1 Setting up your camera

Attaching the strap and lens cap

Attaching the lens hood

Use the lens hood when you want to protect the lens from unwanted sun glare. Reverse the hood when unwanted sun glare is not a concern or when you use the flash. For lens accessories, see page 84.
Charging the battery
Charge the Li-Ion rechargeable battery before first use.

![Charging diagram]

You can also charge the battery using a Kodak EasyShare printer dock or camera dock. Purchase these and other accessories at a dealer of Kodak products or visit www.kodak.com/go/p880accessories.

Loading the battery

⚠️ CAUTION:
We recommend that you use a Kodak Li-Ion rechargeable digital camera battery (KLIC-5001).

![Battery loading diagram]

For information on replacing the battery and extending battery life, see page 87.
Turning on the camera

- **ON** Capture: Take pictures and videos.
- **✓** Favorites: View your Favorites, see page 64.

Setting the language and date/time, first time

1. **Language**:  
   - Press 
   - Press OK.
2. **Date & Time**:  
   - Press 
   - Press OK.
   - Press 
   - Press OK.
Setting the language and date/time, other times

1. Press Menu. (Press again to exit.)
2. 
3. 
4.

Storing pictures on an SD or MMC card

Your camera has 32 MB of internal memory. You can purchase a Kodak SD or MMC card to conveniently store more pictures and videos. For best results, purchase a Kodak card.

NOTE: When using the card for the first time, format it in this camera before taking pictures (see table on page 50).

CAUTION:

A card can only be inserted one way; forcing it may cause damage.

See page 81 for storage capacities. Purchase SD or MMC cards at a dealer of Kodak products or www.kodak.com/go/p880accessories.

www.kodak.com/go/support
2 Taking pictures and videos

Taking a picture

1. **ON**
2. **Auto**
3. **EVF** or **LCD**

Use the Diopter dial to adjust the sharpness of the Viewfinder.

Press the Shutter button halfway to set the AE/AF. When the AE/AF indicator turns green, press the Shutter button completely down.

Taking a video

1. **ON**
2. **EVF** or **LCD**

Press the Shutter button completely down and release.

To stop recording, press and release the Shutter button again.
Reviewing a quickview of the picture or video just taken

After you take a picture or video, the EVF/LCD screen displays a quickview for approximately 5 seconds. While the picture or video is displayed, you can:

- Press OK to play/pause video.
- Move ▼/► to adjust the volume.
- ▼/► To rewind or fast forward.
- Tag a picture/video for email or as a favorite, or tag a picture for print.

If you press no buttons, the picture/video is saved.

To view pictures and videos anytime, see page 12.
Taking pictures and videos

Using the Auto-Focus (AF) framing marks (pictures)

When using the EVF/LCD screen as a viewfinder, framing marks indicate where the camera is focusing. For the best pictures, the camera attempts to focus on foreground subjects, even if the subjects are not centered in the scene.

1. Press the Shutter button **halfway**. When the framing marks turn green, focus is accomplished.

2. If the camera is not focusing on the desired subject (or if the framing marks disappear), release the Shutter button and recompose the scene.

3. Press the Shutter button **completely down** to take the picture.

**NOTE:** Framing marks do not appear in Landscape, Night Landscape, or Video mode. When you use AF Zone (see table on page 53) and set Center Zone, the framing marks are fixed at a center wide location.
Capture modes in liveview

Capture modes—shutter pressed halfway

www.kodak.com/go/support
Taking pictures and videos

Using optical zoom

Use optical zoom to get up to 5.8X closer to your subject. You can change optical zoom before or during video recording.

1. Use the EVF or LCD screen to frame your subject.
2. Rotate the Manual zoom ring to zoom in or out.
3. Press the Shutter button **halfway** to set the exposure and focus, then **completely down** to take the picture. (When taking videos, press and release the Shutter button.)

Using digital zoom

Use digital zoom in any Still mode to get an additional 1.4X or 2X magnification beyond optical zoom. Combined zoom settings are from 5.8X to 12X.

1. Press the Digital zoom button. (Press again to exit.)
2. Move ▲/▼ to highlight an option.
3. Press OK or Set.
   *The Zoom icon shows zoom status.*
4. Take the picture.

**NOTE:** You cannot use digital zoom for video recording. You may notice decreased image quality when using digital zoom.
Using the low-light Auto Focus (AF) LED

Use this feature in low-light settings to obtain sharper pictures. When the Shutter button is pressed halfway in low-light, the AF assist light may emit a brief beam of light, if necessary, to illuminate the subject. The low-light AF LED is already set to On. On/Off settings are accessible in Setup (page 50).

Using the flip-up flash

Use the flash when you take pictures at night, indoors, or outdoors in heavy shadows.

IMPORTANT: Remove or reverse the Lens hood (see page 1) when you use the flash.

To change the flash settings, see page 37.

<table>
<thead>
<tr>
<th>Flash-to-subject distance</th>

<td>1.6–10.2 ft (0.5–3.1 m)</td>
<td></td>
</tr>
</tbody>
</table>
Taking pictures and videos

Using an external flash unit

When you want additional or specialized lighting, use an external flash unit (sold separately), that uses a Hot-shoe unit or an External flash connector. You can use the camera’s built-in flash and external flash at the same time to provide extra fill flash.

**NOTE:** Refer to your external flash unit user’s guide for details.

---

**Hot-shoe unit**

1. Slide off the Hot-shoe cover.
2. Mount the flash unit to the Hot shoe.
3. Turn on the external flash unit.

**External flash connector**

1. Plug your external flash cable into the External flash connector port.
2. Turn on the external flash unit.

---

NOTE: The connector accepts all standard external flash cables, maximum 500 volts.
Taking pictures and videos

Reviewing pictures and videos
Press Review to view and work with your pictures and videos.

Pictures

Press Review.
(Press again to exit.)

View previous/next.
View multi-up thumbnails.
(Press OK to return to single pictures.)
View previous/next thumbnail.

NOTE: Pictures taken at the 7.1 MP (3:2) quality setting are displayed at a 3:2 aspect ratio with a black bar at the top and bottom of the screen.

Videos

Press OK to play/pause.

During playback/pause:
Rewind/fast forward.
Adjust volume.
During pause:
Rewind/fast forward by frame.
End video play.

Rate: Hold \( \leftrightarrow \) 3 seconds to set the rate of rewind/fast forward. Press \( \leftrightarrow \) again to increase/decrease the rate.

To save battery power, use the optional Kodak EasyShare camera or printer dock, or Kodak 5-volt AC adapter. (See www.kodak.com/go/p880accessories.)
Taking pictures and videos

Multi-selection of pictures during review

Use the Set button to create a set of pictures to review and to perform various functions, for example Delete (page 17), Protect (page 16), and Copy (page 59).

