**FCC STATEMENT**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

**Note:**
This equipment has been tested and found to comply with the limits for Class B digital devices, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with Class B limits in Subpart B of Part 15 of the FCC rules. Do not make any changes or modifications to the equipment unless otherwise specified in the manual. If such changes or modifications should be made, you could be required to stop operation of the equipment.

READ THIS FIRST

Notice:

- Product design and specifications are subject to change without notice. This includes primary product specifications, software, software drivers, and user's manual. This User Manual is a general reference guide for the product.
- The product and accessories that come with your camera may be different from those described in this manual. This is due to the fact that different retailers often specify slightly different product inclusions and accessories to suit their market requirements, customer demographics, and geographical preferences. Products very often vary between retailers especially with accessories such as batteries, chargers, AC adapters, memory cards, cables, carrying cases/pouches, and language support. Occasionally a retailer will specify a unique product color, appearance, and internal memory capacity. Contact your dealer for precise product definition and included accessories.
- The illustrations in this manual are for the purpose of explanation and may differ from the actual design of your camera.
- The manufacturer assumes no liability for any errors or discrepancies in this user manual.
- For driver updates, refer to our website.
Safety Instructions

Read and understand all **Warnings** and **Cautions** before using this product.

**WARNING**

If foreign objects or water have entered the camera, turn the power OFF and remove the battery and the AC power adapter. Continued use in this state might cause fire or electric shock. Consult the store of purchase.

If the camera has fallen or its case has been damaged, turn the power OFF and remove the battery and the AC power adapter. Continued use in this state might cause fire or electric shock. Consult the store of purchase.

Do not disassemble, change or repair the camera. This might cause fire or electric shock. For repair or internal inspection, ask the store of purchase.

Use the supplied AC power adapter only with the indicated power supply voltage. Use with any other power supply voltage might cause fire or electric shock.

Do not use the camera in areas near water. This might cause fire or electric shock. Take special care during rain, snow, on the beach, or near the shore.

Do not place the camera on inclined or unstable surfaces. This might cause the camera to fall or tilt over, causing injury.

Keep the battery out of the reach of children. Swallowing battery might cause poisoning. If the battery is accidentally swallowed, immediately consult a physician.

Do not use the camera while you are walking, driving or riding a vehicle. This might cause you to fall over or result in traffic accident.
CAUTION

Insert the battery paying careful attention to the polarity (+ or –) of the terminals.
Inserting the battery with its polarities inverted might cause fire and injury, or damage to the surrounding areas due to the battery rupturing or leaking.

Do not fire the flash close to anyone’s eyes.
This might cause damage to the person’s eyesight.

Do not subject the LCD monitor to impact.
This might damage the glass on the screen or cause the internal fluid to leak. If the internal fluid enters your eyes or comes into contact with your body or clothes, rinse with fresh water. If the internal fluid has entered your eyes, consult a physician to receive treatment.

A camera is a precision instrument. Do not drop it, strike it or use excessive force when handling the camera.
This might cause damage to the camera.

Do not use the camera in humid, steamy, smoky, or dusty places.
This might cause fire or electric shock.

Do not remove the battery immediately after long period of continuous use.
The battery becomes hot during use. Touching a hot battery might cause burns.

Do not wrap the camera or place it in cloth or blankets.
This might cause heat to build up and deform the case, resulting in fire. Use the camera in a well-ventilated place.

Do not leave the camera in places where the temperature may rise significantly, such as inside a car.
This might adversely affect the case or the parts inside, resulting in fire.

Before you move the camera, disconnect cords and cables.
Failure to do this might damage cords and cables, resulting in fire and electric shock.
Notes on Battery Usage

When you use the battery, carefully read and strictly observe the Safety Instructions and the notes described below:

- Use only the specified battery (1050mAh, 3.7V).
- Avoid using battery in extremely cold environments as low temperatures can shorten the battery life and reduce camera performance.
- When you are using the new rechargeable battery or rechargeable battery that has not been used for an extended period of time (the battery that passed the expiry date is an exception) might affect the number of images that can be captured. Therefore, to maximize its performance and lifetime, we recommend that you fully charge the battery and discharge it for at least one complete cycle before use.
- The battery may feel warm after long period of continuous use of the camera or the flash. This is normal and not a malfunction.
- The camera may feel warm after long period of continuous use. This is normal and not a malfunction.
- If the battery is not to be used for a long period of time, remove it from the camera to prevent leakage or corrosion.
- If the battery is not to be used for a long period of time, store it after no battery power left. If the battery is stored for a long time in a fully charged state, its performance may be impaired.
- Always keep the battery terminals in a clean state.
- Risk of explosion if battery is replaced by an incorrect type.
- Dispose of used batteries according to the instructions.

# INTRODUCTION

## Overview

Congratulations on your purchase of the new digital camera. Capturing high-quality digital images is fast and easy with this state-of-the-art smart camera. Equipped with a 8.1 Mega pixels CCD, this camera is capable of capturing images with a resolution of up to 3296 x 2472 pixels.

Other cool features provided by the camera include the following:

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>LCD monitor</td>
<td>2.5&quot; LTPS TFT color LCD monitor makes it easy to frame your subject when capturing images. It also displays the images you have captured.</td>

Package Contents

Carefully unpack your kit box and ensure that you have the following items:

- Digital Camera
- A/V cable
- USB cable
- User’s manual
- Software CD-ROM
- Camera strap
- Camera pouch

Optional Accessories:

- SD memory card
- AC power adapter
- Rechargeable lithium-ion battery
- Battery charger

NOTE

- Accessories may vary by retailer.

GETTING STARTED

Attaching the Camera Strap

Attach the camera strap as shown in the illustration.
Inserting and Removing the Battery (Optional Accessory)

We highly recommend using specified rechargeable lithium-ion battery (1050mAh, 3.7V) to realize the full capability of your camera. Charge the battery fully before using the camera. Make sure that the power of the camera is off before inserting or removing the battery.

Inserting the Battery
1. Open the battery/SD card cover in the direction of the [OPEN] arrow.

![Inserting the Battery Image]

2. Insert the battery in the correct orientation shown.
   - Tilt the battery lock lever in the direction of the arrow, and then insert the battery.
3. Close the battery/SD card cover.

![Inserting the Battery Image]

Removing the Battery
Open the battery/SD card cover and then release the battery lock lever. When the battery has come out a little, slowly pull it out the rest of the way.
Charging the Battery

Using the optional AC power adapter may charge the battery or operate the camera as power supply. Make sure that the power of the camera is off and then insert the battery before starting.

1. Insert one end of the AC power adapter into the **DC IN 5V** terminal of the camera.
2. Insert the other end of the AC power adapter into a wall outlet.
   - The status LED lights red when charging is started and goes out when charging is completed.
   - It is recommended to fully discharge the battery before recharging.
   - Charging time varies according to the ambient temperature and the status of battery.

---

**NOTE**

- This camera must be used with specified AC power adapter. Damage caused by the use of an incorrect adapter is not covered under the warranty.
- Always make sure that the camera is off before removing the battery.
- The battery may feel warm after it has been charged or immediately after being used. This is normal and not a malfunction.
- When using the camera in cold conditions, keep the camera and battery warm by storing it in a warm place such as an interior pocket between shots.
- If you open the battery cover without removing the battery, the battery power will not be disconnected.
- If you remove the battery, you have to insert the battery within two hours in order to make sure that the date and time will not be reset.
Using an AC Power Adapter (Optional Accessory)

Using an AC power adapter prevents the camera from automatically powered off while transferring files to your computer.
Perform the steps in the preceding section “Charging the Battery”.

- Make sure to use only the AC power adapter specified for the digital camera. Damage caused by the use of an incorrect adapter is not covered under the warranty.

NOTE

Inserting and Removing an SD Card (Optional Accessory)

The digital camera comes with approx. 32 MB of internal memory (25.9 MB for image storage), allowing you to store captured still images or movie clips in the digital camera. However, you can also expand the memory capacity by using an optional SD card so that you can store more files.

Inserting an SD card

1. Open the battery/SD card cover.
2. Insert the SD card in the correct orientation shown.
   - Hold the SD card with its front side (printed arrow) facing the rear side of the camera, and then insert the card as far as it can go. There will be a distinct click as the card seats fully into the card slot.
3. Close the battery/SD card cover.

