BEFORE YOU START

Declaration of Conformity

Responsible Party: JK Imaging, Ltd.
Address: JK Imaging, Ltd. 17239 South Main Street, Gardena, CA 90248, USA
JK Imaging Europe, 71 Clarendon road, Watford, WD17 1DS, UK
Company Website: www.kodakpixpro.com

For Customers in the U.S.A.
Tested to Comply with FCC Standards FOR HOME OR OFFICE USE
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

For Customers in Europe

"CE" mark indicates that this product complies with the European requirements for safety, health, environment and customer protection. "CE" marked cameras are intended for sales in Europe.

This symbol [crossed-out wheel bin WEEE Annex IV] indicates separate collection of electrical waste and electronic equipment in the European countries. Please do not throw the equipment into domestic refuse. Please use the return and collection systems available in your country for proper, safe disposal of this product.

Packaging: Please follow local regulations for the recycling of packaging.
Batteries: Please dispose of used batteries at designated collection centers.
About this Manual

Thank you for purchasing this KODAK PIXPRO Digital Camera. Please read this manual carefully and keep it in a safe place for future reference.

JK Imaging, Ltd. reserves all rights of this document. No part of this published manual may be reproduced, transmitted, transcribed, stored in a retrieval system or translated into any language or computer language, in any form, by any means, without the prior written permission of JK Imaging, Ltd..

All trademarks mentioned in this manual are used for identification purposes only and are properties of their respective owners.

This manual provides you with instructions on how to use your new KODAK PIXPRO Digital Camera. Every effort has been made to ensure that the contents of this manual are accurate; however JK Imaging, Ltd. reserves the right to make changes without notice.

Throughout this manual, the following symbols are used to help you locate information quickly and easily:

- Indicates useful information.

- Indicates precautions are to be taken while operating the camera.

In introducing you how to operate this camera, the following symbols may appear to facilitate your understanding:

[Item properties] : The optional properties in the camera interface are indicated by the symbol [ ] .
SAFETY NOTES

Safety notes for this camera

- Do not drop the camera or allow it to hit solid objects.
- Do not attempt to disassemble or repair the camera.
- Do not use or store the camera in dusty places or on a beach to prevent dust or sand from entering the camera, causing possible damage to it.
- Do not use or store the camera in a hot environment or under direct sunlight.
- Do not use or store the camera near a powerful magnetic field, for example near a magnet or transformer.
- Avoid touching the lens of the camera.
- Do not expose the camera to direct sunlight for a long period time.
- To prevent the camera from being damaged by moisture, do not use or store the camera in very humid environments, such as in rain or near bodies of water.
- If water accidentally comes in contact with the camera, turn the camera off, remove the battery and the memory card, and dry it within 24 hours.

- When you take the camera from a cold place to a warmer environment, condensation may occur. Please wait for a reasonable period of time before you turn it on.
- Before you remove the battery and memory card, the camera should be turned off.
- When you clean the body of the camera, don’t use abrasive, alcohol-based or organic cleaner.
- Use a professional lens wiping cloth and dedicated cleaner to wipe and clean the lens.
- Download your photos and remove the memory card when you are going to store the camera for a long period of time.
- If this camera is not in use for a long time, please keep it in a dry and clean condition.
- Our company will not pay compensation for any failure of playback of pictures or videos caused by improper operation.
Safety notes for battery

- If battery fluid leaks inside the camera, contact our customer service department. If the battery fluid leaks onto your skin, rinse your skin with clean water and seek immediate medical attention.

- Disposal of used batteries should be carried out in accordance with the local (national or regional) regulations.

- To prevent the battery from being damaged, do not drop the battery or allow it to hit solid objects or to be scratched by the objects.

- Do not let the battery come in contact with metal objects (including coins) to avoid short circuiting, discharging, excessive heat, or possible leakage.

- Do not attempt to disassemble the battery.

- Do not expose the battery to water. Always keep the battery contacts dry.

- Do not heat the battery or throw it into a fire to avoid a possible explosion.

- Do not store the battery in a hot environment or in direct sunlight.

- When the camera is stored for a long period of time, remove the battery and keep it in a dry place that is not accessible to infants and children.

- In a colder environment, the performance of the battery could be noticeably reduced.

- When you install the battery, install it according to the positive and negative markings on the battery compartment. Never force it into the battery compartment.
Safety notes for memory card

- We suggest buying only well-known, name brand memory cards to ensure peak performance.
- Format the memory card using the camera before you use it or insert a new one.
- Do not drop the memory card or allow it to hit solid objects to avoid damaging it.
- Do not attempt to disassemble or repair the memory card.
- Do not expose the memory card to water. Always keep it dry.
- Do not remove the memory card when the camera is turned on. Otherwise, the memory card could be damaged.
- Do not directly edit the data on the memory card. Copy the data to your PC before you edit them.

