### Network

Your 4G LTE® wireless device will indicate which of A T&T’s wireless networks you are connected to. A network indicator does not necessarily mean that you will experience any particular upload or download data speeds. 4G availability is dependent on ongoing backhaul deployment.

Connected to A T&T’s 4G LTE network.

Connected to A T&T’s HSPA+ network. A T&T’s HSPA+ network is capable of delivering 4G speeds when combined with enhanced backhaul. 4G availability is dependent on ongoing backhaul deployment.

Connected to A T&T’s EDGE/GPRS network.

Actual data upload and download speeds depend on various factors, including the device and network capabilities, the location of the device, the device manufacturer, the carrier’s network, and the content provider.
