Insert the SIM card:

1. Carefully remove the battery cover. 
2. Insert the SIM card into the SIM card slot.
3. Insert the micro SD or UDIM card provided by the mobile service provider.

You can insert a second micro SIM or UDIM card on your device if you have two number or service providers on a single device. Data transfer speeds may be slower, in some cases, if two SIM cards are inserted in the device when only one SIM card can be used.

Insert the battery:

1. Inserting the battery:
2. Slide the battery into the battery compartment with contacts facing downwards to the left. 
3. Replace the battery cover.

1.2. Charge

While it’s possible that your phone will always come with enough power to be powered on right out of the box, we recommend giving it a full charge before first use.

1.3. Save energy

When the battery is fully charged, disconnect the charger from the device and unplug the charger from the wall socket. To save the power screen goes off after a while. Press any button to wake up the screen. Battery charge over time, which means that call time and standby time will normally decrease with regular use. During extended operation, the device may feel warm. In most cases, this is normal. To avoid getting too warm, the device may switch off during charging.

1.4. Turn the phone on and off

1. Press and hold (red) to turn on or off.
2. If the SIM card is valid but protected with a PIN.

Note: If PIN and PUK codes were not provided with your SIM card, you can contact your service provider for help. Please also note that if you use more than one SIM card, the PIN and PUK codes might differ between SIM and UDIM cards.

Attempts: It shows the number of PIN attempts left. When no PIN attempts remain, PIN blocked appears. The SIM card must now be unlocked with the PUK code (Personal Identification Number). Enter SIM PIN appears. Enter the PIN code and press the center key OK. Delete any registered number using 

Note: If PIN and PUK codes were not provided with your SIM card, you can contact your service provider for help. Please also note that if you use more than one SIM card, the PIN and PUK codes might differ between SIM and UDIM cards.

2. Make a call

1. Enter the phone number.
2. Press (red) to end the call.
3. Note: There is no dial tone. As long as the phone is turned on, it is ready for a call.

2. Make a call from the contacts list

1. Press Contacts.
2. Use the left/right keys to scroll through the contacts, or press Q to search the phonebook.
3. Select a contact and press OK.
4. Press (green) (dial) to dial the selected contact.
5. Receive a call

1. Press (green) to answer.

Silence an incoming call

1. When a call comes in, press Volume keys to silence the ring tone.

3.4. Call log

Received, missed, and dialed calls are saved in a call log. 

Retrieve and dialing:

1. Press (green).
2. Scroll through the call log.
   • (Incoming call)
   • (Outgoing call)
   • (Missed call)
3. Press (green) (dial) to dial the highlighted number.
4. CONTACTS

4.1. Create a contact

1. Press Contacts.
2. Create new contact.
3. Enter contact information.
4. When done, press and select Save. 

Tip: Depending on the selected storage location, the types of information you can save may vary. Press to see more options for the contact.

4.2. Create ICE entry (In Case of Emergency)

First responders can access additional information such as medical information from the victim’s phone in case of emergency. In the event of a trauma, it is crucial to have this information as early as possible to increase the chances of survival. All fields are optional, but more information provided improves the outcome.

1. Press Contacts. 
2. Fill in as much information as possible.
3. Add ICE contacts from the list of contacts.
4. Press to save.

5. SOS/112 CALLS

As long as the phone is switched on, it is always possible to place a call without entering the correct emergency number for your present location followed by . Some networks accept calls to emergency numbers without the SIM card. Contact your service provider for more information.

Note: Sometimes an emergency call cannot be placed due to the network or interferences.

6. ASSISTANCE BUTTON (m)

The Assistance button on the back of the phone allows easy access to your predefined help numbers should you need help. Make sure that the assistance function is activated beforehand. See the full manual on how to activate, how to enter recipients in the numbers list, and how to edit the text message.

7. CAMERA

1. To get sharp pictures, use the lens clean with a dry cloth.
2. Press the shortcut button or press .

8. MESSAGES

8.1. Create a message

Create, edit and read messages. A text message will be converted to a picture message automatically when multimedia files (music, video, etc.) are attached.

1. Press Messages 
2. New message.
3. Enter phone number or press OK to send.
4. Scroll down and type your message.
5. Press for further options.
6. Press to send.

Note: If you choose to send multiple contacts, you will be charged for each one.