NOTE: The selective settings are not kept when you change to liveview or turn off the camera.

Single-up

1. Press Set to highlight a picture.
2. Press Set. The picture now is part of a set.

Press Set again to remove a picture from the set.

To deselect the entire set, turn off the camera.

Multi-up

1. Press Review. (Press again to exit.)
2. Press \.
3. \ and \ to scroll through the pictures.

A blue box designates pictures that are part of the selected set.

A yellow box moves as you scroll through the pictures.

4. Press Set to select a picture. The selected number in the set appears on the screen.

To deselect, press Set again. (The selected number in the set disappears.)

5. Scroll to the next picture.
Identifying the review icons

**Picture**

- Favorite tag
- Email tag
- Selected/Total number
- Review mode
- Album name
- Scroll arrows
- Print tag/number of prints
- Protect
- Picture number
- Image storage location
- Battery indicator
- Date stamp

**Video**

- Favorite tag
- Email tag
- Selected/Total number
- Review mode
- Album name
- Multi-up

- Protect
- Video number
- Image storage location
- Battery indicator
- Video date display

See Highlight/shadow clipping on page 44 and Histogram on page 45.

www.kodak.com/go/support
## Magnifying a picture during review

Use either the Digital zoom button or the Command dial to magnify your pictures.

**Digital zoom button**
- Press Digital zoom to increase the magnification.
- Press OK to return to 1X.

**Command dial**
- Turn Command dial to increase or decrease the magnification.
- Press OK to return to 1X.
Protecting pictures and videos from deletion

**PICTURE or VIDEO**—protects the displayed picture or video.

**EXIT**—exits the Protect screen.

**SELECTED**—protects selected pictures and videos from your current storage location.

**ALL**—protects all pictures and videos from your current storage location.

The picture or video is protected and cannot be deleted. The Protect icon appears with the protected picture or video.

⚠️ **CAUTION:**

Formatting internal memory or an SD or MMC card deletes all (including protected) pictures, videos. (Formatting internal memory also deletes email addresses, album names, and favorites. To restore them, see EasyShare software Help.)
Taking pictures and videos

Deleting pictures and videos

1. Press Review. (Press again to exit.)
2. \( \) to view previous/next.
3. Press Delete.
4. Follow the screen prompts.

**PICTURE or VIDEO**—deletes the displayed picture or video.

**EXIT**—exits the Delete screen.

**SELECTED**—deletes selected pictures and videos from your current storage location.

**ALL**—deletes all pictures and videos from your current storage location.

NOTE: To delete protected pictures and videos, remove protection before deleting.
3 Transferring and printing pictures

Installing the software

⚠️ CAUTION:
Install Kodak EasyShare software before connecting the camera or optional dock to the computer. Failure to do so may cause the software to load incorrectly.

1 Close all software applications that are open on your computer.

2 Place the Kodak EasyShare software CD into the CD-ROM drive.

3 Load the software:

   Windows OS—if the install window does not appear, choose Run from the Start menu and type d:\setup.exe where d is the drive letter that contains the CD.

   Mac OS X—double-click the CD icon on the desktop, then click the Install icon.

4 Follow the on-screen instructions to install the software.

   Windows OS—select Complete to automatically install the most commonly used applications. Select Custom to choose the applications you wish to install.

   Mac OS X—follow the on-screen instructions.

NOTE: When prompted, register your camera and software. Registering lets you sign up for information that keeps your system up-to-date. To register later, see www.kodak.com/go/register.

5 If prompted, restart the computer. If you turned off anti-virus software, turn it back on. See the anti-virus software manual for details.

For information on the software applications included on the Kodak EasyShare software CD, click the Help button in the Kodak EasyShare software.
**Transferring and printing pictures**

**Transferring pictures**

You can transfer pictures to your computer using a USB cable (U-8), EasyShare dock, or Kodak multi-card reader/Kodak SD multimedia card reader-writer.

Purchase these and other accessories at a dealer of Kodak products or [www.kodak.com/go/p880accessories](http://www.kodak.com/go/p880accessories).

**Transferring pictures with a USB cable, model U-8**

If your package does not include an EasyShare dock, use the USB cable (model U-8) that came with your camera.

1. Turn off the camera.
2. Plug the labeled end of the USB cable into the labeled USB port on your computer. See your computer user’s guide for details.
3. Plug the other end of the USB cable into the labeled USB port on the camera.
4. Turn on the camera.

*Kodak EasyShare software opens on your computer. The software prompts you through the transfer process.*

**NOTE:** Visit [www.kodak.com/go/howto](http://www.kodak.com/go/howto) for an online tutorial on connecting.

**Transferring pictures with an EasyShare dock**

If your package includes an EasyShare dock, use it to transfer pictures to your computer. (For details, see the dock user’s guide. To purchase accessories, see [www.kodak.com/go/p880accessories](http://www.kodak.com/go/p880accessories). For dock compatibility, see page 23.)
Printing from a Kodak EasyShare printer dock or your computer

**Printer dock**—Dock your camera to the Kodak EasyShare printer dock and print directly with or without a computer. For dock compatibility for your camera, see page 23. Purchase this and other accessories at a dealer of Kodak products or www.kodak.com/go/p880accessories.

**Computer**—Click the Help button in the Kodak EasyShare software.

**Printing from an optional SD or MMC card**

- Automatically print tagged pictures when you insert your card into a printer with an SD or MMC card slot. See your printer user’s guide for details.
- Make prints at an SD or MMC card-capable Kodak picture maker. (Contact a location prior to visiting. See www.kodak.com/go/picturemaker.)
- Take the card to your local photo retailer for professional printing.
Transferring and printing pictures

Ordering prints online

*Kodak EasyShare* Gallery, [www.kodakgallery.com](http://www.kodakgallery.com), (formerly Ofoto) is one of the many online print services offered in the Kodak EasyShare software. You can easily:

- Upload your pictures.
- Edit, enhance, and add borders to your pictures.
- Store pictures, and share them with family and friends.
- Order high-quality prints, photo greeting cards, frames, and albums—and have them delivered to your door.

Direct printing with a PictBridge enabled printer

Your camera is compatible with PictBridge technology, which lets you print directly to PictBridge enabled printers, without a computer. You need:

- Camera with fully charged batteries, or with optional Kodak 5-volt AC adapter
- PictBridge enabled printer
- USB cable (U-8)

Connecting the camera to the printer

1. Turn off the camera and printer.
2. Optional: If you have a Kodak 5-volt AC adapter (optional accessory), plug it into the camera and into an electrical outlet.
3. Using a USB cable for your camera, connect the camera to the printer. (See your printer user’s guide for details.)
Transferring and printing pictures

Printing pictures

NOTE: Print size is dependant on printer capabilities. RAW and TIFF files are not directly printable (see page 57).