Removing an SD card

Open the battery/SD card cover, press lightly on the edge of the SD card and it will eject.

- To prevent valuable data from being accidentally erased from an SD card you can slide the write-protected tab (on the side of the SD card) to “LOCK”.
- However, to save, edit or erase data on an SD card, you must unlock the card.

NOTE
Turning the Power On/Off

1. Load the battery or connect the AC power adapter to your camera.
2. Press the POWER button to turn on your camera.
   - The status LED lights green and the camera is initiated.
   - When the power is turned on, the camera will start in the mode that is currently selected.
3. To turn off your camera, press the POWER button again.

![POWER button](image)

**NOTE**
- The power is turned off automatically when the camera has not been operated for a defined period time. To resume the operation condition, turn the power on again. Refer to section in this manual titled “Auto Off” in the Setup Menu (Basic tab) for further details.
Setting the Date and Time

The date/time needs to be set if/when:
- Camera is turned on for the first time.
- Camera is turned on after leaving the camera without the battery for an extended period of time.

When the date and time information is not displayed on the LCD monitor, follow these steps to set the correct date and time.

1. Slide the mode switch to [ ] and set the mode dial to [ ].
   - The setup menu is displayed.

2. Select [Custom] with the buttons.
3. Select [Date/Time] with the buttons, and press the SET button.
   - The Date/Time setting screen will be displayed.

4. Select the item’s field with the buttons and adjust the value for the date and time with the buttons.
   - The date and time is set in the order year-month-day-hour-minute.
   - The time is displayed in 24-hours format.

5. After confirming all settings are correct, press the SET button.
   - The setting will be stored and the screen will return to the setup menu.
Choosing the Display Language

Choose an On-Screen Display (OSD) language for information to be displayed on the LCD monitor.

1. Slide the mode switch to [ ] and set the mode dial to [ ].
   - The setup menu is displayed.

2. Select [Custom] with the buttons.

3. Select [Language] with the buttons, and press the SET button.
   - The available OSD languages will be displayed.

4. Select the displayed language with the buttons and press the SET button. The setting will be stored.
Formatting an SD Memory Card

Formatting an SD card will erase all of the images and folders that have been recorded on the SD card. Formatting is not possible when the SD card in the locked condition.

1. Slide the mode switch to [ ] and set the mode dial to [ ].

   - [Basic] of the setup menu is displayed.

2. Select [Format] with the ▲/▼ buttons, and press the SET button.

3. Select [Execute] with the ▲/▼ buttons, and press the SET button.

   - To cancel formatting, select [Cancel].

You need to format an SD card before using it in this camera.

Formatting an SD card erases everything from the memory card including images, videos, and also non-image data. Before formatting, make sure that all data is unnecessary.

Formatting is an irreversible action and data cannot be recovered at a later time.
Setting Image Resolution and Quality

Resolution and quality settings determine the pixel size (dimension), image file size, and compression ratio for your images. These settings affect the number of images that can be stored on a memory card. As you get to know the camera, it is recommended that you try each quality and resolution setting to get an appreciation for the effects that these settings will have on your images.

Higher resolution and higher quality images offer the best photographic results, but produce large file sizes. Therefore, few images will take up a lot of memory space.

High resolution and quality settings are recommended for printed output and situations requiring the finest detail. Lower resolution/quality images take up less memory space and may be quite suitable for sharing images via e-mail, in a report, or on a web page.

To change image resolution or image quality, perform these steps below:

1. Slide the mode switch to [P] and set the mode dial to one of the photography modes.
2. Press the [MENU] button.
   - [Capture] of the photography menu is displayed.
3. Select [Size] with the ▲/▼ buttons, and press the [SET] button.
4. Select the desired setting with the ▲/▼ buttons, and press the [SET] button.
5. Select [Quality] with the ▲/▼ buttons, and press the [SET] button.
6. Select the desired setting with the ▲/▼ buttons, and press the [SET] button.
7. To exit from the photography menu, press the [MENU] button.
**Possible number of shots (still image)**

The following table shows the approximate shots that you can capture at each setting based on an optional SD card.

<table>

- The data shows the standard testing results. The actual capacity varies according to the shooting conditions and settings.
PHOTOGRAPHY MODE

[ Auto Mode ]

Auto photography mode is perhaps the most commonly used photography mode. Images can be captured simply because the exposure (the combination of shutter speed and aperture setting) is determined automatically to suit the photographic conditions. You can use either the optical viewfinder and/or the 2.5" LCD monitor to compose your images. Capturing images using the optical viewfinder will conserve the battery power. If the battery power is low, it is recommended that you only compose images using the viewfinder. Using the LCD monitor, you can compose images more accurately, but at the cost of the battery consumption. Always use the LCD display for close-up macro shots.

Using the Optical Viewfinder
Make sure that the battery and SD card are inserted before capturing images.

1. Press the POWER button to turn on the camera.
2. Slide the mode switch to [ ] and set the mode dial to [ ].
3. Compose your image in the viewfinder.
   - Turn the “diopter adjustment dial” until the image appears clearly within the viewfinder.
4. Press the shutter button down halfway.
   • Pressing the shutter button down halfway automatically focuses and adjusts the exposure.
   • The focus-area frame turns blue and the status LED lights green when the camera is focused and exposure is determined.
   • When the focus or exposure is not suitable, the frame of the focus area turns yellow and the status LED flashes red.

5. Press the shutter button down fully to capture the image.
   • If the photographic preview is set to "On", images (the captured image) will be displayed while the image is being recorded onto the memory.
   • When the voice memo is set to “On", [VOICE RECORDING] will be displayed on the screen immediately after the image is captured and voice memo recording will start.
   • Press the shutter button one more time during recording, or wait for 30 seconds, [VOICE RECORD END] will be displayed and the recording will end. A [_voice memo] icon is displayed with images that have been recorded with a voice memo.

**Using the LCD Monitor**

Make sure that the battery and SD card are inserted before capturing images.

1. Press the **POWER** button to turn on the camera.
2. Slide the mode switch to [ ] and set the mode dial to [ ].
   • By default, the LCD monitor setting is on.
3. Compose your image in the LCD monitor.
4. Press the shutter button down halfway, then press it down fully.
Using the Optical Zoom

Zoom photography allows you to capture images magnified up to 3 times or wide-angle photography depending on the distance up to the subject. You can also enlarge the center of the screen and capture images in the digital zoom mode.

1. Slide the mode switch to [ ] and set the mode dial to one of the photography modes.
2. If required, turn on the LCD monitor by pressing the button.
3. Compose the image with the zoom button.
   - Pressing the button zooms in on the subject, and enlarges the subject on the LCD monitor.
   - Pressing the button provides a wider-angle image.
   - The lens position moves according to the zoom button setting.
4. Press the shutter button down halfway to set the focus and exposure, then press it down fully to capture the image.
Using the Digital Zoom

Using a combination of 3 times optical zoom and 4.0 times digital zoom permits zoom photography up to 12 times to suit the subject and the distance. Digital zoom is a compelling feature, however, the more an image is enlarged (zoomed), the more pixelated (grainer) the image will appear.

1. Slide the mode switch to [ ] and set the mode dial to one of the photography modes.
2. Turn on the LCD monitor by pressing the [ ] button.
3. To enable the digital zoom:
   a. Press the [MENU] button.
   c. Select [Digital Zoom] with the [S/T] buttons, and press the [SET] button.
   d. Select [ON] with the [S/T] buttons again, and press the [SET] button.
   e. Press the [MENU] button to exit from the menu screen.
   f. To activate the digital zoom, press and hold the [ ] button completely until the image on the LCD monitor expands.
4. Press the shutter button to capture a “zoomed” image.

Digital zoom cannot be activated in the [ ] mode.
The digital zoom is cancelled when the LCD monitor is turned off.
The zoom setting is automatically cancelled by either turning the camera off or the activation of the Auto Power Off function.
Setting the Flash

Set the flash for capturing images. The flash mode can be selected for the particular photographic conditions.