- When the camera is stored for a long period of time, be sure to download your photos and remove the memory card. Store it in a dry environment.
- Do not modify the name of the files or folders of the memory card using your PC. Modifying the file names may cause the files to not be recognized on the camera or a possible error may occur.
- A photo taken with the camera will be stored in the folder that is automatically generated on the SD card. Do not store photos that are not taken using this camera in these folders as the pictures cannot be recognized during the playback.
- When you insert a memory card, make sure the notch of the card matches the markings on the top of the card slot.
**Other Safety Notes**

- Do not disconnect the power or turn the camera off during the update process. Doing so may cause incorrect data to be written and the camera may not power on later.

- When using your camera on an airplane, observe the relevant rules specified by the airline.

- Due to the limitations of manufacturing technology, the LCD may have a few dead or bright pixels. These pixels do not affect the quality or performance of the camera, photos or video.

- Do not expose the LCD to water. In a humid environment, only wipe it with a soft and dry cleaning cloth.

- If the LCD is damaged and the liquid crystal comes into contact with your skin, wipe your skin with a dry cloth immediately and rinse it with clean water. If liquid crystal comes into contact with your eyes, wash them with clean water at least for 15 minutes and seek immediate medical attention. If you accidentally swallow liquid crystal, rinse your mouth immediately and seek medical attention.

Installing Battery and Memory Card

1. Open the battery cover.

2. Insert the battery into the battery slot in the correct position as shown in the following diagram:
3. Insert the memory card into the memory card slot as shown in the diagram below:

Write protection buckle

4. Close the battery cover.

A memory card (SD/SDHC) is optional and is not included in the product package. It needs to be purchased separately. Please use an original memory card which is Class 4 or higher and has a capacity of 4GB to 32GB.

To remove your memory card, open the battery cover, gently press the memory card to eject it and remove it carefully.
Turning Camera On and Off

Press the power button to turn the camera on. To turn the camera off, press the power button again.

Press and hold the button to power on and enter Playback mode.
Set your Language, Date/Time after the first power-on

1. When you turn the camera on for the first time, the language selection screen appears.

2. Press the arrow buttons to select your desired language.

3. After you press the SET button to confirm the selection, the Date/Time settings screen appears.

4. Press the left/right arrow buttons to select the Date/Time to be adjusted: Time is displayed in yyyy:MM:dd HH:mm.

5. Press the up/down arrow buttons to adjust the value for the selected Date/Time.

6. Press the SET button to confirm the time settings and the snapshot screen appears.
Resetting your Language

After you set your language for the first time, follow the instructions below to reset your language.

1. Press the button, press the up/down arrow buttons to select , and press the button to enter the menu.

2. Press the up/down arrow buttons to select , and press the button or right arrow button to enter the menu.

3. Press the up/down arrow buttons to select 「Language」 and press the button or right arrow button to enter the menu.

4. Press the arrow buttons to select your desired language and press the button to confirm.

5. Press the button and the snapshot screen appears.
**Resetting Date/Time**

After you set your Date/Time for the first time, follow the instructions below to reset date and time.

1. Press the 
   button, press the up/down arrow buttons to select 
   , and press the 
   button to enter the menu.

2. Press the up/down arrow buttons to select 
   , and press the 
   button or right arrow button to enter the menu.

3. Press the up/down arrow buttons to select 「Date & Time」 and press the 
   button or right arrow button to enter the menu.

4. Press the left/right arrow buttons to select the Date/Time to be adjusted: Time is displayed in yyyy: MM:dd HH:mm.

5. Press the up/down arrow buttons to press the value for your selected block. After you finish your settings, press the 
   button to confirm.

6. Press the 
   button and the following snapshot screen appears.
MODE OVERVIEW

Display Setting

Press the DISP button to display the settings: Classic, Full, Off.

Classic: Displays the camera parameters on screen

Full: Camera parameters with Grid and Histogram

Off: Does not display any additional icons on screen
Overview of the Screen Icons in Photo Shooting Mode

Using the Mode Button

This camera provides a convenient mode button that allows you to manually switch among different camera settings with ease. Available modes are listed below:

<table>
<thead>
<tr>
<th>Mode Name</th>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Manual Mode</td>
<td>![M]</td>
<td>Many of the camera settings can be configured manually in this mode.</td>
</tr>
<tr>
<td>Auto Mode</td>
<td>![Camera]</td>
<td>In this mode, the optimal conditions for taking pictures will be set based on the subject and environment. It is the most commonly used mode for taking pictures.</td>
</tr>
<tr>
<td>Movie Mode</td>
<td>![Video]</td>
<td>Record videos.</td>
</tr>
<tr>
<td>Panorama Mode</td>
<td>![Panorama]</td>
<td>In this mode, up to 4 frames can be stitched together to create a single panoramic photo.</td>
</tr>
<tr>
<td>Scene Mode</td>
<td>![Scene]</td>
<td>Choose from 23 different pre-set scene types and effects for your photos.</td>
</tr>
</tbody>
</table>
**Manual Mode**

When selecting 📷 (Manual Mode), you can set EV/ISO.

