Quick Start Guide

1. Insert the battery.

2. Insert the card.
The camera-front side slot is for a CF card, and the camera-back side slot is for an SD card.
* Shooting is possible with either a CF card or an SD card in the camera.

3. Attach the lens.
Align it with the red dot.

4. Set the lens’s focus mode switch to <AF>.

5. Set the power switch to <ON>.

6. While holding down the center of the Mode Dial, set it to <B> (Scene Intelligent Auto).

7. Focus on the subject.
Aim the viewfinder center over the subject and press the shutter button halfway to autofocus.

8. Take the picture.
Press the shutter button completely to take the picture.

9. Review the picture shot.
The image just captured will be displayed for 2 sec. on the LCD monitor.

Image Playback

- A ☆ icon to the right of a function title indicates a function that can be used only in these modes: <P> <Tv> <Av> <M> <B>.
- Number of Possible Shots (Viewfinder Shooting)

Preparation

Menu Operations

1. Press the <MENU> button to display the menu.
2. Each time you press the <Q> button, the main tab will switch.
3. Turn the <O> dial to select a secondary tab, then turn the <O> dial to select the desired item.
4. Press <Q> to display the setting.
5. Turn the <O> dial to select the setting, then press <O>.

Quick Start Guide

1. Insert the battery.

2. Insert the card.
The camera-front side slot is for a CF card, and the camera-back side slot is for an SD card.
* Shooting is possible with either a CF card or an SD card in the camera.

3. Attach the lens.
Align it with the red dot.

4. Set the lens’s focus mode switch to <AF>.

5. Set the power switch to <ON>.

Image-recording Quality

- Select [1: Image quality], then press <O>.
- Turn the <O> or <O> dial to select the image-recording quality, then press <O>.

- Image-recording quality
- Pixels recorded
- JPEG: Turn the <O> dial to select the quality.
