To ensure the best performance from your camera, please read the Operating Manual before using the camera.
Checking the Contents of the Package

- Hot shoe cover FK (Installed on camera)
- Eyecup FR (Installed on camera)
- Body mount cover (Installed on camera)
- Rechargeable Lithium-ion Battery D-LI109
- Battery charger D-BC109
- AC plug cord
- Strap O-ST132
- Software (CD-ROM) S-SW156
- Start Guide

Lenses you can use
Lenses that can be used with this camera are DA, DA L, D FA and FA J lenses and lenses that have an A (Auto) position on the aperture ring. To use any other lens or accessory, see p.113.

Regarding copyrights
Images taken with this camera that are for anything other
than personal enjoyment cannot be used without permission
according to the rights as specified in the Copyright Act.
Please take care, as there are cases where limitations are
placed on taking pictures even for personal enjoyment during
demonstrations, performances or of items on display. Images
taken with the purpose of obtaining copyrights also cannot be
used outside the scope of use of the copyright as laid out in
the Copyright Act, and care should be taken here also.

To users of this camera
• Do not use or store this camera in the vicinity of equipment
  that generates strong electromagnetic radiation or magnetic
  fields. Strong static charges or the magnetic fields produced
  by equipment such as radio transmitters could interfere with
  the monitor, damage the stored data, or affect the camera’s
  internal circuitry and cause camera misoperation.
• The liquid crystal panel used for the monitor is
  manufactured using extremely high precision technology.
  Although the level of functioning pixels is 99.99% or better,
  you should be aware that 0.01% or fewer of the pixels may
  not illuminate or may illuminate when they should not.
  However, this has no effect on the recorded image.
• In this manual, the generic term “computer(s)” refers to
  either a Windows PC or a Macintosh.
• In this manual, the term “battery(ies)” refers to any type of
  batteries used for this camera and its accessories.

Regarding User Registration
In order to better serve you, we request that you complete
the user registration, which can be found on the CD-ROM
supplied with the camera or on our website.
Thank you for your cooperation.

Names and Functions of the Working Parts

- Remote control receiver
- Lens unlock button
- Lens information contacts
- Speaker
- Built-in flash
- AF assist light
- Lens mount index
- Remote control receiver
- Lens unlock button
- Lens information contacts
- AF coupler
- Mirror
- Strap lug
- Image plane indicator
- Microphone terminal
- Microphone
- Hot shoe
- HDMI terminal (type D)
- Terminal cover
- USB terminal (micro B)
- NFC mark
- Diopter adjustment lever
- Card slot for SD Memory Cards
- Card access lamp
- Vari-angle monitor
- Connection cable cover
- Battery cover unlock lever
- Battery cover
- Tripod socket
1 EV Compensation button (①)
Press to change the exposure compensation value. (p.48)
In playback mode, the last JPEG image taken can also be saved in RAW format. (p.43)

2 Green button (②)
Resets the value being adjusted.

3 Shutter release button (③)
Press to capture images. (p.40)
In playback mode, press halfway to switch to capture mode.

4 Main switch
Turns the power on/off, or switches to 🎥 (movie) mode. (p.36, p.49)
When the camera is turned on, it enters 📸 (still picture) mode and the indicator lamp lights green. When the switch is turned to 🎥, the camera enters 🎥 mode and the lamp lights red.

5 Front e-dial (⑤)
Changes the values for camera settings such as exposure. (p.47)
You can change the menu category when a menu screen is displayed. (p.19)
In playback mode, use this to select a different image.

6 Flash pop-up button (⑥)
Press to pop up the built-in flash. (p.53)

7 RAW/Fx button (⑦)
You can assign a function to this button. (p.100)

8 Focus mode switch
Changes the focus mode. (p.54)

9 Live View/Delete button (⑧)
Displays the Live View image. (p.41)
In playback mode, press to delete images. (p.43)
10 Rear e-dial ( HomeController )
Changes the values for camera settings such as exposure. (p.47)
You can change the menu tabs when a menu screen is displayed. (p.19)
You can change the camera settings when the control panel is displayed. (p.18)
In playback mode, use this to magnify an image or display multiple images at the same time. (p.43, p.78)

11 Four-way controller (▲▼◄►)
Displays the Sensitivity, White Balance, Flash Mode or Drive Mode setup menu. (p.18)
When a menu or the control panel is displayed, use this to move the cursor or change the item to set.
Press ▼ in single image display of the playback mode to display the playback mode palette. (p.77)

12 INFO button (INFO)
Changes the style of the display on the monitor. (p.10, p.14)

13 Mode dial
Changes the capture mode. (p.39)

14 Self-portrait shutter button
When shooting with Live View, this button can be used as a shutter release button and facilitates taking self-portraits by holding the camera with the lens facing you. The indicator lamp lights green or red when the button can be used as a shutter release button. (p.41)
At all other times, this button is used to switch the Wi-Fi function on or off. (p.90)

15 AF/AE Lock button (AF/AEL)
Available for adjusting focus, instead of pressing SHUTTER halfway, and for locking the exposure value before shooting. (p.54, p.101)

16 Playback button ()
Switches to playback mode. (p.42)
Press the button again to switch to capture mode.

17 OK button (OK)
When a menu or the control panel is displayed, press this button to confirm the selected item.
Press this button when [AF Active Area] is set to ▲ or ◡, or when [Contrast AF] is set to ▼ or ◢ to change the focusing area. (p.56, p.57)
When the power is turned on, the indicator lamp lights blue. The lamp turns off after a while.

18 MENU button (MENU)
Displays a menu. Press this button while the menu is displayed to return to the previous screen. (p.19)
Introduction

About the indicator lamps
The main switch lamp, self-portrait shutter button lamp, and OK lamp turn off in the following situations.
- From the time when shutter is pressed halfway until the end of shooting
- While AF/AE-L is pressed
- During playback mode
- While a menu is displayed
- During Auto Power Off
You can set the lamp lighting settings in [Indicator Lamps] of the 3 menu. (p.27)

About the four-way controller
In this manual, each button of the four-way controller is indicated as shown in the illustration on the right.

Monitor

Capture Mode

With this camera, you can take pictures while looking through the viewfinder or while viewing the image on the monitor. When using the viewfinder, you can take pictures while checking the status screen displayed on the monitor and looking through the viewfinder. (p.39) When not using the viewfinder, you can take pictures while viewing the Live View image displayed on the monitor. (p.41)
The camera is in “standby mode” when it is ready to shoot, such as when the status screen or Live View image is displayed. Press INFO in standby mode to display the “control panel” and change settings. (p.18) You can change the type of information displayed in standby mode by pressing INFO while the control panel is displayed. (p.13)

Standby mode (Status screen)

Control panel

Shooting Info Display selection screen
In [Live View] of the 3 menu, you can change the settings of the items displayed on the monitor during Live View. (p.22)
Control Panel

**Mode**

- Custom Image Bright
- Date and Time

**Memo**

- The items that can be selected vary depending on the current camera setup.
- If no operations are made within 1 minute while the control panel is displayed, the camera returns to standby mode.

50 Universal Coordinated Time (p.117)

**Histogram Display**

Use ▲▼ to switch between the brightness histogram and RGB histogram.

- **1** Histogram (Brightness)  
- **2** Switch RGB histogram/Brightness histogram  
- **3** Protect setting  
- **4** Folder number-File number  
- **5** Save RAW Data  
- **6** File Format  
- **7** Shutter speed  
- **8** Aperture value  
- **9** Sensitivity  
- **10** EV Compensation  
- **11** Histogram (R)  
- **12** Histogram (G)  
- **13** Histogram (B)
When shooting with the viewfinder, the following information appears in the viewfinder.

### Viewfinder

- **AF frame** (p.40)
- **Spot metering frame** (p.52)
- **AF point** (p.56)
- **Flash indicator** (p.53)
- **Focus Method** (p.54)
- **Shutter speed**
- **Aperture value**
- **Focus indicator** (p.40)
- **EV bar scale/Electronic Level** (p.17)
- **ISO/ISO AUTO**
- **Sensitivity** (p.51)/Exposure compensation value
- **AE Lock** (p.49)
- **Change AF Point** (p.56)
- **Multi-exposure** (p.63)
- **AE Metering** (p.52)
- **Shake Reduction** (p.22)
- **Flash Exposure Compensation** (p.53)
- **EV Compensation** (p.48)/Bracketing (p.62)
- **File Format** (p.44)

### Memo

- The information is displayed in the viewfinder when **SHUTTER** is pressed halfway, or during the meter operating time (default setting: 10 sec.).
- The AF point in use for autofocus appears in red (Superimpose AF Area) when **SHUTTER** is pressed halfway. You can set it to [Off] in [16 Superimpose AF Area] of the C3 menu.
- You can adjust the image sharpness in the viewfinder using the diopter adjustment lever. If it is difficult to move the diopter adjustment lever, lift up and remove the eyecup. Adjust the diopter setting until the AF frame in the viewfinder looks sharp and clear.
You can check whether the camera is tilted by displaying the electronic level. The electronic level for the horizontal camera angle can be displayed in the EV bar scale in the viewfinder, and the electronic levels for the vertical and horizontal camera angles can be displayed on the Live View screen. (p.11)
Select whether to display the electronic level in [Electronic Level] of the 3 menu. (p.22)

- When level (at 0°)
- When tilted 5° to the left
- When held vertically and tilted 3° to the right
How to Change Function Settings

The camera functions and their settings can be selected and changed by using the following ways.

### Direct keys
- Press ▲▼◄► in standby mode.

### Control panel
- Press INFO in standby mode. (indicated with the icon in this manual)

### Menus
- Press MENU.

---

#### Using the Direct Keys

- **▲ Sensitivity** p.51
- **▼ White Balance** p.68
- **◄ Flash Mode** p.53
- **► Drive Mode** p.59

---

#### Using the Control Panel

You can set frequently used shooting functions. Press INFO in standby mode.

- Use ▲▼◄► to select an item.
- Use ▲▼ to change settings.
- Press OK to make detailed settings.
- Press MENU to cancel the setting operation.
- Press OK to confirm the selected item and return to the control panel.
Using the Menus

Most functions are set from the menus. The functions that can be set on the control panel can also be set from the menus.

Use \( \text{\textbullet} \) to change the menu category. Use \( \text{\textbullet} \) to switch between menu tabs.

Use \( \text{\textuparrow} \text{\textdownarrow} \) to select an item.

Press \( \text{MENU} \) to exit the menu screen.

Press \( \text{\textuparrow} \) to display the pop-up menu.

Press \( \text{\textuparrow} \text{\textdownarrow} \) to select an item.

Use \( \text{\textuparrow} \text{\textdownarrow} \) to select an item.

Press \( \text{OK} \) to confirm the selected item.

Press \( \text{MENU} \) to return to the previous screen.
Memo

- For the Custom Setting menus (C1-5), you can show the setting screen of the next item in order of the menus on the monitor by turning  while the submenu of the currently selected item is displayed.
- Press [MENU] to display the first tab of the proper menus for the camera settings at that time. To display the menu tab last selected first, set in [25 Save Menu Location] of the C4 menu.
- Settings are returned to their default values with [Reset] of the C3 menu. To reset all the settings in the Custom Setting menus to the defaults, use [Reset Custom Functions] of the C5 menu. (Some settings do not apply.)

</table>
### Attaching the Strap

1. Pass the end of the strap through the strap lug and secure it on the inside of the clasp.

2. Attach the other end in the same manner.

### Attaching a Lens

1. Make sure that the camera is turned off.

2. Remove the body mount cover (①) and lens mount cover (②).
   After removing the cover, be sure to put the lens down with the lens mount side facing upward.

3. Align the lens mount indexes (red dots: ③) on the camera and the lens, and secure by turning the lens clockwise until it clicks.
To remove the lens
Attach the lens cap, and then turn the lens counterclockwise while pressing the lens unlock button (4).

Caution
- When attaching or removing the lens, choose an environment that is relatively free of dirt and dust.
- Keep the body mount cover attached on the camera when a lens is not attached.
- Be sure to attach the lens mount cover and lens cap to the lens after removing it from the camera.
- Do not insert your fingers inside the lens mount of the camera or touch the mirror.
- The camera body and lens mount incorporate lens information contacts. Dirt, dust, or corrosion may damage the electrical system. Please contact your nearest service center for professional cleaning.
- When a retractable lens is attached and is not extended, you cannot take pictures and use some functions. If the lens is retracted during shooting, the camera stops working. Refer to “How to Use a Retractable Lens” (p.40) for details.
- We assume no responsibility nor liability for accidents, damages and malfunctions resulting from the use of lenses made by other manufacturers.

Memo
- Refer to “Functions Available with Various Lenses” (p.113) for details on the functions of each lens.

Using the Battery and Charger
Use the battery D-LI109 and battery charger D-BC109 exclusively developed for this camera.

Charging the Battery
1. Connect the AC plug cord to the battery charger.
2. Plug the AC plug cord into the power outlet.
3 Face the ▲ mark on the battery up, and insert it into the battery charger.
Insert the battery into the battery charger at an angle, and then fit into place.
The indicator lamp is lit while charging and turns off when the battery is fully charged.

Caution
• Do not use the battery charger D-BC109 to charge batteries other than the battery D-LI109. Charging other batteries may cause damage or heating.
• Replace the battery with a new one in the following cases:
  • If the indicator lamp blinks or does not light after the battery is inserted correctly
  • If the battery starts to run down more quickly even after being charged (the battery may have reached the end of its service life)

Memo
• The maximum charging time is approximately 240 minutes (it depends on temperature and remaining battery power).
Charge in a location where the temperature is between 0°C and 40°C (32°F and 104°F).

1 Open the battery cover.
Slide the battery cover unlock lever (①) before opening the cover.
Getting Started

2 Face the ▲ mark on the battery towards the outside of the camera, and insert the battery until it locks into place.
   To remove the battery, push the battery lock lever in the direction of ②.

3 Close the battery cover.

Memo
- The battery level may not be displayed properly if the camera is used at low temperatures or when performing Continuous Shooting for a long time.
- Battery performance temporarily decreases as the temperature decreases. When using the camera in cold climates, have extra batteries at hand and keep them warm in your pocket. Battery performance will return to normal at room temperature.
- Have extra batteries ready when traveling overseas, or taking a lot of pictures.

Using the AC Adapter

We recommend the use of the optional AC adapter kit K-AC128 when using the monitor for a long time or when connecting the camera to a computer or AV device.

1 Make sure that the camera is turned off.

2 Open the battery cover.
   Remove the battery if it is inserted in the camera.

3 Pull out the connection cable cover on the right side of the battery chamber.

4 Insert the DC coupler into the battery chamber.

5 Close the battery cover.
   Make sure that the connection cable comes out from the connection cable opening.
6 Connect the DC coupler and the AC adapter.

7 Connect the AC adapter to the AC plug cord, and plug the cord into the power outlet.

Caution
- Make sure that the camera is turned off before connecting or disconnecting the AC adapter.
- Make sure that connections are secure between the terminals. The memory card or data may be corrupted if the connection to the power supply is lost while the card is being accessed.
- After removing the DC coupler, return the connection cable cover to its original position.
- Be sure to read the manual of the AC adapter kit before using the AC adapter.

Inserting a Memory Card

The following memory cards can be used with this camera.
- SD Memory Card
- SDHC Memory Card
- SDXC Memory Card

In this manual, these cards are referred to as memory cards.

1 Make sure that the camera is turned off.

2 Slide the memory card cover in the direction of ① and then rotate it to open as shown by ②.

3 Insert the card all the way into the memory card slot with the memory card label facing toward the side with the monitor.

Push the memory card in once and release to remove.
4 Rotate the memory card cover as shown by 3, and slide it in the direction of 4.

Caution

• Do not remove the memory card while the card access lamp (orange) is lit.
• If the memory card cover is opened while the power is on, the camera turns off. Do not open the cover while the camera is in use.
• Use this camera to format (initialize) a memory card that is unused or has been previously used on other devices. (p.38)
• Use a high-speed memory card when recording movies. If the write speed cannot keep up with the recording speed, the writing may stop during recording.

How to Open the Monitor

The following procedure explains how to open the monitor with the LCD screen facing inward.

1 Open the monitor 180° horizontally while holding the top and bottom of it.

2 Rotate the monitor 180° forward.
The monitor can also be rotated up to 90° backward.

3 Close the monitor on the camera so that the LCD screen can be seen.
Caution

- To close the monitor with the LCD screen facing inward, rotate the monitor 180° backward in Step 2.
- When the monitor is closed with the LCD screen facing inward, you cannot play back images and display the menus unless the camera is connected to an AV device equipped with an HDMI terminal.
- Do not hold the camera by the monitor or rotate the monitor beyond its movable range.
- Do not carry the camera or put it in a bag with the monitor open. You can carry the camera when the monitor is closed regardless of the LCD screen direction.

Memo

- The items displayed on the monitor rotate according to the direction and angle of the monitor.
- You can take low-angle and high-angle pictures by adjusting the angle of the monitor while it is open horizontally. Also, you can take self-portraits by pointing the lens toward yourself while checking the Live View image on the LCD screen of the monitor facing you. (p.41)

Initial Settings

Turn the camera on and make the initial settings.

Turning the Camera On

1. Turn the main switch to [ON].
   The lamp lights up in green.
   The first time the camera is turned on after purchase, the [Language/言語] screen appears.

Memo

- The power automatically turns off when you do not perform any operations within a set period of time. (Default setting: 1min.) You can change the setting in [Auto Power Off] of the 3 menu. (p.27)
Setting the Display Language

1. Use ▲▼◄► to select the desired language and press OK.
   The [Initial Setting] screen appears in the selected language.
   Proceed to Step 6 if 🏠 (Hometown) does not need to be changed.