1. Press MODE button to select Manual Mode 📷, press SET to confirm.
2. Press the SET button.

3. Press the left/right arrow buttons to select an adjustment setting.
4. Press the up/down button to adjust the parameters.
5. Press the SET button to confirm the settings and enter the shooting screen.

---

**Auto Mode**

Auto Mode is the easiest mode to take photos. While operating in this mode, the camera automatically optimizes numerous camera settings to adjust your photos and videos for the best possible results.

Follow these steps:

1. Press MODE button to select Auto Mode (📸).
2. Compose your picture in the LCD and press the shutter button halfway down to focus on the subject.
3. The LCD will show a green focus frame when the subject is in focus.
4. Fully press the shutter button down to take pictures.
With Panorama Mode, you can take a series of pictures which will be stitched automatically into an ultra-wide panoramic picture by the camera.

Follow the steps below:
1. Press the button to select Panorama Mode ( ).
2. Use the left/right buttons to specify the direction of picture taking, and then in 2 seconds the panoramic sequence will commence automatically.
3. Compose the first view of the panoramic picture on the LCD and press the shutter button to capture the image.
4. After the first shot is taken, the semi-transparent image of the first shot will appear at the edge of the screen. You can use this image to compose your picture before you press the shutter button to capture and finish manual stitching.
5. If continuous pictures are less than 4 shots, press the button and the camera will stitch the pictures automatically. Press the playback button to enter playback mode to see the effect.
6. If you take 4 pictures, the camera will automatically stitch the pictures. Press the playback button to enter playback mode to see the effect.

Flash Mode, Self-timer, Macro Mode, and Exposure Compensation are all disabled in Panorama Mode.

In Montage mode, up to 4 photos can be captured when the image size is set at 2MP.
Scene Mode

You can select an appropriate mode from the 23 scene modes according to the type of environment you are shooting. The camera then configures the most appropriate settings automatically.

Press the MODE button to select SCN mode. Press the arrow buttons to select a scene, and press the SET button to confirm.

</tr>
</tbody>
</table>
**Auto Scene Mode**

In **ASCN** scene mode, the camera can detect different environments intelligently and automatically select the best scene and photo settings for you.

1. Press **MODE** button to select **ASCN** mode, then select function.
2. Hold the camera steadily and aim at the subject. The optimum scene mode will be selected automatically.
3. Press the shutter button half-way down to focus.
4. Press the shutter button all the way down to take pictures.

<table>

<td>To produce more detailed close-ups, ASCN will automatically engage the camera's Macro Mode and automatically focus the lens.</td>
</tr>
<tr>
<td>Auto Mode</td>
<td>The camera will automatically adjust the exposure and focus to ensure the best possible pictures.</td>
</tr>
</tbody>
</table>
The Flash is used to illuminate a subject in low light or for fill-in lighting to achieve better illumination of a subject with pronounced shadows.

1. Press the right arrow button (.runners) to enter the Flash Settings Menu.

2. Press the left/right buttons to select the following 6 modes:
   - **Force Off**
     Flash is turned off.
   - **Flash Auto**
     Camera flash goes off automatically based on existing light conditions.
   - **Fill Flash**
     The flash will engage with each shot even if there is enough available light to take the photo without flash.
   - **Slow Sync.**
     This allows for night scenery photos that include people in the foreground. The use of a tripod is recommended when shooting with this setting.
   - **Slow Sync. + Red-Eye**
     Use this mode for slow synchro shots with red-eye reduction.
   - **Red-Eye Reduction**
     The camera emits a brief pre-flash before the picture is taken to reduce red-eye effects.

3. Press the button to confirm the settings and exit the option.
Macros Mode

The Macro Setting is ideal for shooting small objects or close-up photos. This mode allows you to focus on subjects very close to the camera.

1. Press the left arrow button (agog) to enter the Marco Menu.

2. Press the left/right buttons to select the following 2 modes:
   - Macro Off
     Select this option to disable Macro.
   - Macro On
     Select this to focus on subjects 5cm from the lens.

