Important note
This manual explains how to safely operate the VPC-GH1EX, VPC-GH1GX, VPC-GH1PX, VPC-GH1TA and VPC-GH2.
Any information regarding only one of these products will be labeled as such.

Please read these instructions carefully before using the camera. Make sure to read and understand the separate booklet “SAFETY MANUAL”. Keep this manual in a safe place for later reference.
For first-time users
Please read this manual to familiarize yourself with your camera’s operation.

To use the various camera features
The Instruction Manual that explains the features in detail can be obtained from our website (page 45).

To use additional features
Visit the Sanyo website to learn how to adjust the camera settings for various shooting scenes. There you'll also find information about the software for playing back data recorded with your camera and for burning (recording) DVDs (page 45).

You may find the answers to questions or problems concerning camera operation in the sections “COMMONLY ASKED QUESTIONS” (page 52).

Symbols used in this manual
HINT Points giving some extended instructions or special points to pay attention to.
CAUTION Points that require special attention.
(page xx) Refer to the page indicated for detailed information.
Preparing the camera

1 Insert the battery pack.

About saving your recorded data

- If you wish to use an SD Memory Card, refer to page 15 to install the card in the camera.
- An SD Memory Card is not included with your camera. Please purchase a commercially sold card.
- This camera has an internal memory, so you can shoot and record without an SD Memory Card installed.
Shooting

1. Press the ON/OFF button for at least 1 second to turn the camera on.
   - If the screen to set the date and time appears, press the MENU button 2 times to cancel it. For how to set the date and time, see page 23.

2. Record.
   - To record a video clip:
     - Press the [ ] button to begin recording a video clip.
     - Press the [ ] button again to end the recording.
   - To take a photo:
     - Press the [ ] button.
     - A still image is captured.
Before capturing those important shots, be sure to first take a test shot to confirm that your camera is set up and ready to go.

- Sanyo declines any claim for compensation for recorded contents etc. in case of photographing or recording failure due to a chance camera or card flaw.

## Playback

1. Press the REC/PLAY button.
   - The display changes to the Playback Screen.

2. Select the image to play back.
   - Use the arrow keys to move the orange frame to the image you wish to play back.
   - The image information for the framed image is shown in the bottom part of the monitor.

3. Press the SET button.
   - Playback begins.
   <To return to the recording mode>
   - Press the REC/PLAY button.

## Deleting files

1. On the screen in step 2, move the orange frame to the file you wish to delete, and press the MENU button.

2. Select “DELETE”, and press the SET button.
3 Select “DELETE SINGLE”, and press the SET button.

4 Select “DELETE”, and press the SET button.
   • If you press [◄] or [►], the screen to delete a different file will appear.

5 When you are finished deleting files, press the MENU button.
   • Pressing the MENU button 3 times will return you to the screen in step 2.

When you are finished using the camera...

Press the ON/OFF button for at least 1 second to turn the camera off.
Copy data from your camera to the computer

Connect your camera to a computer, and copy the desired data to the computer.

1 Turn on the computer, and use the supplied dedicated USB interface cable to connect your camera to the computer.
   - Connect the cable between the camera’s USB/AV terminal and the computer’s USB connector.

2 Turn on the camera (page 20).
   - The USB Connection Screen appears on the camera’s monitor.

Supplied dedicated USB interface cable

MENU CANCEL OK
3 Select “COMPUTER”, and press the SET button.
   • The screen to select the computer connection mode appears.

4 Select “CARD READER”, and press the SET button.
   • The message [Found New Hardware] appears in the task tray, showing that the camera is recognized as a drive.
   • The card is recognized (mounted) as a disk, and the [XACTI (E:)] icon appears in the [My Computer] window.
   • The drive name (E:) may be different on your computer.

<If the access menu (page 50) appears>
   • Click on [Exit] to cancel the access menu.

5 Select an action.
   • If the [XACTI (E:)] window appears automatically, select the desired procedure from the window.

6 Copy files from the camera to a computer.
Dismounting the camera

CAUTION

• To disconnect your camera, be sure to follow the procedure below. Failure to follow this procedure may cause faulty operation of your computer or corrupt the files in your camera.

1 Left-click on the icon for safely removing hardware in the task tray.
   • A list appears showing the devices connected to the computer’s USB connector.

2 Left-click on the camera drive (E:).
   • The camera can now be disconnected.
   • The drive name (E:) may be different on your computer.

No software is included with this camera. Please visit our website to obtain the available software.

ABOUT THE CARD

Media cards that can be used with this camera

The type of card that can be inserted into and used with this camera is:
- SD Memory Card
- SDHC Memory Card
- SDXC Memory Card

What “card” means in this manual

- In this manual, SD Memory Cards, SDHC Memory Cards and SDXC Memory Cards that can be used in this dual camera are referred to as “card”.