2. Press ▼ to move the frame to 🏠 and press ►.
   The [Ｈometown] screen appears.

3. Use ◄► to select a city.
   Use ◄► to change the region.
   Refer to “List of World Time Cities” (p.128) for cities that can be selected as a hometown.

4. Press ▼ to select [DST] (daylight saving time),
   and use ◄► to select ☑ or ☐.

5. Press OK.
   The camera returns to the [Initial Setting] screen.

6. Press ▼ to select [Text Size] and press ►.

7. Use ▲▼ to select [Std.] or [Large], and press OK.
   Selecting [Large] increases the text size of the selected menu items.

8. Press ▼ to select [Settings complete] and press OK.
   The [Date Adjustment] screen appears.

Setting the Date and Time

1. Press ►, and use ▲▼ to select the date format.

2. Press ►, and use ▲▼ to select [24h] or [12h].

3. Press OK.
   The frame returns to [Date Format].

4. Press ◄, and then press ►.
   The frame moves to the month if the date format is set to [mm/dd/yy].
5 Use ▲▼ to set the month. Set the day, year and time in the same manner.

6 Press ▼ to select [Settings complete] and press OK. The [LCD Display] screen appears.

## Setting the LCD Display

1 Use ◀▶ to select a color. Select the display color of the status screen, control panel and menu cursor from colors 1 to 12.

2 Press OK. The camera switches to capture mode and is ready to take a picture.

Memo
- You can change the language, text size, date and time, and LCD display settings from the 1 menu. (p.26)

### Formatting a Memory Card

1 Press MENU. The 1 menu appears.

2 Use ◀ or ▶ to display 4 menu.

4 Press ▲ to select [Format] and press OK. Formatting starts. When formatting is completed, the 4 menu reappears.

5 Press MENU.

Memo
- Do not remove the memory card while formatting, or the card may be damaged.
- Formatting deletes all data, both protected and unprotected.

Memo
- When a memory card is formatted, the volume label “K-S2” is assigned to the card. When the camera is connected to a computer, the memory card is recognized as a removable disk with the name “K-S2.”
Basic Shooting Operation

Take pictures using the Auto Picture (AUTO) mode in which the camera automatically selects the optimal capture mode.

Shooting with the Viewfinder

1. Remove the front lens cap by pushing the top and bottom portions as indicated in the illustration. When a retractable lens is attached, extend the lens before turning the camera on.

   How to Use a Retractable Lens (p.40)

2. Turn the camera on.

3. Set the focus mode switch to AF.

4. Turn the mode dial and align the dial indicator to AUTO.

   The selected capture mode is displayed on the monitor (Guide Display).

   Guide Display settings (p.26)

5. Look through the viewfinder to view the subject.

   When using a zoom lens, turn the zoom ring to the right or left to change the angle of view.
6 Position the subject inside the AF frame and press Shutter halfway.
The focus indicator (📸) appears and you will hear a beep when the subject comes into focus.

7 Press Shutter fully.
The captured image is displayed on the monitor (Instant Review).

Available operations during Instant Review

- 📷 Deletes the image.
- 🕵️ Magnifies the image.
- 📜 Saves the RAW data (only when a JPEG image was taken and the data remains in the buffer).

Memo
- You can use the AF/AEL button to focus on the subject. (p.54)
- You can select whether to make a beep sound and change the sound volume in [Sound Effects] of the 📷1 menu. (p.26)
- You can set the operation and display settings for Instant Review in [Instant Review] of the 📷4 menu. (p.23) When [Display Time] is set to HOLD, Instant Review is displayed until the next operation.

How to Use a Retractable Lens
If the camera is turned on when a retractable lens, such as smc PENTAX-DA L 18-50mm F4-5.6 DC WR RE, is attached and is not extended, an error message is displayed on the monitor. Turn the zoom ring in the direction of ② while pressing the button on the ring (①) to extend the lens. When retracting the lens, turn the zoom ring in the opposite direction to ② while pressing the button on the ring and align the white dot to the position ③.
Shooting While Viewing the Live View Image

1 Press **LV** in Step 5 of “Shooting with the Viewfinder” (p.39).
The Live View image is displayed on the monitor.

Available operations

- **OK**: Magnifies the image.
  Use “d” to change the magnification (up to 10×).
  Use “nw
  ” to change the area to display.
  Press “C
  ” to return the display area to the center.
  Press **OK** to return to 1× image display.

- **LV**: Exits shooting with Live View.

2 Position the subject inside the AF frame on the monitor and press **SHUTTER** halfway.
The AF frame turns green and you will hear a beep when the subject comes into focus.

Subsequent steps are the same as shooting with the viewfinder.

Taking a Self-portrait

You can take self-portraits while checking the Live View image by facing the lens and the LCD screen of the monitor toward yourself.

1 In Step 2 of “Shooting While Viewing the Live View Image” (p.41), open the monitor 180° horizontally.
The self-portrait shutter button lamp lights green.

2 Face both the lens and the LCD screen of the monitor toward yourself.

3 Check the Live View image and press the self-portrait shutter button.
After the picture is taken, Instant Review is displayed until the next operation.
The camera returns to standby mode when the self-portrait shutter button is pressed again.
Caution

• The self-portrait shutter button does not work with a halfway press and needs to be fully pressed down. If the button is pressed when the focus mode is set to AF, a picture is taken after autofocus is performed. Even if the subject is not in focus, the shutter release has priority over focusing the subject and a picture is taken.
• When the self-portrait shutter button can be used for shooting, other button/dial operations are disabled.
• You cannot take pictures using the self-portrait shutter button in the following situations.
  • When the camera is connected to an AV device equipped with an HDMI terminal
  • When is pressed for the first shutter release in a mode requiring two shutter releases, such as in movie recording mode or in bulb exposure mode. (The same button must be used to start and stop shooting.)
• Images cannot be previewed.
• The image cannot be deleted or magnified during Instant Review.
• Do not force the monitor over the maximum viewing angle.
• Keep the monitor closed when not using the camera.

Memo

• Shooting with the self-portrait shutter button is available only when [Self-portrait Shutter Button] of [Button Customization] in the 4 menu is set to [On] (default setting) and the monitor is positioned at the correct angle. (p.100) When the self-portrait shutter button can be used for shooting, the indicator lamp lights green or red and the main switch lamp turns off. At all other times, the self-portrait shutter button functions as the switch to turn the Wi-Fi function on or off. (p.90)
• Self-portraits can also be taken using a drive mode that employs the self-timer or remote control. (p.59)

Reviewing Images

Review the captured image on the monitor.

1 Press  .

The camera enters playback mode and the most recently captured image is displayed (single image display).
2 Review the captured image.

Available operations

<table>
<thead>
<tr>
<th>Action</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>←/↓ to the left</td>
<td>Displays the previous image.</td>
</tr>
<tr>
<td>→/↑ to the right</td>
<td>Displays the next image.</td>
</tr>
<tr>
<td></td>
<td>Deletes the image.</td>
</tr>
<tr>
<td>×/→ to the right</td>
<td>Magnifies the image (up to 16×). Use ▲▼◄► to change the area to display. Press ◼ to return the display area to the center. Press OK to return to the entire image display.</td>
</tr>
<tr>
<td>×/← to the left</td>
<td>Switches to the thumbnail display (p.78).</td>
</tr>
<tr>
<td></td>

<td>Displays the playback mode palette (p.77).</td>
</tr>
</tbody>
</table>

Memo

- When [RAW] is displayed on the monitor, the JPEG image that was just taken can also be saved in RAW format (Save RAW Data).
**Configuring the Capture Settings**

**Image Capture Settings**

Set the file format, recorded pixels, and quality level for still pictures in the control panel or [Image Capture Settings] of the 1 menu.

<table>
<thead>
<tr>
<th>File Format</th>
<th>JPEG, RAW, RAW+</th>
</tr>
</thead>
<tbody>
<tr>
<td>JPEG Recorded Pixels</td>
<td>L, M, S, XS</td>
</tr>
<tr>
<td>JPEG Quality</td>
<td>★★★, ★★, ★</td>
</tr>
<tr>
<td>RAW File Format</td>
<td>PEF, DNG</td>
</tr>
</tbody>
</table>

**Memo**

- When [File Format] is set to [RAW+], a JPEG image and a RAW image with the same file number are saved at the same time.
- [PEF] of [RAW File Format] is a PENTAX original RAW file format.

**Movie Capture Settings**

Set the file format for movies in the control panel or [Movie Capture Settings] of the 1 menu.

**Recorded Pixels**

<table>
<thead>
<tr>
<th>Framerate</th>
</tr>
</thead>
<tbody>
<tr>
<td>FullHD</td>
</tr>
<tr>
<td>HD</td>
</tr>
</tbody>
</table>

**Caution**

- When the drive mode is set to [Interval Movie Record] or [Star Stream], you cannot set the number of recorded pixels and the framerate. Shooting conditions for Interval Movie Record and Star Stream can be changed from [Parameter Adj.] on the Drive Mode screen.
Taking Still Pictures

Select the capture mode that suits the subject and shooting conditions.

The following capture modes are available on this camera.

<table>
<thead>
<tr>
<th>Capture Mode</th>
<th>Application</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO (Auto Picture modes)</td>
<td>Automatically selects the optimal capture mode from (Standard), (Portrait), (Landscape), (Macro), (Moving Object), (Night Scene Portrait), (Sunset), (Blue Sky) or (Forest).</td>
<td>p.39</td>
</tr>
<tr>
<td>SCN (Scene modes)</td>
<td>Offers you various scene modes to choose from.</td>
<td>p.45</td>
</tr>
<tr>
<td>A-HDR (Advanced HDR mode)</td>
<td>Takes three consecutive images using the Clarity Enhancement feature to create a single composite image with them.</td>
<td>p.46</td>
</tr>
<tr>
<td>P/Sv/Tv/Av/ TAv/M/B (Exposure modes)</td>
<td>Allows you to change the shutter speed, aperture value, and sensitivity.</td>
<td>p.47</td>
</tr>
</tbody>
</table>

⚠️ Caution
- The functions that can be set vary depending on the capture mode. Refer to “Restrictions on Each Capture Mode” (p.110) for details.

 نفسه Memo
- You can save frequently used capture modes and settings to U1 and U2 so that you can repeatedly use the same modes and settings. (p.103)

Scene Modes

1. Set the mode dial to SCN.
   The scene mode selection screen appears.

2. Select a scene mode.

<table>
<thead>
<tr>
<th>Scene Modes</th>
<th>Description</th>
</tr>
</thead>
<tbody>

</table>

*1 You can set the value to be changed in [E-Dial Programming] of the 4 menu. (p.100)

*2 [ISO AUTO] is not available.

*3 Fixed to [ISO AUTO].

1. Set the mode dial to the desired exposure mode. or appears on the status screen for the value that can be changed.

   The value that can be changed is underlined in the viewfinder.

   During Live View, appears for the value that can be changed.

2. Turn .

   The aperture value is changed in Av, TA, M, or B mode.

   The sensitivity is changed in Sv mode.

3. Turn .

   The shutter speed is changed in Tv, TA, or M mode.
Memo

- The settings for exposure can be specified in increments of 1/3 EV steps. In [1 EV Steps] of the C1 menu, you can change the adjustment steps to 1/2 EV steps.
- The correct exposure may not be obtained with the selected shutter speed and aperture value when the sensitivity is set to a certain sensitivity.
- In M mode, the difference from the correct exposure is displayed on the EV bar scale while exposure is adjusted.
- In B mode, some functions are not available. (p.110)
- For each exposure mode, you can set the camera operation for when or is turned or is pressed. Set in [E-Dial Programming] of the 4 menu. (p.100)
- When shooting with a low shutter speed, you can reduce image noise from the control panel or [Slow Shutter Speed NR] of the 2 menu.

<table>
<thead>
<tr>
<th>Auto</th>
<th>Applies Noise Reduction according to the shutter speed, sensitivity, and internal temperature of the camera.</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Applies Noise Reduction when the shutter speed is slower than 1 second.</td>
</tr>
<tr>
<td>Off</td>
<td>Does not apply Noise Reduction at any shutter speed.</td>
</tr>
</tbody>
</table>

EV Compensation

The compensation value can be set between -5 and +5 EV (-2 and +2 EV in mode).

1. Press , and then turn .

and the compensation value are displayed on the status screen, Live View screen, and in the viewfinder during adjustment.

Available operations

- Starts/ends adjusting the compensation value.
- Resets the adjustment value to the default setting.

Memo

- Bracketing shooting enables you to take pictures while automatically changing exposure. (p.62)

Checking the Depth of Field (Preview)

When [Optical Preview] or [Digital Preview] is assigned to in [RAW/Fx Button] of [Button Customization] in the 4 menu, you can check the depth of field before taking pictures. (p.100)
Locking the Exposure
To lock the exposure before shooting, use the AE Lock function. This function can be used by assigning [AE Lock] to the A/F/AE-L button. (p.100)

1 Turn the main switch to .

The indicator lamp lights red and the Live View image is displayed.

2 Set the mode dial to the desired capture mode.
The following settings are available depending on the capture mode.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Av/TAv/M</td>
<td>The camera operates in the selected exposure mode. (The aperture value can be changed only before shooting. When set to M mode, the sensitivity can also be changed.)</td>
</tr>
<tr>
<td>U1/U2</td>
<td>The camera operates according to the saved exposure mode.</td>
</tr>
<tr>
<td>Other modes</td>
<td>The camera operates in P mode.</td>
</tr>
</tbody>
</table>

3 Focus on the subject.
In AF mode, press SHUTTER halfway.

Recording Movies

Sound

Recordable Time
4 Press SHUTTER fully.
Movie recording starts.
In the upper left area of the monitor, “REC” blinks and the size of the recorded movie file is displayed.

5 Press SHUTTER fully again.
Movie recording stops.

6 Return the main switch to the [ON] position to exit C mode.
The camera returns to shooting with the viewfinder in A mode.

⚠️ Caution
- When recording a movie with sound, the camera operation sounds are also recorded.
- When recording a movie with an image processing function such as Digital Filter applied, the movie file may be saved with some frames omitted.
- If the internal temperature of the camera becomes high during recording, the recording may be terminated.
- When a retractable lens is attached, recording stops if the lens is retracted during recording and an error message is displayed.
- When the camera enters C mode, the Wi-Fi function is disabled.

Memo
- You can change the settings for recording a movie from the control panel or the 1 menu. (p.25)
- The sound level for recording a movie can be set from the control panel or [Recording Sound Level] of the 1 menu. When [Manual] is selected, [Volume] can be set from 0 to 20.
- You can record a movie continuously up to 4 GB or 25 minutes. When the memory card is full, recording stops.

Using a Microphone
You can connect a commercially available stereo microphone to the microphone terminal on the camera. Using an external microphone can also help to reduce the possibility of recording camera operation sounds.
The following specifications are recommended for external microphones.

<table>
<thead>
<tr>
<th>Plug</th>
<th>Stereo mini plug (Ø3.5 mm)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Format</td>
<td>Stereo electret condenser</td>
</tr>
<tr>
<td>Power</td>
<td>Plug-in Power Method (operating voltage of 2.0 V or lower)</td>
</tr>
<tr>
<td>Impedance</td>
<td>2.2 kΩ</td>
</tr>
</tbody>
</table>

If the external microphone is disconnected during recording, no sound is recorded.
Playing Back Movies

1 Display the movie to play back in single image display of the playback mode.

Available operations

<p>| | |</p>
<table>
<thead>
<tr>

<td>Switches between [Standard Information Display] and [No Information Display].</td>
</tr>
</tbody>
</table>

Memo

- In [Movie Edit] of the playback mode palette, a movie file can be divided into multiple segments or selected frames can be deleted. (p.86)

Setting the Exposure

Sensitivity

1 Press ▲ in standby mode.

2 Use ▲▼ to select an item.

<table>
<thead>
<tr>
<th>ISO</th>
<th>Sets the range to be adjusted automatically. Both the upper limit and lower limit can be changed.</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO</td>
<td>100-3200</td>
</tr>
</tbody>
</table>

| ISO | Sets a fixed value from ISO 100 to ISO 51200. |

3 Use ⬤ or ⬥ to change the value.

4 Press OK.  The camera returns to standby mode.

Memo

- In [Rec] mode, the sensitivity can be set from ISO 100 to ISO 3200.
- The adjustment steps for ISO sensitivity is 1 EV step. To adjust the sensitivity in accordance with the EV step setting for exposure, set from [2 Sensitivity Steps] of the C1 menu.
Noise Reduction when Shooting with a High ISO Sensitivity

You can select the desired Noise Reduction setting when shooting with a high ISO sensitivity in the control panel or [High-ISO NR] of the 2 menu.

<table>
<thead>
<tr>
<th>Noise Reduction Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>Applies Noise Reduction at optimally calculated levels throughout ISO range.</td>
</tr>
<tr>
<td>Low/Medium/High</td>
<td>Applies Noise Reduction at constant chosen level throughout ISO range.</td>
</tr>
<tr>
<td>Custom</td>
<td>Applies Noise Reduction at user-defined levels for each ISO setting.</td>
</tr>
<tr>
<td>Off</td>
<td>Does not apply Noise Reduction at any shutter speed.</td>
</tr>
</tbody>
</table>

When [Custom] is selected, the noise reduction level can be set according to the ISO sensitivity value in the 2 menu.

AE Metering

Choose the part of the sensor to use for measuring brightness and determining exposure.
Set in the control panel or [AE Metering] of the 1 menu.