3. Press the button to confirm the settings and exit the menu.
Self-timer Setting

Use this function to take pictures at pre-set intervals. The camera shutter speed can be set for 2 seconds, 10 seconds or by smile detection.

1. Press the left arrow button (←) to enter the Marco Menu.

2. Press up/down buttons to enter Self-timer function menu.

3. Press left/right buttons to select the following 4 modes:
   - Self-timer Off
     Disables the Self-timer.
   - Self-timer 2sec
     A single picture is shot 2 seconds after the shutter button is pressed.
   - Self-timer 10sec
     A single picture is shot 10 seconds after the shutter button is pressed.
   - Self-timer Smile
     Press the shutter button and a picture will be taken immediately after a smile is detected.

4. Press the SET button to confirm the settings and exit the menu.
EV Setting

EV function menu of the camera consists of EV adjustment (Adjustable in mode) and ISO adjustment (Adjustable in mode). With proper function setting, the user can take pictures with better effects.

The adjustable range of exposure value is from EV -2.0 to EV+2.0.

The ISO function allows you to set the sensitivity of the camera's light sensor based on the brightness of the scene. To improve the camera's sensor performance in darker environments, a higher ISO value is required. A lower ISO value is needed when shooting in brighter conditions. Pictures taken at higher ISO settings will generally have more noise than those taken at lower ISO settings.

The camera's ISO settings include: Auto, 80, 100, 200, 400, 800 and 1600.

Please refer to manual mode on page 25 for EV setting operation steps.
Using the Zoom Function

Your camera is equipped with two types of zoom functions: optical zoom and digital zoom. Press the zoom button of the camera to zoom in or out on the subject while taking pictures.

When reaching the critical point of optical/digital zoom, the camera will temporarily stop zooming; if you release and press the zoom button again, it will automatically switch between optical and digital zoom.

Using Quick Recording

In shooting mode, press the fast video recording button to begin recording video.

After finishing, press the fast video recording button or the shutter button to stop and store the video. The camera will return to shooting mode automatically.
To view the captured photos and video clips on the LCD:

1. After pressing the button, the last photo or video clip taken will be displayed on the LCD.
2. Use the left/right arrow buttons to scroll through the photos or video clips stored in the internal memory or on the SD memory card.
3. To play a selected video clip, press the button to enter the movie playback Mode.

During video playback, the operating instructions will appear on the screen. Press the appropriate buttons to engage the following actions:

<p>| | |</p>
<table>
<thead>
<tr>

</tr>
<tr>
<td>10</td>
<td>Play video backward</td>
</tr>
</tbody>
</table>
When in playback mode, press the \( \text{W} \) \( \text{T} \) button on the zoom button to display thumbnail images of photos and videos on the screen.

1. Slide the zoom lever to switch between 3x3 and 4x4 thumbnails.

2. When a 3x3 or 4x4 thumbnail is displayed, press the arrow buttons to select a picture or video clip to view.

If the \( \text{\text{Play}} \) indicator appears on the LCD, then a movie file is currently being displayed.

Press the \( \text{\text{SET}} \) button to restore a preview icon to its original image size.
Using Zoom Playback (for still pictures only)

When playing back photos, you can also use the Zoom Button to zoom in on the photos 2 to 8 times.

1. Press the left/right button to select a picture to be zoomed in.
2. Press the `button on the zoom button to zoom in.
3. The bottom right corner of the screen will display the number of times and area of the photo zooming operation.

4. Press the arrow buttons to navigate and select a part of the image to be zoomed in.
5. Press the `button to return the image to its original scale.

Movie images cannot be magnified.
This setting allows you to view all the stored pictures as a slideshow.

1. Press the button to enter playback screen.
2. Press the button to enter slide option.
3. Press the left/right buttons to select slideshow playing or 「Cancel」 to return to the playback screen.
4. Press the button to confirm the setting.
Photos and Video Deletion

In playback mode, press the down arrow button (شروط) to select your photos and videos.

To delete photos or videos:
1. Press the (ب) button to switch to playback mode.
2. Press the left/right arrow buttons to select the photos and videos to be deleted.
3. Press the down arrow button (شروط) and the deletion screen is displayed.

4. Press the up/down arrow buttons to select ‘Delete One’ or ‘Exit’ and press the (الح) button to confirm.

⚠️ Erased photos/video clips cannot be recovered.
Photo Setup Menu

Mode:  

1. In Photo Shooting Mode, press the button to enter the Photo Shooting Menu.
2. Press the up/down arrow buttons to select the Photo Shooting Menu to be set.
3. Press the left/right arrow buttons to select the Photo Shooting Menu to be set and press the button to confirm.

