FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

Note:
This equipment has been tested and found to comply with the limits for Class B digital devices, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with Class B limits in Subpart B of Part 15 of the FCC rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the manual. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Trademark Information

- Microsoft® and Windows® are U.S. registered trademarks of Microsoft Corporation.
- Pentium® is a registered trademark of Intel Corporation.
- Macintosh is a trademark of Apple Computer, Inc.
- SD™ is a trademark.
- Other names and products may be trademarks or registered trademarks of their respective owners.

Product Information

- Product design and specifications are subject to change without notice. This includes primary product specifications, software, software drivers, and user’s manual. This User Manual is a general reference guide for the product.
- The product and accessories that come with your camera may be different from those described in this manual. This is due to the fact that different retailers often specify slightly different product inclusions and accessories to suit their market requirements, customer demographics, and geographical preferences. Products very often vary between retailers especially with accessories such as batteries, chargers, AC adapters, memory cards, cables, pouches, and language support. Occasionally a retailer will specify a unique product color, appearance, and internal memory capacity. Contact your dealer for precise product definition and included accessories.
- The illustrations in this manual are for the purpose of explanation and may differ from the actual design of your camera.
- The manufacturer assumes no liability for any errors or discrepancies in this user manual.
SAFETY INSTRUCTIONS

Read and understand all **Warnings** and **Cautions** before using this product.

**Warnings**

*If foreign objects or water have entered the camera, turn the power off and remove the battery.*
Continued use might cause fire or electric shock. Consult the store of purchase.

*If the camera has fallen or its case has been damaged, turn the power off and remove the battery.*
Continued use might cause fire or electric shock. Consult the store of purchase.

*Do not disassemble, change or repair the camera.*
This might cause fire or electric shock. For repair or internal inspection, ask the store of purchase.

*Use the supplied AC adapter only with the indicated power supply voltage.*
Use with any other power supply voltage might cause fire or electric shock.

*Do not use the camera in areas near water.*
This might cause fire or electric shock. Take special care during rain, snow, on the beach, or near the shore.

*Do not place the camera on inclined or unstable surfaces.*
This might cause the camera to fall or tilt over, causing damage.

*Keep the battery out of the reach of children.*
Swallowing battery might cause poisoning. If the battery is accidentally swallowed, immediately consult a physician.

*Do not use the camera while you are walking, driving or riding a motorcycle.*
This might cause you to fall over or result in traffic accident.
Cautions

Insert the battery paying careful attention to the polarity (+ or –) of the terminals.
Inserting the battery with its polarities inverted might cause fire and injury, or damage to the surrounding areas due to the battery rupturing or leaking.

Do not fire the flash close to anyone’s eyes.
This might cause damage to the person’s eyesight.

Do not subject the LCD monitor to impact.
This might damage the glass on the screen or cause the internal fluid to leak. If the internal fluid enters your eyes or comes into contact with your body or clothes, rinse with fresh water. If the internal fluid has entered your eyes, consult a physician to receive treatment.

A camera is a precision instrument. Do not drop it, strike it or use excessive force when handling the camera.
This might cause damage to the camera.

Do not use the camera in humid, steamy, smoky, or dusty places.
This might cause fire or electric shock.

Do not remove the battery immediately after long period of continuous use.
The battery becomes hot during use. Touching a hot battery might cause burns.

Do not wrap the camera or place it in cloth or blankets.
This might cause heat to build up and deform the case, resulting in fire. Use the camera in a well-ventilated place.

Do not leave the camera in places where the temperature may rise significantly, such as inside a car.
This might adversely affect the case or the parts inside, resulting in fire.

Before you move the camera, disconnect cords and cables.
Failure to do this might damage cords and cables, resulting in fire and electric shock.
**Notes on Battery Usage**

When you use the battery, carefully read and strictly observe the *Safety Instructions* and the notes described below:

- Use only the specified battery.
- Avoid using the battery in extremely cold environments as low temperatures can shorten the battery life and reduce camera performance. This low temperature will also influence Alkaline battery performance, therefore Ni-MH rechargeable battery is highly recommended.
- When you are using the new rechargeable battery or rechargeable battery that has not been used for an extended period of time (the battery that passed the expiry date is an exception) might affect the number of images that can be captured. Therefore, to maximize its performance and lifetime, we recommend that you fully charge the battery and discharge it for at least one complete cycle before use.
- The battery may feel warm after a long period of continuous use of the camera or the flash. This is normal and not a malfunction.
- The camera may feel warm after a long period of continuous use. This is normal and not a malfunction.
- If the battery is not to be used for a long period of time, remove it from the camera to prevent leakage or corrosion.
- If the battery is not to be used for a long period of time, store it after no battery power is left. If the battery is stored for a long time in a fully charged state, its performance may be impaired.
- Always keep the battery terminals clean.
- There is a risk of explosion if battery is replaced by an incorrect type.
- Dispose of used batteries according to the recycle instructions.
- Never use batteries of different types (together) or mix old and new batteries.
- Never use manganese batteries.
INTRODUCTION

Overview

Thank you for purchasing the new digital still camera! Equipped with a 7.0 Megapixels CCD sensor, your camera delivers high quality, 3072 x 2304 resolution images.

