Installation

**IMPORTANT!**

Turn off the phone and disconnect the charger before removing the battery cover.

**Installing the SIM card, memory card and the battery**
The SIM and memory card holder’s are located inside the battery compartment.

1. Remove the battery cover and the battery if it is already installed.
2. Insert the SIM card by gently sliding it into the holder. Make sure that the SIM card’s contacts are facing inwards and that the cut off corner is pointing downwards. Take care not to scratch or bend the contacts on the SIM card.
3. Optional, insert the memory card by gently sliding it into the holder. Make sure that the memory card’s contacts are facing inwards and that the cut off corner is pointing upwards. Take care not to scratch or bend the contacts on the memory card.
   To remove the memory card: Find the small ridge on the exposed end of the memory card. Put your fingernail into the ridge and gently pull the memory card out. If your fingernail is too short, you can use a small screwdriver or a pen cap.
4. Insert the battery by sliding it into the battery compartment with the contacts facing upwards to the left. Replace the battery cover.
**IMPORTANT!**

Use only compatible memory cards for use with this device. Compatible card type: **microSD, microSDHC**.

Incompatible cards may damage the card and the device and corrupt data stored on the card. Memory cards are sold separately.
## Charging

### CAUTION

Only use batteries, charger and accessories that have been approved for use with this particular model. Connecting other accessories may be dangerous and may invalidate the phone's type approval and guarantee.

When the battery is running low, ¯ is displayed and a warning signal is heard. To charge the battery, connect the mains adapter to a wall socket and to the charging socket ¯. ¯ is displayed briefly when the charger is connected to the phone, and ¯ when it is disconnected. The battery charge indicator will be animated while charging. It takes approximately 3 hours to fully charge the battery.

¯ is displayed on the screen when charging is completed. If the phone is turned off when the charger is connected to the phone only the battery charge indicator will be shown on the display.

**Note!**

*To save power the LCD backlight goes off after a while. Press any button to illuminate the display. Full battery capacity will not be reached until the battery has been charged 3–4 times. Batteries degrade over time, which means that call time and standby time will normally decrease with regular use.*

**Save energy**

When you have fully charged the battery and disconnected the charger from the device, unplug the charger from the wall outlet.

Activating the phone
Press and hold the red button on the phone to turn it on/off. Confirm with OK to power off.

If the SIM card is valid but protected with a PIN code (Personal Identification Number), PIN is displayed. Enter the PIN code and press OK ( upper left corner of keypad). Delete with Clear ( upper right corner of keypad).

\textbf{Note!}
If PIN and PUK codes were not provided with your SIM card, please contact your service provider.

\textbf{Attempts:} # shows the number of PIN attempts left. When no more attempts remain, PIN blocked is displayed. The SIM card must now be unlocked with the PUK code (Personal Unblocking Key).

1. Enter the PUK code and confirm with OK.
2. Enter a new PIN code and confirm with OK.
3. Re-enter new PIN code and confirm with OK.

\textbf{Start-up wizard}
When starting the telephone for the first time, you can use the Start-up wizard to set some basic settings.

When Run start-up wizard? is displayed, press Yes to change Language, Time & date, Ring tone, Volume, Text size or Themes. Press No if you don’t want to change.

\textbf{Tip:}
You can run the Start-up wizard later if you want, see Start-up wizard, p.25.

\textbf{Standby (Idle mode)}
When the phone is ready to use, and you have not keyed in any characters, the phone is in standby.

Left selection button in standby is Menu.
Right selection button in standby is Name.
**Tip:**
You can always press 📞 to return to standby.

**Changing the language, time and date**
The default language is determined by the SIM card. See *General, p.24* on how to change language, time and date.

**Making a call**
1. Enter the phone number including the area code. Delete with Clear.
2. Press 📞 to dial. Press Abort to cancel dialling.
3. Press 📞 to end the call.

**Tip:**
For international calls, always use + before the country code for best operation. Press * twice for the international prefix +.

**Making a call from the Phonebook**
1. Press Name to open the phonebook.
2. Use the arrow buttons 🔄/◀️ to scroll through the phonebook, or quick search by pressing the key corresponding to the first letter of the entry, see *Entering text ◀️, p. 8*.
3. Press Call to dial the selected entry, or press Back.

**Receiving a call**
To answer an incoming call when the flip is closed, open the flip.

To answer an incoming call when you have set Open to answer to Off, see *Answer mode, p.33*.

1. Open the flip and press 📞 to answer, or press Silent to switch off the ring signal and then Reject to reject the call (busy signal). Alternatively, press 📞 to reject the call directly.
2. Press 📞 to end the call.

**Tip:**
Press and hold + or – to temporary switch off the ring signal without opening the flip.
**Volume control**
Use the side buttons +/– to adjust the sound volume during a call. The volume level is indicated on the display. If you use hearing aid or have hearing difficulties when using the telephone in noisy environment, you can customize the phone's audio settings, see *Audio setup*, p.28.

