Federal Communications Commission (FCC) Compliance

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the distance between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: A shielded-type power cord is required in order to meet FCC emission limits and to prevent interference to radio and television reception. Use only shielded cable to connect I/O devices to this equipment. Any changes or modifications not expressly approved by the manufacturer may void your warranty and service agreement.

Declaration of Conformity

This device complies with Part 15 of the FCC rules. Operation is subject to the following conditions:
- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

Trademark Recognition

Windows 2000/XP/Vista/Win7 are registered trademarks of Microsoft Corporation in the United States and/or other countries. Windows is an abbreviated term referring to the Microsoft Windows Operation System. All other companies or product names are trademarks or registered trademarks of their respective companies.

Safety and Handling Precautions

Camera Information

- Do not take apart or attempt to service the camera yourself.
- Do not expose the camera to moisture, or extreme temperatures.
- Allow the camera to warm up when moving from cold to warm temperatures.
- Do not touch and put pressure on the camera lens.
- Do not expose the lens to direct sunlight for extended periods.
- Do not use abrasive chemicals, cleaning solvents or strong detergents to clean the product. Wipe the product with a slightly damp soft cloth.
- Do not use the flash or LED Light near a person's eyes to prevent possible eye injury.
- To prevent you from falling over or resulting in traffic accident, please do not use the camera while you are walking, driving or riding a vehicle.
- Please handle the camera strap with care, and never place the strap around the neck of an infant or child. Wrapping the strap around a neck may cause suffocation.
- Do not subject the LCD monitor to impact.
- To prevent the risk of fire or electric shock, do not expose this appliance to rain or moisture.
Battery Information

- Turn off the camera before installing or removing the battery.
- Use only the provided batteries or type of battery and charger that came with your camera. Using other types of battery or charger may damage the equipment and invalidate the warranty.
- When using Li-ion battery in this product, ensure that they are inserted correctly. Inserting the battery upside down can cause damage to the product and possibly cause an explosion.
- When the camera is used for an extended period of time, it is normal for the camera body to feel warm.
- Download all pictures and remove the battery from the camera if you are going to store the camera for a long period of time.
- The type of battery and the battery power level may cause the lens to be stuck up. Ensure you use the correct battery type and use a fully charged battery.
- Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.
- Please keep the batteries out of the reach of children to prevent from swallowing batteries, which might cause poisoning.

Introduction

Congratulations on your purchase of the new digital camera. Capturing high-quality digital images is fast and easy with this state-of-the-art smart camera.

System Requirements

In order to get the most out of your camera, your computer must meet the following system requirements:

For Windows:
• Windows XP/Vista/Win7
• Processor: Intel Pentium D 3.0GHz or equivalent AMD Athlon, or faster
• Memory: 2 GB or above
• HDD space: 300MB or above
• 32bit color display monitor
• Microsoft DirectX 9.0C
• USB port and CD-ROM drive

For Macintosh:
• Mac OS 10.3.9 ~ 10.7.2 <Mass storage>
• Memory: 1 GB or above
• Q. Time player ver. 6.0.3 or above
• USB port and CD-ROM drive

Main Features
• 18 mega pixels resolution
• Up to 36x optical zoom and 5x digital zoom
• 3.0 inch color LCD monitor
• 128MB internal flash memory with optional external SD/SDHC/SDXC card
• Supports up to 4GB of SD card, and up to 32GB of SDHC card and to 64GB of SDXC card
• Easy-to-use button interface
• DCF, DPOF, PictBridge compatibility
• Slide Show to review still images
• A/V output and HDMI output to view your images and videos on your TV
• USB port to transfer images and videos to your PC
Package Contents
Please check the contents of your camera package. It should contain:

- Digital camera
- Rechargeable battery x 1 pcs
- USB adapter (The type of plug may vary depending on the country or region)
- USB cable
- AV cable (optional)
- Neck strap
- Lens cover
- Lens Strap
- AC Cord (The type of plug may vary depending on the country or region) (optional)
- Battery charger (optional)
- Camera pouch (optional)
- HDMI cable (optional)
- CD-Rom (optional)
- Quick Start Guide/User Manual (optional)

<td></td>
<td>3. In Menu, press to navigate through the menu and submenu selections.</td>
</tr>
</tbody>
</table>
Monitor Angle

When taking pictures with camera at high or low angle. The monitor can be opened outward from 0° to 80° and the screen can be flipped from 0° to 135°.

- The monitor could be fixed at various angles, but it would be firmly fixed at five places as the illustration above. (Monitor: 0°, 45° and 80°; Screen: 0° and 135°)
- Do not operate with excessive force when changing the angle of the monitor, otherwise the connection between camera and monitor may be damaged.
Getting Started

Attach the Camera Strap

1. Please make sure the lens cap and the cap strap are well combined.
2. Attach the lens cap to the camera strap as the illustration.
3. Follow the steps below to attach the camera strap to the camera.

- In order to avoid dropping the camera, attaching the strap before using the camera is recommended.
- Wrapping the strap around your neck is dangerous. Take care that children do not hang the strap around their neck.
- The cap is the protection for the lens, please be careful not to lose the lens cap.
**Inserting the Battery**

Follow these instructions to insert the rechargeable battery into the battery/memory card compartment. Please read "Battery Information" on page 2 before inserting/removing batteries.

1. Make sure the power is off before inserting the battery.

2. Unlock and open the battery/memory card compartment at the bottom of the camera.

3. Insert the batteries into the compartment with the terminal facing inside the camera with correct orientation as shown.

4. Close and lock the battery/memory card compartment. In order to prevent the battery from dropping, please make sure the compartment is locked firmly.
Camera Memory

Internal memory
Your camera is equipped with 128 MB of internal memory. Users can store files up to approximately 67 MB. If there is no memory card inserted in the memory card slot, all images and videos recorded are automatically stored in the internal memory.

External storage
Your camera supports SD cards of up to 4 GB in size. It also supports SDHC cards with a maximum capacity of 32 GB. Then also supports SDXC cards with a maximum capacity of 64 GB. If there is a storage card inserted in the memory slot, the camera automatically saves all images and videos in the external storage card. The icon  indicates the camera is using SD card.

Not all cards may be compatible with your camera. When purchasing a card, please check the card’s specifications and take the camera with you.

Inserting an SD/SDHC/SDXC Memory Card

Expand your camera’s storage by using SD, SDHC or SDXC memory cards.

1. Unlock and open the Battery/memory card compartment at the bottom of the camera.
2. Insert the SD/SDHC/SDXC card into the memory card slot with the metallic part facing the back side of the camera.
3. Push the SD/SDHC/SDXC card into the memory slot until it clicks into place.
4. Close and lock the Battery/memory card compartment.

To remove the SD/SDHC/SDXC card
5. Unlock and open the battery/memory card compartment.
6. Gently push the card until it pops out.
7. Pull out the card carefully.

