HELLOMOTO

Introducing your new MOTOROKR™ EM25 wireless phone! It’s a slim, easy-to-use music phone with a sleek design that’s sure to get attention.

- **Rich Music Experience** – Use the music player (page 43) to set your playlist for your morning commute. Or, use the FM Radio (page 46) to listen to your favorite music or news programs. With a stereo wired headset or high quality Bluetooth® stereo headset, listening has never been easier.

- **My Phone, My Way** – Customize your home screen (page 24) with personal pictures taken with your phone’s camera, and download a chart-topping track and use as your ringtone.

- **Connect on So Many Levels** – Whether it’s with work or friends, stay connected with voice (page 17) and messaging (page 40).

- **Camera** – Capture key moments with photos (page 47).

- **Convenient Extras** – When you are away from your home or desk, make use of handy tools like Phonebook, Calculator, Alarm Clock, Calendar, and others (page 60).

- **Fun** – When you have a little time to spare, why not surf the web (page 51) or play a game (page 52)?
Here’s a quick anatomy lesson:
Charge your phone and connect to your PC.

Note: Mini USB headsets are not supported.
A few menu basics:

1. Press and hold the **Power Key** for a few seconds, or until the display lights up, to turn on your phone.

2. Press the **Centre Key** to open the **Main Menu**.

3. Press the **Navigation Key** up, down, left, or right to highlight a menu feature.

4. Press the **Centre Key** to select it.

This is a typical home screen and main menu layout. *Your phone may be a little different.*

Use and Care

To care for your Motorola phone, please keep it away from:

- **liquids of any kind**
  Don’t expose your phone to water, rain, extreme humidity, sweat, or other moisture. If it does get wet, don’t try to accelerate drying with the use of an oven or dryer, as this may damage the phone.

- **dust and dirt**
  Don’t expose your phone to dust, dirt, sand, food, or other inappropriate materials.

- **extreme heat or cold**
  Avoid temperatures below 0°C/32°F or above 45°C/113°F.

- **microwaves**
  Don’t try to dry your phone in a microwave oven.

- **cleaning solutions**
  To clean your phone, use only a dry soft cloth. Don’t use alcohol or other cleaning solutions.

- **the ground**
  Don’t drop your phone.

about this guide

This guide shows how to locate a menu feature as follows:

Find it: ø > Recent Calls > Received Calls

This means that, from the home screen:

1 Press the center key ø to open the main menu.
2 Scroll to Recent Calls and press the center key ø.
3 Scroll to Received Calls and press the center key ø.

Tip: Press the center key ø or Select to select a highlighted option.

symbols

This means a feature is network/subscription dependent and may not be available in all areas. Contact your service provider for more information.

This means a feature requires an optional accessory.
SIM card

Your Subscriber Identity Module (SIM) card contains personal information like your phone number and contacts. It can also contain your voicemail and text message settings.

If you put your SIM card in another phone, that phone uses your phone number.

**Caution:** Don't bend or scratch your SIM card. Keep it away from static electricity, water, and dirt.

**Tip:** Make sure your SIM card is fully inserted into the phone before installing the battery.

memory card

You can use a removable microSD memory card (up to 2 GB) with your phone to store and retrieve multimedia objects, such as music and pictures.

**Note:** Motorola approved SanDisk cards are recommended for cards greater than 1 GB.

**install the memory card**

To install the memory card, make sure the memory card's metal contacts are facing down. Slide the top of the memory card under the metal band and into the holder.
remove the memory card
To remove the memory card, gently but firmly push down on the card and slide out.

battery

battery use and safety
IMPORTANT: HANDLE AND STORE BATTERIES PROPERLY TO AVOID INJURY OR DAMAGE. Most battery issues arise from improper handling of batteries, and particularly from the continued use of damaged batteries.

DON'Ts
• Don’t disassemble, crush, puncture, shred, or otherwise attempt to change the form of your battery.
• Don’t let the phone or battery come in contact with water. Water can get into the phone’s circuits, leading to corrosion. If the phone and/or battery get wet, have them checked by your carrier or contact Motorola even if they appear to be working properly.

