Please read this manual carefully before operating your mobile phone. Retain it for future reference.
Important Safety Precautions

Read these instructions. Breaking the rules may be dangerous or illegal. Further detailed information is given in this user guide.

WARNING! Violation of the instructions may cause serious injury or death.

1. Never use an unapproved battery since this could damage the phone and/or battery and could cause the battery to explode.

2. Never place your phone in a microwave oven as it will cause the battery to explode.

3. Never store your phone in temperatures less than -4°F or greater than 122°F.

4. Do not dispose of your battery by fire or with hazardous or flammable materials.

5. When riding in a car, do not leave your phone or set up the hands-free kit near to the air bag. If wireless equipment is improperly installed and the air bag is deployed, you may be seriously injured.

6. Do not use a hand-held phone while driving.

7. Do not use the phone in areas where its use is prohibited. (For example: aircraft)
Important Safety Precautions

1. Do not expose the battery charger or adapter to direct sunlight or use it in places with high humidity, such as a bathroom.

2. Do not use harsh chemicals (such as alcohol, benzene, thinners, etc.) or detergents to clean your phone. This could cause a fire.

3. Do not drop, strike, or shake your phone severely. It may harm the internal circuit boards of the phone.

4. Do not use your phone in high explosive areas as the phone may generate sparks.

5. Do not damage the power cord by bending, twisting, pulling, or heating. Do not use the plug if it is loose as it may cause a fire or electric shock.

6. Do not place any heavy items on the power cord. Do not allow the power cord to be crimped as it may cause electric shock or fire.

7. Do not handle the phone with wet hands while it is being charged. It may cause an electric shock or seriously damage your phone.

8. Do not disassemble the phone.
1. Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire.

2. Do not hold or let the antenna come in contact with your body during a call.

3. Make sure that no sharp-edged items such as animal’s teeth or nails, come into contact with the battery. This could cause a fire.

4. Store the battery out of reach of children.

5. Be careful that children do not swallow any parts (such as rubber plugs, earphone, connection parts of the phone, etc.) This could cause asphyxiation or suffocation resulting in serious injury or death.

6. Unplug the power cord and charger during lightning storms to avoid electric shock or fire.

7. Only use the batteries and chargers provided by LG. The warranty will not be applied to products provided by other suppliers.

8. Only authorized personnel should service the phone and its accessories. Faulty installation or service may result in accidents and consequently invalidate the warranty.

9. Your service provider programs one or more emergency phone numbers, such as 911, that you can call under any circumstances, even when your phone is locked. Your phone’s preprogrammed emergency number(s) may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

Thank you for choosing the **Force** cellular phone designed to operate with the latest digital mobile communication technology, Code Division Multiple Access (CDMA). Along with the many advanced features of the CDMA system, such as greatly enhanced voice clarity, this compact phone offers:

- Music capability and microSD™ card slot.
- Slim and sleek design with internal antenna (Internal antenna described as antenna throughout this user guide)
- Large, easy-to-read, 9-line backlit LCD with status icons.
- Paging, messaging, voice mail, and caller ID.
- Speakerphone feature.
- Menu-driven interface with prompts for easy operation and configuration.
- Any key answer, auto answer, auto retry, one-touch and speed dialing with 99 memory locations.
- Bilingual (English and Spanish) capabilities.
- Bluetooth® wireless technology.

**Note**
The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by LG Electronics is under license. Other trademarks and trade names are those of their respective owners.
Important Information
This user’s guide provides important information on the use and operation of your phone. Please read all the information carefully prior to using the phone for the best performance and to prevent any damage to or misuse of the phone. Any unapproved changes or modifications will void your warranty.

FCC Part 15 Class B Compliance
This device and its accessories comply with part 15 of FCC rules. Operation is subject to the following two conditions: (1) This device and its accessories may not cause harmful interference, and (2) this device and its accessories must accept any interference received, including interference that causes undesired operation.

Technical Details
The Force is an all digital phone that operates on both Code Division Multiple Access (CDMA) frequencies: Cellular services at 800 MHz and Personal Communication Services (PCS) at 1.9 GHz.

CDMA technology uses a feature called DSSS (Direct Sequence Spread Spectrum) that enables the phone to keep communication from being crossed and to use one frequency channel by multiple users in the same specific area. This results in a 10-fold capacity increase when compared with analog mode. In addition, features such as soft / softer handoff, hard handoff, and dynamic RF power control technologies combine to reduce call interruptions.

The Cellular and PCS CDMA networks consist of MSO (Mobile Switching Office), BSC (Base Station Controller), BTS (Base
* TSB-74: Protocol between an IS-95A system and ANSI J-STD-008

* Its battery life is twice as long as IS-95. High-speed data transmission is also possible.

The following tab lists some major CDMA standards.

FCC RF Exposure Information

**WARNING! Read this information before operating the phone.**

In August 1996, the Federal Communications Commission (FCC) of the United States, with its action in Report and Order FCC 96-326, adopted an updated safety standard for human exposure to Radio Frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards.

**Bodily Contact During Operation**

This device was tested for typical use with the back of the phone kept 0.79 inches (2.0 cm) from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 0.79 inches (2.0 cm) must be maintained between the user’s body and the back of the phone, including the antenna, whether extended or retracted. Third-party belt-clips, holsters, and similar accessories containing metallic components should not be used. Avoid the use of accessories that cannot maintain 0.79 inches (2.0 cm) distance between the user’s body and the back of the phone and have not been tested for compliance with FCC RF exposure limits.
Vehicle-Mounted the External Antenna
(Optional, if available.)
To satisfy FCC RF exposure requirements, keep 8 inches (20 cm) between the user / bystander and vehicle-mounted the external antenna. For more information about RF exposure, visit the FCC website at www.fcc.gov.

FCC Notice and Cautions
This device and its accessories comply with part 15 of FCC rules. Operation is subject to the following two conditions: (1) This device and its accessories may not cause harmful interference, and (2) this device and its accessories must accept any interference received, including interference that causes undesired operation.

Modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment under FCC rules.

Use only the supplied antenna. Use of unauthorized antennas (or modifications to the antenna) could impair call quality, damage the phone, void your warranty and/or violate FCC regulations.

Don’t use the phone with a damaged antenna. A damaged antenna could cause a minor skin burn. Contact your local dealer for a replacement antenna.
Part 15.21 statement

Change or Modifications that are not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

Part 15.19 statement

This device and its accessories comply with part15 of FCC rules.

Operation is subject to the following two conditions:

(1) This device & its accessories may not cause harmful interference.

(2) This device & its accessories must accept any interference received, including interference that may cause undesired operation.

Part 15.105 statement

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.
Phone Overview

1. **Earpiece** lets you hear the caller and automated prompts.
2. **Display Screen** Displays all the information needed to operate your phone, such as the call status, the Contacts list, the date and time, and the signal and battery strength.
3. **Left Soft Key (Contacts)** Use to access Contacts from the standby screen, or the function immediately above it.
4. **TALK Key** Use to place or answer calls.
5. **Alphanumeric Keypad** Use to enter numbers and characters and to select menu items.
6. **Navigation Keys** Allow you to scroll through the phone’s screen.
7. **MENU/OK Key** Lets you access the phone’s main Menu and also selects the highlighted choice when navigating through a menu.
8. **Right Soft Key (Message)** Use to access Messaging from the standby screen, or the function immediately above it.
9. **END/PWR Key** lets you turn the phone on or off, end a call, or return to standby mode. While in the main menu, it returns the phone to standby mode and cancels your input. When you receive an incoming call, press to enter silent mode and mute the ringer.
10. **BACK Key** deletes characters from the display in text entry mode. When in a menu, press this key to return to the previous menu.
11. **Camera Lens** As part of the built-in camera, lets you take pictures and videos. Keep clean for optimal camera performance.
12. **Side Volume Button** Allows you to adjust the ringer volume in standby mode or adjust the voice volume during a call.
13. **Charger/Accessory Port** Allows you to connect the phone to the phone charger and to optional accessories, such as a USB cable. CAUTION! Inserting an accessory into the incorrect jack may damage the phone.
14. **Headset Jack** Allows you to plug in either a stereo or mono headset for convenient, hands-free conversations. CAUTION! Inserting an accessory into the incorrect jack may damage the phone.
15. **microSD™ card slot** Lets you use a microSD card (may be sold separately) to expand the memory of your phone.
16. **Speakerphone Key** Let you hear the different ringers and sounds. You can mute the ringer when receiving incoming calls by pressing or any of the side keys. The speaker also lets you hear the caller’s voice in speakerphone mode.
17. **Side Camera Key** lets you activate the camera and video mode to take pictures and record videos.

Menus Overview

Menu Access
Press \textit{Menu} to access the 12 phone menus. There are two methods of accessing menus and submenus:

- Use the navigation key to highlight and \textit{OK} to select.
- Press the number key that corresponds to the menu (or submenu).

My Menu
Your phone offers you the option of assigning shortcuts to favorite or often-used functions.

1. Press \textit{Menu} and select \textit{My Menu}.

2. Highlight the assigned number and press \textit{OK}.

3. Select from one of the following categories:
   - Messaging, BREW, Web, Multimedia, Contacts, Recent Calls, Music, My Schedule, Bluetooth, Tools, or Settings.

4. Highlight the function/submenu, then press \textit{Set} to assign the new My Menu item.
The Battery

Note
It is important to fully charge the battery before initial use of the phone.

The phone comes with a rechargeable battery. The battery charge level is shown at the top of the LCD screen.

Installing the Battery

To install, insert the battery into the opening on the back of the phone and gently press down until the latch snaps into place.

Removing the Battery

1. Make sure the power is off so that you do not lose any stored numbers or messages.

2. Press down on the top part of the battery cover (directly above the Camera Lens) with your thumb and slide the cover downward to remove it from the back of the phone.

Charging the Battery

To use the charger provided with your phone:

Warning! Use only the charger provided with the phone. Using any charger other than the one included with the Force may damage your phone or battery.

1. Connect the USB data cable into the cableless wall adapter. When connecting as shown below, the LG logo on the USB cable should face toward you.

2. Gently uncover the accessory charging port, then plug the end of the AC adapter into the phone’s accessory/charger port and the other end into an electrical outlet.
3. The charge time varies depending upon the battery level and usage.

Battery Charge Level

The battery charge level is shown at the top right of the LCD screen. When the battery charge level becomes low, the low battery sensor alerts you in up to three ways: sounding an audible tone, blinking the battery icon, and displaying a warning message. If the battery charge level becomes exceedingly low, the phone automatically switches off and any function in progress is not saved.