• Windows 2000/XP does not support SDXC card (exFAT format). But in Windows XP (Service Pack 2 or 3), you can download exFAT patch update to support SDXC card.
• To use the SDXC card with Mac OS, the OS version should be 10.5 or higher.
• The memory card that is not inserted correctly may cause damage to the camera. Please be careful when inserting the memory card.
• To prevent children from swallowing the memory card, please keep the memory card out of reach of children.
**Charging the Battery by USB**

In other way charging the battery, you can use the USB cable to connect the camera with PC or USB adapter.

1. Connect the camera with the USB cable as shown.
2. Connect the other end with the USB adapter and plug it into a power outlet or with the USB port of PC directly for charging.
   - When the battery is charging, the LED indicator flashes.
   - When the battery is fully charged, the LED indicator goes off.
   - When the battery is unusual charged, the LED indicator flashes rapidly.
   - When the camera charges without the battery inside, the LED indicator goes off.
   - It's recommended not operating the camera when charging.
   - Actual charging time depends on current battery capacity and charging conditions.
   - You can also charge the battery with Apple adapter. Its power output meets the standard 5V/500mA.
   - When the battery is removing during charging, it will recover charging after you unplugging and replugging USB.

**Turning the Power On and Off**

There are two ways to turn on the camera:
- The startup image displays briefly and the startup sound plays if enabled. The zoom lens extends and the camera is turned on in Record mode.
- The camera is turned on in Playback mode. The zoom lens is not extended.

To turn off the camera, press the **Power button**.

See "Modes" on page 16 to know more about Record and Playback mode.

**Initial Settings**

When you turn on your camera for the first time, you will be asked to do the initial settings of your camera. First is the setup of language menu. Specify in which language menus and messages are to be displayed on the LCD monitor.

**Setting the Language**

1. Press ▲, ▼, ◀ or ► to move through the selection.
2. Select a language, and then press OK to apply.

**Setting the Date & Time**

1. Press ◀ or ► to move through the selection.
2. Press ▲ or ▼ keys to change the value for the date and time.
3. Press OK to apply.
4. If necessary, press MENU to close the menu.

Now, you are ready to start taking images and videos.

Holding down ▲ or ▼ keys to change the values continuously.
Modes

Your camera has three modes:

Record Mode
This is the default mode while you turn on the camera every time. You are able to take images in this mode.

Playback mode
Press the Playback button after the camera is turned on to view and edit captured images or playback videos. The recording of voice memo attached to images is available in this mode.

Movie mode
Press the Movie button after the camera is start/stop recording video in this mode.
Using the LCD monitor

The LCD monitor shows all important information regarding camera settings as well as the visual image of your image or video. The display on the LCD monitor is called the On Screen Display or OSD.

Changing the LCD Monitor Display to View finder

The shooting screen, captured photos and on-screen menu can be displayed on either LCD monitor or Electronic viewfinder. Press **EVF LCD button** to switch the display view between LCD and EVF. Once displayed on one of them, the other should be close. It shows exactly the same display on LCD and EVF.

- The **Power Save** function can be also performed while using EVF.
- Turn the diopter adjustment knob next to the viewfinder to adjust the focus of viewfinder.

Recording Images, Videos and Voices

Taking Images

Now that you are familiar with your camera, you are now ready to take your images. Taking images with your camera is very simple.

1. Turn on the camera by pressing the **Power button**.

2. Frame the shot using the focus bracket on the LCD monitor. See illustration on the right.

3. Pressing the **Shutter button** down halfway automatically focuses and adjusts the exposure, and pressing the **Shutter button** down fully captures the images.

When the shake warning icon 📸 appears, hold the camera steadily, with your arms at your side or use a tripod to stabilize the camera to prevent blurred images.
**Setting the Zoom Control**

Using a combination of 36 times optical zoom and 5 times digital zoom permits zoom photography at up to 180 times magnification. While the digital zoom can be a useful feature, the more an image is enlarged (zoomed), the more pixelated (grainier) the image will appear. Please refer to "Setting the Digital Zoom" on page 40 on how to setup digital zoom.

To adjust the optical zoom:
1. Spin the **Zoom dial** to zoom in or zoom out an image.
2. The zoom indicator appears on the LCD monitor.
3. You can also rotate the **Side zoom control** to perform zoom.

**Zoom dial**
1. Spin the dial clockwise (right) to zoom in.
2. Spin the dial counterclockwise (left) to zoom out.

**Side zoom control**
1. Rotate the side zoom control up to zoom in.
2. Rotate the side zoom control down to zoom out.

To adjust the digital zoom:
2. Spin the **Zoom dial** clockwise/counterclockwise optically zooms in/out to the maximum until it stops.
3. Release the **Zoom dial**.

![Optical zoom 1X to 36X and Digital zoom 1X to 5X](image_url)
Using EV Compensation

Images can be captured with the overall scene intentionally made brighter or darker. These settings are used when a suitable brightness (exposure) cannot otherwise be obtained in circumstances where the difference in brightness between the subject and the background (the contrast) is large, or when the subject that you wish to capture is very small within the scene. Available for still images only.

- Press the **EV/ Up** button on your camera to launch the EV Compensation function.
- To adjust EV settings, press the ▲ or ◀ keys or rotate the **command dial** to increase/decrease the value. As you adjust the settings, the LCD monitor synchronously displays the image applying the EV settings. Press the **OK** button to save and apply changes.
- The EV setting is only available in shooting still images.

![EV/ Up button](image)

Using Flash

When taking pictures in difficult lighting conditions, use the **Flash/ Right** button to get correct exposure. This function cannot be activated in recording videos or continuous shooting.

To activate Flash:
- Press the **Flash/ Right** button on your camera to launch the Flash function.
- To select flash options, press the ◀ or ▶ keys or rotate the **command dial**. Press the **OK** button to save and apply changes.

Your camera is equipped with five flash modes:

- **Auto Flash.** The flash fires automatically whenever extra lighting is needed.
- **Red-eye reduction.** The flash fires twice to reduce the red-eye effect.
- **Forced on.** The flash fires whenever you press the Shutter button regardless of lighting conditions.
- **Slow sync.** The flash fires with a slow shutter speed.
- **Forced off.** The flash is turned off.

- Flash function is only available in shooting still images, but not available in Continuous shooting mode, HDR and Handheld night shot.
- Do not charge the flash while spinning the Zoom dial. Charge the flash after releasing the zoom dial if necessary.
- The flash mode will remain at “Flash Off” if the flash does not open.
- When the flash is closed, flash mode is automatically set to flash off.
- When activating flashlight, the Flash won’t pop up automatically. Please open the Flash manually by pressing the Flash button.
Using Self-timer

The Self-timer allows you to take images after a pre-defined delay. While burst lets you take consecutive shots. This function is only available in recording still images. The Self-timer setting is automatically set to off when you turn off the camera.