1 Turn the Mode switch to ON or 

NOTE: If you turned the Mode switch to Favorites, the current favorite picture is displayed.

2 Turn on the printer.

The PictBridge logo is displayed, followed by the current picture and menu. (If no pictures are found, a message is displayed.) If the menu interface turns off, press any button to redisplay it.

3 Move ▲▼ to choose a printing option, then press the OK button.

NOTE: During direct printing, pictures are not transferred or saved to the computer or printer.

<table>

<tr>
<td>Time Lapse Burst</td>
<td>Camera takes specified number of pictures (2–99) at specified intervals (10 seconds–24 hours in JPEG) and (1 minute–24 hours in TIFF and RAW).</td>
</tr>
</tbody>
</table>

1 Set the Drive mode to the desired option, page 30.

2 Press the Shutter button halfway to set the AE/AF.

3 For all settings, except Burst, press the Shutter button completely down and release it to take the picture.

   For Burst settings, press the Shutter button completely down and hold it. The camera stops taking pictures when you release the Shutter button, all pictures are taken, or there is no more storage space.

NOTE: To cancel self-timer and shutter delay during countdown, press the Shutter button again.

NOTE: During quickview you can delete all pictures in the burst series. To delete selectively, do so in Review (see page 17).
Determining the burst capacity

The quantity of burst depends on the quality mode and the rate of compression. For information on File Type (picture compression), see page 47.

NOTE: TIFF format is unavailable in Burst.

## Using the AE/AF (Auto Exposure/Auto Focus) button

### AE/AF lock mode

<table>
<thead>
<tr>
<th>AE/AF lock mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>AEL</strong> (default)</td>
<td>Exposure setting is independent of pressing the Shutter button. This allows for creative compositions and exposure situations. Retains the settings and prevents changes accidentally.</td>
</tr>
</tbody>
</table>
| **AFL** | Use focus lock to obtain exact focus subject and situations where AF may not work. Allows for creative compositions and focus situations. Examples:  
- Low-contrast scenes: subject is wearing clothing that is the same color as the background.  
- Patterned subject or scene: building windows, subjects with horizontal stripes, animal in a cage, person in a forest, etc.  
- Extreme differences in brightness within the framing marks: light is in the background and main subject is in shadow. |
| **AEL/AFL** | Use when you want to control both exposure and focus independent of pressing the Shutter button. |

### To set the AE/AF lock mode:

1. Press Menu. (Press again to exit.)
2. To highlight Setup Menu.
3. To highlight Set AE/AF Lock Button.
4. Press OK.
5. To highlight an option; press OK.

---

Press AE/AF. (Press again to unlock.)
Taking pictures using the AF lock
For special situations where AF may not work (page 33):
1. Set the AE/AF lock button to AF.
2. Place the framing marks on the main subject.
3. Press the AE/AF lock button.
4. Recompose the picture and press the Shutter button halfway to lock the exposure position.
5. Press the Shutter button completely down to take the picture.

Using the Manual Focus (MF) assist AF
This feature lets you make additional adjustments to the focus.
1. Press the Menu button. (Press again to exit.)
2. Move △ to highlight Setup ▶.
3. Move △/ to highlight MF Assist AF, press OK.
4. Move △/ to highlight On, press OK.
   This setting remains until you change it.
5. Press the Shutter button halfway.
6. Rotate the Manual focus ring to adjust the focus. (Focus is at center position.)
   A magnified display appears.
7. Press the Shutter button completely down to take the picture.
Doing more with your camera

Using the program button

You can program this button to allow direct access to a Capture and Review submenu. For example, if you frequently adjust the Custom white balance settings, you can program this button to bring up the Custom white balance submenu—no need to access the menu to search for it. The Program button may be unavailable in some modes.

Program button

Using the Programmed button

1. In Capture or Review, press Program to bring up your programmed menu setting.
2. To highlight a menu option; press OK.
3. Follow the screen prompts.

NOTE: For rapid setting changes, see page 43.
Program capture settings
Pressing the Program button in Capture, after program setup, allows for direct access to the submenus.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
Changing the flash settings

1. Press \[ \text{Flash} \] (Press again to exit.)
2. \[ \text{Flash} \] to highlight an option.
3. Press OK or Set.

A blinking flash icon indicates the flash is charging. Take the picture when the blinking stops.

NOTE: Flash settings are preset for each picture-taking mode. Some of the flash settings may not be available in all Capture or SCN modes. When you change to Auto or Red-eye in some of these modes, it becomes the default until you change it.

NOTE: For rapid setting changes, see page 43.

<table>
<thead>
<tr>

<tr>
<td>Fill</td>
<td>Every time you take a picture, regardless of the lighting conditions. Use when the subject is in shadow or is &quot;backlit&quot; (when the light is behind the subject). In low light, hold the camera steady or use a tripod.</td>
</tr>
<tr>
<td>Redeye</td>
<td>Once, so the subject’s eyes become accustomed to the flash, then fires again when the picture is taken. If the lighting conditions require flash but do not require Red-eye reduction, the flash may fire only once.</td>
</tr>
<tr>
<td>Slow front sync</td>
<td>Regardless of the shutter speed and right after the shutter fully opens. Only useful when slower shutter speeds are used. For other slow-flash settings, see table on page 53.</td>
</tr>
<tr>
<td>Off</td>
<td>Never.</td>
</tr>
</tbody>
</table>
PASM and C modes

Settings you change in C modes apply only to pictures taken in those modes.

For example, if you change the Color Mode to Sepia while in C mode, you still retain the default setting of Color for Auto and SCN modes.

NOTE: The settings, including Flash, Exposure Metering, ISO, and White Balance are maintained for PASM and C modes—even when you change modes or turn off the camera. Use Reset Camera (see page 52) to reset PASM to its default setting.

Aperture—also known as f-stop or f-number, controls the size of the lens opening, which determines the depth of field. Smaller f-numbers, for example f/2.8, refer to a bigger lens opening. Larger f-numbers, for example f/8, refer to a smaller lens opening.

Larger f-numbers keep the main subject sharp; good for landscapes and well-lit conditions. Smaller f-numbers are good for portraits and low-light conditions. The highest and lowest aperture numbers may be affected by optical zoom.

Shutter Speed—controls how long the shutter stays open. A shaking hand icon warns of slow shutter speeds. (Use a tripod for slow shutter speeds.)

