Your mobile device is identified by an IMEI (mobile phone serial number) shown on the packaging label and in the product's memory. Your mobile phone is a transceiver that operates on GSM Quadband 900/1800/1900/UMTS 2100 MHz frequency bands. The highest SAR values under the ICNIRP guidelines were developed by an independent scientific organization to protect the public against possible effects from exposure to radio frequency energy.
