1. GET STARTED

SIM card, memory card and battery

Remove the battery cover
Be careful not to damage your fingernails when you remove the battery cover. Do not bend or twist the battery cover excessively as it may be damaged.

Insert SIM card (required)
Remove the battery if it is already installed. There are four SIM card slots, SIM1 and SIM2. If you are to use only one SIM card, we recommend to use SIM1 slot.

Insert SD card (optional)
Press the card’s lid carefully towards the assistance button until it “clicks”. Lift the lid to an upright position. Make sure the card’s contacts are facing downwards. Fold down the lid and carefully push it down, sliding it back in place.

Note! The circuit boards (metal part) on the cards must not be scratched or bent. Try not to touch the circuits with your fingers.

Insert the battery
Insert the battery by sliding the battery compartment with the circuits facing down to the right. Replace the battery cover.

2. CHARGE THE PHONE

CAUTION
Only use batteries, charger and accessories that have been approved for use with this particular model. Connecting other accessories may be dangerous and may invalidate the phone’s type approval and guarantee.

When the battery is running low, displays a warning signal is heard.

• Connect the mains adapter to the wall socket and to the charging socket.

Tip: Don’t forget to remove the protective plastic film from the display.

3. GET TO KNOW YOUR PHONE

Turn the phone on and off
1. Press and hold the green button on the phone to turn it on/off. Confirm with Yes to power off.
2. If the SIM card is valid but protected with a PIN code (Personal Identification Number), Input SIM1 PIN is displayed. Enter the PIN code and press OK. Delete with Clear.

Note! If PIN and PUK codes were not provided with your SIM card, please contact your service provider.

Trials remain: Shows the number of PIN attempts left. When no more attempts remain, PIN blocked is displayed. The SIM card must now be unlocked with the PUK code (Personal Unblocking Key).

1. Enter the PUK code and confirm with OK.
2. Enter a new PIN code and confirm with OK.
3. Re-enter the new PIN code and confirm with OK.

Start-up wizard
When starting the telephone for the first time, you can use the start-up wizard to set some basic settings.

Tip: You can run the start-up wizard later if you want.

Step-by-step instructions
In this document the arrow (→) indicates next action in the step-by-step instructions. To confirm an action in the phone, press OK. To select an item, scroll or highlight the item using ↑/↓ and then press OK.

Enter text
• Press a numerical key repeatedly until the desired digit is entered. Wait a few seconds before entering the next character.
• Press for a list of special characters. Select the required character with ←/→ and press OK to enter it.
• Use ↑/↓ to move the cursor within the text.
• Press to cycle upper case, lower case and numerals.
• Press and hold to change writing language.

Change language, time and date
The default language is determined by the SIM card.

4. PHONEBOOK

The Phonebook can store 100 entries with 3 phone numbers in each entry.

Add a contact
1. Press Menu → Phonebook → New contact → Add.
2. Enter a Name for the contact, see Enter text. Delete with Clear.
3. Press to select Mobile, Home or Office, and enter the phone number(s) including the area code.
4. When done, press Save.

Speed dial
Use ←/→ to speed dial an entry from standby.

1. Press and hold the number(s) to speed dial entries for buttons 0 to 9.
2. Select and add an entry from Received call log.
3. Press OK to confirm.
4. To repeat to add speed dial entries for buttons 0–9.

Call log
Received, missed, and dialled calls are saved in a combined call log. 20 calls of each type can be saved in the display.

• Press OK to answer, or press Silent to switch off the ring signal and then Reject (Busy signal).

To confirm an action in the phone, press OK. To select an item, scroll or highlight the item using ↑/↓ and then press OK.

Call options
During a call the soft keys (↓/↑) give access to additional functions.

5. MESSAGES

Create and send text messages
1. Press Menu → Messages → Create new → SMS.
2. Write your message, see Enter text, then press To.
3. Select a recipient from Add from Phonebook.

Alternatively, select Enter number to add recipient manually and press OK.

You can modify the recipient by selecting one and press Options → Edit/Delete/ Delete all.

5. When done, press Options → Send.

Create and send picture messages
Both you and the recipient must have subscriptions that support picture message. The settings for picture message are supplied by your service provider and can only be entered by you automatically via text message.

1. Press Menu → Messages → Create new → MMS.
2. Write your message, see Enter text.
3. Press Options → Add picture:

• My pictures to select a file

• Pick picture to use the camera to take a picture.

