HELLOMOTO

Introducing your new MOTO®ROKR™ EM28 wireless phone! It’s packed with entertainment and music features.

- **Hi-Speed Music on the Highway** – Use the music player (page 45) to set your playlist for your morning commute. Or, use the FM Radio (page 49) to listen to your favorite music or news programs. With a stereo wired headset or high quality Bluetooth® stereo headset, listening has never been easier.

- **Dedicated Music Keys and Touch-Sensitive Keys** – When your phone is **open**, use the dedicated music key (page 45), or when your phone is **closed** use the touch-sensitive music keys (page 46), to control music play.

- **EDGE Hi-Speed Transfer** – Quickly transfer music and media from your PC to your phone (page 44).

- **Connect on So Many Levels** – Whether it’s with work or friends, stay connected with voice (page 32) and messaging (page 41).

- **Camera** – Capture key moments with **photos** (page 51) and **videos** (page 53).

- **My Phone, My Way** – Customize the look and sound of your phone (page 27).

- **Convenient Extras** – Whether your at work or home, make use of handy tools like Phonebook, Calculator, Alarm Clock, Calendar, and others (page 56).
Here's a quick anatomy lesson:

- **Left Soft Key**
- **Volume Keys**
- **Music Key (phone open)**
- **Smart Key (phone open)**
- **Music Key (phone closed)**
- **Mini USB Connector**
  - Charge your phone and connect to your PC.
- **Right Soft Key**
- **Messages Key**
- **Power/End Key**
- **Call Key**
- **Camera Lens**
- **Battery Charging Indicator**
- **External Display**
- **Touch-Sensitive Keys**
- **Microphone**

Listen to music.
A few menu basics:

1. Press & hold the Power Key ( ) until the display lights up to turn on your phone.
2. Press the Center Key ( ) to open the Main Menu.
3. Press the Navigation Key ( ) up/down/left/right to highlight a menu feature.
4. Press the Center Key ( ) to select it.
5. In some list views, such as your Message Inbox or Contacts list, the symbol shows at the bottom of the screen. This indicates that menu options are available. Press the center key ( ) to display the menu options.

This is a typical home screen and main menu layout. Your phone may be a little different.

Use and Care

To care for your Motorola phone, please keep it away from:

- **liquids of any kind**
  - Don’t expose your phone to water, rain, extreme humidity, sweat, or other moisture. If it does get wet, don’t try to accelerate drying with the use of an oven or dryer, as this may damage the phone.

- **dust and dirt**
  - Don’t expose your phone to dust, dirt, sand, food, or other inappropriate materials.

- **extreme heat or cold**
  - Avoid temperatures below 0°C/32°F or above 45°C/113°F.

- **cleaning solutions**
  - To clean your phone, use only a dry soft cloth. Don’t use alcohol or other cleaning solutions.

- **microwaves**
  - Don’t try to dry your phone in a microwave oven.

- **the ground**
  - Don’t drop your phone.
get started

about this guide

This guide shows how to locate a menu feature as follows:

Find it: † > 📷 Recent Calls > Received Calls

This means that, from the home screen:

1 Press the center key † to open the main menu.
2 Scroll to 📷 Recent Calls and press the center key †.
3 Scroll to Received Calls and press the center key †.

Tip: Press the center key † or Select to select a highlighted option.

symbols

This means a feature is network/subscription dependent and may not be available in all areas. Contact your service provider for more information.

This means a feature requires an optional accessory.
SIM card

Your Subscriber Identity Module (SIM) card contains personal information like your phone number and contacts. It can also contain your voicemail and text message settings.

If you put your SIM card in another phone, that phone uses your phone number.

**Caution:** Don't bend or scratch your SIM card. Keep it away from static electricity, water, and dirt.

**Tip:** Make sure your SIM card is fully inserted into the phone before installing the battery.

memory card

You can use a removable microSD memory card (up to 2 GB) with your phone to store and retrieve multimedia objects, such as music and pictures.

**Note:** Your phone supports up to 2 GB microSD memory cards (greater than 1 GB capacity is guaranteed for SanDisk microSD cards only). We recommend that you use Motorola approved memory cards only, such as SanDisk memory cards. Other
memory cards may not be compatible with your phone.

To install the memory card, make sure the memory card’s metal contacts are facing down. Slide the top of the memory card under the metal band and into the holder. To remove the memory card, slide the card back out of the holder.

Tip: You do not need to remove the battery to install or remove the memory card.

battery

battery use and safety

IMPORTANT: HANDLE AND STORE BATTERIES PROPERLY TO AVOID INJURY OR DAMAGE. Most battery issues arise from improper handling of batteries, and particularly from the continued use of damaged batteries.

DON'Ts

- Don’t disassemble, crush, puncture, shred, or otherwise attempt to change the form of your battery.
- Don’t let the phone or battery come in contact with water. Water can get into the phone’s circuits, leading to corrosion. If the phone and/or battery get wet, have them checked by your carrier or contact Motorola even if they appear to be working properly.
- Don’t allow the battery to touch metal objects. If metal objects, such as jewelry, stay in prolonged contact with the battery contact points, the battery could become very hot.
Don't place your battery near a heat source. Excessive heat can damage the phone or the battery. High temperatures can cause the battery to swell, leak, or malfunction. Therefore:

- Do not dry a wet or damp battery with an appliance or heat source, such as a hair dryer or microwave oven.
- Avoid leaving your phone in your car in high temperatures.

