Three Ways to Adjust Settings

Using the Menu

1. Set the mode dial to one of the selections.
2. Press the MENU button. 
   - This example describes how to use the menu to set the [DIGITAL ZOOM].
3. Use 
   - Pressing and holding the button (down) (menu guide) of the selected option.
4. Press the MENU button to complete the setting.

Using the Direct Buttons

- Frequently used shooting functions can be accessed using the direct buttons.

Using the FUNC Menu (p. 22)

- Frequently used shooting menu functions can be set with fewer steps using the FUNC menu.

Please read “Menu Settings” (p. 25 to 42) while referring to this page.

Three Ways to Adjust Settings

Using the Menu

Various camera settings can be accessed through the menu, including functions used during shooting and playback and the operations and menus.

1. Set the mode dial to one of the selections.

2. Press the MENU button.

3. Use \( \rightarrow \), \( \uparrow \), \( \downarrow \), \( \leftarrow \) to select the desired menu, and press the \( \triangleright \) button.

4. Use \( \rightarrow \) to select the desired submenu 1, and press the \( \triangleright \) button.

5. Use \( \rightarrow \) to select the submenu 2, and press the \( \triangleright \) button.

6. Press the MENU button to complete the setting.

Using the Direct Buttons

Frequently used shooting functions can be accessed using the direct buttons.

Using the FUNC Menu (p. 22)

Frequently used shooting menu functions can be set with fewer steps using the FUNC menu.

Movie
Preparing the Camera

**Attaching the camera strap**

Pull the strap tight so that it does not come loose.

**Charging the battery**

The included battery charger (AC cable type or plug-in type) differs depending on the region where you purchased the camera. If you received a plug-in type battery charger, plug it directly into an AC outlet.

**Example: AC cable type battery charger**

- Batteries come partially charged. Before use, be sure to charge the battery until the charging indicator light turns off (for approx. 2 hours).
- If the charging indicator does not light or it blinks, the battery may not be inserted correctly or the battery or the charger may be broken.
- For details on the battery and the charger, see “Battery and charger” (p. 55).

**When to charge the battery**

Charge the battery when the following error message appears:
**Loading the battery and the xD-Picture Card™ (sold separately) into the camera**

Do not insert anything other than an xD-Picture Card or the microSD Attachment into the camera.

1. **Battery/card compartment cover**
   - Insert the battery straight in until it clicks into place.
   - Do not touch the contact area directly with your hand.

2. **Battery lock knob**
   - The battery has a front side and a back side. Insert the battery from ▼ so that the ◄ is in the direction of the battery lock knob.
   - Insert the battery while sliding the battery lock knob in the direction of the arrow.
   - Sliding the battery lock knob in the direction of the arrow to unlock, and then remove the battery.
   - If you insert the battery incorrectly, you will not be able to remove it. Do not use force. Contact authorized distributors/service centers.
   - Damage to the battery exterior (scratches, etc.) may produce heat or an explosion.
   - Turn off the camera before opening or closing the battery/card compartment cover.

3. **Notch**
   - Insert the card straight in until it clicks into place.
   - Do not touch the contact area directly with your hand.

4. **This camera can take pictures using the internal memory when no xD-Picture Card (sold separately) is inserted. “Using an xD-Picture Card” (p. 56)**
   - “Number of storable pictures (still pictures)/continuous recording length (movies) in the internal memory and xD-Picture Card” (p. 57)

**To remove the xD-Picture Card**

1. **Press in the card until it clicks and comes out slightly. Then grasp the card and pull it out.**
Using the microSD card/microSDHC card (sold separately)

A microSD card or microSDHC card (hereafter both will be referred to as microSD card) is also compatible with this camera using the microSD Attachment.

"Using a microSD Attachment" (p. 58)

1 Insert the microSD card into the microSD Attachment.

2 Insert the microSD Attachment into the camera.

To remove the microSD card

Pull the card straight out.

Arrow pad and operation guide

The symbols △, □, ○, ■ displayed on various settings and movie playback screens indicate that the arrow pad is to be used.

Operation guides displayed at the bottom of the screen indicate that the MENU button, ■ button, zoom button, or ◄ button is to be used.
Changing the display language

The language of the menu and error messages displayed on the monitor is selectable.

1 Press the MENU button, and press \( \text{to select} \) (SETUP).

2 Press the \( \) button.

3 Use \( \) to select \( \) and press the \( \) button.

4 Use \( \) to select your language and press the \( \) button.

5 Press the MENU button.

Setting the date and time

The date and time set here are used to image file names, date prints, and other data.

1 Press the ON/OFF button to turn on the camera.

- The date and time setting screen is displayed when the date and time are not set.

2 Use \( \) to select the year for \( Y \).

3 Press \( \) to save the setting for \( Y \).

4 As in Steps 2 and 3, use \( \) and the \( \) button to set \( M \) (month), \( D \) (day), \( TIME \) (hours and minutes) and \( Y/M/D \).

- For precise time setting, press the \( \) button as the time signal strikes 00 seconds.

- To change the date and time, adjust the setting from the menu. \( \) (Date/time) (p. 40)

To check the date and time

Press the DISP. button while the camera is turned off. The current time is displayed for approx. 3 seconds.
Shooting, Playback, and Erasing

Shooting with optimum aperture value and shutter speed (P mode)

In this mode, automatic camera shooting can be used while also allowing changes to a wide range of other shooting menu functions, such as exposure compensation, white balance and so on as needed.

1 Set the mode dial to P.

2 Press the ON/OFF button to turn on the camera.

3 Hold the camera, and compose the shot.

   Monitor

   Horizontal grip

   Vertical grip

   Number of storable still pictures (p. 57)

   Press the ON/OFF button again to turn off the camera.

4 Press the shutter button halfway down to focus on the subject.

   Shutter speed

   Aperture value

   AF target mark

   * “Focusing” (p. 52)
To take the picture, gently press the shutter button all the way down while being careful not to shake the camera.

Viewing images

1. Set the mode dial to ▲.

2. Use ◀ and ▶ to select an image.

   - Displays 10 frames before the current image
   - Displays previous image
   - Displays next image
   - Displays 10 frames after the current image

The display size of the images can be changed. “Index view, calendar view, and close-up view” (p. 23)

To shoot movies

“Shooting movies (▲ mode)” (p. 18)

To view images during shooting

Pressing the ▼ button enables playback of images. To return to shooting, either press the ▼ button again or press the shutter button halfway down.

To play back movies

Select a movie, and press the ▼ button.
Operations during movie playback

**Volume:** During playback, press \( \text{LM} \).

**Fast-forward/rewind:** Select with \( \text{NO} \). Each time a button is pressed, the playback speed cycles through \( 2\times, 20\times, \) and standard (1×) speed in the direction of the pressed button.

**Pause:** Press the \( \text{E} \) button.

Erasing images during playback

*(Single image erase)*

1. Press the \( \text{H} \) button when the playback image to be erased is displayed.

2. Press \( \uparrow \) to select [YES], and press the \( \text{E} \) button.

First (last) frame/frame advance:

While paused, press \( \uparrow \) to display the first frame, and press \( \downarrow \) to display the last frame. Pressing \( \text{NO} \) makes the camera play back in a reverse motion, and pressing \( \text{OR} \) makes the camera play back normally. Press the \( \text{E} \) button to resume playback.

To stop movie playback

Press the **MENU** button.
Using Shooting Modes

Shooting with automatic settings (iAUTO mode)

The camera automatically selects the best shooting mode for the scene from [PORTRAIT], [LANDSCAPE], [NIGHT+PORTRAIT], [SPORT] and [MACRO]. This is a fully automatic mode that allows you to take a picture suited to the scene by simply pressing the shutter button. Camera menu settings are not available in iAUTO mode.

1 Set the mode dial to iAUTO.

The indicator changes to the icon for the scene mode selected by the camera.

- Press the shutter button halfway down or press the DISP. button to check which shooting mode the camera has automatically selected.
- Depending on the shooting scene, the camera may not select the intended shooting mode.
- If the camera cannot determine the best shooting mode, the picture will be taken in mode.