Turning the Phone On and Off

Turning the Phone On

1. Install a charged battery or connect the phone to an external power source.

2. Press \( \text{End} \) for about 3 seconds until the LCD screen lights up.

Turning the Phone Off

1. Press and hold \( \text{End} \) until the display turns off.

Signal Strength

Call quality depends on the signal strength in your area. The signal strength is indicated on the screen as the number of bars next to the signal strength icon \( \text{Signal} \) -- the more bars, the better the signal strength. If the signal quality is poor, move to an open area. If you
are in a building, the reception may be better near a window.

Note
The call quality is also affected by the places where you are and weather conditions with radio frequency (RF) emission changes.

Screen Icons
To see the icon glossary, go to Menu -> Settings -> Phone Info -> Icon Glossary on your phone.

Making Calls
1. Slide the phone open.
2. Enter the phone number (include the area code if needed).
3. Press TALK. If the phone is locked, enter the lock code (usually, the last 4 digits of your phone number by default and it's changeable in Settings menu).

Note
If the phone is restricted, you can only dial phone numbers saved in the Emergency Numbers and (depending on your settings) your Contacts list. To turn off this function: Menu -> Settings -> Security -> Lock Code -> OK -> Restrictions -> Lock Code -> OK -> Select the below categories.

• Incoming Calls/ Outgoing Calls/ Incoming Messages/ Outgoing Messages - Options include: Allow All/ Contacts All/ Block All
• Camera/ Data - Options include: Unlock/ Lock
4. Press END to end the call.
Correcting Dialing Mistakes

If you make a mistake while dialing a number, press \( \text{BACK} \) once to erase the last digit entered, or hold down \( \text{BACK} \) for at least 2 seconds to go to the standby mode.

Redialing Calls

1. Press \( \text{TALK} \) twice to redial the last number you dialed. The last 120 calls (40 Missed, 40 Received and 40 Dialed) are stored. In the call history list, you can also select any of these to redial.

Receiving Calls

1. When the phone rings and/or vibrates, press \( \text{TALK} \) to answer.

Tip

The Call Settings menu allows you to choose answer options:

(\( \text{Menu-} \rightarrow \text{Settings-} \rightarrow \text{Call Settings-} \rightarrow \text{Answer Options} \))

Slide Open/ TALK Key Only/ Slide Open & Any Key/ Auto Answer

2. Press \( \text{END} \) to end the call.
Mute Function

The Mute Function is used during a phone call. To quickly activate Mute press Left Soft Key Mute, then to cancel press Left Soft Key Unmute.

Volume Quick Adjustment

Use the side keys to adjust the ringer volume while in standby mode, and the earpiece volume during a phone call. The upper key increases the volume and the lower key decreases the volume.

Call Waiting

Your cellular service provider may offer call waiting. While a call is in progress, two beeps indicate another incoming call. When call waiting is enabled, you may put the active call on hold while you answer the other incoming call. Check with your service provider for information about this function.

1. Press TALK to receive a waiting call.
2. Press TALK again to switch between calls.

Note

Keypad Volume is adjusted through the Keypad volume settings menu. Available levels are: (Off/ Volume 1~5).
Quick Access to Convenient Features

**Caller ID**

Caller ID displays the phone number or name of the incoming call. If the caller’s identity is stored in Contacts, the name will appear along with the phone number. Check with your service provider to ensure they offer this feature.

**Speed Dialing**

Speed dialing is a convenient feature that allows you to make phone calls quickly. A number key can be assigned to a specific phone number. By pressing and holding down a number key, your phone will recall the phone number associated from the Contacts list and display it briefly while simultaneously dialing that phone number for you. Please note that Speed Dial Number 1 is set to Voice Mailbox by default and is unchangeable.
Dialing Single Digit Speed
Dials (from 2 to 9)

Press and hold the Speed Dial number.

OR

Enter the Speed Dial number and press TALK.

Dialing Double Digit Speed
Dials (from 10 to 99)

Press the first digit and then press and hold the key of the second digit.

OR

Enter the first and second digits and press TALK.
Entering and Editing Information

Text Input

You can customize and enter text in many of the functions in your phone. Including, but not limited to: the Banner, Calendar, Contacts and more. While entering text, the following are your options:

Key Functions

Left Soft Key:
Press to scroll through the following text input modes: T9Word (T9WORD/T9Word/ T9word) -> Abc (ABC/Abc/abc) -> 123 -> Symbols

Shift Key: Toggle between capitalization modes T9 text : T9Word -> T9WORD -> T9word Abc text : Abc -> ABC -> abc

Next: In T9 mode, press to display other matching words.

Space: Press to complete a word and insert a space.

Clear: Press to delete a single space or character. Hold to delete the whole message.

Punctuation: When entering text or numbers, press to enter punctuation marks or some of available special characters.
Contacts in Your Phone’s Memory

The Basics of Storing Contacts Entries

1. From standby mode enter the phone number you want to save (up to 48 digits).
2. Press Left Soft Key  ➔ Save.
3. Select either Save New or Update Existing.
4. Use  ➔ to highlight a Label and press  ➔ OK.
   Mobile 1/ Home/ Work/
   Mobile 2/ Fax

Phone Numbers With Pauses

When you call automated systems, such as voice mail or credit billing numbers, you often have to enter a series of numbers to navigate through the system. Instead of entering these numbers by hand, you can store the numbers in your Contacts separated by special pause characters (W, P). There are two different types of pauses you can use when storing a number:

Wait (W)
The phone stops dialing until you press Left Soft Key  ➔ Release to advance to the next number.

Pause (P)
The phone waits 2 seconds before sending the next string of digits.

Note
Use Update Existing to add another phone number to a contact already stored in memory.

5. Enter a name for the phone number (up to 22 characters) and press  ➔ OK. A confirmation message is displayed briefly.
Contacts in Your Phone’s Memory

**Storing a Number with Pause or Wait**
1. Press Menu.
2. Press Contacts.
3. Press New Contact.
4. Enter a name (up to 22 characters) and enter a number.
5. Enter the number in any of the labels presented (Mobile 1, Home, Work, Mobile 2 and Fax).
6. Press Right Soft Key Options and select Pause or Wait.
7. Enter additional number(s) then press Save.

**Adding Pause or Wait to an Existing Number**
1. While in Standby mode, press Left Soft Key Contacts to display your Contacts alphabetically.
2. Use to highlight the Contact entry to edit, then press View.
4. Use to highlight the number.
5. Press Right Soft Key Options.
6. Press Wait or Pause.
7. Enter additional number(s), then press Save.

**Searching Your Phone’s Memory**
The phone is able to perform a dynamic search of the contents in your phone’s memory. A dynamic search compares entered letters with the first letters of the Contacts saved. A matching list is displayed in descending order. You can then select a number from the list to call or edit.
Searching by Letter

1. Press Left Soft Key $\rightarrow$ Contacts.
2. Start entering the Contact name.

Scrolling Through Your Contacts

1. Press Left Soft Key $\rightarrow$ Contacts to display your Contacts alphabetically.
2. Use $\uparrow$ to scroll through the list.

Contact Options

1. Press Left Soft Key $\rightarrow$ Contacts.
2. Highlight a contact and press Right Soft Key $\rightarrow$ Options.
3. Select the search criteria (use $\uparrow$ then press $\rightarrow$ OK, or press the corresponding number on the keypad):
   - **1 e** Contact List Search: Select between the two Contact List viewing modes: By Navigation or By Search Window.
   - **2 abc** Send Message: Send a text message or picture message to the selected contact.
   - **3 def** Delete: Delete the selected entry in your Contacts.
   - **4 ghj** Edit: Edit the selected contact information.
   - **5 jkl** Delete Multiple: Selective/ All
   - **6 mno** Send via Bluetooth: Send a contact(vCard) via Bluetooth®. In case Bluetooth® power is not on, a notice pops up to turn Bluetooth® on.
   - **7 pqrs** Set Speed Dial/ Remove Speed Dial: Set a speed dial or remove the speed dial.
Making a Call From Your Phone’s Memory

Once you have stored phone numbers in your Contacts, you can place calls to those numbers quickly and easily.

• By pressing the Left Soft Key Contacts, highlighting a number and pressing TALK.
• By using Speed Dialing

From Contacts

1. Press Left Soft Key Contacts to display your Contacts.

2. Use to select the Contact entry, then press OK.

3. Use to select the phone number.

4. Press TALK to place the call.

From Call History

1. Press Menu.

2. Press 6 recent Recent Calls.

3. Use to select the type of recent call, then press OK.

Missed Calls/ Received Calls/ Dialed Calls/ All Calls

4. Use to select the phone number.

5. Press TALK to place the call.

Speed Dialing

For a single-digit Speed Dial, press and hold the digit or press the digit, then press TALK. For a double-digit Speed Dial, press the first digit and hold the second digit or press the first and second digits, then press TALK.
Messaging

The Force supports up to 160 characters in a text message. The information stored in the message is determined by phone mode and service capability. Other limits such as available characters per message may exist, please check with your service provider for system features and capabilities.

1. New Text Message

Allows you to send text messages, pages, and e-mail transmissions. Each message will be formatted and sent according to the destination address.

The Basics of Sending a Text Message

1. Press OK, 1, 1.
2. Enter the recipient’s address.
3. Press OK to access the message screen.
4. Type your message (text or e-mail).
5. Press OK Send.

A confirmation message is displayed.

Recipient (To:) Field Options

1. Create a new message.
2. Press Right Soft Key Options.
3. Select the option(s) to customize.

Contacts To select a recipient from your Contacts list.
Messaging

**Recent Calls** To select a recipient from your Recent calls.

**Recent Messages Inbox/ Sent**

**Groups** Select a recipient from your Groups.

**Cancel** Cancels editing your message.

4. Complete your message and send or save it.

**Customize Your Text Message Using Options**

While you are composing the text of a message you can insert customized text.

1. Create a new message.

2. Use 📅 to highlight the Text Entry field and then press 📖.

3. Press Right Soft Key ➕ Options.

4. Select the option(s) to customize.

**Add** Template/Signature

**Save As** Draft/Template

**Priority Level** Normal/High

**Callback #** On/Off

**Delivery Notice** On/Off

**Cancel** Cancels your message.

5. Complete your message and send or save it.
Message Icon Reference

- Draft Picture Message

---

2. **New Picture Message**

Allows you to send messages with Text, Image/Video and Audio.