1. Slide the mode switch to [++]= and set the mode dial to one of the photography modes.
   - The available flash modes are dependant on the selected photography mode, scene mode, and capture mode.
2. Toggle the $\text{\textbullet}$ button to select the desired flash mode.

The available flash settings in different photography modes:

</table>

* This table is for reference only and varies according to different combination of photography modes.
* ○: Available  X: Unavailable
The table below will help you choose the appropriate flash mode:

<table>
<thead>
<tr>
<th>Flash mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>[A] Automatic</td>
<td>The flash fires automatically to suit the photographic conditions.</td>
</tr>
<tr>
<td></td>
<td>This mode is only available when the camera is set to the [A] mode.</td>
</tr>
<tr>
<td>[ esposizione ] Red-eye Reduction</td>
<td>Use this mode to reduce the red-eye phenomenon when you want to capture natural-looking images of people and animals in low-light conditions. When the camera mode is [A] and [P], the flash will fire to suit the brightness of the subject. When the camera mode is [Tv], [Av] and [M], the flash will always fire.</td>
</tr>
<tr>
<td>[pre flash] Pre-Flash</td>
<td>The “Pre-flash” mode allows you to brighten the subject prior to taken the final picture and firing the flash. In this mode, the flash always fires.</td>
</tr>
<tr>
<td>[ ] Forced Flash</td>
<td>In this mode, the flash always fires. Use this mode for photographing under artificial light such as backlighting, fluorescent lighting, etc.</td>
</tr>
<tr>
<td>[ ] Flash Off</td>
<td>Use this mode when capturing images using indoor lighting, for stages and indoor competitions, and when the subject is too far away for the flash to be effective.</td>
</tr>
</tbody>
</table>

- In [ ] portrait mode, the flash mode is fixed to [ esposizione ] Red-eye Reduction.
- In [ ] sports mode, the flash mode is fixed to [ ] Flash Off.
- The flash cannot be used in the [ ] movie mode and burst mode [Continuous] and [Auto Exp.].
Setting the Focus

Images can be captured with the focus determined automatically using auto focus. You may over-ride the auto focus and specify [Macro] or [Infinity]. The focus setting will be maintained even when the power is turned off or when Auto Power Off is activated.

1. Slide the mode switch to [ ] and set the mode dial to one of the photography modes.
2. Toggle the button to select the desired focus mode.
   - Each press of the button moves the icon one step through the sequence and displays it on the screen.

<table>
<thead>
<tr>
<th>Focus mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>[Blank] Auto Focus</td>
<td>Select auto focus for most occasions when you want the camera to automatically determine the focus setting. Using auto focus any object at a range of focus is 50 cm or greater can be in focus.</td>
</tr>
<tr>
<td>[Macro]</td>
<td>Select macro to capture close-up images. When the lens is zoomed to its widest position you may focus objects as close as 5 cm. When the lens is zoomed to its telephoto position (3x zoom) you may focus objects as close as 30 cm.</td>
</tr>
<tr>
<td>[Infinity]</td>
<td>Select the infinity-focus setting when you want to capture images of subjects at a distance of infinity.</td>
</tr>
</tbody>
</table>
Setting the Self-timer

This setting allows images to be captured with the self-timer.

1. Slide the mode switch to [ ] and set the mode dial to one of the photography modes.
2. Toggle the button to select the setting.
   - Each press of the button moves the icon one step through the sequence and displays it on the screen.
     
     OFF  \[ \theta 10s \] 10 sec. \[ \theta 2s \] 2 sec.

   - For the [ ] movie mode and burst mode ([Continuous] and [Auto Exp.]):
     
     OFF  \[ \theta 10s \] 10 sec. \[ \theta 2s \] 2 sec.

3. Compose the image, press the shutter button down halfway, then press it down fully.
   - The self-timer LED flashes and the image will be captured after the preset time has elapsed.
   - The countdown is displayed on the LCD monitor.
   - To cancel the self-timer during operation, press the SET button.

The table below will help you choose the appropriate self-timer mode:

<table>
<thead>
<tr>
<th>Self-timer mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>[ \theta 10s ] 10 sec.</td>
<td>The image is captured about 10 seconds after the shutter button is pressed.</td>
</tr>
<tr>
<td>[ \theta 2s ] 2 sec.</td>
<td>The image is captured about 2 seconds after the shutter button is pressed.</td>
</tr>
</tbody>
</table>

- The self-timer setting is automatically cancelled after an image is captured.
- Use of the \[ \theta 2s \] self-timer setting is effective in preventing motion-blur that can result when the shutter button is pressed at long exposure times. Use this mode and a tripod for best results.

NOTE
Exposure Compensation/Backlight Correction

Images can be captured with the overall scene intentionally made brighter or darker. These settings are used when a suitable brightness (exposure) cannot otherwise be obtained in circumstances where the difference in brightness between the subject and the background (the contrast) is large, or when the subject that you wish to capture is very small within the scene. Exposure can be set in 0.3 EV units.

1. Slide the mode switch to [◉] and set the mode dial to [P], [Tv], [Av] and press the SET button.
   - Each press of the SET button displays the setting in the order of [Blank], [◉] Backlight Correction, and [◉] Exposure Compensation.

2. Set the exposure value with the S/T buttons.
   - Press the S button to increase the value.
   - Press the T button to decrease the value.
   - The setting range of the exposure compensation is as follows: -2.0, -1.7, -1.3, -1.0, -0.7, -0.3, 0, +0.3, +0.7, +1.0, +1.3, +1.7, +2.0.
   - The larger the value, the brighter the image. The smaller the value, the darker the image. The set value is displayed on the screen.

Effective Subjects and Set Values

- **+ (positive) compensation**
  - Printed matter comprising black text on whitish paper
  - Backlighting
  - Bright scenes or strong reflected light such as ski slopes
  - When the sky accounts for a large area on the screen
- **- (negative) compensation**
  - People illuminated by a spotlight, in particular, against dark background
  - Printed matter comprising white text on blackish paper
  - Weak reflecting bodies such as evergreen trees or darkish leaves
- **Backlight correction (+1.3 EV, fixed)**
  - When the background is bright and the subject is dark.
  - When subjects (people) have a light source such as the sun to their backs.

**NOTE**
- The backlight correction setting can be set in the [◢], [P], [Tv], [Av], [◉], [◉] and [◉] modes.
[P] Program (Automatic Exposure) Photography Mode

The camera automatically sets the shutter speed and the aperture to suit the brightness of the subject. This allows you to capture image with ease just like when the [A] mode is selected.

1. Slide the mode switch to [ ] and set the mode dial to [P].
2. Compose the image, press the shutter button down halfway, then press it down fully.

- Exposure compensation can be set.
[Tv] Shutter Speed Priority Photography Mode

In this mode, images are captured with the priority given to shutter speed. The aperture is automatically set according to the shutter speed. If you set a fast shutter speed, you can capture images of moving subjects that look as if they are still. If you set a slow shutter speed, you can capture images that give the impression that the subject is in motion.

1. Slide the mode switch to [ ] and set the mode dial to [Tv].
2. Press the SET button.
   - After pressing the SET button in [Tv] mode, the buttons turn into buttons for adjusting shutter speed.
   - Pressing the SET button again, the buttons return to focus setting/self-timer function.
3. Set the shutter speed with the buttons.
   - Press the button to select faster shutter speeds.
   - Press the button to select slower shutter speeds.
   - The setting range of the shutter speed is as follows: 1/1500, 1/1250, 1/1000, 1/820, 1/650, 1/500, 1/400, 1/320, 1/250, 1/200, 1/160, 1/125, 1/100, 1/80, 1/64, 1/50, 1/40, 1/32, 1/25, 1/20, 1/16, 1/13, 1/10, 0.13s, 0.16s, 0.2s, 0.25s, 0.3s, 0.4s, 0.5s.
   - The shutter speed and corresponding aperture value are displayed on the screen. If an appropriate combination cannot be set, the aperture value is displayed in red, but images can be captured regardless.
4. Compose the image, press the shutter button down halfway, and then press it down fully.