Refer to the following pages for more details about each setting.

Image Size

The size setting refers to the image resolution in pixels. A higher image resolution allows you to print that image in larger sizes without degrading the image quality.

The bigger the number of recorded pixels is, the better the image quality becomes. As the number of recorded pixels lessen, you will be able to record more images on a memory card.
**Cont. AF**

Enable the continuous AF to be able to continuously focus automatically when taking pictures.

There are 2 options:
- Off
- On

Setting Continuous AF to On will reduce battery life.

---

**Continuous Shot**

Use this setting to perform continuous shooting.

There are 2 options:
- Single
- Continuous Shot

Press the shutter button to start continuous shooting.
Focus Setting
In different photo shooting modes, you can select different focus methods.

There are 2 options:
- Single-AF: The focus frame appears on the center of the LCD to focus on the subject.
- Multi-AF: The camera automatically focuses the subject in a wide area to find the focus point.

Color Effect
This setting allows you to select different modes for optimum focus.

There are 4 options:
- Normal
- Vivid
- Sepia
- Black and White
**White Balance Setting**

The White Balance Setting allows you to adjust the color temperature for different lighting sources to ensure the most accurate color reproduction.

There are 7 options:

- AWB
- Daylight
- Cloudy
- Fluorescent
- Fluorescent CWF
- Incandescent
- Manual WB (Fully press the shutter button to detect the white balance value)

**Scene**

Select the scene mode under the SCN mode.
- Shooting menu in the shooting mode (O: Optional   X: Not optional)

Mode: **M**  **S**  **EN**

1. Press the button in Photo Shooting Mode and press the up/down button to select .

2. Press the button to enter the menu.
3. Press up/down arrow buttons to select , and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select the item to be set and press the button or right arrow button to enter the menu.
5. Press the up/down arrow buttons to select an option and press the button to confirm.

### Quality

The Quality Setting can be used to adjust the image compression ratio.

There are 3 options:
- Best (16M Average File Size: 4.0MB)
- Fine (16M Average File Size: 2.5MB)
- Normal (16M Average File Size: 2.0MB)
**AF Assist Beam**
In a darker environment, AF Assist Beam can be turned on for better focus.

There are 2 options:
- Off
- On

**Digital Zoom**
Turn on or off the digital zoom.

There are 2 options:

- Date / Time

Quick Review
This option allows quick review of the photos immediately after they are taken. Each photo is displayed on the LCD based on the selected time.

There are 4 options:
- Off
- 1 sec
- 2 sec
- 3 sec

A shorter quick review time will improve battery life.
Movie Menu

Mode: 🎥

1. Press the ☰ button, select the 🎥 mode and press the ☰ button to enter the Movie Menu.

2. Press the up/down arrow buttons to select the Movie Menu to be set.
3. Press the left/right arrow buttons to select the Movie Menu to be set and press the ☰ button to confirm.

Video Quality

Set the image resolution used during video recording.

The speed requirements for reading and writing high image pixel images to SD card are as follows:

<table>
<thead>
<tr>
<th>No.</th>
<th>Image Pixel</th>
<th>Frame</th>
<th>Recommendation</th>
<th>Recording time (4GB) About</th>
</tr>
</thead>
<tbody>

<td>200 minutes</td>
</tr>
</tbody>
</table>

* The longest recording time is 29 minutes at one time.
Movie Setting Menu

Mode:  

1. Press the MODE button, select the mode and press the button to enter the Movie Menu.

2. Press the up/down arrow buttons to select , and press the button to enter the menu.

3. Press up/down arrow buttons to select , and press the button or right arrow button to enter the menu.

4. Select the items to be set and press the button or the right arrow button to enter the menu.

5. Press the up/down arrow buttons to select an option and press the button to confirm.

Digital Zoom

Turn on or off the digital zoom.

There are 2 options:

- Off
- On
Playback Menu

1. Press the button to display the playback screen and press the button to enter the menu.
2. Press the up/down arrow buttons to select the playback to be set and press the button to enter.
3. Press the left/right arrow buttons to select an option and press the button to confirm.

Refer to the following pages for more details about each setting.
Red-Eye Reduction
Use this setting to remove red eye in your photos.

There are 2 options:
  • Red-Eye Reduction
  • Cancel

Rotate
You can use this setting to change the orientation of the picture.

There are 3 options:
  • Turn Right
  • Turn Left
  • Cancel

Videos and panoramic pictures cannot be rotated.

The rotated picture file will replace the original photo.
1. Press the \( \text{\textcopyright} \) button to show the playback screen, press the \( \text{\textcopyright} \) button, and press the up/down button to select \( \text{\textcopyright} \).

