### Battery Care

- **Precautions:**
  - Avoid storing large amounts of data in your phone as this may negatively affect the battery life.
  - Use User Data Format to perform formatting (please refer to User Manual for detailed instructions).
  - Check your phone's battery power before using it. Make sure your battery is charged when you first turn on your phone or if your phone is turned off.

- **Chargers:**
  - Make sure your battery is not charged more than 100%.
  - When you play games on your phone, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body.

- **Troubleshooting:**
  - If your phone turns off by itself, remove the battery and re-insert it, then restart the phone.
  - If the screen is not on or has not responded for several minutes, your phone may have run out of battery power. Make sure your battery is charged, then restart your phone.

- **Important:**
  - Make sure your battery is fully charged before you use your phone.
  - Make sure your phone's battery is not damaged or distorted.
  - Make sure your phone's battery is not exposed to direct sunlight or other strong light sources.
  - Make sure your phone's battery is not exposed to extreme temperatures.

- **Battery Health:**
  - Your phone's battery pack contains replaceable lithium-ion cells that may be damaged or destroyed if not handled properly.
  - It is recommended that you replace your phone's battery pack if it is damaged or destroyed.

- **Disposal:**
  - Make sure to dispose of your phone's battery pack properly. Do not attempt to open the battery (due to the risk of toxic fumes and burns).

- **Other Considerations:**
  - Make sure to dispose of your phone's battery pack properly. Do not attempt to open the battery (due to the risk of toxic fumes and burns).
  - Make sure to dispose of your phone's battery pack properly. Do not attempt to open the battery (due to the risk of toxic fumes and burns).
