Safety information

Phone care

Do not attempt to open the phone casing. There are no user serviceable parts inside and you might damage sensitive electronic circuits and components. Unauthorized disassembly will void the warranty.

Do not leave your phone exposed to strong sunlight or excessive heat for a prolonged period. This may damage it.

Do not handle your phone with wet hands or expose it to moisture or liquids of any kind. Continuous changes from a cold to a warm environment may lead to condensation inside the phone, resulting in corrosion and possible damage.

If you pack your phone in your suitcase during travel, beware of damage. Cramming a suitcase may crack the LCD display. Remember to switch off your wireless connections during air travel.

As with all other radio devices, touching the built-in antenna area during telephone conversation may impair the quality and lead to shorter standby time due to increased power consumption.

The battery

Your phone is equipped with a high performance Li-Ion battery. Observe the maintenance guidelines for a longer battery life.

- Avoid charging in extremely high or low temperature. The battery has its optimum performance in an ambient temperature of +5 °C to +50 °C.
- Do not store the battery near a fire or heat source.
- Use only the battery approved by the manufacturer.
• Never replace the battery with a non-approved battery.
• Never soak the battery in water or any other liquid.
• Never try to open the battery as it contains substances that might be harmful if swallowed or allowed to come into contact with unprotected skin.
• Never short-circuit the battery, as it may overheat and cause a fire. Keep it away from jewellery and other metal objects.
• Never dispose of the battery in fire. It could explode and release harmful substances into the environment.
• Never dispose of the battery with your regular household waste. Take it to a hazardous material collection point.
• Do not touch the battery terminals.

The charger

• Avoid using the phone while charging.
• Use only the charger supplied with your phone.
• Never pull the charger cord to release it from the mains – pull the charger itself.

WARNING! There is a risk of explosion if the battery is replaced by an incorrect type.
Memory card

• Do not remove or insert a memory card or turn off the handset while data on the card is being read.
• Do not touch the metal terminals with your hands or metal objects.
• Do not bend the memory card or subject it to violent impacts. Keep it away from water and high temperatures.
• Keep all memory cards out of the reach of small children.
• Do not short circuit the contact points or expose it to liquids or moisture. When not in use, keep it in an antistatic container.
• Do not use force when inserting or handling the card, and do not expose it to excessive heat or strong magnetic fields.

Cleaning and storing

• Your phone should always be handled with care and protected from dirt, dust and dampness. To avoid scratches, never place your phone face down.
• If cleaning is necessary, switch the phone off and wipe carefully with a soft, slightly damp (not wet) cloth. Use a cotton swab to clean the camera lens. Allow the phone to dry completely before switching it on. Never use solvents for cleaning.
• If you are not going to use your phone for some time, fully charge the battery and store the phone in a dry place away from direct sunlight. Your phone should be switched off during storage. Recharge every 6 to 12 months.
• Never expose your phone to heat or strong sunlight.
• Never expose your phone to moisture or liquids of any kind.
• Do not paint your phone or otherwise block the keypad, microphone or earpiece function.
• Do not place stickers that may block the keypad or disturb other functions such as microphone, earpiece, or camera lens.

**WARNING!** Failure to follow these instructions may lead to serious personal injury and possible property damage.

### Driving safely

Never use handheld phones while driving. It is an offence, that while driving, to hold a phone or cradle it in your neck at any point, during the setup, making or taking of a phone call, text message or any other data related mobile communication. Use of fully installed car kits are still permitted, as are the use of alternate handsfree accessories.

In the interest of safety, we would recommend the use of a cradle while using any form of handsfree accessory.

While driving, we recommend that you use voicemail wherever possible, and that you listen to your messages when you are not in the car. If you must make a handsfree call when driving, keep it brief.

Do not place objects, including both installed or portable wireless equipment, in the area over the airbag or in the airbag deployment area. An airbag inflates with great force. If the airbag inflates, serious injury could result.

### Electronic devices

Most modern electronic equipment is shielded from RF energy.
However, certain electronic equipment may not be shielded against the RF signals from your device.

**Pacemakers**

The Health Industry Manufacturers' Association recommends that a minimum separation of six (6”) inches be maintained between a phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.

**If you have a pacemaker:**

- Always keep your phone more than six inches (15cm) from your pacemaker when turned on.
- Do not carry your phone in your breast pocket.
- Use the ear opposite the pacemaker to minimize the potential for interference
- If you have any reason to suspect that interference is taking place, turn your phone off immediately.

**Hearing aids**

Some digital phones may interfere with some hearing aids. In the event of such interference, call ASUS Customer Service to discuss alternatives.
Other medical devices

If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Turn your phone off in healthcare facilities when any regulations posted in these areas instruct you to do so.

Hospitals or healthcare facilities may be using equipment that could be sensitive to external RF energy.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment added to your vehicle.

Posted facilities

Turn your phone off where posted notices so require.

Magnetic media

Magnetic fields generated by mobile devices may damage data on magnetic storage media, such as credit cards, computer discs or tapes. Do not place your phone next to such media.

You should never expose your phone to strong magnetic fields as this may cause temporary malfunction.
Other Safety Guidelines

Aircraft
Regulations prohibit using your phone while in the air. Switch off your phone before boarding an aircraft or turn off the wireless connections.

Blasting areas
To avoid interfering with blasting operations, turn your phone off when in a ‘blasting area’ or in areas posted: “Turn off two-way radio.” Obey all signs and instructions.

Potentially explosive environments
Turn your phone off when in any area with a potentially explosive environment and obey all signs and instructions.
Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.
Areas with a potentially explosive environment are often, but not always, clearly marked. They include fuelling areas such as gas stations, below decks on boats, fuel or chemical transfer or storage facilities, vehicles using liquified petroleum gas (such as propane or butane), areas where the air contains chemicals or articles, such as grain, dust, or metal powders, and any other area where you would normally be advised to turn off your vehicle’s engine.

Choking
Keep your phone away from children as the SIM card and other small parts present a choking hazard.
Cautions

Your device is a high quality piece of equipment. Before operating, read all instructions and cautionary markings on (1) AC Adapter (2) Battery and (3) Product Using Battery.

- Do not use this device in an extreme environment where high temperature or high humidity exists. The device has its optimum performance in an ambient temperature of 0~40°C.
- Do not abuse the device. Avoid striking, shaking or giving it a shock. When not using the unit, lay it down to avoid possible damage due to instability.
- Do not expose this device to rain or other liquid.
- Do not use unauthorized accessories.
- Do not disassemble the phone or its accessories. If service or repair is required, return the unit to an authorized service center. If the unit is disassembled, a risk of electric shock or fire may result.
- Do not short-circuit the battery terminals with metal items.
Mobile phone etiquette

As mobile phone usage rises, there is now a need to create a set of manners in using a mobile phone in professional and social settings. This section provides you with basic tips with regards to respecting others while using your mobile phone.

Mobile manners

• Avoid talking on your mobile phone when in enclosed public places such as theaters, libraries, museums, places of worship, elevators, or auditoriums.
• Avoid using your mobile phone while doing other tasks such as driving, shopping, banking, waiting in line, or conducting other personal business.
• Avoid using annoying ringtones.
• Avoid taking a call on your mobile phone during business meetings, appointments, or interviews.
• Look for a private place to take a call, and keep your phone conversations brief.
• Talk on your mobile phone quietly, and do not shout.
• Put your mobile phone on silent or vibrator mode to avoid disturbing others.
• Ask permission before taking a picture or a video clip of another person.
• Avoid using capital letters when sending SMS messages as this can be interpreted as shouting.
• When making a call, introduce yourself to the person at the other end of the line, and do not hang up without saying goodbye.

Getting your device ready

Installing the SIM card and battery

Before you can make a phone call using your device, you need to install a Subscriber Identity Module (SIM) card. The SIM card contains your phone number, subscriber details, phonebook, and additional phone memory.

Your device comes with a rechargeable Lithium-Ion (Li-Ion) battery.

New batteries come partially discharged and should be fully charged for about four hours before using them.

---

**CAUTION:** Use only an ASUS qualified battery (SBP-17).

---

To install a SIM card and battery:

1. Press down and push downward to remove the battery compartment cover.
2. Insert the SIM card with its gold contacts facing down and the notched corner oriented to the upper right corner of the slot as shown.

3. Install the battery into the compartment with its copper contacts properly aligned to the copper conductor on the device.

4. Replace the battery compartment cover.
Charging the battery

The bundled battery is shipped partially charged. Charge the battery up to four hours before using for the first time.

To charge battery:

1. Connect the AC adapter plug into the mini-USB connector at the bottom of the device.
2. Connect the AC power plug into a grounded wall socket or power strip.

NOTES:

• The notification LED turns red and the charging battery icon appears on the status bar indicating that the battery is charging.

• If your battery gets totally discharged, you need to recharge it for at least twenty minutes before you can turn it back on.
Installing and removing a microSD card

Your device is equipped with a microSD card slot. A microSD card provides you with extended memory where you can store your files and other data.

**To install a microSD card:**

1. Locate the microSD card slot at the right side of the device.

2. With the golden fingers facing down, gently insert the microSD card into the slot until it snaps properly.

3. To remove, push the card until it ejects out, then remove the card safely.

**NOTES:**

- The microSD card is an optional accessory.
- Your device supports Secure Digital High Capacity (SDHC) storage card.
Starting up

Powering your device

Ensure that your device is fully-charged before using the device for the first time.

To turn on power:

1. Press and hold \( \text{\textbullet} \).

2. Follow the onscreen instructions to align the screen and set the local time zone.

Using the stylus

The stylus is a pen-like device found behind the lower right corner of your device.

- Use the stylus to write, draw, select, or drag an item on the screen.
- Single-tap an item to select or open it.
- Tap and hold an item to see a menu.
Calibrating your device

Calibrating your device ensures that the item you tap on the screen is activated. This involves tapping the center of targets that appear in various locations on the screen.

To calibrate your screen:

1. Tap \(\text{Settings} \rightarrow \text{System} \) tab, then tap \(\text{Screen}\) icon.
2. On the \(\text{General}\) tab, tap \(\text{Align Screen}\), then follow the calibration screen instructions.

Locking your device

You can lock the keys, buttons, and touch screen of your device to avoid inadvertently dialing numbers or launching any application.

- Locate the Hold button and slide downward to lock.
- Slide upward to unlock.
The Home screen

The Home screen on your device displays two parts: the ASUS Today and the Today screens.
ASUS Today

ASUS Today on your device’s home screen enables you to view or change your time/date settings, notifies you of your missed calls and SMS/MMS/e-mail messages, displays your day’s appointments, updates you on the current weather and latest news, and enables you to add and play media files on your device.

NOTE:
• You can disable the ASUS Today from your Home screen following the instructions below.
• Slide the stylus leftward or rightward on the icon bar to view the hidden icons.

To disable the ASUS Today:
1. Tap > Settings > Personal tab > Today > Items tab.
2. Deselect the check box of Asus Today, then tap ok.
Icons

Refer to the table below for the ASUS Today icons.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alert icon</td>
<td>Alerts you on your missed calls, and new SMS/MMS/e-mail messages.</td>
</tr>
<tr>
<td>Calendar icon</td>
<td>Displays your appointment for the day.</td>
</tr>
<tr>
<td>Date/time icon</td>
<td>Displays your date/time settings.</td>
</tr>
<tr>
<td>Media icon</td>
<td>Enables you to add and play media files.</td>
</tr>
<tr>
<td>News icon</td>
<td>Displays the latest news.</td>
</tr>
<tr>
<td>Weather icon</td>
<td>Displays the current weather.</td>
</tr>
</tbody>
</table>
Viewing alerts

ASUS Today notifies you of your missed calls, and new SMS/MMS/e-mail messages.