CHARGING THE BATTERY PACK

Please charge the supplied battery pack before using it.

1 Connect the supplied power cord to the socket on the battery pack charger.
   • Insert the connector straight and securely.

2 Insert the battery pack in the battery charger.
   • Insert it in the direction indicated by the [▲] mark on the battery pack.

3 Plug the power plug into a power outlet (AC 100 V to 240 V).
   • Charging begins.
   • The CHARGE indicator is lit during charging.

4 When the CHARGE indicator turns off, unplug the power cord from the power outlet, and remove the battery pack from the charger.

HINT
• Charging takes approximately 120 min.
Charging the battery pack

Be sure to fully charge the supplied or separately sold battery pack before using it in your camera. For charging the battery pack, use the supplied charger.
Charge the battery pack if it is being used for the first time, and recharge it whenever the remaining charge is low.

Does the battery pack feel hot?
- During charging, the charger and battery pack will be warm. This is normal and does not indicate a malfunction.

If there is interference to your TV or radio during charging...
- Move the battery pack and charger further away from the TV or radio.

Ambient temperature during charging
- It is recommended that the ambient temperature during charging be between about 10 °C and 35 °C (50 °F and 95 °F). Due to the characteristics of the battery pack, at temperatures below 0 °C (32 °F), it may not be possible to sufficiently charge it.
- When the battery pack temperature is high, the safety function may be activated and halt charging.

Charge a battery pack in the following cases
- A battery pack which has not been used for a long time
- Newly purchased battery pack

FOR AMERICAN USERS:
- Use a UL Listed, 1.8 to 3 m (6 to 10 ft.), Type SPT-2 or NiSPT-2, AWG No.18 power supply cord, rated for 125 V 7 A, with a non-polarized NEMA 1-15P plug rated for 125 V 15 A.
About the CHARGE indicator
The CHARGE indicator shows the status of the battery pack and the charger. Please refer to the following table if the indicator flashes abnormally.

<table>
<thead>
<tr>

<td>Problem with the battery pack or battery pack charger</td>
</tr>
<tr>
<td></td>
<td>• Immediately remove the battery pack from the charger.</td>
</tr>
<tr>
<td></td>
<td>• Do not use an abnormal battery pack. (The usable life of the battery pack has probably expired.)</td>
</tr>
</tbody>
</table>

CAUTION
Do not charge the battery pack immediately after the camera has been in continuous use for a long time
• The battery pack becomes hot when the camera is used continuously for a long time. If you attempt to charge the battery pack in this state, the safety function may be activated and it may not be possible to charge the battery pack. Wait until the battery pack has cooled down before attempting to charge it.
INSTALLING THE CARD

Be sure to format a newly purchased card or one that was used in another device before using it in your camera (page 16). If an unformatted card is used, the card itself may become unusable.

<When removing the card...>

- To remove the card, press it in, and then release. The card will protrude slightly, and you can then pull it out.
**CAUTION**
*Do not attempt to forcibly remove the card*
- Doing so may damage the card or the stored files.

*If the multi-indicator is flashing red...*
- Never remove the card when the multi-indicator is flashing red, as doing so may result in loss of files stored in the card.

**HINT**
*To format a card*
1. Insert the card in the camera, and press the ON/OFF button (pages 15 and 20).
2. Set the camera to the NORMAL mode (page 27).
3. Press the MENU button.
4. Select the [ ] tab, and press the SET button.
5. Select “FORMAT” and press the SET button.
- The Format Screen appears. Follow the instructions on the screen to format the card.

*Shooting without a card installed*
- When a card is installed, images are recorded to and played back from the card. When no card is installed, images are recorded to and played back from the camera’s internal memory. When the camera is turned on with no card installed, the internal memory icon is shown on the monitor to let you know that the images you capture will be saved to the camera’s internal memory.
INSTALLING THE BATTERY PACK

Please charge the supplied battery pack before using it.

1. Push out
2. Open
3. Insert the battery pack
4. Close the battery cover.
CAUTION
Does the battery pack appear swollen?
- The lithium-ion battery used in this camera may expand slightly when stored in a hot environment or repeatedly used, but this is not a safety hazard. However, a battery that is difficult to insert because it has become swollen may then be impossible to extract from the battery compartment. In this case, please discontinue its use and replace it with a new battery.

Do not use the battery with the outer covering or label removed
- Doing so may result in malfunction.