Package Contents

Carefully unpack your kit box and ensure that you have the following items. In the event that any item is missing or if you find any mismatch or damage, promptly contact your dealer.

Common Product Components:

- Digital Camera
- User’s Manual
- Software CD-ROM
- Camera Strap
- Camera Pouch
- AV Cable
- USB Cable
- Batteries

Common (Optional) Accessories:

- AC power adapter
- SD memory card

Accessories and components may vary by retailer.

Mode Dial

You can select from seven shooting modes and setup mode according to shooting conditions to achieve the desired effect.

Using the Mode Dial
1. Rotate the mode dial to the desired mode and turn your camera on by pressing the power switch.
2. Compose your subject within the focus frame. When you press the shutter release button down half way, the camera’s Auto Focus feature automatically focuses the image. Proper exposure is determined and locked at the same time.
3. Press the shutter release button all the way down to capture the image.

PREPARING THE CAMERA

Preparation

1. Attach the camera strap.
2. Open the battery/SD memory card cover.
3. Insert the batteries with correct orientation as shown.
4. Insert an SD memory card (Optional).
   - The camera has 22MB internal memory for image storage but you can load an SD memory card to expand the camera’s memory capacity.
   - Be sure to format the memory card with this camera before its initial usage.
5. Close the battery/SD memory card cover and make sure it is locked securely.

Be careful not to drop the batteries when opening or closing the battery cover.

Due to the characteristics of AA alkaline battery, camera performance may deteriorate. AA alkaline battery is not recommended except in emergencies and checking the camera’s functionality.

To prevent valuable data from being accidentally erased from an SD card, you can slide the write protect tab (on the side of the SD memory card) to “LOCK”.

To save, edit, or erase data on an SD memory card, you must unlock the card.

Using the AC Adapter (Optional Accessory)

Use of the AC adapter is recommended if you intend to use the LCD monitor for a long time or connect the camera to a PC.

1. Make sure your camera is off.
2. Connect one end of the AC adapter to the camera DC input terminal labeled "3.3V".
3. Connect the other end to a power outlet.

- Make sure to use only the AC adapter specified for the camera. Damage caused by the use of an incorrect adapter is not covered under the warranty.
- To prevent unexpected auto power off resulting from no battery power left during the process of transferring your images to the computer, use the AC adapter as a power supply.
- The AC adapter can only be used to power the camera. Batteries cannot be charged inside the camera.
GETTING STARTED

Turning the Power On/Off

- Press the power switch until the digital camera turns on.
- To turn the power off, press the power switch again.

Choosing the Screen Language

Follow the steps below to choose the desired language.

1. Rotate the mode dial to 📸 and turn your camera on by pressing the power switch.

2. [Set-up1] is displayed.
3. Use the four-way controller (▼) to select [Language], then press the OK button.
4. Use the four-way controller (▲▼) to select the language you want.
5. Press the OK button to confirm.
Setting the Date and Time

Follow the steps below to set the date display style, current date and time.

1. Rotate the mode dial to 📸 and turn your camera on by pressing the power switch.
2. [Set-up1] is displayed.
3. Use the four-way controller (▼) to select [Date & Time] and the four-way controller (◀▶) to switch the date types, then press the OK button.
4. Press the four-way controller (WX) to select Day, Month, Year and Time fields.
   - To increase a value, press the four-way controller (▲).
   - To decrease a value, press the four-way controller (▼).
   - The time is displayed in 24-hour format.
5. Press the OK button after all fields are set.

Note: The date illustration shown is for the purpose of explanation and may differ from the actual setting of your camera.

Formatting an SD Memory Card or Internal Memory

The term “Formatting” means preparing an “SD memory card” to record images; this process is also called “initialization”. This utility formats an SD memory card or the internal memory and erases all stored images and data.

1. Rotate the mode dial to 📸 and turn your camera on by pressing the power switch.
   - [Set-up1] is displayed.
2. Use the four-way controller (▼) to select [Format], then press the OK button.
3. Use the four-way controller (▲▼) to select [Yes], then press the OK button to confirm.

Tips:
- When you format an SD memory card, be aware that all data on the SD memory card will be erased. Protected images are also erased.
- To format the internal memory, do not insert an SD memory card into the camera. Otherwise, you will format the SD memory card.
- An SD memory card having any problem cannot be properly formatted.
PHOTOGRAPHY MODE

Shooting Images

1. Rotate the mode dial to A, P, M, A, A, or  and turn your camera on by pressing the power switch.

2. Compose the image on the LCD monitor screen so that the main subject is within the focus frame.

3. Press the shutter release button down halfway to focus the image.
   - When you press the shutter release button down halfway, the camera’s Auto Focus feature automatically focuses the image. The focus frame turns green if the subject is in focus. Proper exposure is determined and locked at the same time.