• Don’t allow the battery to touch metal objects. If metal objects, such as jewelry, stay in prolonged contact with the battery contact points, the battery could become very hot.

• Don’t place your battery near a heat source. Excessive heat can damage the phone or the battery. High temperatures can cause the battery to swell, leak, or malfunction. Therefore:
  • Do not dry a wet or damp battery with an appliance or heat source, such as a hair dryer or microwave oven.
  • Avoid leaving your phone in your car in high temperatures.
DOs

- Do avoid dropping the battery or phone. Dropping these items, especially on a hard surface, can potentially cause damage.
- Do contact your service provider or Motorola if your phone or battery has been damaged from dropping or high temperatures.

IMPORTANT: USE MOTOROLA ORIGINAL PRODUCTS FOR QUALITY ASSURANCE AND SAFEGUARDS. To aid consumers in identifying authentic Motorola batteries from non-original or counterfeit batteries (that may not have adequate safety protection), Motorola provides holograms on its batteries. Consumers should confirm that any battery they purchase has a "Motorola Original" hologram.

Motorola recommends you always use Motorola-branded batteries and chargers. Motorola mobile devices are designed to work with Motorola batteries. If you see a message on your display such as Invalid Battery or Unable to Charge, take the following steps:

- Remove the battery and inspect it to confirm that it has a "Motorola Original" hologram;
- If there is no hologram, the battery is not a Motorola battery;
- If there is a hologram, replace the battery and retry charging it;
- If the message remains, contact a Motorola Authorized Service Center.

Important: Motorola’s warranty does not cover damage to the phone caused by non-Motorola batteries and/or chargers.

Warning: Use of a non-Motorola battery or charger may present a risk of fire, explosion, leakage, or other hazard.
PROPER AND SAFE BATTERY DISPOSAL AND RECYCLING

Proper battery disposal is not only important for safety, it benefits the environment. Consumers may recycle their used batteries in many retail or service provider locations. Additional information on proper disposal and recycling may be found on the Web:

- www.motorola.com/recycling
- www.rbrc.org/call2recycle/ (in English only)

Disposal: Promptly dispose of used batteries in accordance with local regulations. Contact your local recycling center or national recycling organizations for more information on how to dispose of batteries.

Warning: Never dispose of batteries in a fire because they may explode.
remove the battery

Note: Your battery is intentionally tight fitting to ensure consistent connection.

charge the battery

New batteries are not fully charged. Plug the battery charger into your phone and an electrical outlet. Your phone might take several seconds to start charging the battery. The low battery charging indicator will light and remain ON, until the battery has enough charge to power up the phone display.

The phone shows Charging Complete when finished.

Notes for charging your phone's battery:

- When charging your battery, keep it near room temperature. Never expose batteries to temperatures below 0°C (32°F) or above 45°C (113°F) when charging.
- New batteries are not fully charged.
- New batteries or batteries stored for a long time may take more time to charge.
- Motorola batteries and charging systems have circuitry that protects the battery from damage from overcharging.

Note: You can also use a PC USB port to charge your phone battery. Before connecting your phone to your PC, download and install the charging software driver from www.motorola.com/support.
turn it on & off

To turn on your phone, press and hold for a few seconds or until the display turns on.

If prompted, enter your four-digit unlock code. Your phone's four-digit unlock code is originally set to 1234 or the last four digits of your phone number (see page 21).

To turn off your phone, press and hold for a few seconds.

make a call

Enter a phone number and press to make a call. See page 29 for more calling features.

To hang up, press .

Tip: Is your caller saying they can't hear you? Make sure your finger is not covering the microphone (see page 2).

answer a call

When your phone rings and/or vibrates, press or slide open to answer. See page 25 for answer options.

To hang up, press .

change ring alert

Find it: > > Ring Styles

Available options are Loud, Soft, Vibrating, Vibe & Ring, or Silent (see page 24).
store a number
You can store up to 1000 phone numbers in Phonebook:
1 Enter a number in the home screen, and press Save.
2 Enter a name and other details for the phone number.
3 Press Save to store the number.

call a stored number
Find it: Phonebook
1 Scroll to the entry.
2 Press to call the entry.
Shortcut: In Phonebook, enter the first letters of an entry to get to it quickly.
Tip: Set the Phonebook icon as a Home Screen navigation key for even faster access (see page 24).

your phone number
Find it: Settings > Phone Status > My Tel. Number
Tip: Want to see your phone number while you’re on a call? Press Options > My Tel. Number.
basics

See page 2 for a basic phone diagram.

home screen

When you turn on your phone, the home screen displays.