Using the best shooting mode for the scene (SCN mode)

1 Set the mode dial to SCN.

- Press and hold the button to display a description of the selected mode.

2 Use 

To select the best shooting mode for the scene, and press the button.

Shooting mode indicator

- To change to another scene mode, use the menu. [SCENE MODE] (p. 28)
**Smoothing out skin tone and texture (BEAUTY mode)**

The camera finds a person's face and gives the skin a smooth, translucent look for taking the picture.

1. **Set the mode dial to BEAUTY.**

   ![BEAUTY mode indicator]

2. **Point the camera toward the subject. Check the frame appearing around the face detected by the camera, and then press the shutter button to take the picture.**
   - The unedited image and edited image are both saved.
   - If the image cannot be retouched, only the unedited image is saved.
   - The frame may not appear or may take some time to appear for some subjects. In addition, this function may have no visible effect on some subjects.
   - The [IMAGE SIZE] of the retouched image is limited to [2M] or lower.

3. **Gently press the shutter button all the way down to stop recording.**

---

**Shooting movies ( /[ mode) **

Audio is recorded simultaneously.

1. **Set the mode dial to /[ .**

   ![ mode indicator]

   ![Using the zoom]
   - You cannot use the optical zoom while shooting a movie. Please use the [DIGITAL ZOOM] (p. 27)

2. **Press the shutter button halfway down to focus on the subject, and gently press the button all the way down to start recording.**

   - Press halfway
   - Press fully

3. **Gently press the shutter button all the way down to stop recording.**

   - Lights red during shooting
   - Remaining recording time (p. 57)
Using Shooting Functions

**Using the optical zoom**
Pressing the zoom button adjusts the shooting range.

</tr>
</tbody>
</table>

Self-timer shooting is automatically canceled after one shot.

To cancel the self-timer after it starts
Press the button again.

Changing the shooting information display

The display of shooting information on the monitor can be changed to best match the situation; for example, the information can be removed if there is a need for a clear view of the subject or a grid can be displayed to assist with precise composition.

1 Press the DISP. button.

- The displayed shooting information changes in the order shown below each time the button is pressed.

“Shooting mode display” (p. 8)

Normal

Histogram

No information

Grid

Reading a histogram

If the peak fills too much of the frame, the image will appear mostly white.

If the peak fills too much of the frame, the image will appear mostly black.

The green section shows luminance distribution within the screen’s center.
**Using the FUNC menu**

The FUNC menu provides the following menu functions that can be quickly accessed, adjusted and set.

- [WB] (p. 26)
- [ISO] (p. 26)
- [DRIVE] (p. 26)
- [ESP/□] (p. 27)
- [IMAGE QUALITY] (p. 25)

1. Press the button while ready to take a picture.

2. Use  to select the menu function and  to select the setting option, and then press the button to set.

**Quickly calling and using shooting functions**

The following menu functions can be quickly called and used.

- [PANORAMA] (p. 29)
- [SHADOW ADJ] (p. 28)
- [MULTI WINDOW] (p. 22)

1. Press the OR button.

2. Use  to select the menu function, and press the button to set.

To use the effects preview screen (Multi window)

Selecting an option from [ZOOM], [EXPOSURE COMP.], [WB] or [ESP/□] shows 4 preview images that reflect the adjusted values of the selected shooting function. Use  to select the desired image, and press the button.

**Brightening the monitor (Backlight boost)**

Pressing and holding the OR button brightens the monitor. The monitor returns to the original brightness if no operation is performed for 10 seconds.
Using Playback Features

Index view, calendar view, and close-up view

Index view and calendar view enable quick selection of a target image. Close-up view (up to 10x magnification) allows checking of image details.

1 Press the zoom button.

Changing the image information display

A set of shooting information displayed on the screen can be changed.

1 Press the DISP. button.
- The displayed image information changes in the order shown below each time the button is pressed.

To select an image in index view
Use \( \text{pi} \) to select an image, and press the \( \text{button} \) to display the selected image in single-image view.

To select images in calendar view
Use \( \text{pi} \) to select a date, and press the \( \text{button} \) to view the images taken on the selected date.

To scroll an image in close-up view
Use \( \text{pi} \) to move the viewing area.

---

Histogram

"Reading a histogram" (p. 21)
Playing back panorama images

Panorama images that were combined together using [COMBINE IN CAMERA 1] or [COMBINE IN CAMERA 2] can be scrolled for viewing.

1 Select a panorama image during playback.

2 Press the \ button.

To control panorama image playback

Zoom in/Zoom out: Press the zoom button.
Playback direction: Press \ to scroll in the direction of the pressed button.
Pause: Press the \ button.
Restart scrolling: Press the \ button.
Stop playback: Press the MENU button.
Menus for Shooting Functions

When the mode dial is set to a shooting mode (AUTO SCN BEAUTY), settings can be adjusted.

The icon next to indicates the position to adjust the mode dial to when setting functions.

The default settings of the function are highlighted in .

**Selecting the ISO sensitivity [ISO]**

CAMERA MENU ▶ ISO

Although lower ISO values reduce sensitivity, sharp images can be taken under fully lit conditions. Larger values increase sensitivity so that images can be taken at fast shutter speeds even under dimly lit conditions. However, high sensitivity introduces electronic noise into the resulting picture, which may give it a grainy appearance.

<table>

Reducing the blur caused by the camera shake when shooting
[IMAGE STABILIZER] (still images) / [DIS MOVIE MODE] (movies)

When set to [ON], [ESP] (p. 27) is automatically fixed to [ESP], and [AF MODE]
(p. 27) is automatically fixed to [FACE DETECT].

Selecting a scene mode according to the shooting situation

In SCN mode, the optimum shooting settings are pre-programmed for specific shooting
scenes. For this reason, settings may not be changed in some modes.

The camera takes a picture using the optimum settings for the scene conditions.

Selecting a scene mode according to the shooting situation

Using the best shooting mode for the scene
(SCN mode) (p. 17)

Detecting a smiling face to release the shutter automatically

“Using the best shooting mode for the scene
(SCN mode)” (p. 17)

Detecting a smiling face to release the shutter automatically

When the subject is dark, noise reduction is automatically activated. This approximately doubles the
shooting time, during which no other pictures can be taken.

The focus is locked at the first frame.

Shooting with a selected scene

When shooting while the [DIS MOVIE MODE]
(movie) is set to [ON], the image will be
enlarged somewhat before saving.

Shooting with a selected scene

Detecting a smiling face to release the shutter automatically

1 Select ([]) SMILE SHOT, and aim the
camera toward the subject.

● The self-timer lamp turns on. When a smiling
face is detected, the camera automatically takes
sequential shots.

● Pictures can also be taken manually by
pressing the shutter button.

● The camera may not be able to detect a
smiling face for some subjects.

[IMAGE SIZE] is limited to [M] or lower.

Brightening the subject against backlight

When set to [ON], [ESP] (p. 27) is
automatically fixed to [ESP], and [AF MODE]
(p. 27) is automatically fixed to [FACE
DETECT].

Selecting a scene mode according to the shooting situation

[SCENE MODE]

In SCN mode, the optimum shooting settings are pre-programmed for specific shooting
scenes. For this reason, settings may not be changed in some modes.

The camera takes a picture using the optimum settings for the scene conditions.

When the subject is dark, noise reduction is automatically activated. This approximately doubles the
shooting time, during which no other pictures can be taken.

The focus is locked at the first frame.

Shooting with a selected scene

“Using the best shooting mode for the scene
(SCN mode)” (p. 17)

Detecting a smiling face to release the shutter automatically

1 Select ([]) SMILE SHOT, and aim the
camera toward the subject.

● The self-timer lamp turns on. When a smiling
face is detected, the camera automatically takes
sequential shots.

● Pictures can also be taken manually by
pressing the shutter button.

● The camera may not be able to detect a
smiling face for some subjects.

[IMAGE SIZE] is limited to [M] or lower.
Capturing the perfect moment when shooting ([PRE-CAPTURE MOVIE] mode)

1. Use \(\triangle\) to select [PRE-CAPTURE MOVIE], and press the \(\triangleright\) button to set.
   - This function is ready for shooting immediately after setting this option.
2. Press the shutter button to start movie shooting.
   - After shooting stops, the camera saves a 7-second movie, including up to 2 seconds of recording time taken before the shutter button was pressed, to the memory card.
   - The optical zoom and auto focus function are available during movie recording.