4. Press the shutter release button the rest of the way down to capture the image.

- The actual captured image appears to be larger than the one displayed by the LCD monitor screen after the image has been captured.
- Pressing the OK/ button switches the LCD monitor display mode. Each time you press the OK/ button, the display changes in the following order: Normal Display → Information Display → No Icons → LCD Off.
Setting Image Resolution and Quality

As you get to know the digital camera, you can set the image resolution (number of vertical and horizontal pixels) and image quality (compression ratio) based on the types of images you want to shoot. These settings affect the number of images that can be stored in the internal memory, or on an SD memory card. Higher resolution and higher quality images provide finer detail but cause the images’ file size to be larger.

To change image resolution or image quality, perform these steps below:

1. Rotate the mode dial to A, P, , , , or and turn your camera on by pressing the power switch.
2. Press the MENU button.
   - [Mode1] is displayed.
   - In the A mode, [Auto] is displayed.
3. Use the four-way controller (▼) to select [Image Size], then press the OK button.
4. Use the four-way controller (▲▼) to select the desired setting, then press the OK button to confirm.
5. Follow the step 3 and 4 above to set the [Quality].

- The possible number of shots and recording time depend on the storage size, resolution and quality settings and the subject of the image to be captured.
- You can resize the images later. Please refer to the section in this manual titled “Resizing an Image” for further detail.
Using the Zoom Function

This camera is equipped with 3x optical zoom. The lens moves during the optical zoom photography, allowing you to capture telephoto and wide-angle shots. By using the optical zoom function, images appear closer by pressing the ⬆ button, or smaller away by pressing the ⬇ button.

The zoom bar indicates the current level of magnification. When the digital zoom is within 3x magnification, the zoom bar is within the optical zoom range. When the digital zoom function is set to On, you can further enlarge the subjects with 4x digital zoom by pressing continuously the ⬆ button. It is activated after your camera reaches its maximum optical zoom factor (3x) and the zoom bar is within the digital zoom area. You can enlarge the subject to a maximum magnification equivalent to 12 times. A useful feature as it is, however, the more the image is enlarged, the more pixelated the image will appear.

To capture a zoomed image, perform the following steps:

1. Rotate the mode dial to A, P, ⾃, кл, or  and turn your camera on by pressing the power switch.
2. Adjust the magnification ratio by using the ⬆/⬇ button.
   - To exit the zoom photography, press continuously the ⬆ button.
   - The status of digital magnification is displayed on the LCD monitor.
3. Compose your scene and press the shutter release button.

To enable digital zoom feature, set the [Mode2- Digital Zoom] to [On] in the A, P, ⾃, кл,  or  mode.
Using the Flash

The flash is designed to function automatically when lighting conditions warrant the use of flash. You can take an image using a desired flash mode to suit your circumstances.

1. Rotate the mode dial to A, P, , , or .
2. Press the power switch to turn on the power.
3. Press the four-way controller ( ). The flash mode changes each time the button is pressed. You can also change the setting using the four-way controller (▲▼).
4. Press the OK button to confirm the setting.
5. Compose your scene and press the shutter release button.

The camera has four flash modes: Auto, Auto + Red-eye, Flash on and Flash off. The table below will help you to choose the appropriate flash mode:

<table>
<thead>
<tr>
<th>Flash mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A Auto</td>
<td>The flash fires automatically according to the photographic conditions.</td>
</tr>
<tr>
<td>O Red-eye</td>
<td>Use this mode to reduce the red-eye phenomenon when you want to take natural-looking photographs of people and animals in low-light conditions. When taking photographs, the red-eye phenomenon can be reduced by asking the subject (person) to look at the digital camera or get as close to the digital camera as possible.</td>
</tr>
<tr>
<td>D Flash on</td>
<td>The flash will always fire regardless of the surrounding brightness.</td>
</tr>
<tr>
<td>D Flash off</td>
<td>The flash will not discharge, regardless of the brightness. Use this mode when taking pictures using indoor lighting, for stages and indoor competitions, and when the subject is too far away for the flash to be effective.</td>
</tr>
</tbody>
</table>
**Setting Focus**

Images can be captured with the focus determined automatically using auto focus. You may over-ride the auto focus and specify [Macro] macro or [Infinity] infinity.

1. Rotate the mode dial to **A**, **P**, **S**, **M**, **
2. Press the power switch to turn on the power.
3. Press the four-way controller (▲/▼). The focus mode changes each time the button is pressed. You can also change the setting using four-way controller (▲▼).
4. Press the **OK** button to confirm the setting.
5. Compose your scene and press the shutter release button.