Exposure Compensation—lets you manually adjust the exposure (± 2.0 in 1/3 steps); good for controlling backlit or non-standard scenes. If the picture is too light, decrease the setting; if it’s too dark, increase the setting.

Flash Compensation—controls the flash brightness (±1.0 in 1/3 steps). You must be within flash range. Unavailable if flash setting is Off.
Doing more with your camera

Changing PASM or C mode settings

PASM and C modes control the f-number (aperture), shutter speed, exposure compensation, and flash compensation.

1. Turn the Mode dial to P, A, S, M, or C.
2. Use the Command dial and Set button:
   - Turn the Command dial to move the selection arrow between the available settings.
   - Press the Set button to open a setting.
   - Turn the Command dial to adjust the setting, then press Set to close.
3. Press the Menu button to change other settings (see page 46).
4. Take a picture.

PASM & C mode options

White—selectable
Blue—non-selectable
Yellow—changeable value
Red—out-of-range
Using the white balance button

Choose your lighting condition.

1. Press White balance. (Press again to exit.)
2. To highlight an option.
3. Press OK or Set.

The active icon is displayed in the EVF/LCD screen.

NOTE: This button is not available in Auto, SCN, and Video modes.
NOTE: For rapid setting changes, see page 43.

### White Balance (WB) options

<table>
<thead>
<tr>
<th>WB option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Daylight</td>
<td>Pictures in natural lighting.</td>
</tr>
<tr>
<td>Cloudy</td>
<td>Under overcast, shady or twilight skies.</td>
</tr>
<tr>
<td>Open shade</td>
<td>Pictures in the shade in natural lighting.</td>
</tr>
<tr>
<td>Sunset</td>
<td>Preserves the deep hues seen in sunsets.</td>
</tr>
<tr>
<td>Tungsten</td>
<td>Corrects the orange cast of household light bulbs. Ideal for indoor pictures under tungsten or halogen lighting without flash.</td>
</tr>
</tbody>
</table>
Doing more with your camera

Setting the ISO speed

The ISO speed controls sensitivity of the camera sensor. Higher settings are more sensitive to light, but may produce unwanted “noise” in a picture. Auto and SCN mode settings automatically adjust the camera sensitivity to the light conditions. Within PASM and C modes, the ISO button lets you adjust the setting.

<table>
<thead>
<tr>
<th>WB option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Fluorescent" /></td>
<td>Corrects the green cast of fluorescent lighting. Ideal for indoor pictures under fluorescent lighting without flash.</td>
</tr>
<tr>
<td><img src="image" alt="Click WB" /></td>
<td>Captures a representative white surface for a more precise setting. Follow the screen prompts for Setup.</td>
</tr>
<tr>
<td><img src="image" alt="Custom" /></td>
<td>Uses a saved White balance setting that has been registered as a Custom white balance (see table on page 53).</td>
</tr>
</tbody>
</table>

ISO speed setting for selected picture size:

<table>
<thead>
<tr>
<th>ISO</th>
<th>Picture size (MP)</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO 50–400</td>
<td>3.1 MP, 5.0 MP, 7.1 MP, and 8.0 MP</td>
</tr>
<tr>
<td>ISO 400–1600</td>
<td>Available only in 0.8 MP</td>
</tr>
</tbody>
</table>

NOTE: For rapid setting changes, see page 43.

ISO speed setting for selected picture size:

Press ISO. (Press again to exit.)

1. Press ISO. (Press again to exit.)
2. ▲▼ to highlight an option.
3. Press OK or Set.

The active icon is displayed in the EVF/LCD screen.

NOTE: For selecting Picture size, see page 47.
Using exposure metering

Choose a metering system in PASM or C mode for the appropriate lighting of your subject.

1. Press Exposure metering. (Press again to exit.)
2. \( \uparrow/\downarrow \) to highlight an option.
3. Press OK or Set.

The active icon, except for the default mode, is displayed in the EVF/LCD screen.

**NOTE:** For rapid setting changes, see page 43.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Exposure metering options</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Multi-Pattern Icon" /></td>
<td><strong>Multi-Pattern</strong> (default)—evaluates the lighting conditions at various points throughout the image to give an optimum picture exposure. Ideal for general picture taking.</td>
</tr>
<tr>
<td><img src="image" alt="Center-Weighted Icon" /></td>
<td><strong>Center-Weighted</strong>—evaluates the brightness over a wide area with emphasis on the center of the screen.</td>
</tr>
<tr>
<td><img src="image" alt="Center-Spot Icon" /></td>
<td><strong>Center-Spot</strong>—similar to Center-weighted, except the metering is concentrated on a smaller area of the subject centered in the viewfinder. Ideal when you need an exact exposure of a specific area in the picture. A graphic for Center-spot appears on the screen.</td>
</tr>
<tr>
<td><img src="image" alt="Selectable Zone Icon" /></td>
<td><strong>Selectable Zone</strong>—creates an exposure-metering setting from 1 of 25 possible screen locations. If used with Selectable Focus Zone (see table on page 53) they track together. Use ( \leftarrow/\rightarrow/\uparrow/\downarrow ) to move the cross-hair graphic to the desired zone.</td>
</tr>
</tbody>
</table>

Doing more with your camera

Using exposure compensation with exposure bracketing

In PAS modes, you can use exposure compensation in conjunction with exposure bracketing.

<table>
<thead>
<tr>
<th>If exposure compensation is set to</th>
<th>And if the exposure bracketing interval is set to 3 steps</th>
<th>Then the exposures taken are</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.0</td>
<td>Set the drive mode to Exposure bracketing 3 (see page 30).</td>
<td>–0.3, 0.0, +0.3</td>
</tr>
<tr>
<td>+1.0</td>
<td></td>
<td>+0.7, +1.0, +1.3</td>
</tr>
<tr>
<td>–1.0</td>
<td></td>
<td>–1.3, –1.0, –0.7</td>
</tr>
</tbody>
</table>

Using the command dial for rapid setting changes

Use the Command dial in combination with other buttons for rapid setting changes.

- Hold the Function button and rotate the Command dial to rapidly scroll through and select an option in the function menu.
- Release the Function button to close the menu.

Function buttons that provide rapid setting changes:

- Flash button (page 37)
- Exposure metering button (page 42)
- Focus button (page 29)
- White balance button (page 40)
- Drive button (page 30)
- Digital zoom button (page 9)
- ISO button (page 41)
Using highlight/shadow clipping

You can view clipped areas of the picture to see detail in highlights and shadows that correspond to underexposure and overexposure. It’s normal to have some highlight and shadow clippings because of the wide range of reflectance within a scene. If large amounts of the scene show clipping, adjust the exposure in PASM modes by changing, for example, the aperture or shutter-speed setting.