DOs

- Do avoid dropping the battery or phone. Dropping these items, especially on a hard surface, can potentially cause damage.
- Do contact your service provider or Motorola if your phone or battery has been damaged from dropping or high temperatures.

IMPORTANT: USE MOTOROLA ORIGINAL PRODUCTS FOR QUALITY ASSURANCE AND SAFEGUARDS. To aid consumers in identifying authentic Motorola batteries from non-original or counterfeit batteries (that may not have adequate safety protection), Motorola provides holograms on its batteries. Consumers should confirm that any battery they purchase has a “Motorola Original” hologram.

Motorola recommends you always use Motorola-branded batteries and chargers. Motorola mobile devices are designed to work with Motorola batteries. If you see a message on your display such as Invalid Battery or Unable to Charge, take the following steps:

- Remove the battery and inspect it to confirm that it has a “Motorola Original” hologram;
- If there is no hologram, the battery is not a Motorola battery;
- If there is a hologram, replace the battery and retry charging it;
• If the message remains, contact a Motorola Authorized Service Center.

Important: Motorola's warranty does not cover damage to the phone caused by non-Motorola batteries and/or chargers.

Warning: Use of a non-Motorola battery or charger may present a risk of fire, explosion, leakage, or other hazard.

PROPER AND SAFE BATTERY DISPOSAL AND RECYCLING

Proper battery disposal is not only important for safety, it benefits the environment. Consumers may recycle their used batteries in many retail or service provider locations. Additional information on proper disposal and recycling may be found on the Web:

• [www.motorola.com/recycling](http://www.motorola.com/recycling)
• [www.rbrc.org/call2recycle](http://www.rbrc.org/call2recycle) (in English only)

Disposal: Promptly dispose of used batteries in accordance with local regulations. Contact your local recycling center or national recycling organizations for more information on how to dispose of batteries.

Warning: Never dispose of batteries in a fire because they may explode.

install the battery

1
get started

remove the battery

Note: Your battery is intentionally tight fitting to ensure consistent connection.

charge the battery

New batteries are not fully charged. Plug the battery charger into your phone and an electrical outlet. Your phone might take several seconds to start charging the battery. When the battery starts charging the battery charging indicator (see page 2) comes on. The phone shows Charge complete when finished.

Tip: You can also use a PC USB port to charge your phone battery. Before connecting your phone to your PC, download and install the charging software driver from www.motorola.com/support.

Notes for charging your phone's battery:

- When charging your battery, keep it near room temperature. Never expose batteries to
temperatures below 0°C (32°F) or above 45°C (113°F) when charging.

- New batteries are not fully charged.
- New batteries or batteries stored for a long time may take more time to charge.
- Motorola batteries and charging systems have circuitry that protects the battery from damage from overcharging.

**turn it on & off**

To turn on your phone, press and hold \( \text{T} \) for a few seconds or until the display turns on.

If prompted, enter your four-digit unlock code. Your phone’s four-digit **unlock code** is originally set to 1234 or the last four digits of your phone number (see page 22).

**To turn off your phone**, press and hold \( \text{O} \) for a few seconds.

**make a call**

Enter a phone number and press \( \text{N} \) to make a call. See page 32 for more calling features.

**To hang up**, press \( \text{O} \).

**Tip**: Is your caller saying they can’t hear you? Make sure your finger is not covering the microphone (see page 2).

**answer a call**

When your phone rings and/or vibrates, press \( \text{O} \) to answer. See page 27 for answer options.

**To hang up**, press \( \text{O} \).
adjust volume
You can adjust the volume during a call by pressing the up or down volume keys on the side of the phone (see page 2), or by pressing \( \text{Options} \) \( \text{Mute} \). To mute a call, press Options > Mute.

change ring alert
Find it: \( \text{Menu} \) > \( \text{Settings} \) > Ring Style
Available options are \( \text{Loud ring} \), \( \text{Soft ring} \), \( \text{Vibrate} \), \( \text{Vibrate & Ring} \), \( \text{Vibrate then Ring} \) or \( \text{Silent} \) (see page 27).

store a number
You can store up to 1000 phone numbers in your phonebook (see page 56 for more contact features):

1. Enter a phone number in the home screen, and press \( \text{Store} \).

2. Enter a name and other details for the phone number, press \( \text{OK} \). To select a highlighted item, press the center key \( \text{OK} \).

3. Press \( \text{Done} \) to store the number.

To store an email address for a new contact, press \( \text{Menu} \) > \( \text{Phonebook} \) > \( \text{New} \) > Email. Enter the name and email address, then press \( \text{OK} \) > Done.

call a stored number
Find it: \( \text{Menu} \) > \( \text{Phonebook} \)

1. Scroll to the entry.

2. Press \( \text{Call} \) to call the entry.

Shortcut: In your phonebook, enter the letters of an entry to get to it quickly.

Tip: Set the Phonebook icon as a Home Screen navigation key for even faster access (see page 26).
Note: You can change the search method to Find to search for a contact name by typing it in:

Find it: > Phonebook > Setup > Search Method
basics

See page 2 for a basic phone diagram.

home screen

When you turn on your phone, the home screen displays.

Note: Your home screen might look a little different from this example.

Soft key labels show the current soft key functions. For soft key locations, see page 2.

Press the navigation key up, down, left, or right to select shortcut items in the home screen.