The camera has three focus modes: Standard, Macro and Infinity. The table below will help you choose the appropriate focus mode:

<table>
<thead>
<tr>
<th>Focus mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Standard</strong></td>
<td>Select Standard-focus setting for most occasions when you want the camera to automatically determine the focus setting. When using Standard-focus setting, any object at a range of focus is 50 cm or greater can be in focus.</td>
</tr>
<tr>
<td><strong>Macro</strong></td>
<td>Select Macro-focus setting to capture close-up images. When the lens is zoomed to its widest position you may focus objects as close as 5 cm. When the lens is zoomed to its telephoto position (3x zoom) you may focus objects as close as 35 cm.</td>
</tr>
<tr>
<td><strong>Infinity</strong></td>
<td>Select Infinity-focus setting when you want to capture images of subject at a distance of infinity. The flash mode will be set to Flash Off automatically.</td>
</tr>
</tbody>
</table>
CAPTURE MODE

Burst

This mode is used for continuous shooting. 3 pictures are taken continuously once the shutter release button is pressed. Secure the camera to a tripod or place it on a stable surface.

1. Rotate the mode dial to A, P, , , , , or .
2. Press the power switch to turn on the power.
3. Press the four-way controller (▲/ ) and use (▲) to select [Burst]. You can also change the setting using four-way controller (◄►).
4. Press the  button to confirm the setting. The indicator is displayed on the monitor screen.
5. Press the shutter release button halfway to lock the focus.
6. Press the shutter release button to capture a sequence of images.

In Burst mode, the flash mode will be set to Flash Off automatically.

Auto Bracket

In this mode, the camera automatically changes the exposure within a set range to take three shots after you press the shutter release button once. Auto Bracket settings can be combined with exposure compensation settings to extend the adjustment range.

1. Rotate the mode dial to A, P, , , , , or .
2. Press the power switch to turn on the power.
3. Press the four-way controller (▲/ ) and use (▲) to select [AEB]. You can also change the setting using the four-way controller (◄►).
4. Press the  button to confirm the setting. The indicator is displayed on the LCD monitor screen.
5. Press the shutter release button to capture the three images.

In AEB mode, the flash mode will be set to Flash Off automatically.
Self-Timer

The self-timer can be used in situations such as group shots. When using this option, you should either mount the camera on a tripod (recommended) or rest it on a flat, level surface.

1. Secure the camera to a tripod or place it on a stable surface.
2. Rotate the mode dial to A, P, , , , , or .
3. Press the power switch to turn on the power.
4. Press the four-way controller (▲/▼) and use (▲) to select your desired self-timer mode. You can also change the setting using four-way controller (◀▶).
5. Press the OK button to confirm the setting.
6. Compose your scene and press the shutter release button.
   ■ The self-timer function is activated.
   ■ The photograph is then taken after the preset time.
   ■ To cancel the self-timer at any time, press the four-way controller (▲/▼) or press the shutter release button halfway. The table below will help you choose the appropriate self-timer mode:

<table>
<thead>
<tr>
<th>Self-timer mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2 sec. Self-timer</td>
<td>The image is captured about 2 seconds after the shutter is pressed. This mode is useful for preventing camera shake.</td>
</tr>
<tr>
<td>10 sec. Self-timer</td>
<td>The image is captured about 10 seconds after the shutter is pressed. This mode is suitable for the shots in which the photographer has to be included.</td>
</tr>
<tr>
<td>10+2 sec. Self-timer</td>
<td>The first image is captured about 10 seconds after the shutter release button is pressed, and then the second image is captured 2 seconds later. This mode is convenient when capturing group images in succession. Flash does not fire in this mode.</td>
</tr>
</tbody>
</table>

- After one shot is taken, the self-timer mode is turned off.
- If you wish to take another image using the self-timer, repeat these steps.
Adjusting the Exposure (EV Compensation)

You can manually adjust the exposure determined by the digital camera. Use this mode when the proper exposure cannot be obtained, for example, when the contrast (difference between bright and dark areas) between the subject and the background is extremely high. The EV compensation value can be set in the range from -2.0EV to +2.0EV.

1. Rotate the mode dial to P, A, M, S, or X.
2. Press the power switch to turn on the power.
3. Press the four-way controller (uppy/downy) and use horiz to set the range of EV compensation value from -2.0EV to +2.0EV.
4. Press the OK button to confirm the setting.
PLAYBACK MODE - THE BASICS

Viewing Images

You can display the still images one by one.

1. Rotate the mode dial to A, P, Q, , or and turn your camera on by pressing the power switch.
2. Press the button.
   - The last recorded image appears on the LCD monitor screen.
   - Basic information is shown by indicators on the LCD monitor screen. To see full information display, press the OK button.
3. Use the four-way controller ( ) to select the desired images.
   - To view the previous image, press the four-way controller ( ).
   - To view the next image, press the four-way controller ( ).

For protected images/movie clips, mark will be displayed. Refer to the section in this manual titled “Protecting Images/Movie Clips” for further details.

For images selected for printing with DPOF setting, mark will be displayed. (Refer to the section in this manual titled “Setting the DPOF” for further details.)

If there is no image stored in the internal memory or on the SD memory card, [No image] message will appear on the LCD monitor screen.

You cannot enter the Playback mode from the Setup mode.
Magnifying Images

While reviewing your images, you may enlarge a selected portion of an image. This magnification allows you to view fine details. The zoom factor displayed on the screen shows the current magnification ratio.