1. Press \( \text{Menu} \), \( \text{1} \), \( \text{2 abc} \).

2. Enter the recipient’s address, or press Right Soft Key \( \text{Options} \) to search Contacts.

3. Press \( \text{OK} \) to access the text field.

4. Type your message.

5. With the highlight on Image/Video, press Left Soft Key \( \text{Add} \), highlight an option, and press \( \text{OK} \) to select: Image/Video/Take Photo/Record Video

6. Use \( \text{OK} \) to highlight a file, then press Left Soft Key \( \text{Set} \).
7. With the highlight on Audio, press Left Soft Key Add.

8. Use to highlight a sound, then press Left Soft Key Set.

9. Use Right Soft Key Options to customize the message. The options (below) are available:

   * Editing the Receiver
     Contacts/ Recent Calls/ Recent Messages/ Groups/ Cancel
   * Editing the Text
     Preview/ Add/ Go to/ Save As/ Priority Level/ Delivery Notice/ Remove/ Cancel
   * Editing the Image/Video
     Preview/ Add Slide/ Go to/ Save As Draft/ Priority Level/ Delivery Notice/ Remove/ Cancel

   * Editing the Audio
     Preview/ Add Slide/ Go to/ Save As Draft/ Priority Level/ Delivery Notice/ Remove/ Cancel

   * Editing the Subject
     Preview/ Add/ Go to/ Save As/ Priority Level/ Delivery Notice/ Remove/ Cancel

11. Press to send.

3. Inbox

   The phone alerts you in 2 ways when you receive a new message by:
   
   * Displaying a notification message on the screen.
Displaying the message icon (It blinks when the message is urgent).

Received messages are displayed from newest to oldest.

Viewing Your Inbox

Up to 200 (100 SMS and 100 MMS) received messages can be stored in the Inbox.

1. Press , 1  , 3 .
2. Use ‖ to highlight an Inbox message.
3. Press Left Soft Key Reply to reply, Chat to view the conversation with the sender in Chat view. Or, press the Right Soft Key Options to view the message and access additional options.

If you select View, options are:
Delete/ Forward/ Save Contact/ Save as Templates/ Call Back/ Go to Website/ Lock/Unlock/ Message Info

Note
When in a chat session, press Left Soft Key Reply to reply, or Right Soft Key Options to view additional options.

4. Sent

Up to 100 (50 SMS + 50 MMS) can be stored in the Sent folder. View the contents of sent messages and verify whether the transmission was successful or not.

1. Press , 1  , 4 .
2. Use ‖ to highlight a message, then press . While viewing the selected message, press Left Soft Key Reply

Note
For multimedia messages, press ‖ to view the message.
Messaging

Resend to resend press Right Soft Key  Options.
Options vary depending on the type of message:

Play Again

Delete Deletes the selected message.

Forward Forwards a received message to other destination address(es).

Save Contact Save New/ Update Existing

Save as Templates

Save Media Image/ Audio

Lock/Unlock Locks or unlocks the selected message.

Go to Website

Message Info Show the message’s Type, Priority, and Status.

5. Drafts
Displays saved messages and draft messages.

1. Press , 5 .

2. Use  to highlight a Draft/Saved message. Press Right Soft Key  Options for the following options:

Delete Deletes the selected message from the Drafts.

Save Contact Save New/ Update Existing

Lock/Unlock Locks a message so that it is not erased if the Erase Saved or Erase All feature is used.

Delete Multiple Selective/ All

Press Right Soft Key  Options to see the options. If viewing an SMS, the following options are available:
Add/ Save As/ Priority Level/ Callback #/ Delivery Notice/ Cancel

4. Press \(\textcolor{red}{\text{OK}}\) to send the edited message.

6. Voicemail
Allows you to view new voice messages recorded in your voice mail box. Your phone will alert you when you receive a new voice message.

Checking Your Voicemail Box
1. Press \(\textcolor{red}{\text{Menu}}\), \(\textcolor{red}{1} \), \(\textcolor{red}{6\text{mno}}\).
2. Choose from the following options:
   - Press Left Soft Key \(\textcolor{red}{\text{Clear}}\) to clear the voice mail count.
   - Press \(\textcolor{red}{\text{Talk}}\) to listen to the message(s).

7. Templates
Allows you to display, edit, and add text phrases. These text strings allow you to reduce manual text input into messages.

1. Press \(\textcolor{red}{\text{Menu}}\), \(\textcolor{red}{1} \), \(\textcolor{red}{7\text{pms}}\).
2. Press Left Soft Key \(\textcolor{red}{\text{New}}\) to create a new template.
   Enter text and press \(\textcolor{red}{\text{OK}}\) to save the template.
3. Highlight a template and press Right Soft Key \(\textcolor{red}{\text{Options}}\), then highlight an option and press \(\textcolor{red}{\text{OK}}\) to select:
   Delete/Edit

8. Settings
Allows you to configure settings for Messaging.
1. Press \(\textcolor{red}{\text{Menu}}\), \(\textcolor{red}{1} \), \(\textcolor{red}{8\text{tuv}}\).
2. Select All Messages/ Text Message/ Picture Message/ Edit Voicemail # then press \( \text{OK} \).

3. Use \( \text{SEL} \) to highlight one of the settings and press \( \text{OK} \) to select it.

**Message Settings Sub-Menu Descriptions**

**All Messages**

1. **Auto Save (Auto Save/ Prompt/ Do Not Save)**
   With this feature on, messages are automatically saved in Sent when transmitted.

2. **Auto Delete (On/ Off)**
   With this feature on, read messages are automatically deleted when you exceed the storage limit.

3. **Entry Mode**
   Allows you to select the default input method between T9Word, Abc and 123.

4. **Signature (On/ Off/ Edit)**
   Allows you to make/edit a signature to automatically send with your messages.

5. **Speed Messaging (On/ Off)**
   Allows you to send messages quickly to your Speed Dial contacts. Create a message and enter the text and content. Then, instead of entering a number or contact, press and hold down the Speed Dial number; the message will automatically be sent to that Speed Dial contact.
Text Message

1. Auto View (On/ Off)
   When set to On, new messages will automatically display on your screen when they are received.

2. Auto Play (On/ Off)
   Allows the display to automatically scroll down while viewing messages.

3. Callback # (On/ Off/ Edit)
   With this feature on, you can input the callback number that will automatically be included when you send a message.

Picture Message

1. Auto Receive (On/ Off)
   With this set to On, attached content will automatically download when a new picture message is received.

Edit Voicemail #

Allows you to manually enter the access number for Voicemail Service. This feature should only be used when a VMS (Voicemail Service) access number is not provided from the network.

9. Delete All

Allows you to erase the messages stored in your Inbox, Sent, or Drafts message folders. You can also erase all messages at the same time.

1. Press , ,.
2. Select Delete Inbox/ Delete Sent/ Delete Drafts/ Delete All Messages then press .
3. Highlight Yes or No and press .
BREW

BREW allows you to do more than just talk on your phone. Brew is a technology and service that allows you to download and use applications on your phone. With BREW, it is quick and easy to personalize your phone to suit your lifestyle and tastes. Just download the applications that appeal to you. With a wide range of software available, from ringtones to games to productivity tools, you can be assured that you will find something useful, practical, or down right entertaining.

Downloading Applications

You can download applications and use BREW anywhere on the network, as long as your handset has a digital signal available. Most applications do not use a network connection while in use.

Incoming Calls

While downloading an application, incoming calls will automatically be sent to your voice mail, if available. If you do not have voice mail, downloading will not be interrupted by an incoming call, and the caller will receive a busy signal. When using applications, an incoming call will automatically pause the application and allow you to answer the call. When you complete your call, you can resume using the application.

1. BREW Apps

Allows you to download selected applications while displaying the BREW Apps application list relayed from the Brew Apps server connection.

1. Press \( \text{OK} , 2_{\text{abc}} \).
2. Read the notification, and press \( \text{Menu} \) to continue.

3. Highlight my apps and press \( \text{Menu} \) \( \text{Ok} \).
   - or -
   Press \( \text{Menu} \) to switch between the tabs, then highlight Browse Catalog or Search, and press \( \text{Menu} \) \( \text{Ok} \).

**Shortcut**
While in Standby mode, pressing \( \text{Menu} \) will start Brew Apps.

**Note**
If you attempt to download an application when the file memory is full, the following message will be displayed: "File Memory is full. To make enough storage space to install this app, the following app(s) will be temporarily disabled: ... You can restore disabled apps by simply starting them, at no additional cost. Proceed?". If you select Yes, the app(s) will be temporarily disabled.

---

2. **BREW Info**

Allows you to set the Airtime Charge Warning message that pops up when BREW Apps is started to ON or OFF.

1. Press \( \text{Menu} \) and \( \text{1} \) \( \text{8} \) Messaging.

2. Then press \( \text{Menu} \) \( \text{Ok} \).

3. Press \( \text{2} \) \( \text{abc} \).

4. Press Left Soft Key \( \text{Exit} \) Yes, or Right Soft Key \( \text{Exit} \) No.

---

**Managing Your Brew Apps Applications**

Download new applications and delete old ones at anytime.

**Deleting Applications**

Only removing an application deletes it completely from the memory of the phone. To restore an application once it has been deleted, you will be charged to download it again.
1. Navigate to Brew Apps.

2. Highlight the application you wish to delete and press Left Soft Key Options.

3. Use to highlight Delete and press .

4. Press Left Soft Key Yes.

1. Press , .

2. If an Airtime Charge notification pops up. Press to continue or to exit.

3. After a few seconds, you will see the home page.

Web

The Web feature allows you to view Internet content. Access and selections within this feature are dependent upon your service provider. For specific information on Web access through your phone, contact your service provider.

1. StartBrowser

Allows you to initiate an Web session.

Navigating Through the Browser

On-screen items may be presented in one of the following ways:

- Numbered options

  You can use your numeric keypad or you can select the items by moving the cursor and pressing the appropriate Soft Key(s).
• **Links embedded in content**
  You can act on the options or the links by using the Soft Keys at the bottom of the display screen.

• **Text or numbers**
  You can select the items by moving the cursor and pressing the appropriate Soft Keys.

**Scrolling**

Use ⬆️ to scroll through the content if the current page does not fit on one screen. The currently selected item is indicated by a cursor on the screen.

**Fast Scrolling**

Press and hold ⬆️ to quickly move the cursor up and down on the current screen.

**Scrolling by Page**

Press the Side Keys to move or down one page at a time.

