos in a series, use the Power/Mode Button to select View and press the Shutter/Select Button.
PLAYBACK

PLAYBACK ON LCD TOUCH BACPAC (SOLD SEPARATELY)

Playback using the LCD Touch BacPac™ follows a similar process/procedure as described with a few slight variations.

› See the LCD Touch BacPac User Manual for more information.
MAXIMIZING BATTERY LIFE

To maximize battery life, turn Wi-Fi OFF. To maximize battery life when shooting longer-duration activities, turn OFF or detach the LCD Touch BacPac™ (optional accessory, sold separately). Extreme cold temperatures may decrease battery life. To maximize battery life in cold conditions, keep camera in a warm place prior to use. Shooting with Protune mode turned ON will increase power consumption.

*Based on GoPro engineering testing. Actual performance may vary based on settings, environmental conditions, wireless connectivity and other factors. Maximum battery capacity will normally decrease with time and use.
CHARGING THE BATTERY

The battery icon displayed in the camera’s LCD will blink when the battery drops below 10%. If recording is occurring when battery reaches 0%, the camera will save the file and power OFF.

To charge the battery:

1. Connect the camera to a computer or USB power supply (such as the GoPro Wall Charger or GoPro Auto Charger).

2. The red **Status Indicator Light** remains **ON** while the battery is charging.

3. The red **Status Indicator Light** will turn **OFF** when the battery is fully charged.

The battery will charge to 80% in one hour and 100% in two hours when using GoPro’s 1000mAh USB-compatible Wall or Auto Charger. Other chargers may charge at a slower rate.

You can also charge the battery outside the camera using the Dual Battery Charger (optional accessory, sold separately).

No damage will occur to the camera or the battery if used prior to full charge. Spare batteries and additional charging accessories are available at: [gopro.com](http://gopro.com).
USING THE CAMERA WHILE CHARGING

You can capture Video and Photos while charging the camera’s battery. Simply plug the camera into a computer, any USB charging devices, or for best results, the GoPro Auto or Wall Chargers using the included USB Cable. Performance of non-GoPro chargers cannot be guaranteed.

REMOVING THE BATTERY FROM THE CAMERA

The HERO3+ battery is designed to have a tight fit to maximize reliability in high-vibration activities.

To remove the battery:

1. Remove the battery door by placing your thumb in the indentation in the battery door (on the back of the camera) and sliding it to the left.

2. Allow the door to pop out. Grasp the battery pull-tab and remove from the camera.
IMPORTANT WARNING MESSAGES

MICROSD CARD MESSAGES

<table>
<thead>
<tr>
<th>NO SD</th>
<th>No card present. The camera requires a microSD, microSDHC or microSDXC card to record Video or take Photos.</th>
</tr>
</thead>
<tbody>
<tr>
<td>SD FULL</td>
<td>Card is full. Delete files or swap card.</td>
</tr>
<tr>
<td>SD ERROR</td>
<td>Camera unable to access card.</td>
</tr>
</tbody>
</table>

FILE REPAIR ICON ON THE LCD

If you see the File Repair icon on the LCD screen, your Video file was corrupted during recording. Press any button and the camera will repair the file.

TEMPERATURE WARNING ICON ON THE LCD

The Temperature Warning icon will appear on the LCD when the camera has become too hot and needs to cool down. Simply let it sit and cool before attempting to use it again. Your camera will not allow itself to overheat—do not worry, no damage has occurred.
ASSEMBLING THE CAMERA HOUSING

To remove camera from housing:

1. Lift front of latch up to disengage from camera housing.
2. Pivot latch backward and pull up to release backdoor.
3. Pull open housing backdoor and remove camera.

To secure camera in housing:

1. Open housing and drop camera into position.
2. Close housing backdoor.
3. Pivot hinged arm backwards and hook lip of latch into grooved top of housing backdoor.
4. Push latch down to snap into place.
Your HERO3+ camera housing comes with two types of backdoors—Skeleton (non-waterproof) and Standard (waterproof).

**Skeleton Backdoor**

The Skeleton Backdoor (non-waterproof) provides better sound quality by allowing more sound to reach the camera’s microphone. It also reduces wind noise at speeds up to 100mph when mounted on helmets, motorcycles, bikes and other fast-moving vehicles. Use this backdoor only when sand, excessive dirt/dust and water damage is not a risk. This backdoor is also recommended for use inside vehicles.

**Standard Backdoor**

The Standard Backdoor makes the housing waterproof to 131’/40m. Use this door when you need to protect the camera from water and other environmental hazards.

**PRO TIP:** Apply Rain-X or a similar anti-beading solution to the camera housing lens to prevent water spots from forming when using your camera in rain or water. When Rain-X is not available, periodically licking your lens is a good backup solution. Trust us, it works.
SWAPPING BACKDOORS

You can switch the Backdoor of your HERO3+ camera to suit your activity and shooting conditions.

To change backdoor:

1. Open the Backdoor of the housing so that it is hanging downwards.
2. Pull downwards on the Backdoor until it snaps free from the hinge.
3. Line up replacement Backdoor into the hinge opening.
4. Push upwards on the Backdoor until it clicks into place.
The rubber seal that lines the camera housing forms a waterproof barrier that protects your HERO3+ in wet and underwater conditions.