To view alerts:

Tap ☰, then tap any of the icons for the information that you want to view.

- Tap ☰ to view your missed calls.
- Tap ☰ to view/read your new SMS/MMS messages.
- Tap ☰ to view/read your new e-mail messages.

NOTE: To read your e-mail messages, ensure that you are connected to the Internet via Wi-Fi or GPRS connection. Refer to the Wi-Fi or GPRS sections in this user guide for more details.
Viewing your day’s appointment

To view your day’s appointment:

Tap ☄️ to view your day’s appointment in the display screen. If you want to change the information, just click the display screen, then make the necessary changes on the Calendar screen.

NOTE: You may also enter your calendar of activities or appointments from the ASUS Today screen. Tap ☄️, then tap the display screen, and enter the information for your appointments. You will be notified of your appointment on the day itself.

Obtaining the current weather data

ASUS Today enables you to obtain and view the latest weather data of any place around the world.

NOTES:
• Ensure that you are connected to the Internet via Wi-Fi or GPRS connection. Refer to the Wi-Fi or GPRS sections in this user guide for more details.

• Before using this feature, ensure that you have configured the weather and network settings. For more details on configuring the network settings, refer to the section Setting the network in Chapter 8 of this user guide.
To configure the weather settings:

1. Tap > Settings > ASUS Today.
2. Select Enable Weather Update.
3. Select the Country and City that you want to obtain the latest weather data for.
4. Tap ok when done.

To obtain the current weather data:

From the ASUS Today screen, tap ☂️, then tap the display screen to retrieve the latest weather updates from the server.
Downloading the latest news updates

To download the latest news updates:

NOTE: Before downloading news updates, ensure that you are connected to the Internet via Wi-Fi or GPRS connection. Refer to the Wi-Fi or GPRS sections in this user guide for more details.

1. Tap 📣, then tap the display screen. The Newstation screen is displayed.
2. From the Categories list, select the channel that you want to obtain the latest news updates from.

NOTE: Ensure that you are connected to the Internet to get the latest news updates.

3. Tap Menu > Update. Your news downloads are stored as RSS news feeds on your device and displayed on the ASUS Today screen.

NOTE: You may read these stored RSS news feeds from the ASUS Today screen even without Internet connection.
Playing media files

ASUS Today gives you quick access to the EziMusic, enabling you to play digital audio and video files stored on your device or in a storage card. You can listen to media files through the speaker of your device or through a headset.

NOTE: Your device may run low on memory and slow down if you store files on your device. We recommend that you store audio and video files in a storage card.

To play media files:

Tap 🎵, then tap the display screen. The EziMusic is launched. Refer to the section EziMusic in this user guide for more details on how to play media files.
The Today screen

The Today screen displays information useful to you. You can configure the Today screen to have all the important information that you need.

**NOTE:** To know more about customizing the Today screen, refer to the section *Customizing the Today screen* in Chapter 7 of this user guide.

![Diagram of the Today screen]

- **Start menu:** Tap to open
- **Status bar:**
  - Displays the signal status (The icon shows no SIM card and no signal when no SIM card is installed.)
  - Indicates the battery status
  - Tap to adjust volume
  - Tap to launch MultiHome
- **ASUS Today screen:** Refer to section ASUS Today in this user guide.
- **Phone button:** Tap to launch the phone function
- **Contacts button:** Tap to launch Contacts list
- **Tap to view connectivity status:**
- **Tap to key in content you want to search in Google:**

Screen orientation

You can set the screen to three different orientations manually or enable the Auto Rotation function to allow the screen to rotate automatically.

To set the screen orientation manually, tap ☁ > Settings > System tab > Screen Orientation, then select Manual and select the orientation you want from the list.

- Portrait
- Landscape (right-handed)
- Landscape (left-handed)

Set to Portrait mode to get a better view or better operation of certain applications on your device. Set to Landscape when viewing pictures, video or viewing longer text files.

To enable Auto rotation function, tap ☁ > Settings > System tab > Screen Orientation, then select Auto rotation.

Start menu

The Start menu contains various programs and applications that you commonly use. Tap ☁ or slightly press the Start key ⏎ to display the Start menu items.

You can also customize the items that appear in the Start menu.

**To customize the Start menu:**

1. Tap ☁ > Settings > Personal tab > Menus.
2. Select the check boxes of the items you want to appear in the Start menu. You can select up to seven items.
Using MultiHome

MultiHome provides three themes for the ASUS Today screen: Original, Business, and Life. By default, it shows the Original theme. You can change the theme according to your preference.

To change the theme:

1. Tap from the ASUS Today screen to launch MultiHome.
2. To navigate through the Original, Business, and Life themes, push the trackball leftward or rightward, or draw a horizontal line on the screen with the stylus.
3. Tap the screen to apply your selected theme.
Original theme

In Original theme, the ASUS Today provides you with easy access to Clock, Message Center, Calendar, Weather, Newstation, and EziMusic.

Business theme

The Business theme provides you with a formal theme on ASUS Today. The time displays both the local and the visiting city’s time; and also the weather information displays that of both the local and the visiting city, which are very helpful when you are on a business trip. You can also check your messages, Calendar, and RSS News conveniently.

Tap the screen to apply the theme to the ASUS Today screen.

Original theme

Business theme
Life theme

The Life theme features a relaxed and casual mode. Besides the Clock, Message Center, and Weather information, you can easily view your favorite pictures and quickly access EziMusic.

To view your favorite pictures:
1. Tap 📷.
2. Tap the displayed picture to show wallpaper only.
3. Slide your finger leftward/rightward on the screen to view the previous/next wallpaper.

To set the time displayed on ASUS Today:

1. In the Business mode, tap the local time area to open Clock settings.
2. From the Time tab, set the settings under the Home and Visiting items.
3. Tap ok when done.
AnyTime Launcher

AnyTime Launcher is an alternative program that allows you to conveniently and quickly launch applications, perform tasks, and change device settings.

To run the AnyTime Launcher:

- Lightly press the AnyTime Launcher key.

Tap to open an application.
Tap to add an application to the Favorite Programs list.
Tap to remove an application from the Favorite Programs list.
Use the trackball to select.
Tap to launch the selected application.
Tap to view all applications on the device.
Icons

Use the trackball to scroll through the following icons to open the list of applications or contacts under them.

<table>

</tbody>
</table>
Searching for information

The Search tool enables you to search for files and other items stored in your device or in the external microSD card. You can search by file name or by words located in various applications including the Calendar, Contacts, Excel Mobile, Word Mobile, Help, Messages, Notes, and Tasks. You can also filter your search to files larger than 64 KB.

To search for a file or an item:

1. Tap > Programs > Search.
2. In Search for field, enter the file name, word, or other information you want to search.
3. In Type field, select the data type to help you filter your search.
4. Tap Search. Found items are listed in Results.
5. In the Results list, tap the item with the information you need.

Getting Help

You can easily find Help for using any program on the device.

To get help for a program:

From the Today screen or program, tap > Help. A page opens with links to topics that explain how to use the program.
Chapter 2

Entering data

• Using the Input Panel
• Writing and drawing on the screen
• Recording voice
Using the Input Panel

When you start an application or select a field that requires text, symbols, or numbers, the Input Panel icon appears on the menu bar. The Input Panel allows you to select various input methods including: Block Recognizer, Keyboard, Letter Recognizer, and Transcriber.

Using the onscreen keyboard

With the onscreen keyboard, you can enter texts, symbols, numbers, or other special characters.

To input using the onscreen keyboard:
1. In an application that accepts user input, tap the Input Panel arrow, then tap Keyboard.
2. Tap the keys on the onscreen keyboard to enter.

To enlarge the onscreen keyboard:
1. Tap the Input Panel arrow, then tap Options....
2. Select Keyboard from the Input Method list.
3. Tap Large Keys.
**Using the Block Recognizer**

The Block Recognizer allows you to use a single stroke to write letters, numbers, symbols, or punctuations, which are converted into typed text.

**To use the Block Recognizer:**

1. In an application that accepts user input, tap the Input Panel arrow, then tap Block Recognizer.
2. Write letters, numbers, symbols, or punctuations in the designated writing area.
   - Write letters on the abc (left) area of the box.
   - Write numbers on the 123 (right) area of the box.
   - Tap the space button to key in a space.
   - Tap the special symbols button to key in symbols, punctuations and other special characters.
   - Tap Help button for help on how to write characters.

**Using the Letter Recognizer**

With the Letter Recognizer you can write individual letters, numbers, or special characters, which are converted into typed text.

**To use the Letter Recognizer:**

1. In an application that accepts user input, tap the Input Panel arrow, then tap Letter Recognizer.
2. Write letters, numbers, symbols, or punctuations in the designated writing area.
   - Write capital letters on the ABC (left) area of the box.
   - Write lower case letters on the abc (middle) area of the box.
• Write numbers on the 123 (right) area of the box.
• Tap the space button to key in a space.
• Tap the special symbols button to key in symbols, punctuations and other special characters.
• Tap Help button for help on how to write characters.

Using the Transcriber

Transcriber is a handwriting recognition program that allows you to write in cursive, print, or mixed styles. It recognizes not only written text but also numbers and symbols. Make sure to write legibly. See Help for more information on the Transcriber.

To use the Transcriber:

1. Start an application that accepts user input, such as Notes or Word Mobile.
2. Tap the Input Panel arrow, then tap Transcriber.
3. The Transcriber Intro screen appears. Tap ok to close the introduction, or tap Help to find more instructions.

To write using Transcriber:

1. Tap the screen to position the cursor where you want the text to appear.
2. Use the stylus to write on the screen. The handwriting will be converted to text after you lift the stylus from the screen.

To edit text:

1. Tap the text you want to edit to position the cursor.
2. You can now rewrite the text or use the Transcriber gestures to edit your selected text. See Help for more details about the Transcriber gestures.
Writing and drawing on the screen

You can write or draw directly on the screen and save notes in your own handwriting. If you prefer to use your own handwriting or use drawings in your notes, set the default input mode to **Writing**. If you prefer text, set the default mode to **Typing**.

To set the default input mode for Notes:

1. Tap 📡 > Programs > Notes.
2. From the Notes list, tap Menu > Options….
3. In the Default mode: box, tap the down arrow and select any of the following:
   - **Writing** - if you want to draw or enter handwritten text in a note.
   - **Typing** - if you want to create a typed note.
4. Set the other options according to your preference.
5. Tap ✅ when finished.

To write/draw in a note:

1. Tap 📡 > Programs > Notes.
2. From the Notes list, tap New.
   - If you set the Default mode to **Typing**, a blank page appears for typed text.
   - If you set the Default mode to **Writing**, a page with horizontal lines appears for handwritten text.
   - You can also tap Menu and then select/deselect Draw option to switch between typing and writing mode.
3. Write/draw on the screen.
4. When finished, tap ✅ to save the note and return to the Notes list.
Recording voice

At any time, whether your phone is on stand-by or active mode, you can record sound, voice, or add a recording to a note while using your device.