Note: Your home screen might look a little different from this example.

Soft key labels show the current soft key functions. For soft key locations, see page 2.

Press the navigation key up, down, left, or right to select items in the home screen.

status indicators

Status indicators can appear at the top of the phone:

- Signal Strength
- WAP Active
- Bluetooth
- New Message
- Active Line
- Ring Style
- Battery Level
- GPRS Active: Changes to when connected.
volume keys
Press the volume keys on the side of the phone to:

- Change earpiece or speakerphone volume during a call.
- Change ringtone volume (if the phone is in idle state, not in a call and not playing music).
- Change volume when playing music.

Note: When listening to music using a Bluetooth stereo device (headset or car stereo), use the volume control keys on the device to increase/decrease music volume.

You can also use an optional 3.5 mm wired headset, or Bluetooth® headset, to go handsfree.

Note: Mini USB headsets are not supported.

handsfree
You can use your phone’s handsfree speaker to make calls without holding the phone to your ear. To turn the speaker on during a call, press Spkr on. To turn the speaker off, press Spkr off.

You can also use an optional 3.5 mm wired headset, or Bluetooth® headset, to go handsfree.

memory card
You can store multimedia content, such as songs, and photos, on your phone’s internal memory or on an optional memory card.

Note: You cannot download a copyrighted file and store it on your memory card.

format memory card
You need to format a memory card, using the phone, before using it for the first time. This creates the necessary folders and ensures your phone can read the contents of the card. Your phone will prompt you if you need to format your memory card.
Note: To manually format the memory card press
\\( \text{Settings} \) > Initial Setup > Format Memory Card.

Caution: Formatting the memory card erases all content on the card.

Note: To access music stored on your microSD memory card, press \( \text{MultiMedia} \) > Multimedia > Pictures > All Pictures, then press Options > Switch Storage > Memory Card. All music files are displayed no matter where they are stored. Picture files must be stored in the memory card \text{mobile\Picture} folder. If there are no files stored on your memory card, your phone will automatically switch to its internal memory.

codes & passwords

Your phone’s four-digit security code is originally set to \(1234\) or to the last four digits of your phone number.

Your service provider may reset this code if not, you should change it to protect your personal information. The unlock code must contain four digits.

To change a code or password:

Find it: \( \text{Settings} \) > Security > New Passwords

Note: If you forget your security code, contact your service provider.

lock & unlock phone

You can lock your phone with a four-digit code to keep others from using it.

Note: You can make emergency calls on a locked phone (see page 31). A locked phone still rings or vibrates for incoming calls or messages.

To lock your phone:

Find it: \( \text{Settings} \) > Security > Phone Lock > Lock Now or Automatic Lock
Enter the four-digit unlock code and press OK. Your phone first displays Phone Locked, and then shows Phone Lock Code until the next time you unlock your phone.

To unlock your phone, enter your four-digit code and press OK.

To change phone lock code:

Find it: • > 🎨 Settings > ☑ Security > New Passwords > Phone Lock Code

lock & unlock keypad

The keypad will automatically lock when the slider is closed, if the Keypad Lock Timer is On.

To turn the timer on, press • > 🎨 Settings > ☑ Security > Keypad Lock > Timer > 2 Seconds, 4 Seconds or 8 Seconds.

To unlock your keypad with the slider closed, press any key and select Unlock > OK.

To lock your keypad with the slider open, press and hold *.

redial a number

1 From the home screen, press \( \text{C} \) to see a list of recently dialed calls.
2 Scroll to the entry you want to call and press \( \text{C} \).

recent calls

Your phone keeps lists of the calls you recently received and dialed, even if the calls didn't connect. The lists are sorted from newest to oldest calls. The oldest calls are deleted as new calls are added.

