Installing a micro SIM card

To install a micro SIM card:
1. Locate the groove on the bottom-right corner of your ASUS Phone.
2. Pry the cover loose and then pull the rear cover off.
3. Insert the micro SIM card into one of the slots.

NOTE: Use only a micro SIM card on your ASUS Phone. A trimmed SIM card may not properly fit into and may not be detected by your ASUS Phone.

IMPORTANT: Use only a micro SIM card on your ASUS Phone. A trimmed SIM card may not properly fit into and may not be detected by your ASUS Phone.

NOTE: For the latest updates and more detailed information, please visit www.asus.com.

Installing a microSD card

To install a microSD card:
1. Locate the groove on the bottom-right corner of your ASUS Phone.
2. Pry the cover loose and then pull the rear cover off.
3. Insert the microSD card into the microSD card slot.

NOTE: Do not use sharp tools or solvent on your device to avoid scratches on it.

Charging your ASUS Phone

To charge your ASUS Phone:
1. Connect the USB connector into the power adapter's USB port.
2. Connect the other end of the micro USB cable to your ASUS Phone.
3. Plug the power adapter into a wall socket.

FCC Regulations:
This device complies with part 15 of the FCC Rules.
Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IC Regulations:
This device complies with Industry Canada’s licence-exempt RSSs. Operation is subject to the following two conditions:
(1) This device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation.

IMPORTANT!
- When using your ASUS Phone while it is plugged into a power outlet, the grounded power outlet must be near to the unit and easily accessible.
- When charging your ASUS Phone through your computer, ensure that you plug the micro USB cable to your computer’s USB 2.0 / USB 3.0 port.
- Avoid charging your ASUS Phone in an environment with ambient temperature of above 35°C (95°F).

NOTES:
- Use only the power adapter that came with your device. Using a different power adapter may damage your device.
- Using the bundled power adapter and ASUS Phone signal cable to connect your ASUS Phone to a power outlet is the best way to charge your ASUS Phone.
- The input voltage range between the wall outlet and this adapter is AC 100V - 240V. The output voltage of the micro USB cable is +5V=2A, 18W /+5.2V=1.35A, 7W.

The device could automatically disconnect transmission in case of absence of information to transmit, or operational failure. Note that this is not intended to prohibit transmission of control or signaling information or the use of repetitive codes where required by the technology.
- the device for operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems;
- the maximum antenna gain permitted for devices in the band 5725–5825 MHz shall comply with the e.i.r.p. limits specified for point-to-point and non point-to-point operation as appropriate.

The IC ID for this device is 3588A-Z00AD.
RF Exposure Information (SAR)

This device has been tested and meets applicable limits for Radio Frequency (RF) exposure.

Specific Absorption Rate (SAR) refers to the rate at which the body absorbs RF energy. SAR limits are 1.6 Watts per kilogram (over a volume containing a mass of 1 gram of tissue) in countries that follow the United States FCC limit and 2.0 W/kg (averaged over 10 grams of tissue) in countries that follow the Council of the European Union limits. For SAR, devices are tested using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands.

To reduce exposure to RF energy, use a hands-free accessory or other similar option to keep this device away from your head and body. Carry this device at least 10 mm away from your body to ensure exposure levels remain at or below the displayed levels. Clip the belt clips, holsters, or other similar body-worn accessories which do not contain metallic components to support operation in this manner. Cases with metal parts may change the RF performance of the device, including its compliance with RF exposure guidelines, in a manner that has not been tested or certified, and use such accessories should be avoided.

