Safety information

Phone care

Do not attempt to open the phone casing. There are no user serviceable parts inside and you might damage sensitive electronic circuits and components. Unauthorized disassembly will void the warranty.

Do not leave your phone exposed to strong sunlight or excessive heat for a prolonged period. This may damage it.

Do not handle your phone with wet hands or expose it to moisture or liquids of any kind. Continuous changes from a cold to a warm environment may lead to condensation inside the phone, resulting in corrosion and possible damage.

If you pack your phone in your suitcase during travel, beware of damage. Cramming a suitcase may crack the LCD display. Remember to switch off your wireless connections during air travel.

As with all other radio devices, touching the built-in antenna area during telephone conversation may impair the quality and lead to shorter standby time due to increased power consumption.

The battery

Your phone is equipped with a high performance Li-Ion battery. Observe the maintenance guidelines for a longer battery life.

• Avoid charging in extremely high or low temperature. The battery has its optimum performance in an ambient temperature of +5 °C to +50 °C.

• Do not store the battery near a fire or heat source.

• Use only the battery approved by the manufacturer.

• Never replace the battery with a non-approved battery.

• Never soak the battery in water or any other liquid.

• Never try to open the battery as it contains substances that might be harmful if swallowed or allowed to come into contact with unprotected skin.
• Never short-circuit the battery, as it may overheat and cause a fire. Keep it away from jewellery and other metal objects.

• Never dispose of the battery in fire. It could explode and release harmful substances into the environment.

• Never dispose of the battery with your regular household waste. Take it to a hazardous material collection point.

• Do not touch the battery terminals.

**The charger**

• Avoid using the phone while charging.

• Use only the charger supplied with your phone.

• Never pull the charger cord to release it from the mains – pull the charger itself.

---

**WARNING!** There is a risk of explosion if the battery is replaced by an incorrect type.

---

**Memory card**

• Do not remove or insert a memory card or turn off the handset while data on the card is being read.

• Do not touch the metal terminals with your hands or metal objects.

• Do not bend the memory card or subject it to violent impacts. Keep it away from water and high temperatures.

• Keep all memory cards out of the reach of small children.

• Do not short circuit the contact points or expose it to liquids or moisture. When not in use, keep it in an antistatic container.

• Do not use force when inserting or handling the card, and do not expose it to excessive heat or strong magnetic fields.
Cleaning and storing

- Your phone should always be handled with care and protected from dirt, dust and dampness. To avoid scratches, never place your phone face down.
- If cleaning is necessary, switch the phone off and wipe carefully with a soft, slightly damp (not wet) cloth. Use a cotton swab to clean the camera lens. Allow the phone to dry completely before switching it on. Never use solvents for cleaning.
- If you are not going to use your phone for some time, fully charge the battery and store the phone in a dry place away from direct sunlight. Your phone should be switched off during storage. Recharge every 6 to 12 months.
- Never expose your phone to heat or strong sunlight.
- Never expose your phone to moisture or liquids of any kind.
- Do not paint your phone or otherwise block the keypad, microphone or earpiece function.
- Do not place stickers that may block the keypad or disturb other functions such as microphone, earpiece, or camera lens.

**WARNING!** Failure to follow these instructions may lead to serious personal injury and possible property damage.

Driving safely

Never use handheld phones while driving. It is an offence, that while driving, to hold a phone or cradle it in your neck at any point, during the setup, making or taking of a phone call, text message or any other data related mobile communication. Use of fully installed car kits are still permitted, as are the use of alternate handsfree accessories.

In the interest of safety, we would recommend the use of a cradle while using any form of handsfree accessory.

While driving, we recommend that you use voicemail wherever possible, and that you listen to your messages when you are not in the car. If you must make a handsfree call when driving, keep it brief.

Do not place objects, including both installed or portable wireless equipment, in the area over the airbag.
or in the airbag deployment area. An airbag inflates with great force. If the airbag inflates, serious injury could result.

**Electronic devices**

Most modern electronic equipment is shielded from RF energy. However, certain electronic equipment may not be shielded against the RF signals from your device.

**Pacemakers**

The Health Industry Manufacturers’ Association recommends that a minimum separation of six (6") inches be maintained between a phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.

**If you have a pacemaker:**

- Always keep your phone more than six inches (15cm) from your pacemaker when turned on.
- Do not carry your phone in your breast pocket.
- Use the ear opposite the pacemaker to minimize the potential for interference
- If you have any reason to suspect that interference is taking place, turn your phone off immediately.