2. Press the \( \text{SET} \) button to enter the menu.

3. Press up/down arrow buttons to select \( \text{\textcopyright} \), and press the \( \text{SET} \) button or right arrow button to enter the menu.

4. Press the up/down arrow buttons to select the item to be set and press the \( \text{SET} \) button or right arrow button to enter the menu.

5. Press the up/down arrow buttons to select an option and press the \( \text{SET} \) button to confirm.

Refer to the following pages for more details about each setting.
Protect

To prevent any pictures or videos from being accidentally erased, use this setting to lock one or all of the files.

There are 3 options:

- One: Lock the selected photo or video if they are unprotected; unlock the selected photo or video if they are protected.
- All: Lock all photos or videos.
- Reset: Cancel all locked photos or videos.

Delete

You can delete one or all photo/video files.

There are 2 options:

- One: Delete one photo or video.
- All: Delete all photos or videos.

The ☑️ indicator means a file is protected. File protection must be removed first before a file can be deleted.

Deleting files will cause DPOF settings to be reset.
**DPOF (Digital Print Order Format)**

The DPOF feature allows you to compile and select a group of pictures that you would like to print and will save your selection on the memory card so that you can use the SD memory card to print without having to individually specify the photos you want to print.

There are 3 options:

- One
- All
- Reset

The printer that supports DPOF is needed for printing.

---

**Trim**

The Trim Setting allows you to crop photos and save them as new pictures.

1. Press the up/down arrow buttons to select 「Trim」 and press the SET button or right arrow button to enter the menu.
2. Select 「Yes」 to confirm trim. Select a part to be trimmed using the zoom lever and arrow buttons to trim a photo.
3. Press the SET button and the 「Save change?」 prompt appears. Select 「✓」 to change and save the picture. Select 「✗」 to cancel changes and return to the trim prompt screen.

The image cannot be clipped/trimmed again once it has been clipped to 640X480.
Setup Menu

1. Press the button in any mode and press the up/down button to select .

2. Press the button to enter the menu.

3. Press up/down arrow buttons to select , and press the button or right arrow button to enter the menu.

4. Press the up/down arrow buttons to select the item to be set and press the button or right arrow button to enter the menu.

5. Press the up/down arrow buttons to select an option and press the button to confirm.

Refer to the following pages for more details about each setting.
**Power Saver**

This setting allows you to save power and get the maximum possible running time for your camera’s batteries. Follow the steps below to turn the LCD and camera off automatically after a consecutive period of inactivity.

1. Select 「Power Saver」 in the basic settings menu. Press the SET button or right arrow button to enter the menu.
2. Press the up/down arrow buttons to select an option.
3. Press the SET button to confirm.

---

**Sound Settings**

To change this setting:

1. Select 「Sound Settings」 in the basic settings menu. Press the SET button or right arrow button to enter the menu.
2. Press the left/right arrow buttons to select an option.
3. Press the SET button to confirm.
Language
Refer to the “Reset your language” section on page 18.

World Time
The Zone setting is a useful function for your overseas trips. This feature enables you to display the local time on the LCD while you are abroad.
1. Select 「World Time」 in the basic settings menu. The World Time screen appears.
2. Press the up/down to select the departure place (HOUSE) and destination (-plane) fields.
3. Press the left/right arrow buttons to select a city located in the same time zone as that of the field. Press the SET button to confirm settings.

Date & Time
Refer to the “Reset Date/Time” section on page 19.
**Format**

Please note: formatting enables you to delete all contents in the memory card and built-in memory, including protected photo and movie files.

To use this setting:

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select [Format] and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select [Yes] or [No] and press the button to confirm.

5. If you select [Yes] the camera formats its memory.

If there is no memory card in the camera, the built-in memory will be formatted; if there is a memory card, it will be formatted only.
Copy to Card

Use this setting to copy the files stored in the internal memory to an SD memory card.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press up/down arrow buttons to select  and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select 「Copy to Card」 and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select 「Yes」 or 「No」 and press the button to confirm.

If there is no card available in the camera, this function will not be displayed.
File Numbering

After you take a picture or video clip, the camera will save it with a sequential number. You can use this to reset the file numbering to 1.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select 「File Numbering」 and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select 「Yes」 or 「No」 and press the button to confirm.
**Reset**

Use this setting to restore the camera to its original factory default settings.

1. Press the [ ] button, press the up/down arrow buttons to select [ ] and press the [SET] button to enter the menu.
2. Press up/down arrow buttons to select [ ] and press the [SET] button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select 「Reset」 and press the [SET] button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select 「Yes」 or 「No」 and press the [SET] button to confirm.
**FW Version**

Use this setting to view the current camera firmware version.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select 「FW Version」 and press the button or right arrow button to enter the menu.