NOTE
- In the flash photography mode, when [ ] and [ ] are set, the fastest shutter speed is 1/250 second.
[Av] Aperture Priority Mode

In this mode, images are captured with the priority given to aperture. The shutter speed is automatically set according to the aperture. The aperture will affect the depth-of-field of the camera.

If you set a small aperture (higher F value), you can capture portrait images with an out-of-focus background. Alternatively, if you set a large aperture (lower F value), both close objects and distant objects will be in focus, for example when capturing landscape images.

1. Slide the mode switch to [ ] and set the mode dial to [Av].
2. Press the SET button.
3. Set the aperture value with the ◀/▶ buttons.
   - Press the ▶ button to increase the value.
   - Press the ◀ button to decrease the value.
   - The setting range of the aperture value is as follows: F6.7, F5.6, F4.8, F4.0, F3.5, F2.8.
4. Compose the image, press the shutter button down halfway, and then press it down fully.

NOTE
- The aperture value varies depending on the position of the zoom lens.

In manual mode, the aperture value and the shutter speed can be varied individually.

1. Slide the mode switch to [ ] and set the mode dial to [M].
2. Press the SET button.
   - After pressing the SET button in [M] mode, the buttons turns into \( \Delta/\n \) buttons for adjusting shutter speed.
   - After pressing the SET button in [M] mode, the \( \pm/\circ \) buttons turns into \( \langle/\rangle \) buttons for adjusting aperture value.
   - Pressing the SET button again, the \( \Delta/\n/\langle/\rangle \) buttons returns to focus setting/self-timer/exposure compensation/flash setting function.
3. Set the shutter speed with the \( \Delta/\n \) buttons.
4. Set the aperture value with the \( \langle/\rangle \) buttons.
5. Compose the image, press the shutter button down halfway, and then press it down fully.

NOTE
- In the flash photography mode, when [\$] and [$\$] are set, the fastest shutter speed is 1/250 second.
Setting the Scene Mode

By simply selecting one of the following 9 modes, you can capture the image with most appropriate settings.

1. Slide the mode switch to [ ] and set the mode dial to one of the photography modes.
   a. Press the MENU button.
   b. Select [Scene Mode] with the ▲/▼ buttons, and press the SET button.
   c. Select the desired scene mode with the ▲/▼ buttons, and press the SET button.

2. Compose the image, press the shutter button down halfway, and then press it down fully.

The table below will help you choose the appropriate scene mode:

<table>
<thead>
<tr>
<th>Scene mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>[ ] Auto</td>
<td>Select this mode to capture images without having to set special functions or manual adjustments. However, this useful mode also allows you to make changes on camera settings to suit the photographic condition.</td>

Setting the Panorama Mode

This mode is designed to make it easier to take a series of shots then stitch them together with software to make a single photo. You can capture a photographic subject that won’t fit into a single frame, such as a landscape, and stitch it together later with a program such as Cool 360 or Photoshop application.

1. Slide the mode switch to [ ].
   a. Press the MENU button.
   b. Select [Scene Mode] with the ▲ / ▼ buttons, and press the SET button.
   c. Select [Panorama] with the ▲ / ▼ buttons, and press the SET button.
2. Shoot the first image.
   - The next image appears beside the previous image.
3. Orient the camera so that the second frame overlaps a small portion of the photographic subject of the first image and press the shutter button to capture the next image.
4. Follow the same steps to capture subsequent images in the sequence.
5. Finish the sequence by pressing the MENU button or switch to another mode after the last image has been recorded.
**[_movie_mode]** Movie Mode

This mode allows you to record video clips at a resolution of 320 x 240 / 640 x 480 pixels. Voice can also be recorded.

1. Slide the mode switch to [ ◕ ] and set the mode dial to [ ◕ ].
2. Compose the image with the zoom button.
3. Fully press down the shutter button.
   - The recording of the video clip will start.
   - Pressing the shutter button again will end the recording and save the video on the SD card.
   - The recording time depends on the storage size and the subject of the image to be recorded.
   - Zoom function can be used during video recording without audio.
   - You can record video clips with Audio freely, but no zoom function at this condition.

**NOTE**

- When recording video clips, the flash cannot be used.
- While the image is being recorded into the SD card, do not open the battery/SD card cover, nor remove the battery or SD card. Doing so might damage the SD card or destroy the data.
[濡] PLAYBACK MODE

Playing Back Still Images

You can play back the still images on the LCD monitor. Insert the SD card into the camera and turn on the power before starting.

1. Slide the mode switch to [濡].
   - The last image appears on the screen.
2. The images can be fed in reverse or fed forward with the ◀/▶ buttons.

Image Display Information

You can switch the state of the information display by pressing the INFO button when playing back images. Each press of the INFO button switches the information display state in the following order:

- Pressing the ▲/▼ buttons during image playback will rotate the image 90 degrees. The ▼ button rotates the image clockwise, whereas the ▲ button rotates the image counterclockwise. A press of the button opposite to the direction in which the image was rotated will return the image to the normal display.
- A [濡] icon is displayed with the video data. Video clips cannot be rotated.
- A [濡] icon is displayed with images which have an audio memo recorded.
- Press the SET button to play back voice memos.
- In zoom playback, the display is switched between normal and non-display.
Playing Back Video Clips

You can play back video clips recorded on the camera. You can also play back voice.

1. Slide the mode switch to [ ].
   - The last image appears on the screen.
2. Select the desired video clip with the \( W \)/\( X \) buttons.
   - A [ ] icon is displayed with the video data.
3. Press the SET button to play back a video clip.
   - Pressing the \( W \)/\( X \) buttons during playback initiates fast forward/fast reverse.
   - To stop video playback, press the \( V \) button.
     This stops playback and returns to the start of the video clip.
   - To pause video playback, press the SET button.
     This pauses video playback. To cancel pause, press the SET button again.

NOTE

- Video clips cannot be displayed rotated or enlarged.
Playing Back Still Images/Video Clips on a TV

You can also play back your images on a TV screen. Before connecting to any video devices, make sure to select NTSC/PAL to match the broadcast standard of the video equipment you are going to connect to the camera. It is recommended to use the AC power adapter while transferring the recorded images and video files.

1. Slide the mode switch to [片区].
2. Connect one end of the A/V cable to the A/V OUT terminal of the camera.
3. Connect the other end to the A/V input socket of the TV set.
4. Turn the TV and camera on.
5. Play back the still images/video clips.
   - The method of operation is the same as playing back still images and video clips on the camera.

![Image of camera connected to TV]

- On PAL systems, images are surrounded by a black frame.
- Refer to the section in this manual titled “Video Output” in the Setup Menu (Custom tab) for further details.
**Attaching Voice Memos**

A maximum of 30 seconds of audio can be recorded like a memo annotation for each still image. The voice memo can be recorded only once.

1. Slide the mode switch to [\(\text{\textregistered}\)].
   - The last image appears on the screen.
2. Select the image that you want to attach the voice memo with the \]\]/\]/ buttons.
3. Press the shutter button.
   - [VOICE RECORDING] is displayed on the screen and recording starts.
4. To stop recording voice memo during recording, press the shutter button again.
   - [VOICE RECORD END] will be displayed and the recording will end.
   - A \[\text{\textregistered}\] icon is displayed with images that have been recorded with a voice memo.

**Playing back voice memo**

Pressing the SET button displays [VOICE PLAYBACK] and plays back the voice memo.

![NOTE]

- Voice memo is available at the time of still single image capture mode as well as during playback.
Thumbnail Display

This function allows you to view nine thumbnail images on the LCD monitor simultaneously, so you can quickly search for the image that you want.

1. Slide the mode switch to [확대].
   - The last image appears on the screen.
2. Press the Thumbnail button.
   - The images are displayed in the thumbnail display.
   - Images that have been selected with the ▲/▼/◄/► buttons will be indicated by a green frame.
   - When there are ten or more images, scroll the screen with the ▲/▼ buttons.
3. Press the ▲/▼/◄/► buttons to select the image to be displayed at regular size.
4. Press the SET button.
   - The selected image is displayed at its regular size.

NOTE
- As appropriate, the [ ], [ ], [ ], [ ] icon will be displayed in a thumbnail display.
Zoom Playback

This mode also allows you to enlarge your image on the selected portion of the image to check for small details.