Find it: \( \bullet \rightarrow \text{Recent Calls} \rightarrow \text{Received Calls or Dialed Calls} \)

1 Scroll to an entry.

Note: A √ next to a call means the call connected.

2 Press \( \text{C} \) to call the number.

To see call details (such as time and date), press Options > View.

Press Options (left soft key) while viewing a list of recent calls to see these options:

return a missed call

When you miss a call, your phone plays an alert, displays the 🔄 (missed call) indicator on the home screen. Press View to see the details and press 📞 to call the number.

To view your missed calls at any time:

Find it: 📞 > Recent Calls > Received Calls

To hear a voicemail message, see page 41.

call waiting

If you receive a second call while you are already on a call:

- To answer the second call and put the first call on hold, press 📞 or the Answer soft key. To switch between the calls, press Switch again.
- To send the second call to your voicemail, press Ignore.

quick dial

Your phone can store nine phone numbers that you can call with a single key press. To store a quick dial phone number:

Find it: 📞 > Settings > Customize > Quick Dial

To call a quick dial phone number, press and hold the single-digit quick dial number from the home screen.

To retrieve a number in the notepad:
Find it:  📞 > 🗞 Recent Calls > Notepad
Press 📞 to call the number or press Save to store the number in Phonebook.

emergency calls
Your service provider programs emergency phone numbers (such as 112 or 911) that you can call under any circumstances, even when your phone is locked.

1 Enter the emergency number.
2 Press 📞

Note: Emergency numbers vary by country. Your phone’s pre-programmed emergency number(s) may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

call times
Network connection time is the elapsed time from the moment you connect to your service provider’s network to the moment you end the call by pressing 📞. This time includes busy signals and ringing.

The amount of network connection time you track on your resettable timer may not equal the amount of time for which you are billed by your service provider. For billing information, please contact your service provider directly.
### Call Cost Setup

- Press \( \text{Options} \) > Settings > In-Call Setup > Call Cost Setup

### View Call Times

- Press \( \text{Options} \) > Recent Calls > Call Time

Scroll to Last Call, Dialed Calls, Received Calls, All Calls, or Lifetime, and press Select.

### In-Call Menu

During a call you access the in-call menu by pressing Options.

connections

Bluetooth® wireless

Your phone supports Bluetooth wireless connections with audio devices, such as a handsfree headset or music system.

Note: The use of wireless phones while driving may cause distraction. Discontinue a call if you can’t concentrate on driving. Additionally, the use of wireless devices and their accessories may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of these products.

For maximum Bluetooth security, you should always connect Bluetooth devices in a safe, private environment.

connect to an audio device

Before you try to connect your phone with an audio device, make sure the device is on and ready in pairing or bonding mode (see the user’s guide for the device).

Find it: 📞 > 📷 Settings > 📱 Bluetooth Link > Add Audio Device

If Bluetooth is off, you will be prompted to turn it on. Your phone lists the devices it finds within range:

1. Scroll to a device in the list and press the center key.
2. If necessary, press the Yes or OK key to connect to the device.
If necessary, enter the device passkey (default 0000) and press the OK key.

When your phone is connected, the Bluetooth indicator is highlighted in the status bar.

**Note:** When listening to music using a Bluetooth stereo device (headset or car stereo), use the volume control keys on the device to increase/decrease music volume.

**Shortcut:** When your phone’s Bluetooth power is on, your phone can automatically connect to a handsfree device you have used before. Just turn on the device, or move it near the phone. If the device doesn’t connect, turn it off and back on.

**send files to another device**

You can send a media file, contacts entry, agenda event and more from your phone to a computer or other device.

**Note:** You can’t copy some copyrighted objects.

1. On your phone, scroll to the object that you want to copy to the other device.
2. Press Options > Copy to Bluetooth Device to send a picture file. Press Options > Send via Bluetooth to send a music file.
3. Select a recognized device name, or New Device to search for the device where you want to copy the file.

**If your phone could not send the file to the other device,** make sure the device is on and ready in discoverable mode (see the user’s guide for the device). Also, make sure the device is not busy with another similar Bluetooth connection.