Note! To keep best picture quality, send only one picture per message. You can also Add sound, Add video, and Preview MMS using the Options menu.

4. Press Options → Add next recipient and enter your subject, then press Options → Done.

5. Press Options → To and select recipient from Add from Phonebook.

Alternatively, select Enter recipient to add recipient manually and press Options → Done.

6. Press Options → Send to send.

Setings
• Press Menu → Settings → Messages.

ICE (In Case of Emergency)
In the event of a trauma, it is critical to have this information as early as possible to increase the chances of survival. Add ICE contact to improve your own safety. First responders can access additional information such as medication and next of kin from your phone in case of an emergency. All fields are optional, but the more information provided the better.

Press Menu → Phonebook → ICE.

5. Use ←/→ to scroll the list of entries.
6. Press Edit to add or edit information in each entry. Delete with Clear.
7. Press Save when done.

4. ASSISTANCE BUTTON

The assistance button allows easy access to contact your predefined help numbers should you need help. Make sure that the assistance function is activated before use and make all necessary configurations. Test the application thoroughly.

Make an assistance call
1. When help is needed, press and hold the assistance button for 4 seconds, or press it twice within 1 second.

The assistance call begins after a delay of 5 seconds. In this time you can prevent a possible false alarm by pressing ←/→.

2. An assistance text message (SMS) is sent to all recipients. The first recipient in the list is dialled. If the call is not answered within 25 seconds, the next number is dialled. Dialling is repeated 3 times or until the call is answered, or until ←/→ is pressed.

CAUTION
When an assistance call is activated the phone is set to handfree mode. Do not hold the device near your ear when the handsfree microphone is in use, because the volume may be extremely loud.

Settings
• Press Menu → Settings → Assistance.

Tip:
Press and hold + to scroll through the call log.

Receive a call
• Press OK to answer, or press Silent to switch off the ring signal and then Reject (Busy signal).

Alternatively, press to reject the call directly.

2. Press to end the call.

Volume control
Use ↑/↓ to adjust the sound volume during a call. The volume level is indicated on the display.

Silent
Silent is a fixed profile with keypad tone, message tone and ring tone disabled, while vibration, tasks and alarm are unchanged.

Press and hold to activate and to deactivate silent.

Call options
DURING A CALL THE SOFT KEYS (↓/UP) GIVE ACCESS TO ADDITIONAL FUNCTIONS.
1. CAMERAS (TAKE PHOTOS)

10. TROUBLESHOOTING

- On standby or in use, press the side key to open the main menu.
- No signal? Check your phone’s battery level and try to turn on your phone or contact your network operator.
- Data service unavailable? Check your SIM card state and whether it has enough credit.

11. SAFETY INSTRUCTIONS

- Do not disassemble the unit. The unit contains very small objects. Keep it out of reach of children to prevent ingestion or choking.

1. CARE AND MAINTENANCE

- Protect the unit from moisture. Rain, snow, liquids, and moisture can cause corrosion. If the unit gets wet, dry it thoroughly before you use it again.
- Do not use or keep the unit in dusty, dirty environments. It can attract dust and dirt, which can damage the unit.

12. ALARM

- Use the alarm to remind you of important events or to set specific wake-up times.

13. WARRANTY

- 1 year for parts and labor from the date of purchase. The warranty does not cover any faults caused by unauthorized repairs.

14. COPYRIGHT AND OTHER NOTICES

- vCard is a trademark of the Internet Mail Consortium.

The marking on the product, accessories or manuals included with the product shall not be altered in any way (e.g. charger, headset, USB cable) so as to be able to identify the product made by the manufacturer or its representative for more information about your vehicle or any additional equipment.
Do not keep the unit in dusty, dirty environments. The unit can attract dust and dirt, which can damage the unit.
Do not use the unit near water. High temperatures can reduce the lifespan of the equipment, damage batteries, and distort or melt certain plastics.
Do not use the unit near water or moisture. When the unit warms up to normal temperature, condensation can form on the inside of the unit, which can damage the electronic circuits.
Do not use the unit in any way that is not specified in this manual. The advice above applies to the unit, battery, memory adapter and accessories. If the unit is not working as it should, please contact the place of purchase for service. Don’t forget the receipt or copy of the invoice.