- Sound is not recorded.
- The AF target mark is not displayed.
- Select [IMAGE SIZE] from [VGA] or [QVGA], and select [FRAME RATE] from [30fps] or [15fps].

Creating panoramic images

[\(\equiv\) PANORAMA]

### Submenu 2

<table>
<thead>
<tr>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Three frames are taken and combined by the camera. The user only composes the shots so that the target marks and pointers overlap, and the camera automatically releases the shutter. The shooting functions are already preset to the optimum settings for panoramic shooting.</td>
</tr>
<tr>
<td>Three frames are taken and combined by the camera. The user composes the shots using the guide frame and manually releases the shutter.</td>
</tr>
<tr>
<td>The frames that were taken are combined into a panorama image using the OLYMPUS Master 2 software from the provided CD-ROM. Pictures are taken in the last [ISO] or [SCENE MODE] settings. (Excluding certain scene modes.)</td>
</tr>
</tbody>
</table>

\(^1\) Not available in **SCN** mode (p. 17).

- The [IMAGE QUALITY] (p. 25) setting cannot be changed.
- The focus, exposure (p. 20), zoom position (p. 19), and [WB] (p. 26) are locked at the first frame.
- The flash (p. 19) is fixed to \(\triangleright\) (FLASH OFF) mode.
- “Playing back panorama images” (p. 24)
Taking pictures with [COMBINE IN CAMERA 1]

1. Press the shutter button to take the first frame.
2. Move the camera slightly in the direction of the second frame.
3. Move the camera slowly while keeping it straight, and stop the camera where the pointer and target mark overlap.
   - The camera releases the shutter automatically.

   ! To combine only two pictures, press the button before taking a third frame.

4. Repeat Step 3 to take a third frame.
   - After the third frame is taken, the camera automatically processes the frames and the combined panorama image is displayed.

5. To exit the panorama function without saving an image, press the button.

6. If the shutter does not automatically release, try [COMBINE IN CAMERA 2] or [COMBINE IN PC].

Taking pictures with [COMBINE IN CAMERA 2]

1. Use [6] to specify at which edge the next picture is to be connected.

2. Press the shutter button to take the first frame.
   - A guide frame appears as a reference.

3. Compose the next shot so that the joint area overlaps the guide frame.

4. Press the shutter button to take the next shot.
   - To combine only two pictures, press the button before taking the third frame.

5. Repeat steps 3 and 4 to take a third frame.
   - After the third frame is taken, the camera automatically processes the frames and the combined panorama image is displayed.

6. To exit the panorama function without saving an image, press the button.
Taking pictures with [COMBINE IN PC]

1. Use \( \text{ } \rightarrow \leftarrow \text{ } \) to select the direction that the frames are combined.
2. Press the shutter button to take the first frame, and then compose the second shot.
   - Compose the shot using the guide frame so that the two adjacent frames overlap.
3. Repeat Step 2 until the number of required frames are taken, and then press the \( \text{ } \) button when done.

When the \( \text{ } \) mark is displayed, you cannot continue shooting any further. Panorama shooting is possible for up to 10 frames.

Refer to the OLYMPUS Master 2 help guide for details on how to make panorama images.

Automatic numbering

- **Month**: 1 to C (A=October, B=November, C=December)
- **Day**: 01 to 31

**Automatic numbering**

**Adjusting the CCD and adjusting the image processing function**

**[PIXEL MAPPING]**

* SETUP ➤ PIXEL MAPPING

- This function has already been adjusted at factory shipping, and no adjustment is needed right after purchase. Approximately once a year is recommended.
- For best results, wait at least one minute after taking or viewing pictures before performing pixel mapping. If the camera is turned off during pixel mapping, be sure to perform it again.

**To adjust the CCD and the image processing function**

Press the button when [START] (submenu 2) is displayed.

- The camera checks and adjusts the CCD and the image processing function at the same time.

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Application</th>

<td><strong>RESET</strong></td>
<td>This resets the sequential number for the folder name and file name whenever a new card is inserted. This is useful when grouping images on separate cards.</td>
</tr>
</tbody>
</table>

**AUTO**

- Even when a new card is inserted, this continues the numbering for the folder name and file name from the previous card. This is useful for managing all image folder names and file names with sequential numbers.

**Notes**

* The number for the folder name is reset to 100, and the one for the file name is reset to 0001.

---

* The image above illustrates the folder and file naming system with examples of folder and file names.
Adjusting the brightness of the monitor

To adjust the monitor brightness

1. Use \( \text{LM} \) to adjust the brightness while viewing the screen, and then press the \( \text{E} \) button.

Setting the date and time

To select the date and time display order

1. Press \( \text{E} \) after setting Minute, and use \( \text{LM} \) to select the date display order.

Setting the date and time for another time zone [DUALTIME]

When [DUALTIME] is set to [ON], the date and time set here are used in image file names, dated prints and other data.

<table>
<thead>
<tr>

Selecting the video signal system to match your TV [VIDEO OUT]

The TV video signal system varies depending on the countries and regions. Before viewing camera images on your TV, select the video output according to your TV’s video signal type.

Submenu 2 | Application
---|---
NTSC | The camera is compatible with TVs in North America, Taiwan, Korea, Japan and others.
PAL | The camera is compatible with TVs in Europe, China and others.

The factory default settings differ according to the region where the camera is sold.

To play back camera images on a TV

1. Connect the TV and camera.
   - Connection via AV cable
     - Connect the TV video input jack (yellow) and audio input jack (white).
     - Open the connector cover in the direction of the arrow.
     - Multi-connector
     - A/V cable (supplied)

2. Use the camera to select the video signal format that matches that of the connected TV ([NTSC]/[PAL]).
3. Turn on the TV, and change “INPUT” to “VIDEO (an input jack connected to the camera).”

For details on changing the input source of the TV, refer to the TV’s instruction manual.

- Set the mode dial to when connecting via an AV cable.
- Use an HDMI cable that matches the HDMI mini connector on the camera and the HDMI connector on the TV.
- The movie playback screen cannot be displayed when connecting via an HDMI cable. In addition, the sound will not be played.
- When the camera and TV are connected by both an AV cable and an HDMI cable, the HDMI cable will take priority.
- Depending on the TV’s settings, the displayed images and information may become cropped.
### Selecting the digital video signal format for connecting to a TV via an HDMI cable [HDMI]

> SETUP [HDMI]

“To play back images on a TV” (p. 41)

⚠️ [SOUND SETTINGS] (p. 38)
Direct printing (PictBridge*)

By connecting the camera to a PictBridge-compatible printer, you can print images directly without using a computer.

To find out if your printer supports PictBridge, refer to the printer’s instruction manual.

* PictBridge is a standard for connecting digital cameras and printers of different makers and printing out pictures directly.

The printing modes, paper sizes, and other parameters that can be set with the camera vary depending on the printer that is used. For details, refer to the printer’s instruction manual.

For details on the available paper types, loading paper, and installing ink cassettes, refer to the printer’s instruction manual.

Printing images at the printer’s standard settings [EASY PRINT]

1. Display the image to be printed on the monitor.
   * "Viewing images" (p. 15)
   * Printing can also be started when the camera is turned off. After performing Step 2, use < or > to select [EASY PRINT], press the E button. Use < or > to select an image, and press the E button.

2. Turn on the printer, and then connect the printer and camera.

Open the connector cover in the direction of the arrow.