**Note:** Once you connect your phone to a Bluetooth device, that device can start similar Bluetooth connections with your phone.
receive files from another device

If you do not see the Bluetooth indicator in the status bar, turn on your phone’s Bluetooth feature by pressing:

1. Place your phone near the device, and send the file from the device.
   
   If your phone and the sending device don’t recognize each other, place your phone in discoverable mode so the sending device can locate it: and press:

   2. Press the green key on your phone to accept the file from the other device.

   Your phone notifies you when file transfer is complete.

cable connections

You can use your phone’s mini USB port to connect to a computer.

**Note:** Motorola Original™ USB data cables and supporting software may be sold separately. Check your computer to determine which cable you need.

If you use a USB cable connection:

- Be sure to connect the phone to a high-power USB port on your computer (not a low-power one, such as the USB port on your keyboard or bus-powered USB hub.

**Note:** If you connect your phone to a low-power USB port, the computer may not recognize your phone.

- Make sure both your phone and the computer are turned on and that the phone is in the home screen.

**Note:** When your phone is plugged into a computer and is being used for mass storage, it cannot be used for anything else. To restore the phone to normal use, disconnect it from the PC.

- Make sure your phone’s USB setting is set to USB Disk: press > > Settings > USB > USB Disk.

- Your phone currently supports Microsoft® Windows™ XP and Windows Vista™. Other operating systems may not be compatible with your phone.

Attach the Motorola Original USB cable to the mini USB port on your phone and to an available USB port on your computer. The battery will start charging.
On your computer:

1. Open your “My Computer” window, where your phone’s memory card shows as a “Removable Disk” icon.
2. Click on the “Removable Disk” icon to access the memory card.
3. If necessary, in the “Removable Disk” (memory card) window, create one or more folders for the files you will copy onto the memory card.
4. To copy files between your computer and phone, drag and drop into the appropriate folders.
5. When you’re finished, remove the device by selecting the “Safely Remove Hardware” icon at the bottom of your computer screen, then select “USB Mass Storage Devices” and “Stop.”

Use these folders on your memory card for the file types indicated:

**Note:** To help manage your files, you can also create new folders in the existing folders.

- music files (MP3, MIDI, AMR, AAC and WAV): use mobile/Music, or place music files anywhere on the memory card (see page 45).
- picture files (JPG, PNG, or BMP): mobile/Picture.

**Tip:** Pictures must be stored in the mobile/Picture folder on the memory card. To find picture files on your phone press • > Multimedia > Pictures > All Pictures. Press Options > Switch Storage > Memory Card to switch storage location.

**Note:** The maximum single picture file size is 600 kB, 1280 x 1024 pixels. Also, a file name (including the path) must be less than 255 characters. For example,
If you copy songs into a folder you create that is named “MyMotoSongs,” the name of any song PLUS the name of the folder “MyMotoSongs” must be less than 255 characters.

**USB setting**

Set your phone’s mini USB connection to function as a modem or storage device:

**Find it:** Start > Settings > USB > USB Modem or USB Disk

**Note:** Your USB connection must be set to USB Disk before copying files from your PC to your phone (see page 57).

Specific Absorption Rate Data

This model wireless phone meets the government’s requirements for exposure to radio waves.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government and by the Canadian regulatory authorities. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age or health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC and by the Canadian regulatory authorities is 1.6 W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC and by Industry Canada with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the power output.

Before a phone model is available for sale to the public in the U.S. and Canada, it must be tested and certified to the FCC and Industry Canada that it does not exceed the limit established by each government for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) reported to the FCC and available for review by Industry Canada. The highest SAR value for this model phone when tested for use at the ear is 1.01 W/kg, and when worn on the body, as described in this user guide, is 0.61 W/kg. (Body-worn measurements differ among phone models, depending upon available accessories and regulatory requirements). While there may be differences between the SAR levels of various phones and at various positions, they all meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.
Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) Web site:

http://www.phonefacts.net

or the Canadian Wireless Telecommunications Association (CWTA) Web site:

http://www.cwta.ca

1. In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

2. The SAR information includes the Motorola testing protocol, assessment procedure, and measurement uncertainty range for this product.
Specific Absorption Rate Data

This model meets international guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The ICNIRP SAR limit for mobile devices used by the general public is 2 W/kg and the highest SAR value for this device when tested at the ear is 0.62 W/kg (850/1900 MHz); 0.67 W/kg (900/1800 MHz). As mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this user’s guide. In this case, the highest tested SAR value is 0.43 W/kg (850/1900 MHz); 0.52 W/kg (900/1800 MHz). As SAR is measured utilizing the device’s highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a “handsfree” device to keep the mobile phone away from the head and body.

