Email

Check and send email messages right from your phone.

htc.com/mail

Touch-enhanced email

Send personal or work email messages and receive real-time updates. Use the Mail app to add your webmail and other POP3 or IMAP email accounts.

Adding your other email accounts

1. From the Home screen, tap Email.
2. If you have several email accounts, you can set it up on your phone. If you need to set up an additional email account, see Setting up an email account.
3. On the email account Inbox, tap Email address.
4. Enter the field, separating them with a comma. 
5. Tap Send.

Sending an email message

1. Press Home, Menu, and then tap Mail.
2. If you have several email accounts, choose the one you want to use.
3. Tap the field, and then enter your address.
4. Press Search to enter a text conversation.
5. Tap the To field, and then enter your phone.

Get HTC Sync

You can use the HTC Sync software to sync contacts, calendar, and other data between your computer and your HTC Desire Z. HTC Sync from version 2.10 will work when you plug your phone and connect to your computer.

Locations

1. Connect your phone to your computer using the USB cable that came with your phone.
2. When the Connect to PC screen appears, tap Close.
3. A new account will open, and the next time you connect, your HTC will recognize it as a new account.
4. Tap Sync an email account.
5. Tap Switch to different accounts.
6. Tap All accounts.

HTCsense.com

With HTC Sense.com, you get to customize your phone to look and sound the way you want it. If you're a new user or want to know more about HTC Sense.com, see the complete user guide.

Sign up for your HTCSense.com account

1. From the Home screen, tap Locations.
2. Press the Menu key, tap Locations, and then select Synch to different accounts.
3. Tap Upgrade.
4. You can also directly enter email addresses in the
5. Enter the subject, and then enter your message.
6. Tap Send.

If you need turn-by-turn GPS navigation and safety services, you can use the HTC Sync software to sync contacts, calendar, and other information between your computer and your phone.