3. Press E to start printing.

4. To print another image, use < or > to select an image, and press the E button.

To exit printing

After a selected image is displayed on the screen, disconnect the USB cable from the camera and printer.
Changing the printer’s settings for printing [CUSTOM PRINT]

1. Follow Steps 1 and 2 for [EASY PRINT] (p. 43), and press the button.

2. Use ⇧ to select [CUSTOM PRINT], and press the button.

3. Use ⇧ to select the print mode, and press the button.

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>PRINT</td>
<td>This prints the image selected in Step 6.</td>

<td>This prints an index of all images stored in the internal memory or card.</td>
</tr>
<tr>
<td>PRINT ORDER*1</td>
<td>This prints images based on the print reservation data on the card.</td>
</tr>
</tbody>
</table>

*1 [PRINT ORDER] is available only when print reservations have been made. "Print Reservations (DPOF)" (p. 46)

4. Use ⇧ to select [SIZE] (Submenu 3), and press .
   - If the [PRINTPAPER] screen is not displayed, the [SIZE], [BORDERLESS] and [PICS/SHEET] are set to the printer’s standard.

5. Use ⇧ to select the [BORDERLESS] or [PICS/SHEET] settings, and press the button.

<table>
<thead>
<tr>
<th>Submenu 4 Application</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF/ON*1</td>
<td>The image is printed with a border around it ([OFF]). The image is printed to fill the entire paper ([ON]).</td>
</tr>
<tr>
<td>(The number of images per sheet varies depending on the printer.)</td>
<td>The number of images per sheet ([PICS/SHEET]) is selectable only when [MULTI PRINT] is selected in Step 3.</td>
</tr>
</tbody>
</table>

*1 The available settings for [BORDERLESS] vary depending on the printer.
   - If [STANDARD] is selected in Steps 4 and 5, the image is printed at the printer’s standard settings.

---

Diagram showing the printer's settings interface.
6 Use  \( \uparrow \) to select an image.

7 Press \( \downarrow \) to make a [SINGLE PRINT] reservation for the displayed image. Press \( \leftrightarrow \) to make detailed printer settings for the current image.

To make detailed printer settings

1. Use \( \uparrow \downarrow \leftrightarrow \rightarrow \) to make settings and press the \( \text{OK} \) button.

2. Use \( \leftrightarrow \) to select [OK], and press the \( \text{OK} \) button.

8 If necessary, repeat Steps 6 and 7 to select the image to be printed, make the detailed settings, and set [SINGLEPRINT].

9 Press the \( \text{OK} \) button.

10 Use \( \uparrow \downarrow \leftrightarrow \rightarrow \) to select [PRINT], and press the \( \text{OK} \) button.
   - Printing starts.
   - When [OPTION SET] is selected in [ALL PRINT] mode, the [PRINT INFO] screen is displayed.
   - After printing has finished, [PRINT MODE SELECT] will be displayed.
To cancel printing

1. Press the ▼ button while [TRANSFERRING] is displayed.
2. Select [CANCEL] using ◀ ▶ and then press the ▼ button.

11 Press the MENU button.

12 When the message [REMOVE USB CABLE] is displayed, disconnect the USB cable from the camera and printer.

Print Reservations (DPOF*)

In print reservations, the number of prints and date imprint option are saved in the image on the card. This enables easy printing at a printer or print shop supporting DPOF by using only the print reservations on the card without a computer or a camera.

*DPOF is a standard for storing automatic printout information from digital cameras.

Print reservations can be set only for the images stored on the card. Insert a card with recorded images before making print reservations.

DPOF reservations set by another DPOF device cannot be changed by this camera. Making new DPOF reservations with this camera will erase the reservations made by the other device.

DPOF print reservations can be made for up to 999 images per card.
5 Use \( \text{LM} \) to select the \([\) (date print) screen option, and press the \( \text{E} \) button.

<table>
<thead>
<tr>
<th>Submenu 2</th>
<th>Application</th>
</tr>
</thead>
<tbody>
<tr>
<td>NO</td>
<td>This prints the image only.</td>
</tr>
<tr>
<td>DATE</td>
<td>This prints the image with the shooting date.</td>
</tr>
<tr>
<td>TIME</td>
<td>This prints the image with the shooting time.</td>
</tr>
</tbody>
</table>

3 Use \( \text{LM} \) to select either \([\) or \([\), and press the \( \text{E} \) button.

4 Use \( \text{LM} \) to select \([\) (reset), and press the \( \text{E} \) button.

**Reserving one print each of all images on the card \([\)**

1 Follow Steps 1 and 2 in \([\) (p. 46).

2 Use \( \text{LM} \) to select \([\), and press the \( \text{E} \) button.

3 Follow Steps 5 to 6 in \([\).

**Resetting all print reservation data**

1 Set the mode dial to \( \), and then press the \( \text{MENU} \) button to display the top menu.

2 Use \( \text{LM} \) to select \([\) \( \text{PRINT ORDER} \), and press the \( \text{E} \) button.

4 Use \( \text{LM} \) to select \([\) \( \text{RESET} \), and press the \( \text{E} \) button.

**Resetting the print reservation data for selected images**

1 Follow Steps 1 and 2 of “Resetting all print reservation data” (p. 47).

2 Use \( \text{LM} \) to select \([\), and press the \( \text{E} \) button.

3 Use \( \text{LM} \) to select \([\) \( \text{KEEP} \) and press the \( \text{E} \) button.

4 Use \( \text{LM} \) to select the image with the print reservation you want to cancel. Use \( \text{LM} \) to set the print quantity to “0”.

5 If necessary, repeat Step 4, and then press the \( \text{E} \) button when finished.

6 Use \( \text{LM} \) to select the \([\) \( \text{PRINT ORDER} \) (date print) screen option, and press the \( \text{E} \) button.

- The settings are applied to the remaining images with the print reservation data.

7 Use \( \text{LM} \) to select \([\) \( \text{SET} \), and press the \( \text{E} \) button.
Using OLYMPUS Master 2

System requirements and installation of OLYMPUS Master 2

Install the OLYMPUS Master 2 software by referring to the included installation guide.

Connecting the camera to a computer

1 Make sure the camera is turned off.
   - The monitor is off.
   - The lens is retracted.

2 Connect the camera to a computer.
   - The camera automatically turns on.

Open the connector cover in the direction of the arrow.

Locate the position of the USB port by referring to your computer’s instructions manual.

3 Use to select [PC], and press the button.
   - The computer automatically detects the camera as a new device on the first connection.

Starting OLYMPUS Master 2

1 Double-click the OLYMPUS Master 2 icon.

Windows
After the computer detects the camera, a message indicating the success of the operation will appear. Confirm the message by clicking “OK.” The camera is recognized as a removable disk.

Macintosh
When iPhoto started, exit iPhoto and start OLYMPUS Master 2.

While the camera is connected to the computer, shooting functions are disabled.

Connecting the camera to a computer via a USB hub may cause unstable operation.

When [MTP] is set for the submenu that appears by pressing after selecting [PC] in Step 3, images cannot be transferred to a computer using OLYMPUS Master 2.

Windows
After the computer detects the camera, a message indicating the success of the operation will appear. Confirm the message by clicking “OK.” The camera is recognized as a removable disk.

Macintosh
When iPhoto started, exit iPhoto and start OLYMPUS Master 2.

While the camera is connected to the computer, shooting functions are disabled.

Connecting the camera to a computer via a USB hub may cause unstable operation.

When [MTP] is set for the submenu that appears by pressing after selecting [PC] in Step 3, images cannot be transferred to a computer using OLYMPUS Master 2.

Starting OLYMPUS Master 2

1 Double-click the OLYMPUS Master 2 icon.

Windows
appears on the desktop.

Macintosh
appears in the OLYMPUS Master 2 folder.
   - Browse window appears after starting the software.

When OLYMPUS Master 2 is started for the first time after installation, “Default Settings” and “Registration” screens will appear. Follow the instructions on the screen.
Operating OLYMPUS Master 2

When OLYMPUS Master 2 is started, a Quick Start Guide will appear on the screen to help you become familiar with the software. If the Quick Start Guide is not displayed, click in the toolbar to show the Guide.

For details on the operation, refer to the help guide of the software.

Transferring and saving images without using OLYMPUS Master 2

This camera is compatible with the USB Mass Storage Class. You can transfer and save the image data on your computer while the camera and the computer are connected.

System requirements

Windows : Windows 2000 Professional/
XP Home Edition/
XP Professional/Vista

Macintosh : Mac OS X v10.3 or later

On a computer running Windows Vista, if [MTP] is set for the submenu that appears by pressing § after selecting [PC] in Step 3 of “Connecting the camera to a computer” (p. 47), Windows Photo Gallery will become available.