Additional Information can be found on the websites of the World Health Organization (http://www.who.int/eme/ or Motorola, Inc. (http://www.motorola.com/rfhealth).

1. The tests are carried out in accordance with international guidelines for testing. The limit incorporates a substantial margin for safety to give additional protection for the public and to account for any variations in measurements. Additional related information includes the Motorola testing protocol, assessment procedure, and measurement uncertainty range for this product.

2. Please see the Safety and General Information section about body worn operation.
Hereby, Motorola declares that this product is in compliance with:

- The essential requirements and other relevant provisions of Directive 1999/5/EC
- All other relevant EU Directives

The above gives an example of a typical Product Approval Number. You can view your product’s Declaration of Conformity (DoC) to Directive 1999/5/EC (the R&TTE Directive) at www.motorola.com/rtte. To find your DoC, enter the Product Approval Number from your product’s label in the “Search” bar on the Web site.
Important Safety and Legal Information
Safety and General Information

This section contains important information on the safe and efficient operation of your mobile device. Read this information before using your mobile device.

Exposure to Radio Frequency (RF) Energy
Your mobile device contains a transmitter and receiver. When it is ON, it receives and transmits RF energy. When you communicate with your mobile device, the system handling your call controls the power level at which your mobile device transmits.

Your Motorola mobile device is designed to comply with local regulatory requirements in your country concerning exposure of human beings to RF energy.

Operational Precautions
For optimal mobile device performance, and to be sure that human exposure to RF energy does not exceed the guidelines set forth in the relevant standards, always follow these instructions and precautions.

Product Operation
When placing or receiving a phone call, hold your mobile device just like you would a landline phone.

If you wear the mobile device on your body, always place the mobile device in a Motorola-supplied or approved clip, holder, holster, case, or body harness. If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 centimeters (1 inch) from your body when transmitting.

Using accessories not supplied or approved by Motorola may cause your mobile device to exceed RF energy exposure guidelines. For a list of Motorola-supplied or approved accessories, visit our Web site at: www.motorola.com.

RF Energy Interference/Compatibility
Nearly every electronic device is subject to RF energy interference from external sources if inadequately shielded, designed, or otherwise configured for RF energy compatibility. In some circumstances your mobile device may cause interference with other devices.
Follow Instructions to Avoid Interference Problems

Turn off your mobile device in any location where posted notices instruct you to do so.

In an aircraft, turn off your mobile device whenever instructed to do so by airline staff. If your mobile device offers an airplane mode or similar feature, consult airline staff about using it in flight.

Implantable Medical Devices

If you have an implantable medical device, such as a pacemaker or defibrillator, consult your physician before using this mobile device.

Persons with implantable medical devices should observe the following precautions:

- ALWAYS keep the mobile device more than 20 centimeters (8 inches) from the implantable medical device when the mobile device is turned ON.
- DO NOT carry the mobile device in the breast pocket.
- Use the ear opposite the implantable medical device to minimize the potential for interference.
- Turn OFF the mobile device immediately if you have any reason to suspect that interference is taking place.

Read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using your mobile device with your implantable medical device, consult your healthcare provider.

Driving Precautions

The use of wireless phones while driving may cause distraction. Discontinue a call if you can’t concentrate on driving.

Additionally, the use of wireless devices and their accessories may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of these products.

Responsible driving practices can be found in the “Smart Practices While Driving” section in this guide (or separate guide).

Operational Warnings

Obey all posted signs when using mobile devices in public areas.

Potentially Explosive Atmospheres

Areas with potentially explosive atmospheres are often, but not always, posted and can include fueling areas, such as below decks on boats, fuel or chemical transfer or storage facilities, or areas where the air contains chemicals or particles, such as grain dust, or metal powders.