To create a voice recording:
1. Tap Programs > Notes.
2. From the Notes list, tap New.
3. If you do not see the recording toolbar, tap Menu > View Recording Toolbar.
4. Tap to begin recording.
5. Place the receiver near your mouth or source of sound.
6. Tap when finished recording. A voice record icon appears on the note. You can tap to play the voice record.
7. Tap ok.

To add a recording to a saved note:
1. Tap Programs > Notes.
2. From the Notes list, tap a saved note to open it.
3. If you do not see the recording toolbar, tap Menu > View Recording Toolbar.
4. Tap the record button to begin recording.
5. Place the receiver near your mouth or source of sound.
6. Tap the stop button when recording is finished. A voice record icon appears on the note. You can tap to play the voice record.
7. Tap ok.
Chapter 3

Device Synchronization

- Synchronizing your device
- Microsoft® ActiveSync
Synchronizing your device

Your device enables you to synchronize data in your device with the data on your computer. You can synchronize contents and transfer data between your device and your computer using Microsoft® ActiveSync on Windows XP™ platform, or Microsoft® Windows Mobile Device Center on Windows Vista™ platform.

NOTE: For synchronizing on Windows Vista™ platform, refer to the Microsoft® Windows Mobile Device Center’s website at http://www.microsoft.com/windowsmobile/devicecenter.msp

Microsoft® ActiveSync

ActiveSync allows you to synchronize data in your device with data in your computer. ActiveSync can also synchronize over a wireless or mobile network with Microsoft Exchange Server, provided that your mobile phone service or company is running Microsoft Exchange Server with Exchange ActiveSync. When synchronized directly with Exchange Server, you can stay up to date even when your computer is turned off.

During synchronization, ActiveSync compares the data in your device with the data in your computer or Exchange Server, and updates all data with recent changes.

You can select and synchronize data in the following locations using ActiveSync:

- Contacts
- Calendar
- Email
- Tasks
You can also exchange data between your computer and device without synchronizing.
ActiveSync is already installed in your device, but before you can synchronize data with your computer, you must first install ActiveSync in your computer. You can download the latest ActiveSync program from www.microsoft.com.

After you have installed ActiveSync, set up a sync relationship between your device and your computer. ActiveSync recognizes your device and automatically transfers the synchronization settings you have in your device.

If you wish to synchronize your device with Exchange Server through your company or service provider, obtain the name of the Exchange Server, user name, password, and domain name from your network administrator before starting the Sync Setup Wizard.

**To install and configure ActiveSync in your computer:**

**NOTE:** Ensure that you install Microsoft ActiveSync 4.5 or later versions.

1. Insert the Getting Started CD that came with your device package.
2. Follow the onscreen instructions.
3. After the setup is complete, the Sync Setup Wizard automatically starts when you connect your device to your computer. Follow the onscreen instructions to complete the wizard.
4. From the Sync Setup Wizard, you can:
   - Configure an Exchange Server connection to synchronize directly with an Exchange Server. Acquire from your network administrator the required parameters for input.
   - Create a synchronization relationship between your computer and your device.

5. Select the information type that you want to synchronize.

6. After you finish the wizard, ActiveSync automatically synchronizes your device. You can disconnect the device after the synchronization is complete.

NOTES:
   - When connected, your device is automatically synchronized with your computer. ActiveSync synchronizes everytime you make a change on either the device or computer.
   - You cannot use WLAN to synchronize database.
   - Refer to your Windows® Mobile Help, for more information about ActiveSync synchronization.
   - Wireless connection may require separately purchased equipment (such as Wireless router or Access Point).

Synchronizing via mini-USB
You can connect to your device using the bundled mini-USB cable to synchronize to your computer.

To synchronize your device via mini-USB:

1. After installing ActiveSync to your computer, connect the mini-USB plug to the mini-USB connector at the bottom of the device.
2. Connect the other end of the USB cable to your computer. Upon connection, ActiveSync automatically synchronizes your device.
Synchronizing via Bluetooth®

**NOTE:** Ensure that Bluetooth is turned on in both your device and your computer.

To synchronize your device via Bluetooth:

1. Configure the settings of ActiveSync and Bluetooth on your computer.

   **NOTE:** Refer to the Microsoft® ActiveSync Help on your computer for details.

2. Connect your device with your computer using Bluetooth.

   **NOTE:** Refer to the section Using Bluetooth® in this user guide for more details.

3. From the list of connected devices, tap the name of the computer you want to synchronize with.

4. Select ActiveSync, then tap Save.

5. Tap OK to exit the Bluetooth settings.

6. From your device, tap > Programs > ActiveSync > Menu > Connect via Bluetooth. The devices starts to connect to your computer.

7. When connected, tap Sync to synchronize data.

**NOTE:** Media files, such as music and video files, can be synchronized only via a USB cable.
Synchronizing with an Exchange Server

To synchronize your device with Exchange Server:

1. From the ActiveSync screen, tap **Menu > Add Server Source**...
2. Key in your e-mail address, then tap **Next**. If you prefer the device to detect the Exchange Server Settings automatically, select the check box.
3. In the **Server Address** field, key in the name of the server running Exchange Server then tap **Next**. If necessary, tap the check box **This server requires an encrypted (SSL) connection**.
4. Enter user name, password, and domain then tap **Next**.
5. Tap the check boxes to select the data items that you want to synchronize with Exchange Server. To change the available synchronization settings, select a data item then tap **Settings**. Tap **Finish** when done.
6. Start the sync process.

Setting the synchronization schedule

To set the synchronization with Exchange Server:

1. From the ActiveSync screen, tap **Menu > Schedule**.
2. Set the schedule according to your preference. Refer to the table for input details.

Chapter 4

Phone features

• Using the phone
• Making a call
• Receiving a call
• Options during a call
• ASUS CallFilter
Using the phone

Like a standard cellular phone, you can use your device to make and receive voice and video calls. You can also keep a history of calls made, missed, and received, send SMS or MMS messages, take notes while talking, call from Contacts, and copy data from an installed SIM card to your device.

Phone pad

The phone pad allows you to easily dial and access the Contacts, Call History, and Phone settings. To launch the phone pad, do any of the following:

• From the Today screen, tap Phone.
• Tap > Programs > Phone.
• Press .

Turning off the phone function

You may use other functions even when your device’s phone function is turned off.

To turn off the phone function:

1. Tap the signal icon or tap > Settings > Connections tab > Wireless Manager.
2. Tap the Phone icon.
Adjusting the volume

To adjust the phone or device volume:

1. Tap from the status bar.
2. From the volume menu, you can:
   - Move the slider to adjust device or phone volume.
   - Tap On, Vibrate, or Off to change the mode and ringer volume settings.

NOTE: You can also press the volume button at the left side of the device to adjust the volume.
Making a call
You can make a phone call using the phone pad. You can also make calls directly from the Contacts, Call History, Speed Dial, or Voice Commander.

Making a voice call

Calling using the phone pad

To make calls using the phone pad:

1. Tap Phone or press to launch the phone pad.
2. Tap the number or choose a contact or a recently dialed number from the list above the phone pad.
   If you tapped the wrong number, tap to erase the number to the left.
3. Tap or press to make the call.
4. When finished, press to end the call.
Phone pad features

- Tap to put a call on hold
- Tap to launch the Call History
- Tap to launch Menu
- Displays the current call status
- Tap to mute/unmute a call
- Tap to put a call on hold
- Tap to launch the Call History
- Tap to launch Menu
- Tap to switch between keypad and call status screen
- Tap to make a call
- Tap to show/hide the keypad
- Tap to open the Contacts list
- Tap to take notes
- Tap to turn the speaker on/off
- Contacts

Example screen:

1 (111) 111-1111

Dialing...
Calling from Contacts

To make a call from Contacts:

1. From the Today screen, tap Contacts.
2. You can do any of the following to make a call:
   • Tap the name of contact, then tap Call.
   • Tap the name of contact, then press .
   • You can also tap and hold the contact, and from the shortcut menu tap Call Work, Call Home, or Call Mobile.
   • Tap Enter a name... then enter the name or number you want to call from Contacts. Press to dial the highlighted item.
3. Press to end the call.

Calling from Call History

Your device enables you to check your call logs such as your missed, incoming, or outgoing calls.

To make a call from the Call History list:

1. Launch Call History. To do this, do any of the following:
   • Tap Phone > Menu > Call History.
   • After making a call, tap .
The Call History screen displays the following tabs:

-  
  (default): Displays all calls made, received, or missed.
-  
  : Displays all missed calls.
-  
  : Displays all the calls you made.
-  
  : Displays all the calls you received.

2. Scroll to the desired contact or phone number, then tap **Call** or press ✆. Tap **Menu** to do other tasks such as saving a caller’s contact information to your Contacts list, or send a text message to a caller.

3. Press ✆ to end the call.

**Calling using Smart dialer**

The Smart dialer feature in your device enables you to find a contact more quickly. Just key in the first letters of the contact you want to call. Your device smartly matches it with your Contacts list and displays the possible matches.

**To use Smart dialer:**

1. On the phone pad, key in the first letters of the contact name.
2. From the list displayed, tap the contact you want to call.
3. Press ✆.
4. To end the call, press ✆.
Calling using the Speed Dial

The Speed Dial function enables you to quickly and conveniently call frequently-called numbers. You may assign speed dial entries from 2-99.

To create a Speed Dial entry:

1. Ensure that the entry you want to create is already in the Contacts list.
2. Tap Contacts from the Today screen.
3. Tap the contact number that you want to add to speed dial list. Then tap Menu > Add to Speed Dial...
4. Edit the name and number and select a numeric key for this contact.
5. Tap ok when finished.

To call a Speed Dial number:

1. Tap Phone, then tap and hold the numeric key assigned to the contact you want to call.
2. To end the call, press off.

To delete a Speed Dial entry:

1. Tap Phone > Menu > Speed Dial.
2. Tap the contact that you want to delete from the speed dial list, then tap Delete.
3. Tap Yes from the pop-up message.
Using Voice Commander

To make a phone call using Voice Commander:

1. Tap 📱 > Programs > Voice Commander.
2. From the following screen, your device asks you to “Say command.”
3. Audibly say “Call” then the name to call from your Contact list.
4. Say “Yes” or “No” after the confirmation question.
   If you said “Yes”, the application proceeds and dials the number. Otherwise, it returns to the Voice Commander menu.
5. Say “Goodbye” or tap ✗ to exit Voice Commander.

NOTES:
• To use Voice Commander while using a headset, press the answer button* on the headset then follow given instructions. (* Answer button may not be available in some headset models.)
• Some languages may not support the Voice Commander function.

To personalize the voice commander:

1. Tap 📱 > Settings > Personal tab > Voice Commander Settings.
2. Set the Voice Commander according to your preference.
   Refer to the Help center on your device for details.
   To launch the Help center, tap 📱 > Help.
3. Tap ok when done.
**Making emergency calls**

Calls to emergency service number can be made under any circumstances, even if you have locked the SIM card.

**To place an emergency call:**

Enter the emergency number appropriate for your location, and press ☑️.

**Making international calls**

**To place an international call:**

1. Tap and hold ☎️ on the keypad to enter a (+) plus sign.
2. Enter the full phone number with the country code, area code, and phone number, and then press ☑️.

**Receiving a call**

When you receive a call, a message prompts and allows you to answer or reject the incoming call.

**To answer or reject an incoming call:**

- To answer a call, press ☑️.
- To reject an incoming call, press ☑️ ☐️.