1. Press the button.
   - The last recorded image appears on the LCD monitor screen.
   - To view the previous image, press the four-way controller ( ).
   - To view the next image, press the four-way controller ( ).
2. Adjust the zoom ratio by using the / button.
   - To enlarge the selected image, press the button.
   - To return to the normal image, press the button.
   - The magnification factor is displayed on the LCD monitor screen.
3. To view different portions of the images, press the four-way controller ( ) to adjust the display area.

- The magnification factors range from 1.5X to 4X (within 6 stages: 1.5X, 2.0X, 2.5X, 3.0X, 3.5X and 4.0X).

Thumbnail Display

This function allows you to view 9 thumbnail images on the LCD monitor screen simultaneously so you may search for a particular image.

1. Press the button.
   - The last recorded image appears on the LCD monitor screen.
2. Press the button once.
   - Nine thumbnail images are displayed simultaneously.
   - For recorded movie clips, the movie mode icon will be displayed.
   - For protected images/movie clips, mark will be displayed.
3. Use the four-way controller ( ) to move the cursor to select the image to be displayed at regular size.
4. Press the or button to display the selected image on full screen.
Slideshow Display

The slideshow function enables you to play your images back automatically in sequential order. This is very useful and entertaining feature for reviewing recorded images and for presentations.

1. Press the button. ■ The last recorded image appears on the LCD monitor screen.
2. Press the MENU button to access the Playback menu. Then use the four-way controller (▼) to select [Slide Show] and press the OK button.
3. Use the four-way controller (▲▼) to set the playback interval, then press the OK button. ■ The slideshow starts. ■ The movie clips display the first frame image, and the movie is not played back. ■ To stop slideshow, press the OK button.

You can adjust the slideshow display interval within the range of 3 sec., 5 sec., and 10 sec..

Resizing an Image

You can change the image size of a captured image to one of the following sizes: 2592 x 1944 pixel, 2048 x 1536 pixel, 1280 x 960 pixel, 640 x 480 pixel.

1. Press the button. ■ The last recorded image appears on the LCD monitor screen.
2. In the [】] mode, use the four-way controller (◄►) to select the desired images. ■ To view the previous image, press the four-way controller (◄). ■ To view the next image, press the four-way controller (►).
3. Press the MENU button to access the Playback menu. Press the four-way controller (►) to select [Playback2] and press (▼) to select [Resize] and press the OK button.
4. Use the four-way controller (▲▼) to select the desired setting, then press the OK button to confirm.

You can only choose a smaller size image; you cannot increase the resolution of an image. Movie cannot be resized.
MOVIE MODE

Recording Movie Clips

This mode allows you to record movie clips with sound via built-in microphone.

1. Rotate the mode dial to 🎥 and turn your camera on by pressing the power switch.
2. Press the shutter release button to start recording.
3. To stop recording, press the shutter release button again.

- The optical zoom function (3X) can be activated before you start recording the movie clips.
- The digital zoom function can be activated before and during the recording.
- Pressing the OK/☐ button switches the LCD monitor screen display mode. Each time you press the OK/☐ button, the display changes in the following order: Normal Display → No Icons → LCD Off.

Playing Back Movie Clips

You can play back the recorded movie clips on the LCD monitor screen. However, the sound recorded with movie clips can only be played back on a TV or on a computer.

1. Press the ▶ button.
2. Use the four-way controller (leftrightarrow) to go through the images until the movie clip you want to play back is displayed.
   - To view the previous image, press the four-way controller (▲).
   - To view the next image, press the four-way controller (▼).
3. Press the OK button to start playing back the movie clips.
   - To pause or resume movie playback, press the OK button again.

- The index number, date and time indicators displayed on the LCD monitor screen will disappear after a few seconds.
- The zoom function cannot be activated when playing back movie clips.
- To playback the movie clips on the computer, we recommend you to use Windows Media Player 9.0 or later (WMP 9.0 or later). You can download WMP version from the website at www.microsoft.com.
PLAYBACK MODE - ADVANCED FEATURES

Playing Back Still Images/Movie Clips on TV

You can also playback your images on a TV screen. Before connecting to any device, make sure to select NTSC/PAL system to match the video output system of the video equipment you are going to connect to the digital camera, then turn off all devices to be connected.

1. Connect one end of the AV cable to the AV terminal of the digital camera.
2. Connect the other end to the AV input socket of the TV set.
3. Turn the TV and digital camera on.
4. Playback the images/movie clips.
   - The method of operation is the same as playing back still images and movie clips on the digital camera.

- The sound recorded with movie clips can only be played back on a TV or on a computer.
Deleting Images/Movie Clips

Use this function to delete one or all images/movie clips stored in SD memory card or the internal memory. Please note that the deleted images or movie clips cannot be recovered. Exercise caution before deleting a file.