<table>
<thead>
<tr>
<th>AE Metering Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Multi-segment</td>
<td>Meters the brightness in multiple different zones of the sensor. In backlit conditions, this mode automatically adjusts exposure.</td>
</tr>
<tr>
<td>Center-weighted</td>
<td>Meters the brightness with an emphasis on the center of the sensor. The sensitivity increases at the center and no automatic adjustment is performed even in backlit conditions.</td>
</tr>
<tr>
<td>Spot</td>
<td>Meters the brightness only within a limited area at the center of the sensor. Useful when the subject is small.</td>
</tr>
</tbody>
</table>

Memo
- In [5 Link AE and AF Point] of the 1 menu, the metering point and the AF point can be linked.
# Using the Built-in Flash

1. **Press \( \downarrow \) in standby mode.**

2. **Select a flash mode.**

![Auto Flash Discharge](image)

| \( A \) | Auto Flash Discharge | Automatically measures the ambient light and determines whether to use the flash. |
| \( A + \) | Auto Flash + Red-eye Reduction | Discharges a pre-flash for red-eye reduction before an automatic flash. |
| \( @ \) | Flash On | Discharges a flash for each picture. |
| \( @ + \) | Flash On + Red-eye Reduction | Discharges a pre-flash for red-eye reduction before the main flash and discharges a flash for each picture. |
| \( S \) | Slow-speed Sync | Sets to a slow shutter speed and discharges a flash for each picture. Use this, for example, when shooting a portrait with the sunset in the background. |
| \( S + \) | Slow-speed Sync + Red-eye | Discharges a pre-flash for red-eye reduction before the main flash is discharged with Slow-speed Sync. |
| \( T \) | Trailing Curtain Sync | Discharges a flash immediately before closing the shutter. Sets to a slow shutter speed. Captures moving objects as if they are leaving a light trail behind them. |
| \( M \) | Manual Flash Discharge | Sets the amount of flash discharge between FULL and 1/128 power. |

### Available operations

- **\( \bigcirc \)** Compensates the flash exposure. Selects the amount of flash discharge (when [Manual Flash Discharge] is selected).
- **\( \bigcirc \)** Resets the compensation value to the default setting.

3. **Press \( \bigcirc \).**
   The camera returns to standby mode.

4. **Press \( \bigcirc \).**
   The built-in flash is popped up.

**Memo**

- The flash modes that can be selected vary depending on the capture mode.

<table>
<thead>
<tr>
<th>Capture Mode</th>
<th>Selectable Flash Mode</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO, SCN*</td>
<td>( A, A +, A, A + )</td>
</tr>
<tr>
<td>P, Sv, Av</td>
<td>( S, S +, S, S +, S )</td>
</tr>
<tr>
<td>Tv, TAv, M, B</td>
<td>( S, S +, S, S + )</td>
</tr>
</tbody>
</table>

The built-in flash cannot be used for some SCN modes and for A-HDR mode. (p.110)
- You cannot take pictures while the built-in flash is being charged. If you want to take pictures while charging the flash, set [22 Release While Charging] in the C4 menu.
- Depending on the lens being used, the use of the built-in flash may be limited. (p.114)
• When the built-in flash is used in Av mode, the shutter speed automatically changes over a range from 1/180 seconds to a slow shutter speed depending on the lens being used. The shutter speed is locked at 1/180 seconds when a lens other than a DA, DA L, D FA, FA J, FA or F lens is used.
• When the built-in flash is used in Tv, TAv or M mode, any desired shutter speed of 1/180 seconds or slower can be set.
• The built-in flash is optimum for a subject at a distance from approx. 0.7 m to 5 m. Vignetting may occur when used at a distance closer than 0.7 m (this distance varies slightly depending on the lens being used and the sensitivity setting).

<table>
<thead>
<tr>

<td>ISO 51200</td>
<td>Approx. 272</td>
</tr>
</tbody>
</table>

• For details on the use of external flashes, refer to “Functions when Using an External Flash” (p.116).

### Setting the Focus Method

Set the focus mode switch to AF or MF.

The autofocus method for shooting with the viewfinder differs from that for shooting with Live View.

<table>
<thead>
<tr>
<th>Shooting with the viewfinder</th>
<th>Shooting with Live View</th>
</tr>
</thead>
<tbody>
<tr>
<td>TTL phase-matching autofocus: Select from AFS, AFC, or AFA mode which enables automatically switching between AFS and AFC. (p.55) Set the focusing area in [AF Active Area]. (p.56) Faster autofocus performance than the contrast detection AF is possible.</td>
<td>Contrast detection AF: Face Detection and Tracking are available. (p.57)</td>
</tr>
</tbody>
</table>

**Memo**

- You can use the AF/AE-L button to focus on the subject. The AF/AE-L button operation can be set in [Button Customization] of the 4 menu. (p.100)
Setting the AF Mode when Shooting with the Viewfinder

1 Press **INFO** in standby mode.

2 Select [AF Mode] and press **OK**. The [AF Mode] screen appears.

3 Select an autofocus mode and press **OK**.

4 Press **MENU**. The camera returns to standby mode.

**Memo**
- The following settings for autofocus operation can be set in the **C3** menu.

<table>
<thead>
<tr>
<th>17 AF.S Setting</th>
<th>Focus-priority, Release-priority</th>
</tr>
</thead>
<tbody>
<tr>
<td>18 1st Frame Action in AF.C</td>
<td>Release-priority, Auto, Focus-priority</td>
</tr>
<tr>
<td>19 Action in AF.C Continuous</td>
<td>Focus-priority, Auto, FPS-priority</td>
</tr>
<tr>
<td>20 Hold AF Status</td>
<td>Off, Low, Medium, High</td>
</tr>
</tbody>
</table>

In [20 Hold AF Status], you can set whether to immediately reactivate autofocus or to maintain the focus for a certain amount of time before reactivating autofocus when the subject happens to move out of the selected focusing area after being focused. The default setting is to immediately reactivate autofocus when the subject moves out of focus.

- In **SCN** mode, [AF Mode] is fixed to **AF.S** or **AF.C** depending on the selected scene mode. (p.110)
- In **AUTO** mode, [AF Mode] is fixed to **AF.A**.

<table>
<thead>
<tr>
<th>AF/A Auto-select mode</th>
<th>Switches automatically between <strong>AF.S</strong> and <strong>AF.C</strong> modes according to the subject.</th>
</tr>
</thead>
<tbody>
<tr>
<td>AF.S Single mode</td>
<td>When <strong>SHUTTER</strong> is pressed halfway and the subject comes into focus, the focus is locked at that position. The AF assist light turns on as necessary.</td>
</tr>
<tr>
<td>AF.C Continuous mode</td>
<td>The subject is kept in focus by continuous adjustment while <strong>SHUTTER</strong> is pressed halfway. <strong>○</strong> appears in the viewfinder when the subject comes into focus. The shutter can be released even if the subject is not in focus.</td>
</tr>
</tbody>
</table>

The control panel reappears.
### Selecting the Focusing Area (AF Point)

1. **Press INFO** in standby mode.

2. **Select [AF Active Area] and press OK.** The [AF Active Area] screen appears.

3. **Select the desired focus point selection mode and press OK.**

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Auto (11 AF Points)</strong></td>
<td>Out of the 11 AF points, the camera automatically selects the optimum focusing area.</td>
</tr>
<tr>
<td><strong>Auto (5 AF Points)</strong></td>
<td>Out of the 5 AF points, the camera automatically selects the optimum focusing area.</td>
</tr>
<tr>
<td><strong>Select</strong></td>
<td>Sets the focusing area to the user selected point from 11 points.</td>
</tr>
<tr>
<td><strong>Expanded Area AF</strong></td>
<td>Sets the focusing area to the user selected point from 11 points. When the subject happens to move out of the selected focusing area after being focused, 8 peripheral points are used as back-up points. Not available in AF.S mode.</td>
</tr>
<tr>
<td><strong>Spot</strong></td>
<td>Sets the focusing area to the center of the 11 points.</td>
</tr>
</tbody>
</table>

The control panel reappears.

4. **Press MENU.** The camera returns to standby mode. If you selected AF or 8 in Step 3, proceed to Step 5.

5. **Select the desired AF point.**

#### Available operations

<table>
<thead>
<tr>
<th>Operation</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>▲ ▼ ◄ ►</td>
<td>Changes the AF point.</td>
</tr>
<tr>
<td>OK</td>
<td>Returns the AF point to the center.</td>
</tr>
</tbody>
</table>

Press and hold OK switches the function of the arrow keys (▲ ▼ ◄ ►) to the Change AF Point mode or the direct key operation.

#### Memo

- When AF or 8 is selected, the OK lamp lights up.
- The AF point can also be changed from [AF Active Area] of [AF Settings] in the 1 menu.
- You can also set the camera so that switching to the Change AF Point mode by pressing and holding OK can be operated with RAW/FS. (p.100)
Setting the AF Mode during Live View

1 Press INFO in standby mode in Live View.
2 Select [Contrast AF] and press OK.
The [Contrast AF] screen appears.
3 Select an autofocus mode and press OK.

Press MENU.
The camera returns to standby mode.
If you selected or in Step 3, proceed to Step 5.

5 Press and hold OK.

6 Select the AF area.
Use the frame that appears on the monitor to change the position and size of the AF area.

Available operations

Changes the position of the AF area.
Increases/reduces the size of the AF area (when is selected).
Returns the AF area to the center.

7 Press OK.
The AF area is set.

Caution
- When is selected, the focus lock operation (composition adjustment with the half press of SHUTTER) does not work.

Memo
- When or is selected, the OK lamp lights up.
- The setting can also be changed from [Contrast AF] of [Live View] in the menu.
- The autofocus mode is fixed to in AUTO mode and , , and of SCN mode.
- When [Focus Peaking] is set to [On] in the control panel or [Live View] of the menu, the outline of the subject in focus is emphasized and makes it easier to check the focus. This function works in both AF and MF modes.

### Table: AF Mode Options

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Face Detection</td>
<td>Detects and tracks faces of people. The main face detection frame for AF and AE is displayed in yellow.</td>
</tr>
<tr>
<td>Tracking</td>
<td>Tracks the subject in focus. The shutter can be released even if the subject is not in focus.</td>
</tr>
<tr>
<td>Multiple AF Points</td>
<td>Sets the focusing area to the desired area. The sensor is divided into 35 areas (7 horizontal by 5 vertical), and you can select a wider or narrower focusing area by using 35, 25, 15, 9, or just 1 of those 35 areas available.</td>
</tr>
<tr>
<td>Select</td>
<td>Sets the focusing area by the pixel.</td>
</tr>
<tr>
<td>Spot</td>
<td>Sets the focusing area to a limited area at the center.</td>
</tr>
</tbody>
</table>

The control panel reappears.
AF Fine Adjustment  
C4

You can precisely fine tune your lenses with the camera’s autofocus system.

1 Select [27 AF Fine Adjustment] in C4 menu and press .
   The [27 AF Fine Adjustment] screen appears.

2 Select [Apply All] or [Apply One] and press OK.

| Apply All | Applies the same adjustment value to all lenses. |
| Apply One | Saves an adjustment value for the lens being used. (Up to 20 values) |

3 Select [Setting] and adjust the value.

Available operations

| ▶/◀ to the right | Adjusts the focus to a closer position. |
| ▶/◀ to the left | Adjusts the focus to a farther position. |
| M | Resets the adjustment value to the default setting. |

4 Press OK.
   The adjustment value is saved.

5 Press MENU twice.
   The camera returns to standby mode.
## Setting the Drive Mode

You can choose from the following drive modes.

<table>
<thead>
<tr>
<th>Drive Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Single Frame Shooting</strong></td>
<td>- Normal capture mode</td>
</tr>
<tr>
<td><strong>Continuous Shooting</strong></td>
<td>- Continuously takes pictures while <strong>SHUTTER</strong> is kept pressed. (p.60)</td>
</tr>
<tr>
<td><strong>Self-timer</strong></td>
<td>- Releases the shutter about 12 seconds or 2 seconds after <strong>SHUTTER</strong> is pressed. (p.60)</td>
</tr>
<tr>
<td><strong>Remote Control</strong></td>
<td>- Enables shooting with remote control. (p.61)</td>
</tr>
<tr>
<td><strong>Bracketing</strong></td>
<td>- Takes three consecutive pictures at different exposure levels. (p.62)</td>
</tr>
<tr>
<td><strong>Multi-exposure</strong></td>
<td>- Creates a composite image by taking multiple pictures and merging them into a single image. (p.63)</td>
</tr>
<tr>
<td><strong>Interval Shooting</strong></td>
<td>- Automatically takes pictures at a set interval from a set time. (p.64)</td>
</tr>
<tr>
<td><strong>Interval Composite</strong></td>
<td>- Takes pictures at a set interval from a set time and merges them into a single image. (p.65)</td>
</tr>
<tr>
<td><strong>Interval Movie Record</strong></td>
<td>- Takes pictures at a set interval from a set time and saves them as a single movie file. (p.66)</td>
</tr>
</tbody>
</table>

### Caution
- There are restrictions on some drive modes when used in some capture modes or in combination with some other functions. (p.110)

### Memo
- In ** mode, Remote Control († only), Interval Movie Record, and Star Stream can be selected.
- The Drive Mode setting is saved even after the power is turned off. If [Drive Mode] is set to [Off] in [Memory] of the ** menu, the setting returns to [Single Frame Shooting] when the power is turned off. (p.105)
- The Shake Reduction function is automatically turned off when the drive mode that employs self-timer or remote control is selected.
- When the drive mode that employs the self-timer or remote control is selected, exposure may be affected by the light entering through the viewfinder. In such a case, use the AE Lock function. (p.49)

### Star Stream
- Takes pictures at a set interval from a set time and saves them as a single movie file using the Bright composite mode of Interval Composite. (p.67)
Continuous Shooting

1. Press ► in standby mode. The Drive Mode screen appears.

2. Select ➩ and press ▼.

3. Use ◄ to select ➩ or ➩, and press OK.

   - Continuously takes pictures at high speed.
   - Continuously takes pictures at low speed.

The camera returns to standby mode.

Memo
• When [AF Mode] is set to AFS, the focus position is locked in the first frame.

Self-timer

1. Press ► in standby mode. The Drive Mode screen appears.

2. Select ◇ and press ▼.

3. Use ◄ to select ◇, ◇, or ◇.

   - Releases the shutter after about 12 seconds.
   - Releases the shutter after about 2 seconds.
   - Continuously takes pictures. (The shutter is released after about 12 seconds.)

Proceed to Step 7 when ◇ or ◇ is selected.

4. Press INFO.

5. Use ◄ to set [Shooting Speed] and [Number of Shots].

6. Press OK.
   The screen of Step 2 reappears.

7. Press OK.
   The camera returns to standby mode.

8. Press SHUTTER halfway, and then fully.
   The shutter is released after about 12 seconds or 2 seconds.
Remote Control

1 Press ► in standby mode.
The Drive Mode screen appears.

2 Select ▼ and press ▼.

3 Use ◄ to select ▼, ▼, or ▼.

| ▼      | Releases the shutter after about 3 seconds. |
| ▼      | Continuously takes pictures.                |

Proceed to Step 7 when ▼ or ▼ is selected.

4 Press INFO.

5 Use ◄ to set [Shooting Speed].

6 Press OK.
The screen of Step 2 reappears.

7 Press OK.
The camera returns to standby mode.

8 Press SHUTTER halfway.

9 Point the remote control unit towards the remote control receiver on the front of the camera, and press the shutter release button on the remote control unit.

Memo
- The maximum operating distance of the remote control unit is approx. 4 m from the front of the camera.
- To adjust focus with remote control, set in [21 AF with Remote Control] of the C3 menu.
- When using the Remote Control Waterproof O-RC1, the autofocus system can be operated with the ▼ button on the remote control unit. The Fn button cannot be used.
Bracketing

1. Press \( \uparrow \) in standby mode. The Drive Mode screen appears.

2. Select \( \downarrow \) and press \( \downarrow \).

3. Use \( \uparrow \downarrow \) to select \( \uparrow \), \( \downarrow \), or \( \downarrow \).

   \( \uparrow \) Takes pictures with the self-timer.
   \( \downarrow \) Takes pictures with remote control.

   Proceed to Step 7 when \( \downarrow \) is selected.

5. Use \( \uparrow \downarrow \) to select the operation mode.

7. Set the bracket value.

   **Available operations**
   - Changes the bracket value (up to ±3 EV).
   - Adjusts the exposure compensation value.
   - Resets the compensation value to the default setting.

8. Press OK . The camera returns to standby mode.

9. Take three pictures.
   After three pictures are taken, the camera returns to standby mode in Step 8.

**Memo**
- The bracket value can be set in increments of 1/3 EV steps or 1/2 EV steps according to the [1 EV Steps] setting of the \( C1 \) menu.
- The following settings for the Bracketing can be set in the \( C2 \) menu.

<table>
<thead>
<tr>
<th>8 Bracketing Order</th>
<th>Changes the shooting order of the three pictures.</th>
</tr>
</thead>
<tbody>
<tr>
<td>9 One-Push Bracketing</td>
<td>Takes all three pictures with one release of the shutter.</td>
</tr>
</tbody>
</table>
Multi-exposure

1 Press ▲ in standby mode.  
The Drive Mode screen appears.

2 Select ▼ and press ▼.

3 Use ◀ ◀ to select ▼, ▼, ▼, or ▼.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>▼</td>
<td>Continuously takes pictures.</td>
</tr>
<tr>
<td>▼</td>
<td>Takes pictures with the self-timer.</td>
</tr>
<tr>
<td>▼</td>
<td>Takes pictures with remote control.</td>
</tr>
</tbody>
</table>

Proceed to Step 7 if you do not need to change the shooting conditions.