---

**TIPS:**

- Press and hold ☑️ to switch receiver to speakerphone mode.
- When you get an incoming call, press the Volume key to put the phone on silent mode.

---

**To terminate a call:**

- Press ☑️ ☐️.
Options during a call

Listed in the table below are the possible menu options for when a call is in progress. Some of these options are available only when multiple calls are in progress or during a conference call.

<table>
<thead>
<tr>
<th>IN-CALL MENU OPTION</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hold</td>
<td>Places the active call on hold. You can also press during an active call to put it on hold.</td>
</tr>
<tr>
<td>Unhold</td>
<td>Activates the call that is on hold. You can also press to activate the call that is on hold.</td>
</tr>
<tr>
<td>Mute</td>
<td>Switches off the microphone for the active call (you can hear the caller but the caller cannot hear you).</td>
</tr>
<tr>
<td>Unmute</td>
<td>Turns the microphone for the active call back on.</td>
</tr>
<tr>
<td>Turn Speakerphone On/Off</td>
<td>Activates/deactivates the speakerphone.</td>
</tr>
<tr>
<td>Turn Hands-free On/Off</td>
<td>Turns on the hands-free function. You can also press and hold to turn on/off the hands-free function.</td>
</tr>
<tr>
<td>Conference</td>
<td>Joins together all existing calls if you have subscribed to this service.</td>
</tr>
<tr>
<td>Paste</td>
<td>Pastes the phone number you copied from your messages, notes, or contacts to the phone pad instead of keying in the number manually.</td>
</tr>
<tr>
<td>Save to Contacts</td>
<td>Saves the caller to the Contacts list.</td>
</tr>
<tr>
<td>Create Note</td>
<td>Allows you to create a note during an active call.</td>
</tr>
<tr>
<td>Call History</td>
<td>Opens the Call History list.</td>
</tr>
<tr>
<td>Speed Dial</td>
<td>Opens the Speed Dial list.</td>
</tr>
<tr>
<td>Options</td>
<td>Opens the Phone settings.</td>
</tr>
</tbody>
</table>
Managing multiple calls

To answer another call:
1. Tap 📞 to place the first call on hold and answer the second call.
2. To end the second call and return to the first call, press 📠.

To hold a call to make a second call:
Tap 📞 to place the first call on hold and call a second number. Press 📠 to end the second call and go back to the first call.

To switch between calls:
To switch between two calls, tap 🔄.

To set up a multiple call:
With multiple calls in progress, tap Menu > Conference.
ASUS CallFilter

The ASUS CallFilter is a utility that allows you to control all your incoming calls. Using this utility, you can manage a list of telephone numbers from your Contacts list, call log, message log, or any unlisted telephone number that you want to accept or reject.

To launch the ASUS CallFilter:
• Tap > Programs > Call Filter.

To enable the Reject List or Accept List:
1. Tap > Programs > Call Filter.
2. Tick Enable, and from the dropdown list, select Enable Reject List/Accept List.

NOTE: Ensure that you have added at least one contact item into the list before you enable the Accept List or Reject List.
Managing the Accept list

The Accept list allows you to select telephone numbers you only want to accept. Incoming calls that are not included in the Accept list are automatically rejected.

To add items in the Accept list:

1. Tap 📈 > Programs > Call Filter.
2. Select Accept List from the dropdown list.
3. Select your source of data. You can get data from your Contacts, Call log, Message sender number, or you can add anonymous number and key in new numbers.
4. From your source of data, select an item then tap 📲 to add a new Accept list item.
5. Click 🔄 to exit.

To remove items from the Accept list, select a contact from the Accept list then tap 📲.
Managing the Reject list

The Reject list allows you to select telephone numbers you want to reject. Incoming calls that are in the Reject list are automatically rejected.

To add items in the Reject list:

1. Tap Programs > Call Filter.
2. Select Reject List from the dropdown list.
3. Select your source of data. You can get data from your Contacts, Call log, Message sender number, or you can add anonymous number and key in new numbers.
4. From your source of data, select an item then tap to add a new Reject list item.
5. Click ok to exit.

To remove items from the Reject list, select a contact from the Reject list then tap .
Chapter 5

Messaging
  • E-mail messaging
  • Threaded SMS
  • MMS messaging
  • Windows® Live
E-mail messaging

Setting up an e-mail account

Before you can send and receive e-mail messages, you need to set up an e-mail account that you have with an Internet service provider (ISP) or an account that you access using a VPN server connection (typically a work account). You can send e-mail messages by synchronizing or by connecting directly to an e-mail server through your Internet service provider or a corporate network.

NOTE: Before you set up an e-mail address on your device, you must have an Internet or an e-mail account.

To set up an e-mail account:

1. Tap > Messaging > Setup E-mail.
2. Key in your E-mail address and Password, then tap Next.

   NOTE: By default, your device automatically attempts to obtain your e-mail settings from the Internet, particularly for Internet e-mail accounts such as Yahoo or Hotmail accounts.

3. If you want to manually enter your e-mail settings, clear the Try to get e-mail settings automatically from the Internet check box. Otherwise, tap Next.

   NOTE: Obtain the e-mail server information from your mobile service provider.

4. Key in Your name and Account display name, then tap Next.
5. From the dropdown list, select the time interval that you want to automatically send/receive e-mail messages. If you want to view more download settings, tap **Review all download settings**, and select your preferred download settings.

6. When done, tap **Finish**.

**Managing e-mail accounts**

<table>

<td>Tap &gt; <strong>Messaging</strong>. Select an account and tap <strong>Menu &gt; Options</strong> and then select the type of option you want to change. Tap <strong>ok</strong> when finished.</td>
</tr>
</tbody>
</table>
Sending an e-mail message

To send an e-mail message:

1. Tap ✉ > Messaging.
2. Tap an e-mail account.
3. Tap Menu > New.
4. In To: field, enter e-mail address of the person to which you want to send the message or tap Menu > Add Recipient... to select from your Contacts list.

**NOTE:** If you are sending a message to more than one recipient, separate them with a semicolon (;).

5. Key in your message in the message field.
6. When finished, tap Send.

**NOTE:** If you are working offline, e-mail messages are saved to the Outbox folder and sent the next time you connect.
<table>

</tbody>
</table>

**Downloading e-mail messages**

To send and receive e-mail messages:

- Synchronize e-mail messages with Microsoft Exchange or Microsoft Outlook on your computer.
- Send and receive e-mail messages by connecting directly to an e-mail server through an Internet Service Provider (ISP) or a network.
Synchronizing e-mail messages

You can include e-mail messages as part of the general synchronization process. On Windows® XP platform, you need to enable mail synchronization in Microsoft® ActiveSync. For more information on enabling mail synchronization, see the ActiveSync online help on your computer. On Windows® Vista platform, you can synchronize your e-mail messages via the Windows® Mobile Device Center.

NOTES:

• For synchronizing on Windows Vista™ platform, refer to the Windows® Mobile Device Center’s website at http://www.microsoft.com/windowsmobile/devicecenter.mspx

• To connect directly to an e-mail server, see Synchronizing with an Exchange Server in this user guide.
Managing folders

Each Messaging account has a set of five folders: Deleted Items, Drafts, Inbox, Outbox, and Sent Items. These folders store messages that you send and receive through the account. You can move a message to a different folder within the same account.

<table>
<thead>
<tr>
<th>TO</th>

<tr>
<td>Moving a message to a different folder</td>
<td>Tap &gt; Messaging. Select the account with the message that you want to move. Select the message you want to move and tap Menu &gt; Move.... Select the folder into which to move the message.</td>
</tr>
</tbody>
</table>
Threaded SMS

Your device organizes your SMS messages from a single contact or number into a single thread of conversation, making it easier for you to follow the messaging flow and send the appropriate responses.

Sending a threaded SMS

To send a threaded SMS message:

2. Key in your recipient’s phone number or tap To: to select a recipient from the Contacts list. Separate multiple recipients with a semicolon (;).
3. Key in your message.
4. When finished, tap Send to send out the message.

NOTE: Once your recipient replies to your message, your device displays the message thread, making it easier for you to follow the mobile conversation with your recipient.
MMS messaging

Multimedia Messaging System (MMS) allows you to send text messages with multiple slides. Each slide may include a picture, video or audio, or text. MMS messages are sent by GPRS (General Packet Radio Service) to e-mail accounts or other MMS-enabled mobile devices.

NOTES:
• You need to subscribe to the GPRS and MMS services with your service provider before you can send and receive MMS messages. Ask your mobile service operator on how to activate the MMS feature. Only mobile phones with MMS feature can send/receive MMS messages.
• Depending on the service that you subscribe to, you may not be able to send and receive MMS messages to users using a different mobile phone network.

Editing MMS settings

1. Tap 📱 > Messaging > Messages > Menu > MMS Settings.
2. On the MMS Profiles tab, select your Internet Service Provider from the list. Tap Edit to access Multimedia Messaging Service Center (MMSC) settings.

NOTE: Contact your mobile service provider for detailed settings.
Sending an MMS message

To send an MMS message:

1. Tap 📱 > Messaging > Messages > Menu > New > Multimedia Message.
2. Tap a template to use or tap 💌 to use a blank sheet.
3. In the To: field, key in the mobile phone number or e-mail address of your recipient. You can enter it using the phone pad or tap Menu > Recipients > Add Recipient to select from your Contacts. If you have more than one recipient, separate them with a semicolon (;).
4. In the Subject field, key in a subject for the message.
5. Tap the picture field. All your pictures and video clips are displayed in thumbnail view.
6. Tap a picture or video clip to insert it to the message.
7. Tap Insert Text field and key in your message.
8. Tap the Insert Audio field. All your available audio clips are displayed in thumbnail view.
9. Select the audio clip you want to attach, then tap Select.

NOTE: You will not be able to attach an audio file to a slide with a video clip.

10. Tap Send to send the message.
The following assumes that you are on the MMS message screen.

<table>

</table>
**Windows® Live**

Windows® Live provides a set of services including e-mail, messaging, and search that brings all your online necessities together. With Windows® Live, you can conveniently do the following on your device:

- Access your Hotmail, Messenger, or Microsoft Exchange account and send or receive e-mail messages.
- Start a chat with your friends who are online.
- Search the web using the Windows® Live search engine.

To use Windows® Live, you must have a Passport account. If you have a Hotmail® or an MSN® account, you already have a Passport. Once you have obtained either a Microsoft® Passport or Microsoft® Exchange Server account, you are ready to set up your account.

---

**NOTE:** You need a Microsoft® Passport account to use Windows Live® application. If you do not have a passport account, go to www.passport.com to obtain one.

**Using Hotmail®**

Use the Windows® Live application to access your Hotmail® mailbox and access your e-mail messages on your device.

**To sign in Hotmail®:**

1. Tap > Programs > Windows Live.
2. On the Windows Live - Sign In screen, tap **Sign in to Windows Live** to enter Windows Live Setup session.
3. Tap **Accept**, then enter the e-mail address and password for your Hotmail® account.
4. Select **Save password** and tap **Next**.
5. Tap the check boxes to show or hide Windows® Live items on the Today screen, then tap **Next**.
6. Select the items you want to synchronize on your device, then tap **Next**. Wait for a few minutes for the synchronization process to finish.

   The next time you sign in to Windows® Live, your username and password is displayed.