Even if a computer has USB ports, proper operation is not guaranteed in the following cases:

- Computers with USB ports installed using an expansion card, etc.
- Computers without a factory-installed OS and home-built computers
Usage Tips

If the camera does not work as intended, or if an error message is displayed on the screen, and you are unsure of what to do, refer to the information below to fix the problem(s).

Troubleshooting

Battery

“The camera does not work even when battery is installed.”

- Insert recharged battery in the correct direction.
  “Charging the battery” (p. 10), “Loading the battery and the xD-Picture Card™ (sold separately) into the camera” (p. 11)
- Battery performance may have been reduced temporarily due to low temperature. Take the battery out of the camera and warm them by putting them in your pocket for a while.

Card/Internal memory

“An error message is displayed.”

“Error message” (p. 51)

Shutter button

“No picture is taken when the shutter button is pressed.”

- Set the mode dial to a position other than [\].
- Cancel sleep mode
  To save battery power, the camera automatically goes into sleep mode and the monitor turns off if there is no operation for 3 minutes when the camera is turned on. No picture is taken even if the shutter button is fully pressed in this mode. Operate the zoom button or other buttons to restore the camera from sleep mode before taking a picture. If the camera is left on for 12 minutes, it automatically turns off. Press the ON/OFF button to turn the camera on.
- Wait until $ (flash charge) stops blinking before taking pictures.

Monitor

“It is difficult to see the image on the monitor.”

- Condensation*1 may have formed inside the monitor. Turn off the power, and wait for the camera body to become acclimated to the surrounding temperature and dry out before taking pictures.
  *1 Dew drops can form in the camera when it is suddenly taken from a cold location into a warm, humid room.

“Vertical lines appear on the screen.”

- Vertical lines may appear on the screen when the camera is pointed at an extremely bright subject in situations such as clear weather conditions. The lines do not appear, however, in the final still image.

“The light is caught in the picture”

- Shooting with flash in dark situations results in an image with many flash reflections on dust in the air.

Date and time function

“Date and time settings return to the default setting.”

- If the battery is removed and left out of the camera for about 3 days*2, the date and time settings return to the default settings and must be reset.
  *2 The time until the date and time settings return to the default setting varies depending on how long the battery has been loaded.
  “Setting the date and time” (p. 13)

Other

“There is a noise coming from inside the camera during shooting.”

- The movement of the lens may make a noise even if the camera is not being operated because the autofocus function is active when the camera is ready to shoot.

● With prolonged camera use, the internal temperature may increase, resulting in automatic shutdown. If this occurs, remove the battery from the camera and wait until the camera has sufficiently cooled. The camera’s external temperature may also increase during use, however this is normal and does not indicate malfunction.
### Error message

When one of the messages below is displayed on the monitor, check the corrective action.

---

1. Before erasing important images, download them to a computer.
2. All data will be erased.
3. This is displayed, for instance, when the printer’s paper tray has been removed. Do not operate the printer while making the print settings on the camera.
4. This camera may be unable to print images taken by other cameras.
**Shooting tips**

When you are unsure of how to take a picture that you envision, refer to the information below.

**Focusing**

"Focusing on the subject"

- **Taking a picture of a subject not in the center of the screen**
  
  After focusing on an object at the same distance as the subject, compose the shot, and take the picture.

  "Pressing the shutter button halfway" (p. 14)

- **Set [AF MODE] (p. 27) to [IESP].**

- **Taking a picture of subjects where autofocus is difficult**

  In the following cases, after focusing on an object (by pressing the shutter button halfway down) with high contrast at the same distance as the subject, compose the shot and take the picture.

  - Subjects with low contrast
  - When extremely bright objects appear in the center of the screen
  - Object with no vertical lines*1

- **When objects are at different distances**

  - Fast-moving object
  - When the subject is not in the center of the frame

**Camera shake**

"Taking pictures without camera shake"

- **Taking pictures using [IMAGE STABILIZER] (p. 28)**

  When a picture is taken of a shadowy subject, the CCD*1 shifts to correct for camera shake even if the ISO speed is not increased. This function is also effective when taking pictures at a high zoom magnification.

  *1 A device that takes light received through the lens and converts it into electric signals.

- **Select [SPORT] in SCN mode (p. 28)**

  The [SPORT] mode uses a fast shutter speed and can reduce the blur incurred by a moving subject.

- **Taking pictures at a high ISO sensitivity**

  If a high ISO speed is selected, pictures can be taken at a high shutter speed even at locations where a flash cannot be used.

  [ISO] (p. 26)
**Exposure (brightness)**

**“Taking pictures with the right brightness”**
- Taking pictures of a subject against a backlight
  
  A face against the backlight is brightened.
  
  [SHADOW ADJ] (p. 22, 28)
- Taking pictures using [FACE DETECT] for [AF MODE] (p. 27)
  
  Appropriate exposure is obtained for a face against the backlight, and the face is brightened.
- Taking pictures using [{ ]} for [ESP/ ] (p. 27)
  
  Brightness is matched with a subject in the center of the screen and the image is not affected by background light.
- Taking pictures using [ ] (FILL IN) (p. 19) flash
  
  A subject against the backlight is brightened.
- Taking pictures of a white beach or snow scene
  
  Set the mode to [BEACH & SNOW] (p. 28)
- Taking pictures using exposure compensation (p. 20)
  
  Adjust the brightness while viewing the screen for taking the picture. Normally, taking pictures of white subjects (such as snow) results in images that are darker than the actual subject. Use the button to adjust in the positive direction to express whites as they appear.
  
  When taking pictures of black subjects, on the other hand, it is effective to adjust in the negative direction.

**Image quality**

**“Taking sharper pictures”**
- Taking pictures with the optical zoom
  
  Avoid using [DIGITAL ZOOM] (p. 27) to take pictures.
- Taking pictures at a low ISO sensitivity
  
  If the picture is taken with a high ISO sensitivity, noise (small colored spots and color unevenness that were not in the original image) can occur, and the image can appear grainy.
  
  [ISO] (p. 26)

**Panorama**

**“Taking pictures so that the frames are stitched smoothly”**
- A tip for panoramic shooting
  
  Taking pictures by pivoting with the camera at the center prevents shifting of the image. When taking pictures of close objects in particular, pivoting with the lens end at the center produces favorable results.

**Batteries**

**“Making batteries last longer”**
- Avoid any of the following operations when not actually taking pictures because they deplete the battery power
  
  - Repeatedly pressing the shutter button halfway
  - Repeatedly using the zoom
  - Set [POWER SAVE] (p. 42) to [ON]
Playback/Editing tips

Playback

“Playing images in the internal memory or card”

- Remove the card when playing images in the internal memory
  - “Loading the battery and the xD-Picture Card™ (sold separately) into the camera” (p. 11)
  - “Using the microSD card/microSDHC card (sold separately)” (p. 12)

“Viewing images with high picture quality on a high-definition TV”

- Connect the camera to the TV using an HDMI cable (commercially available)
  - “To play back camera images on a TV” (p. 41)
  - “Selecting the digital video signal format for connecting to a TV via an HDMI cable [HDMI]” (p. 42)

Editing

“Erasing the sound recorded to a still image”

- Record over the sound with silence when playing back the image
  
  [.addField](Add sound to still images) (p. 36)
Appendix

Camera care

Exterior
- Wipe gently with a soft cloth. If the camera is very dirty, soak the cloth in mild soapy water and wring well. Wipe the camera with the damp cloth and then dry it with a dry cloth. If you have used the camera at the beach, use a cloth soaked in clean water and wring well.

Monitor
- Wipe gently with a soft cloth.

Lens
- Blow dust off the lens with a commercial blower, then wipe gently with a lens cleaner.

Battery/Charger
- Wipe gently with a soft, dry cloth.
  - Do not use strong solvents, such as benzene or alcohol, or chemically treated cloth.
  - Mold may form on the lens surface if the lens is left dirty.

Storage
- When storing the camera for extended periods, remove the battery, AC adapter and card, and keep in a cool, dry place that is well ventilated.
- Periodically insert the battery and test the camera functions.
  - Avoid leaving the camera in places where chemical products are handled since this may result in corrosion.