4 Press INFO.

5 Set the shooting conditions.

6 Press OK.

The screen of Step 2 reappears.

7 Press OK.

The camera returns to standby mode.

8 Shoot.

Instant Review is displayed.

Available operations during Instant Review

- Discards pictures taken up to that point and takes pictures again from the first picture.
- Saves pictures taken up to that point and displays the ◀ menu.

After the specified number of shots are taken, the camera returns to standby mode in Step 7.

Memo

- Composite images are created as follows in each Composite Mode.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Average</td>
<td>Creates a composite image with the average exposure.</td>
</tr>
<tr>
<td>Additive</td>
<td>Creates a composite image with the cumulatively added exposure.</td>
</tr>
<tr>
<td>Bright</td>
<td>Creates a composite image replacing only the portions that are brighter compared with the first image.</td>
</tr>
</tbody>
</table>
### Interval Shooting

1. **Press ➤ in standby mode.**  
The Drive Mode screen appears.

2. **Select INT and press ▼.**

3. **Use ◀▶ to select INT, INT0, or INT1.**

<table>
<thead>
<tr>
<th>INT0</th>
<th>Takes pictures with the self-timer.</th>
</tr>
</thead>
<tbody>
<tr>
<td>INT1</td>
<td>Takes pictures with remote control.</td>
</tr>
</tbody>
</table>

Proceed to Step 7 if you do not need to change the shooting conditions.

4. **Press INFO.**

5. **Set the shooting conditions.**

<table>
<thead>
<tr>
<th>Interval</th>
<th>Select from 2 seconds to 24 hours.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standby Interval</td>
<td>Select from the minimum time or 1 second to 24 hours.</td>
</tr>
<tr>
<td>Number of Shots</td>
<td>Select from 2 to 2000 times.</td>
</tr>
<tr>
<td>Start Interval</td>
<td>Select whether to take the first picture now or at a set time.</td>
</tr>
<tr>
<td>Start Time</td>
<td>Set the shooting start time when [Start Interval] is set to [Set Time].</td>
</tr>
<tr>
<td>Self-timer/Remote Control</td>
<td>Select the operation mode.</td>
</tr>
</tbody>
</table>

6. **Press OK.**  
The screen of Step 2 reappears.

7. **Press OK.**  
The camera returns to standby mode.

8. **Shoot.**

   When [Start Interval] is set to [Now], the first picture is taken. When set to [Set Time], shooting starts at the set time.  
   To cancel shooting, press MENU in standby mode.  
   After the specified number of shots are taken, the camera returns to standby mode in Step 7.
Memo

- A new folder is created when Interval Shooting is performed, and the captured images are saved there. When shooting in another drive mode after performing Interval Shooting, another new folder is created.
- The shortest time that can be set for [Interval] is 5 seconds for [Digital Filter] and [Clarity Enhancement], and 10 seconds for [HDR Capture] and A-HDR mode.
- For Interval Shooting, Interval Composite, and Interval Movie Record, the second and later exposures start at the interval set in [Interval]. If the exposure time is longer than the time set in [Interval], some of the pictures that are supposed to be taken at the set interval are not actually taken. For example, if the time set in [Interval] is 2 seconds and the exposure time is 3 seconds, the first exposure has not yet finished at the time the second exposure is supposed to be started (2 seconds after shooting has started), and so the second picture is not taken. As a result, Interval Shooting ends before the specified number of shots are taken. In such cases, you can set [Standby Interval] in [10 Interval Shooting Options] of the C2 menu so that pictures are taken at the set interval after each exposure ends. The screen displayed in Step 5 varies depending on the [10 Interval Shooting Options] setting.
- For Interval Shooting and Interval Composite, the focus position used when the first picture is taken is locked. When performing autofocus for each exposure, set [11 AF in Interval Shooting] to [Adjusts focus for each shot] in the C2 menu.

Interval Composite

Star and moon trails can be captured in one image.

1 Press ► in standby mode.
The Drive Mode screen appears.

2 Select INT and press ▼.

3 Use ◀ to select INT, INT, or INT.

<table>
<thead>
<tr>
<th>INT</th>
<th>Takes pictures with the self-timer.</th>
</tr>
</thead>
</table>
| INT | Takes pictures with remote control.

Proceed to Step 7 if you do not need to change the shooting conditions.

4 Press INFO.

5 Set the shooting conditions.
Shooting

6 Press OK.
The screen of Step 2 reappears.

7 Press OK.
The camera returns to standby mode.

8 Shoot.
When [Start Interval] is set to [Now], the first picture is taken. When set to [Set Time], shooting starts at the set time. To cancel shooting, press MENU in standby mode. After the specified number of shots are taken, the camera returns to standby mode in Step 7.

Memo
- When [Save Process] is set to , a new folder is created and the composite image is saved there. When shooting in another drive mode after performing Interval Composite, another new folder is created.
- Mount the camera on a tripod during shooting.

<table>
<thead>
<tr>
<th>Interval</th>
<th>Select from 2 seconds to 24 hours.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standby Interval</td>
<td>Select from the minimum time or 1 second to 24 hours.</td>

</tbody>
</table>

Interval Movie Record

In mode, you can use [Interval Movie Record] to take still pictures at a set interval from a set time and save them as a single movie file (Motion JPEG, file extension: .AVI).

1 Turn the main switch to and press .
The Drive Mode screen appears.

2 Select INT and press .

3 Use to select INT, INT, or INT .

| INT  | Records a movie with the self-timer. |
| INT  | Records a movie with remote control. |

Proceed to Step 7 if you do not need to change the shooting conditions.

4 Press INFO .

5 Set the shooting conditions.
**Star Stream**

In 🎥 mode, you can use [Star Stream] to take still pictures at a set interval from a set time and save them as a single movie file (Motion JPEG, file extension: .AVI) using the Bright composite mode of Interval Composite.

Star and moon trails can be captured as a movie file.

1. **Turn the main switch to 🎬 and press ▶.**
   The Drive Mode screen appears.

2. **Select 📷 and press ▼.**

3. **Use ◀▶ to select 📷, 📷, or 📷.**
   - 📷 Records a movie with the self-timer.
   - 📷 Records a movie with remote control.

   Proceed to Step 7 if you do not need to change the shooting conditions.

4. **Press INFO.**

5. **Set the shooting conditions.**

---

**Caution**
- [Movie SR] is fixed to [Off].
- [Recording Sound Level] is fixed to [Mute].

**Memo**
- The shortest time that can be set for [Interval] is 5 seconds for [Digital Filter] and [Clarity Enhancement], and 10 seconds for [HDR Capture].
Press \textbf{OK}.
The screen of Step 2 reappears.

Press \textbf{OK}.
The camera returns to standby mode.

Shoot.
When [Start Interval] is set to [Now], the first picture is taken. When set to [Set Time], shooting starts at the set time. To cancel shooting, press \textbf{MENU} in standby mode. After the specified number of shots are taken, the camera returns to standby mode in Step 7.

\textbf{Caution}
- [Movie SR] is fixed to [Off].
- [Recording Sound Level] is fixed to [Mute].

\textbf{Memo}
- The camera operates in \textbf{M} mode regardless of the mode dial setting.
- Mount the camera on a tripod during shooting.
Available operations when shooting with the viewfinder

- [ ] Selects the type of [Fluorescent].
- [ ] Uses Digital Preview to preview the background image with the white balance setting applied.
- [ ] Saves the preview image (only when the image can be saved).

Proceed to Step 5 if you do not need to fine-tune the white balance.

3 Press [INFO].
The fine-tuning screen appears.

Available operations

- ▲▼ Adjust: Green-Magenta
- ◄► Adjust: Blue-Amber
- ◀ Reset: Resets the adjustment value to the default setting.

4 Press [OK].
The screen of Step 2 reappears.

5 Press [OK].
The camera returns to standby mode.

⚠️ Caution
- The Digital Preview operation in Step 2 cannot be performed when the drive mode is set to [Multi-exposure], [Interval Shooting], or [Interval Composite].

🔍 Memo
- When [ ] is set, even if various light sources are present at the shooting location, the camera automatically adjusts the white balance according to the light source of each area. ([ ] is not available in [ ] mode.)
- The following settings for the white balance can be set in the [C]2-3 menus.

<table>
<thead>
<tr>
<th>12 WB Adjustable Range</th>
<th>Fixed, Auto Adjustment</th>
</tr>
</thead>
<tbody>
<tr>
<td>13 WB When Using Flash</td>
<td>Auto White Balance, Multi Auto White Balance, Flash, Unchanged</td>
</tr>
<tr>
<td>14 AWB in Tungsten Light</td>
<td>Strong Correction, Subtle Correction</td>
</tr>
<tr>
<td>15 Color Temperature Steps</td>
<td>Kelvin, Mired</td>
</tr>
</tbody>
</table>
**Adjusting the White Balance Manually**

You can measure the white balance at a selected location.

1. **Select**  in Step 2 of “Setting the White Balance” (p.68).

2. **Under the light you wish to measure the white balance of, select a white area as the subject, and press** SHUTTER **fully.**
   The captured image is displayed.

3. **Use** ▲▼◄► **to specify the measuring area.**
   Press 0 to return the measuring area to the center.

4. **Press** OK .
   The White Balance setting screen reappears.
   [The operation could not be completed correctly] appears when measuring is unsuccessful. Press OK to remeasure the white balance and return to Step 3.

**Memo**

- You can copy the white balance settings of a captured image and save them as manual white balance settings in [Save as Manual WB] of the playback mode palette. (p.77)

---

**Adjusting the White Balance with Color Temperature**

Specify the white balance with the color temperature.

1. **Select** K in Step 2 of “Setting the White Balance” (p.68).

2. **Press** INFO .

3. **Adjust the color temperature.**
   Set the color temperature value within the range from 2500K to 10000K.

   **Available operations**
   - **Changes the color temperature in increments of 100 Kelvin.**
   - **Changes the color temperature in increments of 1000 Kelvin.**
   - **Fine-tunes the color temperature.**

4. **Press** OK .
   The White Balance setting screen reappears.

**Memo**

- Select [Mired] in [15 Color Temperature Steps] of the C3 menu to set the color temperature in mired units. The color temperature can be changed in 20 mired units with , and 100 mired units with . However, figures are converted to and displayed in Kelvin.
Controlling the Image Finishing Tone

When you want to take pictures with a slightly different style, you can set the desired picture style before shooting. Try out the various settings, and find your best picture style.

Custom Image

1. Select [Custom Image] in the control panel, and press OK.
   The Custom Image setting screen appears.

2. Select an image finishing tone.

<table>
<thead>
<tr>
<th>Bright</th>
<th>Muted</th>
</tr>
</thead>
<tbody>
<tr>
<td>Natural</td>
<td>Bleach Bypass</td>
</tr>
<tr>
<td>Portrait</td>
<td>Reversal Film</td>
</tr>
<tr>
<td>Landscape</td>
<td>Monochrome</td>
</tr>
<tr>
<td>Vibrant</td>
<td>Cross Processing</td>
</tr>
</tbody>
</table>

   Available operations when shooting with the viewfinder

   - [RAW/Fx] Uses Digital Preview to preview the background image with the selected setting applied.
   - [ ] Saves the preview image (only when the image can be saved).

   Proceed to Step 6 if you do not need to change the parameters.

3. Press INFO.
   The parameter setting screen appears.

4. Set the parameters.

   Available operations

   - ![Selects a parameter.](image)
   - ![Adjusts the value.](image)
   - ![Switches between [Sharpness] and [Fine Sharpness]. (Not available in 📷 mode)](image)
   - ![Resets the adjustment value to the default setting.](image)

5. Press OK.
   The screen of Step 2 reappears.
6 **Press OK.**
The control panel reappears.

7 **Press MENU.**
The camera returns to standby mode.

⚠️ **Caution**
- This function is not available when in AUTO or SCN mode.
- The Digital Preview operation in Step 2 cannot be performed when the drive mode is set to [Multi-exposure], [Interval Shooting], or [Interval Composite].

### Saving the Cross Processing Settings of a Captured Image

The outcome of Cross Processing varies each time a picture is taken. If you take a cross processed image that you like, you can save the Cross Processing settings used in the image so that you can repeatedly use the same settings.

1 **Press ▼ in single image display of playback mode.**
The playback mode palette appears.

2 **Select the Favorite number 1, 2 or 3 to save the settings, and press OK.**
The settings of the selected image are saved as your “Favorite” settings.

### Memo
- The saved Cross Processing settings can be loaded by selecting [Cross Processing] in Step 2 of “Custom Image” (p.71), and selecting one of the Favorite settings 1 to 3 for the parameter.
Digital Filter

1 Select [Digital Filter] in the control panel, and press OK.
The Digital Filter setting screen appears.

2 Select a filter.
   Select [No Filter] to not shoot with a digital filter.

3 Press INFO.
The parameter setting screen appears.

4 Set the parameters.

   **Available operations**
   - ▲▼ Selects a parameter.
   - ◀▶ Adjusts the value.

5 Press OK.
The screen of Step 2 reappears.

6 Press OK.
The control panel reappears.

7 Press MENU.
The camera returns to standby mode.

💡 *Caution*
- This function cannot be used in some capture modes or in combination with some other functions. (p.110)
- The Digital Preview operation in Step 2 cannot be performed when the drive mode is set to [Multi-exposure], [Interval Shooting], or [Interval Composite].
- Depending on the filter used, it may take longer to save images.

✍️ *Memo*
- Images can also be processed with digital filters in playback mode. (p.84)
Correcting Images

Brightness Adjustment

Highlight Correction/Shadow Correction

Expands the dynamic range and enables a wider range of tones to be recorded by the CMOS sensor and reduces the occurrence of overexposed/underexposed areas.

Set in the control panel or [D-Range Settings] of the 2 menu.

Caution
- When the sensitivity is set to less than ISO 200, [Highlight Correction] cannot be set to [On].

Memo
- [Highlight Correction] in  mode can be set to [Auto] or [Off].

HDR Capture

Takes three consecutive images at three different exposure levels to create a single composite image with them.

1 Select [HDR Capture] in the control panel, and press OK.

The [HDR Capture] screen appears.

2 Use  to select the type.

3 Press , and use  to set the range in which to change the exposure.

4 Press OK.

The control panel reappears.

5 Press MENU.

The camera returns to standby mode.

Caution
- This function cannot be used in some capture modes or in combination with some other functions. (p.110)
- [File Format] is fixed to [JPEG]. When [File Format] is set to [RAW] or [RAW+], the setting is changed to [JPEG].
- For HDR Capture, multiple images are combined together to create a single image, so it may take time to save the image.
- In  mode, this function is available only when the drive mode is set to [Interval Movie Record].
Memo
- In A-HDR mode or when SCN of SCN mode is selected, specific HDR settings are used and HDR Capture cannot be set.
- The Auto Align feature can be set if you access [HDR Capture] from the 1 menu.
- When the drive mode is set to [Interval Shooting], [Auto Align] is fixed to [Off].

Lens Correction

The following features can be set in [Lens Correction] of the 2 menu.

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Distortion Correction</td>
<td>Reduces distortions occurring due to lens properties.</td>
</tr>
<tr>
<td>Lat-Chromatic-Ab Adj</td>
<td>Reduces lateral chromatic aberrations occurring due to lens properties.</td>
</tr>
<tr>
<td>Diffraction Correction</td>
<td>Corrects blur caused by diffraction when using a small aperture.</td>
</tr>
</tbody>
</table>

Memo
- You can also set [Distortion Correction] and [Peripheral Illumin. Corr.] from the control panel.
- Corrections can only be made when a compatible lens is attached. (p.113) The features are disabled when using an accessory such as a rear converter that is attached between the camera and the lens.
- When [File Format] is set to [RAW] or [RAW+], correction information is saved as a RAW file parameter and you can select whether to apply the correction to the images when developing them. For the RAW Development function, [Color Fringe Correction] can also be set. (p.87)
By shaking the Shake Reduction unit, a moiré reduction effect simulating that of a low-pass filter can be achieved. Set in the control panel or [AA Filter Simulator] of the 3 menu.

### Anti-Aliasing Filter Simulator

<tr>
<td>Bracketing</td>
<td>Takes consecutive 3 images in order of [Off], [Type1], and [Type2] (3 images are taken with one press of SHUTTER).</td>
</tr>
</tbody>
</table>

⚠️ **Caution**
- This function cannot be used in some capture modes or in combination with some other functions. (p.110)
- [Bracketing] cannot be used in the following situations.
  - When [a], [a], or [a] of SCN mode is selected
  - In B mode
  - When the drive mode is set to other than [Single Frame Shooting], [Self-timer] (12 seconds, 2 seconds), or [Remote Control] (now, after 3 seconds)
  - When HDR Capture is set
  - When the number of storable images is 2 or less

---

Images with the texture and surface details enhanced can be captured. Set in the control panel or [Clarity Enhancement] of the 2/1 menu.

### Texture Enhancement

**Caution**
- This function cannot be used in combination with some other functions. (p.112)
- In mode, this function is available only when the drive mode is set to [Interval Movie Record].
Playback Mode Palette Items

Playback functions can be set from the playback mode palette as well as the playback mode menu (p.25). Press ▼ in single image display of the playback mode to display the playback mode palette.

### Changing the Playback Method

#### Displaying Multiple Images

You can display 6, 12, 20, 35 or 80 thumbnail images at the same time.