**Using Windows® Live Messenger**

**To sign in and out of Windows® Live Messenger:**

1. Set e-mail address and password in Windows® Live.
2. When the account setup is finished, tap > **Programs** > **Messanger**.
3. On the Windows® Live Messenger main screen, tap **Signing In**.
4. To sign out, press **Menu** > **Sign Out**.

---

**NOTE:** If you do not sign out of the Windows® Live Messenger application, you will remain connected. This may result in additional charges from your service provider.

**NOTES:**
- If your Internet service provider (ISP) only allows one Access Point Name (APN) connection at a time, you may meet some problems when using Windows Live Messenger concurrently with other Internet related applications.
- We recommend that you close Windows Live Messenger before activating any applications that require an Internet connection such as Internet Explorer, MMS, or Streaming Player.
Chapter 6

Organizing your life

• Using Contacts
• Using Calendar
• Using Tasks
Using Contacts

Contacts contains your list of contact information such as mobile or work numbers and e-mail addresses. Using Bluetooth® on the device, you can quickly share Contacts information with other device users. If you use Outlook on your computer, you can synchronize Contacts between your device and computer.

Viewing Contacts

To view the Contacts list, do any of the following:

- Tap 📞 > Contacts.
- On the Today screen, tap Contacts.

The contact list displays the names of your contacts alphabetically. Beside each name in the contact list is an abbreviation for the default communication method, such as the person’s work phone number (w), mobile phone number (m), or home phone number (h). Your device automatically sets a contact’s mobile phone number as the contact’s default number.

If there are phone numbers stored in your SIM card, the entries display with a SIM card icon before the name.

Using Calendar

Use Calendar to schedule appointments, including meetings and other events. You can also set Calendar to remind you of your appointments. If you use Outlook on your computer, you can synchronize appointments between your phone and computer.

To open the Calendar program, do one of the following:

- Tap > Calendar.
- On the ASUS Today screen, tap .

Scheduling an appointment

To schedule an appointment:

1. Tap > Calendar.
2. Tap Menu > New Appointment.
3. Enter information about the appointment.
   - To schedule an all-day event, in All Day, select Yes.
4. Tap .

Using Tasks
Use Tasks to keep track of what you have to do.

The Tasks list
The task list is your “things to do” list. When you create or edit tasks with Outlook on your computer and then synchronize it with your device, additional information, such as due date, priority, and category, may show. A task that has been marked as high priority is preceded by an exclamation mark, and a low priority task is marked by a downward-pointing arrow. Overdue tasks are displayed in bold red.

NOTE: You can synchronize information on your phone with your computer to keep your task list up to date in both locations.

Chapter 7

Customizing your device

- Customizing the Start menu
- Using the Profile Manager
- Customizing the Today screen
- Entering your contact information
- Setting up sounds and notifications
- Setting the date, time, and alarm
- Setting the ringtone
- Adjusting the display brightness
Customizing the Start menu

You can choose up to seven programs to appear in the Start menu.

To customize the Start menu:

1. Tap > Settings > Personal tab > Menus.
2. Select up to seven programs that you want to be on the Start menu.
3. Tap ok.

Using the Profile Manager

Profile Manager provides you with a convenient way to customize the ringtone and notification settings of your device to suit different scenarios.

There are four profile modes that you can choose from:

- **Normal**: This mode allows you to customize the ringtone for incoming calls, messages, and alert notifications.
- **Meeting**: In this mode, the volume is turned off and your phone vibrates to alert you about an incoming call.
- **Silent**: This mode puts both the volume and ringing tone of your device on mute mode.
- **Automatic**: When set to this mode, your device’s sound and alert settings are automatically switched from Normal to Meeting mode based on your Calendar.
To change to Normal mode:

1. Tap 📱 > Settings > Personal tab > Profile Manager.
2. Select Normal, then select one of these options from the dropdown list: Default, Outdoor, and Personal. If you want to change the settings of an option, tap Edit.
3. Tap Tone, Volume, or Name tabs and make the necessary changes.
4. When done, tap ok.

To change to Meeting mode:

1. Tap 📱 > Settings > Personal tab > Profile Manager.
2. Select Meeting.
3. If you want to change the settings, tap Edit.
4. Tap the slider to adjust the speech volume setting.
5. When done, tap ok.

To change to Silent mode:

1. Tap 📱 > Settings > Personal tab > Profile Manager.
2. Select Silent.
3. If you want to change the settings, tap Edit.
4. Tap the slider to adjust the speech volume setting.
5. When done, tap ok.
To change to Automatic mode:

1. Tap 📱 > Settings > Personal tab > Profile Manager.
2. Select Automatic.

**NOTE:** If the system detects that you are currently busy based on your Calendar, the sound and alert settings in your device automatically switch from Normal to Meeting mode.

3. When done, tap ok.

Customizing the Today screen

To change the theme of your device:

1. Tap 📱 > Settings > Personal tab > Today.
2. From the Appearance tab, select a theme for your device.
3. Tap ok when finished.

To customize the items displayed on the Today screen:

1. Tap 📱 > Settings > Personal tab > Today.
2. From the Items tab, check the items you want to show on the Today screen.
3. Tap ok when finished.
To change the background image:

1. Tap > Settings > Personal tab > Today.
2. From Appearance tab, select the box of Use this picture as the background and tap Browse. Tap an image to use as the background image.
3. Tap when finished.

Entering your contact information

The Owner Information feature allows you to enter and display your personal contact information, such as your name, alternative contact numbers, and e-mail address, on your device.

NOTE: We recommend that you enter your contact information so you can easily be contacted in case of loss.

To enter owner information:

1. Tap > Settings > Personal tab > Owner Information.
2. Key in your details and tap OK.
Setting up sounds and notifications

This function enables you to customize the sounds for ringtones, notifications, reminders, alert, warnings, e-mail, text message, and key tones. The phone comes with some polyphonic ringtones that you can choose from.

To change the sound:

1. Tap 🎉 > Settings > Personal tab > Sounds & Notifications.
2. From the Sounds tab, check the boxes before the items you want to enable sounds for.
3. When done, tap ✓.

To change the notifications:

1. Tap 🎉 > Settings > Personal tab > Sounds & Notifications.
2. From the Notifications tab, select an event from the dropdown list and change the settings.
3. When done, tap ✓.

Setting the date, time, and alarm

To set the date and time:

1. Tap 🎈 > Settings > System tab > Clock & Alarms.
2. On the Time tab, enter the Time zone, Date, and Time settings.
3. Select **Sync to current time zone** if you want to sync the time on your device with your mobile service provider.

**NOTES:**
- If you deselect this option, the time on your device is synchronized when you sync the device with your PC.
- If you select this option, the time on your device keeps unchanged when you sync the device with your PC.

4. Tap **ok**.

**To set the alarm:**

1. Tap **Settings > System tab > Clock and Alarms.**
2. On the Alarm tab, enter the necessary alarm settings.
3. Tap **ok**.

**NOTE:** You can also configure the date/time settings directly from the ASUS Today screen. Just tap **** and configure the necessary settings.
Setting the ringtone

With your device you can add and configure your favorite music as your phone ringtone. You can easily configure your favorite song or sound as your ringtone with the following compatible audio formats: aac, amr, .mp3, .wav, .wma, and .mid.

Adding ringtone to selection

To add ringtone to the selection category under phone setting:

1. Tap > Settings > Personal tab > Ring tones.
2. Select a specific file extension from the list box.
3. Tap to check a ringtone file that you want to add.
   Tap  to play ringtone sound and tap  to stop.
4. Tap  when finished.

Changing the ringtone

To change the ringtone:

1. Tap > Settings > Personal tab > Phone.
2. On the Phone tab, select a ringtone from the Ring tone list box. The songs or sounds that you added as ringtone appears on this list along with the default ringtones that came with the device.
   Tap  to play ringtone sound and tap  to stop.
3. Tap  when finished.

NOTE: Refer to the device’s preinstalled ringtones in the list box.
Adjusting the display brightness

Your device comes with a built-in light sensor which automatically adjust the display brightness according to the environment light. You can also adjust the display brightness manually.

To enable auto adjustment:
1. Tap > Settings > System tab > Brightness.
2. Select Auto adjustment, then tap  .

To adjust the display brightness manually:
1. Tap > Settings > System tab > Brightness.
2. Select Manual, then drag the sliders to adjust.
3. Tap  when done.
Chapter 8

Getting connected

• Using the Wireless Manager
• Using Bluetooth®
• Using Wi-Fi
• Using Wi-Fi Sharing
• Setting a GPRS connection
• Setting the USB connection
• Setting the network
• GSM/3G Networks
Using the Wireless Manager

The Wireless Manager allows you to enable/disable the flight mode function; enable/disable Wi-Fi, Wi-Fi Sharing, Bluetooth and phone connections; use your device as an external modem; and disable/enable Direct Push.

Enabling/disabling flight mode

Your device allows you to enable flight mode before taking an onboard flight. The flight mode feature enables you to turn off the wireless connections and transmitting function of your device but allows you to use its basic functions, such as listen to music and play games, while onboard. You cannot send SMS or make calls while flight mode is enabled.

To enable/disable flight mode:

1. Tap Settings > Connections tab > Wireless Manager.
2. Tap the Flight Mode icon. When enabled, the icon turns blue.

   To disable the flight mode function, tap the Flight Mode icon. The icon turns gray when disabled.

Enabling/disabling the wireless connections

You can turn on/off the wireless connections on your device such as Wi-Fi, Bluetooth, and GPRS connections from the Wireless Manager application.

To enable/disable the wireless connections:

1. Tap Settings > Connections tab > Wireless Manager.
2. Tap the Wi-Fi, GPRS, or Bluetooth icons to turn on any of these wireless connections. The selected icon turns blue when enabled.

   To disable a wireless connection, tap the icon of the wireless connection that you want to turn off. The icon turns gray when disabled.
Enabling/disabling the Wi-Fi Sharing function

You are allowed to enable or disable the Wi-Fi Sharing function from the Wireless Manager application.

To enable or disable the Wi-Fi Sharing function:

1. Tap 🍀 > Settings > Connections tab > Wireless Manager.
2. Tap the **Wi-Fi Sharing** icon. When enabled, the icon turns blue.
   
   To disable the Wi-Fi Sharing function, tap the **Wi-Fi Sharing** icon. The icon turns gray when disabled.

Using your PDA phone as an external modem

With Internet Sharing, you can use your device to connect your PC to the Internet. To connect your device to your PC, you can use a USB Bluetooth dongle.

---

**NOTE:** Ensure that you have Internet connection via Wi-Fi or GPRS connection. Refer to the Wi-Fi or GRPS sections in this user guide for more details.

---

Using a USB cable to connect your device to your PC

---

**NOTE:** Ensure that you have installed Microsoft® ActiveSync 4.5 or later on your PC.

---

To use a USB cable to connect your device to your PC:

1. Ensure that the ActiveSync USB connection on your PC is disabled. To disable:
   
   - Open ActiveSync on your PC, and click **File > Connection Settings**.
   - Clear the **Allow USB connections** check box.
2. Tap 📱 > Settings > Connections tab > Wireless Manager > Internet Sharing.
3. Select USB from the PC Connection dropdown list.
4. From the Network Connection list, select the network that your device will use to connect to the Internet.
5. Tap Connect. Allow a few seconds for your device to establish the Internet connection.

**Using Direct Push**

Direct Push is a technology that allows you continuously retrieve e-mail messages even without synchronising your device with your PC.