Status indicators can appear across the top of the home screen:

<table>
<thead>
<tr>

</tr>
<tr>
<td>✘</td>
<td>Shows during battery charging.</td>
</tr>
<tr>
<td>✘</td>
<td></td>
</tr>
</tbody>
</table>

side keys

volume keys

Press the volume keys on the side of the phone to:

- Turn off an incoming call alert
- Change earpiece or speakerphone volume during a call
- Change volume for a song.

music/smart key

The external music key gives you a way to access your music with the phone closed.

The smart key gives you a way to access the feature you set with the phone open. To set the smart key feature press: 📱 > 🛡️ Settings > Personalize > Home Screen > Home Keys > Smart Key.

Note: With your phone closed, the smart key locks and unlocks your external keys.

Tip: Press 📱 to access your music with the phone open.
handsfree
You can use your phone’s handsfree speaker to make calls without holding the phone to your ear. To turn the speaker on, during a call, press - Spkr on. To turn the speaker off, press Spkr off.

**Note:** The handsfree speaker won’t work when your phone is connected to a handsfree car kit or headset, or if your phone is closed.

You can also use an optional 3.5 mm wired headset to go handsfree.

**Note:** Mini USB headsets are not supported.

codes & passwords
Your phone’s four-digit **unlock code** is originally set to 1234 or to the last four digits of your phone number. The six-digit **security code** is originally set to 000000.

Your service provider may reset these codes. If not, you should change them to protect your personal information. The unlock code must contain four digits. The security code must contain six digits.

To change a code or password:

**Find it:** > Settings > Security > New Passwords

**Note:** If you forget your security code, contact your service provider.
lock & unlock phone
You can lock your phone with a four-digit code to keep others from using it.

Note: You can make emergency calls on a locked phone (see page 34). A locked phone still rings or vibrates for incoming calls or messages, but you need to unlock it to answer.

To lock your phone:
Find it: • > Settings > Security > Phone Lock > Lock Now or Automatic Lock
Enter the four-digit unlock code and press OK. Your phone first displays Phone Locked, and then shows Enter Unlock Code until the next time you unlock your phone. To unlock your phone, enter your four-digit code and press OK.

To change your unlock code:
Find it: • > Settings > Security > New Passwords > Unlock Code

memory card
You can store multimedia content, such as songs and pictures, on your phone's internal memory or on an optional memory card.

Note: If you download a file or copyrighted file and store it on your memory card, you can use the file only while your memory card is inserted in your phone. You cannot send, copy, or change copyrighted files.

format memory card
You will need to format the memory card (using the phone) before using it for the first time. This essential procedure creates the picture, video, java, and music
folders and ensures your phone can read the contents of the card.

**Caution:** Formatting the memory card erases all content on the card.

**Find it:** 📷 > ✉️ Settings > Initial Setup

1. Scroll to **Format Additional Storage Device** and press **Select**.
2. When prompted, press **Yes** to continue or **No** to cancel formatting.

**Tip:** To access data stored on your microSD memory card, with your phone in the home screen, press 📷 > 📀 Multimedia > Pictures or Sounds or Music or Videos and then press 📷 > Switch Storage Devices. If there are no files stored on your memory card then your phone will automatically switch to its internal memory.
From the home screen (page 19), you can use shortcuts:

<table>
<thead>
<tr>
<th>To...</th>
<th>Do this...</th>
</tr>
</thead>
<tbody>
<tr>
<td>play music (phone open)</td>
<td>Press [ ] to activate the music player.</td>
</tr>
<tr>
<td>play music (phone closed)</td>
<td>Press the external music key to activate the music player. You can then use the touch-sensitive keys to control music.</td>
</tr>
<tr>
<td>see recently dialed numbers</td>
<td>Press [ ].</td>
</tr>
<tr>
<td>use shortcuts</td>
<td>Press the left and right soft keys or the navigation key [ ].</td>

26   customize
ring styles & alerts
Your phone rings and/or vibrates to notify you of an incoming call or to signal certain other events. This ring or vibration is called an alert.

set a style
Find it: 📞 > 🏷️ Settings > Ring Style
1 Select Style by pressing 📞.
2 Scroll to a ring style and press 📞.

set alerts
Set alerts for different events, such as getting a message in your inbox or receiving a call.
Find it: 📞 > 🏷️ Settings > Ring Style
1 Scroll to Style Detail and press 📞.
2 Scroll to an alert type and press 📞.
3 Scroll to the desired detail setting and press 📞.

Note: Your phone plays a sample of each highlighted setting. Ringtones play through the speakerphone, unless you’re using a headset.

answer options
Set your phone to one of the following answer options: Multi-key On, Multi-key Off or Open to answer.
Find it: 📞 > 🏷️ Settings > In Call Setup > Answer Options

wallpaper
Set a picture as a wallpaper (background) image in your home screen.
Find it: 📞 > 🏷️ Settings > Personalize > Wallpaper
To select a wallpaper image:
1 Scroll to Picture and press 📞.
2 Scroll to the picture you want and press \Select
or
Select None to turn off wallpaper.

To adjust wallpaper image layout:
1 Scroll to Set Layout and press \Select.
2 Scroll to Tile, Center or Fit-to-screen, and press \Select.

screen saver
Set a picture as a screen saver image. The screen saver displays when there is no phone activity.

Find it: \Select \Select Settings \Select Personalize \Select Screensaver
To select a screen saver:
1 Scroll to Type and select Animation.
   Tip: You can also select Analog clock.
2 Scroll to Animation and press \Select.