To activate Self-timer:
• Press the Self-timer/Down button on your camera to launch the Self-timer function.
• To select Self-timer options, press the ▲ or ▼ keys or rotate the command dial. Press the OK button to save and apply changes.

Your camera is equipped with three Self-timer modes:

- **Off.** Captures an image without time delay.
- **10 Sec.** Sets a 10-second delay to capture image after pressing the Shutter button.
- **2 Sec.** Sets a 2-second delay to capture image after pressing the Shutter button.
- **Double.** Performs delay and capture twice:
  • Performs a 10-second delay, then captures the image.
  • Performs another 2-second delay then captures the image again.

Setting the Focus Mode

This function allows users to define the type focus when recording a still image or a video clip.

To set the Focus mode:
• Press the Focus/Left button on your camera to launch the Focus function.
• To select focus options, press the ▲ or ▼ keys or rotate the command dial. Press the OK button to save and apply changes.

Your camera supports the five focus modes:

- **AF Auto Focus.** With auto focus, the camera will focus on the subject automatically.
- **Macro/Super Macro.** This mode is designed for close-up photography. When Super Macro is set, the focus cannot be adjusted until Super Macro is canceled.
- **Infinity.** When Infinity is set, the camera focuses on distant objects.
- **MF Manual Focus.** With manual focus, you can adjust the focus range (Wide: 10 cm to infinity; Tele: 220 cm to infinity) by press Up/Down button. Press OK button to lock the focus and exit the adjusting screen.
Using the AE/ AF LOCK Button

Use the AE/ AF LOCK button on your camera to lock focus and exposure.

1. To lock AE/AF, press and hold the AE/AF LOCK button for 1 second, or half press the shutter button then press the AE/AF LOCK button in Photo Mode. The AE/AF would be kept locked even release the shutter button.
2. To unlock AE/AF by any one of the following ways:
   - Press the AE/AF LOCK button
   - Rotate the Zoom Control or switch to Super Macro
   - Rotate the Model dial
   - Press the MENU/Playback/Movie/Power button to launch another function
   - Lower/Raise the built-in flash

Using the Delete Button

Use the Delete button on your camera to delete an image/video clip.

The Delete function allows to remove unwanted files in the internal memory or on the memory card. Protected files cannot be erased, to delete, unprotect the file first. See "Protect" on page 47.

To delete an image/video clip:

1. Press the Playback button on the camera.
2. View images/videos clips in Single navigation mode.
3. Use the or keys to scroll the display.
4. When the desired image/video clip is displayed on the LCD monitor, press the Delete button.
5. A confirmation selection appears on screen.
6. To close the Delete function and go back to the single navigation mode, press Menu button.

To delete a single file:
1. After a confirmation selection appears on screen. Select Single.
2. Press the OK button and select Yes to delete.
3. The next image is displayed on the LCD monitor. To delete another file, use the or keys to scroll through the images/videos clip. Repeat steps 1 to 2.
4. To close the Delete function and go back to the single navigation mode, press Menu button.

To delete attached voice memo:
1. After a confirmation selection appears on screen. Select Single.
2. A delete voice memo option will be added to the selection.
3. Select and press OK to delete voice memo only and back to single navigation.
4. Or select Yes to delete both image and its voice memo.
To delete multiple files:
1. After a confirmation selection appears on screen. Select Multi.
2. The images are displayed in thumbnail view on the LCD monitor.
3. Use the ◄ or ► keys to move through the files.
4. When the desired image/video clip is highlighted, use the ▲ or ▼ keys to mark/unmark image/video clip for deletion.
5. Repeat step 4 until all desired images for deletion are marked.
6. Press the OK button. A confirmation selection appears.
7. Select Yes to confirm.
8. Press the OK button to delete marked files.

To delete all files:
1. After a confirmation selection appears on screen. Select All.
2. Select Yes.
3. Press the OK button to delete all files.

In Record mode, press Delete button to delete the last captured image directly.
**Recording Videos**

You can record videos with the camera, the available recording time depends on the capacity of the memory card. Videos can be recorded until the maximum memory capacity has been reached. However the length of a single video may be limited (the limitation depends on the camera model).

1. Press the **Movie button** to start recording.
2. Focus your camera on the subject that you want to take.
3. Use the **Zoom dial** to zoom in and zoom out an image.
4. To stop recording, press the **Movie button**.

- The camera will automatically stop recording when the memory capacity is full.
- It will automatically stop recording when the recording time is over 29 minutes or the file size is over 4 GB.
- It will automatically stop recording when the recording time is over 30 seconds (For VGAp120).
- Only Optical zoom is available while recording a video (please enable Optical zoom under Record menu before recording).
- Sound cannot be recorded while using zooms (Spinning the **Zoom dial**.)
- Power save is not available in video recording or pause recording. If pause recording to 5 minutes, auto stop recording to prevent camera overheating.
- When the temperature of CMOS Sensor is over 63°C, the camera will display the warning message.
- When the temperature of CMOS Sensor is over 65°C, the camera will shutdown automatically.

**PIV function**

During the movie recording, an icon displays on LCD means that the current screen can be stored as a photo without stopping movie recording by full pressing the shutter button. The PIV feature only applicable to movie size: 1080p30, 720p30 and VGAp30.

- When the movie size is 1080p (30fps), the capture photos are saved at 1920 x 1080 resolution.
- When the movie size is 720p (30fps), the capture photos are saved at 1280 x 720 resolution.
- When the movie size is VGA (30fps), the capture photos are saved at 640 x 480 resolution.

**Settings of Recording Videos**

See "Using the Movie Menu" on page 42 for more details.
Mode dial

There are 10 recording modes can be set by turning the Mode dial, such as Intelligent Scene, Scene mode, Night Scene, Night Portrait, Continuous Shooting, HDR, Manual Exposure, Aperture Priority, Shutter Priority and Program. Once turning the Mode dial, it will enter the selected mode immediately even in Playback mode or during movie recording.

For detail operation, please see the following sections.

The table below shows the available settings for Mode dial.

<table>
<thead>
<tr>

Using Intelligent Scene

This feature is most useful for novice users to capture great images even without basic knowledge of photography. Simply frame the shot with the help of Intelligent Scene Mode, the camera automatically recognizes 7 kinds of scenes - Portrait, Landscape, Macro, Backlight, Backlight Portrait, Night Scene and Night Portrait - and selects the ideal settings.

**Intelligent scene icon. After the camera detects the shooting conditions, this icon changes to show the detected scene mode.**

To activate Intelligent Scene

1. Turn the Mode dial to icon 📷.
2. Focus the camera on the subject to capture.
3. The camera detects the shooting conditions and switches to an appropriate scene mode.
4. Half press the Shutter button to focus the subject. The frame turns green to indicate focus is set.
5. Press the Shutter button to take the shot.

Setting the Scene Mode

By simply selecting one of the following 19 modes, you can capture the image with the most appropriate settings.