**To use Direct Push:**

1. Tap 📱 > Settings > Connections tab > Wireless Manager.
2. Tap the Direct Push icon to enable the Direct Push function. When enabled, the icon turns blue.
   
   To disable Direct Push, tap the Direct Push icon. The icon turns gray when disabled.
Using Bluetooth®

Bluetooth® is a short-range wireless communication technology that allows devices with Bluetooth capabilities to exchange data within a radius of 7-10 meters (21-30 feet) without requiring a physical connection. With Bluetooth enabled in your device, you can:

• Connect and communicate, such as beam files, tasks, or contacts, with other Bluetooth-enabled devices.
• Use Bluetooth service. After you connect to another device or computer using Bluetooth, you can use the services available on that device.

NOTES:

• The maximum distance that Bluetooth devices can exchange data depend on the area and its environment conditions.
• By default, the received data is stored in My Documents folder.

Activating Bluetooth in your device

Use the Wireless Manager to enable or disable Bluetooth in your device.

To activate Bluetooth in your device:

1. Launch the Wireless Manager. To do this, you can either:
   • Tap Settings > Connections tab > Wireless Manager.
   • Tap Wireless Manager.
2. Tap the Bluetooth icon to turn on/off the Bluetooth connection. The icon turns blue when enabled, and gray when disabled.

TIP: When not in use, deactivate Bluetooth in your device to conserve battery power.
Adding Bluetooth devices

To add Bluetooth devices:

1. Ensure that Bluetooth is enabled on the device you want to add and the device is set as visible.
2. Tap 📱 > Settings > Connections tab > Bluetooth.
3. Tap Add new device... to search for available Bluetooth devices. The search may take a while.
4. Select the device you want to connect to, then tap Next.
5. Enter the alphanumeric passcode of the device you want to connect then tap Next. You can find the passcode in the documentation that came with the target device.
6. Enter the display name for this connection.
7. Repeat steps 3 - 6 to connect to more devices.
Using Wi-Fi

Turning on Wi-Fi

To turn on Wi-Fi:

1. Tap > Settings > Connections tab > Wi-Fi > Menu > Turn On Wi-Fi.
   
   The device then automatically scans for all available wireless networks within the Wi-Fi range.

2. From the list of detected wireless networks, select a wireless network that you want to connect the device to, then tap OK.

3. Select whether the wireless network connects to The Internet or Work network, then tap Connect.

4. Enter a password and tap Connect. If no password is needed, just tap Connect. The device then connects to the selected network.

Configuring wireless networks

To configure a wireless network:

1. To launch the Wi-Fi settings page, you can either:
   
   • Tap > Settings > Connections tab > Wi-Fi.
   • Tap from the status bar and then tap Settings > Wi-Fi.

2. On the Configure Wireless Networks screen, tap an available wireless network, then make the necessary changes.

   If the wireless network you want to connect to is not on the list, tap Add New....

   Refer to the succeeding sections for details on how to add new wireless networks.

   Tap the Network Adapters tab and select an adapter. Tap an adapter to set if necessary.

3. Tap when done.
Adding a wireless network

If the device fails to automatically detect the wireless network you want to connect to, you can manually add a network. Ask for the wireless network settings from your network administrator.

To add a wireless network:

1. To launch the Wi-Fi settings page, you can either:
   - Tap \(\text{Settings} > \text{Connections} \text{ tab} > \text{Wi-Fi}\).
   - Tap \(\) from the status bar, then tap \(\text{Settings} > \text{Wi-Fi}\).

   Then tap Add New... from the Wireless tab.

2. Enter a name for the network and select an item from the Connects to: drop-down menu. Then tap Next.

3. Set authentication, data encryption, and network key, then tap Next.

   \underline{NOTE:} Obtain the authentication, data encryption, and network key from your network administrator.

4. If you need to change the EAP type, check the check box and then change the EAP type.

5. Tap Finish when done.
Using the Wi-Fi Sharing

The Wi-Fi Sharing allows you to use your device as an access point. Any WiFi-enabled devices, such as laptop PCs and PDA phones, can share the Internet connection with your devices through High-Speed Packet Access (HSPA). You device can share Internet connection with up to 10 devices at the same time.

**IMPORTANT:**

- Ensure that your device is connected to the Internet via GPRS. Refer to the GPRS section in this user guide for more details.

- When the Wi-Fi Sharing function is enabled, you CANNOT use any Internet related functions on your device.

To enable the Wi-Fi Sharing function:

1. Tap > Programs > Wi-Fi Sharing.
2. Tap OK from the warning message, then tap Menu > Settings.
3. Set the **WEP key** and the **SSID**, and select a network connect from the **Network Connection** dropdown list.
4. Tap Done when finished, then tap OK from the pop-up message.
5. Tap Connect. The Wi-Fi feature on your device is turned on automatically, and your device starts establishing a GPRS connection.

**IMPORTANT:** Do NOT turn off Wi-Fi when using the Wi-Fi Sharing.

To disable the Wi-Fi Sharing function, tap Menu > Exit.
Setting a GPRS connection

Your device allows you to connect via General Packet Radio Service (GPRS). It supports a wide range of bandwidth that allows sending and receiving small bursts of data, such as e-mail and web browsing. To set a GPRS connection in your device:

1. From the Today screen, tap \(\text{G} / \text{3G}\) on the status bar, then tap Settings > Connections. You may also tap Connections tab > Connections from the Settings screen.

2. From the Connections screen, tap Add a new modem connection.

3. Enter a unique name for the connection then select Cellular Line (GPRS) from the modem list.

4. Enter the Access point name. Consult your network service provider for the access point.

5. Enter your user name, password, and domain then tap Finish. Contact your network administrator for assistance.

NOTES:

- The network connection may vary with different locations and mobile service providers. Consult your mobile service provider for the applicable network connection in your area.

- The charge of GPRS services and the GPRS connection settings might vary with different operators. Consult your service provider for suitable solution.

- The GPRS and USB connections cannot be used at the same time.
Connecting GPRS

To connect GPRS:

1. Tap > Settings > Connections tab > Connections.
2. From the Connections screen, tap Manage existing connections.
3. Tap and hold on an existing connection then from the pop-up menu tap Connect.
   
   Tap Delete if you want to delete the selected connection.
4. When connected, tap ok to exit.

NOTE: When WLAN is used simultaneously with the GPRS, the WLAN will get signal priority. We recommend not to use WLAN and GPRS at the same time.

If you have set a default GPRS connection, it automatically connects when you launch an application that connects to the Internet.

1. Launch any application that connects to the Internet such as Internet Explorer. The device will automatically connect to your default GPRS connection. A pop-up callout appears to display the connection status.
2. When connected, you can start browsing the Internet. If you are using Internet Explorer, the default site will be displayed.
Disconnecting GPRS

To disconnect GPRS:

1. Tap Settings > Connections tab > Wireless Manager.
2. Tap the GPRS icon. The icon turns gray when disabled.

NOTES:
• You can only disconnect but you cannot enable the GPRS connection in the Wireless Manager application.
• If your ActiveSync is set to sync with Exchange Server automatically, synchronisation will occur after you connect again.
• GPRS will automatically reconnect everytime you launch an application that requires GPRS connection (such as Internet Explorer or Windows Live Messenger).

Using the GPRS Tool

The GPRS Tool allows you to conveniently select and connect to your GPRS service provider.

To connect via GPRS Tool:

1. Tap Settings > Connections tab > Network Setting.
   You can also tap on the status bar then tap Settings from the popup callout.
2. From the Network Setting screen, select your GPRS provider from the list.

NOTES:
• Operators vary in different regions.
• The GPRS and USB connections cannot be used at the same time.
Setting the USB connection

The USB Setting allows you to select the connection mode between your device and your computer. It allows you to:

• Connect your device with your computer for data synchronization using the Microsoft® ActiveSync.; and
• Connect your device and computer to data transfer between your computer and your device or the Storage Card.

To set the USB connection mode:

1. Connect your device with your PC with the provided USB cable.
2. Tap > Settings > Connections tab > USB Setting.
3. Select a mode from the listed.
   • To connect your device with your PC via ActiveSync, select ActiveSync (Turbo mode) or ActiveSync (Normal mode). We recommend that you select the Turbo mode to get a faster data transmission speed. Refer to the section Microsoft® ActiveSync in Chapter 3 of this User Guide for details on how to use ActiveSync.
   • To use your device as a mass storage device, select Mass storage device (card reader), then select My Storage from dropdown list. Your device comes with 4 GB internal storage for you to store your data and files.
   • To use your device as a card reader, select Mass storage device (card reader), then select Storage Card from dropdown list. You can read the data and files from the storage card and store data or files to it.

IMPORTANT: Ensure that you install a microSD card before enabling the card reader function.

4. Tap ok
Setting the network
Your device enables you to configure your device’s network connection as well as set multiple networks in the order that you want to access them.

Configuring the network
To configure the network settings:
1. Tap Settings > Connections tab > Network Setting.
2. Select the Country and Operator from the dropdown lists. If your mobile service operator is not on the list, tap the Auto Detect button.
3. When done, tap ok.

Setting your preferred networks
Your device enables you to set multiple networks in the order that you want your device to access them. If your primary network is not accessible, your device will automatically try to access an available network in your network list.

To set preferred network:
1. From the phone pad, tap Menu > Options > Network tab.
2. Tap Set Networks and follow the onscreen instructions.
3. When you have set your preferred networks, tap ok to return to the Network tab. In the Network selection list, tap Automatic.
GSM/3G Networks

GSM/3G Networks allows you to conveniently switch network type. Network options include Automatic, 3G, and GSM. The default setting is Automatic, which allows the device to search for the proper service automatically.

**To choose network type:**

1. Tap > Settings > Connections tab > GSM/3G Networks.
2. Select a proper network type, then tap ok.
   
   If you prefer to use the service your SIM card automatically detected, select **Automatic**.

3. When prompted, tap ok to restart your device and apply changes.

---

**NOTES:**

- Network type varies with different service providers.

- Ensure that you choose the right network type for your SIM card.
Chapter 9

GPS features

- GPS Catcher
**GPS Catcher**

The GPS Catcher allows you to update the Global Positioning System (GPS) data in your device. The GPS data contains important information about the status of satellite, and the current date and time for determining the satellite position.

**Updating GPS data**

**To update GPS data:**

1. Tap Programs > GPS Catcher.
2. Tap **Update** to start update.
3. Tap **ok** when finished.

---

**NOTES:**

- To make a successful update, ensure that your device is connected to the Internet.
- GPS data expires in three days. You need to update it again when it expires.
- You can also set GPS Catcher to update automatically, refer to the Setting GPS Catcher section for details.

---

**Setting GPS Catcher**

**To set GPS Catcher:**

1. From the GPS Catcher screen, tap **Menu** > **Setting**.
2. Set the options according to your preference. Tap **Done** when finished.
Chapter 10

Multimedia features

- Using the camera
- Viewing pictures and videos
- Streaming Player
- EziMusic
- EziPhoto
- YouTube&Flickr
Using the camera
The built-in camera allows you to take photos and record audio/video clips.

Launching the camera
To start using the camera, do either of the following:

- Tap Programs > Pictures & Videos > Camera icon.
- Press the Camera button on the right side of your device.

To exit the Camera, tap the exit icon on the camera screen.

Supported formats
Using the camera mode or video mode, the images or video clip captured are stored in the following formats:

- Still image (Camera mode): - JPEG (.jpg)
- Video (Video mode): - 3GP (.3gp), MPEG-4 (.mp4)
Camera mode

The following describes the screen icons in the Camera feature.