Battery and charger

- This camera uses one Olympus lithium-ion battery (LI-42B/LI-40B). No other type of batteries can be used.
  - CAUTION: There is a risk of explosion if the battery is replaced with the incorrect battery type. Dispose of the used battery following the instructions. “Battery Handling Precautions” (p. 60)
- Power consumption by the camera varies depending on which functions are used.
- During the conditions described below, power is consumed continuously and the battery becomes exhausted quickly.
  - The zoom is used repeatedly.
  - The shutter button is pressed halfway repeatedly in shooting mode, activating the auto focus.
  - A picture is displayed on the monitor for an extended period of time.
  - The camera is connected to a computer or printer.
  - Using an exhausted battery may cause the camera to turn off without displaying the battery level warning.
  - The rechargeable battery is not fully charged at the time of purchase. Charge the battery fully with LI-41C/LI-40C charger before use.
  - The provided rechargeable battery usually takes approximately 2 hours to charge (varies with usage).
  - The supplied LI-41C battery charger is used only for LI-42B/LI-40B battery. Do not charge other type of battery with the supplied battery charger. It might cause explosion, leaking, overheating or fire.
  - For plug-in type battery charger: This power unit is intended to be correctly orientated in a vertical or floor mount position.
**Using an AC adapter**

An AC adapter is useful for time-consuming tasks such as image downloads to a computer or when running a slideshow for a long period of time. To use an AC adapter for this camera, the multiadapter cable (CB-MA1) is required. Do not use any other AC adapter with this camera.

**Using your charger and AC adapter abroad**

- The charger and AC adapter can be used in most home electrical sources within the range of 100 V to 240 V AC (50/60Hz) around the world. However, AC wall outlets are shaped differently in different countries or regions. Therefore, the charger and AC adapter may require a plug adapter to match your wall outlet. For details, ask at your local electrical shop or travel agent.
- Do not use travel voltage converters as they could damage your charger and AC adapter.

**Using an xD-Picture Card**

A card (and also internal memory) corresponds to the film in a film camera. The recorded images (data) can be erased, and they can be retouched with the use of a computer. Cards can be removed from the camera and exchanged, but it is not possible to remove or exchange the internal memory. Use of larger capacity cards enables you to take more pictures.

Cards compatible with this camera

- xD-Picture Card (16MB to 2GB) (TypeH/M+/Standard)

Using a new card

Before using a non-Olympus card or a card that was used for another purpose in a computer or other device, use [MEMORY FORMAT]/[FORMAT], [ERASE], [SEL. IMAGE], or [ALL ERASE] (p. 37) to format the card.
Number of storable pictures (still pictures)/continuous recording length (movies) in the internal memory and xD-Picture Card

</table>

* The maximum file size for recording a single movie is 2GB regardless of card capacity.

### Increasing the number of pictures that can be taken

Connect the camera to a computer or other device to save any important images, and then erase the images in the internal memory or card:

[ERASE] (p. 16), [SEL. IMAGE] (p. 36), [ALL ERASE] (p. 36), [MEMORY FORMAT]/[FORMAT] (p. 37)
Using a microSD Attachment

Do not use the bundled microSD Attachment with Olympus digital cameras that do not support it. Do not use it with other brands of digital cameras, computers, printers and other devices that support xD-Picture Card media. Doing so may damage the pictures taken and/or cause the device to malfunction.

If the microSD card cannot be removed, do not use force. Contact authorized distributors/service centers.

Cards compatible with this camera
microSD card/microSDHC card

For a list of tested microSD cards, please visit our website (http://www.olympus.com/).

Sending images
You can send images to a computer or printer by using the USB cable provided with the camera.
To send data to other devices, remove the microSD Attachment from the camera and use a commercially available microSD card adapter.

Handling precautions
Do not touch the contact area of the microSD Attachment or microSD card. Doing so may cause failure in reading the images. When fingerprints or stains are found on the contact area, wipe the area with a soft dry cloth.

SAFETY PRECAUTIONS

General Precautions

Read All Instructions — Before you use the product, read all operating instructions. Save all manuals and documentation for future reference.

Cleaning — Always unplug this product from the wall outlet before cleaning. Use only a damp cloth for cleaning. Never use any type of liquid or aerosol cleaner or any type of organic solvent to clean this product.

Attachments — For your safety and to avoid damaging the product, use only accessories recommended by Olympus.

Water and Moisture — For precautions on products with weatherproof designs, read the weatherproofing sections.

Location — To avoid damage to the product, mount the product securely on a stable tripod, stand, or bracket.

Power Source — Connect this product only to the power source described on the product label.

Lightning — If a lightning storm occurs while using an AC adapter, remove it from the wall outlet immediately.

Foreign Objects — To avoid personal injury, never insert a metal object into the product.

Heat — Never use or store this product near any heat source, such as a radiator, heat register, stove or any type of equipment or appliance that generates heat, including stereo amplifiers.
### Handling the Camera

**WARNING**

- Do not use the camera near flammable or explosive gases.
- Do not use the flash and LED on people (infants, small children, etc.) at close range.
  - You must be at least 1 m (3 ft.) away from the faces of your subjects. Firing the flash too close to the subject’s eyes could cause a momentary loss of vision.
- Keep young children and infants away from the camera.
  - Always use and store the camera out of the reach of young children and infants to prevent the following dangerous situations which could cause serious injury:
    - Becoming entangled in the camera strap, causing strangulation.
    - Accidentally swallowing the battery, cards or other small parts.
    - Accidentally firing the flash into their own eyes or those of another child.
    - Accidentally being injured by the moving parts of the camera.
- Do not look at the sun or strong lights with the camera.
- Do not use or store the camera in dusty or humid places.
- Do not cover the flash with a hand while firing.
- Do not insert anything into the microSD Attachment other than the microSD card.
  - This attachment is exclusive for use of microSD cards only. Other types of cards cannot be installed.
- Do not insert anything other than an xD-Picture Card or the microSD Attachment into the camera. If you insert a card by mistake, such as a microSD card, do not use force. Contact authorized distributors/service centers.

**CAUTION**

- Stop using the camera immediately if you notice any unusual odors, noise or smoke around it.
  - Do not remove the battery with bare hands. Doing so may cause a fire or burn your hands.
- Never hold or operate the camera with wet hands.
- Do not leave the camera in places where it may be subject to extremely high temperatures.
  - Doing so may cause parts to deteriorate and, in some circumstances, cause the camera to catch fire. Do not use the charger or AC adapter if it is covered (such as a blanket). This could cause overheating, resulting in fire.
- Handle the camera with care to avoid getting a low-temperature burn.
  - The camera contains metal parts. Overheating can result in a low-temperature burn. Pay attention to the following:
    - When used for a long period, the camera will get hot. If you hold on to the camera in this state, a low-temperature burn may be caused.
  - In places subject to extremely cold temperatures, the temperature of the camera’s body may be lower than the environmental temperature. If possible, wear gloves when handling the camera in cold temperatures.
- Be careful with the strap.
  - Be careful with the strap when you carry the camera. It could easily catch on stray objects and cause serious damage.

### Battery Handling Precautions

Follow these important guidelines to prevent batteries from leaking, overheating, burning, exploding or causing electrical shocks or burns.

**DANGER**

- The camera uses a lithium-ion battery specified by Olympus. Charge the battery with the specified charger. Do not use any other chargers.
- Never heat or incinerate batteries.
- Take precautions when carrying or storing batteries to prevent them from coming into contact with any metal objects such as jewelry, pins, fasteners, etc.
- Never store batteries where they will be exposed to direct sunlight or subjected to high temperatures in a hot vehicle, near a heat source, etc.
- To prevent causing battery leaks or damaging their terminals, carefully follow all instructions regarding the use of batteries. Never attempt to disassemble a battery or modify it in any way, solder, etc.
- If battery fluid gets into your eyes, flush your eyes immediately with clear, cold running water and seek medical attention immediately.
- If a battery leaks, becomes discolored or deformed, or causing a fire or explosion, use only batteries recommended for use with this product.
- If rechargeable batteries have not been recharged within the specified time, stop charging them and do not use them.
- Do not use a battery if it is cracked or broken.
- If a battery leaks, becomes discolored or deformed, or becomes abnormal in any other way during operation, stop using the camera.
- If a battery leaks fluid onto your clothing or skin, remove the clothing and flush the affected area with clean, running cold water immediately. If the fluid burns your skin, seek medical attention immediately.
- Never subject batteries to strong shocks or continuous vibration.
**CAUTION**

- Before loading, always inspect the battery carefully for leaks, discoloration, warping or any other abnormality.
- The battery may become hot during prolonged use. To avoid minor burns, do not remove it immediately after using the camera.
- Always unload the battery from the camera before storing the camera for a long period.

