English - QST1ALAB
Your equipment is a transceiver that operates on GSM networks with 900 and 1800 MHz frequency bands. The World Health Organization (WHO) considers that present scientific information does not provide evidence of health hazards for the general population. The guidelines are based on standards that were developed by expert committees using scientific studies. These guidelines include a substantial safety margin designed to ensure the safety of all persons, regardless of age and health.

The Bluetooth word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by TCL Mobile Limited and its Affiliates is under license. Other trademarks and trade names are those of their respective owners.

Protection against theft
(1) Your cellphone is identifiable as GSM (radio serial number) shown on the packaging label and in the product's radiation Safety Data sheet. This code is to be used the first time you use your cellphone by entering "00000000" in a safe place. It is recommended that you take this code with you when you sell or give your cellphone to another person. The code may be submitted by the police or your operator if your cellphone is stolen. This number allows your cellphone to be traced if a third person uses it with a genuine SIM card.

Disclaimer
This difference between the user manual description and the cellphone operation, depending on the software release of your cellphone or specific operator services.