**Hearing aids**

Some digital phones may interfere with some hearing aids. In the event of such interference, call ASUS Customer Service to discuss alternatives.

**Other medical devices**

If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.
Turn your phone off in healthcare facilities when any regulations posted in these areas instruct you to do so.

Hospitals or healthcare facilities may be using equipment that could be sensitive to external RF energy.

**Vehicles**

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment added to your vehicle.

**Posted facilities**

Turn your phone off where posted notices so require.

**Magnetic media**

Magnetic fields generated by mobile devices may damage data on magnetic storage media, such as credit cards, computer discs or tapes. Do not place your phone next to such media. You should never expose your phone to strong magnetic fields as this may cause temporary malfunction.

**Other Safety Guidelines**

**Aircraft**

Regulations prohibit using your phone while in the air. Switch off your phone before boarding an aircraft or turn off the wireless connections.

**Blasting areas**

To avoid interfering with blasting operations, turn your phone off when in a ‘blasting area’ or in areas posted: “Turn off two-way radio.” Obey all signs and instructions.
Potentially explosive environments

Turn your phone off when in any area with a potentially explosive environment and obey all signs and instructions.

Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive environment are often, but not always, clearly marked. They include fuelling areas such as gas stations, below decks on boats, fuel or chemical transfer or storage facilities, vehicles using liquified petroleum gas (such as propane or butane), areas where the air contains chemicals or articles, such as grain, dust, or metal powders, and any other area where you would normally be advised to turn off your vehicle’s engine.

Choking

Keep your phone away from children as the SIM card and other small parts present a choking hazard.

Cautions

Your device is a high quality piece of equipment. Before operating, read all instructions and cautionary markings on (1) AC Adapter (2) Battery and (3) Product Using Battery.

- Do not use this device in an extreme environment where high temperature or high humidity exists. The device has its optimum performance in an ambient temperature of 0~40°C
- Do not abuse the device. Avoid striking, shaking or giving it a shock. When not using the unit, lay it down to avoid possible damage due to instability.
- Do not expose this device to rain or other liquid.
- Do not use unauthorized accessories.
- Do not disassemble the phone or its accessories. If service or repair is required, return the unit to an authorized service center. If the unit is disassembled, a risk of electric shock or fire may result.
- Do not short-circuit the battery terminals with metallic items.
Mobile phone etiquette
As mobile phone usage rises, there is now a need to create a set of manners in using a mobile phone in professional and social settings. This section provides you with basic tips with regards to respecting others while using your mobile phone.

Mobile manners

• Avoid talking on your mobile phone when in enclosed public places such as theaters, libraries, museums, places of worship, elevators, or auditoriums.
• Avoid using your mobile phone while doing other tasks such as driving, shopping, banking, waiting in line, or conducting other personal business.
• Avoid using annoying ringtones.
• Avoid taking a call on your mobile phone during business meetings, appointments, or interviews.
• Look for a private place to take a call, and keep your phone conversations brief.
• Talk on your mobile phone quietly, and do not shout.
• Put your mobile phone on silent or vibrator mode to avoid disturbing others.
• Ask permission before taking a picture or a video clip of another person.
• Avoid using capital letters when sending SMS messages as this can be interpreted as shouting.
• When making a call, introduce yourself to the person at the other end of the line, and do not hang up without saying goodbye.
Welcome!

Thank you for buying an ASUS® P835 PDA phone!

The PDA phone delivers a host of new features and latest technologies. Besides the basic phone and messaging functions, it provides you with more exciting features including business features, GPS features, and multimedia entertainment features.

Before you start using the device, check your product package for the following items:

Installing the SIM card and battery

Before you can make a phone call using your device, you need to install a Subscriber Identity Module (SIM) card. The SIM card contains your phone number, subscriber details, phonebook, and additional phone memory.

Your device comes with a rechargeable Lithium-Ion (Li-Ion) battery.

New batteries come partially charged and should be fully charged for about four hours before using them.

---

**CAUTION:** Use only an ASUS qualified battery (SBP-17).

---

**To install a SIM card and battery:**

1. Press down and push downward to remove the battery compartment cover.
2. Insert the SIM card with its gold contacts facing down and the notched corner oriented to the upper right corner of the slot as shown.