1. Turn the Mode dial to icon SCN to enter last used Scene mode (Default: Portrait). Press MENU button to select other scene modes.
2. Use the navigation controls or rotate the command dial to move through the selection.
3. Press the OK button to save and activate the selected scene mode.

The table below shows the available scene mode settings.

<td></td>
</tr>
<tr>
<td>Miniature Effect</td>
<td>Blur the parts of photo to make the scene looks like a miniature scale model. It is recommended to capture from a high angle to simulate the miniature effect.</td>
<td></td>
</tr>
</tbody>
</table>
**Using Kids Mode**

Tactically, kids are the most difficult to photograph. They tend to be highly animated and can be a real challenge to make them pay attention for more than just a second or two. To capture a great moment for your kids, just keep the camera in kid mode. The mode provides higher shutter speed and always focuses on moving subject.

**Using Sports Mode**

When you need a series of sports motion images, such as a golf swing, or try to capture the images of a flying hummingbird/butterfly, be sure to switch the scene mode to sports mode.

**Using Stylish Mode**

The Stylish mode applies the following effects on the photo:

1. Over-saturated colors
2. Off-kilter exposure
3. Blurring
4. Darkening around the edges of photo

When you active Stylish mode, you can select Stylish settings (Stylish 1, Stylish 2, Stylish 3, Stylish 4) in Color mode under Function menu. The Stylish settings also support Movie mode.

**Using Party Mode**

Let the Party mode on! It can be difficult to get everyone on a party. While you have the whole gang together, take a group or family portrait. Party mode features on Red-eye reduction flash and face tracking. You'll miss fewer shots, and have more time to focus on enjoying the party.
Using Food Mode

How to share your dining experiences and comments of interesting widgets on your blog by close-up images? Just get the camera and set the scene with food mode. This mode features on macro focus and auto flash designed for close-up photography.

Macro focus and Auto Flash are enabled by using Food mode.

Using Panorama Mode

Use this feature to create a panoramic photo by moving the camera. You can combine several shots into one single image quickly and easily.

- The actual size of stitched image may be different due to the panoramic angle and stitching result as well as the level of camera shaking.
- It is recommended to use a tripod to stabilize the camera, and then move the camera slowly during capturing.
- The longest time of capturing is approximately 30 seconds.
- If you select From Top to Bottom or From Bottom to Top in 360-degree panorama, it is recommended to turn the camera over 90 degrees in order to make sure the stability during capturing.
- In Panorama mode, uneven brightness may result in difference between the captured image and its actual scene.

To stitch the still image

1. Press \( \downarrow \) key to launch the Angle Menu. Use the \( \uparrow \) or \( \downarrow \) keys or rotate the Command dial to select options. Press the OK button to save and apply changes.

2. Press \( \rightarrow \) key to launch the Direction Menu. Use the \( \leftarrow \) or \( \rightarrow \) keys or rotate the Command dial to select options. Press the OK button to save and apply changes.
3. Full press the shutter button to start shooting. When shooting starts, a white-cross locates on the center and a yellow line displays horizontally (or vertically) through the screen. In addition, a shooting bar displays to present the shooting position and the white portion of the bar indicates where has been taken.

4. If you move camera without keeping straight, the yellow line will move with the moving scene.

5. When the white portion of the bar goes to the end. The camera would finish automatically and save the panorama image.

**Using Miniature Effect Mode**

Once enter Miniature Effect mode, two parallel lines displayed on screen indicates where will not be blurred. The result preview won’t be showed immediately due to DSP (Digital Signal Processing) limitation. Please check the result in Auto Review or Playback mode.

Miniature preview in Playback mode
Using Love Portrait

Want to take a good image when there are just two of you? All you have to do is hold the camera and show your smiles together.

If over two faces had been recognized, the camera performs 2-second countdown with a beep notice then take a shot without pressing the Shutter button.

Using Self Portrait

When you are the one taking the picture for yourself, then self portrait mode is necessary besides the tripod. With your long arm’s help, the camera begin face tracking in self portrait mode. If a face had been recognized, the camera performs 2-second countdown with a beep notice then take a shot without pressing the Shutter button.

Tips to make a great shape by self portrait photography:

- Lean in towards the camera to reduce double chin.
- Angle your body and bend your arms to look slimmer.
- Keep your shoulders back.

Using Continuous Shooting

Turn the Mode dial to icon Continuous Shooting. Available shooting options only show up in Record Menu when the mode dial has been turned to Continuous Shooting. Pres ▲ or ▼ keys to select between the following settings:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Icon" /></td>
<td>High-speed Burst</td>
<td>Full press and hold the shutter button to take a continuous shooting in frame rate 10 fps (the maximum number of photos is 5).</td>
</tr>
<tr>
<td><img src="image2" alt="Icon" /></td>
<td>Pre-shooting</td>
<td>Capture images before pressing the shutter button. This feature begins by half pressing the shutter key, and continues when the shutter button is fully pressed.</td>
</tr>
<tr>
<td><img src="image3" alt="Icon" /></td>
<td>Sporty Burst 60</td>
<td>Use this feature to capture 25 photos in 2M (1920 x 1080) resolution at a shot.</td>
</tr>
<tr>
<td><img src="image4" alt="Icon" /></td>
<td>Sporty Burst 120</td>
<td>Use this feature to capture 50 photos in VGA resolution at a shot.</td>
</tr>
<tr>
<td><img src="image5" alt="Icon" /></td>
<td>Multi-shot 16</td>
<td>Full press the shutter button to take 16 shots at 30 fps and arrange them in a single photo.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• The image size is automatically set to 5M (2560 x 1920).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Auto review appears directly on the screen after every shot is taken, even if Auto Review is set to off.</td>
</tr>
</tbody>
</table>

Using HDR Mode

Active HDR mode preserves details in highlights and shadows, creating photos with natural contrast. Use for high contrast scenes, for example, when photographing brightly light outdoor scenery through a door/window, or taking pictures of shaded subjects on a sunny day. With this feature, the adjustment of contrast is accomplished in-camera and requires no additional post-processing for the bulk of images.
Using Manual Exposure

When the camera is in the manual exposure mode, you can change either aperture or shutter speed, or both.

To activate Manual Exposure
1. Turn the Mode dial to icon Manual Exposure.
2. Press OK button to switch between aperture value and shutter speed adjustment and vice versa.
3. Rotate the command dial to select the aperture value or shutter speed in loop.
4. Press the Shutter button to capture the image.

Using Aperture Priority Mode
This mode is designed for control the aperture value by user and let camera decide the shutter speed. The main impact that aperture had on images was with regards to Depth of Field. (DOF)
• Choose larger aperture, only one subject in focus but the background nice and blurred. (Shallow DOF)
• Choose smaller aperture, an image with everything in focus. (Great DOF)

To set Aperture values
1. Turn the Mode dial to icon Aperture Priority.
2. Rotate the command dial to select the aperture value in loop.
3. Press the Shutter button to capture the image.

