Note! All illustrations are for illustrative purposes only and may not accurately depict the actual device. This guide is for reference only. This guide is for reference only. The actual device and the items supplied, including but not limited to the colour, size, and screen layout, may vary depending on the software and accessories available in your region or offered by your service provider. Supplied accessories provide the best performance with your phone. Your local Doro dealer provides additional accessories.

1. GET STARTED

SIM card, memory card and battery

Remove the battery cover
Be careful not to damage your fingernails when you remove the battery cover. Do not bend or twist the battery cover excessively as it may be damaged.

Insert SIM card (required)
Remove the battery if it is already installed. Slide the card under the metal part, with the gold-coloured circuit board facing down. The cut-off corner of the card helps you to place the card, correct placement is indicated in the compartment.

Insert SD card (optional)
Locate the SD card holder and gently slide the card in the holder.

Note! The circuit boards (metal part) on the cards must not be scratched or bent. Try not to touch the circuits with your fingers. Use only compatible memory cards with this device. Compatible card type: microSD, microSDHC. Incompatible cards may damage the card itself, the device and corrupt any data stored on the card.

Insert the battery
Insert the battery by sliding it into the battery compartment with the circuits facing up to the left. Replace the battery cover.

Charge the phone

CAUTION
Only use batteries, charger and accessories that have been approved for use with this particular model. Connecting other accessories may be dangerous and may invalidate the phone’s type approval and guarantee.

When the battery is running low, it is displayed and a warning signal is heard.

• Connect the mains adapter to the wall socket and to the charging socket of the phone.

Tip: Do not forget to remove the protective plastic film from the display.

2. GET TO KNOW YOUR PHONE

Turn the phone on and off
1. Press and hold the red button (a) on the phone to turn it on/off. Confirm with Yes to power off.
2. If the SIM card is valid but protected with a PIN code (Personal Identification Number), PIN is displayed. Enter the PIN code and press OK. Delete with Clear.

Note! If PIN and PUK codes were not provided with your SIM card, please contact your service provider.

Attempts: If shows the number of PIN attempts left. When no more attempts remain, PIN blocked is displayed. The SIM card must now be unlocked with the PUK code (Personal Unblocking Key).

1. Enter the PUK code and confirm with OK.
2. Enter a new PIN code and confirm with OK.
3. Re-enter the new PIN code and confirm with OK.

Start-up wizard

When starting the telephone for the first time, you can use the start-up wizard to set some basic settings.

Tip: You can run the start-up wizard later if you want.

Step-by-step instructions

In this document the arrow (→) indicates next action in the step-by-step instructions.

1. Confirm an action in the phone, press OK.
2. To select an item, scroll vertically or highlight the item using (▲) and then press OK.
3. To scroll horizontally, use (▲) or (▼).

Enter text

• Press a numerical key repeatedly until the desired character is shown. Wait a few seconds before entering the next character.
• Press for a list of special characters. Select the desired character with (▲) or (▼) and press OK to enter it.
• Use (▲) to move the cursor within the text.
• Press to cycle upper case, lower case and numerals.

Change language, time and date

The default language is determined by the SIM card.

3. CALLS

Make a call

1. Enter the phone number. Delete with Clear.
2. Press to dial. Press Abort to cancel the call.
3. Press to end the call.

Note! For international calls, always use + before the country code for best operation. Press twice for the international prefix +.

Call from the phonebook

1. Press Name to open the phonebook.
2. Use (▲) to scroll through the phonebook, or quick search by pressing the key corresponding to the first letter of the name.
3. Press Options → Call, alternatively, press OK to dial the selected entry, or press Back to return to standby.

Receive a call

1. Press to answer, or press Silent to switch off the ring signal and then Reject (Busy signal).
2. Press to end the call.

Volume control

Use (▲) to adjust the sound volume during a call. The volume level is indicated on the display.

Silent
Silent is a fixed profile with keypad tone, message tone and ring tone disabled, while vibration, tasks and alarm are unchanged.

• Press and hold to activate and deactivate silent.

Call options

During a call the soft keys (a) give access to additional functionalities.

Speed dial

Use (▲) to speed dial an entry from standby.

• Press and hold the corresponding button to dial.

Add speed dial numbers

1. Press → Phonebook
2. Use (▲) to scroll through the phonebook, or quick search by pressing the key corresponding to the first letter of the name.
3. → Options → Phonebook settings → Speed dial → Set number.
4. Select → Edit and select an entry from the phonebook.
5. Press OK to confirm.
6. Repeat to add speed dial entries for buttons (a) to (g).

SOS calls

As long as the phone is switched on, it is always possible to place an SOS call by entering the main local emergency number for your present location followed by (b).

Call history

Received, missed, and dialled calls are saved in a combined call log. 20 calls of each type can be stored in the log. For multiple calls related to the same number, the last call is saved.

1. Press → Phonebook → Call history
2. Use (▲) to scroll through the call log.

Enter text

To enter text.

Select a recipient with (▲) or (▼).

Then press → Dial (a) to dial, or Use (▲) to scroll through the call log.

Menu

Assistance button

When help is needed

1. When help is needed, press and hold the assistance button for 3 seconds, or press it twice within 1 second.

2. An assistance text message (SMS) is sent to all recipients. The first recipient in the list is dialled. If the call is not answered within 25 seconds, the next number in the list is dialled. Dialling is repeated 3 times or until the call is answered, or until (▲) is pressed.

CAUTION
When an assistance call is activated the phone is pre-set to handsfree mode. Do not hold the device near your ear when the handsfree mode is in use, because the volume may be extremely loud.

Settings

• Press → Settings → Assistance.