**Soft Keys**

To navigate to different screens or select special functions, use the Soft Keys. The function associated with the Soft Keys can change for each page and depends on each highlighted item.

**Left Soft Key** ⬇️

Left Soft Key ⬇️ is used primarily for first options or selecting an item but its function may change, depending on the content displayed.

**Right Soft Key** ⬇️

Right Soft Key ⬇️ is used primarily for secondary options or a menu of secondary options.
Entering Text, Numbers, or Symbols

When prompted to enter text, the current text entry method appears above the Right Soft Key as abc, Sym, 123, etc. To change the input mode, press the Right Soft Key. To change to upper case, press #. 

Clearing Out Text/Number Entered

When entering text or numbers, press BACK to clear the last number, letter, or symbol. Press and hold BACK to clear the input field completely.

Initiating a Phone Call From Mobile Web

You can make a phone call from Mobile Web if the site you are using supports the feature.

The browser connection is terminated when you initiate the call. After you end the call, your phone returns to the screen from which you initiated the call.

2. Web Settings

Allows you to select a browser alert sound.

1. Press OK, and Messaging.

2. Then press (twice) until you get to the Web menu.

- Select a Message Notification option:
  
  Automatic/ Prompt

- Select an Alert option:
  
  Prompt/ Alert Beep
Multimedia

View, take, and trade your digital pictures and video right from your wireless phone.

1. Take Photo

1. Press \( \text{OK} \), \( \text{4} \), \( \text{1} \).

2. Set the brightness using \( \uparrow \), zoom using \( \downarrow \) and press Right Soft Key \( \text{Options} \) to change other settings.

Select from the available options (below):

- **Switch to Camcorder**
  Changes from camera mode to video mode.

- **Resolution** 1200x1600/960x1280/480x640/240x320/144x176/120x160

- **Quality** Fine/Normal/Economy

- **Zoom**

- **Brightness**

- **Night Mode** On/Off

- **Self Timer** Off/3 Seconds/5 Seconds/10 Seconds

Notes

- The displayed number directly above the set resolution is the estimated number of pictures that can be taken with the current camera settings.

- The maximum number of pictures you can take on your phone may vary depending on the types, resolution or all other factors that affect your picture size. Thus, this number will change along with your settings.

- The maximum display number is 9999. If your microSD card can store more than that, the display number will not decrease until the remaining number of pictures that can be taken reaches 9999. This number depends on the Save Options settings in the Memory menu.
Multimedia

White Balance  Auto/ Sunny/ Tungsten/ Cloudy/ Fluorescent

Allows you to view saved images and to select images to customize your phone’s Main Screen, or Picture ID.

1. Press \(\text{Menu}, 4\ ghi, 4\ ghi\).

2. Select My Images/ Default then press \(\text{Menu}\).
Multimedia

3. Highlight the image you want to display.
   - Press Right Soft Key Options to access and apply options.
   - Press View to view the selected image.
   - Press Left Soft Key Send to send the selected image to somebody else. (This option is only available in My Images).

5. Videos
Allows you to access saved video clips.
1. Press , 4ghi , 5jkl .
   - Press Left Soft Key Send to send the selected video clip to somebody else.

6. Audios
 Allows you to access saved audio clips.
1. Press , 4ghi , 6mno .
2. Select the My Ringers folder or one of the files listed, then press .
   - Press Left Soft Key Send to send the selected audio clip to somebody else.
   - Press Play to play the selected audio clip.
   - Press Right Soft Key Options to access and apply options.
7. Shuffle

Allows you to setup the Shuffle function for Wallpapers and Ringtones. See pages 64 and 66 for instructions on how to activate Shuffle.

1. Press `Menu`, `4`, `5`.

2. Highlight the option you wish to select, then press `Menu`.

Ringtone List/Wallpaper List

Notes

Be sure to use only recommended microSD™ cards. Using non-recommended microSD™ cards could cause data loss and damage your phone.

The microSD™ card and its adapter can be easily damaged by improper operation. Please be careful when inserting, removing, or handling it.

Do not remove a microSD™ card while files are being accessed or transferred. It may result in loss or damage of data.
Contacts

The Contacts Menu allows you to store names, phone numbers and other information in your phone’s memory. When you access your Contacts, the number in parentheses represents the number of entries you have stored (up to 1000).

1. New Contact

Allows you to add a new contact to your Contacts list.

Note

Using this submenu, the number is saved as a new Contact. To save the number into an existing Contact, edit the Contact entry.

1. Press ④, ⑤jk, ⑩.

2. Enter the name, then press ⑤.

3. Highlight the field you wish to store the contact information in.

4. Enter the phone number or e-mail address.

5. Continue adding the desired contact information to the entry.

6. When you are finished entering the desired contact information, press ④ Save to save the entry into your Contacts list.

2. Contact List

Allows you to view your Contacts list.

1. Press ④, ⑤jk, ②abc.

2. Choose from the following options:
• Press \( ▲ \) to scroll through your Contacts alphabetically.

• Press Right Soft Key \( ▒ \) Options to select one of the following:
  Contact List Search/ Send Message/ Delete/ Edit/ Delete Multiple/ Send via Bluetooth/ Set Speed Dial

• Press Left Soft Key \( ▒ \) New to store new contact information.

3. Groups

Allows you to view your grouped Contacts, add a new group, change the name of a group, or delete a whole group.

1. Press \( ▯ ▯ \), \( △ 5 jkl \), \( △ 3 def \).
2. Choose from the following options:

• Use \( ▲ \) to highlight a group, then press \( □ □ \) View to view the contacts in the selected group.

• Press Left Soft Key \( ▒ \) New to add a new group.

• Use \( ▲ \) to highlight a group, then press Right Soft Key \( ▒ \) Options to choose from the following options:
  Delete/ Send Message/ Rename Group/ Set Ringtone/ Delete All

4. Speed Dials

Allows you to view your Speed Dials list, designate new Speed Dials, or remove Speed Dial designations entered in your Contacts.

1. Press \( ▯ ▯ \), \( △ 5 jkl \), \( △ 4 ghi \).
Contacts

2. Use \( \uparrow \) to highlight the desired Speed Dial location (or enter the Speed Dial digit), and press \( \text{ Assign} \).

3. Use \( \uparrow \) to highlight the Contact.

4. Use \( \uparrow \) to highlight the number, then press \( \text{ Assign} \). A confirmation message is displayed.

5. My Name Card

Allows you to view all of your personal Contact information including name and phone numbers.

1. Press \( \text{ Edit} \), \( 5 \text{jkl} \), \( 5 \text{jkl} \).

2. Press Left Soft Key \( \text{ Edit} \) to edit the information.

3. Edit the information as desired and press \( \text{ Save} \).

Note

You cannot edit the Mobile 1 field, but you can add additional contact info.
Recent Calls

The Recent Calls Menu is a list of the last phone numbers or Contact entries for calls you missed, received or dialed. It is continually updated as new entries are added to the beginning of the list and the oldest entries are removed from the bottom of the list.

1. Missed Calls

Allows you to view the list of missed calls up to 40 entries.

1. Press \( \text{ MENU} \), \( 6 \text{ mno} \), \( 1 \text{ 8} \).
2. Use \( \uparrow \) to highlight an entry.

2. Received Calls

Allows you to view the list of incoming calls; up to 40 entries.

1. Press \( \text{ MENU} \), \( 6 \text{ mno} \), \( 2 \text{ abc} \).
2. Use \( \uparrow \) to highlight an entry.

3. Dialed Calls

Allows you to view the list of outgoing calls; up to 40 entries.

1. Press \( \text{ MENU} \), \( 6 \text{ mno} \), \( 3 \text{ def} \).
2. Use \( \uparrow \) to highlight an entry.

4. All Calls

Allows you to view a list of the most recent calls.

1. Press \( \text{ MENU} \), \( 6 \text{ mno} \), \( 4 \text{ ghi} \).
2. Use \( \uparrow \) to highlight an entry.

5. Call Timer

Allows you to view the duration of different types of calls.

1. Press \( \text{ MENU} \), \( 6 \text{ mno} \), \( 5 \text{ jkl} \).
2. Use \( \uparrow \) to highlight a call type, then press \( \text{ MENU} \).

Last Call/ Home Calls/ Roam Calls/ All Calls
6. Data

Allows you to view the list of data calls.

1. Press \( \text{OK}, \text{6 mno}, \text{6 mno} \).

2. Use \( \text{ } \) to highlight an entry.

7. Data Counter

Allows you to view total amount received and transmitted data from data calls.

1. Press \( \text{OK}, \text{6 mno}, \text{7 pars} \).

2. Use \( \text{ } \) to highlight a category (from below) list, then press \( \text{OK} \).

   Received Data/ Sent Data/ All Data

Music

Allows you to access songs stored in your memory card. For access to this feature, there should be stored music in your memory card.

1. Press \( \text{OK}, \text{7 pars} \).

2. Highlight the option you wish to select, then press \( \text{OK} \).

   Now Playing/ All Songs/ Playlists/ Recently Played/ Artists/ Genres/ Albums
My Schedule

Allows you to access your Calendar, Notepad, Alarm Clock.

1. Calendar
Allows you to store and access your agenda(s). Simply enter your appointments in the Calendar, and your phone will alert you with a reminder.

1. Press \(\text{OK} \), \(\text{8} \), \(\text{1} \).
2. Use \(\leftarrow, \rightarrow\) to highlight the scheduled day.
   - \(\leftarrow\) Moves cursor to the previous day.
   - \(\rightarrow\) Moves cursor to the next day.
   - \(\uparrow\) Moves to the previous week.
   - \(\downarrow\) Moves to the next week.
3. Press Left Soft Key \(\text{,is} \) \(\text{New}.\)
4. Enter your schedule information including:
   - Set Time
   - Subject
   - Reminder
   - Repeat
   - Repeat End
   - Ringtone
5. Press \(\text{OK} \) \(\text{Save}.\)

2. Notepad
Allows you to add, read, edit, and erase notes to yourself.

1. Press \(\text{OK} \), \(\text{8} \), \(\text{2} \).
2. Press Left Soft Key \(\text{is} \) \(\text{New}\) to write a new note.
3. Type the note, then press \(\text{OK} \) \(\text{Save}.\)
   A confirmation message displays briefly, then displays your list of notes.
My Schedule

Viewing a Notepad Entry

1. Access Notepad and highlight the entry.

2. To delete or edit the notepad entry, press Right Soft Key Options. Then:
   - 1 Edit
   - 2 Delete
   - 3 Delete All

3. Alarm Clock

Allows you to set up to five alarms. At the alarm time, any set alarm will alert you according to your Master Volume settings and Ringtone selection, and an alarm message will be displayed on the LCD screen.