3 Scroll to the animation or picture you want and press \Select.

To specify how long your phone must be inactive before it displays the screen saver:
1 Scroll to Idle Time and press \Select.
2 Select a time period and press \Select.

Note: To conserve battery life, turn off the screen saver.

color setting
To choose a Color Setting (or skin) that sets the look and feel of your phone's display, press \Select \Select Settings \Select Personalize \Select Color Setting.

display settings
To select a time period that the display light remains on, press \Select \Select Settings \Select Initial Setup \Select Display Timeout.
backlight
To select a time period that the backlight remains on, press \( \bullet \) > \( \bullet \) Settings > Initial Setup > Backlight.

MyMenu
Create a custom menu of your favorite phone features and tools.

assign an item to MyMenu
1. Press \( \bullet \) then scroll to a desired menu or submenu item.

For example, if you want to assign the Messages menu to MyMenu, scroll to the messages icon (▃) on the main menu. If you want to assign the Calculator function to MyMenu, scroll to and select Office Tools (on the main menu) then scroll to Calculator.

2. With the desired option highlighted, press and hold \( \bullet \) until the MyMenu confirmation appears, then select OK.

3. Press Done to accept the assigned key number, or scroll to Key and press Change to assign a different one.

use MyMenu
From the home screen, open the main menu, then simply press the number key you assigned to the feature. For example, if you assigned Messages to 2 then press \( \bullet \) > 2.

</tbody>
</table>
**features**

**master clear**

Clear all options except unlock code, security code, and lifetime timer, and clear all user settings and entries.

This option erases all user-entered information stored in your phone memory, including phonebook entries and downloaded files. Once you erase the information, it cannot be recovered. It resets all options to their factory settings except for the unlock code, security code, and lifetime timer.

- > Settings > Initial Setup > Master Clear

To reset all options, you need to enter the Unlock Code (default 1234).
calls

To make and answer calls, see page 16.

redial a number

1 From the home screen, press \( \text{C} \) to see a list of recently dialed calls.
2 Scroll to the entry you want to call and press \( \text{C} \).

recent calls

Your phone keeps lists of the calls you recently received and dialed, even if the calls didn’t connect. The lists are sorted from newest to oldest calls. The oldest calls are deleted as new calls are added.

Find it: \( \bullet \) > \( \text{A} \) Recent Calls > Received Calls or Dialed Calls

1 Scroll to an entry.
   
   \textbf{Note:} A \( \checkmark \) next to a call means that the call connected.
2 Press \( \text{C} \) to call the number.
   
   To see call details (such as time and date), press \text{View}.

Press the center key \( \bullet \) while viewing a list of recent calls to see these options:

<table>
<thead>
<tr>
<th>option</th>
<th>action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Store</td>
<td>Store the entry.</td>
</tr>
<tr>
<td>Block list</td>
<td>View your list of blocked callers.</td>
</tr>
<tr>
<td>Delete</td>
<td>Delete the entry.</td>
</tr>
<tr>
<td>Delete All</td>
<td>Delete all entries in the list.</td>
</tr>
</tbody>
</table>
calls

return a missed call

When you miss a call, your phone plays an alert, displays the 📞 (missed call) indicator on the home screen and displays the 📞 indicator on the external display of your phone. Press View to see the details and press ✆ to call the number.

To view your missed calls at any time:

Find it: 📞 > 📞 Recent Calls > Received Calls

To hear a voicemail message, see page 42.

call waiting

If you receive a second call while you are already on a call:

- To answer the second call and put the first call on hold, press ✆, or the left soft key, Answer. To switch between the calls, press Switch again.
- To send the second call to your voicemail, press Ignore.

quick dial

Your phone can store nine phone numbers that you can call with a single key press. To store a quick dial phone number:

Find it: 📞 > 📞 Settings > Personalize > Quick Dial
To call a quick dial phone number, press and hold the single-digit quick dial number from the home screen.

**notepad**

The most recent set of digits that you entered are stored in your phone’s notepad memory.

**To retrieve a number in the notepad:**

Find it: ✈️ > 📞 Recent Calls > Notepad

Press 📞 to call the number or press Store to store the number in your phonebook.

**emergency calls**

Your service provider programs emergency phone numbers, (such as 999, 112 or 911), that you can call under any circumstances, even when your phone is locked.

1. Enter the emergency number.

2. Press 📞

**Note:** Emergency numbers vary by country. Your phone’s pre-programmed emergency number(s) may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

**call times**

**Network connection time** is the elapsed time from the moment you connect to your service provider’s network to the moment you end the call by pressing ✖️. This time includes busy signals and ringing.

The amount of network connection time you track on your resettable timer may not equal the amount of time for which you are billed by your
service provider. For billing information, please contact your service provider directly.

### headset

#### features

<table>
<thead>
<tr>
<th>set in-call timer</th>
</tr>
</thead>
</table>
| • | Settings > In Call Setup > In-Call Timer

<table>
<thead>
<tr>
<th>call cost setup</th>
</tr>
</thead>
</table>
| • | Settings > In Call Setup > Call Cost Setup

<table>
<thead>
<tr>
<th>view call times</th>
</tr>
</thead>
</table>
| • | Recent Calls > Call Times

Scroll to Last Call, Dialed Calls, Received Calls, All Calls, or Lifetime, and press Select.