3. Install the battery into the compartment with its copper contacts properly aligned to the copper conductor on the device.

4. Replace the battery compartment cover.
Charging the battery

The bundled battery is shipped partially charged. Charge the battery up to four hours before using for the first time.

To charge battery:

1. Connect the AC adapter plug into the mini-USB connector at the bottom of the device.
2. Connect the AC power plug into a grounded wall socket or power strip.

NOTES:
- The notification LED turns red and the charging battery icon appears on the status bar indicating that the battery is charging.
- If your battery gets totally discharged, you need to recharge it for at least twenty minutes before you can turn it back on.
Installing and removing a microSD card

Your device is equipped with a microSD card slot. A microSD card provides you with extended memory where you can store your files and other data.

To install a microSD card:

1. Locate the microSD card slot at the right side of the device.
2. With the golden fingers facing down, gently insert the microSD card into the slot until it snaps properly.
3. To remove, push the card until it ejects out, then remove the card safely.

NOTES:

• The microSD card is an optional accessory.
• Your device supports Secure Digital High Capacity (SDHC) storage card.

Turning your device ON

Ensure that your device is fully-charged before you start using the device for the first time.

To turn on your device:

1. Press and hold ⚪️.
2. Follow the onscreen instructions to align screen and set the local time zone.

To turn it off, press and hold ⚪️ ⚪️ until it turns off.
Calibrating your device
Calibrating your device ensures that the item you tap on the screen is activated. To align screen, tap the center of targets that appear in various locations on the screen.

Using the stylus
The stylus is a pen-like device found behind the lower right corner of your device.

- Use the stylus to write, draw, select, or drag an item on the screen.
- Single-tap an item to select or open it.
- Tap and hold an item to see a menu.

Locking your device

- Locate the Hold button and slide downward to lock.
- Slide upward to unlock.
Using the Trackball

You can use the nine-direction trackball to do the following:

- Push it upward, downward, leftward, or rightward to navigate through menus.
- Push in left-slanted upward/downward, or right-slanted upward/downward direction to move through a screen.
- Press down to confirm a command, launch a selected application, or open a file.

Using the Input Panel

When you start an application or select a field that requires text, symbols, or numbers, the Input Panel icon appears on the menu bar. Tap the Input Panel to select any of these input methods: **Block Recognizer, Keyboard, Letter Recognizer, and Transcriber.**
The Home screen

The Home screen on your device displays two parts: the ASUS Today and the Today screens.
ASUS Today

ASUS Today on your device’s home screen enables you to view or change your time/date settings, notifies you of your missed calls and SMS/MMS/e-mail messages, displays your day’s appointments, updates you on the current weather and latest news, and enables you to add and play media files on your device.

NOTES:

• You can disable the ASUS Today from your Home screen following the instructions below.

• Slide the stylus leftward or rightward on the icon bar to view the hidden icons.

To disable the ASUS Today:

1. Tap \(\text{Settings} \rightarrow \text{Personal tab} \rightarrow \text{Today} \rightarrow \text{Items tab}.\)
2. Deselect the check box of \text{Asus Today}, then tap \(\text{ok}.\)
## Icons

Refer to the table below for the ASUS Today icons.

<table>
<thead>
<tr>

<td><img src="image" alt="Weather icon" /> Displays the current weather.</td>
</tr>
</tbody>
</table>
The Today screen

The Today screen displays information useful to you. You can configure the Today screen to have all the important information that you need.

NOTE: To know more about customizing the Today screen, refer to the section Customizing the Today screen in Chapter 7 of the user manual electronic file that is included in the bonus CD.
## Status indicators

Refer to the table below for the status indicators.

Using MultiHome

MultiHome provides three themes for the ASUS Today screen: Original, Business, and Life. You can change the theme according to your preference.

To change the theme:

1. Tap 📚 from the ASUS Today screen to launch MultiHome.
2. To navigate through the Original, Business, and Life themes, push the trackball leftward or rightward, or draw a horizontal line on the screen with the stylus.
3. Tap the screen to apply your selected theme.
AnyTime Launcher

AnyTime Launcher is an alternative program that allows you to conveniently and quickly launch applications, perform tasks, and change device settings.

To run the AnyTime Launcher:

• Press the AnyTime Launcher key.