1. Slide the mode switch to [ ].
2. Press the  /  buttons to select the image you want to enlarge.
   - You can also select the image you want to enlarge from the thumbnail display.
3. Adjust the zoom ratio with the  /  buttons.
   - Pressing the  button enlarges the image.
   - To return to normal magnification, press the  button.
   - The magnification factor is displayed on the LCD monitor.
   - The image is displayed enlarged, and a white frame and green frame are displayed on the LCD monitor.
   - The white frame indicates the entire image, while the green frame shows the location of the currently enlarged area.
4. Press the  /  buttons to select the area to enlarge.
5. To return to regular display, toggle the  button until the regular display appears on the screen.

!! The range of magnification factor is from 1x to 4x in 0.5x increments.

NOTE
Slideshow Display

The slideshow function enables you to play back your still images automatically in sequential order as a slideshow. This is very useful and entertaining feature for reviewing captured images and for presentations.

1. Slide the mode switch to [ ].
2. Press the MENU button.
   - The playback menu is displayed.
3. Select [Slide Show] with the ▲/▼ buttons, and press the SET button.
4. Set the playback interval with the ▲/▼ buttons, then press the SET button.
5. To stop the slide show during playback, press the SET button.
   - The image is displayed on screen when you press the SET button.

The Auto Power Off function is disabled during a slide show.
- All still images in the folder are automatically played back.
- Video clips are displayed the first frame image, and they are not played back.
- Slideshow display is only activated when more than 2 images are stored in the SD card/internal memory.
Protecting Images

You may protect an image from accidental deletion, or erasure.

Protecting Images

1. Slide the mode switch to [Rec].
2. Select the image that you want to protect with the ◀/▶ buttons.
3. Press the MENU button.
   - The playback menu is displayed.
4. Select [Protect] with the ▲/▼ buttons, and press the SET button.
5. Select [Single] or [All] with the ▲/▼ buttons, and press the SET button.
6. Select [Set] with the ▲/▼ buttons, and press the SET button.
   - Protection is applied to the image and the camera returns to the playback mode.
   - The protect icon [🔒] is displayed with protected images. When [All] has been selected, [🔒] is displayed with all images.

Canceling Protection

To cancel protection for only one image, display the image that you want to remove the image protection.

1. Select [Protect] with the ▲/▼ buttons from the playback menu, and press the SET button.
2. Select [Single] or [All] with the ▲/▼ buttons, and press the SET button.
3. Select [Cancel Protect] with the ▲/▼ buttons, and press the SET button.
   - The image is no longer protected and the camera returns to playback mode.
Protecting multiple images
1. Select [Protect] with the ▲/▼ buttons from the playback menu, and press the SET button.
2. Select [Select] with the ▲/▼ buttons, and press the SET button.
   ■ The images are displayed in the thumbnail display.
3. Select the image you want to protect with the ▲/▼/◄/► buttons, and press the [□] button.
   ■ The protect icon [●] is displayed with protected images. Selecting a protected image and pressing the [□] button again will cancel the protection.
4. Press the SET button.
   ■ The camera returns to playback mode.

NOTE
■ Formatting an SD card overrides protection, and erases all images regardless of their protected status.
Deleting Images

Immediate Erasure (Quick Delete Function)

The quick delete function enables you to delete the last-captured image during capture.

1. Slide the mode switch to [ ] and set the mode dial to one of the photography modes.
2. Press the button.
   - The last image and quick delete menu appear on the screen.
3. Press the button again to delete the image.
   - You may also press the SET button to confirm the deletion.
   - To not delete, select [Cancel], and press the SET button.

Deleting in Playback Mode

Deleting a single image/Deleting all images

1. Slide the mode switch to [ ].
   - The last image will be displayed on the screen.
2. Select the image you want to delete with the buttons.
3. Press the button.
   - The deletion menu will be displayed.
4. Select [Single] or [All] with the buttons, and press the SET button.
   - [Single]: Deletes the selected image or the last image.
   - [All]: Deletes all of the images on the SD card except for protected images.
   - [Select]: Deletes a set of selected images.
5. Select [Execute] with the ▲/▼ buttons, and press the SET button.
   - To not delete, select [Cancel], and press the SET button.

![NOTE]

- Deleting an image will not affect sequential image numbering. For example, if you delete image number 240, the next captured image will be numbered 241 even though 240 no longer exists. In other words, an image-number is retired when an image is deleted and will not be reused or reassigned to another subsequently captured image.

**Deleting selected images**

This deletes a number of selected images.

1. Slide the mode switch to [ ].
2. Press the button.
   - The deletion menu will be displayed.
3. Select [Select] with the ▲/▼ buttons, and press the SET button.
   - The images are displayed in the thumbnail display.
4. Select the image you want to delete with the ▲/▼/◄/► buttons, and press the button.
   - The [ ] icon will be displayed. One more press of the delete button will cancel the operation. Repeat this procedure and select all the images that you want to delete.
5. Press the SET button.
DPOF Settings

DPOF (Digital Print Order Format) allows you to embed printing information on your memory card. Files saved in the DPOF format can be printed using compatible printers or through a laboratory printing device.

1. Set the mode dial to [ 

2. Select the image that you want to set DPOF with the ▲/▼ buttons.

3. Press the MENU button.
   - The playback menu is displayed.

4. Select [DPOF] with the ▲/▼ buttons, and press the SET button.
   - The DPOF setting screen is displayed.

5. Select [Single] or [All] with the ▲/▼ buttons, and press the SET button.
   - [Single]: Sets DPOF for each individual image.
   - [All]: Sets DPOF for all images at once.

6. Select [Print Num.] with the ▲/▼ buttons, and press the SET button.
   - This displays the number of prints setting screen.

7. Set the number of prints with the ▲/▼ buttons, and press the SET button.
   - You can set up to 9 prints for each image.

8. Select [Date] with the ▲/▼ buttons, and press the SET button.
   - The date and time setting screen appears.
9. Select date to [On] or [Off] with the ▲/▼ buttons, and press the SET button.
   [On]: The date of the photograph will also be printed.
   [Off]: The date of the photograph will not be printed.
10. Select [Print Enable] with the ▲/▼ buttons, and press the SET button.
11. Select [Execute] with the ▲/▼ buttons, and press the SET button.
   - This creates a file containing the DPOF information, and when the operation is finished, the screen returns to the playback screen.
   - The DPOF icon [▲] is displayed on each image that have set up DPOF settings.

![Image]

**NOTE**

- The date that is printed on the photo is the date set on the camera. To print the correct date on the photo, set the date on the camera before you capture the image. Refer to the section in this manual titled "Setting the Date and Time" for further details.
Resizing an Image (Resize)

Resizes a previously saved image. Resizing replaces the original image with the changed image. Only resizing to the smaller size is available.

The following images cannot be resized:
- Image size (640 x 480)
- Image captured with other camera
- Protected images
- Video clips
- Images cannot be resized when the SD card is write-protected

1. Select the image that you want to resize.
2. Press the **MENU** button.
3. Select [Resize] with the ▲/▼ buttons, and press the **SET** button.
4. Select the image size that you want to change with the ▲/▼ buttons, and press the **SET** button.
   - To quit resizing, press the **MENU** button.
   - When resizing ends, the screen returns to playback mode.

**NOTE**
- It is possible to reduce the size of an image. It is not possible to increase the size of an image, or to restore size after it has been decreased.
Compressing an Image (Quality Change)

Changes the quality (compression rate) of a recoded image. Compresses images down to half of their size or more, overwrites an old size images with a newly compressed image. Only quality changing to the lower quality level is available.

The following images cannot be resized:
- (Economy) quality images
- Images captured with other camera
- Protected images
- Video clips
- Images cannot be changed quality when the SD card is write-protected

1. Select the image that you want to change its quality.
2. Press the **MENU** button.
3. Select [Quality Change] with the ▲ / ▼ buttons, and press the **SET** button.
4. Select the image size that you want to change with the ▲ / ▼ buttons, and press the **SET** button.
   - To quit compression, press the **MENU** button.
   - When compression ends, the screen returns to playback mode.
MENU OPTIONS

Photography Menu (Capture tab)

This menu is for basic settings used when capturing images in the photography modes. These settings are retained even if the camera is turned off or the Auto Power Off function is activated.