1. **Turn** to the left in playback mode.  
The multi-image display screen appears.

**Available operations**

<table>
<thead>
<tr>
<th>Key</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>▲▼◄►</td>
<td>Moves the selection frame.</td>
</tr>
<tr>
<td>Q</td>
<td>Shows the next/previous page.</td>
</tr>
<tr>
<td>INFO</td>
<td>Shows the display style selection screen.</td>
</tr>
<tr>
<td>☐</td>
<td>Deletes the selected images.</td>
</tr>
</tbody>
</table>

2. **Press OK.**  
The selected image appears in single image display.

#### Deleting Selected Images

1. **Press** in Step 1 of “Displaying Multiple Images” (p.78).

2. **Select the images to delete.**

**Available operations**

<table>
<thead>
<tr>
<th>Key</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>▲▼◄►</td>
<td>Moves the selection frame.</td>
</tr>
<tr>
<td>OK</td>
<td>Confirms/cancels the selection of the image to delete.</td>
</tr>
<tr>
<td>R</td>
<td>Selects the range of images to delete.</td>
</tr>
</tbody>
</table>
| INFO | Shows the selected image in single image display.  
Use◄► to select a different image. |

In the upper left area of the monitor, the number of selected images is displayed.

3. **Press OK.**  
The delete confirmation screen appears.

4. **Select [Delete] and press OK.**

**Memo**

- You can select up to 500 images at a time.
- Protected images cannot be selected.
- You can delete the images selected individually along with the images selected by specifying the range to delete.
• Use the same steps to select multiple images for the following functions.
• RAW Development (p.87)
• Protect (p.106)

### Displaying Images by Folder

1. Turn to the left in Step 1 of “Displaying Multiple Images” (p.78).
   The folder display screen appears.

   **Available operations**
   - ▲▼◄► Moves the selection frame.
   - Deletes the selected folder.

2. Press OK.
   The images in the selected folder are displayed.

### Deleting a Folder

1. Select the folder to delete in Step 1 of “Displaying Images by Folder” (p.79), and press .
   The delete confirmation screen appears.

2. Select [Delete] and press OK.
   The selected folder and all the images in it are deleted.
   When there are protected images in the folder, select [Delete all] or [Leave all].

### Displaying Images by Shooting Date

Images are grouped and displayed by shooting date.

1. Press INFO in Step 1 of “Displaying Multiple Images” (p.78).
   The display style selection screen appears.

2. Select [Calendar Filmstrip Display].

   **Available operations**
   - ▲▼ Selects a shooting date.
   -◄► Selects an image taken on the selected shooting date.
   - to the right Shows the selected image in single image display.
   - Deletes the selected image.

3. Press OK.
   The selected image appears in single image display.
Playing Back Images Continuously (Slideshow)

1 Select [ ] in the playback mode palette.
   Slideshow starts.

Available operations

- [OK] Pauses/resumes playback.
- [◄] Displays the previous image.
- [►] Displays the next image.
- [▼] Stops playback.
- [��] Adjusts the volume of the movie.

After all images are played back, the camera returns to single image display.

Memo

- You can change the [Display Duration], [Screen Effect], [Repeat Playback], and [Auto Movie Playback] settings for slideshow in [Slideshow] of the [1] menu. Slideshow can also be started from the Slideshow setting screen.

Displaying Rotated Images

When you take pictures with the camera held vertically, image rotation information is saved when shooting. When [Auto Image Rotation] in the [1] menu is set to [On], the image is automatically rotated based on the rotation information during playback (default setting). The rotation information of an image can be changed by following the procedure below.

1 Display the image to edit in single image display.

2 Select [ ] in the playback mode palette.
The selected image is rotated in 90° increments and the four thumbnail images are displayed.

3 Use [▲▼◄►] to select the desired rotation direction and press [OK].
The image rotation information is saved.

Caution

- You cannot change the rotation information in the following cases.
  - Protected images
  - Images without a rotation information tag
  - Movie files cannot be rotated.
Connecting the Camera to an AV Device

Connect to an AV device, such as a TV, equipped with an HDMI terminal to display Live View images while shooting or to play back images in playback mode.
Make sure to have a commercially available HDMI cable equipped with an HDMI terminal (type D).

1 Turn the AV device and camera off.

2 Open the terminal cover of the camera, and connect the cable to the HDMI terminal.

3 Connect the other end of the cable to the input terminal on the AV device.

4 Turn the AV device and camera on.
The camera turns on in HDMI mode, and the camera information is displayed on the screen of the connected AV device.

💡 Caution
- While the camera is connected to an AV device, nothing is displayed on the camera monitor regardless of the LCD screen direction. Also, you cannot adjust the volume on the camera. Adjust the volume on the AV device.

ⓘ Memo
- Check the operating manual of the AV device and select a suitable input terminal for connecting the camera.
- By default, the maximum resolution supported by both the AV device and camera is automatically selected. If it fails to play back images properly, change the setting in [HDMI Out] of the menu.
- If you intend to use the camera continuously for a long period, the use of the optional AC adapter kit is recommended.
Connecting the Camera to a Computer

Connect the camera to a computer using a USB cable. Make sure to have a commercially available USB cable equipped with a micro B terminal.

1. **Turn the computer on.**
2. **Turn the camera off.**
3. **Open the terminal cover of the camera, and connect the USB cable to the USB terminal.**
4. **Connect the USB cable to the USB port of the computer.**
5. **Turn the camera on.**
   The camera is recognized as a removable disk.
   The OK lamp of the camera blinks slowly.
6. **Save the captured images to the computer.**
7. **Disconnect the camera from the computer.**

⚠️ **Caution**
- The camera cannot be operated while it is connected to a computer. To operate the camera, terminate the USB connection on the computer, then turn off the camera and remove the USB cable.
- If the “K-S2” dialog appears on the computer screen in Step 5, select [Open folder to view files] and click the OK button.

💡 **Memo**
- Refer to “Operating Environment for USB Connection and Provided Software” (p.129) for system requirements to connect the camera to a computer and to use the software.
- The USB connection mode when connecting the camera to a computer can be set in [USB Connection] of the 2 menu. Normally, you do not need to change the default setting ([MSC]).
- If you intend to use the camera continuously for a long period, the use of the optional AC adapter kit is recommended.
Editing and Processing Images

Changing the Image Size

Caution
• Only JPEG images captured with this camera can be resized or cropped.
• Images already resized or cropped to the minimum file size cannot be processed.

Changing the Number of Recorded Pixels (Resize)
Changes the number of recorded pixels of the selected image, and saves it as a new file.

1 Display the image to edit in single image display.

2 Select □ in the playback mode palette.
   The screen to select the number of recorded pixels appears.

3 Use ▲▼ to select the number of recorded pixels and press OK.
   You can select an image size smaller than that of the original image.
   The save confirmation screen appears.

4 Select [Save] and press OK.

Cropping Out Part of the Image (Cropping)
Crops out only the desired area of the selected image and saves it as a new file.

1 Display the image to edit in single image display.

2 Select □ in the playback mode palette.
The cropping frame to specify the size and position of the area to crop appears on the screen.

3 Specify the size and position of the area to crop by using the cropping frame.

Available operations

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>▲▼</td>
<td>Changes the size of the cropping frame.</td>
</tr>
<tr>
<td>▲▼</td>
<td>Moves the cropping frame.</td>
</tr>
<tr>
<td>INFO</td>
<td>Changes the aspect ratio or Image Rotation setting.</td>
</tr>
<tr>
<td>O</td>
<td>Rotates the cropping frame (only when possible).</td>
</tr>
</tbody>
</table>

4 Press OK.
The save confirmation screen appears.

5 Select [Save] and press OK.
Correcting Color Moiré

Reduces color moiré in images.

1 Display the image to edit in single image display.

2 Select the playback mode palette.
   If the image cannot be edited, [This image cannot be processed] appears.

3 Use to select the correction level and press .
   The save confirmation screen appears.

4 Select [Save] and press .

Caution
- The Color Moiré Correction function can be used only for the JPEG images captured with this camera.

Processing Images with Digital Filters

1 Display the image to edit in single image display.

2 Select in the playback mode palette.
   The screen to select a digital filter appears.

3 Select a filter.
   Use to select a different image.

Base Parameter Adj Sketch
Extract Color Water Color
Replace Color Pastel
Toy Camera Posterization
Retro Miniature
High Contrast Soft
Shading Starburst
Invert Color Fish-eye
Unicolor Bold Slim
Bold Monochrome Monochrome
Tone Expansion

Proceed to Step 7 if you do not need to change the parameters.

4 Press .
   The parameter setting screen appears.
5 Set the parameters.

Available operations

▲▼ Selects a parameter.

◄► Adjusts the value.

6 Press OK.
The screen of Step 3 reappears.

7 Press OK.
The save confirmation screen appears.

8 Select [Apply additional filter(s)] or [Save] and press OK.
Select [Apply additional filter(s)] when you want to apply additional filters to the same image. The screen of Step 3 reappears.

Caution
• Only JPEG and RAW images captured with this camera can be edited with the digital filters.

Memo
• Up to 20 filters, including the digital filter used during shooting (p.73), can be applied to the same image.

Recreating Filter Effects

Retrieves the filter effects of the selected image and applies the same filter effects to other images.

1 Display a filter-processed image in single image display.

2 Select in the playback mode palette.

3 Select [Recreating filter effects] and press OK.
The filter effects used for the selected image appear.

4 To check the parameter details, press INFO.
Press INFO again to return to the previous screen.

5 Press OK.
The image selection screen appears.

6 Use to select an image for applying the same filter effects, and press OK.
You can only select an image that has not been processed with a filter.
The save confirmation screen appears.
7 Select [Save] and press \( \text{OK} \).

\( \text{Memo} \)
- If [Searching for original image] is selected in Step 3, the original image prior to digital filter application can be retrieved.

**Editing Movies**

1 Display the movie to edit in single image display.

2 Select \( \text{ } \) in the playback mode palette.
The movie editing screen appears.

3 Select the point where you want to divide the movie.
The frame at the dividing point is displayed at the top of the screen.
Up to four points can be selected to divide the original movie into five segments.

**Available operations**

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>( \uparrow )</td>
<td>Plays back/pauses a movie.</td>
</tr>
<tr>
<td>( \rightarrow )</td>
<td>Forwards a frame (when paused).</td>
</tr>
<tr>
<td>Press and hold ( \rightarrow )</td>
<td>Fast-forwards playback.</td>
</tr>
<tr>
<td>( \downarrow )</td>
<td>Reverses a frame (when paused).</td>
</tr>
<tr>
<td>Press and hold ( \downarrow )</td>
<td>Fast-reverses playback.</td>
</tr>
<tr>
<td>( \text{INFO} )</td>
<td>Adjusts the volume.</td>
</tr>
<tr>
<td>( \text{INFO} )</td>
<td>Confirms/cancels a dividing point.</td>
</tr>
</tbody>
</table>

Proceed to Step 7 if you do not want to delete any segment.

4 Press \( \text{D} \).
The screen to select the segments to delete is displayed.

5 Use \( \text{��} \) to move the selection frame and press \( \text{OK} \).
The segments to delete are specified. (Multiple segments can be deleted at once.)
Press \( \text{OK} \) again to cancel the selection.

6 Press \( \text{MENU} \).
The screen of Step 3 reappears.

7 Press \( \text{OK} \).
The save confirmation screen appears.

8 Select [Save] and press \( \text{OK} \).

\( \text{Caution} \)
- Select dividing points in chronological order from the beginning of the movie. When canceling the selected dividing points, cancel each of them in reverse order (from the end of the movie to the beginning). In an order other than specified, you can neither select dividing points nor cancel the selections of the dividing points.
Developing RAW Images
You can develop RAW images into JPEG images, and save them as new files.

1 Select RAW in the playback mode palette.
The screen for selecting a RAW image processing option appears.

2 Select the desired option and press OK.

<table>
<thead>
<tr>
<th>Select single image</th>
<th>Develops an image.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select multiple images</td>
<td>Develops up to 500 images with the same settings.</td>
</tr>
<tr>
<td>Select a folder</td>
<td>Develops up to 500 images in the selected folder with the same settings.</td>
</tr>
</tbody>
</table>

When [Select single image] is selected, proceed to Step 6. The image/folder selection screen appears.

3 Select the image(s) or a folder.
Refer to Step 2 of “Deleting Selected Images” (p.78) for how to select the image(s).

4 Press INFO.
The screen for selecting the parameter setting method appears.

5 Select the parameter setting method and press OK.

<table>
<thead>
<tr>
<th>Develop images as shot</th>
<th>Allows you to change Image Capture Settings (JPEG Recorded Pixels and JPEG Quality).</th>
</tr>
</thead>
</table>

6 Set the parameters.
Available operations

▲▼ Selects a parameter.

◀▶ Changes the value.

☀ Selects a different image (when in single image display).

For Image Capture Settings and Lens Correction, press ▶ and use ▲▼ to select an item.
For Digital Filter, White Balance, and Custom Image, press ▶ to display the setting screen.

7 Press OK.
The save confirmation screen appears.

8 Select [Save] and press OK.
When [Select single image] is selected, select [Continue] or [Exit], and press OK.

⚠️ Caution
• Only RAW images captured with this camera can be developed.
• The parameters [Digital Filter] and [Clarity Enhancement] cannot be set at the same time.

🔍 Memo
• When [Select multiple images] or [Select a folder] is selected in Step 2, a folder with a new number is created, and the JPEG images are stored in it.
• With the provided software “Digital Camera Utility 5”, you can develop RAW files on a computer.
Enabling the Wi-Fi Function

This camera has a built-in Wi-Fi function. By directly connecting to a communication device such as a smartphone or tablet via wireless LAN, the camera can be operated from the communication device and images can be shared with others via social networks or e-mail.

The Wi-Fi function is disabled at the time of turning the camera on. Enable the function using one of the following methods.
- Setting from the menus (p.89)
- Pressing the self-portrait shutter button (p.90)
- Touching a communication device (p.90)

Memo
- When the Wi-Fi function is enabled, the (white) icon indicating the wireless LAN status is displayed on the status screen and Live View screen. When (gray) is displayed, a connection with the access point was not made correctly.
- Even after the Wi-Fi function is enabled, it is disabled again when the camera is turned off and on again. Also, when the camera enters mode, the Wi-Fi function is disabled.
- Auto Power Off is not available while a Wi-Fi connection is established or images are being transferred. If Auto Power Off is activated while a connection is not established or during standby, the Wi-Fi function is disabled. The function is enabled when the camera recovers from Auto Power Off.
- The Wi-Fi function is disabled during the USB connection.

Caution
- Do not attempt to use the Wi-Fi function in a location where the use of wireless LAN devices is restricted or prohibited, such as on airplanes.
- When using the Wi-Fi function, please observe local laws and regulations governing radio communication.
- If a memory card with a built-in wireless LAN function (such as an Eye-Fi card or a Flucard) is used, radio wave interference may occur. When this occurs, disable the Wi-Fi function of the camera.

Setting from the Menus

2. Set [Action Mode] to [ON]. Select [OFF] to disable the Wi-Fi function.
3. Press twice.

Memo
- In Step 2, select [Communication Info] to check the SSID, Password, and MAC Address of the wireless LAN. Or, select [Reset Transfer Settings] to reset the settings to their default values.
**Pressing the Self-portrait Shutter Button**

1. **Press and hold the self-portrait shutter button.**
   A beep sounds and [Wi-Fi enabled] appears on the screen.

2. **Release the self-portrait shutter button.**
   To disable the Wi-Fi function, press and hold the self-portrait shutter button again.

⚠️ **Caution**
- When the self-portrait shutter button lamp is lit green or red, it functions as the shutter release button. In such cases, use another method to turn the Wi-Fi function on or off.

---

**Touching a Communication Device**

When this camera comes into contact with a communication device equipped with the NFC function, the camera establishes a Wi-Fi connection. (p.91)

1. **Lightly touch the communication device to the NFC mark of the camera.**
   A beep sounds and [Wi-Fi enabled] appears on the screen.

⚠️ **Caution**
- To establish a Wi-Fi connection by touching a communication device, the Wi-Fi function and the NFC reader/writer function of the device must be enabled in advance. For details on how to operate the communication device, refer to the operating manual of the device.

🔍 **Memo**
- When the dedicated application “Image Sync” is installed on the communication device, the Wi-Fi function is enabled and Image Sync is started at the same time by touch operation. (p.94) When Image Sync is not installed, the download site for the application is displayed on the communication device.
Operating the Camera with a Communication Device

The following functions can be used by directly connecting the camera to a communication device via Wi-Fi and using the dedicated application “Image Sync”.

<table>
<thead>
<tr>
<th>Remote Capture</th>
<th>Displays the Live View image of the camera on the communication device, and then enables controlling the exposure settings and shooting by operating the communication device.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Image View</td>
<td>Displays the images saved on the memory card inserted in the camera on the communication device and imports the images to the communication device.</td>
</tr>
</tbody>
</table>

Image Sync supports iOS and Android. Image Sync can be downloaded from the App Store or Google Play Store. For supported OS and other details, refer to the download site.

Memo
- The Image Sync screenshots used in this manual are the ones under development and may differ from the actual display. The screen layout and elements may be also changed due to causes such as the version upgrade of the application.
- For details on how to operate the communication device, refer to the operating manual of the device.

Connecting the Camera and Communication Device

Connect the camera and communication device via Wi-Fi, and start Image Sync installed on the communication device.

