Personalize Your Device

- Change the Today screen background
  - Top Start > Settings > Personal tab > Today
- Set the date and time
  - Top Start > Settings > System > Advanced tab
- Manage power settings
  - Top Start > Settings > System > Power > Advanced tab
- Change ringtone settings
  - Tap the HTC Home tab, then tap the area that shows Ringtones

Make a Voice or Video Call

- To make a voice call:
  - Top Start > Phone > Call, then enter the number
  - Press the Call button on the screen

- To start a video call:
  - Tap to configure capture and camera settings
  - On the Phone keypad, tap the keys with a Microphone icon to enter the number
  - The Smart Dialing panel will display the matching phone numbers in Call History, as well as the matching contacts found on your device and SIM card

- To save contacts on your SIM card to your device, use SIM Manager:
  - Start > Programs > SIM Manager

Capture a Photo or Video

- Use the Camera of your device to capture those precious moments.
  - Tap to start a capture mode
  - Select the resolution
  - Tap to choose the resolution
  - Tap to choose the Game program.

Get E-Mail On Your Device

- Set up your device so you can send and receive e-mail messages, using your favorite e-mail service:
  - Top Start > Messaging > Setup E-mail
  - Enter your e-mail address and Password, then tap Next
  
- If e-mail provider settings are found preconfigured on your device, the E-mail Setup wizard shows a successful message. Next
  - Tap to send an e-mail message:
  - Tap to start sending and receiving e-mail on your device.

View Information on the Subdisplay

The Subdisplay shows the current local and visiting date and time, notifications, and device status such as signal strength, audio, and battery power, on a designated area on the screen. The Subdisplay is automatically activated when the keyboard covers the screen.

To activate the Subdisplay, cover the device touch screen with the hardware keyboard. The transparent window of the hardware keyboard must be on the same side with the microphone.

What’s in the Box

These are the items that you should find inside the box.

Visit www.htc.com for a more complete reference, consult the User Manual that came with the device.
Before Using Your Device

A. Open the battery compartment

1. Flip up the SIM card slot door (1), then insert the SIM card into the slot (2), with its gold contacts facing up and its cut-off corner facing the slot (3).

2. Flip down the SIM card slot door, then press it until it is locked (4).

B. Install the SIM card

1. Open the battery compartment cover.

2. Pull up the battery lock (1), then insert the battery into the bay (2) with its label side up.

3. Press and hold the battery lock for about 3 to 5 seconds to turn off the device. When turning off, the message will appear on the screen. Tap Ok to turn off the device.

4. Press the POWER button shortly to turn off the display. Press and hold the POWER button for about 3 to 5 seconds to turn off the device.

C. Install the battery

1. The battery is partially charged out of the box. To charge the battery:

   a. Charge the battery

   b. Attach the hardware keyboard

   c. Connect the AC adapter plug to an electrical outlet (1) and then connect the USB end to the DC IN/SYNC port.

   d. Install the SIM card

   e. Turn the device on or off

   f. Configure your device

   g. Go online and surf the web

   h. Synchronize your device and computer

   i. Print your notes

   j. Set up mobile services

   k. Access the PDA's directory

   l. Access the PDA's contacts

   m. Access the PDA's calendar

   n. Access the PDA's tasks

   o. Access the PDA's notes

   p. Access the PDA's to-do list

   q. Access the PDA's memo pad

   r. Access the PDA's alarm clock

   s. Access the PDA's stopwatch

   t. Access the PDA's timer

   u. Access the PDA's calculator

   v. Access the PDA's currency converter

   w. Access the PDA's unit converter

   x. Access the PDA's voice recorder

   y. Access the PDA's video recorder

   z. Access the PDA's music player

D. Charge the battery

The battery is partially charged out of the box. To charge the battery, connect the AC adapter plug to an electrical outlet (1) and then connect the USB end to the DC IN/SYNC port.

E. Attach the hardware keyboard

Attach the keyboard to your device via the keyboard connector. The device securely attaches itself to the keyboard through a magnet.

F. Turn the device on or off

1. When you power on your device for the first time, a Quick Start Wizard will guide you through touch screen calibration, provide a quick tutorial on touch operation and popup menus, and allow you to set the date, time, and the device password. Follow the on-screen instructions to complete the wizard.

2. Press and hold the POWER button for about 3 to 5 seconds to turn off the device.

G. Configure your device

1. Once your device is turned on, a Quick Setup Wizard will automatically run and guide you to create a synchronization partnership. Click Next to proceed.

2. When your device is connected to the Internet, you can:

   a. Surf the web by tapping Start > Internet Explorer.

   b. Chat with friends by tapping Start > Programs > Messenger.

   c. Read the latest news by tapping Start > Programs > RSS Hub.

H. Go online and surf the web

1. You can use Wi-Fi® to connect your device to the Internet.

   a. If there is no Wi-Fi hotspot in your area, you can connect your device to your wireless service provider’s 3G/GPRS network to connect your device to the Internet.

   b. Go Online and Surf the Web.

I. Synchronize your device and computer

1. Synchronize your device with your computer to keep information such as Outlook e-mails, contacts, tasks, and appointments up-to-date on your device.

   a. Synchronize your device and computer.

   b. Set up synchronization software on your computer.

   c. Install ActiveSync on your computer.

   d. Synchronize your device and computer.

   e. Choose whether to allow wireless connections while your device is connected to the Internet.

   f. Click Finish.