![Diagram of AnyTime Launcher interface]

- Tap to open an application.
- Tap to add an application to the Favorite Programs list.
- Tap to remove an application from the Favorite Programs list.
- Use the trackball to select.
- Tap to launch the selected application.
- Tap to view all applications on the device.
Making calls

You can make a phone call using the phone pad. You can also make calls directly from the Contacts, Call History, Speed Dial, or Voice Commander.

Making a voice call

Calling using the phone pad

To make calls using the phone pad:

1. Tap Programs > Phone or press to launch the phone pad.
2. Tap the number or choose a contact or a recently dialed number from the list above the phone pad.
   If you tapped the wrong number, tap to erase the number to the left.
3. Tap or press to make the call.
4. When finished, press to end the call.

Calling from Contacts

To make a call from Contacts:

1. From the Today screen, tap Contacts.
2. You can do any of the following to make a call:
   • Tap name of contact, then tap Call.
   • Tap name of contact, then press .
   • You can also tap and hold the contact, and from the shortcut menu tap Call Work, Call Home, or Call Mobile.
   • Tap Enter a name... then enter the name or number you want to call from Contacts. Press to dial the highlighted item.
Making emergency calls
Calls to emergency service number can be made under any circumstances, even if you have locked the SIM card.

To place an emergency call
Enter the emergency number appropriate for your location, and press

Making international calls
To place an international call:
1. Tap and hold on the keypad to enter a (+) plus sign.
2. Enter the full phone number with the country code, area code, and phone number, and then press

Receiving a call
When you receive a call, a message prompts and allows you to answer or reject the incoming call.

To answer or reject an incoming call:
- To answer a call, press.
- To reject an incoming call, press.

TIPS:
- Press and hold to switch receiver to speakerphone mode.
- When you get an incoming call, press the Volume key to put the phone on silent mode.

To terminate a call:
- Press.
Messaging

Threaded SMS

Your device organizes your SMS messages from a single contact or number into a single thread of conversation, making it easier for you to follow the messaging flow and send the appropriate responses.

To compose and send a threaded SMS message:

2. Key in your recipient’s phone number or tap To: to select a recipient from the Contacts list. Separate multiple recipients with a semi-colon.
3. Key in your message.
4. When finished, tap Send to send out the message.

MMS messaging

To compose and send an MMS message:

1. Tap 📱 > Messaging > Messages > Menu > New > Multimedia Message.
2. Tap a template to use or tap 💌 to use a blank sheet.
3. Key in phone numbers or tap To: to add recipients from the Contacts, separating them with a semi-colon.
4. Key in the subject for your message.
5. From the message body area:
   • Tap the picture field to attach a picture or video file to the message.
   • Tap Insert Audio... to attach an audio file.
   • Tap Insert Text... to input text message.
6. When finished, tap Send to send out the message.
Using Microsoft® ActiveSync

To synchronize your device via mini-USB:

1. After installing ActiveSync to your computer, connect the mini-USB plug into the mini-USB connector at the bottom of the device.
2. Connect the other end of the USB cable to your computer. Upon connection, ActiveSync automatically synchronizes your device.

**NOTE:** Ensure that you install Microsoft ActiveSync 4.5 or later versions.

Using Bluetooth®

To activate Bluetooth in your device:

1. Launch the Wireless Manager. To do this, you can either:
   - Tap > Settings > Connections tab > Wireless Manager.
   - Tap > Wireless Manager.
2. Tap Bluetooth to turn it on/off.

To connect with other devices via Bluetooth:

1. Ensure that the other Bluetooth-enabled device is visible and within close range.
2. Tap > Settings > Connections tab > Bluetooth.
3. Tap Add new device... to search for available Bluetooth devices. The search may take a while.
4. Select the device you want to connect to, then tap Next.
5. Enter the alphanumeric passcode of the device you want to connect then tap **Next**. You can find the passcode in the documentation that came with the other device.

6. Enter the display name for this connection.

7. Repeat steps 3 - 6 to connect to more devices.

**Connecting GPRS**

**To set GPRS connection on your device:**

1. From the Today screen, tap 📞 / 3G on the status bar, then tap **Settings > Connections**. You may also tap **Connections tab > Connections** from the Settings screen.