When an NFC-compatible Device is Used

1. Set the wireless LAN (Wi-Fi) function and the NFC reader/writer function to ON on the communication device.

2. Lightly touch the communication device to the NFC mark of the camera.
A Wi-Fi connection is established between the camera and communication device. Image Sync is started, and the list of images appears.
When a Non-NFC-compatible Device is Used

1 Set the wireless LAN (Wi-Fi) function to ON on the communication device.

2 Start Image Sync on the communication device. The [Choose a Network] screen appears on the communication device.

3 Tap [PENTAX_xxxxxx] in the [Network List]. The [Enter Password] screen appears.

4 Enter the password, and tap [Connect].
A Wi-Fi connection is established between the camera and communication device. The list of images appears on the Image Sync screen.

Memo
- Refer to [Communication Info] in [Wi-Fi] of the menu for the default password. (p.89)
When an iOS Device is Used

1 Set the wireless LAN (Wi-Fi) function to ON on the communication device.
   Tap [PENTAX_xxxxxx] in the list of detected Wi-Fi networks.

2 Enter the password, and tap [Join].
   A Wi-Fi connection is established between the camera and communication device.

3 Start Image Sync on the communication device.
   Image Sync is started, and the list of images appears.

**Memo**

- You can also change screens by tapping the buttons displayed at the bottom of each screen.
Shooting with a Communication Device

The Live View image of the camera and buttons for shooting are displayed on the shooting screen of Image Sync.

1. Settings (p.98)
2. Capture mode
3. Live View
4. AF frame
5. White Balance, Shutter Speed, Aperture value, EV Compensation, Sensitivity
6. Live View on/off
7. Operation modes
8. NFC connection screen
9. Battery level
10. Thumbnail of the last captured image
   (When tapped, the camera image list is displayed.)
11. File Format, Image storage capacity
12. Drive Mode
13. Green button
14. Shutter button

Shooting Images

1. Configure the basic settings on the camera.

2. Check the Live View image on the shooting screen of Image Sync.

3. Change the settings using Image Sync as necessary.
Tap an item and select a value from the list.

4 When the focus mode is set to **AF**, tap an area where you want to perform autofocus in the Live View image.
   Autofocus is performed on the tapped area.

5 Tap the shutter release button.
   The captured image is displayed as a thumbnail.

⚠️ **Caution**
- Shooting with Image Sync is not available in the following situations.
  - When the drive mode is set to other than [Single Frame Shooting]
  - In **M** mode
  - When the camera is connected to a device via USB or HDMI terminal
  - When using the **ASTROTRACER** function
- The captured images are saved to the memory card inserted in the camera and to the communication device with Image Sync. Shooting cannot be performed if there is not enough available space on the memory card.

**Memo**
- Shooting can also be performed by tapping the Live View image. Set in [Touch AF] on the [Settings] screen. (p.98)

**Viewing Images**
You can view the images saved either in the camera or in the communication device.

1 Multiple image selection button
2 Album selector button
   (available for the application image list only)
3 Operation modes
4 Settings (p.98)
5 NFC connection screen
Tap the image to display the full-screen image and shooting information.

**Selecting the Image Storage Location**

When viewing images in application image list display, you can select the image storage location (album) from [Application] or [Gallery] (or [Camera Roll]).

1. Tap 📷.

2. Select the album.
   The images in the selected album are displayed.

**Touch operations**

<table>
<thead>
<tr>
<th>Flick left/right</th>
<th>Shows the previous/next image.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pinch out/in</td>
<td>Magnifies/Reduces the image.</td>
</tr>
</tbody>
</table>
Selecting Multiple Images

1 Tap  

2 Tap the images to select. Blue check marks appear.

3 Touch and hold one of the selected images.

4 Select the desired action.

Memo
- When you touch and hold the desired image shown in list display or shooting information display, the same screen as Step 4 appears and you can select the action to apply.
Changing the Settings

1 Tap ⬤.

The [Settings] screen appears.

The following settings are available.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Touch AF</td>
<td>Sets whether to perform only autofocus or perform shooting after autofocus when touching the Live View image.</td>

</tbody>
</table>

4 Press OK.

5 Press MENU.

The screen of Step 2 reappears.
Repeat Steps 2 to 5.

6 Press MENU twice.
Setting the One Push File Format

Select the file format to change to when \( \text{RAW/Fx} \) is pressed for each [File Format] setting.

1 Set [RAW/Fx Button] to [One Push File Format] in Step 3 of “Setting the Button Operation” (p.100).

2 Select ☑ or ☐ for [Cancel after 1 shot].

| ☑ | The recording format returns to the original file format after a picture is taken. |
| ☐ | The setting is retained until any of the following operations is performed: |
|   | • When \( \text{RAW/Fx} \) is pressed again |
|   | • When \( \text{INFO} \) or \( \text{MENU} \) is pressed, or when the mode dial or main switch is turned |

3 Select the file format when \( \text{RAW/Fx} \) is pressed.

The left side is the [File Format] setting and the right side is the changed file format when \( \text{RAW/Fx} \) is pressed.

Setting the Display Settings for Digital Preview

Select the camera operation and type of information displayed on the monitor when Digital Preview is displayed by pressing \( \text{RAW/Fx} \).

1 Set [RAW/Fx Button] to [Digital Preview] in Step 3 of “Setting the Button Operation” (p.100).

2 Press ▼ and select ☐ or ☑ for each display item.
### Saving Frequently Used Settings

Camera settings can be saved to **U1** and **U2** of the mode dial and used repeatedly.

The following settings can be saved.

<table>
<thead>
<tr>
<th>Settings</th>
<th>Example Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exposure Mode (P/Sv/Tv/Av/TAv/M/B)</td>
<td>Drive Mode</td>
</tr>
<tr>
<td>Sensitivity</td>
<td>White Balance</td>
</tr>
<tr>
<td>EV Compensation</td>
<td>1-4 menu settings</td>
</tr>
<tr>
<td>AF point</td>
<td>(with exceptions)</td>
</tr>
<tr>
<td>Flash Mode</td>
<td>C1-4 menu settings</td>
</tr>
</tbody>
</table>

---

### Saving the Settings

1. **Set the exposure mode and all of the settings to save.**

2. **Select [Save USER Mode] in 4 menu and press ▶.**
   - The [Save USER Mode] screen appears.

3. **Select [Save Settings] and press ▶.**
   - The [Save Settings] screen appears.

4. **Select [USER1] or [USER2] and press ▶.**

5. **Select [Save] and press OK.**
   - The screen of Step 3 reappears.

### Caution

- [Save USER Mode] cannot be selected when the mode dial is set to AUTO, SCN, or A-HDR.

### Memo

- The settings saved as the USER mode can be displayed on the monitor when you select [Check Saved Settings] in Step 3.
- To reset the settings to the default values, select [Reset USER Mode] in Step 3.

---

### Editing a Setting Name

You can change the name of the USER mode in which you saved settings.

1. **Select [Rename USER Mode] in Step 3 of “Saving the Settings” (p.103) and press ▶.**
   - The [Rename USER Mode] screen appears.

2. **Select [USER1] or [USER2] and press ▶.**
   - The text-entry screen appears.

3. **Change the text.**
   - Up to 18 single-byte alphanumeric characters and symbols can be entered.
Available operations

▲▼◄► Moves the text selection cursor.

Moves the text input cursor.

↑ Switches between upper and lower case letters.

Enter a character selected with the text selection cursor at the position of the text input cursor.

Deletes a character at the position of the text input cursor.

4 After entering the text, move the text selection cursor to [Finish], and press OK.
The [Rename USER Mode] screen reappears.

Using the Saved USER Mode

1 Set the mode dial to U1 or U2.
The USER mode guide is displayed for about 3 seconds.
Use ▲▼ to check the saved settings.

2 Change the settings as necessary.
The exposure mode can be changed in [Exposure Mode] of the 1 menu.

Memo
- The settings changed in Step 2 are not saved as the USER mode settings. When the camera is turned off, the camera returns to the originally saved settings. To change the original settings, save the USER mode settings again.
Displaying the Local Date and Time of the Specified City

The date and time set at the time of initial setting (“Initial Settings” (p.36)) serve as the date and time of your present location and are reflected in the shooting date and time for images.

Setting the destination to a location other than your present location enables you to display the local date and time on the monitor when traveling abroad and also save images time-stamped with the local date and time.

   The [World Time] screen appears.

2. Select the time you wish to display in [Time Setting].
   Select ◄ (Hometown) or ➔ (Destination).

3. Select [➔ Destination] and press ▲.
   The [➔ Destination] screen appears.

4. Use ◄ to select a city.
   Use ◄ to change the region.

5. Select [DST] (daylight saving time), and use ◄ to select ☐ or ☐.

6. Press OK.
   The screen of Step 2 reappears.

7. Press MENU twice.

Memo
- Refer to “List of World Time Cities” (p.128) for cities that can be selected as a hometown or destination.
- Select [➔ Hometown] in Step 3 to change the city and DST settings for the hometown.
- ➔ appears in the control panel when [Time Setting] is set to ➔.

Selecting Settings to Save in the Camera

Most of the functions set on this camera are saved even if the camera is turned off. For the following function settings, you can select whether to save the settings (☒) or to return the settings to their default values (☐) when the camera is turned off.

Set in [Memory] of the 4 menu.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Saved Setting</th>
<th>Default Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flash Mode</td>
<td>Flash Exposure Compensation</td>
<td></td>
</tr>
<tr>
<td>Drive Mode</td>
<td>Digital Filter</td>
<td></td>
</tr>
<tr>
<td>White Balance</td>
<td>HDR Capture</td>
<td></td>
</tr>
<tr>
<td>Custom Image</td>
<td>Clarity Enhancement</td>
<td></td>
</tr>
<tr>
<td>Sensitivity</td>
<td>Shooting Info Display</td>
<td></td>
</tr>
<tr>
<td>EV Compensation</td>
<td>Playback Info Display</td>
<td></td>
</tr>
</tbody>
</table>

Memo
- When [Reset] of the 3 menu is performed, all Memory settings return to the default values.
Protecting Images from Deletion (Protect)

You can protect images from being accidentally deleted.

⚠️ Caution
- Even protected images are deleted if the inserted memory card is formatted.

1 Select  in the playback mode palette.
The screen for selecting the unit for processing appears.

2 Select [Select image(s)] or [Select a folder] and press OK.

3 Select the image(s) or folder to protect.
Refer to Step 2 of “Deleting Selected Images” (p.78) for how to select the image(s).
Proceed to Step 5 if [Select a folder] is selected.

4 Press INFO.
The confirmation screen appears.

5 Select [Protect] and press OK.

memo
- To protect all images stored in the memory card, select [Protect All Images] of the 1 menu.

Folder Name

When images are captured with this camera, a folder is automatically created and the captured images are stored in it.
Each folder name consists of a sequential number from 100 to 999 and a string of 5 characters.
The folder name can be changed.

1 Select [Folder Name] in 2 menu and press ▶.
The [Folder Name] screen appears.

2 Select a folder name and press OK.

<table>
<thead>
<tr>
<th>Date</th>
<th>The two digits of the month and day on which the picture was taken are assigned after the folder number. The month and day appear according to the date format set in [Date Adjustment]. Example) 101_0125: for images taken on January 25th</th>
</tr>
</thead>
<tbody>
<tr>
<td>PENTX</td>
<td>The character string “PENTX” is assigned after the folder number. The character string can be changed arbitrarily. Example) 101PENTX</td>
</tr>
</tbody>
</table>

Proceed to Step 6 if you selected [Date] or do not need to change the character string from “PENTX.”
3 Press ▼, and then press ►.
   The text-entry screen appears.

4 Change the text.
   Enter 5 single-byte alphanumeric characters.

   Available operations
   ▲▼◄► Moves the text selection cursor.
   ❌ Moves the text input cursor.
   ☑ Enters a character selected with the text selection cursor at the position of the text input cursor.
   □ Resets the entered text to “PENTX”.

5 After entering the text, move the text selection cursor to [Finish], and press ☑.
   The screen of Step 2 reappears.

6 Press MENU twice.

Memo
- A folder with a new number is created when the folder name is changed.
- A maximum of 500 images can be stored in a single folder. When the number of captured images exceeds 500, a new folder is created with the number following the number of the folder currently being used. In Bracketing shooting, images are stored in the same folder until shooting is completed.

Caution
- The maximum folder number is 999. After the folder number reaches 999, you cannot capture new images if you attempt to change the folder name or create a new folder, or when the file name number reaches 9999.

Memo
- When [Create New Folder] is selected in the 2 menu, a folder is created with a new number when the next image is saved.

Caution
- You cannot successively create multiple folders.

Memo
- A new folder is automatically created in the following cases.
  - When the drive mode is set to [Interval Shooting] (p.64)
  - When the drive mode is set to [Interval Composite] and [Save Process] is set to [On] (p.65)
  - When [Select multiple images] or [Select a folder] is selected for [RAW Development] (p.87)
**File Name**

One of the following string of characters is used as the file name prefix depending on the [23 Color Space] setting of the **C4** menu.

<table>
<thead>
<tr>
<th>Color Space</th>
<th>File Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>sRGB</td>
<td>IMGPxxxx.JPG</td>
</tr>
<tr>
<td>AdobeRGB</td>
<td>_IMGxxxx.JPG</td>
</tr>
</tbody>
</table>

The first four characters can be changed to a character string of your choice.

1. **Select [File Name]** in **D2** menu and press ▶. The [File Name] screen appears.

2. **Select 📷 or 🎥 and press ▶.** The text-entry screen appears.

3. **Change the text.**
   Up to 4 single-byte alphanumeric characters can be entered.
   Refer to Steps 4 and 5 of “Folder Name” (p.106) for how to enter text.

4. **Press MENU twice.**

**Memo**

- When [Color Space] is [AdobeRGB], the file name prefix is “_” and first three characters of the entered character string becomes the file name.
- For movies, regardless of the [Color Space] setting, the file name is “IMGPxxxx.MOV” or the one with the entered string of characters.

**File No.**

Each file name consists of a string of 4 characters and a sequential number from 0001 to 9999. You can set whether to continue the sequential numbering for the file name even if a new folder is created in [Sequential Numbering] of [File No.] in the **D2** menu.

- **Continues the sequential numbering for the file name even if a new folder is created.**

Select [Reset File Number] to reset the file number to its default value.

**Memo**

- When the file number reaches 9999, a new folder is created and the file number is reset.
Sets the photographer and copyright information embedded in the Exif data.

1. Select [Copyright Information] in \(D\)2 menu and press \(\triangleright\).
   The [Copyright Information] screen appears.

2. Use \(\triangleright\) to set [Embed Copyright Data].

3. Select [Photographer] or [Copyright Holder], and press \(\triangleright\).
   The text-entry screen appears.

4. Change the text.
   Up to 32 single-byte alphanumeric characters and symbols can be entered.

5. After entering the text, move the text selection cursor to [Finish], and press \(\text{OK}\).
   The screen of Step 2 reappears.

6. Press \(\text{MENU}\) twice.

\(\text{Memo}\)
- The Exif information can be checked using the provided software “Digital Camera Utility 5”.

*1 Lenses with a maximum aperture of F2.8 or faster. Only available at the A position.
*2 Lenses with a maximum aperture of F5.6 or faster.
*3 Available when using the built-in flash, AF540FGZ, AF540FGZ II, AF360FGZ, AF360FGZ II, AF200FG, or AF160FC.
*4 Only available with compatible lenses.
*5 Distortion Correction and Peripheral Illumination Correction are disabled when a DA FISH-EYE 10-17mm lens is used.
*6 To use an FA SOFT 28mm F2.8 lens, FA SOFT 85mm F2.8 lens, or F SOFT 85mm F2.8 lens, set [28 Using Aperture Ring] to [Enable] in the C4 menu. Pictures can be taken with the aperture you set, but only within a manual aperture range.
*7 Only available with an FA 31mm F1.8 Limited, FA 43mm F1.9 Limited, or FA 77mm F1.8 Limited lens.
*8 Fixed to [Spot].
*9 Av with the aperture set to wide open. (The aperture ring has no effect on the actual aperture value.)

**Caution**
- When the aperture ring is set to a position other than A or a lens without an A position or accessories such as an auto extension tube or auto bellows are used, the camera does not operate unless [28 Using Aperture Ring] is set to [Enable] in the C4 menu. Refer to “Using the Aperture Ring” (p.115) for details.
- When a retractable lens is attached and is not extended, you cannot take pictures and use some functions. If the lens is retracted during shooting, the camera stops working.

**Lens Names and Mount Names**
DA lenses with a motor and FA zoom lenses with power zoom use the KAF2 mount. (Of these lenses, the lenses without an AF coupler use the KAF3 mount.)
FA single focal length lenses (non-zoom lenses), DA or DA L lenses without a motor, and D FA, FA J and F lenses use the KAF mount. (The power zoom function is not compatible with this camera.)
Refer to respective lens manuals for details.
## Compatibility with the Built-in Flash

Depending on the lens being used, the use of the built-in flash may be limited.

<table>
<thead>
<tr>
<th>Lens</th>
<th>Restrictions when using the built-in flash</th>
</tr>

**Using the Aperture Ring**

The shutter can be released even if the aperture ring of the D FA, FA, F or A lens is not set to the A position or a lens without an A position is attached. Select [Enable] in [28 Using Aperture Ring] of the C4 menu.

The following restrictions apply depending on the lens being used.