1. Slide the mode switch to [ ] and set the mode dial to one of the photography modes.
2. Press the MENU button.
   - The [Capture] tab of the photography menu is displayed.
3. Select the desired [Capture] option item with the ▲/▼ buttons, and press the SET button to enter its respective menu.
4. Select the desired setting with the ▲/▼ buttons, and press the SET button.
5. To exit from the photography menu, press the MENU button.

Scene Mode

Refer to section in this manual titled “Setting the Scene Mode” for further details.

Size

This sets the resolution of the still-image that will be captured.

- 3296 x 2472
- 2560 x 1920
- 1600 x 1200
- 640 x 480
Quality
This sets the quality (compression rate) at which the image is captured.
* [ ★ ★ ★ ] Fine
* [ ★ ★ ] Standard
* [ ★ ] Economy
* [ TIFF ] TIFF

![NOTE]
- TIFF setting is only available at resolution 3296 x 2472.

Sharpness
This sets the sharpness of the image that will be photographed.
* Hard / Normal / Soft

Saturation
This sets the saturation of the image that will be captured.
* High / Normal / Low

Color
This sets the color of the image that will be photographed.
* Standard / Vivid / Sepia / Monochrome

White Balance
This sets the white balance capturing under a variety of lighting conditions and permits images to be captured that approach the conditions that are seen by the human eye.
* [ Blank ] Auto
* [ ] Incandescent
* [ ] Fluorescent 1
* [ ] Fluorescent 2
* [ ] Day Light
* [ ] Cloudy
* [ ] Manual

Manual WB
This manually sets the white balance and stores it. Use of this is convenient when the white balance does not offer a good match.
Before select [Execute] determine the subject (such as a white paper) that will be used to set the white balance.
* Cancel / Execute

ISO
This sets the sensitivity for capturing images. When the sensitivity is raised (and the ISO figure is increased), photography will become possible even in dark locations, but the more pixelated (grainier) the image will appear.
* 50 / 100 / 200 / 400 / Auto

Metering
This sets the metering method for calculating the exposure.
* [Blank] Average: Averages the light metered from the entire frame, but gives greater weight to the subject matter at the center.
* [ ] Spot: A very small portion of the center of the screen is measured, and the exposure is calculated.
Photography Menu (Function tab)

1. Slide the mode switch to [ ] and set the mode dial to one of the photography modes.
2. Press the MENU button, and select the [Function] menu with the ▶ button.
   - The [Function] tab of the photography menu is displayed.
3. Select the desired [Function] option item with the ▲/▼ buttons, and press the SET button to enter its respective menu.
4. Select the desired setting with the ▲/▼ buttons, and press the SET button.
5. To exit from the photography menu, press the MENU button.

Capture Mode
This sets the recording method at the time of capturing images.

* [Blank] Single: Capture an image at a time.
* [ ] Continuous: Permits continuous photography of 3 images max.
* [AEB] AEB: Permits 3 consecutive images in the order of standard exposure, underexposure and overexposure compensation.
* [ ] Burst + flash The “Burst+flash” capture mode lets you shoot a sequence of 3 pictures with flash.
* [ ] Burst The “Burst” capture mode allows you to fully use the available memory capacity (internal or via memory card) by pressing and holding the shutter button. As long as you hold the shutter button pressed, pictures are captured until the memory capacity is exhausted.

NOTE
- In [Continuous], [AEB], [Burst + flash] and [Burst] capture mode, the voice memo is automatically fixed at [Off].

Voice Memo
Refer to section in this manual titled "Recording Voice Memos" for further details.

* On / Off

NOTE
- When [Voice Memo] is set to [On], the preview setting is also fixed at [On].
LCD Bright.
Select a brightness level for the LCD monitor. The LCD becomes brighter with the ▲ button and darker with the ▼ button. The adjustment range is from -5 to +5.

Digital Zoom
This sets whether or not to use digital zoom at the time of photography.
* On / Off

Preview
This sets whether or not to display the captured image on the screen immediately after the image is captured.
* On / Off

NOTE
- When [Preview] is set to [Off], [Voice Memo] setting is also fixed at [Off].

Date Print
The date of recording can be printed directly on the still images. This function must be activated before the image is captured.
* On / Off

Real Time AF
This sets the Real Time Focus function at image capture preview mode.
* On / Off
**Video Menu (Capture tab)**

This menu is for the basic settings to be used when recording video clips.

1. Slide the mode switch to [  🎥 ].
2. Press the **MENU** button.
   - [Capture] menu is displayed.
3. Select the desired [Capture] option item with the ▲ / ▼ buttons, and press the **SET** button to enter its respective menu.
4. Select the desired setting with the ▲ / ▼ buttons, and press the **SET** button.
5. To exit from the menu, press the **MENU** button.

### Size
This sets the size of the image that will be photographed.

- * [ ] 640 x 480
- * [ ] 320 x 240

### Quality
This sets the quality (compression rate) at which the image is captured.

- * [ ★★★ ] Fine
- * [ ★★ ] Standard

### Color
Refer to the section in this manual titled "Photography Menu (Capture)" for further details.
**Video Menu (Function tab)**

1. Slide the mode switch to [ ].
2. Press the **MENU** button, and select the [Function] menu with the ▶ button.
   - [Function] menu is displayed.
3. Select the desired [Function] option item with the ▲ / ▼ buttons, and press the **SET** button to enter its respective menu.
4. Select the desired setting with the ▲ / ▼ buttons, and press the **SET** button.
5. To exit from the movie menu, press the **MENU** button.

**Audio**
This sets whether or not to record audio at the time of video recording.
* On / Off

**LCD Bright.**
Refer to section in this manual titled “LCD Bright.” in **Photography Menu (Function)** for further details.

**Digital Zoom**
Refer to section in this manual titled “Digital Zoom” in **Photography Menu (Function)** for further details.
### Playback Menu

In the [ ] mode, set which settings are to be used for playback.

1. Slide the mode switch to [ ].
2. Press the **MENU** button.
   - The playback menu is displayed.
3. Select the desired option item with the ▲ / ▼ buttons, and press the **SET** button to enter its respective menu.
4. Select the desired setting with the ▲ / ▼ buttons, and press the **SET** button.
5. To exit from the menu, press the **MENU** button.

#### Slide Show

Refer to section in this manual titled “Slideshow Display” for further details.

#### DPOF

Refer to section in this manual titled “DPOF Settings” for further details.

#### Protect

Refer to section in this manual titled “Protecting Images” for further details.

#### LCD Bright.

Refer to section in this manual titled “LCD Bright.” in Photography Menu (Function) for further details.

#### Resize

Refer to section in this manual titled “Resizing an Image (Resize)” for further details.

#### Quality Change

Refer to section in this manual titled “Compressing an Image (Quality Change)” for further details.

#### Copy to Card

Allows you to copy your files from the digital still camera’s internal memory to a memory card. Of course, you can only do this if you have a memory card installed and some files in internal memory.

* Cancel / Execute

---

**NOTE**

- The unavailable menu options and settings are in gray color.
Setup Menu (Basic tab)

In the setup menus you may adjust your camera’s operating environment. The settings will be retained after the power has been turned off or Auto Power Off is activated.

1. Slide the mode switch to [ ] and set the mode dial to [ ].
   - The [Basic] tab of the set-up menu is displayed.
2. Select the desired [Basic] option item with the ▲/▼ buttons, and press the SET button to enter its respective menu.
3. Select the desired setting with the ▲/▼ buttons, and press the SET button.
4. To exit from the set-up menu, change the mode dial setting.

Card Info.

This will display the total capacity of your memory card as well as the remaining (unused) capacity. Note that the stated capacity may be less than the advertised (labeled) capacity of your SD memory card. This is attributable to the difference between binary (base 2) and engineering (base 10) methods of capacity calculation.

Fr. No. Reset

This creates a new folder on your memory card. From this point forward, newly captured images are stored in the newly created folder starting with image number 0001.
* Cancel / Execute
**Format**
This function reformats the SD card loaded in your camera and thereby erases all images as well as any other non-image data on the memory card. Even protected images are. An SD card cannot be formatted if it is write-protected. Refer to the section in this manual titled “**Formatting an SD Card**” for further details.