2. From the Connections screen, tap **Add a new modem connection**.

3. Enter a unique name for the connection then select **Cellular Line (GPRS)** from the modem list.

4. Enter the Access point name. Consult your network service provider for the access point.

5. Enter your user name, password, and domain then tap **Finish**. Contact your network administrator for assistance.

**To connect GPRS:**

1. Tap 📞 > **Settings > Connections tab > Connections**.

2. From the Connections screen, tap **Manage existing connections**.

3. Tap and hold on an existing connection then from the pop-up menu tap **Connect**.
   - Tap **Delete** if you want to delete the selected connection.

4. When connected, tap ✅ to exit.

---

**NOTE:** When WLAN is used simultaneously with the GPRS, the WLAN will get signal priority. We recommend not to use WLAN and GPRS at the same time.
Browsing the Internet

If you have set a default GPRS connection, it automatically connects when you launch an application that connects to the Internet.

1. Launch any application that connects to the Internet such as Internet Explorer. The device will automatically connect to your default GPRS connection. A pop-up callout appears to display the connection status.

2. When connected, you can start browsing the Internet. If you are using Internet Explorer, the default site will be displayed.

To disconnect GPRS:

• Tap > Settings > Connections tab > Wireless Manager > GPRS.

NOTE: You can only disable GPRS from the Wireless Manager, but you will not be able to turn it on from the Wireless Manager.
Using Wi-Fi

To turn on Wi-Fi:

1. Tap 📱 > Settings > Connections tab > Wi-Fi > Menu > Turn On Wi-Fi.
   
   The Device then automatically scans for all available wireless networks within the Wi-Fi range.

2. From the list of detected wireless networks, select a wireless network that you want to connect the device to, then tap OK.

3. Select whether the wireless network connects to The Internet or Work network, then tap Connect.

4. Enter a password and tap Connect. If no password is needed, just tap Connect. The device then connects to the selected network.

To configure a wireless network:

1. To launch the Wi-Fi settings page, you can either:
   
   • Tap 📱 > Settings > Connections tab > Wi-Fi.
   
   • Tap ⚡ from the status bar and then tap Settings > Wi-Fi.

2. On the Configure Wireless Networks screen, tap an available wireless network, then make the necessary changes.
   
   If the wireless network you want to connect to is not on the list, tap Add New....
   
   Refer to the succeeding sections for details on how to add new wireless networks.
   
   Tap the Network Adapters tab and select an adapter. Tap an adapter to set if necessary.

3. Tap ⌘ when done.
To add a wireless network:

1. To launch the Wi-Fi settings page, you can either:
   
   • Tap $\mathcal{S}$ > Settings > Connections tab > Wi-Fi.
   
   • Tap \(\mathcal{S}\) from the status bar, then tap Settings > Wi-Fi.

   Then tap Add New... from the Wireless tab.

2. Enter a name for the network and select an item from the Connects to: drop-down menu. Then tap Next.

3. Set authentication, data encryption, and network key. Ask your network administrator for these information. Then tap Next.

4. If you need to change the EAP type, check the check box and then change the EAP type.

5. Tap Finish when done.
Customizing the Start menu

To customize the Start menu:
1. Tap Settings > Menus.
2. Check the items that you want to appear on the menu.
3. Tap ok when done.

Customizing the ASUS Today screen

To change the theme of your device:
1. Tap Settings > Today.
2. From the Appearance tab, select a theme for your device.
3. Tap ok when finished.

To customize the items displayed on the ASUS Today screen:
1. Tap Settings > Today.
2. From the Items tab, check the items you want to show on the Today screen.
4. Tap ok when finished.

To change the background image:
1. Tap Settings > Today.
2. From the Appearance tab, select Use this picture as the background and tap Browse. Then tap an image to use as the background image.
3. Tap ok when finished.
Customizing the profile

To customize the profile:
1. Tap > Settings > Profile Manager.
2. Select a profile you want to use.
3. Tap when done.

Customizing the ringtone

To customize the ringtone:
1. Tap > Settings > Phone.
2. On the Phone tab, select a ringtone from the Ring tone list box. The songs or sounds that you added as ring tone appears on this list along with the default ringtones that came with the device.
   Tap to play ringtone sound and tap to stop.
3. Tap when finished.

Entering your contact information

To enter owner information:
1. To launch the Owner Information screen, do either of the following:
   • On the Today screen, tap the Tap here to enter owner information field.
   • Tap > Settings > Owner Information.
2. Enter your details and tap ok.