Press the Info button to turn the Highlight/Shadow clipping on/off.

Shadows appear in blue

Highlights appear in yellow

NOTE: If a scene is dark or light, you can adjust the exposure compensation before taking the picture. The flash may affect a picture’s light and shadow.
Doing more with your camera

Using the histogram

In Capture or Review, the histogram shows the distribution of the subject’s brightness. If the peak is to the right of the graph, the subject is bright; if it’s to the left, the subject is dark (see shaded bar). Optimal exposure is usually achieved when the peak is in the middle of the histogram. Available only in PASM and C modes.

Press the Info button to turn the histogram on/off.
Changing picture-taking settings

You can change settings to get the best results from your camera:

1. Press the Menu button (press again to exit).

2. Move ←/→ to highlight a menu tab —
   - Capture for general picture-taking settings of stills.
   - Video for video camera settings.
   - Setup for customizing your camera settings.
   - Capture+ for advanced picture-taking settings.
     (Only available in PASM and C settings.)

3. Move ↑/↓ to highlight the setting you wish to change, then press the OK button.

4. Choose an option, then press the OK button.
### Still menu options

#### Capture

Some settings are unavailable in Auto and SCN modes.

<table>

</tr>
</thead>
<tbody>
<tr>
<td>Front Sync (default)</td>
<td>![icon]</td>
<td>— synchronizes at the beginning of the shutter. Ideal for night-scene background; fast shutter speeds can make background too dark. This feature allows both a slow shutter speed for the background to enhance the detail and a flash for the subject.</td>
</tr>
<tr>
<td>Front Sync Redeye</td>
<td>![icon]</td>
<td>Front-curtain sync and Red-eye are simultaneously set. Ideal for a person against a brightly lit night background. Lets you capture the background correctly and reduce the red-eye.</td>
</tr>
<tr>
<td>Rear Sync</td>
<td>![icon]</td>
<td>— synchronizes at the end of the shutter. The flash fires just before the shutter closes to create a stream-of-light effect behind a moving object for a more natural appearance.</td>
</tr>
</tbody>
</table>

### Copy to Custom

Transfer current settings on the camera to a Custom mode.

Save settings to 1 of 3 Custom modes. Only the settings from PASM are saved as Custom settings.

### Custom Exposure Mode

Choose a preferred capture exposure mode. (See Custom modes, page 27.)

This setting remains until you change it.

**Program (default)**

Aperture Priority

Shutter Priority

Manual

Available only in Custom (C) mode.
Doing more with your camera

Editing functions for Still and Video

This camera has editing capabilities for both still and video.

| 1 | Press Review. (Press again to exit.) |
| 2 | ↔ to locate a picture or video. |
| 3 | Press Menu. |
| 4 | ↑/↓ to highlight Edit, then press OK. |
| 5 | ↑/↓ to choose from the following options. |
| 6 | Follow the screen prompts. |

Still editing options

- Crop—crop unwanted picture information. For example, you can remove too much background from a group-shot picture. You can also change the aspect ratio (Portrait or Landscape) of the picture. See page 56.
- Resize—reduce the number of pixels in a picture to increase storage memory.

Video editing options

- Make Picture—make a still picture from a single frame of a video. There may be limitations to the size you can print because of the small picture size (much smaller than minimum picture size).
- Trim—cut the beginning and end of a video.
- Cut—cut out a middle section of a video.
- Split—split video into two sections. You choose the split point.
- Merge—put two compatible videos together (the reverse of split).
Cropping pictures

1. See Editing functions, then follow steps 1–4.
2. ↑/↓ to highlight crop, then press OK.
3. ↑/↓ to select the desired cropping format, then press OK.
   - Press the Zoom lever to adjust the size.
   - ↔/↕ to adjust the location.
4. ↑/↓ to select Continue, then press OK.
5. Press the Menu button to exit the menu.

The picture is copied, then cropped. The original picture is saved. A cropped picture cannot be cropped again on the camera. Cropped pictures take up space in the internal memory or on a card.
Doing more with your camera

RAW file development

This feature lets you develop, edit, and save a JPEG or TIFF printable copy of a RAW file. It does not affect the original file. RAW files provide 3 advantages:

■ A digital negative for file authenticity
■ Ability to correct exposure after capture
■ Ability to adjust tonal qualities after capture

Options for RAW development:

| ![Picture Size] | Sharpness |
| ![File Type] | Contrast |
| ![Exposure Compensation] | White Balance |
| ![Color Mode] | White Balance Compensation |

NOTE: The settings for these options may vary from the settings listed in the Capture + menu on page 46.

NOTE: Pictures taken at the 4.5 MP (3:2) quality setting are displayed at a 3:2 aspect ratio with a black bar at the top and bottom of the screen.
Viewing picture/video information

Using optional review menu

In Review, press the Menu button to access review functions.

Doing more with your camera

Copying pictures and videos
You can copy pictures and videos from a card to internal memory or from internal memory to a card.

Before you copy, make sure that:
 ■ A card is inserted in the camera.
 ■ The camera’s picture storage location is set to the location from which you are copying. See Image Storage, page 50.

Copy pictures or videos:
1 Press the Review button, then press the Menu button.
2 Move ⬆️/⬇️ to highlight Copy ⏯️, then press the OK button.
3 Move ⬆️/⬇️ to highlight an option:
   PICTURE or VIDEO—copies the current picture or video.
   EXIT—returns to the Review menu.
   SELECTED—copies previously selected pictures and videos from your selected storage location to the other location.
   ALL—copies all pictures and videos from your selected storage location to the other location.
4 Press the OK button.

NOTE: Pictures and videos are copied, not moved. To remove pictures and videos from the original location after copying, delete them (see page 17).
   Tags that you applied for print, email, and favorites are not copied. Protection settings are not copied. To apply protection to a picture or video, see page 16.
Running a slide show

Use the Slide Show to display your pictures and videos on the LCD screen. To run a slide show on a television or on any external device, see page 61. To save battery power, use an optional Kodak 5-volt AC adapter. (Visit www.kodak.com/go/p880accessories.)

Starting the slide show

1. Press the Review button, then press the Menu button.
2. Move \( \uparrow/\downarrow \) to highlight Slide Show \( \text{[ ]} \), then press the OK button.
3. Move \( \uparrow/\downarrow \) to highlight your Begin show option, then press the OK button.

Each picture and video is displayed once.

To interrupt the Slide Show, press the OK button.

Changing the slide show display interval

The default interval setting displays each picture for 5 seconds. You can set the display interval from 3 to 60 seconds.