NOTES:
• By default, the preview screen is set to landscape.
• After launching the camera, your device is set to camera mode by default.
• In camera mode, the camera button functions as a shutter button.
Camera options menu

The camera options menu allows you to change various camera and picture settings.

To launch options menu:

1. Tap **Menu** from the camera screen.
2. From the shortcut menu, tap an icon to display contents.

   - **Scene**: Allows you to set the scene mode to **Auto** or **Sports**.
   - **Self-Timer**: Sets the delay of shutter release to 5 or 10 seconds after you have pressed the camera/shutter button.
   - **Picture Size**: Allows you to set the frame size of the picture.
   - **Advanced**: This option allows you to set the following settings: **Camera**, **Video**, **Color Adjustment**, and **General**. Under the **Camera** tab, you may enable or disable the Anti-Shake function.
Taking photos

After launching the camera, your device is set to Camera mode by default. To switch between camera and video mode, tap the camera/video mode icon.

To take photos:

1. Half-press the camera button. When the auto-focus frame and anti-shake icon appear, full-press the camera button to take a photo.

2. Repeat step 1 to take more photos.

NOTE: The image is automatically saved to My Storage\My Pictures. If you set My Storage as a Mass Storage, the image is automatically saved to My Documents\My Pictures and can be viewed using the Pictures & Videos application.
Video mode
The following describes the screen icons in Video mode:

Video options menu
The video options menu allows you to change various video and playback settings.

To launch video options menu:
1. Tap Menu from the video screen.
2. From the shortcut menu, tap an icon to display contents.
   - **Video Size**: Allows you to set the frame size of video.
   - **Advanced**: This option allows you to set the following settings: Camera, Video, Color Adjustment, and General.
Recording videos

Set the device to video capture mode to record videos.

To set video mode:

• Tap the video mode icon on the screen.

To record video:

1. Aim the device at your subject.
2. Full-press the camera button to begin recording. The record indicator turns from green to red while video is recording.
3. Press the camera button again to stop recording.

NOTES:

• The video clip is automatically saved to the default storage location.

• Use Windows Media Player Mobile to playback video clip in your device.

• Use Apple® QuickTime™ player, if you wish to play video clips in your computer. You can download QuickTime™ installer from www.apple.com/quicktime.
Viewing pictures and videos
Use the Pictures & Videos Application to preview stored images and playback video clips.

Viewing pictures and videos
To view pictures and videos:

1. Tap Programs > Pictures & Videos.
2. Tap the picture or video clip you want to see.
   • To view pictures or launch video clips stored in a microSD card, tap the folder list (labeled My Pictures), and tap Storage Card.
   • To view pictures stored in My Pictures folder on your device, tap My Pictures then tap a picture thumbnail.
   • To playback video clips in My Pictures folder on your device, tap My Pictures then tap a video.
Streaming Player

Streaming Player allows you to play audio or video files streamed to your device from the Internet. Supported formats include 3gp, 3g2, mp4, and sdp.

NOTE: Before using Streaming Player, ensure that you are connected to the Internet via Wi-Fi, or GPRS connection. Refer to the sections on Wi-Fi or GPRS in this user guide for activating any of these connections on your device.

NOTE: A Real Time Streaming Protocol (RTSP) website provides multimedia data streams such as audio or video clips.
Playing a streaming file

To play a streaming file:

1. Tap 📴 > Programs > Streaming Player, then tap Open.
2. Select Connect with tracking history or manual input of URL.
3. Key in the web address then tap Connect.

**NOTE:** Streaming Player only recognizes an rtp:// URL web address.

4. Tap ⏯️ to play a streaming file from your preferred rtsp website.

**NOTE:** You may bookmark your favorite rtsp://URL website. Refer to the next section for more details.

Connecting with bookmarks

Your device enables you to store and play streaming files from your favorite rtsp websites.

**NOTE:** Before you can connect to a favorite rtsp website, you must first add the website to your Bookmark list.
To create a bookmark:
1. On the Streaming Player screen, tap **Menu > Bookmark Manager**.
2. Tap **New Folder**, then enter the name for the folder.
3. Tap **Save** to save the folder name. You can add an rtsp://URL website to the folder you have created the next time you connect to the Internet.

To bookmark an rtsp://URL web address:
1. Tap **Programs > Streaming Player**, then tap **Open**.
2. Select **Connect with tracking history or manual input of URL**.
3. Key in the rtsp://URL web address then tap **Connect**.
4. Tap ▶️ to play a streaming file from your preferred rtsp website. While a streaming file is playing, tap **Menu > Add to My Bookmark**.
5. Assign a specific name for the streaming file that you want to save.
6. Select the folder in your Bookmark list where you want to save the file.

To play a bookmarked streaming file:
1. Tap **Programs > Streaming Player**, then tap **Open**.
2. Select **Connect with Bookmark**.
3. Select a file from your Bookmark folders, then tap **Connect**.
4. Tap ▶️ to play a streaming file from your favorite rtsp website.
EziMusic

EziMusic enables you to enjoy music and manage music files easily.

To launch EziMusic, do either of the following:

• Tap  > Programs > EziMusic.
• Lightly press the AnyTime Launcher key, then tap  > EziMusic.

The following describes the EziMusic profile on your device.
<table>
<thead>
<tr>
<th>TO</th>

</tr>
</tbody>
</table>
Full-screen mode

When you are viewing a photo in full-screen mode, you are allowed to use your finger to zoom and drag the photo instead of using the stylus. You can also set a photo as a contact image.

To view a photo in full-screen mode, do any of the following:

- From All Photo view, double-tap a photo.
- From Albums view, tap an album to open, then double-tap a photo.
- From Calendar view, double-tap a date with photos, then double-tap a photo.

To view the previous/next photo:

Slide your finger rightward/leftward on the screen to view the previous/next photo.
To zoom a photo, do any of the following

- From the tool bar, tap 🔍 / ☰ to zoom in/out a photo.
- Double-tap a photo to magnify it to the maximum size, and double-tap it again to restore to the normal size.

To drag a photo:

You can drag a photo to view the details when viewing a magnified photo.

- Using your finger or the stylus, tap and hold on the screen, then drag the photo in any direction to move it on the screen.
Slideshow mode

EziPhoto enables you to view your photos in slideshow mode.

To view photos in slideshow mode, do any of the following:

- From All Photo view, tap **Menu > Slideshow**.
- From Albums view, tap a album to open, then tap **Menu > Slideshow**.
- From Calendar view, tap a date with photos, then tap **Menu > Slideshow**.

To use the slideshow control panel:

1. On slideshow mode, tap the screen to show the control panel.
2. Use the control panel to do any of the following actions:
   - Tap  to exit slideshow mode.
   - Tap  to display the previous photo.
   - Tap  to pause a slideshow.
   - Tap  to play a slideshow.
   - Tap  to display the next photo.
   - Tap  to adjust the background music volume.
To set the slideshow effect:

1. Tap **Menu > Setting > Slideshow Settings**.

2. Select your preferred transition effect. You can preview the effect from the preview window on the right side of the screen.

3. Select your preferred transition interval from the delay time list.

4. Select your preferred screen orientation to view the slideshow.

5. Select **Play background music** if you want to play the background music while viewing the slideshow. Tap **Browse** to select your preferred music file.

6. Tap **OK** when done.
Albums view

To launch the Albums view, do either of the following

• Tap 📈.
• Tap Albums from All Photo screen.

Tap to open Albums view

Tap to open the Calendar view
Tap to view all photos

Tap to view the previous album
*You can also slide your finger rightward on the screen.

Tap to view next album
*You can also slide your finger leftward on the screen.

Tap to view all pictures in the album

Tap to switch to Calendar view
Tap to open the menu list
<table>

YouTube&Flickr

YouTube&Flickr enables you to upload videos to the YouTube website and pictures to the Flickr website via MMS, and e-mail messages.

**IMPORTANT:**
- Ensure that you have registered the MMS service with your mobile service provider before uploading videos or pictures via MMS.
- Set up an e-mail account on your device before uploading videos or pictures via e-mail messages. Refer to the Setting up accounts section in Chapter 5: Messaging for details.

Using YouTube

You are allowed to upload videos directly to the YouTube website from your device via MMS, and e-mail messages.

**IMPORTANT:** Before using YouTube, register for a YouTube account and set up your Mobile Profile at the YouTube website at http://www.youtube.com. YouTube provides you with a special e-mail address ending with @mms.youtube.com.

To upload video clips to YouTube:

1. Tap 📲 > Programs > YouTube&Flickr > YouTube.
2. Tap **Menu** > **Space Setting**
3. In the **Email for YouTube uploading** area key in your e-mail address, then tap **Done**.
4. Select **MMS** or an e-mail account from the dropdown list.
5. Tap **Add**, then tap a video clip from the list.

---

**NOTE:** Consult your mobile service provider for the size limit of an MMS message. You are allowed to upload several video clips at a time within the limit.

---

6. Key in a title, and description for your video clip.
7. Tap **Send** to upload the video clip to YouTube website.

### Using Flickr

You are allowed to upload photos directly to the Flickr website from your device via MMS, and e-mail messages.

---

**IMPORTANT:** Before using Flickr, register a Flickr account at the Flickr website at http://www.flickr.com.

---

**To upload photos to Flickr:**

1. Tap ☰ > **Programs** > YouTube&Flickr > Flickr.
2. Tap **Menu** > **Space Setting**.
3. In the **Email for Flickr uploading** area key in `<your username> @photos.flickr.com`, then tap **Done**.
4. Select **MMS** or an e-mail account from the dropdown list.

5. Tap **Add**, then tap a photo from the list.

---

**NOTE:** Consult your mobile service provider for the size limit of an MMS message. You are allowed to upload several photos at a time within the limit.

---

6. Key in a title, description, and tag for your picture.

7. Tap **Send** to upload the picture to the Flickr website.
Chapter 11

Business features

• Clock
• Meeting Time Planner
Clock

Clock allows you to set the time and alarm at your current location or in your visiting city as well as set up to three alarms.

Setting time

To set time:

1. Tap > Settings > System > Clock.
2. From the Time tab, set the local time at your current location or in your visiting city.
3. Tap when finished.

Setting alarm

To set the alarm:

1. Tap > Settings > System > Clock.
2. From the Alarm tab, then tap New to add an alarm, tap Delete to delete the highlighted alarm, or tap Edit to edit the highlighted alarm.
3. Tap when finished.
Meeting Time Planner

Meeting Time Planner allows you to find a suitable time to have a video conference, telephone or net meeting with participants in different time zones.

To use the Meeting Time Planner:

1. Tap Programs > Meeting Time Planner.
2. Select the date and the cities.
   
   A color-coded 24-hour timetable of the chosen cities appear, allowing you to identify the best time for the meeting. Dark blue is late night/early morning, light blue is off-peak hour, and white is peak daytime hour. You can also change the time interval shown by tapping Interval on the lower-right corner of the screen.

3. Select the time for your meeting and tap New Date.
4. Fill in the meeting information and tap ok to add your date into the Calendar.

**NOTE:** You can tap Interval > Summer Time to use daylight saving time.
Chapter 12

ASUS Special features

• Gester
• ASUS Zip
• Backup
• Newstation
Gester

This feature detects your finger movements on the screen to trigger special effects such as scrolling, panning, and zooming.