HINT
About the internal backup battery
- This camera’s internal battery serves to maintain the date and time settings, as well as the shooting settings. The backup battery will be fully charged when the battery pack is kept in the camera continuously for about 2 days. In the fully charged state, the backup battery will maintain the camera settings for about 7 days.

When not using the camera for a long time, remove the battery pack
- A small amount of power is still used even if the camera is turned off, and it is therefore recommended that the battery pack be removed from the camera if it is not going to be used for a long time. Note that when the battery pack is removed for a long period, the time and date settings may be cleared. Before using your camera again, be sure to confirm that the camera settings are correct.

To prolong the life of the battery pack
- Although the battery pack is an expendable item, you can maximize the life of the battery by heeding the following suggestions.
  - Do not leave the battery under the hot summer sun or exposed to other high-temperature environments.
  - Do not continually recharge the battery when it is already fully charged. After fully charging it once, for example, use it for a while to partially discharge it before recharging it again.
  - When the battery is not to be used for a long time, if possible store the partially charged (not fully charged) battery in a cool environment.
About the temperature alert icon 📸🌡️

During camera use, if the temperature of the battery or inside the camera (excluding the battery) rises, a temperature alert icon 📸🌡️ will appear as described below.

- **When the battery or internal camera (excluding battery) temperature rises during use**
  - During camera use, if the temperature of the battery or inside the camera (excluding the battery) rises, a 📸🌡️ icon lights on the monitor. It is still possible to record and play back even when the 📸🌡️ icon is lit; however it is advised that you discontinue use as soon as possible and turn the camera off.
  - If the temperature rises further, the 📸🌡️ icon will start to flash, and the camera will turn off automatically. The camera cannot be turned on until the temperature has dropped (or as long as the 📸🌡️ icon remains flashing). Please wait until the temperature has dropped before resuming use.
  - During video recording, a countdown indicator will show the time starting about 15 seconds before shutdown. When the indicator shows 0 seconds, recording stops.
  - If the camera is turned off while the temperature is high (that is, while the 📸🌡️ icon is flashing), it cannot be turned on again until the temperature has dropped (or as long as the 📸🌡️ icon remains flashing).
TURNING THE CAMERA ON AND OFF

Turning on the camera

1. Open the monitor unit, and press the ON/OFF button for at least 1 second.
   - If you briefly press the ON/OFF button, once, the camera will switch to the power save mode.
   - If you press the REC/PLAY button for at least 1 second, the camera turns on in the playback mode.

Turning off the camera

1. Press the ON/OFF button for at least 1 second.
   - The camera turns off.
Turning on the camera when the power save (sleep) mode is active

In order to preserve battery pack power, the power save (sleep) function will automatically turn off the camera after about 1 minute of no use during shooting, or about 5 minutes of no use during playback (factory-preset setting).

- When the power save mode is active, you can restore the power by any of the following methods:
  - Press the ON/OFF button.
  - Press the [ ] button.
  - Open the monitor unit.
- After the power save mode has been active for about 1 hour, the camera will switch to the standby mode. In this case, you can restore the power by pressing the ON/OFF button, or by closing and then opening the monitor unit.
- When the AC adaptor (optional) is connected, the power save mode will become active about 5 minutes after the camera is turned on (factory-preset setting).
- When the camera is connected to a computer or printer, the power save mode becomes active after about 12 hours.
HINT
To immediately activate the power save mode
• Press the ON/OFF button briefly to activate the power save function.

About the standby mode
• To turn off the camera only briefly, you can close the monitor unit to put the camera in the standby mode. The standby mode uses almost no power. When the monitor unit is opened again, the camera turns on immediately and you are ready to shoot or view images without any delay.

CAUTION
If the  icon appears...
• When a picture is taken, the date and time it was captured are recorded with it. If the date and time settings have not been completed (page 23), the date and time cannot be recorded with the captured images. For this reason, immediately after the camera is turned on, the “Set date and time” reminder briefly appears, after which the  icon is shown on the Recording Screen. To have the date and time recorded with the images, please complete this setting before capturing images.

<Caution>  
• Due to the characteristics of the camera, the outer surface may become warm during use, but this does not indicate a malfunction.  
• If the camera starts to feel uncomfortably hot during use, you might temporarily discontinue use until it cools down, or try holding it in your other hand for a while. Please use a tripod or other support when using the camera for a long time.
DATE AND TIME SETTING

The camera will record the date and time an image or audio recording is taken so that you can display them during playback. Therefore, before capturing images, make sure the correct date and time are set.

- To correct the date and time setting, please see under HINT on page 25.