#### auto answer

Automatically answer calls when connected to a headset:

- • > Settings > Headset > Auto Answer

**Note:** Mono and stereo headsets are supported for voice only.

#### change volume

Press up or down on the volume keys, on the side of the phone, or press • up or down to change the headset volume during a call.
more calling

**features**

**international calls**
If your phone service includes international dialing, press and hold 0 to insert your local international access code (indicated by +). Then, press the keypad keys to dial the country code and phone number.

**call forwarding**
Set up or cancel call forward:
- * > Settings > Call Forward

**features**

**restrict calls**
Restrict outgoing or incoming calls:
- * > Settings > Security > Call Barring
Select Outgoing Calls, Incoming Calls or Cancel All and press Select.
When prompted, enter the unlock code (supplied by your service provider) and press OK.
enter text

Some screens allow you to use the keypad to enter text, such as when you compose a message.

set entry modes

Multiple text entry modes make it easy for you to enter names, numbers, and messages:

<table>
<thead>
<tr>
<th>entry mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Primary</td>
<td>Enter text using a method that you set.</td>
</tr>
<tr>
<td>Secondary</td>
<td>Enter text using a method that you set.</td>
</tr>
<tr>
<td>Number</td>
<td>Enter numbers only (see page 40).</td>
</tr>
<tr>
<td>Symbol</td>
<td>Enter symbols only (see page 40).</td>
</tr>
</tbody>
</table>

To assign a Primary or Secondary text entry mode:

1. In a text entry screen, press •.
2. Scroll to Entry Setup and press •.
3. Scroll to Primary Setup or Secondary Setup and press •.
4. Scroll to one of the following choices and press •:

<table>
<thead>
<tr>
<th>options</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>iTAP™</td>
<td>Let the phone predict each word as you press keys.</td>
</tr>
<tr>
<td>TAP</td>
<td>Enter letters and numbers by pressing a key one or more times.</td>
</tr>
<tr>
<td>Tap Extended</td>
<td>Enter letters, numbers, and symbols by pressing a key one or more times.</td>
</tr>
</tbody>
</table>
To change the text entry mode:
Press # in the text entry screen to change the text entry until the desired mode is displayed.

To select or edit a text entry mode
Press ◀ in any text entry screen, scroll to and select Entry Mode, then scroll to and select the desired entry mode.

capitalisation
Press 0 in any text entry screen to change the text case. These indicators show capitalisation status:

<table>
<thead>
<tr>
<th>indicator</th>
<th>description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ab</td>
<td>No capital letters</td>
</tr>
<tr>
<td>AB</td>
<td>All capital letters</td>
</tr>
<tr>
<td>Ab</td>
<td>Capitalize next letter only</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>primary</th>
<th>secondary</th>
<th>description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2</td>
<td>Tap, no capital letters</td>
</tr>
<tr>
<td>1 š</td>
<td>2 š</td>
<td>Tap, capitalize next letter</td>
</tr>
<tr>
<td>1 †</td>
<td>2 †</td>
<td>Tap, all capital letters</td>
</tr>
<tr>
<td>Š</td>
<td>Š</td>
<td>iTAP™, no capital letters</td>
</tr>
<tr>
<td>Đ</td>
<td>Đ</td>
<td>iTAP, capitalize next letter</td>
</tr>
<tr>
<td>Ć</td>
<td>Ć</td>
<td>iTAP, all capital letters</td>
</tr>
</tbody>
</table>

These indicators identify Numeric or Symbol entry mode:

<table>
<thead>
<tr>
<th>indicator</th>
<th>description</th>
</tr>
</thead>
<tbody>
<tr>
<td>12</td>
<td>Number mode</td>
</tr>
<tr>
<td>⊲</td>
<td>Symbol mode</td>
</tr>
</tbody>
</table>
iTAP™ method

The iTAP software combines your single key presses into common words, and predicts each word as you enter it. This can be faster than the Tap method.

1. Press ↳ right or left to scroll through the possible letter combinations, and highlight the combination you want.

2. Press Select to enter the highlighted combination.

You can press keys to add more letters to the end of the combination.

or

Press  to insert a space.

For example, if you press 4 6 6 3, your phone displays the corresponding letter combinations:

tap method

This is the standard method for entering text on your phone.

Regular Tap method cycles through the letters and numbers of the key you press. The Tap Extended method cycles through letters, numbers, and symbols.

1. Press a key one or more times to cycle through its characters.
2 Repeat the step above to enter all characters.

**Tip:** Press \( \text{ } \) to insert a space.

In a text entry screen you can press \( \# \) to switch entry modes. If Tap or Tap Extended is not available as the Primary or Secondary entry mode, see page 37.

### numeric method

In a text entry screen, press \( \# \) to switch entry methods until your phone displays the \( 1 \) (numeric) indicator.

Press keypad keys to enter numbers. When finished, press \( \# \) to switch entry modes.

### symbol method

In the text entry screen, press \( \# \) to switch entry methods until your phone displays the \( \# \) (symbol) indicator.

1 Press a key one or more times to show possible symbol combinations at the bottom of the screen.

2 Scroll left or right to highlight a symbol and press Select to enter it.

### delete letters & words

Move the cursor to the right of the text you want to delete and then:

- Press Delete to delete one letter at a time.
- Press and hold Delete to delete the entire message.
messages

You can send and receive text (SMS/EMS) and multimedia (MMS) messages as well as access your voicemail from the Messages menu. Each message type allows you to attach different objects. The available options are displayed in the Insert menu.

