Full user manual
For the full user manual, useful links and more information, visit www.doro.com/support/ or contact our Helpline.

Congratulations on your purchase
With the Doro 6520 you’ll enjoy easier calling, messaging, picture taking and more thanks to widely separated, high contrast keys and a large 2.8" screen. It also combines great sound with soft touch coating and many additional features including e-mail, web browser, Assistance button and HAC (Hearing Aid Compatibility).

1. GET STARTED
SIM card, memory card and battery
Remove the battery cover
Be careful not to damage your fingernails when you remove the battery cover. Do not bend or twist the battery cover excessively as it may be damaged.

Insert the SIM card (required)
Remove the battery if it is already installed. Locate the SIM card holder and gently slide the card into the holder. See the label right next to the holder for guidance on how to insert the card. This device accepts micro SIM or BFF SIM cards. If you have problem to remove/replacement the SIM card, use a thin flat-bladed tool on the exposed part of the SIM card to pull it out.

Insert the SD card (optional)
Locate the SD card holder and gently slide the card into the holder. The device works with or without a SD card installed. Compatible card type: microSD, microSDHC.

Replace the battery cover
Insert the battery by sliding it into the slot, then press the cover down until it snaps into place. Reconnect the contacts facing downwards to the right. Replace the battery cover.

2. GET TO KNOW YOUR PHONE
Turn the phone on and off
Press and hold the red button on the phone to turn it on/off. Confirm with Yes to power off.

If the SIM card is valid but protected with a PIN code (Personal Identification Number), PIN is displayed. Enter the PIN code and press OK. Delete with Clear.

Note! If PIN and PUK codes were not provided with your SIM card, please contact your service provider. Tip: It is recommended to remove the protectve plastic film from the display to enhance the visibility.

Alternates: Shows the number of PIN attempts left. When no more attempts remain, PIN blocked is displayed. The SIM card must now be unlocked with the PUK code (Personal Unblocking Key).

1. Enter the PUK code and confirm with OK.
2. Enter a new PIN code and confirm with OK.
3. Re-enter the new PIN code and confirm with OK.

Start-up wizard
When starting the telephone for the first time, you can use the start-up wizard to set some basic settings.

Tip: You can run the start-up wizard later if you want.

Step-by-step instructions
The arrow (†) indicates next action in step-by-step instructions. To confirm an action, press OK. To select an item, scroll or highlight the item using ‡ or † and then press OK.

Phone indicators
Lights on the phone will:
• Flash when you have a new message or a missed call. After reading the new message or missed call, the flashing will stop.
• Flash when the battery is running low and during charging.

Navigation buttons

Press a numerical key repeatedly until the desired character is shown. Wait a few seconds before entering the next character.
Select for a list of special characters. Select the desired character with ‡ or †, and press OK to enter it.
Use ‡ or † to move the cursor within the text.
Press ‡ to cycle upper case, lower case and numerals.
Press and hold ‡ to change writing language.

4. SOS CALLS
As long as the phone is switched on, it is always possible to place a SOS call by entering the main local emergency number for your present location followed by ‡.

5. CALL LOG
Received, missed and dialled calls are saved in a combined call log. 20 calls of each type can be stored in the log. For multiple calls related to the same number, only the most recent call is saved.
Press ‡ to find your call log.
Use ‡ or † to scroll through the call log.

Received call
Dialed call
Missed call
Press ‡ to dial, or Options.

5. CALL LOG
Received, missed and dialled calls are saved in a combined call log. 20 calls of each type can be stored in the log. For multiple calls related to the same number, only the most recent call is saved.

Press ‡ to find your call log.
Use ‡ or † to scroll through the call log.

Received call
Dialed call
Missed call
Press ‡ to dial, or Options.

Predictive text
In some languages you can use the Smart ABC (T9) input method which uses a dictionary to suggest words.

1. Press Menu ‡ Settings ‡ Messages ‡ Predictive text.
2. Select To enable, or To disable.

Change language, time and date
The default language is determined by the SIM card. Refer to the full manual on how to change language, time and date.

Volume control
Use the side buttons ‡ ± † to adjust the sound volume during a call. The volume level is indicated on the display.

Silent
Silent is a fixed profile with keypad tone, message tone and ring tone disabled, while vibration, tasks and alarm are unchanged.
• Press and hold † to activate and to deactivate silent.

3. CALLS
Make a call
1. Enter the phone number including the area code. Delete with Clear.
2. Press ‡ to dial. Press Abort to cancel the call.
3. Press † to end the call.

Note! For international calls, always use + before the country code for best operation. Press ‡ twice to see your current area code.

Call from the phonebook
1. Press Name to open the phonebook.
2. Use ‡ or † to scroll through the phonebook, or quick search by pressing the key corresponding to the first letter of the name.
3. Press Options ‡ Call, alternatively, press † to dial the selected entry, or press Back to return to standby.

Receive a call
Press ‡ to answer, or press Silent to switch off the ring signal and then Reject to reject the call (busy signal).
Alternatively, press † to reject the call directly.
3. Press † to end the call.

Call options
During a call the selection buttons (‡) give access to additional functions.

Speed dial
Use ‡ and † to speed dial an entry from standby.

Add speed dial numbers
1. Press Menu ‡ Settings ‡ Phonebook ‡ Speed dial.
2. Select ‡ Add and select an entry from the phonebook.
3. Press OK to confirm.
4. Repeat to add speed dial entries for buttons ‡ and †.