**Entering text**
Press a numerical key repeatedly until the desired character is shown. Wait a few seconds before entering the next character.

Press * for a list of special characters. Select the desired character with ←/→ and press OK to enter it.

Use the side keys +/– or ←/→ to move the cursor within the text.

Press # to cycle upper case, lower case and numerals.

Press and hold # to change input language.

**Entering text with predictive text**
In some languages you can use the Smart ABC (eZiType™) input method which uses a dictionary to suggest words. See *Predictive text*, p.35 on how to activate predictive text.

Press each key once, even if the displayed character is not the one you want. The dictionary will suggest words based on the keys you have pressed.

1. To write the word “Fred”, press 3, 7, 3, 3. Complete the word before looking at the suggestions.
2. Use ←/→ to view the suggested words.
3. Press Select and continue with the next word.
   Alternatively, press 0 to continue with the next word.

If none of the suggested words are correct, use manual input mode.

The icon on the top left of the display indicates the input mode:
Call options
During a call the selection buttons\(^1\) (≡) give access to additional functions:

**Options (left selection button)**
A menu with the following options is displayed:

<table>
<thead>
<tr>
<th>Hold single call/Retrieve single</th>
<th>Hold/retrieve the current call.</th>
</tr>
</thead>
<tbody>
<tr>
<td>End single call</td>
<td>End the current call (same as ≧).</td>
</tr>
<tr>
<td>New call</td>
<td>Call another number (Conference).</td>
</tr>
<tr>
<td>Phonebook</td>
<td>Search the phonebook.</td>
</tr>
<tr>
<td>Messages</td>
<td>Write or read SMS messages.</td>
</tr>
<tr>
<td>Mute</td>
<td>Disable the microphone.</td>
</tr>
</tbody>
</table>

**SPK on (right selection button)**
Activates handsfree mode, which allows you to speak without holding the phone. Speak clearly into the microphone at a maximum distance of 1 m. Use the side keys +/− to adjust the loudspeaker volume. Press **SPK off** to return to normal mode.

---

1. selection buttons have multiple functions. The current key function is shown above the selection button on the display.
Note!
The handsfree function allows only one person at a time to talk. Switching between talk/listen is triggered by the sound of the person talking. Loud noises (music, etc.) in the background may interfere with the function.

Call waiting
An alert tone will be heard if there is an incoming call while talking. To put the current call on hold and answer the incoming call, press Options, select Answer and then OK.

Tip:
Call waiting must be activated, see Call setup, p.33.

Call information
During a call, the outgoing or incoming phone number and the elapsed call time is displayed. If the identity of the caller is withheld, Unknown is displayed.

Speed dial
You can use keys \texttt{A}, \texttt{B} and \texttt{C} and you can also use the numerical keys \texttt{0} and \texttt{2–9}. To speed dial an entry from standby, press and hold the corresponding key. See Speed dial, p.32.

Silent
Silent is a fixed profile with Keypad tone, Message tone and Ring tone disabled, while Vibration, Tasks and Alarm are unchanged.

Tip:
Press and hold shortcut button \# to activate/deactivate Silent.

Headset
When a headset is connected, the internal microphone in the phone is automatically disconnected.

When receiving a call you can use the answer key on the headset cable (if it has one) to answer and end calls.
CAUTION

Using a headset at high volume may damage your hearing. Adjust the volume level carefully when using a headset.

SOS calls
As long as the phone is switched on, it is always possible to place an SOS call by entering the main local emergency number for your present location followed by 📞.

Some networks accept calls to emergency numbers without a valid SIM card. Contact your service provider for more information.

Emergency button +

IMPORTANT!

Always inform recipients in Number list that they are listed as your emergency contacts.

CAUTION

When an emergency call is activated the phone is pre-set to handsfree mode. Do not hold the device near your ear when the handsfree mode is in use, because the volume may be extremely loud.

The Emergency button allows easy access to contact your predefined help numbers (Number list) should you need help. The Emergency function may need to be activated before use. See Emergency +, p.39 on how to activate as described or with 3 button presses, how to enter recipients in the numbers list, and how to edit the text message.

- Press and hold the Emergency button for 3 seconds, or press it two times within 1 second. The emergency call begins after a delay of 5 seconds. In this time you can prevent a possible false alarm by pressing 📞.
- An emergency SMS is sent to all recipients.
- The first recipients in the list is dialled. If the call is not answered within 25 seconds, the next number is dialled. Dialling is repeated 3 times or until the call is answered, or until 📞 is pressed.
• The Emergency function may be configured so that the receiver of the call must press "0" (zero) to confirm, in order to stop the alarm sequence. If there is a risk that the emergency call will be answered by a voice mail/answering service, please activate the function Confirm with "0". See Confirm with "0", p.40.