Enabling Gester

To enable the Gester feature:

1. Tap > Settings > System tab > Gester.
2. Select the check box of Enable Gester Function.
3. Select the Enable Sound Effects to activate the sound effects for the Gester functions.

**NOTE:** The sounds are for some of the gestures only.

4. Tap when finished.
**Using Gester gestures**

</tbody>
</table>
ASUS Zip

ASUS Zip allows you to compress files to save space on your memory card or device.

To compress files:
1. Tap Windows > Programs > ASUS Zip.
2. Select New archive, then tap Next.
3. Select the files or folders and tap Add button, then tap Next.
4. Rename the file and select the location and compression mode. Check the Password box if you want to set a password for the file. Tap Next.
5. Tap Done to exit. Check the Exit and open folder box if you want to open the folder where the compressed files are stored.

To add files to an existing compressed file:
1. Tap Windows > Programs > ASUS Zip.
2. Select Add file to existing archive, then tap Next.
3. Select a compressed file, then tap Next.
4. Select the files or folders you want to add and tap Add button, then tap Next.
5. Tap Done to exit. Check the Exit and open folder box if you want to open the folder where the compressed files are stored.
To extract files from a compressed file:

1. Tap 📑 > Programs > ASUS Zip.
2. Select Extract file, then tap Next.
3. Select a compressed file, then tap Next.
4. Select a folder to save the extracted files to, then tap Next.
5. Tap Done to exit. Check the Exit and open folder box if you want to open the folder where the compressed files are stored.

Backup

The Backup function allows you to back up or restore your files and data to your device or storage card.

Backing up files

To back up files:

1. Tap 📑 > Programs > Backup > Backup.
2. Select the location and the items you want to backup, then tap Next.
3. Rename the file and select the storage location for the backup, then tap Next.
4. Key in a four-digit password to encrypt the backup file, then tap Next.
5. Tap Start to begin the backup. Tap Back to return to the last screen.

NOTE: The system will turn off all processing applications when backing up files.

6. When finished, tap Reset to reset the device.
Setting Backup

To set Backup:
1. Tap ☐ > Programs > Backup, then tap Option.
2. Check the box if you want the device to automatically reset after backup, then Tap ☐ when finished.

Restoring files

To restore files:
1. Tap ☐ > Programs > Backup > Restore.
2. Select the location and the items you want to restore, then tap Next.
3. Rename the file and select the storage location for the backup, then tap Next.
4. Enter the password to decrypt the backup file, then tap Next.
5. Select the items you want to restore from the backed up files, then tap Next.
6. Tap Start to begin the restore process. Tap Back to return to the last screen.

 NOTE: The system will turn off all processing applications when restoring files.

7. When finished, tap Reset to reset the device.
Newstation

With the Newstation in your device, you can conveniently browse news and blogs anywhere and anytime.

NOTE: Ensure that your device is connected to the Internet.

Using Newstation

To read RSS news:
1. Tap Programs > Newstation.
2. Tap a category folder to open.
3. Tap a channel name to open.

To create a new category folder:
1. Tap Programs > Newstation.
2. Tap Menu > New Category then edit the category name.
To add a channel:

1. Tap Programs > Newstation, then tap a category folder to open.

2. Tap Menu > New Channel. You can add a channel from either Internet or an existing file.
   - Input from URL
     - Select Input from URL and enter the URL address, then tap Next.
     - Select a category where you want to add the channel, then tap Finish.
   - Import from a file
     - Select Import from a file, then tap Next.
     - Select a folder and choose a file from the list.
     - Choose channels from the list, then tap Next.
     - Select a category where you want to add the channel, then tap Finish.
Using Newstation menus

Category Menu
To use the category menu:
1. Tap Programs > Newstation.
2. Select a category folder, then tap Menu. The menu list pops up.
3. Tap an option that you need.

Channel Menu
To use the channel menu:
1. Tap Programs > Newstation.
2. Tap a category folder, then select a channel and tap Menu.
3. Tap an option that you need.

Subject Menu
To use the subject menu:
1. Tap Programs > Newstation.
2. Tap a category folder, then tap a channel to open. Select a subject and tap Menu. The menu list pops up.
3. Tap an option that you need.
Chapter 13

Other features

• Microsoft® Office Mobile
• Adobe Reader LE
• Auto Cleaner
• Restoring default factory settings
• System information
• Task Manager
• Removing programs
• Google Search
• Google Maps Mobile
• Using the Opera Mobile
Microsoft® Office Mobile

Your device comes with preinstalled Microsoft® Office Mobile applications which enable you to create, view, and edit spreadsheets, presentations, note, and word files on your device. Use these applications like you would normally use the Office applications on your computer.

To access these applications, tap ☰ > Office Mobile. Select the appropriate application to use.

**Adobe Reader LE**

Adobe Reader LE allows you to view portable document (PDF) files on your device.

**To launch the Adobe Reader LE application:**

- Tap **> Programs > Adobe Reader LE**.

**To open a PDF file:**

- Tap **Open**, then tap a PDF file to open.

**To exit the Adobe Reader LE application:**

- Tap **Exit**.
Auto Cleaner

To free the memory in your device, you can use this function to conveniently close the running applications that you are not using.

To set Auto Cleaner:

1. Tap > Settings > System tab > Auto Cleaner.
2. Select the check box to activate the Auto Cleaner function, then select either Press X or Press and hold X on the screens’s upper right to close the program.
3. Tap the Setting button to set the Exempted and the Force quit list.
4. Tap ok when finished.
Restoring default factory settings

This option allows you to restore the device system to its default factory settings.

To restore default settings:

1. Tap Settings > System tab > Default Settings.
2. Enter ‘1234’ in the Password field and tap OK to confirm that you want to restore to default settings.
3. Tap Yes to start restoring.

WARNING: This option deletes all files stored in your device. Back up your important data to your storage card or computer before restoring to the default settings. Before proceeding with restoring to the default settings, ensure that you remove the microSD card from the device.

System information

The System Information contains important device information including the current device settings and version.

To launch the System Information:

1. Tap Settings > System tab > System Information.
2. Tap the Device Info tab for device hardware information.
3. Tap Version tab to display the ROM, Boot, Radio and Battery version.
Task Manager

The Task Manager allows you to monitor the currently running programs, memory and CPU occupancy. You can use this function to end these programs easily. You can also switch to any of the listed programs from the Task Manager screen.

To launch Task Manager:
Tap 📱 > Programs > Task Manager.

To end a program:
Select the program you want to end and tap End Task.
To end all tasks, tap Menu > End All Tasks.

To switch to a program:
Select a program and tap Menu > Switch To.
Removing programs

To free the storage memory in your device, you can remove the programs you installed. But for the programs preinstalled in your device, you are not allowed to remove them.

To remove a program:

1. Tap SETTINGS > SYSTEM tab > Remove Programs.
2. Select a program you want to remove, then tap Remove.
3. A warning message pops up. Tap Yes to confirm.

Google Search

Google Search enables you to do web searches on your device as you would on Google search engine on your computer.

To display the Google Search bar on the Today screen:

1. Tap SETTINGS > PERSONAL tab > Today.
2. From the list on the Items tab, select Google Search.
3. Tap when done. The Google Search bar is displayed on the Today screen.
Google Maps Mobile

Google Maps Mobile is a free map service from Google that allows you to get traffic updates, driving directions, business listings, and satellite images on your device.

NOTES:

• Some functions of Google Maps Mobile may not work depending on your location.

• Google Maps is only available in these countries: Russia, France, Germany, Italy, Spain, Portugal, Belgium, Switzerland, Sweden, Norway, Denmark, United Kingdom, Taiwan, and China.

• Google Maps Mobile is solely provided by Google, and Google may update GMM on its website at anytime at its own discretion. ASUS will not be responsible for any direct or indirect liability regarding any damages or losses incurred from using Google Maps Mobile. If you encounter problems in using Google Maps Mobile, contact Google directly.

To launch Google Maps Mobile, tap > Google Maps.

</tr>
<tr>
<td>Find your approximate location</td>
<td>Tap <strong>Menu &gt; My Location</strong>, and press 0 (zero) to move the map to your location. A flashing blue dot appears indicating your approximate current location. If the GPS signal is weak, a flashing blue dot surrounded by a light blue circle appears. <strong>NOTE:</strong> For a better signal reception, use an external GPS device with your mobile device.</td>
</tr>
</tbody>
</table>

**NOTE:** You may also send your location to a contact or find the location of a contact in the Google Maps. For more details, refer to **Using Contacts** in Chapter 6.
Using the Opera Mobile

Opera Mobile enables you to browse the Internet on your PDA phone. It allows you to import your favorite links from the Internet Explorer; send links as e-mail/SMS/MMS messages; and download images and copy texts from web pages.

To launch the Opera Mobile, do any of the following:

• Tap Programs > Opera Browser.
• Slightly press the Opera Browser key.

NOTE: Before using this application, ensure that you have Internet connection via GPRS or Wi-Fi connection. Refer to the GPRS or Wi-Fi section of this user guide for more details.

Notices

Replaceable batteries

If an equipment is provided with a replaceable battery and if replacement by an incorrect type could result in an explosion (e.g. with some lithium batteries), the following applies:

• if the battery is placed in an OPERATOR ACCESS AREA, there shall be a marking close to the battery or a statement in both the operating and the servicing instructions;

• if the battery is placed elsewhere in the equipment, there shall be a marking close to the battery or a statement in the servicing instructions.

The marking or statement shall include the following or similar text:

CAUTION:

• RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.
• DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

Operator access with a tool

If a TOOL is necessary to gain access to an OPERATOR ACCESS AREA, either all other compartments within that area containing a hazard shall be inaccessible to the OPERATOR by the use of the same TOOL, or such compartments shall be marked to discourage OPERATOR access.

An acceptable marking for an electric shock hazard is (ISO 3864, No. 5036).

Equipment for restricted access locations
For equipment intended only for installation in a RESTRICTED ACCESS LOCATION, the installation instructions shall contain a statement to this effect.

**WARNING:** The user needs to switch off the device when exposed to areas with potentially explosive atmospheres such as petrol stations, chemical storage depots and blasting operations.

## Specific Absorption Rate (SAR)

### Bodyworn operation

For bodyworn operation, this device has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 1.5 cm from the body. Use of other enhancements may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the device at the ear, position the handset a minimum of 1.5 cm from your body when the device is switched on.

### Exposure to radio waves

**THIS MODEL MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES**

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The ICNIRP SAR limit for mobile devices used by the general public is 2 W/kg. The highest CE SAR value for this device when tested for use on the head was 0.341 W/kg* and 1.08 W/kg* on the body.
As SAR is measured utilizing the device’s highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a ‘handsfree’ device to keep the mobile phone away from the head and body.

Additional Information can be found on the websites of the World Health Organization (http://www.who.int/emf).

* The tests are carried out in accordance with international guidelines for testing. The limit incorporates a substantial margin for safety to give additional protection for the public and to account for any variations in measurements. Additional related information includes the ASUS testing protocol, assessment procedure, and measurement uncertainty range for this product.
Declaration

We declare that the IMEI codes for this product, **ASUS P835**, are unique to each unit and only assigned to this model. The IMEI of each unit is factory set and cannot be altered by the user and that it complies with the relevant IMEI integrity related requirements expressed in the GSM standards.

Should you have any questions or comments regarding this matter, please contact us.

Sincerely yours,

**ASUSTeK COMPUTER INC.**