1. Press , , .
2. Use to highlight the alarm and press .
3. Press Left Soft Key Set to set the alarm time.
4. Use to highlight Repeat (recurrence setting).
5. Press to select one of the following:
   - Once/
   - Daily/
   - Mon - Fri/
   - Weekends
6. Use to highlight Ringtones, press Left Soft Key Set and select a ringtone.
7. Press Save.

My Menu

Allows you quick access to your favorite menus. A maximum of 12 items can be stored in My Menu.

1. Press , , .
2. Select the location of your choice by using , then press .
3. Select the menu you wish to add to My Menu by using , then press Set.
The Force is compatible with devices that support the Bluetooth® headset, hands-free profiles, object push, DUN, File Transfer, and phonebook access. You may create and store several pairings within the Force and connect to one device at a time. The approximate communication range for Bluetooth® wireless technology is up to 30 feet (10 meters).

Bluetooth QD ID B015101

1. Paired Devices

Pairing is the process that allows the handset to locate, establish and register 1-to-1 connection with the target device.

For pairing new Bluetooth® device

1. Press OK, , .
2. Follow the Bluetooth® accessory instructions to set the device to pairing mode.

Note

The Bluetooth® features of this handset may not be compatible with all devices which are Bluetooth® enabled; your service provider or handset manufacturer cannot be responsible for compatibility with devices not sold by the service provider or handset manufacturer.

Note

Read user guide of each Bluetooth® accessory that you are trying to pair with your phone because the instructions may be different.
3. Press Left Soft Key Search to search for devices to pair. If Bluetooth power is set to off, you will be prompted to turn power on. Select Yes and press .

4. The device will appear in the Add New Device menu once it has been located. Highlight the device and press .

5. The handset may prompt you for the passkey. Consult the Bluetooth accessory instructions for the appropriate passkey (typically “0000” - 4 zeroes). Enter the passkey and press .

6. Once pairing is successful, select a connection preference (Always Ask/Always Connect).

7. Once connected, you will see the device listed in the Paired Devices menu.

2. Power
Allows you to set the power On/Off.

1. Press , , .

2. Use to select a setting, then press .

   On/ Off

**Note**
By default, your device’s Bluetooth functionality is turned off.

3. My Visibility
Allows you to set the visibility of your Bluetooth function.

1. Press , , .

2. Use to select a setting, then press .

   Options are:

   Visible/ Hidden
4. My Bluetooth Name

Allows you to edit the name of the Bluetooth® device.

1. Press \[ OK, \] \[ \] \[ shi \].
2. Hold down \[ BACK \] to clear the existing name.
3. Use the alphanumeric keypad to enter a new alias.
4. Press \[ OK \] to save and exit.

5. My Bluetooth Info

Allows you to view the Bluetooth® information on your device.

1. Press \[ OK, \] \[ \] \[ 5 ] .

Note

If you turn on My Visibility, your device is able to be searched by other in-range Bluetooth® devices.

Tools

Your phone tools include Voice Command, Ez Tip Calc, Calculator, World Clock, Stopwatch and Unit Converter.

1. Voice Command

Allows you to make phone calls quickly and easily by voice. This menu includes many convenient voice commands and features for those who are driving or who may be blind. It delivers time information by voice and allows you to check missed calls, messages and voicemails.

1. Press \[ OK, \] \[ 0 \] \[ 1 \].
2. Select \[ 5 \] Start Command.
3. When prompted, activate an option by speaking into the microphone one of the following options. Please note
that you maybe prompted for additional input, as necessary:

Call <Name> or <Number>/Voicemail/ Missed Calls/ Messages/ Time & Date/ Help

2. Ez Tip Calc
Allows you to quickly and easily estimate the tip and total amount of a bill by inputting the bill amount before tip, the tip percentage, and dividing it by the number of people paying.

1. Press , , .

3. Calculator
Allows you to perform simple mathematical calculations. You can enter numbers up to the sixth decimal place.

1. Press , , .

2. Enter data.

- Use keypad to enter numbers.
- Use \_\_\_\_\_\_\_\_\_\_ to enter decimals.
- Use \_\_\_\_\_\_\_\_\_\_ to negative/positive data.
- Press Left Soft Key \_\_\_\_\_\_\_\_\_\_ Clear to erase the entry.
- Press Right Soft Key \_\_\_\_\_\_\_\_\_\_ Operator for additional calculating options.
- Use Navigation Keys to enter functions.
- Press \_\_\_\_\_\_\_\_\_\_ to complete equation.

4. World Clock
Allows you to determine the current time in another time zone or country.
1. Press ☐, 0, 4riet.

2. Press Right Soft Key  şeh Cities to select a specific city and display the date/time in that location.

3. Use ↳ to scroll through all available cities on the map.

4. Press ☐ to select the highlighted city.

5. Press Left Soft Key 设置 DST to select Daylight Savings Time settings.

5. Stopwatch

- You can use the Lap function by pressing Right Soft Key  şeh Lap to record up to 20 laps and lap times.

3. Press Left Soft Key  ɾ Reset to reset.

6. Unit Converter

- Allows you to convert units of measure for Area, Length, Temperature, Mass, Volume and Velocity.

1. Press ☐, 0, 6mea.

2. Once you select one of the options. Use ↳ to select a field and enter the unit amount. The conversions will be made automatically.

5. Stopwatch

- Allows you to use your phone as a Stopwatch.

1. Press ☐, 0, 5iki.

2. Press ☐ Start to start, and press ☐ Stop to stop.
Settings

1. Sound
Options to customize your phone’s sounds:

Allows you to enter a string of characters which display on the LCD screen.
1. Press \( \text{Menu} \), \( \# \text{abc} \), \( 2 \text{abc} \), \( 2 \text{abc} \).

2. Select \textbf{On/ Off}.

3. Enter your banner text, then press \( \text{Menu} \) \textbf{Save}.

\textbf{2.3 Backlight}

Allows you to set the duration for illuminating the backlight.

1. Press \( \text{Menu} \), \( \# \text{abc} \), \( 2 \text{abc} \), \( 3 \text{def} \).

2. Select a submenu, then press \( \text{Menu} \).

   \textbf{Display/ Keypad}

3. Use \( \uparrow \) to select a setting, then press \( \text{Menu} \).

\textbf{2.4 Menu Style}

Allows you to view the main Menu as an Icon or List display.

1. Press \( \text{Menu} \), \( \# \text{abc} \), \( 2 \text{abc} \), \( 4 \text{ghi} \).

2. Select \textbf{Icon} or \textbf{List} and press \( \text{Menu} \).

\textbf{2.5 Languages}

Allows you to use the bilingual feature according to your preference. Choose between English and Spanish.

1. Press \( \text{Menu} \), \( \# \text{abc} \), \( 2 \text{abc} \), \( 5 \text{kl} \).

2. Use \( \uparrow \) to select \textbf{English} or \textbf{Spanish}, then press \( \text{Menu} \).

\textbf{2.6 Clocks & Calendar}

Allows you to select the type of clocks displayed on the main LCD.

1. Press \( \text{Menu} \), \( \# \text{abc} \), \( 2 \text{abc} \), \( 6 \text{mn} \).

2. Choose a setting and press \( \text{Menu} \).

   \textbf{Normal Clock/ Analog Clock/ Digital Clock/ Dual Clock/ Calendar/ Off}

\textbf{2.7 Font Settings}

Allows you to select the type of font displayed on LCD.
1. Press , , , 2abc , 7pqrs .

2. Choose a sub-menu and press OK .

Font Type/ Dial Font Style/ Dial Font Size

3. Use ↑ to highlight an option, then press OK .

Options for Font Type
LG Arial/ LG Script/ LG Serif

Options for Dial Fonts Style
Robot/ Green Lawn/ Painter/ Basic

Options for Dial Fonts Size
Normal/ Large

2.8 Color Schemes
Allows you to choose the color scheme for your phone and menus.

1. Press , , , 2abc , 8tuv .

2. Select Black/ White then press OK .

2.9 Name Match for Dialing
Matches a saved Contact entry with the corresponding letters entered on the Dialing screen after 3 characters are entered.

1. Press , , , 2abc , 9wxyz .

2. Select On/ Off then press OK .

3. Security
The Security menu allows you to secure the phone electronically.

3.1 Lock Phone
Keeps your phone from unauthorized use. Once the phone is locked, it is in restricted mode until the lock code is entered. You can receive phone
calls and still make emergency calls. You can modify the lock code by setting a New Lock code within the Security menu.

1. Press \( \text{Menu} \), \( \# \), \( 3 \text{def} \).

2. Enter the four-digit lock code and press \( \text{Ok} \).

The default lock code is commonly the last 4 digits of your phone number.

3. Press \( 1 \text{abc} \) Lock Phone.

4. Use \( \uparrow \) to select an option, then press \( \text{Ok} \).

**Unlock** The phone will remain unlocked.

**Lock** The phone is always locked. When locked, you can receive incoming calls and make only emergency calls.

**On Power Up** The phone is locked when it is turned on.

3.2 Restrictions

Allows you to restrict incoming and/or outgoing calls.

1. Press \( \text{Menu} \), \( \# \), \( 3 \text{def} \).

2. Enter the four-digit lock code and press \( \text{Ok} \).

3. Press \( 2 \text{abc} \) Restrictions.

4. Enter the four-digit lock code and press \( \text{Ok} \).

5. Use \( \uparrow \) to select **Incoming Calls**, **Outgoing Calls**, **Incoming Messages**, **Outgoing Messages**, **Camera**, **Data**, then press \( \text{Ok} \).

3.3 Emergency #s

Allows you to enter 3 emergency numbers. You can call these emergency numbers and 911, even when the phone is locked or restricted.
Settings

1. Press \( \textup{OK}, \# \textup{menu}, 3 \textup{def} \).

2. Enter the four-digit lock code and press \( \textup{OK} \).

3. Press \( 3 \textup{def} \) Emergency #s.

4. Press \( \textup{OK} \) to edit the emergency numbers.

3.4 Change Lock Code

Allows you to enter a new four-digit lock code.

1. Press \( \textup{OK}, \# \textup{menu}, 3 \textup{def} \).

2. Enter the four-digit lock code and press \( \textup{OK} \).

3. Press \( 4 \textup{ghi} \) Change Lock Code.

4. Select Phone Only and/or Call & Applications.

5. Enter a new 4-digit lock code and press \( \textup{OK} \). Please note that for Call & Applications you will first be asked to enter your current Lock Code before entering the new one.