NOTE: We recommend that you enter your contact information so you can easily be contacted in case you lost your device.
Setting the date, time, and alarm

To set the date and time:
1. Tap > Settings > System tab > Clock & Alarms.
2. On the Time tab, enter the time zone, date, and time settings.
3. Tap ok.

To set the alarm:
1. Tap > Settings > System tab > Clock & Alarms.
2. On the Alarm tab, enter the necessary alarm settings.
3. Tap ok.

NOTE: You can also configure the date/time settings directly from the ASUS Today screen. Tap ok and enter the necessary settings.
Taking pictures and videos
The built-in 5.0 megapixel camera allows you to take photos and record video clips.

To use the camera, do either of the following:
• Tap Programs > Pictures & Videos > Camera icon.
• Press the Camera button on the right side of your device.

To exit the Camera:
• Tap the exit icon on the camera screen.

To take photos:
1. Half-press the camera button. When the auto-focus frame and anti-shake icon appear, full-press the camera button to take a photo.
2. Repeat step 1 to take more photos.

To record videos:
1. Aim the device at your subject.
2. Full-press the camera button to begin recording. The record indicator turns from green to red while video is recording.
3. Press the camera button again to stop recording.

To switch the capture mode, tap , then tap the capture mode that you want to use.
EziMusic

EziMusic enables you to enjoy music and manage music files easily.

To launch EziMusic, do either of the following:

- Tap 📱 > Programs > EziMusic.
- Slightly press the AnyTime Launcher key, then tap 🎵 > EziMusic.

The following describes the EziMusic profile on your device.

**NOTE:** For more details, refer to the User Manual included in the bonus CD.
EziPhoto

EziPhoto enables you to view and manage your photos conveniently.

To launch EziPhoto, do either of the following:

- Tap > Programs > EziPhoto.
- Slightly press the AnyTime Launcher key, then tap > EziPhoto.

The following describes the EziPhoto profile on your device.

NOTE: For more details, refer to the User Manual included in the bonus CD.
Notices

Replaceable batteries

If an equipment is provided with a replaceable battery and if replacement by an incorrect type could result in an explosion (e.g. with some lithium batteries), the following applies:

- if the battery is placed in an OPERATOR ACCESS AREA, there shall be a marking close to the battery or a statement in both the operating and the servicing instructions;
- if the battery is placed elsewhere in the equipment, there shall be a marking close to the battery or a statement in the servicing instructions.

The marking or statement shall include the following or similar text:

CAUTION:
- RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.
- DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

Operator access with a tool

If a TOOL is necessary to gain access to an OPERATOR ACCESS AREA, either all other compartments within that area containing a hazard shall be inaccessible to the OPERATOR by the use of the same TOOL, or such compartments shall be marked to discourage OPERATOR access.

An acceptable marking for an electric shock hazard is (ISO 3864, No. 5036).

Equipment for restricted access locations
For equipment intended only for installation in a RESTRICTED ACCESS LOCATION, the installation instructions shall contain a statement to this effect.

**WARNING:** The user needs to switch off the device when exposed to areas with potentially explosive atmospheres such as petrol stations, chemical storage depots and blasting operations.

### Specific Absorption Rate (SAR)

#### Bodyworn operation

For bodyworn operation, this device has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 1.5 cm from the body. Use of other enhancements may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the device at the ear, position the handset a minimum of 1.5 cm from your body when the device is switched on.

#### Exposure to radio waves

**THIS MODEL MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES**

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The ICNIRP SAR limit for mobile devices used by the general public is 2 W/kg. The highest CE SAR value for this device when tested for use on the head was 0.341 W/kg* and 1.08 W/kg* on the body.
As SAR is measured utilizing the device’s highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a ‘handsfree’ device to keep the mobile phone away from the head and body.

Additional Information can be found on the websites of the World Health Organization (http://www.who.int/emf).

* The tests are carried out in accordance with international guidelines for testing. The limit incorporates a substantial margin for safety to give additional protection for the public and to account for any variations in measurements. Additional related information includes the ASUS testing protocol, assessment procedure, and measurement uncertainty range for this product.
Declaration

We declare that the IMEI codes for this product, ASUS P835, are unique to each unit and only assigned to this model. The IMEI of each unit is factory set and cannot be altered by the user and that it complies with the relevant IMEI integrity related requirements expressed in the GSM standards.

Should you have any questions or comments regarding this matter, please have our best attention.

Sincerely yours,

ASUSTeK COMPUTER INC.