Note!
Some private security companies can accept automatic calls from their clients. Always contact the security company before using their phone number.

IMPORTANT!

Information to the **receiver** of an Emergency call, when Confirm with "0" is activated:

• After receiving the emergency message, each number in the Number list will be called sequentially.
• To confirm the emergency call, the **receiver** need to press **0**.
• If the **receiver** doesn’t press **0** within 60 seconds (after answering) the call will be disconnected and the next number in sequence will be called.
• If the **receiver** press **0** within 60 seconds, the call is confirmed and no further call attempts will be made (emergency sequence interrupted).
Phonebook

The phonebook can store 300 entries with 3 phone numbers in each entry.

Creating a phonebook entry

1. Press **Menu**, scroll to **Contacts** and press **OK**.
2. Select **-New contact-** and press **Add**.
3. Enter a **Name** for the contact, see *Entering text*, p. 8. Delete with **Clear**.
4. Use **/** to select **Mobile**, **Home** or **Office**, and enter the phone number(s) including the area code.
5. Select **Picture** and press **Edit** to associate a picture to the contact.
   This picture will be displayed when the corresponding contact is calling you and may also be visible in the phonebook, see *Phonebook picture*, p.27.
   - Select **Take picture** and press **OK** for using the camera to take a picture.
   - Select **My pictures** and press **OK** to select an existing picture.
6. Press **Save**.

   **Tip:**

   *For international calls, always use + before the country code for best operation. Press * twice for the international prefix +.*

Creating ICE entry (In Case of Emergency) +

With this additional information and medical information, first responders can access this information from the victim's phone in case of emergency. In the event of a trauma, it is critical to have this information as early as possible which can increase the chances of survival. All fields are optional, but the more information provided the better. See *ICE (In Case of Emergency) +*, p.15 on how to configure your ICE information.

Managing phonebook entries

1. Press **Menu**, scroll to **Contacts** and press **OK**.
2. Select a contact and press **Options**.

Connecting the phone to a computer

Connect the phone to a computer and start transferring pictures, music and other file types. All you have to do is connect a USB cable between the phone and computer. From your computer's file explorer, you can drag and drop content between your phone and the computer.

**Note!**
*You might not be able to transfer some copyright-protected material.*
Drag and drop content between phone and a computer
1. Connect your phone to a computer using a USB cable.
2. Wait until the phone/memory card appears as external disks in the file explorer.
3. Drag and drop selected files between the phone and the computer.

Note!
When the phone/memory card is mounted to the computer, the phone cannot access the memory card. Some functionality and applications in the phone, such as the camera, may not be accessible.
You can transfer files by using a USB cable on most devices and operating systems supporting a USB Mass Storage interface.

Disconnect the USB cable safely
1. Make sure to enable the hardware to be safely removed.
2. Disconnect the USB cable.

Note!
Do not disconnect the USB cable when transferring content as this may corrupt the content.
Computer instructions may vary depending on your operating system.
See the documentation of your computer's operating system for more information.

Settings

Note!
The settings described in this chapter are carried out in standby mode.

Example:
You want to send Jeff Jackson’s mobile number, home number and his office number to Doro PhoneEasy® 612. The mobile number is:

*#phonebook#Jeff Jackson#0700393939#0462805011#0462805083#

The number will be saved in the 612 Phonebook as:

Jeff Jackson
0700393939
0462805011
0462805083

**Note!**
Only use numerals for parameters 2, 3 and 4. If you use letters in these parameters it will be stored as empty/blank in the Phonebook. Contacts already saved in the Phonebook, will not be replaced. They will be duplicated. This is to avoid unintentional removal of contacts from the Phonebook.

**Tip:**
When storing international numbers, always use + before the country code for best operation. Enter the phone number including the area code.

Safety instructions

⚠️ CAUTION

The unit and the accessories can contain small parts. Keep all of the equipment out of the reach of small children. The mains adapter is the disconnect device between the product and mains power. The mains socket outlet must be close to the equipment and easily accessible.

Network services and costs

Your device is approved for use on the GSM 900/1800/1900 MHz networks. To use the device, you need a subscription with a service provider.

Using network services may result in traffic costs. Some product features require support from the network, and you may need to subscribe to them.

Operating environment

Follow the rules and laws that apply wherever you are, and always turn off the unit whenever its use is prohibited or can cause interference or hazards. Only use the unit in its normal user position.

This unit complies with guidelines for radiation when it is used either in a normal position against your ear, or when it is at least 1.5 cm from your body. If the unit is carried close to your body in a case, belt holder or other holder, these holders should not contain any metal, and the product should be placed at the distance from your body specified above. Make sure that the distance instructions above are followed until the transfer is complete.