When you are in such an area, turn off your mobile device, and do not remove, install, or charge batteries. In such areas, sparks can occur and cause an explosion or fire.
Symbol Key

Batteries & Chargers
Caution: Improper treatment or use of batteries may present a danger of fire, explosion, leakage, or other hazard. For more information, see the “battery use & safety” section in the user’s guide.

Keep Your Mobile Device and Its Accessories Away From Small Children
These products are not toys and may be hazardous to children. For example:
- A choking hazard may exist for small, detachable parts.
- Improper use could result in loud sounds, possibly causing hearing injury.
- Improperly handled batteries could overheat and cause a burn.

Glass Parts
Some parts of your mobile device may be made of glass. This glass could break if the product is dropped on a hard surface or receives a substantial impact. If glass breaks, do not touch or attempt to remove. Stop using your mobile device until the glass is replaced by a qualified service center.
Safety Information

Seizures/Blackouts

Some people may be susceptible to epileptic seizures or blackouts when exposed to flashing lights, such as when playing video games. These may occur even if a person has never had a previous seizure or blackout.

If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult with your physician before playing video games or enabling a flashing-lights feature (if available) on your mobile device.

Discontinue use and consult a physician if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation. It is always a good idea to hold the screen away from your eyes, leave the lights on in the room, take a 15-minute break every hour, and stop use if you are tired.

Caution About High Volume Usage

Warning: Exposure to loud noise from any source for extended periods of time may affect your hearing. The louder the volume sound level, the less time is required before your hearing could be affected. To protect your hearing:

• Limit the amount of time you use headsets or headphones at high volume.

• Avoid turning up the volume to block out noisy surroundings.

• Turn the volume down if you can’t hear people speaking near you.

If you experience hearing discomfort, including the sensation of pressure or fullness in your ears, ringing in your ears, or muffled speech, you should stop listening to the device through your headset or headphones and have your hearing checked.

For more information about hearing, see our Web site at www.motorola.com/hearingsafety (in English only).

Repetitive Motion

When you repetitively perform actions such as pressing keys or entering finger-written characters, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. If you continue to have discomfort during or after such use, stop use and see a physician.

FCC Notice to Users

The following statement applies to all products that have received FCC approval. Applicable products bear the FCC logo, and/or an FCC ID in the format FCC-ID:xxxxxx on the product label.

Motorola has not approved any changes or modifications to this device by the user. Any changes or modifications could void the user's authority to operate the equipment. See 47 CFR Sec. 15.21.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See 47 CFR Sec. 15.19(3).

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
Latin America Warranty, except Mexico

Latin America Warranty
MOTOROLA INC.
Subscribers/Cellular Division

Through its own service centers and/or its authorized service centers, Motorola provides a 1-year warranty that covers the cellular phone, all its parts and labor against any defect and operation as long as the “Product” has been operated and handled under normal conditions. The term of 1 year begins when the “Product” is purchased.

Conditions

1. For warranty service, return the “Product” and this warranty to the place of purchase or to any Motorola authorized service center.

If additional information is needed, please contact any of our service centers:

Motorola de México, S.A.

Or to any authorized service center in your locality.

This warranty is not valid in the following cases:

6. Defects or damages derived from abnormal use.

a. Defects or damages derived from accident or negligence.

b. Defects or damages derived from tests, unsuitable operation, maintenance, installation and adjustments, or derived from any alteration or modification of any type.

d. Damage caused to antennas, unless they are consequences of defects in material or workmanship.

e. When the cellular phone has been disassembled and/or repaired so that its operation has been affected or that it can not be tested to verify any claim that grants this warranty.

g. Defects or damages caused by food spills or liquids.

h. When the cables of the control unit have been stretched or the module tongue-piece has broken.

i. When the surface of the “Product” and its pieces have been scratched or damaged due to the normal use.

j. Leather cases.

k. Rented cellular phones.

l. When the “Product” has been altered or repaired by non-Motorola authorized service centers.

m. When the “Product” has not been operated in agreement with the instructions that accompany the “Product”.

The batteries (Nickel-Cadmium) are warranted only if their capacity is reduced by 80% below its predicted capacity. This warranty is null for all types of batteries if:

a. The batteries are charged by a charger that has not been approved by MOTOROLA.

b. If any of the battery seals are broken or tampered with.

c. If the batteries were used or installed in non-MOTOROLA equipment.