Using Shutter Priority Mode
This mode is designed for capturing moving subjects. A faster shutter speed is required to freeze a motion (flying birds), while the slower shutter speed creates a sense of motion (water flowing).

To set Shutter values
1. Turn the Mode dial to icon Shutter Priority.
2. Rotate the command dial to select the shutter speed in loop.
3. Press the Shutter button to capture the image.
Using the Record Menu

If you are in Photo Mode, you can access the Record menu simply by pressing the **MENU button** on your camera.

When the menu is displayed, use the 4-way navigation control and the command dial and the **OK** button to move through menu selections and apply your desired settings. To close the menu anytime, press the menu button again.

**Record Menu**

The Record menu allows you to change modes, and setup other capture settings.

To go to Record Menu:

Turn on the camera by pressing **Power button**

1. Press **MENU** to launch the Record Menu.
2. Use the ▲ or ▼ keys or rotate the **Command dial** to move through the menu.
3. To select an item, press ► or **OK** button.
4. Change the submenu settings using the 4-way navigation control or the command dial.
5. Press the **OK** button to save and apply settings.

**Photo Size**

The Photo Size function is used to set the resolution before you capture the image. Changing the Photo Size affects the number of images that can be stored in your memory card. The higher the resolution, the more memory space is required.

The table below shows the Photo Size values for still images.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
Quality

The Quality sets the quality (compression) at which the image is captured. The quality determines the amount of compression applied to your images. Fine quality would give you the best images with sharper details and less compression. However, the higher the quality, the more memory space is required in your memory card.

<table>
<thead>

</tr>
</tbody>
</table>

**ISO**

This sets the sensitivity for capturing images. When the sensitivity is raised (and the ISO figure is increased), photography will become possible even in dark locations, but the more pixelated (grainier) the image will appear.

- Use a higher ISO setting in dim conditions and a lower ISO setting in brighter conditions.
Metering

This sets the metering method for calculating the exposure.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Setting the Exposure Bracketing

Use this feature to take photos with different exposure compensation. Bracketing records 3 continuous images in the following order: Standard exposure, Underexposure and Overexposure.

Available settings are: Off, ±0.3, ±0.7 and ±1.0.

Setting the AF Area

AF stands for Automatic Focus. This feature determines the area on which the camera focuses.

To set AF Area
1. From the Record menu, select AF Area.
2. Use the ▲ or ▼ keys to go through the selection.
3. Press the OK button to save and apply changes.

The table below shows the available AF area settings.

<table>
<thead>

</tr>
</tbody>
</table>
**Setting the AF Lamp**

The AF Lamp function allows you to record images even low light conditions.
If AF Lamp is set to Auto, the AF lamp located in the front of the camera, see "Front View" on page 7, emits an red light by half pressing the Shutter button allowing the camera to focus easily.

To set AF Lamp
1. From the Record menu, select **AF Lamp**.
2. Use the ▲ or ▼ keys to go through the selection.
3. Press the **OK** button to save and apply changes.

**Setting the AE-L/ AF-L**

This feature allows locking exposure or focus or both of them by pressing AE/AF LOCK button. You can define the AE/AF LOCK button to be one of the following functions:

- **AE-L**: Lock/Unlock exposure.
- **AF-L**: Lock/Unlock focus.
- **AE-L & AF-L**: Lock/Unlock both of exposure and focus.

Press the AE/AF LOCK button to unlock it.

**Setting the Digital Zoom**

This feature controls the digital zoom mode of your camera. Your camera enlarges an image using the optical zoom first. When the zoom scale exceeds 36X, the camera uses digital zoom.

To set Digital Zoom
1. From the Record menu, select **Digital Zoom**.
2. Use the ▲ or ▼ keys to go through the selection.
3. Press the **OK** button to save and apply changes.

The table below shows the available Digital Zoom settings.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>📸</td>
<td>On</td>
<td>Enlarges all image sizes, but the image quality deteriorates.</td>
</tr>
<tr>
<td>📸</td>
<td>Off</td>
<td>Uses the optical zoom only.</td>
</tr>
</tbody>
</table>

- Digital Zoom is not available in Face Tracking on.
- The maximum Intellect zoom scale varies depending on the image type and resolution.
Setting the Date Stamp

The date of recording can be printed directly on the still images. This function must be activated before the image is captured. Once date and time are stamped on an image, they can no longer be edited or deleted.

Limitations of Date Stamp functions are as follows:

• Available for still images only.
• This feature does not apply to continuous shooting mode.
• In vertical or rotated images, the date and time on your images still appear horizontally.

To set Date Stamp
1. From the Record menu, select **Date Stamp**.
2. Use the ▲ or ▼ keys to go through the selection.
3. Press the **OK** button to save and apply changes.

Setting Auto Review

The Auto Review function lets you view the captured image right after shooting it. If Auto review is On, the camera will display the captured image for **1 second** on the LCD monitor.

To set Auto Review
1. From the Record menu, select **Auto Review**.
2. Use the ▲ or ▼ keys to go through the selection.
3. Press the **OK** button to save and apply changes.

Setting Stabilizer

This function allows you to prevent blurred images caused by shaking.

1. Enable the **Stabilizer** under the **Record Menu**.
2. Use the ▲ or ▼ keys to go through the selection.
3. Press the **OK** button to save and apply changes.

Setting Night Scene

When you take pictures with Night Scene or Night Portrait, this function provides you the predefine settings for using hand-held or tripod.

This function ONLY shows up in Record Menu while using Night Scene or Night Portrait.
Setting Motion Detection

This feature reduces the effects of subject movement when taking photos.

The Motion Detection does not function in the following situations:
- When the flash fires.
- When the shooting mode is Night Scene, Night Portrait, Manual Exposure, Aperture Priority, Shutter Priority, Program, Portrait, Sunset, Backlight, Fireworks, Sports and Panorama.

Using the Movie Menu

You can access the Movie menu simply by pressing the MENU button on your camera. When the menu is displayed, use the 4-way navigation control and the OK button to move through menu selections and apply your desired settings. To close the menu anytime, press the menu button again.

Setting Movie Mode

Use this function to adjust the resolution and quality of movie clips.

The use of a SDHC class 6 or higher speed memory card is recommended to record videos in FHD, HD and VGAp120 options.

Setting Wind Cut

This feature reduces wind noise during movie recording.

Continuous AF

This function allows you to record video with auto focus method.

1. Enable the Continuous AF under the Movie Menu.
2. Use the ▲ or ▼ keys to go through the selection.
3. Press the OK button to save and apply changes.
Playback
You can playback the still images, video clips on the LCD monitor.

Viewing in Single Navigation
The Single navigation mode displays the image one by one on the LCD monitor. To view images/video clips, follow the steps below.

1. Press the **Playback button** on the camera.
2. The LCD monitor displays an image. To understand the icons and other information on the screen, please see "Photo Mode Screen Layout" on page 17.