Parts of the unit are magnetic. The unit can attract metal objects. Do not keep credit cards or other magnetic media near the unit. There is a risk that information stored on them can be erased.

Medical units

The use of equipment that transmits radio signals, for example, mobile phones, can interfere with insufficiently protected medical equipment. Consult a doctor or the manufacturer of the equipment to determine if it has adequate protection against external radio signals, or if you have any questions. If notices have been put up at health care facilities instructing you to turn off the unit while you are there, you should comply. Hospitals and other health care facilities sometimes use equipment that can be sensitive to external radio signals.

Pacemakers

The Health Industry Manufacturers Association recommends that a minimum separation of 15 cm be maintained between a handheld wireless phone and a
pacemaker to avoid potential interference with the pacemaker. Persons with pacemakers:
- Should always keep the phone more than 15 cm from their pacemaker when the phone is turned on.
- Should not carry the phone in a breast pocket.
- Should use the ear opposite the pacemaker to minimize the potential for interference.

If you have any reason to suspect that interference is taking place, turn the phone off immediately.

**Areas with explosion risk**
Always turn off the unit when you are in an area where there is a risk of explosion. Follow all signs and instructions. There is a risk of explosion in places that include areas where you are normally requested to turn off your car engine. In these areas, sparks can cause explosion or fire which can lead to personal injury or even death.

Turn off the unit at filling stations, and any other place that has fuel pumps and auto repair facilities.

Follow the restrictions that apply to the use of radio equipment near places where fuel is stored and sold, chemical factories and places where blasting is in progress.

Areas with risk for explosion are often – but not always – clearly marked. This also applies to below decks on ships; the transport or storage of chemicals; vehicles that use liquid fuel (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust or metal powder.

**Protect your hearing**

![WARNING]
Excessive exposure to loud sounds can cause hearing damage. Exposure to loud sounds while driving may distract your attention and cause an accident.
Listen to a headset at a moderate level, and do not hold the device near your ear when the loudspeaker is in use.

**Emergency calls**

**IMPORTANT!**
Mobile phones use radio signals, the mobile phone network, the terrestrial network and user-programmed functions. This means that connection cannot be guaranteed in all circumstances. Therefore, never rely only on a mobile phone for very important calls such as medical emergencies.
Vehicles

Radio signals can affect electronic systems in motor vehicles (for example, electronic fuel injection, ABS brakes, automatic cruise control, air bag systems) that have been incorrectly installed or are inadequately protected. Contact the manufacturer or its representative for more information about your vehicle or any additional equipment.

Do not keep or transport flammable liquids, gases or explosives together with the unit or its accessories. For vehicles equipped with air bags: Remember that air bags fill with air with considerable force.

Do not place objects, including fixed or portable radio equipment in the area above the airbag or the area where it might expand. Serious injuries may be caused if the mobile phone equipment is incorrectly installed and the airbag fills with air.

It is prohibited to use the unit in flight. Turn off the unit before you board a plane. Using wireless telecom units inside a plane can pose risks to air safety and interfere with telecommunications. It may also be illegal.

Care and maintenance

Your unit is a technically advanced product and should be treated with the greatest care. Negligence may void the warranty.

- Protect the unit from moisture. Rain/snowfall, moisture and all types of liquid can contain substances that corrode the electronic circuits. If the unit gets wet, you should remove the battery and allow the unit to dry completely before you replace it.
- Do not use or keep the unit in dusty, dirty environments. The unit's moving parts and electronic components can be damaged.
- Do not keep the unit in warm places. High temperatures can reduce the lifespan for electronic equipment, damage batteries and distort or melt certain plastics.
- Do not keep the unit in cold places. When the unit warms up to normal temperature, condensation can form on the inside which can damage the electronic circuits.
- Do not try to open the unit in any other way than that which is indicated here.
- Do not drop the unit. Do not knock or shake it either. If it is treated roughly the circuits and precision mechanics can be broken.
- Do not use strong chemicals to clean the unit.

The advice above applies to the unit, battery, mains adapter and other accessories. If the phone is not working as it should, please contact the place of purchase for service. Don't forget the receipt or a copy of the invoice.
Warranty

This product is guaranteed for a period of 12 months from the date of purchase. In the unlikely event of a fault occurring during this period, please contact the place of purchase. Proof of purchase is required for any service or support needed during the guarantee period.

This guarantee will not apply to a fault caused by an accident or a similar incident or damage, liquid ingress, negligence, abnormal usage, non-maintenance or any other circumstances on the user’s part. Furthermore, this guarantee will not apply to any fault caused by a thunderstorm or any other voltage fluctuations. As a matter of precaution, we recommend disconnecting the charger during a thunderstorm.

Batteries are consumables and are not included in any guarantee. This guarantee does not apply if batteries other than DORO original batteries are used.