1. On the Slide Show menu, move \( \uparrow/\downarrow \) to highlight Interval, then press the OK button.
2. Select a display interval.
   
   To scroll through the seconds quickly, press and hold \( \uparrow/\downarrow \).
3. Press the OK button.

The interval setting remains until you change it.
Doing more with your camera

Running a continuous slide show loop
When you turn on Loop, the slide show is continuously repeated.

1 On the Slide Show menu, move ▲/▼ to highlight Loop, then press the OK button.
2 Move ▲/▼ to highlight On, then press the OK button.

When the slide show is started with Loop On, the slide show repeats until you press the OK button or until battery power is exhausted. The Loop feature remains until you change it.

Displaying pictures and videos on a television
You can display pictures and videos on a television, computer monitor, or any device equipped with a video input. (Image quality on a television screen may not be as good as on a computer monitor or when printed.)

NOTE: Ensure that the Video Out setting (NTSC or PAL) is correct (see page 51). The slide show stops if you connect or disconnect the cable while the slide show is running.

1 Connect an audio/video cable (AV-8) from the camera USB, A/V Out port to the television video-in port (yellow) and audio-in port (white). See your television user’s guide for details.
2 Review pictures and videos or play a slide show on the television.

Pre-tagging for album names
Use the Set Album feature to pre-select album names before you take pictures or videos. Then, all the pictures or videos you take are tagged with those album names.

First—on your computer
Use Kodak EasyShare software that came with your camera to create album names on your computer. Then copy up to 32 album names to the album name list the next time you connect the camera to the computer. See Kodak EasyShare software Help for details.
Second—on your camera

1 In any mode, press the Menu button.
2 Move  to highlight Setup.
3 Move  to highlight Set Album, then press the OK button.
4 Move  to highlight an album name, then press the OK button. Repeat to mark pictures or videos for albums.
   Selected albums are noted with a colored box.
5 To remove a selection, highlight an album name and press the OK button. To remove all album selections, select Clear All.
6 Highlight Exit, then press the OK button.
7 Press the Menu button to exit the menu.
   Your selections are saved. Your album selection is displayed on the screen. A plus (+) after the album name means more than one album is selected.

Third—transfer to your computer

When you transfer the tagged pictures or videos to your computer, Kodak EasyShare software opens and categorizes your pictures in the appropriate album. See the Kodak EasyShare software Help for details.

Tagging pictures/videos for albums

Use the Album feature in Review mode to tag the pictures and videos in your camera with album names.

First—on your computer

Use Kodak EasyShare software that came with your camera to create album names on your computer, then copy up to 32 album names to the camera’s internal memory. See Kodak EasyShare software Help for details.
Doing more with your camera

Second—on your camera
1. Press the Review button, then locate the picture or video.
2. Press the Menu button.
3. Move \( \uparrow/\downarrow \) to highlight Album \( \Rightarrow \), then press the OK button.
4. Move \( \leftarrow/\rightarrow \) to highlight Picture/Video, Selected, or All, then press OK.
5. Move \( \uparrow/\downarrow \) to highlight an album folder, then press the OK button.

If you tagged a single Picture/Video, you can add other pictures to the same album by moving the Joystick \( \leftarrow/\rightarrow \) to scroll through the pictures. When the picture you want is displayed, press the OK button.

To add the pictures to more than one album, repeat step 5 for each album.

The album name appears with the picture. A plus (+) after the album name means the picture was added to more than one album.

To remove a selection, highlight an album name and press the OK button. To remove all album selections, select Clear All, Exit, and OK.

Third—transfer to your computer
When you transfer the tagged pictures and videos to your computer, the Kodak EasyShare software opens and categorizes your pictures and videos in the appropriate album. See Kodak EasyShare software Help for details.
Sharing your pictures
When your pictures/videos are transferred to your computer, you can share them by:

- Print (page 64)
- Email (page 65)
- Favorites, page 66

When can I tag my pictures and videos?
Press the Share button to tag pictures/videos:

- Any time. (The most recent picture/video taken is then displayed.)
- Just after you take a picture/video, during Quickview (see page 6).
- After pressing the Review button (see page 12).

Tagging pictures for printing
NOTE: RAW and TIFF files are not printable.

1. Press the Share button. Move $\leftarrow/\rightarrow$ to locate a picture.
2. Move $\uparrow/\downarrow$ to highlight Print [ ], then press the OK button.*
3. Move $\uparrow/\downarrow$ to highlight Picture, Selected, or All, then press the OK button.
4. Move $\uparrow/\downarrow$ to select the number of copies (0-99). Zero (0) removes the tag for that picture.

   * The icon appears in the status area. The default quantity is one.

5. **Optional** (for single Picture): You can apply a print quantity to other pictures.
   Move $\leftarrow/\rightarrow$ to locate a picture. Keep the print quantity as is, or $\uparrow/\downarrow$ to change it.
   Repeat this step until the desired print quantity is applied to the pictures.

6. Press the OK button. Then press the Share button to exit the menu.

www.kodak.com/go/support
Doing more with your camera

* To remove print tagging for all pictures in the storage location, highlight Cancel Prints, then press the OK button. Cancel Prints is not available in Quickview.

**Printing tagged pictures**

When you transfer the tagged pictures to your computer, the Kodak EasyShare software Print screen opens. For details on printing, click the Help button in the Kodak EasyShare software.

For more information on printing from your computer, printer dock, PictBridge enabled printer, or card, see page 21.

NOTE: For the best 4 x 6 in. (10 x 15 cm) prints, set the camera to the 7.1 MP (3:2) print quality setting.

**Tagging pictures and videos for emailing**

**First—on your computer**

Use Kodak EasyShare software to create an email address book on your computer. Then, copy up to 32 email addresses to the camera’s internal memory. For details, click the Help button in the Kodak EasyShare software.

**Second—tag pictures/videos on your camera**

1. Press the Share button. Move ◄► to locate a picture/video.
2. Move ◄► to highlight Email, then press the OK button.
3. Move ◄► to highlight Picture/Video, Selected, or All, then press the OK button.
4. Move ◄► to highlight an email address, then press the OK button. Press OK again to deselect.

If you tagged a single Picture/Video, you can tag other pictures/videos with the same address. Move ◄► to scroll through them. When the picture you want is displayed, press OK.

To send the pictures/videos to more than one address, repeat step 4 for each address.

*Selected addresses have a colored box next to them when you Exit.*
To remove a selection, highlight a checked address and press the OK button. To remove all email selections, highlight Clear All.

Move ▲/▼ to highlight Exit, then press the OK button.

Press the Share button to exit the menu.