9. WI-FI CONNECTION

You need an Internet connection to use the Internet feature and to send and receive your data traffic. It is recommended to use Wi-Fi connections when available, instead of using the more costly Mobile Data Connection. Contact your service provider for detailed subscription costs before activating.

You may already have Wi-Fi in your home and it’s often available at workplaces. Take advantage of free networks in libraries, coffee shops, hotels, train stations, and airports. Connecting to the Internet with Wi-Fi doesn’t incur additional traffic charges, unless you have to pay to get on the wireless network.

1. Press Settings 
2. Network & Internet 
3. Wi-Fi.
4. Select Wi-Fi.
5. Ask your Wi-Fi network to connect. 
6. Enter a password, enter the password and select Connect. 

Tip: is shown in the status bar when connected.

Note: Keep in mind that your phone remembers Wi-Fi networks to connect to. If you turn on Wi-Fi, the phone will automatically try to connect to any networks you have connected to within reach. Some open networks require you to log in to a webpage before gaining access to the network.

10. BROWSER

Use your web browser to access the Internet.

1. Press Browser.
2. Fill in the address of the available sites or navigate to Search or Type URL.

11. E-MAIL

Email accounts, like Gmail and Yahoo may require that you modify some of the account settings before you are able to access your new messages with the Doro device. To avoid problem signing in from your phone, you may need to log into your Google Mail account from a computer first.

1. Press E-mail.

11.1. Gmail & Yahoo Mail:

1. To log in with your e-mail address, you need to open the web browser to log in to your Gmail/Yahoo account.
2. Click your name (top right corner) 
3. My Account 
4. Security settings 
5. Allow less secure apps & sites

Account security 

Allow less secure apps & Set the account to Use app

3. Try to log in with your phone again.

12. CUSTOM SETTINGS

12.1. Silence the ring tone

Press the silence button to make your device silent. During an incoming call, press Volume keys to silence the ring tone.

12.2. Configure the audio setup

Press Settings 
1. Sound & Audio setup.
18. Bluetooth®
Bluetooth technology for hands free use. Connects you to more than 100 other Bluetooth compatible devices such as headsets.
1. Press 3 setting(s) Connect devices Bluetooth.
2. Select Pair new device OK.
3. Select an available device that must be in pairing mode, then Connect. When connecting to another Bluetooth device you may need to enter a password or confirm a Bluetooth security code.

19. Alarm
Set alarms for timed activities.

20. MyDORO
Create a MyDORO account to get the most out of your phone. Administer the phone using any web browser, www.mydoro.com.

21. WhatsApp
Whatsapp is a cross-platform messaging and Voice over IP (VoIP) service. The application allows you to send and receive text messages, voice calls, video calls, images and other media, documents, and user location. The service requires you to provide your mobile number. For more information, see www.whatsapp.com.

22. Facebook
Use Facebook to check your social network. For more information, see www.facebook.com.

23. Organiser
On the home screen, press 3 Organiser.

Calculator: Perform basic math operations.

24. Media
On the home screen, press 5 Media.

View photos taken with the camera and other saved images or downloaded images.

Music:
Use the music player to listen to music or other audio files. The music player is preloaded with the new Ringtones. To activate, please refer to the provisions of the Copyright Laws of the United States and other jurisdictions with regard to the use of copyrighted materials. Doro reserves the right to revise this document or withdraw it at any time without notice.

FM Radio:
Tune to FM radio which has a frequency range from 87.5 to 108.0 MHz. You need to connect a compatible headset that works as antenna.

Correct disposal of batteries in this product
(Disposable in countries with separate collection systems)

This marking on the product, accessories or manual indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other municipal waste. To prevent possible harm to the environment or human health from uncontrolled waste disposal, Doro encourages householders to recycle waste and landfill properly. Under European Union directive 2002/96/EC, householders in the European Union are obliged to return these items at end of life. The symbol shows a bin crossed out. Householders should contact either the retailer where they purchased the product, or their local government website, for details of where and how they can take these items for environmental safe disposal.

Correct disposal of this product
(Disposable in countries with separate collection systems)

This device meets MPR II exposure guidelines when used against the ear with a headset or in a cradle, not more than 0.5 cm away from the body. When a carry case, belt clip or other form of device holder is used, it should not contain metal and should provide at least the above stated separation distance from the body.

When a carry case, belt clip or other form of device holder is used, it should not contain metal and should provide at least the above stated separation distance from the body.