<table>
<thead>
<tr>
<th>Lens</th>
<th>Restriction</th>
</tr>
</thead>
<tbody>
<tr>
<td>D FA, FA, F, A, M (lens only or with automatic diaphragm accessories such as auto extension tube K)</td>
<td>The aperture remains open. The shutter speed changes in relation to the open aperture but an exposure deviation may occur.</td>
</tr>
<tr>
<td>D FA, FA, F, A, M, S (with diaphragm accessories such as extension tube K)</td>
<td>Pictures can be taken with a set aperture value but an exposure deviation may occur.</td>
</tr>
<tr>
<td>Manual diaphragm lens such as reflex lens (lens only)</td>
<td></td>
</tr>
<tr>
<td>FA SOFT 28mm/FA SOFT 85mm/F SOFT 85mm (lens only)</td>
<td>Pictures can be taken with a set aperture value in the manual aperture range.</td>
</tr>
</tbody>
</table>

**Memo**

- If the aperture ring is set to a position other than A, the camera operates in Av mode regardless of the mode dial setting except when set to M or B mode.
- [F--] appears for the aperture indicator in the status screen, Live View screen and viewfinder.

**How to Achieve the Correct Exposure with the Aperture Ring Not Set to A**

The correct exposure can be achieved by the following procedures when the aperture ring is not set to A.

1. Set the mode dial to M.
2. Set the aperture ring to the desired aperture.
3. Press O.
   The correct shutter speed will be set.
4. If the correct exposure cannot be achieved, adjust the ISO sensitivity.
The Shake Reduction function operates by obtaining lens information such as focal length. Set the focal length when using a lens that the focal length information cannot be automatically obtained.

2. Turn the camera off.

3. Attach a lens to the camera and turn the camera on.
   The [Input Focal Length] screen appears.

4. Use ▲▼ to set the focal length.
   Press ◀ to select a value from the list.
   When using a zoom lens, select the actual focal length to be used for shooting.

5. Press OK.
   The camera returns to standby mode.

Memo
- The focal length setting can be changed in [Input Focal Length] of the 3 menu.

### Functions when Using an External Flash

Use of the following external flashes (optional) enables a variety of flash modes, such as P-TTL auto flash mode.

<table>
<thead>
<tr>

</table>
*1 Available only when using a DA, DA L, D FA, FA J, FA, F, or A lens.
*2 AF assist light is not available with the AF540FGZ or AF360FGZ.
*3 Shutter speed of 1/90 seconds or slower.
*4 When combined with the AF540FGZ, AF540FGZ II, AF360FGZ, or AF360FGZ II, 1/3 of the flash discharge can be output by the built-in flash and 2/3 can be output by the external flash.
*5 Available only when combined with the AF540FGZ, AF540FGZ II, AF360FGZ, or AF360FGZ II.

⚠️ Caution
- Never press  on the camera when any external flash unit is attached to the camera. The built-in flash will hit the external flash. If you want to use both at once, connect them using an extension cord.
- Flashes with the reversed polarity (the center contact on the hot shoe is minus) cannot be used due to the risk of damaging the camera and/or flash.
- Do not combine with accessories that have a different number of contacts, such as a Hot Shoe Grip, as a malfunction may occur.
- Combining with flashes from other manufacturers may cause equipment breakdown.

🏠 Memo
- With the AF540FGZ, AF540FGZ II, AF360FGZ, or AF360FGZ II, you can use the High-speed Sync flash to discharge a flash when taking a picture at a shutter speed faster than 1/180 seconds. Set the capture mode to Tv, TAv, or M.

Using the GPS Unit

In addition to GPS information being saved in the shooting information of the image, the following functions are available when the optional GPS unit O-GPS1 is attached to this camera.

<table>
<thead>
<tr>
<th>Function</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Electronic Compass</td>
<td>Displays the current latitude, longitude, altitude, direction, Coordinated Universal Time (UTC), capture mode, and exposure value.</td>
</tr>
<tr>
<td>ASTROTRACER</td>
<td>Tracks and captures celestial bodies. By matching the movement of the camera’s built-in Shake Reduction unit with the movement of celestial bodies, celestial bodies can be captured as individual points even when shooting with a long exposure setting. (p.118)</td>
</tr>
<tr>
<td>GPS Time Sync</td>
<td>Automatically adjusts the camera’s date and time settings using information obtained from GPS satellites.</td>
</tr>
</tbody>
</table>

🏠 Memo
- Refer to the manual of the GPS unit for details on how to attach the unit and information on the unit’s functions.
- To display [Electronic Compass], refer to “Shooting Info Display” (p.13).

⚠️ Caution
- “Simple Navigation” cannot be used with this camera.
Shooting Celestial Bodies (ASTROTRACER)

1. Set the mode dial to **B**.
2. Select [GPS] in **A** menu and press **D**.
   The [GPS] screen appears.
3. Select [ASTROTRACER] and press **D**.
   The [ASTROTRACER] screen appears.
4. Set [Action in B Mode] to **A** and press **OK**.
5. To set the desired exposure time, first set [Timed Exposure] to [ON].
   You can set the exposure time between 0'10" and 5'00" in [Exposure Time].
6. Press **MENU** three times.
   The camera returns to standby mode.
7. Press **SHUTTER** fully.
   Shooting starts.
8. Press **SHUTTER** fully again.
   Shooting stops.
   When [Timed Exposure] is enabled, shooting ends automatically after the set time has elapsed.

Troubleshooting

**Memo**
- In rare cases, the camera may not operate correctly due to causes such as static electricity, etc. This can be remedied by taking the battery out and putting it back in again. If the camera operates correctly, it does not require any repairs.

<table>

</tr>
<tr>
<td>There are visible defects in a captured image, or parts in the display monitor that do not light up or remain lit.</td>
<td>There are defective pixels in the CMOS sensor.</td>
<td>Activate [Pixel Mapping] from the 4 menu. It takes about 30 seconds to correct the defective pixels, so be sure to install a fully charged battery.</td>
</tr>
</tbody>
</table>
Raise the mirror up and open the shutter when cleaning the CMOS sensor with a blower.

1. Turn the camera off and remove the lens.
2. Turn the camera on.
4. Select [Mirror Up] and press 4. The mirror rises up and the 4 lamp blinks slowly.
5. Clean the CMOS sensor with a blower.
6. Turn the camera off. The mirror automatically returns to its original position.

Caution
- Never use a spray blower or a blower with a brush. The CMOS sensor may be damaged. Do not wipe the CMOS sensor with a cloth.
- Do not put the tip of the blower inside the lens mount area. If the power is turned off during cleaning, this may cause damage to the shutter, CMOS sensor and the mirror. Hold the camera with the lens mount down while cleaning the sensor so dust will fall away from the sensor when the blower is used.
- When the battery level is low, the message [Not enough battery power remaining to clean sensor] is displayed on the monitor. Install a fully charged battery. If the battery capacity becomes low during cleaning, a warning beep will sound. In this case, stop cleaning immediately.

Memo
- Please contact your nearest service center for professional cleaning as the CMOS sensor is a precision part.
- You can use the optional Image Sensor Cleaning Kit O-ICK1 when cleaning the CMOS sensor.
## Error Messages

<td>Approx. 921K dots</td>
</tr>
<tr>
<td>Adjustment</td>
<td>Brightness, saturation and colors adjustable</td>
</tr>
</tbody>
</table>
### White Balance

| Type | Method using a combination of the CMOS image sensor and the light source detection sensor |
| Preset Modes | Auto White Balance, Multi Auto White Balance, Daylight, Shade, Cloudy, Fluorescent Light (D: Daylight Color, N: Daylight White, W: Cool White, L: Warm White), Tungsten Light, Flash, CTE, Manual White Balance, Color Temperature, Copying the white balance settings of a captured image |
| Fine Adjustment | Adjustable ±7 steps on A-B axis and G-M axis |

### Autofocus System

| Type | TTL: phase-matching autofocus |
| Focus Sensor | SAFOX X, 11 points (9 cross type focus points in the center) |
| Brightness Range | EV -3 to 18 (ISO100, at normal temperature) |
| AF Modes | Single AF (AF.S), Continuous AF (AF.C), Auto select AF (AF.A) |
| Focus Point Selection Modes | Auto (11 AF Points), Auto (5 AF Points), Select, Expanded Area AF, Spot |
| AF Assist Light | Dedicated LED AF assist light |

### Exposure Control

| Type | TTL open-aperture 77 segment metering Metering modes: Multi-segment, Center-weighted, Spot |
| Metering Range | EV 0 to 22 (ISO100 at 50mm F1.4) |
| Capture Modes | Auto Picture modes: Standard, Portrait, Landscape, Macro, Moving Object, Night Scene Portrait, Sunset, Blue Sky, Forest Scene Modes: Portrait, Landscape, Macro, Moving Object, Night Scene Portrait, Sunset, Blue Sky, Forest, Night Scene, Night Scene HDR (JPEG only), Night Snap, Food, Pet, Kids, Surf & Snow, Backlight Silhouette, Candlelight, Stage Lighting, Museum Advanced HDR mode (JPEG only): exposure bracket value is selectable from ±1, ±2 or ±3 EV Exposure modes: Program, Sensitivity Priority, Shutter Priority, Aperture Priority, Shutter & Aperture Priority, Manual, Bulb |

### EV Compensation

| ±5 EV (1/3 EV steps or 1/2 EV steps can be selected) |

### AE Lock

| Can be assigned to [Button Customization]. |

### Shutter

| Type | Electronically controlled vertical-run focal plane shutter |
| Shutter Speed | Auto: 1/6000 to 30 seconds, Manual: 1/6000 to 30 seconds (1/3 EV steps or 1/2 EV steps), Bulb |

### Drive Modes

| Mode Selection | [Still picture] Single frame, Continuous (H, L), Self-timer (12 sec., 2 sec., continuous), Remote Control (immediately, 3 sec., continuous), Bracketing*, Multi-exposure*, Interval Shooting*, Interval Composite* |
| Movie | Remote Control, Interval Movie Record*, Star Stream* |

*1 Available with Self-timer or Remote Control
*2 Available with Continuous Shooting, Self-timer, or Remote Control

### Continuous Shooting

| Max. approx. 5.5 fps, JPEG ([L]: ★★★ at Continuous H): 30 frames, RAW: 9 frames, RAW+: 6 frames |
| Max. approx. 3.0 fps, JPEG ([L]: ★★★ at Continuous L): 100 frames, RAW: 14 frames, RAW+: 8 frames |
| When the sensitivity is set to ISO100. |

### Multi-exposure Composite Mode

| Additive, Average, Bright Number of Shots: 2 to 2000 times |
## Flash

### Built-in Flash
- Built-in retractable P-TTL pop-up flash
- Guide number: approx. 12 (ISO100/m)
- Angle of view coverage: equivalent to 28mm lens in 35mm format

### Flash Modes

### Sync Speed
- 1/180 sec.

### Flash Exposure Compensation
- -2.0 to +1.0 EV

### External Flash
- P-TTL, Leading Curtain Sync, Trailing Curtain Sync, Contrast-control-sync, High-speed Sync, Wireless Sync
- Available with 2 dedicated external flashes

## Interval Shooting

### Interval Shooting
- Interval: 2 sec. to 24 hr., Standby Interval: minimum time or 1 sec. to 24 hr., Number of Shots: 2 to 2000 times, Start Interval: Now, Set Time

### Interval Composite
- Interval: 2 sec. to 24 hr., Standby Interval: minimum time or 1 sec. to 24 hr., Number of Shots: 2 to 2000 times, Start Interval: Now, Set Time, Composite Mode: Additive, Average, Bright, Save Process: On, Off

### Interval Movie
- Recorded Pixels: [4K], [FullHD], [HD], Interval: 2 sec. to 24 hr., Standby Interval: minimum time or 1 sec. to 24 hr., Number of Shots: 8 to 2000 times ([4K]: 8 to 500 times), Start Interval: Now, Set Time

### Star Stream
- Recorded Pixels: [4K], [FullHD], [HD], Standby Interval: minimum time or 1 sec. to 24 hr., Number of Shots: 8 to 2000 times ([4K]: 8 to 500 times), Start Interval: Now, Set Time, Fade-out: Off, Low, Medium, High

## Capture Functions

### Custom Image
- Bright, Natural, Portrait, Landscape, Vibrant, Radiant, Muted, Bleach Bypass, Reversal Film, Monochrome, Cross Processing

### Cross Processing
- Random, Preset 1-3, Favorite 1-3

### Digital Filter
- Extract Color, Replace Color, Toy Camera, Retro, High Contrast, Shading, Invert Color, Unicolor Bold, Bold Monochrome

### HDR Capture
- Auto, Type1, Type2, Type3
- Bracket Value adjustable
- Auto Align: On, Off

### Clarity Enhancement
- On, Off

### Lens Correction
- Distortion Correction, Peripheral Illumination Correction, Lateral Chromatic Aberration Correction, Diffraction Correction

### D-Range Settings
- Highlight Correction, Shadow Correction

### Noise Reduction
- Slow Shutter Speed NR, High-ISO NR

### Electronic Level
- Displayed in viewfinder (horizontal direction only); displayed on LCD monitor (horizontal direction and vertical direction)

### Horizon Correction
- SR On: corrects up to 1 degree, SR Off: corrects up to 1.5 degrees

### File Format
- MPEG-4 AVC/H.264 (MOV)
- Motion JPEG (AVI) for Interval Movie Record and Star Stream

### Recorded Pixels
- [FullHD] (1920×1080, 30p/25p/24p)
- [HD] (1280×720, 60p/50p)

### Sound
- Built-in stereo microphone, external microphone (stereo recording compatible)
- Recording Sound Level adjustable (sound level is displayed on the monitor)

### Recording Time
- Up to 4 GB or 25 minutes; automatically stops recording if the internal temperature of the camera becomes high.
## Playback Functions

| Custom Image | Bright, Natural, Portrait, Landscape, Vibrant, Radiant, Muted, Bleach Bypass, Reversal Film, Monochrome, Cross Processing |
| Cross Processing | Random, Preset 1-3, Favorite 1-3 |
| Digital Filter | Extract Color, Replace Color, Toy Camera, Retro, High Contrast, Shading, Invert Color, Unicolor Bold, Bold Monochrome |
| HDR Capture | Auto, Type1, Type2, Type3, Bracket Value adjustable |
| Clarity Enhancement | On, Off |

### Playback View
- Single frame, Multi-image display (6, 12, 20, 35, and 80 thumbnails), Image magnification (Up to 16x, quick zoom), Rotated image display, Histogram (Y histogram, RGB histogram), Highlight Alert, Detailed Information Display, Copyright Information (Photographer, Copyright Holder), GPS information (Latitude, Longitude, Altitude, Coordinated Universal Time (UTC)), Direction, Folder Display, Calendar Filmstrip Display, Slideshow
- Delete: Single image, all images, select & delete, folder, Instant Review image
- Digital Filter: Base Parameter Adj, Extract Color, Replace Color, Toy Camera, Retro, High Contrast, Shading, Invert Color, Unicolor Bold, Bold Monochrome, Tone Expansion, Sketch, Water Color, Pastel, Posterization, Miniature, Soft, Starburst, Fish-eye, Slim, Monochrome

### RAW Development
- Development options: Select single image, Select multiple images, Select a folder

### Editing Features
- Image Rotation, Color Moiré Correction, Resize, Cropping (aspect ratio can be changed and tilt correction is available), Movie Edit (dividing a movie file and deleting unwanted segments), Capturing a JPEG still picture from a movie, Save RAW Data

### Customization

| USER Mode | Up to 2 settings can be saved. |
| Custom Functions | 28 items |
| Mode Memory | 12 items |
| E-Dial Programming | E-dials (front/rear): customizable to each exposure mode |
| Button Customization | button: One Push File Format, Bracketing, Optical Preview, Digital Preview, Shake Reduction, AF Active Area, button: Enable AF1, Enable AF2, Cancel AF, AE Lock (can be customized for taking still pictures and for recording movies separately), Self-portrait shutter button: On, Off |
| AF Customization | AF.S Setting: Focus-priority, Release-priority, 1st Frame Action in AF.C: Release-priority, Auto, Focus-priority, Action in AF.C Continuous: Focus-priority, Auto, FPS-priority, Hold AF Status: Off, Low, Medium, High, AF in Interval Shooting: Locks focus at 1st exposure, Adjusts focus for each shot |
| Text Size | Standard, Large |
| World Time | World Time settings for 75 cities (28 time zones) |
| AF Fine Adjustment | ±10 steps, adjustment for all lenses or individual lenses (up to 20 values can be saved) |
### Power Supply

<table>
<thead>
<tr>
<th>Battery Type</th>
<th>Rechargeable Lithium-ion Battery D-LI109</th>
</tr>
</thead>
<tbody>
<tr>
<td>AC Adapter</td>
<td>AC Adapter Kit K-AC128 (optional)</td>
</tr>
</tbody>
</table>

### Battery Life

- Number of recordable images:
  - (with 50% flash usage): approx. 410 images,
  - (without flash usage): approx. 480 images
- Playback time: approx. 270 minutes
- Tested in compliance with CIPA standard using a fully charged lithium-ion battery at a temperature of 23°C. Actual results may vary depending on the shooting conditions/circumstances.

### Interfaces

<td></td>
<td>50% Use</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>100% Use</td>
<td>270 minutes</td>
</tr>
</tbody>
</table>

- The image storage capacity (normal recording and flash use 50%) is based on measuring conditions in accordance with CIPA standards, while other data is based on our measuring conditions. Some deviation from the above figures may occur in actual use depending on the selected capture mode and shooting conditions.

Approximate Image Storage Capacity by Size

(When using a 2 GB memory card)

</table>
Operating Environment for USB Connection and Provided Software

With the provided software “Digital Camera Utility 5”, you can develop RAW files, make color adjustments, or check shooting information on a computer. Install the software from the provided CD-ROM (S-SW156).