**Caution for Usage Environment**

- To protect the high-precision technology contained in this product, never leave the camera in the places listed below, no matter if in use or storage:
  - Places where temperatures and/or humidity are high or go through extreme changes, such as in direct sunlight, at beaches, in locked cars or near other heat sources (stove, radiator, etc.) or humidifiers.
  - In sandy or dusty environments.
  - Near flammable items or explosives.
  - In wet places, such as bathrooms or in the rain. When using products with weatherproof designs, read their manuals as well.
  - In places prone to strong vibrations.
- Never drop the camera or subject it to severe shocks or vibrations.
- When mounted on a tripod, adjust the position of the camera with the tripod head. Do not twist the camera.
- Do not touch electric contacts on cameras.
- Do not leave the camera pointed directly at the sun. This may cause lens or shutter curtain damage, color failure, ghosting on the CCD or possibly fires.
- Do not push or pull severely on the lens.
- Before storing the camera for a long period, remove the batteries. Select a cool, dry location for storage to prevent condensation or mold from forming inside the camera. After storage, test the camera by turning it on and pressing the shutter button to make sure that it is operating normally.
- Always observe the operating environment restrictions described in the camera’s manual.

**Battery Handling Precautions**

- This camera uses a lithium-ion battery specified by Olympus. Do not use any other type of battery.
- If the battery’s terminals get wet or greasy, camera contact failure may result. Wipe the battery well with a dry cloth before use.
- Always charge a battery when using it for the first time, or if it has not been used for a long period.
- When operating the camera with battery power at low temperatures, try to keep the camera and spare battery as warm as possible. A battery that has run down at low temperatures may be restored after it is warmed at room temperature.
- The number of pictures you can take may vary depending on the shooting conditions or battery.
- Before going on a long trip, and especially before traveling abroad, purchase extra batteries. A recommended battery may be difficult to obtain while traveling.
- Please recycle batteries to help save our planet’s resources. When you throw away dead batteries, be sure to cover their terminals and always observe local laws and regulations.

**LCD Monitor**

- Do not push the monitor forcibly; otherwise the image may become vague, resulting in a playback mode failure or damage to the monitor.
- A strip of light may appear on the top/bottom of the monitor, but this is not a malfunction.
- When a subject is viewed diagonally in the camera, the edges may appear zigzagged on the monitor. This is not a malfunction; it will be less noticeable in playback mode.
- In places subject to low temperatures, the LCD monitor may take a long time to turn on or its color may change temporarily. When using the camera in extremely cold places, it is a good idea to occasionally place it in a warm place. An LCD monitor exhibiting poor performance due to low temperatures will recover in normal temperatures.
- The LCD used for the monitor is made with high-precision technology. However, black spots or bright spots of light may appear constantly on the LCD monitor. Due to its characteristics or the angle at which you are viewing the monitor, the spot may not be uniform in color and brightness. This is not a malfunction.
**Legal and Other Notices**

- Olympus makes no representations or warranties regarding any damages or benefit expected by using this unit lawfully, or any request from a third person, which are caused by the inappropriate use of this product.
- Olympus makes no representations or warranties regarding any damages or any benefit expected by using this unit lawfully which are caused by erasing picture data.

**Disclaimer of Warranty**

- Olympus makes no representations or warranties, either expressed or implied, by or concerning any content of these written materials or software, and in no event shall be liable for any implied warranty of merchantability or fitness for any particular purpose or for any consequential, incidental or indirect damages (including but not limited to damages for loss of business profits, business interruption and loss of business information) arising from the use or inability to use these written materials or software or equipment. Some countries do not allow the exclusion or limitation of consequential or incidental damages, so the above limitations may not apply to you.
- Olympus reserves all rights to this manual.

**Warning**

Unauthorized photographing or use of copyrighted material may violate applicable copyright laws. Olympus assumes no responsibility for unauthorized photographing, use or other acts that infringe upon the rights of copyright owners.

Olympus reserves the right to alter the features and contents of this publication or software without obligation or advance notice.

**FCC Notice**

- Radio and Television Interference
  - Changes or modifications not expressly approved by the manufacturer may void the user’s authority to operate this equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
  - This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
- However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - Adjust or relocate the receiving antenna.
  - Increase the distance between the camera and receiver.
  - Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
  - Consult your dealer or an experienced radio/TV technician for help. Only the OLYMPUS-supplied USB cable should be used to connect the camera to USB enabled personal computers (PC).

Any unauthorized changes or modifications to this equipment would void the user’s authority to operate it.

The representative supply voltage and plug type are described in this chart. Depending on the area, different types of plugs and supply voltages are used.

Attention: Power cord meeting demands from each country shall be used.

- For only the United States
  Use a UL Listed, 1.8 - 3 m (6 - 10 ft), Type SPT-2 or NISPT-2, AWG no. 18 power supply cord, rated for 125 V 7 A, with a non-polarized NEMA 1-15P plug rated for 125 V 15 A.

For customers in North and South America

For customers in USA
Declaration of Conformity
Model Number : Stylus-7000/μ-7000
Trade Name : OLYMPUS
Responsible Party : OLYMPUS IMAGING AMERICA INC.
Address : 3500 Corporate Parkway,
P.O. Box 610, Center Valley, PA 18034-0610,
U.S.A.
Telephone Number : 484-896-5000
Tested To Comply With FCC Standards
FOR HOME OR OFFICE USE
This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference.
(2) This device must accept any interference received, including interference that may cause undesired operation.

For customers in Canada
This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Use Only Dedicated Rechargeable Battery and Battery Charger
We strongly recommend that you use only the genuine Olympus dedicated rechargeable battery and battery charger with this camera. Using a non-genuine rechargeable battery and/or battery charger may result in fire or personal injury due to leakage, heating, ignition or damage to the battery. Olympus does not assume any liability for accidents or damage that may result from the use of a battery and/or battery charger that are not genuine Olympus accessories.

OLYMPUS WORLDWIDE LIMITED WARRANTY - IMAGING PRODUCTS
Olympus warrants that the enclosed Olympus® imaging product(s) and related Olympus® accessories (individually a “Product” and collectively the “Products”) will be free from defects in materials and workmanship under normal use and service for a period of one (1) year from the date of purchase.
If any Product proves to be defective within the one-year warranty period, the customer must return the defective Product to any of Olympus Service Centers, following the procedure set forth below (See “WHAT TO DO WHEN SERVICE IS NEEDED”).
Olympus, at its sole discretion, will repair, replace, or adjust the defective Product, provided that Olympus investigation and factory inspection disclose that (a) such defect developed under normal and proper use and (b) the Product is covered under this limited warranty.
Repair, replacement, or adjustment of defective Products shall be Olympus’s sole obligation and the customer’s sole remedy hereunder. The customer is liable and shall pay for shipment of the Products to the Olympus Service Center. Olympus shall not be obligated to perform preventive maintenance, installation, deinstallation, or maintenance.
Olympus reserves the right to (i) use reconditioned, refurbished, and/or serviceable used parts (that meet Olympus’s quality assurance standards) for warranty or any other repairs and (ii) make any internal or external design and/or feature changes on or to its products without any liability to incorporate such changes on or to the Products.
WHAT IS NOT COVERED BY THIS LIMITED WARRANTY
Excluded from this limited warranty and not warranted by Olympus in any fashion, either express, implied, or by statute, are:

(a) products and accessories not manufactured by Olympus and/or not bearing the "OLYMPUS" brand label (the warranty coverage for products and accessories of other manufacturers, which may be distributed by Olympus, is the responsibility of the manufacturers of such products and accessories in accordance with the terms and duration of such manufacturers' warranties);
(b) any Product which has been disassembled, repaired, tampered with, altered, changed, or modified by persons other than Olympus’s own authorized service personnel unless repair by others is made with the written consent of Olympus;
(c) defects or damage to the Products resulting from wear, tear, misuse, abuse, negligence, sand, liquids, impact, improper storage, nonperformance of scheduled operator and maintenance items, battery leakage, use of non-"OLYMPUS" brand accessories, consumables, or supplies, or use of the Products in combination with non-compatible devices;
(d) software programs;
(e) supplies and consumables (including but not limited to lamps, ink, paper, film, prints, negatives, cables and batteries); and/or
(f) Products which do not contain a validly placed and recorded Olympus serial number, unless they are a model on which Olympus does not place and record serial numbers.

