Getting started

➤ Thank you for choosing Infinix smartphone. We hope this product will bring you a brand new experience.

Inserting SIM card
1. Switch off the mobile phone and remove the rear cover.
2. Insert the SIM card in the card slot properly.

3. Finally, replace the rear cover of the mobile phone.
**Inserting memory card**
1. Switch off the mobile phone and remove the rear cover.
2. Insert the Micro SD card into the slot.
3. Finally, replace the rear cover of the mobile phone.
   **Note:** Use only compatible memory cards with the device. Incompatible memory cards may damage the card or the device and corrupt the data stored in the card.

**Charging the phone**
You can charge your device using a charger or by connecting it to the computer using a USB cable (comes with the phone).
   **Note:** Only use compatible charger; immovable inbuilt battery.
The phone can be restarted by holding the power button for 10 seconds.
Features

The phone supports 3G SIM cards and its camera, video recorder, FM radio, and music and sound recorder offer amazing experiences. You can install various applications, games and many more (supports APK format) which can be downloaded from the Google Play.
Making a call
On the Home Screen, tap ☎️ and dial a complete phone number to make a call.
Call log
In the call log, you can make a call, add new contact or send a message.

Tap here to add the new Contact.

Tap here to redial.

Tap here.
Sending and receiving message(s)

Enter **Messaging**, and then compose new message. You can open the keyboard by tapping on a text field.

a. When you are composing a new text message, you can select text for cutting or copying. The selected text is highlighted in blue.
   - Tap and hold the text field or portion that contains text.
   - You can select all texts, copy, cut and paste.

b. When a new message is received, you can read it by opening the notification panel and clicking the message, or entering **Messaging** to read it directly.
**Specific Absorption Rate (SAR) Certification**

**THIS DEVICE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES**

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines. The guidelines were developed by an independent scientific organization (ICNIRP) and include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2.0 W/kg. Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The highest SAR values under the ICNIRP guidelines for this device model are:

<table>
<thead>
<tr>
<th>Maximum SAR for this model and conditions under which it was recorded</th>
</tr>
</thead>
<tbody>
<tr>
<td>Head</td>
</tr>
<tr>
<td>Body</td>
</tr>
</tbody>
</table>

During use, the actual SAR values for this device are usually well below the values stated above. This is because, for purposes of system efficiency and to minimize interference on the network, the operating power of your mobile device is automatically decreased when full power is not needed for the call. The lower the power output of the device, the lower its SAR value.

A body-worn SAR test has been performed on this device at a separation distance of 0.5 cm. To meet RF exposure guidelines during body-worn operation, the device must be positioned at least 0.5 cm away from the body.

Organizations such as the World Health Organization and the US Food and Drug Administration have suggested that if people are concerned and want to reduce their exposure, they could use a hands-free accessory to keep the wireless device away from the head and body during use, or reduce the amount of time spent using the device. For more information, visit [www.infinixmobility.com](http://www.infinixmobility.com) and search for your device with the model number.