Caring for the Environment by Recycling

This symbol on a Motorola product means the product should not be disposed of with household waste.

Disposal of your Mobile Device and Accessories
Please do not dispose of mobile devices or electrical accessories (such as chargers, headsets, or batteries) with your household waste. These items should be disposed of in accordance with the national collection and recycling schemes operated by your local or regional authority. Alternatively, you may return unwanted mobile devices and electrical accessories to any Motorola Approved Service Center in your region. Details of Motorola approved national recycling schemes, and further information on Motorola recycling activities can be found at: www.motorola.com/recycling

Disposal of your Mobile Device Packaging and User’s Guide
Product packaging and user’s guides should only be disposed of in accordance with national collection and recycling requirements. Please contact your regional authorities for more details.
Privacy and Data Security

Motorola understands that privacy and data security are important to everyone. Because some features of your mobile device may affect your privacy or data security, please follow these recommendations to enhance protection of your information:

- **Monitor access**—Keep your mobile device with you and do not leave it where others may have unmonitored access. Lock your device’s keypad where this feature is available.

- **Keep software up to date**—If Motorola or a software/application vendor releases a patch or software fix for your mobile device that updates the device’s security, install it as soon as possible.

- **Erase before recycling**—Delete personal information or data from your mobile device prior to disposing of it or turning it in for recycling. For step-by-step instructions on how to delete all personal information from your device, see the section entitled “master clear” or “delete data” in the user’s guide.

  **Note:** For information on backing up your mobile device data before erasing it, go to www.motorola.com and navigate to the “downloads” section of the consumer Web page for “Motorola Backup” or “Motorola Phone Tools.”

- **Understanding AGPS**—To provide location information for emergency calls, certain Motorola mobile devices incorporate Assisted Global Positioning System (AGPS) technology. AGPS technology also can be used in non-emergency applications to track and monitor a user’s location—for example, to provide driving directions. Users who prefer not to permit such tracking and monitoring should avoid using such applications.

If you have further questions regarding how the use of your mobile device may impact your privacy or data security, please contact Motorola at privacy@motorola.com, or contact your service provider.
Smart Practices While Driving

Drive Safe, Call Smart
Check the laws and regulations on the use of mobile devices and their accessories in the areas where you drive. Always obey them. The use of these devices may be prohibited or restricted in certain areas -- for example, handsfree use only. Go to www.motorola.com/callsmart (in English only) for more information.

Your mobile device lets you communicate by voice and data—almost anywhere, anytime, wherever wireless service is available and safe conditions allow. When driving a car, driving is your first responsibility. If you choose to use your mobile device while driving, remember the following tips:

- Get to know your Motorola mobile device and its features such as speed dial and redial. If available, these features help you to place your call without taking your attention off the road.
- When available, use a handsfree device. If possible, add an additional layer of convenience to your mobile device with one of the many Motorola Original handsfree accessories available today.
- Position your mobile device within easy reach. Be able to access your mobile device without removing your eyes from the road. If you receive an incoming call at an inconvenient time, if possible, let your voicemail answer it for you.
- Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow, ice, and even heavy traffic can be hazardous.
- Do not take notes or look up phone numbers while driving. Jotting down a “to do” list or going through your address book takes attention away from your primary responsibility—driving safely.
- Dial sensibly and assess the traffic; if possible, place calls when your car is not moving or before pulling into traffic. If you must make a call while moving, dial only a few numbers, check the road and your mirrors, then continue.
- Do not engage in stressful or emotional conversations that may be distracting. Make people you are talking with aware you are driving and suspend conversations that can divert your attention away from the road.
• **Use your mobile device to call for help.** Dial 911 or other local emergency number in the case of fire, traffic accident, or medical emergencies.*

• **Use your mobile device to help others in emergencies.** If you see an auto accident, crime in progress, or other serious emergency where lives are in danger, call 911 or other local emergency number, as you would want others to do for you.*

• **Call roadside assistance or a special non-emergency wireless assistance number when necessary.** If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number.*