EXCEPT FOR THE LIMITED WARRANTY SET FORTH ABOVE, OLYMPUS MAKES NO AND DISCLAIMS ALL OTHER REPRESENTATIONS, GUARANTEES, CONDITIONS, AND WARRANTIES CONCERNING THE PRODUCTS, WHETHER DIRECT OR INDIRECT, EXPRESS OR IMPLIED, OR ARISING UNDER ANY STATUTE, ORDINANCE, COMMERCIAL USAGE OR OTHERWISE, INCLUDING BUT NOT LIMITED TO ANY WARRANTY OR REPRESENTATION AS TO THE SUITABILITY, DURABILITY, DESIGN, OPERATION, OR CONDITION OF THE PRODUCTS (OR ANY PART THEREOF) OR THE MERCHANTABILITY OF THE PRODUCTS OR THEIR FITNESS FOR A PARTICULAR PURPOSE, OR RELATING TO THE INFRINGEMENT OF ANY PATENT, COPYRIGHT, OR OTHER PROPRIETARY RIGHT USED OR INCLUDED THEREIN.

IF ANY IMPLIED WARRANTIES APPLY AS A MATTER OF LAW, THEY ARE LIMITED IN DURATION TO THE LENGTH OF THIS LIMITED WARRANTY.
SOME STATES MAY NOT RECOGNIZE A DISCLAIMER OR LIMITATION OF WARRANTIES AND/OR LIMITATION OF LIABILITY SO THE ABOVE DISCLAIMERS AND EXCLUSIONS MAY NOT APPLY.
THE CUSTOMER MAY ALSO HAVE DIFFERENT AND/OR ADDITIONAL RIGHTS AND REMEDIES THAT VARY FROM STATE TO STATE.
THE CUSTOMER ACKNOWLEDGES AND AGREES THAT OLYMPUS SHALL NOT BE RESPONSIBLE FOR ANY DAMAGES THAT THE CUSTOMER MAY INCUR FROM DELAYED SHIPMENT, PRODUCT FAILURE, PRODUCT DESIGN, SELECTION, OR PRODUCTION, IMAGE OR DATA LOSS OR IMPAIRMENT OR FROM ANY OTHER CAUSE, WHETHER LIABILITY IS ASSERTED IN CONTRACT, TORT (INCLUDING NEGLIGENCE AND STRICT PRODUCT LIABILITY) OR OTHERWISE. IN NO EVENT SHALL OLYMPUS BE LIABLE FOR ANY INDIRECT, INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES OF ANY KIND (INCLUDING WITHOUT LIMITATION LOSS OF PROFITS OR LOSS OF USE), WHETHER OR NOT OLYMPUS SHALL BE OR SHOULD BE AWARE OF THE POSSIBILITY OF SUCH POTENTIAL LOSS OR DAMAGE.

Representations and warranties made by any person, including but not limited to dealers, representatives, salespersons, or agents of Olympus, which are inconsistent or in conflict with or in addition to the terms of this limited warranty, shall not be binding upon Olympus unless reduced to writing and approved by an expressly authorized officer of Olympus.
This limited warranty is the complete and exclusive statement of warranty which Olympus agrees to provide with respect to the Products and it shall supersede all prior and contemporaneous oral or written agreements, understandings, proposals, and communications pertaining to the subject matter hereof.
This limited warranty is exclusively for the benefit of the original customer and cannot be transferred or assigned.
WHAT TO DO WHEN SERVICE IS NEEDED

The customer must transfer any image or other data saved on a Product to another image or data storage medium and/or remove any film from the Product prior to sending the Product to Olympus for service.

IN NO EVENT SHALL OLYMPUS BE RESPONSIBLE FOR SAVING, KEEPING OR MAINTAINING ANY IMAGE OR DATA SAVED ON A PRODUCT RECEIVED BY IT FOR SERVICE, OR ON ANY FILM CONTAINED WITHIN A PRODUCT RECEIVED BY IT FOR SERVICE, NOR SHALL OLYMPUS BE RESPONSIBLE FOR ANY DAMAGES IN THE EVENT ANY IMAGE OR DATA IS LOST OR IMPAIRED WHILE SERVICE IS BEING PERFORMED (INCLUDING, WITHOUT LIMITATION, DIRECT, INDIRECT, INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES, LOSS OF PROFITS OR LOSS OF USE), WHETHER OR NOT OLYMPUS SHALL BE OR SHOULD BE AWARE OF THE POSSIBILITY OF SUCH POTENTIAL LOSS OR IMPAIRMENT.

Package the Product carefully using ample padding material to prevent damage in transit and either deliver it to the Authorized Olympus Dealer that sold you the Product or ship it postage prepaid and insured to any of our Olympus Service Centers. When returning Products for service, your package should include the following:

1. Sales receipt showing date and place of purchase.
2. Copy of this limited warranty bearing the Product serial number corresponding to the serial number on the Product (unless it is a model on which Olympus does not place and record serial numbers).
3. A detailed description of the problem.
4. Sample prints, negatives, digital prints (or files on disk) if available and related to the problem.

When service is completed, the Product will be returned to you postage prepaid.

WHERE TO SEND PRODUCT FOR SERVICE

See “WORLDWIDE WARRANTY” for the nearest service center.

INTERNATIONAL WARRANTY SERVICE

International warranty service is available under this warranty.

### Three Ways to Adjust Settings

#### Using the Menu

Various camera settings can be accessed through the menu. Settings are divided into shooting mode menus and playback mode menus.

1. Set the mode dial to one of the selections.
   - The indicator in (shooting) (p. 25 to 42) indicates available shooting modes.

2. Press the MENU button.
   - This example describes how to use the menu to set the [SETUP] screen.

3. Use 
   - Pressing and holding the button down displays the menu (guide) of the selected option.

4. Use 
   - In quickly move to the desired submenu, press 
   - Press 
   - Some menus include submenus that appear by pressing the button.

5. Use 
   - To select the submenu, press
   - Once a setting is selected, the display returns to the previous screen.
   - There may be additional operations: "Menu" (p. 21 to 35).

6. Press the MENU button to complete the setting.

#### Using the Direct Buttons

Frequently used shooting functions can be accessed using the direct buttons.

- Shutter button (p. 16)
- Zoom button (p. 19)
- Menu button (p. 3)
- Digital zoom button (p. 41)
- Fine zoom button (p. 19)
- Drive button (p. 19)
- DIGITAL ZOOM
- FINE ZOOM
- DRIVE

#### Using the FUNC Menu (p. 22)

Frequently used shooting menu functions can be set with fewer steps using the FUNC menu.

- Flash button (p. 25)
- DISP button (change information display, menu guidance, date and time) (p. 21, 3, 12)
- Q button (panorama/Shadow Adjustment/Technicolor window/Backlight compensation) (p. 23, 16)

Thank you for purchasing an Olympus digital camera. Before you start to use your new camera, please read these instructions carefully to enjoy optimum performance and a longer service life. Keep this manual in a safe place for future reference.

We recommend that you take test shots to get accustomed to your camera before taking important photographs.

In the interest of continually improving products, Olympus reserves the right to update or modify information contained in this manual.

The screen and camera illustrations shown in this manual were produced during the development stages and may differ from the actual product.
