Inserting SIM card:

1. Push the holder in the SIM card slots next to the thimble opening of the holder.
2. Place the SIM cards face down and align it with the hole it pops out.
3. Insert them into the SIM card slots of the phone properly.

Specific absorption rate (SAR) certification information:

- Maximum SAR for this model and conditions under which it was recorded:
  - Head: 0.482 W/kg
  - Body: 0.485 W/kg

SAFETY:

- Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines. The radio wave exposure guidelines use a unit of measurement known as the specific absorption rate (SAR). These guidelines were developed by an independent scientific organization known as the International Commission on Non-Ionizing Radiation Protection (ICNIRP). The highest SAR values under the ICNIRP guidelines for this device model are:
- Head: 2.0 W/kg
- Body: 1.5 W/kg

RADIO WAVES:

- Tests for SAR are conducted using standard operating procedures for the device in all tested frequency bands. The highest SAR values under the ICNIRP guidelines were developed by an independent scientific organization and are recommended by international guidelines. The radio wave exposure guidelines were developed by an independent scientific organization and are recommended by international guidelines.

Note:

- During use, the actual SAR values for this device are usually well below the values stated above. This is because, for purposes of system operation, the device must be positioned at least 1.5 cm away from the body.
- For the sake of personal safety, you are recommended to lower its SAR value.
- The efficiency and to minimize interference on the network, the operating power of your mobile device is automatically decreased when full power is not necessary.
- Effective reduction in SAR values and reduced interference on the network can be achieved by keeping the device as far as possible from the body.
- To reduce the amount of time spent using the device, you could also use a hands-free accesso.
