A
When switched on, your cellphone emits electromagnetic waves that can interfere with medical devices or even cause discomfort. Given that studies show that using a cellphone while driving a vehicle constitutes a real safety risk, it is recommended to avoid using your cellphone while driving. "Distracted driving" is a term used to describe the act of using a cellphone while driving, which can lead to accidents and injuries.

### Warranty

Your cellphone is warranted against any defects which may occur due to (without any limitation):

- any defect which may occur during the first six (6) months
- condition of normal use during the warranty period of twelve (12) months
- handset, accessories and function of the phone if it has been repaired, placed or repaired, as appropriate. Replaced phone and accessories are equivalent functionality.

### Product inconvenience

(1) Contact your network operator for service availability.

(2) this device must accept any interference received, including interference that may cause undesired operation.