Example: To set the clock to 7:30 p.m. on December 24, 2010

1 Turn on the camera (page 20), and press the SET button.
   - The Clock Set Screen appears.
   - Follow the procedures below to enable or disable the date display during playback, to set the display format for the date, and to set the date and time.
   - To display the Recording or Playback Screen, press the MENU button 2 times.

2 Set the date.
   ① Select “DATE”.
   ② Press the SET button.
      - The Set Date Screen appears.
   ③ Set the date to “2010/12/24”.
      - The date is set in the following order: Set the year → Set the month → Set the day.
      - Press [◄] or [►] to select year, month or day. Press [▲] or [▼] to increase or decrease the number.
   ④ Press the SET button.
3 Set the clock.
   ① Select “TIME”.
   ② Press the SET button.
      • The Set Time Screen appears.
   ③ Set the time to “19:30”.
      • The time is set in the following order: Set the hour → Set the minute.
      • A 24-hour clock is used for the time display.
   ④ Press the SET button.

4 Set the order in which the date is displayed during playback.
   ① Select “DISP”.
   ② Press the SET button.
      • The Set Date Format Screen appears.
   ③ Press [▲] or [▼].
      • Press [▲] to change the displayed date order as follows:
        \[ D / M / Y \rightarrow Y / M / D \rightarrow M / D / Y \]
      Press [▼] to change it in the reverse order.
   ④ Press the SET button.
5 Press the MENU button.
   - The date and time setting is completed.
   - To display the Recording or Playback Screen, press the MENU button.

HINT
- Under normal conditions, while the battery pack is being replaced, an internal battery will maintain the date and time settings. However, there is a small chance the settings may be lost (the backup will last for about 7 days). It is recommended to check that the date and time settings are still correct after replacing the battery pack and before shooting or recording of any type (follow step 1).

To correct the date and time settings
① Turn on the camera.
② Display the Option Setting Menu 1 (page 30).
③ Select “CLOCK SET” and press the SET button.
   - The screen to set the date and time appears.
   - The current date and time settings are shown.
④ Select the line you wish to change, and make the correction.
SWITCHING BETWEEN THE RECORDING MODE AND PLAYBACK MODE

Switch between the recording mode (for recording) and the playback mode (for viewing your recorded images).

1. Turn on the camera (page 20).

2. Press the REC/PLAY button.
   - The mode changes.
   - The mode changes each time the REC/PLAY button is pressed.

---

<Example of the recording mode>

<Example of the playback mode>
SWITCHING THE OPERATING MODE

The “SIMPLE mode” comprises only those functions that are most often used and necessary to operate the camera, while the “NORMAL mode” enables full use of all the camera’s many functions. Select the mode that is suitable for your purposes.

Switching between the SIMPLE and NORMAL modes

1. Turn on the camera (page 20).
   - The previous mode is active.

2. Press the MENU button.
   - The Menu Screen for the active mode appears.

3. Select the operating mode icon, and press the SET button.
   - Switch from the SIMPLE mode to the NORMAL mode, or from the NORMAL mode to the SIMPLE mode.
   - Press the MENU button to cancel the Menu Screen.

![<SIMPLE Mode Menu Screen>]

![<NORMAL Mode Menu Screen>]

Operating mode icon
Accessing/exiting the SIMPLE/NORMAL Mode Menu Screen

1 Set the camera to the recording or playback mode (page 26).

2 Select the desired operating mode (page 27).

3 If the Menu Screen is not displayed, press the MENU button.
   • The Menu Screen appears.
   • To cancel the Menu Screen, press the MENU button.
Using the SIMPLE Mode Menu

4 Press [▲] or [▼] to select the item you wish to change, and press the SET button.
   • The Setting Screen for the selected item appears.
Using the NORMAL Mode Menu

4 Press [▲] or [▼] to select a tab.
   • The Menu Screen for the selected tab appears.

5 Press [▶].
Press [▲] or [▼] to select the item you wish to change, and press the SET button.
• The Setting Screen for the selected item appears.
• To return to the Menu Screen, press the MENU button.

HINT
About the applicable mode indicator
• This indicator shows the shooting mode(s) for which the selected setting is effective.
  📸: This setting is effective during still image shooting.
  🎥: This setting is effective during video clip recording.
  📸🎥: This setting is effective during still image shooting and video clip recording.
VIDEO CLIP RECORDING

1 Turn on the camera (page 20), and set it to the recording mode (page 26).

2 Press the [ ] button.
   • Recording begins.
   • It is not necessary to keep the [ ] button pressed while recording.
   • When the remaining recording time available for the currently recording clip becomes little, a countdown of the remaining recording time appears on the display.

3 End the recording.
   • Press the [ ] button again to stop recording.
SHOOTING SINGLE SHOTS

Capture a still image (single-shot).