Third—transfer and email

When you transfer the tagged pictures/videos to your computer, the Email screen opens and lets you send them to the addresses you specified. For details, click the Help button in the Kodak EasyShare software.

Tagging pictures as favorites

You can preserve your favorite pictures in the Favorites section of your camera’s internal memory, then share them with friends and family.

NOTE: When you transfer pictures from your camera to your computer, all pictures (including favorites) are stored on your computer at full size. Favorite pictures—smaller copies of your originals—are loaded back to your camera, upon camera setup, so you can share and enjoy more.
Doing more with your camera

Share your favorite pictures in 4 easy steps:

1. Take pictures

2. Tag pictures as Favorites
   1. Press Share. Move ←/→ to locate a picture.
   2. Move ←/→ to highlight Favorite : press the OK button.
   3. Move ←/→ to highlight Picture, Selected, or All; press the OK button.
      The icon appears in the status area. To remove the tag, repeat Step 2. Press Share again to exit.

3. Transfer pictures to your computer
   1. To enjoy full functionality, install and use the EasyShare software that was packaged with this camera (see page 18).
   2. Connect the camera to the computer using the USB cable (see page 19) or an EasyShare dock.
      The first time you transfer pictures, the software helps you make choices about your favorite pictures. Then, your pictures are transferred to the computer. Favorite pictures (smaller versions of the originals) are loaded to the Favorites section of your camera’s internal memory.

4. View favorites on your camera
   1. Turn the Mode switch to Favorites .
   2. Move ←/→ to scroll through favorites.
      To exit Favorites mode, turn the Mode dial to any other position.

NOTE: The camera holds a limited number of favorites. Use Camera Favorites in the EasyShare software to customize the size of your camera Favorites section. Videos tagged as favorites remain in the Favorites folder in the EasyShare software and are not transferred to the camera. For more information, click the Help button in the Kodak EasyShare software.
Optional settings

In Favorites mode, press the Menu button to access optional settings.

<table>
<thead>
<tr>
<th>View (page 13)</th>
<th>Remove all favorites (page 68)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Slide Show (page 60)</td>
<td>Multi-up (page 13)</td>
</tr>
</tbody>
</table>

NOTE: Pictures taken at the 7.1 MP (3:2) quality setting are displayed at a 3:2 aspect ratio with a black bar at the top and bottom of the screen.

Removing all favorites from your camera

To increase internal memory for picture-taking, remove favorites from your camera.

1. Turn the Mode switch to Favorites.
2. Press the Menu button.
3. Highlight , then press the OK button.

   All pictures stored in the Favorites section of internal memory are removed. Favorites are restored the next time you transfer pictures to the computer.

4. Press the Menu button to exit the menu.

Preventing favorites from transferring to the camera

1. Open the Kodak EasyShare software. Click the My Collection tab.
2. Go to the Albums view.
3. Click the Camera Favorites Album for your camera.
4. Click Remove Album. (The original pictures remain unchanged.)

   The next time you transfer pictures from your camera to the computer, use the Camera Favorites Wizard/Assistant to either recreate your Camera Favorites Album or to turn off the Camera Favorites feature.
Doing more with your camera

Printing favorites
1 Turn the Mode switch to Favorites. Move \( \leftarrow/\rightarrow \) to locate a picture.
2 Press the Share button.
3 Highlight Print, then press the OK button.
4 Move \( \uparrow/\downarrow \) to highlight Picture/Video, Selected, or All, then press the OK button.
5 Move \( \uparrow/\downarrow \) to highlight Print quantity, then press the OK button.

The icon appears in the status area.

NOTE: Favorites that were taken on this camera (not imported from another source) are good for prints up to 4 x 6 in. (10 x 15 cm).

Emailing favorites
1 Turn the Mode switch to Favorites. Move \( \leftarrow/\rightarrow \) to locate a picture.
2 Press the Share button.
3 Highlight Email, then press the OK button.
4 Move \( \uparrow/\downarrow \) to highlight Picture/Video, Selected, or All, then press the OK button.
5 Move \( \uparrow/\downarrow \) to highlight one or more address, then press the OK button.

A colored box is next to the selected address and the icon appears in the status area.

NOTE: Favorites that were taken on this camera (not imported from another source) are good for prints up to 4 x 6 in. (10 x 15 cm).

Appendix

Important safety instructions

Using this product

■ Read and follow these instructions before using Kodak products. Always follow basic safety procedures.

■ Use only a USB-certified computer. Contact your computer manufacturer if you have questions.

■ The use of an accessory attachment that is not recommended by Kodak, such as an AC adapter, may cause fire, electric shock, or injury.

■ If using this product in an airplane, observe all instructions of the airline.

⚠️ CAUTION:

Do not disassemble this product; there are no user-serviceable parts inside. Refer servicing to qualified service personnel. Do not expose this product to liquid, moisture, or extreme temperatures. Kodak AC adapters and battery chargers are intended for indoor use only. The use of controls, adjustments, or procedures other than those specified herein may result in exposure to shock and/or electrical or mechanical hazards. If the LCD breaks, do not touch the glass or liquid. Contact Kodak Support.
Battery safety and handling

⚠️ **CAUTION:**
When removing batteries, allow them to cool first; batteries may be hot.

- Read and follow all warnings and instructions supplied by the battery manufacturer.
- Use only batteries that are approved for this product to avoid risk of explosion.
- Keep batteries out of the reach of children.
- Do not allow batteries to touch metal objects, including coins. Otherwise, a battery may short circuit, discharge energy, become hot, or leak.
- Do not disassemble, install backward, or expose batteries to liquid, moisture, fire, or extreme temperature.
- Remove battery when the product is stored for an extended period of time. In the unlikely event that battery fluid leaks inside the product, contact your local Kodak Customer Service representative.
- In the unlikely event that battery fluid leaks onto your skin, wash immediately with water and contact your local health provider. For additional health-related information, contact your local Kodak Customer Service representative.
- Dispose of batteries according to local and national regulations.
- Do not charge non-rechargeable batteries.

For more information on batteries, see [www.kodak.com/global/en/service/batteries/batteryUsage.jhtml](http://www.kodak.com/global/en/service/batteries/batteryUsage.jhtml)
Appendix

Battery information

Kodak battery replacement types/battery life

Actual battery life may vary based on usage. We recommend using only a Kodak Li-Ion rechargeable digital camera battery, KLIC-5001. Not all manufacturers’ 3.7V Li-Ion rechargeable batteries are compatible with the camera. Damage caused by unauthorized accessories is not covered under warranty.

Optional battery: You can use a Kodak Li-Ion rechargeable digital camera battery, KLIC-5000, but it is a lower power battery. Expect approximately 30% fewer pictures per full charge than with the KLIC-5001 (or equivalent) battery included with your camera.