6. For confirmation, it will ask you to enter the new lock code again.

3.5 Reset Default

Allows you to reset your phone to the factory default settings.

1. Press \( \textup{OK}, \# \textup{menu}, 3 \textup{def} \).

2. Enter the four-digit lock code and press \( \textup{OK} \).

3. Press \( 5 \textup{jkl} \) Reset Default.

4. Read the displayed message and press \( \textup{OK} \) to continue.

5. A message will pop up that says “All settings will revert to factory default.” Select: Revert/ Cancel

4. Call Settings

The Call Settings menu allows...
you to designate how the phone handles both incoming and outgoing calls.

4.1 Answer Options
Allows you to determine how to handle an incoming call.

1. Press \( \text{Menu} \), \( \# \), \( 4 \text{ghi} \), \( 1 \text{abc} \).
2. Use \( \uparrow \) to select a setting, then press \( \text{Ok} \).

   Slide Open/ TALK Key Only/
   Slide Open & Any Key/ Auto
   Answer

4.2 End Call Options
Allows you to determine how the phone will disconnect a call.

1. Press \( \text{Menu} \), \( \# \), \( 4 \text{ghi} \), \( 2 \text{abc} \).
2. Use \( \uparrow \) to select a setting, then press \( \text{Ok} \).

   Slide Down/ END Key Only

4.3 Auto Retry
Allows you to set the length of time the phone waits before automatically redialing a number when the attempted call fails.

1. Press \( \text{Menu} \), \( \# \), \( 4 \text{ghi} \), \( 3 \text{def} \).
2. Use \( \uparrow \) to select a setting, then press \( \text{Ok} \).

   Off/ Every 10 Seconds/
   Every 30 Seconds/ Every 60
   Seconds

4.4 One-Touch Dial
Allows you to initiate a speed dial call by pressing and holding the speed dial digit. If set to Off, Speed Dial numbers can only be called by pressing the number, then pressing the \( \text{TALK} \) key.

1. Press \( \text{Menu} \), \( \# \), \( 4 \text{ghi} \), \( 4 \text{ghi} \).
2. Use \( \uparrow \) to select a setting, then press \( \text{Ok} \).

   On/ Off
4.5 Voice Privacy

Allows you to set the voice privacy feature for CDMA calls as Enhanced or Standard. CDMA offers inherent voice privacy. Check with your service provider for availability.

1. Press , , , .
2. Use to select a setting, then press .

Enhanced/ Standard

4.6 Airplane Mode

Only allows you to use features on your phone that do not require wireless communications.

1. Press , , , .
2. Read the displayed message and press to continue.

TTY Full/ TTY + Talk/ TTY + Hear/ TTY Off

4.7 TTY Mode

Allows you to attach a TTY (Teletype writer) device, enabling you to communicate with parties also using a TTY device. A phone with TTY support is able to translate typed characters to voice. Voice can also be translated into characters and then displayed on the TTY.

1. Press , , , .
2. Read the displayed message and press to continue.
3. Use to select a setting, then press .

TTY Full/ TTY + Talk/ TTY + Hear/ TTY Off

5. PC Connection

Allows you to select the data port.

1. Press , , , .
2. Use to select a setting,
then press OK.

USB Modem/ USB Mass Storage/ Setting Reminder

Using **Force** USB Drive Mode

**Note**
- Users who use a memory card reader do not require a USB cable and do not need to follow all those steps.
- The supported files may vary depending on the software version of your phone.

Requirements:
- **Force** Phone
- **Force** USB Cable
- microSD™ card installed on the phone
- Windows XP®/ Vista Computer

Steps to using USB Mass Storage mode:
1. Make sure that USB Cable drivers are installed.
2. After installing the USB cable drivers, connect the cable to the computer and attach the phone. Allow the computer to detect the phone’s USB drivers and install them.
3. Make sure the microSD™ card has been formatted on the phone so the required folders can be created for use with your phone. To format the memory card using the phone, press **Menu** > **Settings** > **Memory**, **Card Memory** and select **Format**. Select **YES** to format the microSD™ card.
4. Using the USB cable, connect the phone to the PC. Select **USB Mass Storage** when the PC Connection prompts you. A prompt will be displayed...
stating “PC Connection Set”. Press END key to return to standby screen. After a few seconds, a new explorer window should pop up on the computer screen. If there are different types of files on the memory card, a **Removable Disk** window will pop-up. If this occurs, select the **Open folder to view files** option.

5. Within this folder, different media folders will appear. Each folder will contain a different type of media file saved on the phone:
- My_Audios
- My_Images
- My_Music
6. The music player files will need to be copied into the music folder. Please note that the Music Player only supports MP3 files, AAC files, AAC+ files. (Not enhanced AAC files)

7. Once you are done transferring files, disconnect the phone. When you launch Music Player or go into My Media folders, an “Initializing...” message will pop up on the phone while it refreshes the memory card contents.

6. System

The System menu allows you to designate specific system network settings.

6.1 Network

6.1.1 System Select

Allows you to set up the phone producer’s management environment. Leave this setting as the default unless you want to alter system selection as instructed by your service provider.

1. Press , , , , .

2. Use to select Home Only/ Automatic A/ Automatic B then press .

6.1.2 Set NAM

Allows you to select the phone’s NAM (Number Assignment Module) if the phone is registered with multiple service providers.

1. Press , , , , , 6 , , 1 , 2 .
Settings

2. Use \( \uparrow \) to select **NAM1** or **NAM2**, then press \( \text{OK} \).

6.1.3 Auto NAM

Allows the phone to automatically switch between programmed telephone numbers corresponding to the service provider area.

1. Press \( \text{OK} \), \#, 6, 1, 3.
2. Use \( \uparrow \) to select **On** or **Off**, then press \( \text{OK} \).

6.1.4 Serving System

Identifies the channel number of a system that is served as a SID Number. This information should only be used for technical support.

1. Press \( \text{OK} \), \#, 6, 1, 4.

6.2 Location

Allows you to turn On or Off the Location function on your phone. If set to On, location-based services are able to access your GPS (Global Positioning System) satellite-assisted location information.

1. Press \( \text{OK} \), \#, 6, 2.
2. Use \( \uparrow \) to select a setting, then press \( \text{OK} \).

**Location On/ E911 Only**

**Note**

GPS satellite signals are not always transmitted, especially under bad atmospheric and environmental conditions, indoors etc.
7. Memory
Allows you to check memory and set memory-related options.
1. Press \( \text{OK} \), \( \# \), \( 7 \).
2. Select Save Options/ Phone Memory/ Card Memory.

8. BREW & Web
Allows you to view and choose BREW and Web info and settings.
1. Press \( \text{MENU} \), \( \# \), \( 8 \).
2. Select BREW Info/ Web Settings.

9. Phone Info
The Phone Info menu provides you with specific information pertaining to your phone model.
1. Press \( \text{OK} \), \( \# \), \( 9 \).
2. Select a submenu.
   - My Number/ ESN/MEID/ Icon Glossary/ Version
Safety

TIA Safety Information

The following is the complete TIA Safety Information for wireless handheld phones.

Exposure to Radio Frequency Signal

Your wireless handheld portable phone is a low power radio transmitter and receiver. When ON, it receives and sends out Radio Frequency (RF) signals.

In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

- ANSI C95.1 (1992) *
- NCRP Report 86 (1986)
- ICNIRP (1996)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1).

The design of your phone complies with the FCC guidelines (and those standards).

Antenna Care

Use only the supplied or an approved replacement antenna.
Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

**Phone Operation**

NORMAL POSITION: Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

**Tips on Efficient Operation**

For your phone to operate most efficiently:
Don’t touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

**Driving**

Check the laws and regulations on the use of wireless phones in the areas where you drive and always obey them. Also, if using your phone while driving, please observe the following:

- Give full attention to driving -- driving safely is your first responsibility;
- Use hands-free operation, if available;
- Pull off the road and park before making or answering a call if driving conditions or the law require it.

**Electronic Devices**

Most modern electronic equipment is shielded from RF signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.
Pacemakers

The Health Industry Manufacturers Association recommends that a minimum separation of six (6) inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.

Persons with pacemakers:

- Should ALWAYS keep the phone more than six (6) inches from their pacemaker when the phone is turned ON;
- Should not carry the phone in a breast pocket;
- Should use the ear opposite the pacemaker to minimize the potential for interference;
- Should turn the phone OFF immediately if there is any reason to suspect that interference is taking place.

Hearing Aids

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider (or call the customer service line to discuss alternatives).

Other Medical Devices

If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.
Health Care Facilities

Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may use equipment that could be sensitive to external RF energy.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Posted Facilities

Turn your phone OFF in any facility where posted notices so require.

Aircraft

FCC regulations prohibit using your phone while in the air. Switch OFF your phone before boarding an aircraft.

Blasting Areas

To avoid interfering with blasting operations, turn your phone OFF when in a “blasting area” or in areas posted: “Turn off two-way radio”. Obey all signs and instructions.

Potentially Explosive Atmosphere

Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive
atmosphere are often, but not always marked clearly. Potential areas may include: fueling areas (such as gasoline stations); below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles (such as grain, dust, or metal powders); and any other area where you would normally be advised to turn off your vehicle engine.

For Vehicles Equipped with an Air Bag

An air bag inflates with great force. DO NOT place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

Safety Information

Please read and observe the following information for safe and proper use of your phone and to prevent damage. Also, keep the user guide in an accessible place at all times after reading it.

Caution! Violation of the instructions may cause minor or serious damage to the product.

Charger and Adapter Safety

- The charger and adapter are intended for indoor use only.
- Insert the battery pack charger vertically into the wall power socket.
- Use the correct adapter for
your phone when using the battery pack charger abroad.

- Only use the approved battery charger. Otherwise, you may cause serious damage to your phone.

**Battery Information and Care**

- Please dispose of your battery properly or take it to your local wireless carrier for recycling.
- The battery doesn’t need to be empty before recharging.
- Use only LG-approved chargers specific to your phone model since they are designed to maximize battery life.
- Do not disassemble or short-circuit the battery.
- Keep the battery’s metal contacts clean.
- Replace the battery when it no longer provides acceptable performance. The battery can be recharged several hundred times before replacement.
- Recharge the battery after long periods of non-use to maximize battery life.
- Battery life will vary due to usage patterns and environmental conditions.
- Use of extended backlighting, Browser, and data connectivity kits affect battery life and talk/standby times.
- The self-protection function of the battery cuts the power of the phone when its operation is in an abnormal state. In this case, remove the battery from the phone, reinstall it, and turn the phone on.
Safety

Explosion, Shock, and Fire Hazards

- Do not put your phone in a place subject to excessive dust and keep the minimum required distance between the power cord and heat sources.