1 Turn on the camera (page 20), and set it to the recording mode (page 26).

2 Press the [ ] button.
   ① Press the [ ] button halfway.
      • The autofocus operates, and the image is focused (focus lock).
   ② Continue to gently press the [ ] button all the way.
      • The shutter releases and the image is captured.
      • You can view the captured image on the monitor by keeping the [ ] button depressed when you capture the image.
HINT

Adjusting the monitor brightness
- While the Recording Screen is active, you can quickly access the screen for adjusting the brightness of the monitor by pressing the MENU button for at least 1 second.

What is the camera focusing on?
- A target mark [ ] on the monitor shows the area the camera is focusing on.
- The camera automatically determines the correct focus by measuring from 9 different focus points within the shooting area. If the target mark is at a position that is different from the point you wish to focus on, you can refocus, for example, by changing the shooting angle.
- The large target mark appears when the camera focuses on a wide area in the center of the screen.

Does it seem to take a long time to save images?
- When shooting in dimly lit conditions, it may take some time to save the data to the card.
SHOOT A STILL IMAGE WHILE RECORDING A VIDEO CLIP

You can capture a still image (a single-shot) while recording a video clip.

1 Turn on the camera (page 20), and set it to the recording mode (page 26).
2 Press the [ ] button.
3 When you see a scene you’d like to capture as a still image, press the [ ] button.
4 Press the [ ] button to end the video clip recording.
HINT
• When shooting a still image while recording a video clip, the flash does not operate.
• When the remaining video recording time becomes approximately 50 seconds, it will no longer be possible to capture a still image while recording a video clip. If you intend to capture a still image while recording a video clip, it is suggested that you take note of the remaining video recording time.

About the recording size of still images
• The size of a still image captured during video clip recording depends on the video clip recording size.

<table>
<thead>
<tr>
<th>Video clip recording size setting</th>
<th>Still image recording size</th>
</tr>
</thead>
<tbody>
<tr>
<td>FULL HD Full-ShQ</td>

</tr>
</tbody>
</table>

• It is not possible to capture sequential shots.
MACRO-PHOTOGRAPHY (ZOOM)

Your camera has two zoom functions: optical zoom and digital zoom.

1 **Point the camera lens at the subject.**

2 **Push the zoom switch toward \([T/\text{ }\text{ }]\) or \([W/\text{ }\text{ }]\) to compose the desired image.**
   - \([T/\text{ }\text{ }\text{ }\text{ }]\): Zoom in on the subject.
   - \([W/\text{ }\text{ }\text{ }\text{ }]\): Zoom out.
   - When the zoom switch is pushed, the zoom bar appears on the monitor.
   - When the optical zoom factor is at maximum, zooming stops temporarily. When the zoom switch is pushed toward the \([T/\text{ }\text{ }\text{ }\text{ }]\) side again, the mode changes to the digital zoom mode and zooming continues.

3 **Take the picture.**
   For video clip recording, see page 32.
   For shooting single shots, see page 33.
HINT
When the ZOOM RANGE button is pressed...
- The magnification is approximately doubled (double-range zoom). Press the button again to return to normal magnification.
- The \( \text{\textit{w}} \) icon is shown on the Recording Screen during normal magnification, and a \( \text{\textit{T}} \) icon on the double-range zoom Recording Screen.
PLAYING BACK VIDEO CLIPS AND STILL IMAGES

1 Set the camera to the playback mode (page 26).

2 Select the image to play back.
   • Use the arrow keys to move the orange frame to the file you wish to play back.
   • The image information for the framed image is shown at the bottom of the screen.

3 Press the SET button.
   • The image you selected in step 2 is displayed fullscreen.
   • If a video clip was selected, playback begins.
   <To return to the screen to select playback files>
   Press [▼].

How to save one frame from a video clip as a still image

1 Play back the video clip. Pause the playback at the point you wish to “snap” a photo.

2 Press the [ ] button.
   • The screen to select the aspect ratio of the still image appears. Select the desired aspect ratio, and press the [ ] button. Note, however, that if the video clip aspect ratio is 4:3, you cannot select 16:9.

HINT
The file size for a video clip is very large
• Therefore, be aware that if the video clip is uploaded to a computer to be played back, the computer may not be able to play back the video fast enough, making it appear jerky. (The video will always be displayed properly on the camera monitor or a television.)
• Depending on the card, recording may end even before the possible recording time indicated.

Display the video clip playback point
• During video clip playback, press the MENU button for at least 1 second to display a bar showing the current playback point in the video clip.
• Press the MENU button for about 1 second to cancel the bar.