We recommend the following system requirements to connect the camera to a computer and to use the software.

**Windows**

<table>
<thead>
<tr>
<th>OS</th>
<th>Windows 8.1 (32-bit, 64-bit), Windows 8 (32-bit, 64-bit), Windows 7 (32-bit, 64-bit), or Windows Vista (32-bit, 64-bit)</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPU</td>
<td>Intel Core 2 Duo or higher</td>
</tr>
<tr>
<td>RAM</td>
<td>2 GB or more</td>
</tr>
<tr>
<td>HDD</td>
<td>For installing and starting up the program: 100 MB or more of available space</td>
</tr>
<tr>
<td></td>
<td>For saving image files: Approx. 10 MB/file (JPEG), Approx. 20 MB/file (RAW)</td>
</tr>
<tr>
<td>Monitor</td>
<td>1280×1024 dots, 24-bit full color or higher</td>
</tr>
</tbody>
</table>

**Memo**

- QuickTime is required to play back movies transferred to a computer with an OS other than Windows 8 and Windows 8.1. (A computer with Windows 8 or Windows 8.1 can play back movies with a pre-installed player software.)
- You can download it from the following site: http://www.apple.com/quicktime/download/

**Macintosh**

<table>
<thead>
<tr>
<th>OS</th>
<th>OS X 10.10, 10.9, 10.8, or 10.7</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPU</td>

For Using Your Camera Safely

We have paid close attention to the safety of this camera. When using this camera, we request your special attention regarding items marked with the following symbols.

⚠️ Warning  
This symbol indicates that ignoring this item could cause serious personal injuries.

⚠️ Caution  
This symbol indicates that ignoring this item could cause minor or medium personal injuries, or loss of property.

About the Camera

⚠️ Warning
• Do not disassemble or modify the camera. High voltage areas are present inside the camera, with the risk of electric shock.
• If the camera interior is exposed due to dropping or otherwise damaging the camera, never touch the exposed portion. There is a risk of electric shock.
• Do not aim the camera at the sun or other strong light sources when taking pictures or leave the camera sitting in direct sunlight with a lens cap off. Doing so may cause the camera to malfunction or cause a fire.
• Do not look at the sun or other strong light sources through a lens. Doing so may lead to a loss of eyesight or cause vision to be impaired.
• If any irregularities occur during use, such as smoke or a strange odor, stop use immediately, remove the battery or the AC adapter, and contact your nearest service center. Continued use can cause a fire or electrical shock.

⚠️ Caution
• Do not place your finger over the flash when discharging the flash. You may burn yourself.
• Do not cover the flash with clothing when discharging the flash. Discoloration may occur.
• Some portions of the camera heat up during use. There is a risk of low temperature burns when holding such portions for long periods.

• Should the monitor be damaged, be careful of glass fragments. Also, be careful not to allow the liquid crystal to get on your skin or in your eyes or mouth.
• Depending on your individual factors or physical condition, the use of the camera may cause itching, rashes or blisters. In case of any abnormality, stop using the camera and get medical attention immediately.

About the Battery Charger and AC Adapter

⚠️ Warning
• Always use the battery charger and AC adapter exclusively developed for this camera, with the specified power and voltage. Using a battery charger or AC adapter not exclusive to this camera, or using the exclusive battery charger or AC adapter with an unspecified power or voltage can cause a fire, electric shock, or camera breakdown. The specified voltage is 100 - 240V AC.
• Do not disassemble or modify the product. This can cause a fire or electrical shock.
• If the generation of smoke or strange odor from the product or other abnormality occurs, immediately discontinue using and consult your nearest service center. Continued use can cause a fire or electrical shock.
• If water should happen to get inside the product, consult your nearest service center. Continued use can cause a fire or electrical shock.
• If you see a lightning flash or hear thunder during use of the battery charger or AC adapter, unplug the power plug and discontinue using. Continued use can cause damage to the product, fire or electrical shock.
• Wipe off the power plug if it should become covered with dust. Accumulated dust may cause a fire.
• To reduce the risk of hazards, use only CSA/UL certified power supply cord set, cord is Type SPT-2 or heavier, minimum NO.18 AWG copper, one end with a molded-on male attachment plug cap (with a specified NEMA configuration), and the other is provided with a molded-on female connector body (with a specified IEC nonindustrial type configuration) or the equivalent.

⚠️ Caution
• Do not place or drop heavy objects on or forcefully bend the AC plug cord. Doing so may damage the cord. Should the AC plug cord be damaged, consult your nearest service center.
• Do not touch or short-circuit the terminal area of the AC plug cord while the cord is plugged in.
• Do not handle the power plug with wet hands. This can cause an electric shock.
• Do not drop the product, or subject it to violent impact. This can cause the product to breakdown.
• Do not use the battery charger D-BC109 to charge batteries other than the rechargeable lithium-ion battery D-LI109. Attempting to charge other types of batteries may cause an explosion or heating, or may damage the battery charger.

About the Rechargeable Lithium-ion Battery

⚠️ Warning
• If any leakage from the battery should come in contact with your eyes, do not rub them. Flush your eyes with clean water and get medical attention immediately.

⚠️ Caution
• Only use the specified battery with this camera. Use of other batteries may cause an explosion or fire.
• Do not disassemble the battery. Disassembling the battery may cause an explosion or leakage.
• Remove the battery from the camera immediately if it becomes hot or begins to smoke. Be careful not to burn yourself during removal.
• Keep wires, hairpins, and other metal objects away from the + and - contacts of the battery.
• Do not short the battery or dispose of the battery in fire. This can cause an explosion or fire.
• If any leakage from the battery should come in contact with skin or clothing, it may cause irritation to the skin. Wash the affected areas thoroughly with water.
• Precautions for D-LI109 Battery Usage:
  - USE SPECIFIED CHARGER ONLY.
  - DO NOT INCINERATE.
  - DO NOT DISASSEMBLE.
  - DO NOT SHORT CIRCUIT.
  - DO NOT EXPOSE TO HIGH TEMP. (140°F / 60°C)

Keep the Camera and its Accessories out of the Reach of Small Children

⚠️ Warning
• Do not place the camera and its accessories within the reach of small children.
  1. If the product falls or is operated accidentally, it may cause serious personal injuries.
  2. Wrapping the strap around a neck may cause suffocation.
  3. To avoid the risk of a small accessory such as the battery or memory cards from being swallowed by mistake, keep them out of the reach of small children. Seek medical attention immediately if an accessory is accidentally swallowed.
Before Using Your Camera

- When the camera has not been used for a long time, confirm that it is still working properly, particularly prior to taking important pictures (such as at a wedding or when traveling). Contents of the recording cannot be guaranteed if recording, playback or transferring your data to a computer, etc. is not possible due to a malfunction of your camera or recording media (memory cards), etc.

About the Battery and Charger

- To keep the battery in optimum condition, avoid storing it in a fully charged state or in high temperatures.
- If the battery is left inserted and the camera is not used for a long time, the battery will over-discharge and shorten the battery's life.
- Charging the battery a day before use or on the day of use is recommended.
- The AC plug cord provided with this camera is developed exclusively for the battery charger D-BC109. Do not use it with other devices.

Precautions on Carrying and Using Your Camera

- Do not subject the camera to high temperatures or high humidity. Do not leave the camera in a vehicle, as the temperature can get very high.
- Do not subject the camera to strong vibrations, shocks, or pressure. Use a cushion to protect the camera from vibrations of motorcycles, automobiles, or ships.
- The temperature range for camera use is -10°C to 40°C (14°F to 104°F).
- The monitor may appear black at high temperatures, but will return to normal at normal temperatures.
- The monitor may respond more slowly at low temperatures. This is due to liquid crystal properties, and is not a malfunction.
- Sudden temperature changes will cause condensation on the inside and outside of the camera. Place the camera in your bag or a plastic bag, and remove it after temperatures of the camera and surroundings are equalized.

Cleaning Your Camera

- Do not clean the camera with organic solvents such as thinner, alcohol, and benzine.
- Use a lens brush to remove dust accumulated on the lens. Never use a spray blower for cleaning as it may damage the lens.
- Please contact your nearest service center for professional cleaning of the CMOS sensor. (This will involve a fee.)
- Periodic inspections are recommended every one to two years to maintain high performance.

Storing Your Camera

- Do not store the camera with preservatives or chemicals. Storage in high temperatures and high humidity can cause mold to grow on the camera. Remove the camera from its case and store it in a dry and well-ventilated place.
- Avoid using or storing the camera where it may be exposed to static electricity or electrical interference.
- Avoid using or storing the camera in direct sunlight or in locations where it may be exposed to rapid changes in temperature or to condensation.

- Avoid contact with garbage, mud, sand, dust, water, toxic gases, or salt. These could cause the camera to breakdown. Wipe the camera to dry off any rain or water drops.
- Do not press on the monitor with excessive force. This could cause it to break or malfunction.
- Be careful not to overtighten the screw in the tripod socket when using a tripod.
About SD Memory Cards

• The SD Memory Card is equipped with a write-protect switch. Setting the switch to LOCK prevents new data from being recorded on the card, the stored data from being deleted, and the card from being formatted by the camera or computer.
• The SD Memory Card may be hot when removing the card immediately after using the camera.
• Do not remove the SD Memory Card or turn off the power while the card is being accessed. This may cause the data to be lost or the card to be damaged.
• Do not bend the SD Memory Card or subject it to violent impact. Keep it away from water and store away from high temperatures.
• Do not remove the SD Memory Card while formatting. The card may be damaged and become unusable.
• Data on the SD Memory Card may be deleted in the following circumstances. We do not accept any liability for data that is deleted if
  1. the SD Memory Card is mishandled by the user.
  2. the SD Memory Card is exposed to static electricity or electrical interference.
  3. the SD Memory Card has not been used for a long time.
  4. the SD Memory Card or the battery is removed while the card is being accessed.
• If the SD Memory Card is not used for a long time, the data on the card may become unreadable. Be sure to regularly make a backup of important data on a computer.
• Format new SD Memory Cards. Also format SD Memory Cards previously used with other cameras.
• Please note that deleting data stored on an SD Memory Card, or formatting an SD Memory Card does not completely erase the original data. Deleted data can sometimes be recovered using commercially available software. If you are going to discard, give away or sell your SD Memory Card, you should ensure that the data on the card is completely deleted or the card itself is destroyed if it contains any personal or sensitive information.
• The data on your SD Memory Card should be managed at your own risk.

About the Wireless LAN Function

• Do not use the camera in a place where electrical products, AV/OA devices, and so on generate magnetic fields and electromagnetic waves.
• If the camera is affected by magnetic fields and electromagnetic waves, it may not be able to communicate.
• If the camera is used near a TV or a radio, poor reception or TV screen glitch may occur.
• If there are multiple wireless LAN access points near the camera and the same channel is used, search operation may not be executed correctly.
• The security of your data stored, sent or received is your own responsibility.

In the frequency band used by the camera, along with industrial, scientific, and medical devices such as a microwave oven, premises radio stations (wireless stations requiring license) and specified low power radio stations (wireless stations not requiring license) for mobile object identification used in factory production lines, etc., and amateur radio stations (wireless stations requiring license) are operated.

1. Before using the camera, confirm that premises radio stations and specified low power radio stations for mobile object identification and amateur radio stations are not operated in the vicinity.
2. In the event that the camera causes harmful radio wave interference to premises radio stations for mobile object identification, immediately change the frequency being used to avoid interference.
3. If you have other troubles such that the camera causes harmful radio wave interference to specified low power radio stations for mobile object identification or to amateur radio stations, contact your nearest service center.

This camera conforms to the technical standards under the Radio Law and Telecommunications Business Law and the certification of conformance to technical standards can be displayed on the monitor.

The certification marks of conformance to wireless technical standards can be displayed from [Certification Marks] of the 4 menu.

Refer to “Using the Menus” (p.19) for how to use the menus.

All our cameras purchased through authorized bona fide photographic distribution channels are guaranteed against defects of material or workmanship for a period of twelve months from the date of your purchase. Service will be rendered, and defective parts will be replaced without cost to you within that period, provided the camera does not show evidence of impact, sand or liquid damage, mishandling, tampering, battery or chemical corrosion, operation contrary to operating instructions, or modification by an unauthorized repair shop. The manufacturer or its authorized representatives shall not be liable for any repair or alterations except those made with its written consent and shall not be liable for damages from delay or loss of use or from other indirect or consequential damages of any kind, whether caused by defective material or workmanship or otherwise; and it is expressly agreed that the liability of the manufacturer or its representatives under all guarantees or warranties, whether expressed or implied, is strictly limited to the replacement of parts as hereinbefore provided. No refunds will be made on repairs by non-authorized service facilities.

Procedure During 12-month Warranty Period
Any camera which proves defective during the 12-month warranty period should be returned to the dealer from whom you purchased the camera or to the manufacturer. If there are no representatives of the manufacturer in your country, send the camera to the manufacturer, with postage prepaid. In this case, it will take a considerable length of time before the camera can be returned to you owing to the complicated customs procedures required. If the camera is covered by warranty, repairs will be made and parts replaced free of charge, and the camera will be returned to you upon completion of servicing. If the camera is not covered by warranty, regular charges of the manufacturer or of its representatives will apply. Shipping charges are to be borne by the owner. If your camera was purchased outside of the country where you wish to have it serviced during the warranty period, regular handling and servicing fees may be charged by the manufacturer’s representatives in that country. Notwithstanding this, your camera returned to the manufacturer will be serviced free of charge according to this procedure and warranty policy. In any case, however, shipping charges and customs clearance fees to be borne by the sender. To prove the date of your purchase when required, please keep the receipt or bills covering the purchase of your camera for at least a year. Before sending your camera for servicing, please make sure that you are sending it to the manufacturer’s authorized representatives or their approved repair shops, unless you are sending it directly to the manufacturer. Always obtain a quotation for the service charge, and only after you accept the quoted service charge, instruct the service station to proceed with the servicing.

- This warranty policy does not affect the customer’s statutory rights.
- The local warranty policies available from our distributors in some countries can supersede this warranty policy. Therefore, we recommend that you review the warranty card supplied with your product at the time of purchase, or contact our distributor in your country for more information and to receive a copy of the warranty policy.
For customers in USA
STATEMENT OF FCC COMPLIANCE
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not approved by the party responsible for compliance could void the user’s authority to operate the equipment.
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
* Consult the dealer or an experienced radio/TV technician for help.

FOR CALIFORNIA, U.S.A. ONLY
Perchlorate Material-special handling may apply.
The lithium battery used in this camera contains perchlorate material, which may require special handling. See www.dtsc.ca.gov/hazardouswaste/perchlorate

For customers in Canada
Industry Canada (IC) Compliance Notice
This Class B digital apparatus complies with Canadian ICES-003.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Pour les utilisateurs au Canada
Industrie Canada (IC) Avis de Conformité
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l’appareil ne doit pas produire de brouillage, et (2) l’utilisateur de l’appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.
Declaration of Conformity
According to 47CFR, Parts 2 and 15 for
Class B Personal Computers and Peripherals

We: RICOH IMAGING AMERICAS CORPORATION
Located at: 633 17th Street, Suite 2600
Denver, Colorado 80202 U.S.A.
Phone: 800-877-0155
FAX: 303-790-1131

Declare under sole responsibility that the product identified herein complies with 47CFR Parts 2 and 15 of the FCC rules as a Class B digital device. Each product marketed is identical to the representative unit tested and found to be compliant with the standards. Records maintained continue to reflect the equipment being produced can be expected to be within the variation accepted, due to quantity production and testing on the statistical basis as required by 47CFR §2.909. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. The above named party is responsible for ensuring that the equipment complies with the standards of 47CFR §15.101 to §15.109.

Information for Users on Collection and Disposal of Old Equipment and Used Batteries

1. In the European Union

These symbols on the products, packaging and/or accompanying documents mean that used electrical and electronic equipment and batteries should not be mixed with general household waste.

Used electrical/electronic equipment and batteries must be treated separately and in accordance with legislation that requires proper treatment, recovery and recycling of these products.

By disposing of these products correctly you will help ensure that the waste undergoes the necessary treatment, recovery and recycling and thus prevent potential negative effects on the environment and human health which could otherwise arise due to inappropriate waste handling.

If a chemical symbol is added beneath the symbol shown above, in accordance with the Battery Directive, this indicates that a heavy metal (Hg = Mercury, Cd = Cadmium, Pb = Lead) is present in the battery at a concentration above an applicable threshold specified in the Battery Directive.

For more information about collection and recycling of used products, please contact your local authorities, your waste disposal service or the point of sale where you purchased the products.
2. In other countries outside the EU

These symbols are only valid in the European Union. If you wish to discard used products, please contact your local authorities or dealer and ask for the correct method of disposal.

For Switzerland: Used electrical/electronic equipment can be returned free of charge to the dealer, even when you don’t purchase a new product. Further collection facilities are listed on the home page of www.swico.ch or www.sens.ch.
Checking the Contents of the Package

- Hot shoe cover FK (Installed on camera)
- Eyecup FR (Installed on camera)
- Body mount cover (Installed on camera)
- Rechargeable Lithium-ion Battery D-LI109
- Battery charger D-BC109
- AC plug cord
- Strap O-ST132
- Software (CD-ROM) S-SW156
- Start Guide

Lenses you can use
Lenses that can be used with this camera are DA, DA L, D FA and FA J lenses and lenses that have an 
(Auto) position on the aperture ring. To use any other lens or accessory, see p.113.
To ensure the best performance from your camera, please read the Operating Manual before using the camera.