1. Rotate the mode dial to [A], [P], [ ], [ ], [ ], [ ], [ ], or [ ] and turn your camera on by pressing the power switch.
2. Press the [ ] button.
   - The last recorded image/movie clip appears on the LCD monitor screen.
3. Use the four-way controller ( [ ]) to select the image/movie clip you want to delete.
4. Press the [ ] button to delete.
5. Use the four-way controller ( [ ] ) to select [This Image] or [All Images] by your preference, then press the OK button.
6. When the delete message appears, use the four-way controller ( [ ] ) to select [Yes], then press the OK button to confirm the deletion.
   - If you wish to cancel the deletion, select [No].

Protected images cannot be deleted with the delete function.
Protecting Images/Movie Clips

Set the data to read-only to prevent images from being erased by mistake.

1. Press the button.  
   - The last recorded image appears on the LCD monitor screen.
2. In the mode, use the four-way controller ( ) to select the desired images.  
   - To view the previous image, press the four-way controller ( ).  
   - To view the next image, press the four-way controller ( ).
3. Press the MENU button, then use the four-way controller( ) to select [Protect] and press the OK button.
4. Use the four-way controller ( ) to choose the desired setting, then press the OK button.  
   - [Protect One]: Protect one image/movie.  
   - [Protect All]: Protect all images/movies (at once).
5. Use the four-way controller ( ) to select [Lock], then press the OK button to confirm.  
   - Press the MENU button to return to the mode. The indicator appears on the selected image.  
   - If you wish to cancel the protect function of a protected image, select [Unlock].
Setting the DPOF

DPOF (Digital Print Order Format) allows you to embed printing information on your SD memory card. By using DPOF, you can select an image to be printed and then specify how many prints or which image you would like. Take your SD memory card to a DPOF enabled printer that accepts SD memory cards. The DPOF/card-compatible printer will read the embedded information on the SD memory card and print your images as specified.

To configure print settings for a single image / all images.

1. Press the button, then use the four-way controller (▲▼) to select the desired image you want to print.

2. Press the MENU button. Use the four-way controller (▲▼) to select [DPOF], then press the OK button.

3. Use the four-way controller (▲▼) to select by your preference, then press the OK button.
   [One Image]: To configure print settings for a single image.
   [All Images]: To configure print settings for all images.
   [Reset All]: Resets all DPOF settings.
4. Use the four-way controller (▲▼) to select by your preference, then press the OK button.
   [Quantity]: Allows you to select image quantity (0~10). Use the four-way controller (◄►) to set the image quantity.
   [Date]: The date of recording can be printed directly on the images. Select [Yes] or [No] with the four-way controller (◄►).
5. Press the MENU button to return to the image playback mode.
   - The print icon 📷 is marked on the displayed image.
   - To cancel the DPOF settings for a single image, go back to step 3 to select [One Image] and select 0 in [Quantity] in the next step. For resetting all the DPOF settings, go back to step 3 to select [Reset All].

Before you perform the DPOF settings on your camera, always remember to copy your images from the internal memory to an SD memory card first.
- The 📷 print icon will appear on the LCD monitor screen indicating images selected for printing.
- You cannot print movies.
- Depending on the printer or printing equipment at the photo processing lab., the date may not be imprinted on the pictures even if the DPOF settings are made.
TRANSFERRING RECORDED IMAGES AND VIDEOS TO YOUR COMPUTER

System Requirements (Windows)
- Pentium III 600 MHz or higher
- 64MB RAM
- CD-ROM drive
- Windows 2000/XP
- 128MB hard disk space
- Available USB port

System Requirements (Macintosh)
- PowerPC G3/G4
- 64MB RAM
- CD-ROM drive
- OS 9.0 or later
- 128MB hard disk space
- Available USB port

Downloading Your Files

1. Rotate the mode dial to and turn your camera on by pressing the power switch.
2. Press the four-way controller ( ) to select the [Set-up2] menu, then use the four-way controller ( ) to select [USB Mode].
3. Press the OK button.
4. Use the four-way controller ( ) to select [PC], then press the OK button.
5. Turn off your camera.
6. Connect your camera and the computer via the supplied USB cable.
7. Turn your camera on by pressing the power switch.
8. From the Windows desktop, double click on “My Computer”.
9. Look for a new “removable disk” icon.
   - This “removable disk” is actually the memory (or memory card) in your camera. Typically, the camera will be assigned drive letter “e” or higher.
10. Double click on the removable disk and locate the DCIM folder.
11. Double click on the DCIM folder to open it to find more folders.
   - Your recorded images and video clips will be inside these folders.
12. Copy & Paste or Drag-N-Drop image and video files to a folder on your computer.

Mac users: Double-click the “untitled” or “unlabeled” disk drive icon on your desktop. iPhoto may automatically launch.
EDITING SOFTWARE INSTALLATION

There are three types of software that are bundled inside the CD-ROM:

**Ulead® Photo Explorer** - lets you spend more time enjoying photos, music and videos and less time finding them. It is the all-in-one solution for owners of digital cameras, camcorders, scanners or anyone who wants to make it easier to keep track of their media.