4. SOS CALLS
As long as the phone is switched on, it is always possible to place a SOS call by entering the main local emergency number for your present location followed by ‡.

5. CALL LOG
Received, missed and dialled calls are saved in a combined call log. 20 calls of each type can be stored in the log. For multiple calls related to the same number, only the most recent call is saved.
Press ‡ to find your call log.
2. Use ‡ or † to scroll through the call log.

Received call
Dialed call
Missed call
Press ‡ to dial, or Options.

Create and send picture messages
Both you and the recipient must have subscriptions that support picture message. The settings for picture message are supplied by your service provider and can be sent to you automatically via text message.

Press ‡ to picture to take a picture.

Press ‡ to add recipient to add recipient number and manually press and Done.

Press ‡ to add more recipients.

Press ‡ to send.

Note! To keep best picture quality, send only one picture per message.

MM 5 settings
Press Menu ‡ Settings ‡ Messages.

6. PHONEBOOK
The Phonebook can store 500 entries with 3 phone numbers in each entry.
Add contact
1. Press Menu ‡ Phonebook ‡ New contact ‡ Add.
2. Enter a Name for the contact. Delete with Clear.
3. Use ‡ to select Mobile, Home or Office, and enter the phone number(s) including the area code.
4. When done, press Save.

7. ICE (IN CASE OF EMERGENCY)
In case of a trauma, it is critical to have this information as early as possible to increase the chances of survival. Add ICE contact to improve your own safety. First responders can access additional information such as medication and neat of kin from your phone in case of an emergency. All fields are optional, but the more information provided the better.

Press ‡ to Phonebook ‡ ICE.
2. Use ‡ to scroll the list of entries.
3. Press Edit to add or edit information in each entry. Delete with Clear.
4. Press Save when done.

8. ASSISTANCE BUTTON
The assistance button allows easy access to contact your predefined help numbers should you need help. Make sure that the assistance function is activated before use. See the full manual on how to activate, how to enter recipients in the numbers list, and how to edit the text message.

Make an assistance call
If help is needed, press and hold the assistance button for 3 seconds, or press it twice within 4 seconds.

The assistance call begins after a delay of 5 seconds. In this time you can prevent a possible false alarm by pressing the button again.

2. An assistance text message (SMS) is sent to all recipients.
3. The first recipient in the list is dialed. If the call is not answered within 25 seconds, the next number is dialed.
4. Dialing repeats 5 times or until the call is answered, or † is pressed.

CAUTION
When an assistance call is activated the phone is put to handsfree mode. Do not hold the device near your ear when the handsfree mode is in use, because the volume may be extremely loud.

Assistance button settings
Press Menu ‡ Settings ‡ Assistance.

9. MESSAGES
Create and send text messages
1. Press shortcut button 0, or press Menu ‡ Messages ‡ Create new ‡ SMS.
2. Write your message, then press To.
3. Select a recipient from Phonebook. Alternatively, select Enter number to add recipient manually and press Done.
4. Select Add to add more recipients. You can modify the recipients by selecting one and pressing Options ‡ Edit/Delete/Delete all.
5. When done, press Send.

Create and send picture messages
Both you and the recipient must have subscriptions that support picture message. The settings for picture message are supplied by your service provider and can be sent to you automatically via text message.

Press ‡ to picture to take a picture.

Press ‡ to add recipient to add recipient number and manually press and Done.

Press ‡ to add more recipients.

Press ‡ to send.

Note! To keep best picture quality, send only one picture per message.

16. SAFETY INSTRUCTIONS
WARNING
Dangers associated with electrical apparatus can cause burns or electrocution.

- Do not use or store the device in dusty, dirty environments. The use of an unqualified battery may present a risk of fire, explosion, leakage, or other hazard.
- Do not use the device in the vicinity of medical equipment. If you have any suspicion regarding the appropriateness of your device to medical equipment, contact the manufacturer or its representatives for information about your vehicle or any additional equipment.

- Do not disassemble, open, crush, bend, deform, puncture or shred the battery.
- Do not use strong chemicals to clean the unit. The output of the device, the lower its SAR value.
- This device conforms to the applicable national or international safety requirements for exposure to radio waves. Your mobile device is a radio transmitter and receiver. It is designed so that the exposure to Radio Frequency (RF) energy is kept well below levels that have been specified by the authorities as being safe for the general public. These specifications are established on the basis of scientific guidelines that leave a substantial safety margin designed to assure the safety of all persons, regardless of age and health. If you are uncertain about your right to copy any material, please consult your legal advisor. No responsibility is assumed for the functionality, content, or end-user support of third-party apps provided with your device.

Specific Absorption Rate (SAR) This product meets the applicable national and international safety requirements for exposure to radio waves. Your mobile device is a radio transmitter and receiver. It is designed so that the exposure to radio waves (radio frequency electromagnetic fields) recommended by the International Commission on Non-Ionizing Radiation Protection (ICNIRP) is not exceeded for the conditions specified on the device label. Exposure guidelines are based on the unit of measurement known as the Specific Absorption Rate (SAR). The SAR limit for wireless mobile devices is 1.6 watts per kilogram (1.6 W/kg). To maximize the protection provided by your wireless device, please follow the SAR guidelines and hold the device at least 0.5 cm away from your body. For vehicles equipped with air bags: Remember that air bags fill with a substantial safety margin designed to assure the safety of all persons, regardless of age and health.