Tip: Press ➤ to go to the messages menu.

Note: Your phone can store a maximum of 750 messages, shared between the Inbox, Outbox and Draft folders.

send a message

Find it: ☑ > ☎ Messages > Create

1. Select a message type and enter the message text.

2. To insert a picture, sound, or other object, press Insert.

3. When you finish the message, press OK. Choose one or more people to send to.

4. Press Send.

quick text

Set your home screen to access the Quick Text option so that you can send messages faster.

Find it: ☑ > ☑ Settings > Personalize > Home Screen > Home Keys > Up, Down, Left or Right > Quick Text

After setup you can quickly access the text entry screen by pressing the navigation key direction you set for Quick Text.
receive a message

When you receive a message, your phone plays an alert, flashes (new message) on the external display, and displays a new message notification on the home screen. Press the Read soft key to read the message immediately, or the Exit soft key to save it in your message inbox for viewing later. To read messages in your message inbox:

Find it:  &gt; Messages &gt; Inbox

Scroll to the message you want to read. Press Select to open the message. For MMS messages, your phone displays the media object, then the message.

voicemail

Your network stores the voicemail messages you receive.

When you receive a voicemail message, your phone shows an indicator and New Voicemail. Press Call to call your voicemail.

To check your voicemail messages at any time:

Find it:  &gt; Messages &gt; Voicemail &gt; Call

Note: Your service provider may have assigned quick dial number 1 for calling voicemail and may provide additional information about using voicemail.

more messaging

<table>

</tbody>
</table>
MotoID

If you hear a song on the radio, television, or another music source that you want to know the artist or name of, you can use your phone to identify it.

**Find it:** 🎧 > 🎮 Games & Apps > MotoID

Put your phone near the source of music, such as a speaker, and press Listen.

Your phone sends a sound sample to a service provider. If there’s a matching song, your phone shows you the title and artist. (The song must be commercially recorded.) Your phone stores the song information so you can view it again later.

When your phone identifies a song, you can:

- Press Options to view details for songs your phone has identified, or do other tasks.
- Press Listen to identify another song.

get music

Copy music to an optional memory card.

**Connect:**

1. With a memory card inserted and your phone in the home screen, insert the USB cable in your phone (see page 62) and your Windows PC.

**Note:** Your phone supports Microsoft™ Windows XP™ and Windows Vista™. Other operating systems may not be compatible with your phone.
2 On your phone, press Yes to connect your phone as a storage device.

Note: For USB cable connection details, see page 62.

3 Now that you are connected, use USB drag and drop to copy your music to the memory card.

USB drag and drop:
1 Use the My Computer window to find Removable Device. The picture, video, java and music folders are automatically available.

2 Drag and drop your music, photos, videos and other items that you want to copy into the picture, video, java and music folder.

Note: A file name (including the path) must be less than 255 characters. For example, if you copy songs into a folder you create that is named “MyMotoSongs,” the name of any song PLUS the name of the folder “MyMotoSongs” must be less than 255 characters.

3 When you’re done, use the Safely Remove Hardware feature on the computer to finish.

music player
Use your phone to play, AAC, AAC+, eAAC+, MIDI, MP3, RA, WAV, and WMA music file types:

Find it:
Note: Your phone may not play MP3 files that have a bit rate higher than 320 kbps. If you try to download or play one of these files, your phone may display an error message or ask you to delete the file.

Tip: Connect a stereo or Bluetooth® headset for high quality music playback.

**FM radio**

**Find it:** \( \text{More} > \text{FM Radio} \)

To use the RDS FM Radio you need to connect a stereo headset to the 3.5 mm headset jack.

• Press \( \text{left or right} \) to change the frequency.

• Press the up or down volume keys on the side of the phone, or press \( \text{up or down} \) to adjust the volume.

• Press Options > Mute to mute the radio.

**use the radio presets**

1. Tune in the desired frequency by pressing \( \text{left or right} \), or press Options > Scan to scan for all available radio stations. You can also use the keypad keys to enter a frequency by pressing Options > Set Frequency.
2 Press and hold a number key to save that number as the preset.

select a radio preset
1 Press Options > Station Presets to view a list of all radio presets.
2 Press up or down to select a preset.
Tip: If you know the number assigned to the preset station, press the keypad number to select it.

record FM radio clips
1 Press Options > Record.
   Note: The maximum recording length is 100 seconds.
2 Press Options > Stop Recording to stop the recording.
   The clip is saved in Multimedia > Sounds.
   Note: The unauthorized copying of copyrighted materials is contrary to the provisions of the Copyright Law of the United States and other countries. This device is designed solely for copying non-copyrighted materials, materials which you own the copyright, or materials which you are authorized or legally permitted to copy. If you are uncertain about your right to copy any material, please consult your legal advisor.
   Note: Playback of recorded radio clips is in mono sound format only.

turn radio off
To turn the radio off press Options > FM radio off.

hide radio
To hide the radio press Options > Hide. Press Radio soft key to see the radio again.

Note: You can close the phone and use the touch-sensitive keys to stop the radio and to change frequency.
share a radio station

Share your favorite radio stations with friends:

**Find it:** と思った > Multimedia > FM Radio > Options >
Send Station Info

Use the message screen to send the station frequency. Your friend can access the station with a single click.

select the radio output

You can play the radio through a stereo headset or a speaker. Press Use Headset or Use Speaker.

camera

**Find it:** と思った > Multimedia > Camera

Your camera lens is on the front of your phone (see page 2). To get the clearest pictures, wipe the lens clean with a soft dry cloth before you take a picture.

take a photo

With the viewfinder open, press Capture to take the photo.