**Ulead® Photo Express** - makes it easy to edit and share digital photos and create fun photo projects. Edit and enhance images, browse your photo collection and express your creativity with stunning special effects and creative photo projects.

To install software:
1. Insert the CD-ROM that came with the camera into your CD-ROM drive.
   - The welcome screen appears.
2. Click the respective software name.
   - Follow the on-screen instructions to complete the installation.

For more information about the operation of the software, refer to its respective help documentation.

For Windows 2000/XP users, please make sure to install and use the software in "Administrator" mode.

The software is not supported on the Mac.
Your digital camera can act as a PC camera, which allows you to videoconference with business associates, or have a real-time conversation with friends or family. To use the digital camera for videoconferencing, your computer system must include the items as below:

- Microphone
- Sound card
- Speakers or headphones
- Network or Internet connection

Video conferencing (or video editing) software is not included with the digital camera. This mode is not supported for Mac.

**Step 1: Install the PC camera driver**

The PC-camera driver included in the CD-ROM is exclusively for Windows. The PC camera function is not supported for Mac platforms.

1. Insert the enclosed CD-ROM into your CD-ROM drive.
2. When the welcome screen appears, click “**INSTALL PC-CAM DRIVER**”. Follow the on-screen instructions to complete the installation.
3. After the driver installation is completed, restart your computer.
Step 2: Connect the digital camera to your computer

1. Rotate the mode dial to 📸 and turn your camera on by pressing the power switch.
2. Press the four-way controller (➡) to select the [Set-up2] menu, then use the four-way controller (⬇) to select [USB Mode].
3. Press the OK button.
4. Use the four-way controller (▲▼) to select [PC CAM], then press the OK button.
5. Connect your camera and the computer via the supplied USB cable.
6. Position the digital camera steadily on top of your computer monitor or use a tripod.

Step 3: Run your application software (i.e. Windows NetMeeting)

To use Windows NetMeeting for videoconferencing:
1. Go to Start ➔ Programs ➔ Accessories ➔ Communications ➔ NetMeeting to launch the NetMeeting program.
2. Click the Start Video button to view live video.
3. Click the Place Call button.
4. Type the e-mail address or the network address of the computer that you are calling.
5. Click Call. The person that you are calling must also have Windows NetMeeting running and be willing to accept your call to start the videoconference.

- The video resolution for videoconferencing applications is generally 320 x 240.
- For more information about the operation of videoconference application software, refer to its respective help documentation.
- Use of AC adapter is recommended while the camera is used as a PC camera.
MENU OPTIONS

Camera Menu

This menu is for the basic settings to be used when capturing still images.

1. Rotate the mode dial to A, P, , , , , , or  and turn your camera on.
2. Press the MENU button, then use the four-way controller (   ) to select the [Mode1] / [Mode2] / [Mode3] menu.
   - In A Mode, press the MENU button to access the [Auto] menu directly.
3. Use the four-way controller (   ) to select the option item, then press the OK button.
4. Press the four-way controller (   ) to select the desired setting, then press the OK button.

POSSIBLE NUMBER OF RECORDABLE IMAGE

The frame counter indicates the approximate number of images that can be stored on the internal memory and the SD memory card. The number of recordable images may vary depending on the recorded subject, the capacity of the memory card, if there are files other than images or when the recording is made while switching the picture quality or resolution.

<table>
<thead>
<tr>
<th>Resolution</th>
<th>Quality</th>
<th>Internal Memory</th>
<th>SD Memory Card</th>
</tr>
</thead>
<tbody>
<tr>
<td>3072 x 2304</td>
<td>Fine</td>
<td>6</td>
<td>7</td>
</tr>
<tr>
<td>2592 x 1944</td>
<td>Normal</td>
<td>12</td>
<td>15</td>
</tr>
<tr>
<td>2048 x 1536</td>
<td>Economy</td>
<td>18</td>
<td>24</td>
</tr>
<tr>
<td>1280 x 960</td>
<td>Fine</td>
<td>9</td>
<td>12</td>
</tr>
<tr>
<td>640 x 480</td>
<td>Normal</td>
<td>16</td>
<td>21</td>
</tr>
<tr>
<td>Economy</td>
<td>25</td>
<td>33</td>
<td>68</td>
</tr>
</tbody>
</table>

- The above data shows the standard testing results. The actual capacity varies according to the shooting conditions and settings.

Approximate Duration of Recording Time

The table below indicates the approximate duration of recording time depending on the capacity of the internal memory and the SD memory card.

<table>
<thead>
<tr>
<th>Image size</th>
<th>Internal Memory</th>
<th>SD Memory Card</th>
</tr>
</thead>
<tbody>
<tr>
<td>320 x 240</td>
<td>00:43</td>
<td>00:55</td>
</tr>
</tbody>
</table>

- The values for the recording time may vary depending on the shooting conditions and settings.
- The frame rate is 30 fps (frames per second).
CONNECTING TO A PICTBRIDGE-COMPATIBLE PRINTER

Even if you do not have a computer, you can connect the camera directly to a printer that supports PictBridge to perform image selection and printing using the camera screen and controls. DPOF support also lets you specify which images you want to print and how many copies of each should be printed.