- Unplug the power cord prior to cleaning your phone, and clean the power plug pin when it’s dirty.

- When using the power plug, ensure that it’s firmly connected. If not, it may cause excessive heat or fire.

- If you put your phone in a pocket or bag without covering the receptacle of the phone (power plug pin), metallic articles (such as a coin, paperclip or pen) may short-circuit the phone. Always cover the receptacle when not in use.

- Don’t short-circuit the battery. Metallic articles such as a coin, paperclip or pen in your pocket or bag may short-circuit the + and – terminals of the battery (metal strips on the battery) upon moving. Short-circuit of the terminal may damage the battery and cause an explosion.

- Do not disassemble or crush the battery. It may cause a fire.

General Notice

- Using a damaged battery or placing a battery in your mouth may cause serious injury.

- Do not place items containing magnetic components such as a credit card, phone card, bank book, or subway ticket near your phone. The magnetism of the phone may
damage the data stored in the magnetic strip.

- Talking on your phone for a long period of time may reduce call quality due to heat generated during use.

- When the phone is not used for a long period time, store it in a safe place with the power cord unplugged.

- Using the phone in proximity to receiving equipment (i.e., TV or radio) may cause interference to the phone.

- Do not use the phone if the antenna is damaged. If a damaged antenna contacts skin, it may cause a slight burn. Please contact an LG Authorized Service Center to replace the damaged antenna.

- Do not immerse your phone in water. If this happens, turn it off immediately and remove the battery. If the phone does not work, take it to an LG Authorized Service Center.

- Do not paint your phone.

- The data saved in your phone might be deleted due to careless use, repair of the phone, or upgrade of the software. Please backup your important phone numbers. (Ring tones, text messages, voice messages, pictures, and videos could also be deleted.) The manufacturer is not liable for damage due to the loss of data.

- When you use the phone in public places, set the ringtone to vibration so you don’t disturb others.

- Do not turn your phone on or off when putting it to your ear.

- Use accessories, such as earphones and headsets, with
Safety

caution. Ensure that cables are tucked away safely and do not touch the antenna unnecessarily.

Warning! Important safety information

Avoiding hearing damage

Permanent hearing loss may occur if you use your phone and/or headset at a high volume. Set the volume to a safe level. You can adapt over time to a higher volume of sound that may sound normal but can be damaging to your hearing. If you experience ringing in your ears or muffled speech, stop listening and have your hearing checked. The louder the volume, the less time is required before your hearing could be affected. Hearing experts suggest that to protect your hearing:

• Limit the amount of time you use your phone and/or headset at high volume.

• Avoid turning up the volume to block out noisy surroundings.

• Turn the volume down if you can’t hear people speaking near you.

For information about how to set a maximum volume limit on your phone, see the features guide for your phone.

Using your phone safely

Use of your phone while operating a vehicle is not recommended and is illegal in some areas. Be careful and attentive while driving. Stop using your phone if you find it disruptive or distracting while operating any type of vehicle or
performing any other activity that requires your full attention.

Avoiding hearing damage

Permanent hearing loss may occur if you use your headset at a high volume. Set the volume to a safe level. You can adapt over time to a higher volume of sound that may sound normal but can be damaging to your hearing. If you experience ringing in your ears or muffled speech, stop listening and have your hearing checked. The louder the volume, the less time is required before your hearing could be affected. Hearing experts suggest that to protect your hearing:

- Limit the amount of time you use headset at high volume.
- Avoid turning up the volume to block out noisy surroundings.
- Turn the volume down if you can’t hear people speaking near you.

For information about how to set a maximum volume limit on your handset, please refer to the features guide for your handset.

Using headsets safely

Use of headsets to listen to music while operating a vehicle is not recommended and is illegal in some areas. Be careful and attentive while driving. Stop using this device if you find it disruptive or distracting while operating any type of vehicle or performing any other activity that requires your full attention.
FDA Consumer Update

The U.S. Food and Drug Administration’s Center for Devices and Radiological Health Consumer Update on Mobile Phones:

1. Do wireless phones pose a health hazard?

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of Radio Frequency (RF) energy in the microwave range while being used. They also emit very low levels of RF when in standby mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

2. What is the FDA’s role concerning the safety of wireless phones?

Under the law, the FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to
emit Radio Frequency (RF) energy at a level that is hazardous to the user. In such a case, the FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace, or recall the phones so that the hazard no longer exists.

Although the existing scientific data do not justify FDA regulatory actions, the FDA has urged the wireless phone industry to take a number of steps, including the following:

- Support needed research into possible biological effects of RF of the type emitted by wireless phones;
- Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and
- Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.

The FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group:

- National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Occupational Safety and Health Administration
- National Telecommunications and Information Administration
The National Institutes of Health participates in some interagency working group activities, as well. The FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. The FCC relies on the FDA and other health agencies for safety questions about wireless phones.

The FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones. Base stations are thus not the subject of the safety questions discussed in this document.

3. What kinds of phones are the subject of this update?

The term “wireless phone” refers here to handheld wireless phones with built-in antennas, often called “cell”, “mobile”, or “PCS” phones. These types of wireless phones can expose the user to measurable Radio Frequency (RF) energy because of the short distance between the phone and the user’s head.

These RF exposures are limited by FCC safety guidelines that were developed with the advice of the FDA and other federal health and safety agencies. When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person’s RF
exposure decreases rapidly with increasing distance from the source. The so-called “cordless phones,” which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures far below the FCC safety limits.

4. What are the results of the research done already?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of Radio Frequency (RF) energy exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that showed increased tumor development used animals that had been genetically engineered or treated with cancer-causing chemicals so as to be pre-disposed to develop cancer in the absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we do not know with certainty what the results of such studies mean for human health. Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuroma, tumors of the brain or
salivary gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phone RF exposures. However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.

5. What research is needed to decide whether RF exposure from wireless phones poses a health risk?

A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but ten or more years follow-up may be needed to provide answers about some health effects, such as cancer. This is because the interval between the time of exposure to a cancer-causing agent and the time tumors develop — if they do — may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.

6. What is the FDA doing to find out more about the possible health effects of
wireless phone RF?
The FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to Radio Frequency (RF) energy.

The FDA has been a leading participant in the World Health Organization International Electro Magnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The project has also helped develop a series of public information documents on EMF issues. The FDA and the Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research And Development Agreement (CRADA) to do research on wireless phone safety. The FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through contracts with independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

7. How can I find out how much Radio Frequency energy exposure I can get by using my wireless phone?
All phones sold in the United States must comply with Federal Communications Commission (FCC) guidelines that limit Radio Frequency (RF) energy exposures. The FCC established these guidelines in consultation with the FDA and the other federal health and safety agencies. The FCC limit for RF exposure from wireless phones is set at a Specific Absorption Rate (SAR) of 1.6 watts per kilogram (1.6 W/kg). The FCC limit is consistent with the safety standards developed by the Institute of Electrical and Electronic Engineering (IEEE) and the National Council on Radiation Protection and Measurement. The exposure limit takes into consideration the body’s ability to remove heat from the tissues that absorb energy from the wireless phone and is set well below levels known to have effects. Manufacturers of wireless phones must report the RF exposure level for each model of phone to the FCC. The FCC website (http://www.fcc.gov/oet/rfsafety) gives directions for locating the FCC identification number on your phone so you can find your phone’s RF exposure level in the online listing.

8. What has the FDA done to measure the Radio Frequency energy coming from wireless phones?

The Institute of Electrical and Electronic Engineers (IEEE) is developing a technical standard for measuring the Radio Frequency (RF) energy exposure from wireless phones and other wireless handsets with the participation and leadership of FDA scientists and engineers. The standard, “Recommended
Practice for Determining the Spatial-Peak Specific Absorption Rate (SAR) in the Human Body Due to Wireless Communications Devices: Experimental Techniques”, sets forth the first consistent test methodology for measuring the rate at which RF is deposited in the heads of wireless phone users. The test method uses a tissue-simulating model of the human head. Standardized SAR test methodology is expected to greatly improve the consistency of measurements made at different laboratories on the same phone. SAR is the measurement of the amount of energy absorbed in tissue, either by the whole body or a small part of the body. It is measured in watts/kg (or milliwatts/g) of matter. This measurement is used to determine whether a wireless phone complies with safety guidelines.

9. What steps can I take to reduce my exposure to Radio Frequency energy from my wireless phone?

If there is a risk from these products — and at this point we do not know that there is — it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to Radio Frequency (RF) energy. Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure. If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since the exposure level drops off
dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna. Again, the scientific data do not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

10. What about children using wireless phones?

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to Radio Frequency (RF) energy, the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and increasing the distance between the user and the RF source will reduce RF exposure.

Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.
11. What about wireless phone interference with medical equipment?

Radio Frequency (RF) energy from wireless phones can interact with some electronic devices. For this reason, the FDA helped develop a detailed test method to measure Electro Magnetic Interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical Instrumentation (AAMI). The final draft, a joint effort by the FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI.

The FDA has tested hearing aids for interference from handheld wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that no interference occurs when a person uses a “compatible” phone and a “compatible” hearing aid at the same time. This standard was approved by the IEEE in 2000.

The FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, the FDA will conduct testing to assess the interference and work to resolve the problem.
12. Where can I find additional information?

National Radiological Protection Board (UK)
(http://www.hpa.org.uk/radiation/)

10 Driver Safety Tips
Your wireless phone gives you the powerful ability to communicate by voice almost anywhere, anytime. An important responsibility accompanies the benefits of wireless phones, one that every user must uphold.

When operating a car, driving is your first responsibility. When using your wireless phone behind the wheel of a car, practice good common sense and remember the following tips:

1. Get to know your wireless phone and its features such as speed dial and redial. Carefully read your instruction manual and learn to take advantage of valuable features most phones offer, including automatic redial and memory. Also, work to memorize the phone keypad so you can use the
speed dial function without taking your attention off the road.

2. When available, use a hands-free device. A number of hands-free wireless phone accessories are readily available today. Whether you choose an installed mounted device for your wireless phone or a speaker phone accessory, take advantage of these devices if available to you.