Press  left/right to adjust level of brightness
Press  up/down to zoom in/out
Press  center key to view more options.

To view your photos at any time, press

**Tip:** Press Store > Send in message to share it with your friends.
photo features

Bluetooth® wireless

Your phone supports Bluetooth wireless connections with audio devices, such as a handsfree headset or music system.

**Note:** The use of wireless phones while driving may cause distraction. Discontinue a call if you can’t concentrate on driving. Additionally, the use of wireless devices and their accessories may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of these products.

For maximum Bluetooth security, you should always connect Bluetooth devices in a safe, private environment.

**connect to an audio device**

**Before you try to connect your phone with an audio device,** make sure the device is **on** and **ready** in **pairing** or **bonding** mode (see the user’s guide for the device).

**Find it:** 📱 > 📻 Settings > Bluetooth Link > Audio Devices

If Bluetooth is off, you will be prompted to turn it on. Your phone lists the devices it finds within range:

1. Scroll to a device in the list and press the center key •.
2. If necessary, press the Yes or OK key to connect to the device.
3. If necessary, enter the device passkey (such as 0000) and press the OK key.
When your phone is connected, the Bluetooth indicator is highlighted in the status bar and displayed on the top of the phone.

**Shortcut:** When your phone’s Bluetooth power is on, your phone can automatically connect to a handsfree device you have used before. Just turn on the device, or move it near the phone. If the device doesn’t connect, turn it off and back on.

**send files to another device**

You can send a media file, phonebook entry, agenda event and more from your phone to a computer or other device.

**Note:** You can’t copy some copyrighted objects.

1. On your phone, scroll to the object that you want to copy to the other device.
2. Press Options > Send > To Bluetooth.
3. Select a recognized device name, or Look for device to search for the device where you want to copy the file.

**If your phone could not send the file to the other device,** make sure the device is on and ready in discoverable mode (see the user’s guide for the device). Also, make sure the device is not busy with another similar Bluetooth connection.

**Note:** Once you connect your phone to a Bluetooth device, that device can start similar Bluetooth connections with your phone. When your phone is connected, the Bluetooth indicator is highlighted in the status bar and displayed on the top of the phone.

**receive files from another device**

If you do not see the Bluetooth indicator in the status bar, turn on your phone’s Bluetooth feature by pressing Settings > Bluetooth Link > Setup > Power > On.
1 Place your phone near the device, and send the file from the device.

If your phone and the sending device don't recognize each other, place your phone in discoverable mode so the sending device can locate it: Press > Settings > Bluetooth Link > Find Me.

2 Press the Accept key on your phone to accept the file from the other device.

Your phone notifies you when file transfer is complete.

**more Bluetooth features**

**Note:** A device is recognized after you have paired or bonded with it (see page 59).

You can use your phone’s mini USB port to connect to a computer.

**Note:** Motorola Original™ USB data cables and supporting software may be sold separately. You can download software and buy a cable from Motorola Phone Tools at direct.motorola.com/hellomoto/phonetools.com.

If you use a USB cable connection:

- Be sure to connect the phone to a high-power USB port **on your computer** (not a low-power one, such as the USB port on your keyboard or bus-powered USB hub.

**Note:** If you connect your phone to a low-power USB port, the computer may not recognize your phone.

- Make sure both your phone and the computer are turned on and the phone is in the home screen.

**Note:** When your phone is plugged into a computer and is being used for mass storage, it cannot be used for anything else. To restore

---

**features**

- disconnect a headset or handsfree device
  - Settings > Bluetooth Link > Audio Devices
  
  Scroll to the device name and press Options > Disconnect.

- switch to headset or handsfree device during call
  
  During a call, press Options > Audio > device name, to switch to a recognized headset or car kit.
the phone to normal use, disconnect it from the PC.

- Your phone currently supports Microsoft™ Windows XP™ and Windows Vista™. Other operating systems may not be compatible with your phone.

Attach the Motorola Original USB cable to the mini USB port on your phone and to an available USB port on your computer.

**Note:** The battery will start charging.

On your computer:

1. Open your “My Computer” window, where your phone’s memory card shows as a “Removable Disk” icon.

2. Click on the “Removable Disk” icon to access the memory card.

3. If necessary, in the “Removable Disk” (memory card) window, create one or more folders for the files you will copy onto the memory card.

4. To copy files between your computer and phone, drag and drop into the appropriate folders.

5. When you’re finished, remove the device by selecting the “Safely Remove Hardware” icon at the bottom of your computer screen, then select “USB Mass Storage Devices” and “Stop.”

**Note:** To help manage your files, you can also create new folders in the existing folders.

Use these folders on your memory card for the file types indicated:

- picture files (JPG, PNG, or BMP): picture
- video files (MIDI and WAV): video
- java apps & games: java
• music files (MP3): **music**
  (see page 44).

**Tip:** You can store music on your phone or memory card. You do not have to use the **music** folder but **do not copy files to the main directory.**

**Note:** The maximum single picture file size is 600 kB. A file name (including the path) must be less than 255 characters. For example, if you copy songs into a folder you create that is named “MyMotoSongs,” the name of any song PLUS the name of the folder “MyMotoSongs” must be less than 255 characters.
service & repairs

If you have questions or need assistance, we’re here to help.