   ![Still Image and Video Screenshots]

3. Use the ← or → keys to view next/previous image/video.
4. To play a video clip, press the **OK** button. See "Playing Videos" on page 44 for more details.

Viewing Thumbnails
This function allows you to view 9-thumbnail images or by calendar mode on the LCD monitor at the same time. Searching numerous of images is much easier then single view navigation.

To set 9-images mode

1. Press the **Playback button** on the camera.
2. Spin the **Zoom dial** counterclockwise (left) once to enter 9-images mode.
3. Use the navigation controls to move through the items.
4. Press the **OK** button to select the image and view it normally.

**Scroll bar.**
If scroll bars appear, it indicates that the screen can be scrolled.
Zooming images

The zoom view function works with still images only.
• In normal view, spin the **Zoom dial** clockwise (right) repeatedly until the desired zoom view.
• You can zoom to view an image of up to 10X.
• For the enlarged view, use the **4-way navigation control** to move it and you can press **MENU** key to trim it as a new file. The trimmed photo cannot be trimmed again.

Playing Videos

1. Press the **Playback button** on the camera.
2. Use the navigation controls to scroll through the saved images. A video clip has a video icon displayed on screen.
3. Press the **OK** button to play the video.
4. During playback, press and hold the ▼ or ▲ keys to fast forward or rewind the video. The camera supports forward and rewind speed of up to 4x.
5. During playback, use the **Zoom dial** to control volume. Spin clockwise (right) to increase volume/Spin counterclockwise (left) to decrease volume.
6. Press the ▼ key to pause playback. Press the key ▲ again to resume. When paused, the play info will remain on screen except **WT**.
7. To forward or rewind the video frame by frame, press the key ▼ to pause playback, then press the ▼ or ▲ keys.
8. Press the ▼ key to stop the playback. The LCD monitor displays the video frame image in Single navigation mode.

- The play info, except the icon **WT**, will be displayed when the video is paused, during REW/FF or frame by frame modes
- Volume cannot be adjusted when paused or during REW/FF modes.
- Due to massive data streams of FHD / HD videos, it is normal being a few seconds display lag when every first time you play a video with the included program on your computer. It will not happen if you play it again. Recommended hardware specifications are as follows:

<table>
<thead>
<tr>
<th><strong>OS</strong></th>
<th>Windows XP (Service Pack 2 or later), Windows Vista, Windows 7</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>CPU</strong></td>
<td>Intel Pentium D 3.0GHz or equivalent AMD Athlon, or faster</td>
</tr>
<tr>
<td></td>
<td>(Intel Core 2 Duo E6400 2.13GHz or faster, AMD Athlon 64 X2 5600+ 2.6GHz or faster are recommended for HD video)</td>
</tr>
<tr>
<td><strong>Memory</strong></td>
<td>1 GB or more (2 GB or more is recommended for HD video)</td>
</tr>
<tr>
<td><strong>Hard Disk Space</strong></td>
<td>300 MB free hard drive space or more for program installation; 10 GB is recommended for DVD production</td>
</tr>
<tr>
<td><strong>Graphics Card</strong></td>
<td>Intel 945GM or above (Intel X3100 or above is recommended for HD video); NVIDIA GeForce 6600 or above (NVIDIA GeForce 9600GT and above is recommended for HD video); ATI X1600 or above (AMD Radeon HD3850 or above is recommended for HD video)</td>
</tr>
<tr>
<td><strong>Display</strong></td>
<td>1280 x 720, 32-bit color monitor or higher</td>
</tr>
<tr>
<td><strong>Burning Device</strong></td>
<td>A DVD burner (DVD-R/-RW/+R/+RW/RAM) is required to burn DVD/AVCHD content</td>
</tr>
</tbody>
</table>
Using Movie Edit

When a video clip is paused, press the Delete button to enter Movie Edit mode. An Edit Panel displayed in the lower left corner of the screen while the time bar and movie length display in the bottom of the screen.

Set Start/End point

1. Press Up/Down key to select \[\text{ }\] to set start point to trim the beginning of the movie or \[\text{ }\] to set end point to trim the end of the movie.

2. Press Left/Right key to move \[\text{ }\] on each 1/30 second interval. The movie length must be at least more than 2 seconds.

3. Select the \[\text{ }\] to preview or \[\text{ }\] to save the video clip.

4. Select \[\text{ }\] and press OK to exit Movie Edit mode and return to the paused time whether the Start/End point is set or not.
Playing Voice Memo

Voice memo is separately recorded and attached to a captured image. See "Voice Memo" on page 48 on how to record voice memo.

1. Press the **Playback button** on the camera.
2. Use the navigation controls to scroll through the saved images. An image file with voice memo has a voice memo icon located on the top center of the LCD monitor. See picture on the right.
3. Press the **OK button** to play the voice recording.
4. During playback, use the **Zoom dial** to control volume. Spin clockwise (right) to increase volume/Spin counterclockwise (left) to decrease volume.
5. Press the key ▲ to pause playback. Press the key ▲ again to resume. When paused, the play info will remain on screen except WT □□□.
6. Press the key ▼ to stop the playback. The LCD monitor displays the image in Single navigation mode.

Volume cannot be adjusted when you pause the voice memo.

Playback Menu

The Playback menu allows you to edit images, record voice memo, and setup playback settings.

**To go to Playback Menu:**

1. Press the **Playback button** on the camera.
2. Press **Menu button** to launch the Playback Menu.
3. Use the ▲ or ▼ keys to move through the menu selections.
4. To select a menu, press ▶ or the **OK button**.
5. Change the submenu settings using the 4-way navigation control.
6. Press the **OK button** to save and apply settings.

Slide Show

The slide show function enables you to playback your still images automatically in order one image at a time.

**To view Slide Show:**

1. From the Playback menu, select **Slide Show**. The Slide Show menu appears.
2. Set the slide show settings.
3. Select **Start**, then press the **OK button** to start the slide show.
4. During Slide Show, press the **OK button** to pause slide show.
5. Use the ▲ or ▼ keys to move through the options. Select whether to **Continue** or **Exit** the slide show.
6. Press the **OK button** to apply selected option.

**To change slide show settings:**

1. From the Slide show menu, use the ▲ or ▼ keys to move through the selections.
2. Select Interval setting. Press the ◀ or ▶ keys to adjust. Choose among the available interval settings: 1 sec., 3 sec., 5 sec., and 10 sec.
3. Select Repeat setting. Press the ◀ or ▶ keys to adjust. Available settings are: Yes, No.
**Protect**

Set the data to read-only to prevent images from being erased by mistake.

A protected file has a lock icon  when viewed on Playback mode.

To protect files:
1. From the Playback menu, select **Protect**.
2. The Protect submenu is displayed on the LCD monitor. Available select settings:
   - **Single**. Select one file to lock/unlock.
   - **Multi**. Select multiple files from the thumbnail view to lock/unlock.
   - **Lock All**. Lock all files
   - **Unlock All**. Unlock all files.