CAUTION
During video clip playback, the sound of a motor is audible...
• During recording, the sound of the optical zoom movement or autofocus movement was recorded. This is not a malfunction.

If no audio is heard...
• The audio is not played back when the video clip is played back in the frame-by-frame, slow-motion, fast playback or reverse playback mode.
CONNECTING TO A TV

By connecting the camera to a TV, you can play back the recorded files on the TV.

**CAUTION**
*Insert and pull out the cable carefully*
- When connecting the cables, make sure that the cable plugs are correctly oriented and that they match the shapes of the terminal sockets on the devices. Push the plugs in straight when connecting them. If undue force is used to connect a cable, it may permanently damage the connector pins in the terminal socket.
- Do not use excessive force when connecting and disconnecting cables.

**About image output:** The image output destination differs depending on the camera status.

Connecting to a video input terminal
Use the supplied dedicated AV interface cable to connect to a TV.

To USB/AV terminal

Supplied dedicated AV interface cable

Yellow plug: To Video Input terminal
White plug: To Audio Input (L) terminal
Red plug: To Audio Input (R) terminal

Set the input to “VIDEO”.

Connecting to the HDMI terminal
Use a separately sold mini-HDMI cable to connect to a TV.

To HDMI terminal

Mini HDMI cable (optional)

Set the input to “HDMI”.

To HDMI terminal on the TV
PLAYING BACK ON A TV

- After connecting the camera to the television, switch the TV input to the terminal to which the camera is connected.
- The playback method is the same as when viewing images on the camera’s monitor. (Use the TV controls to adjust the volume.)
- The same playback procedure as when playing back with the camera is used to play back audio recordings as well.

CAUTION
Insert and pull out the cable carefully

- When connecting the cables, make sure that the cable plugs are correctly oriented and that they match the shapes of the terminal sockets on the devices. Push the plugs in straight when connecting them. If undue force is used to connect a cable, it may permanently damage the connector pins in the terminal socket.
- Do not use excessive force when connecting and disconnecting cables.
OBTAINING THE INSTRUCTION MANUAL

The Instruction Manual that explains the features in detail can be downloaded from our website.

- “Adobe Reader” is required to view the Instruction Manual. If Adobe Reader is not already installed on your computer, a link to the website from which you can download it can be found on our website.

Contents of the Instruction Manual

Explanations for the functions indicated below can be found in the downloadable Instruction Manual. Please be sure to obtain and use the Instruction Manual.

HINTS FOR TAKING PICTURES
How to obtain the Instruction Manual

1 Remove the card from the camera.
   • The program to access the website is stored in your camera’s internal memory. This program cannot be accessed while a card is installed in the camera.

2 Start your computer, and use the supplied dedicated USB interface cable to connect your camera to the computer.
   • Connect the camera’s USB/AV terminal to the computer’s USB connector.

3 Turn on your camera (page 20).
   • The USB Connection Screen appears on the camera’s monitor.
4 Select “COMPUTER”, and press the SET button.
   • The screen to select the computer connection mode appears.

5 Select “CARD READER” and press the SET button.
   <For Windows users>
   • The screen to access the website for this camera (access menu)
     appears.
   • If the access menu does not appear, double-click on Autorun or
     Autorun.exe.
   <For Mac OS users>
   • When you double-click on the HTML file (index.html) in the camera
     drive, the screen to access the website for this camera (access menu)
     appears.

6 Click on [Go to Xacti GH1/GH2 Web Support Page].
   • The screen to select your desired language appears. When you click
     on a language selection, the website page introducing this camera
     opens.
   • Select and download the desired instruction manual from the website.

HINT
If the Autorun, Autorun.exe or index.html file has been deleted...
   • The Autorun or Autorun.exe and index.html files can be created by using
     the camera to format the camera’s internal memory.

About the Kodak online service
   • When you close the access menu, a dialog box to connect to the website
     introducing Kodak’s online service appears. Check the [No thanks!] option
     button, and then click on the [OK] button.

To access the Web support page next time...
   • When you close the access menu, a shortcut icon is created on your
     desktop so that you can easily access the Web support page in the future.
     The next time you wish to access the Web support page, just double-click
     on the desktop shortcut icon.
ABOUT THE EYE-FI TRANSFER FEATURE

By inserting a commercially sold Eye-Fi card (SD card with wireless LAN) in your camera, you can easily upload photos to your computer, a sharing site, etc. automatically via a Wi-Fi network. Also, you can transfer video files if your Eye-Fi card has a video upload function. The Eye-Fi card settings can be performed using the Eye-Fi Manager, but in addition, the settings below can be performed with this camera.