**Beep**
Enables or disables the sounds (beeps) associated with camera button functions.
* On / Off

**Auto Off**
If no operation is performed for a specific period of time, the camera will automatically turn off. This feature is useful to reduce battery consumption.
* 1 Min. / 2 Min. / 3 Min. / Off

**USB**
This sets USB mode when connecting to your computer at any camera mode.
* PC: Refer to section in this manual titled “**TRANSFERRING RECORDED IMAGES AND VIDEOS TO YOUR COMPUTER**” for further details.
* PictBridge: You may connect the camera directly to a PictBridge compatible printer and perform image selection and printing using the camera monitor screen and controls. (optional function)
Setup Menu (Custom tab)

1. Slide the mode switch to [ ] and set
   the mode dial to [ ].
2. Select the [Custom] menu with the ►
   button.
   ■ The [Custom] tab of the set-up menu
     is displayed.
3. Select the desired [Custom] option item
   with the ▲/▼ buttons, and press the
   SET button to enter its respective menu.
4. Select the desired setting with the ▲/▼
   buttons, and press the SET button.
5. To exit from the set-up menu, change
   the mode dial setting.

Date/Time

This sets the date and the time.
Refer to the section in this manual titled “Setting the Date and Time” for further details.

Sys. Reset

This returns all basic settings to the camera’s default settings. Note that the
date and time setting will not be reset, however.
* Cancel / Execute

Language

This sets the language that is displayed on the LCD monitor.
Refer to the section in this manual titled “Choosing the OSD Language” for
further details.

Video Output

This sets video output standard of the camera so you may connect your camera
to video equipment.
* NTSC / PAL

System Info.

This displays the firmware version of the camera.
TRANSFERRING RECORDED IMAGES AND VIDEOS TO YOUR COMPUTER

To transfer images/video clips from the camera to your computer, follow these steps:

Step 1: Installing the USB driver (Windows 98 users only)
Step 2: Connecting the camera to your computer
Step 3: Downloading images and video files

System Requirements (Windows)
- Pentium 166 MHz or higher
- Windows 98/98SE/Me/2000/XP
- 128MB RAM
- 128MB hard disk space
- CD-ROM drive
- Available USB port

System Requirements (Macintosh)
- PowerPC G3/G4
- OS 9.0 or later
- 128MB RAM
- 128MB hard disk space
- CD-ROM drive
- Available USB port
Step 1: Installing the USB Driver

Windows 98 computers

The USB driver on the CD-ROM is exclusively for Windows 98 computers. Installing the USB driver on computers running Windows 2000/ME/XP is not necessary.

1. Insert the CD-ROM that came with the camera into your CD-ROM drive. The welcome screen appears.
2. Click “INSTALL USB DRIVER”. Follow the on-screen instructions to complete the installation. After the USB driver has been installed, restart your computer.

Macintosh OS 9.0 computers

For Mac OS 9.0 or higher, the computer will automatically recognize the camera and load its own USB drivers.
Step 2: Connecting the Camera to Your Computer

1. Turn on your camera.
2. Set the mode dial to [SET].
4. Select [PC] with the ▲/▼ buttons, and press the SET button.
5. Connect one end of the USB cable to the USB terminal of the camera.
6. Connect the other end of the USB cable to an available USB port on your computer.
7. From the Windows desktop, double click on “My Computer”.
8. Look for a new “Removable disk” icon. This “Removable disk” is actually the memory card in your camera. Typically, the camera will be assigned drive letter “e” or higher.
9. Double click on the removable disk and locate the DCIM folder.
10. Double click on the DCIM folder to open it to find more folders.
   - Your recorded images and video clips will be inside these folders.
   - Copy & Paste or Drag-N-Drop image and video files to a folder on your computer.

Mac users: Double-click the “untitled” or “unlabeled” disk drive icon on our desktop. iPhoto may automatically launch.

**NOTE**
- The data saved to the SD card may be damaged if the power to the camera is cut off during image transfer. We recommend that you use the AC power adapter when connecting the camera to the PC.
Step 3: Downloading Images and Video Files

When the camera is turned on and connected to your computer, it is considered to be a disk drive, just like a floppy disk or CD. You can download (transfer) images by copying them from the “Removable disk” (“untitled” or “unlabeled” disk on a Macintosh) to your computer hard drive.

**Windows**

Open the “removable disk” and subsequent folders by double clicking on them. Your images are inside these folder(s). Select the images that you want, and then choose “Copy” from the “Edit” menu. Open the destination location (folder) and choose “Paste” from the “Edit” menu. You may also drag and drop image files from the camera to a desired location.

**Macintosh**

Open the “untitled” disk icon, and the destination location on your hard disk. Drag and drop from the camera to the desired destination. Do not open the battery cover during USB cable connection.

---

**NOTE**

- Memory card users may prefer to use a memory card reader (highly recommended).
- A video playback application is not included with the package. Make sure that a video playback application has been installed in your computer.
EDITING SOFTWARE INSTALLATION

Installing Photo Explorer

Ulead® Photo Explorer provides a simple and efficient way to transfer, browse, modify and distribute digital media. Acquire photos, video or sound clips from various digital device types and easily browse or add personal descriptions; make timely modifications; or distribute the media through the medium of your choice: E-mail, Print, Slideshow Presentations. It is an indispensable all-in-one tool for owners of digital cameras, WebCams, DV camcorders, scanners, or anyone who strives to effectively organize a large collection of digital media.

To install Photo Explorer:
1. Insert the CD-ROM that came with the camera into your CD-ROM drive. The welcome screen appears.
2. Click “INSTALL PHOTO EXPLORER 8.0”. Follow the on-screen instructions to complete the installation.

NOTE
- For more information about the operation of Photo Explorer application software, refer to its respective help documentation.
- For Windows 2000/XP users, please make sure to install and use the Photo Explorer in “Administrator” mode.
- Photo Explorer is not supported on the Mac. iPhoto or iPhoto2 is recommended.

Installing Photo Express

Ulead® Photo Express is complete photo project software for digital images. The step-by-step workflow, visual program interface, and in-program help assist users in creating exciting photo projects. Acquire digital photos effortlessly from digital cameras or scanners. Organize them conveniently with the Visual Browse mode. Use hundreds of ready-to-use templates such as albums, cards, posters, slideshows, and more. Edit and enhance images with photo editing tools, photographic filters, and special effects. Embellish projects by adding creative design elements such as frames, callouts, and stamp objects. Share results with family and friends via e-mail and multiple print options.
To install Photo Express:
1. Insert the CD-ROM that came with the camera into your CD-ROM drive. The welcome screen appears.
2. Click “INSTALL PHOTO EXPRESS 5.0”. Follow the on-screen instructions to complete the installation.

(note)
- For more information about the operation of Photo Express application software, refer to its respective help documentation.
- For Windows 2000/XP users, please make sure to install and use the Photo Express in “Administrator” mode.
- Photo Express is not supported on the Mac.

Installing Cool 360

Ulead® COOL 360™ quickly and easily allows photo editing consumers to transform a series of photos into 360° or wide-angle panoramic scenes for an immersive viewing experience. COOL 360’s intuitive interface and easy-to-use wizard deliver great-looking panoramas fast while advanced warping, blending and alignment tools ensure excellent results. Share finished panoramas via email, create Web pages or insert them into documents and presentations.

To install Cool 360:
1. Insert the CD-ROM that came with the camera into your CD-ROM drive. The welcome screen appears.
2. Click “INSTALL Cool 360 SE”.
   Follow the on-screen instructions to complete the installation.

(note)
- For more information about the operation of Cool 360 application software, refer to its respective help documentation.
- For Windows 2000/XP users, please make sure to install and use the Cool 360 in “Administrator” mode.
- Cool 360 is not supported on the Mac.

# TROUBLESHOOTING

Refer to the symptoms and measures listed below before sending the camera for repairs. If the problem persists, contact your local reseller or service center.