![FW Version Menu](image)

4. When there is a new firmware version in the SD card, select 「Yes」 to update.
Connecting to a Computer

You can use a micro USB cable to connect the camera and copy (transmit) photos to a computer, printer or other device.

Setting the USB Mode

The camera’s micro USB port can be set to connect with either a computer or a printer. The following steps will allow you to ensure that the camera is correctly configured to connect with a PC.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press up/down arrow buttons to select and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select 「USB」 and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select 「PC」 and press the button to confirm.
Transferring files to your computer

The computer will automatically detect the camera as a removable drive. Double-click the My Computer icon on the desktop to locate the removable drive and to copy folders and files in the drive to a directory on your PC as you would copy any typical folder or file.

Follow the steps below to connect the camera to a computer.

1. Make sure both the camera and computer are turned on.
2. Connect one end of the supplied micro USB cable to the micro USB port on your camera.
3. Connect the other end of the cable to an available USB port on your computer.

4. After the transmission is complete, disconnect the micro USB cable according to the instructions specifying how to safely remove USB devices.
**Video System**

Use this feature to switch the video system from either NTSC or PAL.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.
2. Press up/down arrow buttons to select ⏩ and press the button or right arrow button to enter the menu.
3. Press the up/down arrow buttons to select 「TV-System」 and press the button or right arrow button to enter the menu.
4. Press the up/down arrow buttons to select 「NTSC」 or 「PAL」 and press the button to confirm.

The video output system would change accordingly based upon the changes of the selected language.

**NTSC:** English, Chinese (Traditional), Japanese, French, Korean, Russian, Vietnamese, Greek, Hungarian

**PAL:** German, Spanish, Italian, Chinese (Simplified), Portuguese, Swedish, Danish, Finnish, Indonesia, Norwegian, Dutch, Turkish, Polish, Thai, Croatian, Czech, Arabic, Hindi
Connecting to a PictBridge Compatible Printer

PictBridge technology allows printing of the photos saved in the memory card by the printer.

To find out if a printer is PictBridge compatible, simply look for the PictBridge logo on the packaging or check the owner’s manual for specifications. With the PictBridge function on your camera, you can print the captured photos directly to a PictBridge compatible printer using the supplied micro USB cable, without the need for a PC.

Setting the USB Mode

The camera’s micro USB port can be set to connect with either a PC or a Printer, the following steps will ensure that the camera is correctly configured to connect with a Printer.

1. Press the button, press the up/down arrow buttons to select and press the button to enter the menu.

2. Press up/down arrow buttons to select and press the button or right arrow button to enter the menu.

3. Press the up/down arrow buttons to select 「USB」 and press the button or right arrow button to enter the menu.

4. Press the up/down arrow buttons to select 「Printer」 and press the button to confirm.

After the camera is reset, it will switch to PC mode automatically from USB mode.

See “PictBridge” section on page 68.
Connecting to your Printer

1. Make sure both the camera and printer are turned on.
2. Connect one end of the supplied micro USB cable to the micro USB port on your camera.
3. Connect the other end of the cable to the USB port on the printer.

If the camera is not connected to a PictBridge compatible printer, the following error message will appear on the LCD.

Connection Failed!

The error message above will also appear if the USB mode is set incorrectly, in which case you should disconnect the USB cable, check the USB mode settings, ensure that the Printer is turned on, and then try connecting the micro USB cable again.
After setting the USB mode to Printer, the PictBridge Menu will appear.

Press the up/down arrow buttons to select a menu item and press the SET button or right arrow button to enter the item. Refer to the following sections for more detailed information on each setting.
Print (with Date)

If you have set the date and time on your camera, the date and time will be recorded and saved with each photo you take.

1. In the PictBridge menu, select 「Print (with Date)」 and the screen as shown below appears.

2. Press the left/right arrow buttons to select a photo to be printed.

3. Press the up/down arrow buttons to select the number of copies for the currently displayed photo.

4. Press the SET button and the following screen will appear.

5. Select 「Yes」 and press the SET button to confirm; select 「Cancel」 and press the SET button to cancel printing.
**Print (without Date)**

Use this setting to print the photos without dates on them.

1. In the PictBridge menu, select 「Print (without Date)」 and the screen as shown below appears.

2. Press the left/right arrow buttons to select a photo to be printed.

3. Press the up/down arrow buttons to select the number of copies for the currently displayed photo.

4. Press the SET button and the following screen will appear.

![Print (without Date) screen]

5. Select 「Yes」 and press the SET button to confirm; select 「Cancel」 and press the SET button to cancel printing.
Print Index

You can print all photos in the camera via this function.
1. In the PictBridge menu, select 「Print Index」 and the screen as shown below appears.