Extending battery life

- Limit the following activities that quickly deplete battery power:
  - Reviewing your pictures on the camera screen (see page 12)
  - Using the camera screen, instead of the EVF, as a viewfinder.
  - Excessive use of the flash (see page 37) and Continuous AF (see page 49).
- Dirt on the battery contacts can affect battery life. Wipe the contacts with a clean, dry cloth before loading batteries in the camera.
- Battery performance is reduced at temperatures below 41°F (5°C). When using your camera in cold weather, carry spare batteries and keep them warm. Do not discard cold batteries that do not work; when they return to room temperature, they may be usable.
Visit www.kodak.com/go/p880accessories for:

**Kodak EasyShare camera dock**—powers your camera, transfers pictures to your computer, and charges the included Kodak Li-Ion rechargeable battery.

**Kodak EasyShare printer dock**—powers your camera, makes 4 x 6 in. (10 x 15 cm) prints with or without a computer, transfers pictures, and charges the included Kodak Li-Ion rechargeable battery.

**Kodak 5-volt AC adapter**—powers your camera.

**IMPORTANT:** Do not use the AC adapter included with the Kodak EasyShare camera dock or printer dock to power your camera.

**Upgrading your software and firmware**

Download the latest versions of the software included on the Kodak EasyShare software CD and the camera firmware (the software that runs on the camera). See www.kodak.com/go/p880downloads.

**Additional care and maintenance**

- If the camera has been subjected to inclement weather or you suspect water has gotten inside the camera, turn off the camera and remove the batteries and card. Allow all components to air-dry for at least 24 hours before using the camera again.

- Blow gently on the lens or camera screen to remove dust and dirt. Wipe gently with a soft, lint-free cloth or an untreated lens-cleaning tissue. Do not use cleaning solutions unless designed specifically for camera lenses. Do not allow chemicals, such as suntan lotion, to contact painted surfaces.

- Service agreements may be available in your country. Contact a dealer of Kodak products for more information.

- For digital camera disposal or recycling information, contact your local authorities. In the US, visit the Electronics Industry Alliance Web site at www.eiae.org or the Kodak Web site at www.kodak.com/go/p880support.
Warranty

Limited warranty

Kodak warrants Kodak digital cameras and accessories (excluding batteries) to be free from malfunctions and defects in both materials and workmanship for one year from the date of purchase.

Retain the original dated sales receipt. Proof of the date of purchase will be required with any request for warranty repair.

Limited warranty coverage

This limited warranty will be honored only within the geographical location that Kodak digital cameras and accessories were purchased.

Kodak will REPAIR or REPLACE Kodak digital cameras and accessories if they fail to function properly during the warranty period, subject to any conditions and/or limitations stated herein. Such repair service will include all labor as well as any necessary adjustments and/or replacement parts. Such repair or replacement is the sole remedy under this warranty.

If replacement parts are used in making repairs, these parts may be remanufactured, or may contain remanufactured materials. If it is necessary to replace the entire product, it may be replaced with a remanufactured product.

Limitations

Request for Warranty service will not be accepted without proof of date of purchase, such as a copy of the original dated Kodak digital camera or accessory sales receipt. (Always keep the original for your records.)

This warranty does not apply to the battery(s) used in digital cameras or accessories. This warranty does not cover circumstances beyond Kodak’s control, nor problems caused by failure to follow the operating instructions in the Kodak digital cameras and accessories User’s Guides.

THIS WARRANTY DOES NOT APPLY WHEN FAILURE IS DUE TO SHIPPING DAMAGE,
ACCIDENT, ALTERATION, MODIFICATION, UNAUTHORIZED SERVICE, MISUSE, ABUSE, USE WITH INCOMPATIBLE ACCESSORIES OR ATTACHMENTS, FAILURE TO FOLLOW KODAK’S OPERATION, MAINTENANCE OR REPACKING INSTRUCTIONS, FAILURE TO USE ITEMS SUPPLIED BY KODAK (SUCH AS ADAPTERS AND CABLES), OR CLAIMS MADE AFTER THE DURATION OF THIS WARRANTY.

Kodak makes no other express or implied warranty for this product. In the event that the exclusion of any implied warranty is ineffective under the law, the duration of the implied warranty will be one year from the purchase date.

The option of replacement is Kodak’s only obligation. Kodak will not be responsible for any special, consequential or incidental damages resulting from the sale, purchase, or use of this product, regardless of the cause. Liability for any special, consequential or incidental damages (including but not limited to loss of revenue or profit, downtime costs, loss of the use of the equipment, cost of substitute equipment, facilities or services, or claims of your customers for such damages resulting from the purchase, use or failure of the product), regardless of cause or for breach of any written or implied warranty is expressly disclaimed and excluded here from.

Your rights

Some states or jurisdictions do not allow exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. Some states or jurisdictions do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you. This warranty gives you specific rights, and you may have other rights which vary from state to state or by jurisdiction.

Outside the United States and Canada

In countries other than the United States and Canada, the terms and conditions of this warranty may be different. Unless specific Kodak warranty is communicated to the purchaser in writing by a Kodak company, no warranty or liability exists beyond any minimum requirements imposed by law, even though defect, damage, or loss may be by negligence or other act.

Appendix

Regulatory compliance

FCC compliance and advisory

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed or used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: 1) reorient or relocate the receiving antenna; 2) increase the separation between the equipment and the receiver; 3) connect the equipment to an outlet on a circuit different from that to which the receiver is connected; 4) consult the dealer or an experienced radio/TV technician for additional suggestions.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment. Where shielded interface cables have been provided with the product or specified additional components or accessories elsewhere defined to be used with the installation of the product, they must be used in order to ensure compliance with FCC regulation.
Appendix

Canadian DOC statement

DOC Class B Compliance—This Class B digital apparatus complies with Canadian ICES-003.

Observation des normes-Class B—Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Australian C-Tick

✔ N137

Waste Electrical and Electronic Equipment labeling

In the European Union, do not discard the product as unsorted municipal waste. Contact your local authorities or go to www.kodak.com for recycling program information.

Korea Class B ITE

이 기기는 가정용으로 정격파워결합등록을 한 기기로서 주거지역에서는 물론 모든 지역에서 사용할 수 있습니다.

English translation:
As this equipment has obtained EMC registration for household use, it can be used in any area including residential areas.
Appendix

VCCI Class B ITE

This is a Class B product based on the standard of the Voluntary Control Council for Interference from Information Technology Equipment (VCCI). If this is used near a radio or television receiver in a domestic environment, it may cause radio interference. Install and use the equipment according to the instruction manual.