To protect/unprotect a single file:
1. Select **Single** in the Protect submenu, the images are displayed on the LCD monitor in single navigation mode.
2. Use ← or → keys to scroll the display.
3. When the desired file is displayed on the LCD monitor, press the OK button to select **Lock/Unlock**.
4. To close the protect/unprotect function and go back Playback menu, select **Exit**.

To protect/unprotect multiple files:
1. Select **Multi** in the Protect submenu, the images are displayed in thumbnail view on the LCD monitor.
2. Use the ← or → keys to move through the files.
3. When the desired file is highlighted, use the ▲ or ▼ keys to mark/unmark the file for protection.
4. Repeat step 3 until all desired files to protect are marked.
5. Press the OK button to lock files and go back to Playback mode.

To protect all files:
1. Select **Lock all** in the Protect submenu. A confirmation message appears.
2. Select **Yes**.
3. Press the OK button to lock all files.

To unlock all files:
1. Select **Unlock all** in the Protect submenu. A confirmation message appears.
2. Select **Yes**.
3. Press the OK button to unlock all protected files.
**Voice Memo**

A maximum of 30 seconds of audio can be recorded as a memo for captured still images.

To record voice memo:

1. Press the **Playback button** on the camera.
2. Press the `<` or `>` keys to scroll and select an image to attach voice memo to.
3. Press the **MENU** button to launch the Playback menu.
4. Select **Voice Memo**.
5. Select **Start**, then press the **OK** button to start recording.
6. Press the **OK** button again to stop recording.

When you record voice memo to an image with an existing voice memo, the old recording file would be replaced by the new one.

**Filter Effects**

Filter Effects function is only applicable to aspect ratio 4:3 photos with different artistic effect. Edited images in this function are saved as new files.

To activate Filter Effects:

1. Press the **Playback button** on the camera.
2. Press the `<` or `>` keys to scroll and select an image to edit.
3. Press the **MENU** button to launch the Playback menu.
4. Select **Filter Effects**. The Filter Effects submenu appears.
5. Press the `<` or `>` keys to scroll and **OK** button to select an option.

The succeeding table shows the available settings.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
**Resize**

Resizes a previously saved image to create a small copy photo and only resizing to a smaller size is available.

To resize an image:

1. Press the **Playback button** on the camera.
2. Use the ◀ or ▶ keys to scroll and select an image to resize.
3. Press the **MENU** button to launch the Playback menu.
4. Select **Resize**. The Resize submenu is displayed on the LCD monitor.
5. Select size among: 640, 320, and 160.
6. After selecting size, a menu selection appears.
7. Press the **OK** button to save/cancel changes.
8. The resized image is saved as a new photo.

- **Resize function is only applicable to aspect ratio 4:3 photos.**
- **Each photo can only be resized once.**
**DPOF**

DPOF is the abbreviation for Digital Print Order Format, which allows you to embed printing information on your memory card. You can select the images to be printed and how many prints to make with the DPOF menu in the camera and insert the memory card to the card compatible printer. When the printer starts printing, it will read the embedded information on the memory card and print the specified images.

To set DPOF:

1. Press the **Playback button** on the camera.
2. Press **Menu button** to launch the Playback Menu.
3. Select **DPOF**. The submenu appears. Available settings are as follows:
   - **Select Images**. Mark images in the memory card.
   - **Reset**. Reset all DPOF settings to initial default settings.

To set DPOF on images:

1. Select **Select Images** on the DPOF submenu.
2. Use the << or >> keys to scroll and select images to mark for printing.
3. When the desired image is highlighted, use the ▲ or ▼ to increase/decrease number.
4. Press the **OK** button to define the DPOF settings and select **Done** to save DPOF settings.

To reset DPOF:

1. Select **Reset** on the DPOF submenu.
2. The camera auto reset all DPOF settings.
Copy

Use this feature to copy images between internal memory and memory card.

To copy images between internal memory and memory card:

1. Press the **Playback button** on the camera.
2. Press **Menu button** to launch the Playback Menu.
3. Select **Copy** and choose a method you want to copy images to. After choosing, available settings are as follows:
   - **Selected images.** Select images to the storage device you prefer.
   - **All images.** Copy all images to the storage device you prefer.

To copy selected images:
1. Select **Selected images** on the Copy submenu.
2. Use the << or >> keys to scroll and select images to mark for copying.
3. When the desired image is highlighted, use the ↑ or ↓ keys to mark/unmark the file for copying.
4. Press the **OK** button and select **Yes** to start copying.

To copy all images:
1. Select **All images** on the Copy submenu.
2. Select **Yes** to start copying.

If no memory card or a locked card is inserted, this option would be gray.
Movie Paste

Use this feature to combine two videos with the same specification (movie size and fps) into one video.

To combine two videos:

1. Press the Playback button on the camera.
2. Use the ◀ or ▶ keys to scroll and select the original video.
3. Press the MENU button to launch the Playback menu.
4. Select Movie Paste. The videos with the same specification as the original video are displayed on the LCD monitor.
5. Use the ◀ or ▶ keys to scroll and the ▲ or ▼ keys to mark/unmark the second video.
6. Press the OK button and select Yes to merge it to the end of the original video and overwrite it.

- The total length of the combined video cannot be over 30 minutes.
- After combining videos, the second video will no longer exist with a separate file.
Using the Setup Menu

You can access the Setup menu whether you are in Record or Playback mode. The Setup menu allows to configure general camera settings.

To go to Setup Menu:
1. Press Menu button to launch the Record/Playback Menu.
2. Use the or keys to switch the menu tab to Setup menu.
3. Use the or keys to move through the menu selections.
4. To select an item, press the OK button or key.
5. Change the submenu settings using the 4-way navigation control.
6. Press the OK button to save and apply settings.

Setting Sounds

Use the Sound menu functions to control the sounds produced by the camera.

1. From the Setup menu, select Sounds.
2. Adjusts sound settings.
3. Press the OK button to apply changes.

<table>
<thead>
<tr>
<th>Item</th>
<th>Available Settings</th>

<td>Sound 1, Sound 2, Sound 3, Off</td>
<td>Selects the startup sound when camera is turned on.</td>
</tr>
<tr>
<td>Shutter</td>
<td>On, Off</td>
<td>Enables or disables shutter sound when Shutter button is pressed. Shutter sound is not available when recording videos or voice clips.</td>
</tr>
<tr>
<td>Beep volume</td>
<td>0-4</td>
<td>Adjusts volume.</td>
</tr>
</tbody>
</table>

Setting Power Save

The Power Save function allows you to set an idle time after which the camera automatically sets to sleep mode to save power. After a minute of being in sleep mode, the camera eventually turns off power.