The highest FCC SAR values for the device are as follows:

- 0.92 W/kg (Head)
- 0.87 W/kg (Body)

The FCC has granted an Equipment Authorization for this device with the following:

- 0.332 W/kg (Body)
- 0.92 W/kg (Head)

CE RF Exposure Compliance

This device meets the EU requirements (1999/519/EC) on the limitation of exposure of the general public to electromagnetic fields by way of health protection. For body-worn operation, this device has been tested and meets the ICNIRP guidelines and the European Standard EN 62209-2. For use with dedicated accessories. SAR is measured with this device at a separation of 1.5 cm to the body, while transmitting at the highest certified output power level in all frequency bands of this device. Use of other accessories which contain metals may not ensure compliance with ICNIRP exposure guidelines.

CE Mark Warning

This device complies with the requirements of Directive 1999/5/EC of the European Parliament and the Commission from 9 March, 1999 governing Radio and Telecommunications Equipment and mutual recognition of conformity. The highest CE SAR values for the device are as follows:

- 0.351 W/kg (Head)
- 0.332 W/kg (Body)

For indoor use only when operating under 1515 MHz to 3350 MHz of frequency range.

Using GPS (Global Positioning System) on your ASUS Phone

To use the GPS positioning feature on your ASUS Phone:

- Ensure that your device is connected to the Internet before using Google Map or any GPS-enabled apps.
- For first-time use of a GPS-enabled app on your device, ensure that you are outdoors to get the best positioning data.
- When using a GPS-enabled app on your device inside a vehicle, the metallic component of the car window and other electronic devices might affect the GPS performance.

Prevention of Hearing Loss

To prevent possible hearing damage, do not listen at high volume levels for long periods.

ASUS Recycling/Takeback Services

The FCC has granted an Equipment Authorization for this device with the following:

- 0.92 W/kg (Head)
- 0.332 W/kg (Body)

ASUS Phone care

- Use your ASUS Phone in an environment with ambient temperatures between -10 °C (14 °F) and 35 °C (95 °F).
- The battery

Your ASUS Phone is equipped with a high performance non-detachable Li-Ion battery. Observe the maintenance guidelines for a longer battery life.

- Do not remove the non-detachable Li-ion battery as this will void the warranty.
- Avoid charging in extremely high or low temperature. The battery performs optimally in an ambient temperature of 5°C to 35°C.
- Do not remove and replace the battery with a non-approved battery.
- Do not remove and soak the battery in water or any other liquid.
- Never try to open the battery as it contains substances that might be harmful if swallowed or allowed to come into contact with unprotected skin.
- Do not remove and short-circuit the battery, as it may overheat and cause a fire. Keep it away from jewelry or metal objects.
- Do not remove and dispose of the battery in fire. It could explode and release harmful substances into the environment.
- Do not remove and dispose of the battery with your regular household waste. Take it to a hazardous material collection point.
- Do not touch the battery terminals.

Safety information

Fax: 886228907698

Declaration

We declare that the IMEI codes for this product, ASUS Phone, are unique to each unit and only assigned to this model. The IMEI of each unit is factory set and cannot be altered by the user and it complies with the relevant IMEI integrity related requirements expressed in the GSM standards. Should you have any questions or comments regarding this matter, please contact us.

Sincerely yours,
ASUSTeK COMPUTER INC.

NOTES:
- Risk of explosion if battery is replaced by an incorrect type.
- Dispose of used battery according to the instructions.

Caution

Your ASUS Phone is a high quality piece of equipment. Before operating, read all instructions and cautionary markings on the (1) AC Adapter.

- Do not use the ASUS Phone in an extreme environment where high temperature or high humidity exists. The phone works optimally in an ambient temperature between -10 °C (14 °F) and 35 °C (95 °F).
- Do not disassemble the ASUS Phone or its accessories. If service or repair is required, return the unit to an authorized service center. If the unit is disassembled, a risk of electric shock or fire may result.
- Do not short-circuit the battery terminals with metal items.

Operator access with a tool

If a tool is necessary to gain access to an OPERATOR ACCESS AREA, either all other compartments within that area containing a hazard shall be inaccessible to the OPERATOR by the use of the same TOOL, or such compartments shall be marked to discourage OPERATOR access.