Keep the camera housing’s rubber seal clean. A single hair or grain of sand can cause a leak and damage your camera.

After every use in salt water, rinse the outside of the camera housing with non-salt water and dry. Not doing this can eventually cause corrosion of the hinge pin and salt buildup in the seal, which can cause failure.

To clean the seal, rinse in fresh water and shake dry (drying with a cloth may cause lint to compromise the seal). Re-install the seal into the grooves in the backdoor of the camera housing.

**WARNING:** Failure to follow these steps each time you use your HERO3+ can result in leaks that may damage or destroy your camera. Your warranty does not cover water damage resulting from user error.
ATTACHING YOUR CAMERA TO MOUNTS

To attach your HERO3+ camera to a mount, you will need a Quick Release Buckle, thumb screw or hardware depending on the mount you are using. For more information on mounts, visit: gopro.com/support.

Quick Release Buckle + Thumb Screw + Slim housing = Complete Unit

USING CURVED + FLAT ADHESIVE MOUNTS

The Curved + Flat Adhesive Mounts make it easy to attach the camera to curved and flat surfaces of helmets, vehicles and gear. Using the Quick Release Buckle, the assembled camera housing can be clicked on and off the secured Curved or Flat Curved Adhesive Mounts.
# USING THE MOUNTS

## ATTACHING ADHESIVE MOUNTS

<table>
<thead>
<tr>
<th><strong>PRO TIPS:</strong></th>
<th><strong>APPLICATION GUIDE</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Apply to clean surface only. Wax, oil, dirt or other debris will reduce adhesion, which can result in a weak bond and risk of losing camera should connection fail.</strong></td>
<td><strong>Attach mount in room temperature conditions. Mount’s adhesive will not bond properly if applied in cold or damp environments to cold or damp surfaces, or if the surface is not room temperature.</strong></td>
</tr>
<tr>
<td><strong>Attach mount in room temperature conditions. Mount’s adhesive will not bond properly if applied in cold or damp environments to cold or damp surfaces, or if the surface is not room temperature.</strong></td>
<td><strong>Adhesive mounts should only be mounted to smooth surfaces; porous or textured surfaces will not enable a proper bond. When applying mount, firmly press into place and ensure full contact over entire surface.</strong></td>
</tr>
<tr>
<td><strong>For best results, attach the mount 24 hours prior to use.</strong></td>
<td></td>
</tr>
</tbody>
</table>

▶ See: [gopro.com/support](http://gopro.com/support) for more information on mounts.

### Locking Plug

Using the HERO3+ in high impact sports such as surfing or skiing where significant impact may occur? Use the special Locking Plug which securely locks the Quick Release Buckle fingers into place—helping prevent accidental housing release from the mount. The circular ring fits over the thumbscrew and acts as a leash to prevent dropping or losing the locking plug.
HANDLING THE WI-FI REMOTE

CAUTION
Failure to follow these safety instructions could result in damage to the Wi-Fi Remote or other property.

HANDLING
The Wi-Fi Remote contains sensitive components. Do not drop, disassemble, open, crush, bend, deform, puncture, shred, microwave, incinerate, paint or insert foreign objects into either product. Do not use the Wi-Fi Remote if it has been damaged—for example, if the product is cracked, punctured or damaged by water.

KEEPING THE WI-FI REMOTE’S LCD CLEAN
Clean LCD screen immediately if it comes into contact with any contaminants that may cause stains, such as ink, dyes, makeup, dirt, food, oils and lotions. To clean the LCD, use a soft, slightly damp, lint-free cloth. Avoid getting moisture in openings. Don’t use window cleaners, household cleaners, aerosol sprays, solvents, alcohol, ammonia or abrasives to clean LCD.

WATER RESISTANCE
Do not submerge the Wi-Fi Remote in more than 10ft / 3m of water. Do not attempt to dry the Wi-Fi Remote with an external heat source, such as a microwave oven or hair dryer. Damage to the Wi-Fi Remote caused by excessive water pressure is not covered under warranty.

USING CONNECTORS AND PORTS
Never force a connector into a port. Check for obstructions on the port. If the connector and port don’t join with reasonable ease, they probably don’t match. Make sure that the connector matches the port and that you have positioned the connector correctly in relation to the port.

KEEPING THE WI-FI REMOTE WITHIN ACCEPTABLE TEMPERATURES
The Wi-Fi Remote is designed to be operated in temperatures between 0° C and 40° C and stored in temperatures between 0° C and 70° C. Extreme temperatures may temporarily affect battery life, or affect the functionality of the Wi-Fi Remote. Avoid dramatic changes in temperature or humidity when using the Wi-Fi Remote as condensation may form on or within the product. When you’re using the Wi-Fi Remote or charging the battery, it is normal for the product to get warm. The exterior of the product functions as a cooling surface that transfers heat from inside the unit to the cooler air outside.

USE WITH OTHER ELECTRONIC DEVICES
Users of digital transceivers (avalanche beacons) should consult with their user manuals regarding use of GoPro cameras and other GPS or electronic devices when engaged in the avalanche beacon search mode in order to limit potential interference.
GoPro is dedicated to providing the best possible service.
To reach GoPro Customer Support, visit gopro.com/support.