## Power Supply

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>The power does not come on.</td>
<td>The battery is not loaded.</td>
<td>Load the battery correctly.</td>
</tr>
<tr>
<td></td>
<td>The battery is exhausted.</td>
<td>Recharge or use the AC power adapter.</td>
</tr>
<tr>
<td></td>
<td>The AC power adaptor is not connected correctly</td>
<td>Reconnect it properly.</td>
</tr>
<tr>
<td>The power cuts out during use.</td>
<td>The camera was left unattended and unused, so the auto power off cuts it off.</td>
<td>Turn the power back on.</td>
</tr>
<tr>
<td></td>
<td>The battery is exhausted.</td>
<td>Recharge or use the AC power adapter.</td>
</tr>
<tr>
<td>The power does not go off.</td>
<td>Camera malfunction.</td>
<td>Reload the battery. If using the AC power adapter, reconnect it.</td>
</tr>
<tr>
<td>The battery runs out quickly.</td>
<td>It is being used in extreme low temperature.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Many shots are being captured in dark places inside, requiring flash.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The battery is not fully charged.</td>
<td>Fully charge the battery and discharge it for at least one complete cycle before use to maximize its performance and lifetime.</td>
</tr>
<tr>
<td>The battery or camera feels warm.</td>
<td>Long period of continuous use of the camera or the flash.</td>
<td></td>
</tr>
</tbody>
</table>
### Shooting

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause</th>
<th>Measure</th>
</tr>

<tbody>
<tr>
<td>Even if I press the shutter button, the camera does not shoot.</td>
<td>The battery is running low.</td>
<td>Recharge or use the AC power adapter.</td>
</tr>
<tr>
<td></td>
<td>The power is not on.</td>
<td>Turn the power on.</td>
</tr>
<tr>
<td></td>
<td>The camera is not in shooting mode.</td>
<td>Slide the mode switch to shooting mode.</td>
</tr>
<tr>
<td></td>
<td>The shutter button is not pressed all the way.</td>
<td>Press the shutter button all the way.</td>
</tr>
<tr>
<td></td>
<td>The memory card does not have any free space.</td>
<td>Load a new card, or delete unwanted files.</td>
</tr>
<tr>
<td></td>
<td>End of memory card life.</td>
<td>Load a new memory card.</td>
</tr>
<tr>
<td></td>
<td>The flash is recharging.</td>
<td>Wait until the status LED off.</td>
</tr>
<tr>
<td></td>
<td>The memory card is unrecognized by the camera.</td>
<td>Format the memory card in this camera before its first use or when it was used other than this camera.</td>
</tr>
<tr>
<td></td>
<td>The auto power off function is activated.</td>
<td>Turn the power on again.</td>
</tr>
<tr>
<td>Images do not appear on the LCD monitor.</td>
<td>The power is not on.</td>
<td>Adjust the brightness of the LCD monitor in the photography or playback menu.</td>
</tr>
<tr>
<td></td>
<td>The LCD monitor is dark.</td>
<td>Press the [OK] button and switch display.</td>
</tr>
<tr>
<td></td>
<td>The LCD monitor is not on.</td>
<td>Wipe clean with a soft, dry cloth or lens paper.</td>
</tr>
<tr>
<td>Although it is set to Auto Focus, it does not focus.</td>
<td>The lens or Self-timer LED is dirty.</td>
<td>Get your subject within the effective focus range.</td>
</tr>
<tr>
<td></td>
<td>The distance to the subject is smaller than the effective range.</td>
<td>Get your subject within the effective focus range.</td>
</tr>
</tbody>
</table>
## Digital Camera

### Symptom

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>The flash does not fire.</td>
<td>The flash is set to flash off.</td>
<td>Slide the mode switch to playback mode.</td>
</tr>
<tr>
<td>The flash cannot recharge.</td>
<td>/AEB/ mode.</td>
<td>Switch the camera mode to someone other than one of those.</td>
</tr>
<tr>
<td>Even though the flash fired, the image is dark.</td>
<td>The distance to the subject is greater than flash effective range.</td>
<td>Set the flash to something other than flash off mode.</td>
</tr>
<tr>
<td>The image is too dark.</td>
<td>The image was captured in a dark place while set to flash off.</td>
<td>Get closer to your subject and shoot.</td>
</tr>
<tr>
<td>The image is too bright.</td>
<td>It is under-exposed.</td>
<td>Set the flash to something other than flash off mode.</td>
</tr>
<tr>
<td>The image lacks natural color.</td>
<td>The image was captured in conditions that are hard for Auto White Balance to adjust to.</td>
<td>Add a white object to the composition.</td>
</tr>
</tbody>
</table>

### Playback

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot playback.</td>
<td>It is not set to playback mode.</td>
<td>Slide the mode switch to playback mode.</td>
</tr>
<tr>
<td>The contents of memory card cannot be replayed.</td>
<td>You played back a memory card that was not formatted by this device.</td>
<td>Loaded a card that was formatted and stored on by this device.</td>
</tr>
<tr>
<td>Files cannot be deleted.</td>
<td>The file is protected.</td>
<td>Cancel protection.</td>
</tr>
<tr>
<td>Cannot format a memory card.</td>
<td>You played back a memory card that was not formatted by this device.</td>
<td>Loaded a card that was formatted and stored on by this device.</td>
</tr>
<tr>
<td>The playback image is dark though I used the flash.</td>
<td>The LCD monitor is too dark.</td>
<td>Adjust the brightness of LCD monitor.</td>
</tr>
</tbody>
</table>
## Other Problems

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot load the memory card.</td>
<td>The card is facing the wrong way.</td>
<td>Load correctly.</td>
</tr>
<tr>
<td>Even when the camera’s buttons are pressed, it does not operate.</td>
<td>The battery is running low.</td>
<td>Recharge or use the AC power adapter.</td>
</tr>
<tr>
<td>The date and time is wrong.</td>
<td>The correct date and time is not set.</td>
<td>Set the correct date and time.</td>
</tr>
<tr>
<td>The date set has disappeared.</td>
<td>The battery is removed with the power still on.</td>
<td>Set the date and time again.</td>
</tr>
</tbody>
</table>

## About connecting to your computer/software

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot download images.</td>
<td>The free space on the hard disk in your computer may be insufficient.</td>
<td>Check whether the hard disk has a space for running Windows, and if the drive for loading image files has a capacity at least that of the memory card inserted in the camera.</td>
</tr>
<tr>
<td></td>
<td>No power supply.</td>
<td>Recharge the battery or use the AC power adapter or turn the power on.</td>
</tr>
<tr>
<td></td>
<td>The USB driver is not installed (for Windows 98/98SE).</td>
<td>Install USB driver.</td>
</tr>
</tbody>
</table>
A. Information on Disposal for Users (private households)

1. In the European Union

Attention: If you want to dispose of this equipment, please do not use the ordinary dust bin!

Used electrical and electronic equipment must be treated separately and in accordance with legislation that requires proper treatment, recovery and recycling of used electrical and electronic equipment.

Following the implementation by member states, private households within the EU states may return their used electrical and electronic equipment to designated collection facilities free of charge*. In some countries* your local dealer may also take back your old product free of charge if you purchase a similar new one.

*) Please contact your local authority for further details.

If your used electrical or electronic equipment has batteries or accumulators, please dispose of these separately beforehand according to local requirements.

By disposing of this product correctly you will help ensure that the waste undergoes the necessary treatment, recovery and recycling and thus prevent potential negative effects on the environment and human health which could otherwise arise due to inappropriate waste handling.

2. In other Countries outside the EU

If you wish to discard this product, please contact your local authorities and ask for the correct method of disposal.

For Switzerland: Used electrical or electronic equipment can be returned free of charge to the dealer, even if you don’t purchase a new product. Further collection facilities are listed on the homepage of www.swico.ch or www.sens.ch.

B. Information on Disposal for Business Users

1. In the European Union

If the product is used for business purposes and you want to discard it:

Please contact your local dealer who will inform you about the take-back of the product. You might be charged for the costs arising from take-back and recycling. Small products (and small amounts) might be taken back by your local collection facilities.

For Spain: Please contact the established collection system or your local authority for take-back of your used products.

2. In other Countries outside the EU

If you wish to discard of this product, please contact your local authorities and ask for the correct method of disposal.
