**Wi-Fi Connection/One-touch (NFC) Guide**

### What you can do

#### Sending images to the computer

**Required equipment/environment**
The computer connected to a wireless access point
→ See the description on the right.

**Sending images to a smartphone (One-touch sharing (NFC))**

**Required equipment/environment**
A smartphone or a tablet computer
→ See the reverse side.

**Using a smartphone as a remote controller (One-touch remote (NFC))**

**Required equipment/environment**
A smartphone or a tablet computer
→ See the reverse side.

#### Sending images to a TV

**Viewing still images on a TV**

→ Refer to the Wi-Fi guide of the website.

### Sending images to the computer

**Note:** Steps 1 and 2 are required the first time only.

#### 1 Install the latest software on your computer.

- **Windows:** PlayMemories Home
  
  http://www.sony.net/pm/

- **Mac:** Wireless Auto Import
  
  http://www.sony.co.jp/imsoft/Mac/

  Select [Wireless Auto Import].

#### 2 Connect the camera to an access point.

**Note:** For more information, refer to the instruction of the access point, or contact the person who set up the access point.

**If the wireless access point has a WPS button.**

1. Press the MENU button.
2. Select 3 with ➕ ➔ (WPS Push).
3. Push the WPS button on the wireless access point you want to register.

**If you know the SSID and password of your wireless access point.**

1. Press the MENU button.
2. Select 3 with ➕ ➔ (Access point settings).
3. Select the access point you want to register, enter the password, then press [OK].

#### 3 When your computer is not started, turn on the computer.

- **4-468-878-61(1)**

#### 4 Start sending images to the computer.

1. Confirm that a memory card is inserted in the camera.
2. Press the MENU button.
3. Select 1 with ➕ ➔ (Send to computer).
   → Image saving automatically starts.

**Note:** Previously sent images are not duplicated. Sending a movie or multiple still images takes time.

---

**Notes**

- The Wi-Fi function of this camera cannot be used connected to a public wireless LAN.
- PlayMemories Mobile is not guaranteed to work on all Smartphones and Tablets.
- To use the One-touch functions (NFC) of the camera, a smartphone or tablet computer supporting the NFC function is required.

**Detailed operations are described in the Wi-Fi Guide.**

Refer to the following website.

Sending images to a smartphone (One-touch sharing (NFC))

1. Install the latest version of PlayMemories Mobile on your smartphone.

Note: For more information, refer to the following website.
http://www.sony.net/pmm/

2. Select an image on the camera to be sent and connect a smartphone to the camera.

Note: Movies recorded in AVCHD format cannot be sent to a smartphone.

3. Images on the camera will be sent to your smartphone.

Note: The sent image is stored in Gallery of Android, or Album of iOS.

Using a smartphone as a remote controller (One-touch remote (NFC))

You can monitor the image to be captured and shoot with your smartphone. Select MENU ➔ [Ctrl with Smartphone] on the camera in step 2 to set up the camera, or touch the N mark of the smartphone to (N Mark) at the bottom of the camera.

Communication distance: Approx. 10m/33ft (line-of-sight)

Note: Communication distance may vary, depending on your surroundings/smartphone.