Connecting the camera to the printer

1. Rotate the mode dial to 
and turn your camera on by pressing the power switch.
2. Press the four-way controller ( ) to select the [Set-up2] menu, then use the four-way controller ( ) to select [USB Mode]. Press the OK button.
3. Use the four-way controller ( ) to select [PictBridge], then press the OK button.
4. Connect your camera and the printer via a supplied USB cable.
   - The message “One moment” will appear on the LCD monitor screen.

Printing images

When the camera is properly connected to a PictBridge-compatible printer, the [Printing Mode Select] screen is displayed on the LCD monitor screen. Use the four-way controller ( ) to select the print mode.

- In [Print] Mode: Lets you print the specified image with PictBridge.

<table>
<thead>
<tr>

<th>Figure</th>
<th>Procedure</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td><img src="image" alt="Printing Mode Select" /></td>
<td>Use the four-way controller ( ) to select the [Print] mode, then press the OK button.</td>
</tr>
<tr>
<td>2</td>
<td><img src="image" alt="Select: Print Info" /></td>
<td>Use the four-way controller ( ) to select the image you want to print, then press the four-way controller ( ) to set more detailed settings.</td>
</tr>
</tbody>
</table>
| 3    | ![Print Info](image) | Use the four-way controller ( ) to select by your preference, then press the OK button.  
[Quantity]: Specifies the number of prints. You can select the number up to 10.  
[Date]: If you select [With], images are printed with the date.  
[File Name]: If you select [With], images are printed with the file name. |
<p>| 4    | <img src="image" alt="Select: Print Info" /> | After Print Setting is set, the print icon is marked on the displayed image. You can still use the four-way controller ( ) to change the image by your preference, then press the OK button to print. |</p>
<table>
<thead>
<tr>
<th>Step</th>
<th>Figure</th>
<th>Procedure</th>
</tr>
</thead>
</table>
| 5    | ![Print Paper](image) | Use the four-way controller (▲▼) to access the paper selection setting, then press the OK button to confirm.  
[Size]: You may select the desired item depending on the type of printer being used.  
[Borderless]: You may select the desired item depending on the type of printer being used. |
| 6    | ![Transferring](image) | This starts printing and displays the message “Transferring” on the LCD monitor screen. The message will disappear after the printing is finished. Then the screen returns to [Printing Mode Select].  
- To cancel printing:  
Pressing the OK button during print data transfer displays the screen for selecting whether to [Continue] or [Cancel] printing. |
|      | ![Print](image) | **In [Print All] Mode:** Lets you print all images with PictBridge. |

**Procedure**

1. If you wish to print all the images stored in the camera, you may choose [Print All] in [Printing Mode Select].
2. To set Print Settings, follow steps 2 to 6 in [Print] Mode.

**In [Print With DPOF] Mode:** This function only lets you print the specified image based on the previous DPOF settings.

**Procedure**

1. If you wish to print images with DPOF setting, you may choose [Print With DPOF] in [Printing Mode Select].
2. To set Print Settings, follow steps 2 to 6 in [Print] Mode.

- When connecting a printer which is not compatible with DPOF, [Print With DPOF] cannot be selected.
A. Information on Disposal for Users (private households)

1. In the European Union
Attention: If you want to dispose of this equipment, please do not use the ordinary dust bin!
Used electrical and electronic equipment must be treated separately and in accordance with legislation that requires proper treatment, recovery and recycling of used electrical and electronic equipment. Following the implementation by member states, private households within the EU states may return their used electrical and electronic equipment to designated collection facilities free of charge*. In some countries* your local dealer may also take back your old product free of charge if you purchase a similar new one.
*) Please contact your local authority for further details.
If your used electrical or electronic equipment has batteries or accumulators, please dispose of these separately beforehand according to local requirements.
By disposing of this product correctly you will help ensure that the waste undergoes the necessary treatment, recovery and recycling and thus prevent potential negative effects on the environment and human health which could otherwise arise due to inappropriate waste handling.

2. In other Countries outside the EU
If you wish to discard this product, please contact your local authorities and ask for the correct method of disposal.
For Switzerland: Used electrical or electronic equipment can be returned free of charge to the dealer, even if you do not purchase a new product. Further collection facilities are listed on the homepage of www.swico.ch or www.sens.ch.

B. Information on Disposal for Business Users

1. In the European Union
If the product is used for business purposes and you want to discard it:
Please contact your local dealer who will inform you about the take-back of the product. You might be charged for the costs arising from take-back and recycling. Small products (and small amounts) might be taken back by your local collection facilities.
For Spain: Please contact the established collection system or your local authority for take-back of your used products.

2. In other Countries outside the EU
If you wish to discard of this product, please contact your local authorities and ask for the correct method of disposal.