This function is not available in the following instances:
- Recording a video file
- Playing a Slide Show/video file
- Using the USB connector
Setting Date & Time
Use the Date & Time function to set the date and time of your camera. This function is useful in attaching date stamps on captured images. Your camera uses a 24-hour time format.

1. Press the navigation controls to adjust date and time value. By holding down the ▼ or ▲ keys, the numeric values changes continuously.
2. Press the OK button to apply changes.

Setting Language
Specify in which language menus and messages are to be displayed on the LCD monitor.

1. Use the navigation control to scroll through the list and select the desired language.
2. Press the OK button to confirm and apply settings.

Setting Display Mode
This function controls the icon display on LCD monitor for both Record mode and Playback mode.
Available settings are:
• Capture: On, Detailed Info, Off, Grid Line and Electronic Level.
• Playback: On, Detailed Info and Off.

If set Display Mode to Off, the mode icon and remaining shots will display for 2 seconds in following situations:
• Power on the camera
• Switch from Playback to Record mode
• After shooting
• Close the menu and back to preview
Setting TV Settings

Use the TV Settings function to adjust video output signal to accommodate different regional settings. If TV Settings is not set correctly, the image may not display properly on TV.

Available settings are:
- **TV Out.** The video output signal can be switched to accommodate different regional standards.
- **HDMI.** Set an image resolution for HDMI output.
- **HDMI Control.** Select whether or not the camera can receive signals from a TV that supports the HDMI-CEC standard when it is connected to the TV via HDMI.

- If the HDMI Control has been turned on, and the TV is compatible with HDMI CEC (Consumer Electronics Control), the camera can be operated by using camera buttons or TV's remote control.
- All functions in Playback Mode can be operated normally by using camera buttons, just like DSC-alone. But only the following playback features can be operated by using TV's remote control:
  - Single/Thumbnail navigation
  - Movie playback
  - Magnify the photo
  - Rotate the photo
  - Slide Show

Setting LCD Brightness

Select a brightness level for the LCD monitor.

Available settings are:
- **Auto.** Auto detects the LCD brightness.
- **Bright.** Enhance the LCD brightness.
- **Normal.** Normal LCD brightness.

Startup Image

You can activate the system startup image for camera. The captured image can't be set as startup image in this camera.
**Setting Format**

This utility formats current used memory (Internal memory or Memory card) and erases all stored images and data.

If a locked card has been inserted, the option would be gray.

**Reset All**

Use this function to reset the camera to its factory settings. However, the following settings are exceptions and not affected by Reset.

- Date & Time
- Language
- TV Settings
- Custom White Balance data
**Auto Rotation**

Use Auto Rotation to rotate still images to the direction you prefer. This function is only applicable to still images in Single Navigation. Video and audio files are not supported.

Set the Auto Rotation menu to Off, the rotated image will resume to the original direction, and this function will be also disabled.

To rotate the still image
1. Set to view the still image in Single Navigation in Playback mode.
2. Turn the camera to 60 to 90 degrees. The still image will be rotated as well.
3. Turn the camera clockwise again. The still image will not be rotated.
4. Repeat to turn the camera, until the still image is rotated to the direction you prefer.
To zoom in/zoom out the rotated image

5. View the still images in Thumbnail View (left) or Single Navigation (right) as below.

6. Spin the Zoom dial to zoom in or zoom out an image.

- The function of rotating images is only applicable to still images in Single Navigation. Video and audio files are not supported.
- When the still image is zoomed out to the original size, it will be displayed in Single Navigation.
Making Connections
You can connect your camera to: TV, computer, or a printer.

Connecting the Camera to a TV
You can play back your images on a TV screen. Before connecting to any video devices, make sure to select NTSC/PAL to match the broadcast standard of the video equipment you are going to connect to the camera.

To connect your camera to a TV:

1. Turn on the camera.
2. Set the TV out to match the TV’s video output format. See "Setting TV Settings" on page 55.
3. Connect the USB/AV/HDMI 3-in-1 cable to the USB port on the bottom of your camera.
4. Connect the other end of the cable to the TV’s AV input port.
5. The LCD monitor turns black and all images and video clips are displayed on the TV.

Connecting the Camera to a PC
You can transfer images and video files to your PC.

1. Connect one end of the USB cable to an available USB port on your computer.
2. Connect the other end of the USB cable to the USB terminal on the camera.
3. Turn on the camera.
4. The USB mode menu appears on the screen. Select **Computer** by using the ▲ or ▼ key and press the OK button.

5. The PC starts to detect the connection while the LCD monitor appears **Connecting...**

6. Connection established after **PC MODE** appeared on the LCD monitor

7. Access the files in the camera by your PC.

- The camera’s internal memory and memory card would display as removable drives in PC.
- After the connection, no image is displayed on the LCD monitor.
- When this camera is connected to your PC, two removable drives will display. Please click AP link (Magix) in the second drive, and then Setup window will display (an Internet connection is required). After installation, you can import / edit your photos, movies and music. Please note that AP link (Magix) is the trial version and will be used permanently after registration.
Connecting the Camera to a Printer

You can print your images directly using a **PictBridge compatible** printer.

1. Turn on your Printer. Check that the printer is turned on, there is paper in the printer, and there are no printer error messages.

2. Connect one end of the USB cable to the printer while the other end to USB terminal on the camera.

3. The USB mode menu appears on the screen. Select **Printer** by using the ▲ or ▼ key and press the **OK** button.

4. Enter the print mode and print the selected images.

For details on the following page "Setting the Print Mode Menu".
Setting the Print Mode Menu

Print Mode menu appears on the screen after the connection between a printer and your camera is established.

Print Mode includes three major settings:

- **Print Select.** An image can then be selected to print.
- **Print All.** Prints all images.
- **Print DPOF.** Prints the images which are set DPOF.

To set Print Select
1. Use the ◀ or ▶ keys to scroll and select an image for printing.
2. Specify the number of copies. Use the ▲ or ▼ key to increase/decrease number.
3. Press the OK button to enter printer settings.

To set Print All and Print DPOF
Repeat the same steps 1 to 2, then enter printer settings.

To set Printer Settings
1. Use the ▲ or ▼ key to specify a print option.
2. Modify paper size, quality, date and info by the ◀ or ▶ keys. Available setting:
   - Paper size: Default / A4 / 4”x6”
   - Quality: Default / Fine / Normal
   - Capture Date: Yes / No
3. Select Print on the screen for printing. Or Cancel to go back Print Mode.

Start Printing
- LCD monitor appears "Now printing...".
- Or press Menu button to stop printing anytime.
Appendix

About Folder and File Names
Your camera automatically creates specific directory of folder in the internal memory cards to organize captured image and video files.

File Naming
File names begin with "DSCI" and followed by a 4-digit number that increases in sequence. File numbering starts from 0001 when a new folder is created. The highest file number is 9999, if exceeds 9999, the camera will start over the file number from 0001.

Do not change the folder and file names in the memory card using your PC. It may be unable to playback the data using the camera.