3. Make sure you place your wireless phone within easy reach and where you can reach it without removing your eyes from the road. If you get an incoming call at an inconvenient time, if possible, let your voicemail answer it for you.

4. Suspend conversations during hazardous driving conditions or situations. Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow, and ice can be hazardous, but so is heavy traffic. As a driver, your first responsibility is to pay attention to the road.

5. Don’t take notes or look up phone numbers while driving. If you are reading an address book or business card, or writing a “to-do” list while driving a car, you are not watching where you are going. It is common sense. Do not get caught in a dangerous situation because you are reading or writing and not paying attention to the road.
or nearby vehicles.

6. Dial sensibly and assess the traffic; if possible, place calls when you are not moving or before pulling into traffic. Try to plan your calls before you begin your trip or attempt to coincide your calls with times you may be stopped at a stop sign, red light, or otherwise stationary. But if you need to dial while driving, follow this simple tip -- dial only a few numbers, check the road and your mirrors, then continue.

7. Do not engage in stressful or emotional conversations that may be distracting. Stressful or emotional conversations and driving do not mix; they are distracting and even dangerous when you are behind the wheel of a car. Make people you are talking with aware you are driving and if necessary, suspend conversations which have the potential to divert your attention from the road.

8. Use your wireless phone to call for help. Your wireless phone is one of the greatest tools you can own to protect yourself and your family in dangerous situations -- with your phone at your side, help is only three numbers away. Dial 911 or other local emergency number in the case of fire, traffic accident, road hazard, or medical emergency. Remember, it's a free call on your wireless phone!

9. Use your wireless phone to help others in emergencies. Your wireless phone provides you a perfect opportunity to be a “Good Samaritan” in your community. If you see an auto accident, crime in
progress or other serious emergency where lives are in danger, call 911 or other local emergency number, as you would want others to do for you.

10. Call roadside assistance or a special wireless non-emergency assistance number when necessary. Certain situations you encounter while driving may require attention, but are not urgent enough to merit a call for emergency services. But you can still use your wireless phone to lend a hand. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number.

The above tips are meant as general guidelines. Before deciding to use your mobile device while operating a vehicle, it is recommended that you consult your applicable jurisdiction’s local laws or other regulations regarding such use. Such laws or other regulations may prohibit or otherwise restrict the manner in which a driver may use his or her phone while operating a vehicle.

**Consumer Information on SAR**

**(Specific Absorption Rate)**

This Model Phone Meets the Government’s Requirements for Exposure to Radio Waves. Your wireless phone is a radio transmitter and receiver. It is
designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government. These FCC exposure limits are derived from the recommendations of two expert organizations, the National Counsel on Radiation Protection and Measurement (NCRP) and the Institute of Electrical and Electronics Engineers (IEEE). In both cases, the recommendations were developed by scientific and engineering experts drawn from industry, government, and academia after extensive reviews of the scientific literature related to the biological effects of RF energy.

The exposure Limit for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR is a measure of the rate of absorption of RF energy by the human body expressed in units of watts per kilogram (W/kg). The FCC requires wireless phones to comply with a safety limit of 1.6 watts per kilogram (1.6 W/kg). The FCC exposure limit incorporates a substantial margin of safety to give additional protection to the public and to account for any variations in measurements.

Tests for SAR are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below
the maximum value. Because the phone is designed to operate at multiple power levels to use only the power required to reach the network, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model.

This device was tested for typical body-worn operations with the back of the phone kept 0.79 inches (2.0 cm) between the user’s body and the back of the phone. To comply with FCC RF exposure requirements, a minimum separation distance of 0.79 inches (2.0 cm) must be maintained between the user’s body and the back of the phone. Third-party belt-clips, holsters, and similar accessories containing metallic components should not be used. Body-worn accessories that cannot maintain 0.79 inches (2.0 cm) separation distance between the user’s body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines.

The highest SAR value for this
model phone when tested for use at the ear is 1.41 W/kg and when worn on the body, as described in this user’s manual, is 0.686 W/kg. While there may be differences between SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/fccid after searching on FCC ID.

To find information that pertains to a particular model phone, this site uses the phone FCC ID number which is usually printed somewhere on the case of the phone. Sometimes it may be necessary to remove the battery pack to find the number. Once you have the FCC ID number for a particular phone, follow the instructions on the website and it should provide values for typical or maximum SAR for a particular phone.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) website at http://www.ctia.org/

*In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.
FCC Hearing-Aid Compatibility (HAC) Regulations for Wireless Devices

On July 10, 2003, the U.S. Federal Communications Commission (FCC) Report and Order in WT Docket 01-309 modified the exception of wireless phones under the Hearing Aid Compatibility Act of 1988 (HAC Act) to require digital wireless phones be compatible with hearing-aids. The intent of the HAC Act is to ensure reasonable access to telecommunications services for persons with hearing disabilities.

While some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate.

The wireless telephone industry has developed a rating system for wireless phones, to assist hearing device users find phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label located on the box.

The ratings are not guarantees. Results will vary depending on the user’s hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.
Safety

M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

T-Ratings: Phones rated T3 or T4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. T4 is the better/higher of the two ratings.

Hearing devices may also be rated. Your hearing device manufacturer or hearing health professional may help you find this rating. Higher ratings mean that the hearing device is relatively immune to interference noise. The hearing aid and wireless phone rating values are then added together. A sum of 5 is considered acceptable for normal use. A sum of 6 is considered for best use.

In the above example, if a hearing aid meets the M2 level rating and the wireless phone meets the M3 level rating, the sum of the two values equal M5. This is synonymous for T ratings. This should provide the hearing aid user with “normal usage” while using their hearing aid with the particular wireless phone. “Normal usage” in this context is defined as a signal quality that is acceptable for normal operation.
The M mark is intended to be synonymous with the U mark. The T mark is intended to be synonymous with the UT mark. The M and T marks are recommended by the Alliance for Telecommunications Industries Solutions (ATIS). The U and UT marks are referenced in Section 20.19 of the FCC Rules. The HAC rating and measurement procedure are described in the American National Standards Institute (ANSI) C63.19 standard.

The Hearing Aid Compatibility FCC Order
There are a variety of accessories available for your mobile phone. Consult your local dealer for availability. Optional items are sold separately.

**Wall/USB Charger**

**Battery**
Standard battery is available.

**Vehicle Power Charger**
The vehicle power charger allows you to operate the phone and charge the phone’s battery from your vehicle.

**USB Cable**
Limited Warranty Statement

1. WHAT THIS WARRANTY COVERS:

LG offers you a limited warranty that the enclosed subscriber unit and its enclosed accessories will be free from defects in material and workmanship, according to the following terms and conditions:

(1) The limited warranty for the product extends for TWELVE (12) MONTHS beginning on the date of purchase of the product with valid proof of purchase, or absent valid proof of purchase, FIFTEEN (15) MONTHS from date of manufacture as determined by the unit’s manufacture date code.

(2) The limited warranty extends only to the original purchaser of the product and is not assignable or transferable to any subsequent purchaser/end user.

(3) This warranty is good only to the original purchaser of the product during the warranty period as long as it is in the U.S, including Alaska, Hawaii, U.S. Territories and Canada.

(4) The external housing and cosmetic parts shall be free of defects at the time of shipment and, therefore, shall not be covered under these limited warranty terms.

(5) Upon request from LG, the consumer must provide information to reasonably prove the date of purchase.

(6) The customer shall bear the cost of shipping the product to the Customer Service.
Limited Warranty Statement

Department of LG. LG shall bear the cost of shipping the product back to the consumer after the completion of service under this limited warranty.

2. WHAT THIS WARRANTY DOES NOT COVER:

(1) Defects or damages resulting from use of the product in other than its normal and customary manner.

(2) Defects or damages from abnormal use, abnormal conditions, improper storage, exposure to moisture or dampness, unauthorized modifications, unauthorized connections, unauthorized repair, misuse, neglect, abuse, accident, alteration, improper installation, or other acts which are not the fault of LG, including damage caused by shipping, blown fuses, spills of food or liquid.

(3) Breakage or damage to antennas unless caused directly by defects in material or workmanship.

(4) That the Customer Service Department at LG was not notified by consumer of the alleged defect or malfunction of the product during the applicable limited warranty period.

(5) Products which have had the serial number removed or made illegible.

(6) This limited warranty is in lieu of all other warranties, express or implied either in fact or by operations of law, statutory or otherwise,
including, but not limited to any implied warranty of marketability or fitness for a particular use.

(7) Damage resulting from use of non-LG approved accessories.

(8) All plastic surfaces and all other externally exposed parts that are scratched or damaged due to normal customer use.

(9) Products operated outside published maximum ratings.

(10) Products used or obtained in a rental program.

(11) Consumables (such as fuses).

3. WHAT LG WILL DO:
“LG will, at its sole option, either repair, replace or refund the purchase price of any unit that does not conform to this limited warranty. LG may choose at its option to use functionally equivalent re-conditioned, refurbished or new units or parts or any units. In addition, LG will not re-install or back-up any data, applications or software that you have added to your phone. It is therefore recommended that you back-up any such data or information prior to sending the unit to LG to avoid the permanent loss of such information.”

4. STATE LAW RIGHTS:
No other express warranty is applicable to this product. THE DURATION OF ANY IMPLIED WARRANTIES, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY, IS LIMITED TO THE DURATION OF THE EXPRESS WARRANTY HEREIN.
LG SHALL NOT BE LIABLE FOR THE LOSS OF THE USE OF THE PRODUCT, INCONVENIENCE, LOSS OR ANY OTHER DAMAGES, DIRECT OR CONSEQUENTIAL, ARISING OUT OF THE USE OF, OR INABILITY TO USE, THIS PRODUCT OR FOR ANY BREACH OF ANY EXPRESS OR IMPLIED WARRANTY, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY APPLICABLE TO THIS PRODUCT.

Some states do not allow the exclusive limitation of incidental or consequential damages or limitations on how long an implied warranty lasts; so these limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

5. HOW TO GET WARRANTY SERVICE:

To obtain warranty service, please call or fax to the following telephone numbers from anywhere in the continental United States:

Tel. 1-800-793-8896 or Fax. 1-800-448-4026

Or visit http://us.lgservice.com. Correspondence may also be mailed to:

LG Electronics Service- Mobile Handsets
P.O. Box 240007, Huntsville, AL 35824

DO NOT RETURN YOUR PRODUCT TO THE ABOVE ADDRESS. Please call or write for the location of the LG authorized service center nearest you and for the procedures for obtaining warranty claims.