![Print Index Screen]

2. Select 「Yes」 and press the SET button to confirm; select 「Cancel」 and press the SET button to cancel printing.

Print DPOF Images

To use DPOF printing, you must select your photos for printing using the DPOF settings beforehand. See “DPOF” section on page 54.
1. In the PictBridge menu, select 「Print DPOF Images」 and the screen as shown below appears.

![Print DPOF Images Screen]

2. Select 「Yes」 and press the SET button to confirm; select 「Cancel」 and press the SET button to cancel printing.
Exit
Select 「Exit」 to exit the PictBridge menu. At this time, the message 「Remove USB Cable!」 appears on the screen.

Disconnect the micro USB cable from the camera and printer.

<tr>
<td>Exceeded maximum folder number.</td>
<td>This indicates that the SD card exceeded the maximum number of folders (999). This could cause a long read time during the camera’s power up.</td>
<td>Copy the data to your PC, format the memory card using the camera.</td>
</tr>
<tr>
<td>Too many pictures for quick processing.</td>
<td>During the playback by date, the images exceed specifications so that it is not possible to play by date.</td>
<td>The message disappears after 2 seconds and the camera returns to the normal playback mode.</td>
</tr>
<tr>
<td>Unable to recognize files.</td>
<td>The format of the file to be viewed is not supported or the file is corrupted so it cannot be properly read.</td>
<td>This image message disappears only after the file is deleted.</td>
</tr>
<tr>
<td>No Picture!</td>
<td>When you press the play button, no image files exist in the camera or memory card.</td>
<td>The message disappears 2 seconds later to return to the photo shooting screen.</td>
</tr>
<tr>
<td>Protected! Undeletable!</td>
<td>The file is protected. The message appears when you delete it.</td>
<td>Remove SD card and switch the lever on the side of card to UNLOCK. Place back into the camera and try again. The message will disappear after 2 seconds.</td>
</tr>

## Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible causes</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Camera does not turn on</td>
<td>■ The battery has been depleted.</td>
<td>■ Recharge the battery.</td>
</tr>
<tr>
<td></td>
<td>■ The battery is not inserted correctly.</td>
<td>■ Correctly reinstall the battery.</td>
</tr>
<tr>
<td>Camera turns off suddenly during operation</td>
<td>■ The batteries have been depleted.</td>
<td>■ Recharge the battery.</td>
</tr>
<tr>
<td>The picture is blurred</td>
<td>■ Camera shakes while taking a picture.</td>
<td>■ Turn on OIS feature.</td>
</tr>
<tr>
<td>Images and video files cannot be saved</td>
<td>■ The SD memory card is full.</td>
<td>■ Use another memory card or delete unnecessary files.</td>
</tr>
<tr>
<td></td>
<td>■ The memory card is locked.</td>
<td>■ Unlock the memory card.</td>
</tr>
<tr>
<td>Images will not print from the connected printer</td>
<td>■ The camera is not connected to the printer correctly.</td>
<td>■ Check the connection between the camera and printer.</td>
</tr>
<tr>
<td></td>
<td>■ The printer is not PictBridge compatible.</td>
<td>■ Use a PictBridge compatible printer.</td>
</tr>
<tr>
<td></td>
<td>■ The printer is out of paper or ink.</td>
<td>■ Load paper into the printer or replace the ink cartridge in the printer.</td>
</tr>
<tr>
<td></td>
<td>■ The printer paper is jammed.</td>
<td>■ Remove the jammed paper.</td>
</tr>
<tr>
<td>Problem</td>
<td>Possible causes</td>
<td>Solution</td>
</tr>
<tr>
<td>-------------------------------</td>
<td>---------------------------------------------------------------------------------</td>
<td>--------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Saving data to memory card is slow</td>
<td>Using a memory card below Class 4 may result in slower recording times.</td>
<td>Use an SD card with write Class higher than 4 to improve performance.</td>
</tr>
<tr>
<td>Cannot write to the memory card</td>
<td>The SD memory card has been locked.</td>
<td>Release the write lock of the memory card or replace with another card.</td>
</tr>
<tr>
<td></td>
<td>The camera may experience trouble recording HD movies to SD cards with a rating lower than Class 4.</td>
<td>Use an SD card with write Class higher than 4 to improve performance.</td>
</tr>
<tr>
<td>Too many movies to process</td>
<td>The number of pictures or folders in the SD memory card exceed the specifications, so the playback of data folder can not be displayed.</td>
<td>Delete unwanted files.</td>
</tr>
