Get online using your phone's data connection or Wi-Fi.

Connect to the Internet

First, turn on your phone and go to the Home screen. Then:

• Press and hold the Home key for 2 seconds to show the widget and tap the Power Dashboard widget.

Fast browsing

Enjoy fast web browsing on your phone. With the powerful processor, you can surf the web and run apps simultaneously. Also, with "AdBlock Plus" support, websites are not as intrusive.

Battery saving tips

Here are some things you can do to get the most out of a single charge.

• Set your phone to automatically switch to power saver mode when the battery level reaches a certain level.

• Use the Power Dashboard widget to quickly adjust and turn on or off settings that affect your battery power.

• Tap the icons on the widget to adjust or turn on/off the settings.

Turning on power saver

You can turn on the power saver by tapping the Battery icon on the Power Dashboard widget. This will reduce the power consumption of all apps and settings that are not essential to the phone's basic functions.

• Tap the Battery icon on the Power Dashboard widget to turn on power saver mode.

Turning off automatic updates

For some apps such as Weather, turn off automatic updates to free up battery power.

• In the Settings, tap Apps, and then select the app which is receiving automatic updates.

Getting HTC Sync

You can use the HTC Sync software to sync contacts, photos, and other data between your computer and your phone. Easy, fast, and convenient. You can download it from the HTC.com website.

• Connect your phone's USB cable to your computer, and then open the Three power management setting.

Upgrading services

If you want to purchase additional services, such as Maps or HTC Care, you can do so via HTC Sync. The first time you sync your phone, you'll be prompted to purchase the additional services you want.

• In the HTC Sync software, tap the Upgrade Services button to add the services you want.
Before you do anything else, please read this

Set up your phone

The first time you power on your phone, you'll be guided to set up your phone. Follow the onscreen instructions to set up your email accounts, and then tap Save.

Organizing your Home screen with folders

By grouping apps or shortcuts into folders, you can keep your Home screen organized. You can also keep things in order by grouping apps or shortcuts into folders.

Managing all your accounts

If you signed in to your Google Account before you set up your phone, you'll have signed in to your Google Account automatically. For information about adding, removing, or signing out of your Google Account, please see Google Accounts.

Be sure to sign in to your Google™ Account so you can use Google apps such as Android Market™ on your phone. To sign in to your Google Account, just tap your name at the top of the screen, and then tap Google Accounts. Then, you can select and add/edit or delete your Google accounts on your phone.

Keep your life organized

To keep your life organized, you’ll be guided to set up your email accounts. From the Home screen, just tap Inbox. Email accounts they belong to. By default, your inbox will be color coded so you can easily distinguish which messages are from different accounts.

In the Mail app, you can check incoming/outgoing messages. From the Home screen, just tap Inbox. Email messages are color coded so you can place without having to switch to another email account.