- Eye-Fi automatic transfer ON/OFF
- Automatic halt of Eye-Fi operation when battery is low
- AC adaptor connection restrictions (may or may not be supported, depending on the camera)
- SSID setup/delete

HINT

- The Instruction Manual for the Eye-Fi transfer feature can be obtained from the Sanyo website (page 49).
  * “Adobe Reader” is required to view the Instruction Manual. If Adobe Reader is not already installed on your computer, a link to the website from which you can download it can be found on the Sanyo website.
## COMMONLY ASKED QUESTIONS

If you have a question about the camera operation, you might find the answer in this compilation of commonly asked questions.

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Why doesn't the power turn on?</td>
<td>Due to cold temperatures, the battery pack temporarily lost its power.</td>
<td>Place the camera in your pocket to warm it up before using it.</td>
</tr>
<tr>
<td>Why is the battery pack consumed so quickly even after it was fully recharged?</td>
<td>The battery pack life has expired.</td>
<td>Keep the battery pack in an environment of 10 to 40 °C (50 to 104 °F).</td>
</tr>
<tr>
<td>Why doesn't recharging end?</td>
<td>The battery pack life has expired.</td>
<td>Replace with a new battery pack. If this is not effective, consult your dealer.</td>
</tr>
<tr>
<td>Why does the icon appear?</td>
<td>The remaining battery pack power is low.</td>
<td>Use the AC adaptor (optional), or replace the battery pack with a fully charged one.</td>
</tr>
<tr>
<td>Why does the multi-indicator flash red?</td>
<td>A recorded file is being saved on the card or internal memory.</td>
<td>Not a malfunction. Wait until the multi-indicator turns off.</td>
</tr>
<tr>
<td>Why doesn't the flash operate?</td>
<td>The camera has determined that the image is bright enough and the flash is not necessary.</td>
<td>Not a malfunction. Capture the image; the camera will determine when the flash is necessary.</td>
</tr>
<tr>
<td>Question</td>
<td>Answer</td>
<td>Action</td>
</tr>
<tr>
<td>------------------------------------------------------------------------</td>
<td>--------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Are the settings retained even after the camera is turned off?</td>
<td></td>
<td>All settings except the self-timer and the exposure compensation are retained even after the camera is turned off.</td>
</tr>
<tr>
<td>Which resolution setting should I use?</td>
<td></td>
<td>Select the resolution setting according to the intended use. 4, 5, 6, 7, 8: Appropriate for printing letter-size or larger, and for printing a close-up of part of a photo (trimming). A, B, C, D: For printing standard photo (photo service) sizes. 0.9, 0.3, 0.1, 0.05: For photos displayed on a web page, or sent as e-mail attachments.</td>
</tr>
</tbody>
</table>

**Shooting**
<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>What is the difference between the digital zoom and the optical zoom?</td>
<td>—</td>
<td>Because shooting with the optical zoom uses the optics of a physical lens, you can shoot without losing minute details in the image. The digital zoom, on the other hand, works by magnifying a portion of the image that hits the image sensor and may produce a coarser image.</td>
</tr>
<tr>
<td>How can I get the distant view into focus?</td>
<td>—</td>
<td>Set the scene select function to the landscape [M], mode when photographing. Or, set the focus range setting to manual focus [MF], and set the distance to $\infty$.</td>
</tr>
<tr>
<td>Monitor</td>
<td>Question</td>
<td>Answer</td>
</tr>
<tr>
<td>--------------</td>
<td>---------------------------------------------------------------------------</td>
<td>------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td></td>
<td>When used in cold weather, why does the image seem to leave traces as it moves?</td>
<td>Condition due to the monitor characteristics.</td>
</tr>
<tr>
<td></td>
<td>Why does the displayed image contain some red, blue and green dots, or why are black spots visible?</td>
<td></td>
</tr>
<tr>
<td>Viewing</td>
<td>Why is the image too bright?</td>
<td>The subject was too bright.</td>
</tr>
<tr>
<td>images</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Why is the image out of focus?</td>
<td>The focus is not locked properly.</td>
</tr>
<tr>
<td>Viewing images</td>
<td>Question</td>
<td>Answer</td>
</tr>
<tr>
<td>----------------</td>
<td>----------</td>
<td>--------</td>
</tr>
<tr>
<td></td>
<td>Why is there no image (？ is shown)?</td>
<td>This may happen when trying to play back images stored on a card from a different digital camera.</td>
</tr>
<tr>
<td></td>
<td>Why is the playback image distorted?</td>
<td>If the subject moves or the camera is moved during recording, a distorted image may sometimes occur.</td>
</tr>
<tr>
<td><strong>Question</strong></td>
<td><strong>Answer</strong></td>
<td><strong>Action</strong></td>
</tr>
<tr>
<td>---------------</td>
<td>------------</td>
<td>------------</td>
</tr>
<tr>
<td>Why isn't the magnified image clear?</td>
<td>Due to the characteristics of the camera, magnified images appear less clear.</td>
<td>Not a malfunction.</td>
</tr>
<tr>
<td>Why isn't the captured image clear?</td>
<td>The image was captured using the digital zoom.</td>
<td>Not a malfunction.</td>
</tr>
<tr>
<td>Can I play back image and sound files that I edited using my computer?</td>
<td>—</td>
<td>We cannot guarantee the accurate playback of files that have been edited using a computer.</td>
</tr>
<tr>
<td>Why is there a motor-like sound during video clip playback?</td>
<td>The sound of the camera’s mechanical action was recorded.</td>
<td>Not a malfunction.</td>
</tr>
<tr>
<td>Why is there no sound?</td>
<td>The volume on the TV is set to the minimum.</td>
<td>Adjust the volume on the TV.</td>
</tr>
<tr>
<td>Why does a message appear during PictBridge printing?</td>
<td>There is a problem with the printer.</td>
<td>Please refer to the instruction manual for your printer.</td>