6. MESSAGES

Create and send text messages

1. Press → Messages → Write message.
2. Write your message.
3. Then press Options → To.
4. Select a recipient with Add from Phonebook. Alternatively, select Enter number to add recipient manually and press OK.
5. You can modify the recipients by selecting one and press Options → Edit/Delete/ Delete all.
6. When done, press Options → Send.

Create and send picture messages

Both you and the recipient must have subscriptions that support picture message. The settings for picture message are supplied by your service provider and can be sent to you automatically via text message. Contact your provider for more information.

1. Press → Messages → MMS
2. Write your message, press Enter text.
3. Press Options → Add picture:

• My pictures to select a file.

Note! To keep best picture quality, send only one picture per message.

You can also Add sound, Add video, and Preview MMS using the Options menu.

3. Press Options → Add subject and enter your subject, then press Done.
4. Press Options → To and select a recipient with Add from Phonebook. Alternatively, select Enter recipient to add recipient manually and press OK.
5. When done, press Options → Send.

Settings

• Press → Messages → Messages → SMS / MMS
1.1. TROUBLESHOOTING

Do not attempt to repair your phone. Opening the phone may invalidate the warranty.

Battery

- Battery charge low: Connect the power adapter and charge the battery.
- Battery incorrectly installed: Check the installation of the battery.
- Battery overheated: This may result in the device overheating. It is possible that the device may become hot when the device is cold and the device near your ear when the loudspeaker is in use.

Emergency calls

- Important!: Do not make any other calls while using the emergency telephone service. The network capacity is often less than normal.
- Important!: Do not use only a mobile phone for very important calls. There may be delays in the connection.

8. BLUETOOTH®

You can connect wireless devices to other Bluetooth®-compatible devices such as headsets or phones. Do not pair with an unknown device.

Active Bluetooth®

1. Press Menu © Settings © Connectivity © Bluetooth © My device.
2. Press Search new.
3. Select a device from the list and press Bond to connect. If Bluetooth® is not enabled, press Yes to activate.
4. Press OK to confirm.

9. SOUND & DISPLAY

Tone setup

Press Menu © Settings © Sound © Tone setup.
- Select
- Use /© to select one of the available melodies, the melody will be played.
- OK to confirm or Back to discard any changes.

LCD backlight

Customise the display settings.

Press Menu © Settings © Phone © LCD backlight:
- Set Brightness 1-5 using © (down) and © (up), the 3 is the default value.
- Set Time 5-60 seconds using © (down) and © (up).
- Press OK to confirm.

10. ADDITIONAL ALARMS

Alarm

1. Press Menu © Organiser © Alarm © On.
2. Enter the alarm time using the keypad and press OK to confirm.
- • Single, for a single occurrence
- • Repeated, for a repeated alarm. Scroll through the list of days and press On or Off to enable or to disable for each day.
3. When done, press OK.
4. If the alarm goes off a signal will sound. Press Stop to turn off the alarm or press Snooze to repeat the alarm 9 minutes later. More alarm sounds even when the phone is switched off. Do not power off if wireless phone use is prohibited or when it may cause interference or danger.

Torch

- © (up) to turn on the torch. Slide down to turn off.

11. TECHNICAL DATA

Network bands (MHz) (maximal radio-frequency power/dBm): 2G GSM
- 900 (3), 1800 (30)
- 2100 (2402 - 2408 (10))

Speciﬁc Absorption Rate (SAR)

This product meets all international safety requirements for exposure to radio waves. Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic ﬁelds) recommended by the independent scientiﬁc organization ICNIRP (International Commission for Non-Ionising Radiation Protection).

The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile phones is 2 W/kg, averaged over 10 grams of tissue and includes a safety margin designed to assure the safety of all persons, regardless of age and health. Tests for SAR are conducted using standard operating positions with the phone transmitting at its highest level of output. SAR values may vary depending on national reporting requirements and the network frequency. In all tested frequency bands. The highest SAR values under the ICNIRP guidelines for this mobile device model are:

- Head SAR: 0.811 W/kg
- Body SAR: 0.154 W/kg

During normal use, SAR-values for this device are usually well below the values stated above. This is because, for normal usage, the power output of the device is normally automatically decreased when full power is not needed for the call. The lower the power output of the device, the lower its SAR value.

However, if tests RF exposure guidelines when used against the head or when positioned at least 0.5 cm away from the body, the values for SAR can be higher than those stated above, as the device is not radiating to its maximum output and the phone is in use.

Correct disposal of batteries in this product
Applicable in countries with separate collection systems.

The marking on the product, packaging or accompanying material indicates that the product is covered by European Directive 2002/96/EC on waste electrical and electronic equipment (WEEE). For more information about recycling of mobile phones, go to www.doro.com/doroware.

Declaration of Conformity
Hemb, Doro hereby declare that the radio equipment type DFC-0150 (Doro 2414) is in compliance with the essential requirements of the 2014/53/EU and 2015/869/EU. The full text of the EU declaration of conformity is available at the following website: www.doro.com/dcl

DFC-0150 Doro 2414 (2041,2051,2061) QSG English
QS_GSR_Doro 2414 en_A3A7_v20042414,2051,2061 www.doro.com

The World Health Organization (WHO) has stated that current scientific information does not indicate the need for any special precautions when using mobile devices. If you are interested in reducing your exposure, you recommend you use use a hands-free accessory to keep the device away from your head and body.

Correct disposal of batteries in this product
Applicable in countries with separate collection systems.

The marking on the product, packaging or accompanying material indicates that the product is covered by European Directive 2006/66/EC on batteries and accumulators and waste batteries and accumulators. For more information about recycling of mobile phones, go to www.doro.com/doroware.
