− Tap to dial a contact.

Making a call via IP

Calling via IP dial, you can enter the IP address of the contact you want to call.

In the call log, you can make a call, add new contact or send a message.

Specific absorption rate (SAR) certification information

The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2.0 watts per kilogram (W/kg).

The highest SAR values under the ICNIRP positions with the device transmitting at its highest certified power level as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2.0 watts per kilogram (W/kg).

The radio wave exposure guidelines were developed by an independent scientific organization which will be made available upon request.