<tr>
<td>------------------------------------------------------------------------</td>
<td>------------------------------------------------------------------------</td>
<td>------------------------------------------------------------------------</td>
</tr>
<tr>
<td>The “Cannot edit video clips with unlike settings” message appears.</td>
<td>You have attempted to join video clips having different resolutions or frame rates.</td>
<td>Select video clips that have the same resolution or frame rate.</td>
</tr>
<tr>
<td>Why is a noise heard from a nearby TV or radio during battery recharging?</td>
<td>Electromagnetic waves are emitted from the charger.</td>
<td>Move the AC adaptor further away from the TV or radio when recharging the battery pack.</td>
</tr>
<tr>
<td>Why does the “Insufficient card memory” or “Insufficient internal memory” message appear?</td>
<td>There is no more available memory on the card or in the camera’s internal memory.</td>
<td>Delete unnecessary files, or use a card that has more memory available.</td>
</tr>
<tr>
<td>Why does the “Card is protected” message appear?</td>
<td>The lock switch on the card is in the locked (protect) position.</td>
<td>Move the lock switch to the unlocked position.</td>
</tr>
<tr>
<td>Why can’t the camera be operated?</td>
<td>A temporary internal circuitry problem may be the cause.</td>
<td>Remove the AC adaptor (optional) and the battery pack from the camera, wait a few minutes, then reinstall the battery pack and try again.</td>
</tr>
<tr>
<td>A problem such as inability to record or playback occurs.</td>
<td>The card contains files that were saved using a device other than this camera.</td>
<td>After saving your files to a different medium, format the card.</td>
</tr>
<tr>
<td><strong>Question</strong></td>
<td><strong>Answer</strong></td>
<td><strong>Action</strong></td>
</tr>
<tr>
<td>--------------</td>
<td>------------</td>
<td>------------</td>
</tr>
<tr>
<td>Can I use my camera abroad?</td>
<td>—</td>
<td>When the camera is connected to a TV, you can switch the camera’s video output to NTSC or PAL. If you have questions about accessories etc., please consult with a dealer near you for advice.</td>
</tr>
</tbody>
</table>
| Why does the “System error” message appear? | A problem has occurred within the camera or card. | Check the following items:  
1. Remove the card and then install it again.  
2. Remove the battery pack and then install it again.  
3. Install a different card.  
If “System error” still appears after performing the above steps, then take the camera to the dealer for service. |

- Until battery pack runs out when using a fully charged battery pack at a 25 °C (77 °F) ambient temperature.
- The operation time may vary depending on the conditions of the battery pack and the conditions of use. Especially when used at temperatures below 10 °C (50 °F), the battery pack operation time is significantly reduced.

- If the continuous recording time of a voice memo exceeds about 13 hours, the recorded file is saved once, and then recording continues in a new file. In the video clip recording mode, when the size of the file being recorded exceeds 4 GB, the recorded file is saved once, and then recording continues in a new file. (These 4 GB segments are automatically created. The recording session continues until you stop recording, but voice memo recording is temporarily interrupted while the file is being saved.)
- The above values apply when an SD Memory Card by SanDisk is used.
- Even with cards of the same capacity, the amount of data that can actually be stored may differ depending on the card brand, etc.
- The continuous shooting time for each video clip will differ depending, for example, on the card capacity, environmental conditions (temperature and shooting conditions, etc.).
### Concerning the multi-indicator

The camera’s multi-indicator will light, flash, or be off, depending on the different camera operations.