Go to www.motorola.com/support, where you can select from a number of customer care options. You can also contact the Motorola Customer Support Center at 0800 666 8676 (Argentina), 0800-201-442 (Chile), 01-800-700-1504 (Colombia), 01 800 021 0000 (México), 0800-100-4289 (Venezuela), or 0-800-52-470 (Perú).
Specific Absorption Rate Data

This model wireless phone meets the government’s requirements for exposure to radio waves.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government and by the Canadian regulatory authorities. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age or health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC and by the Canadian regulatory authorities is 1.6 W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC and by Industry Canada with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the power output.

Before a phone model is available for sale to the public in the U.S. and Canada, it must be tested and certified to the FCC and Industry Canada that it does not exceed the limit established by each government for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) reported to the FCC and available for review by Industry Canada. The highest SAR value for this model phone when tested for use at the ear is 0.74 W/kg, and when worn on the body, as described in this user guide, is 0.52 W/kg. The SAR value for this product in its data transmission mode (body-worn use) is 0.56 W/kg. (Body-worn measurements differ among phone models, depending upon available accessories and regulatory requirements).

While there may be differences between the SAR levels of various phones and at various positions, they all meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.
Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) Web site:
http://www.phonefacts.net
or the Canadian Wireless Telecommunications Association (CWTA) Web site:
http://www.cwta.ca

1. In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

2. The SAR information includes the Motorola testing protocol, assessment procedure, and measurement uncertainty range for this product.
Specific Absorption Rate Data

This model meets international guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The ICNIRP SAR limit for mobile devices used by the general public is 2 W/kg and the highest SAR value for this device when tested at the ear is 0.74 W/kg (850/1900 MHz); 0.8 W/kg (900/1800 MHz). As mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this user's guide. In this case, the highest tested SAR value is 0.52 W/kg (850/1900 MHz); 0.31 W/kg (900/1800 MHz).

As SAR is measured utilizing the device's highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a "handsfree" device to keep the mobile phone away from the head and body.

Additional Information can be found on the websites of the World Health Organization (http://www.who.int/emf) or Motorola, Inc. (http://www.motorola.com/RFHealth).

1. The tests are carried out in accordance with international guidelines for testing. The limit incorporates a substantial margin for safety to give additional protection for the public and to account for any variations in measurements. Additional related information includes the Motorola testing protocol, assessment procedure, and measurement uncertainty range for this product.

2. Please see the Safety and General Information section about body worn operation.
Hearing Aid Compatibility with Mobile Phones

Some Motorola phones are measured for compatibility with hearing aids. If the box for your particular model has "Rated for Hearing Aids" printed on it, the following explanation applies.

When some mobile phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate.

The wireless telephone industry has developed ratings for some of their mobile phones, to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label on the box.

The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

**M-Ratings:** Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

**T-Ratings:** Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device's telecoil ("T Switch" or "Telephone Switch") than unrated phones. T4 is the better/higher of the two ratings. (Note that not all hearing devices have telecoils in them.)

Hearing devices may also be measured for immunity to this type of interference. Your hearing device manufacturer or hearing health professional may help you find results for your hearing device. The more immune your hearing aid is, the less likely you are to experience interference noise from mobile phones.
Hereby, Motorola declares that this product is in compliance with:

- The essential requirements and other relevant provisions of Directive 1999/5/EC
- All other relevant EU Directives

Approval Number from your product's label in the "Search" bar on the Web site.

The above gives an example of a typical Product Approval Number. You can view your product's Declaration of Conformity (DoC) to Directive 1999/5/EC (to R&TTE Directive) at www.motorola.com/rtte. To find your DoC, enter the Product Approval Number from your product's label in the "Search" bar on the Web site.

Important Safety and Legal Information
Safety Information

This section contains important information on the safe and efficient operation of your mobile device. Read this information before using your mobile device.

Exposure to Radio Frequency (RF) Energy
Your mobile device contains a transmitter and receiver. When it is ON, it receives and transmits RF energy. When you communicate with your mobile device, the system handling your call controls the power level at which your mobile device transmits. Your Motorola mobile device is designed to comply with local regulatory requirements in your country concerning exposure of human beings to RF energy.

Operational Precautions
For optimal mobile device performance, and to be sure that human exposure to RF energy does not exceed the guidelines set forth in the relevant standards, always follow these instructions and precautions.

Product Operation
When placing or receiving a phone call, hold your mobile device just like you would a landline phone.

If you wear the mobile device on your body, always place the mobile device in a Motorola-supplied or approved clip, holder, holster, case, or body harness. If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 centimeters (1 inch) from your body when transmitting.

Using accessories not supplied or approved by Motorola may cause your mobile device to exceed RF energy exposure guidelines. For a list of Motorola-supplied or approved accessories, visit our Web site at: www.motorola.com.

RF Energy Interference/Compatibility
Nearly every electronic device is subject to RF energy interference from external sources if inadequately shielded, designed, or otherwise configured for RF energy compatibility. In some circumstances your mobile device may cause interference with other devices.
Follow Instructions to Avoid Interference Problems

Turn off your mobile device in any location where posted notices instruct you to do so.

In an aircraft, turn off your mobile device whenever instructed to do so by airline staff. If your mobile device offers an airplane mode or similar feature, consult airline staff about using it in flight.

Implantable Medical Devices

If you have an implantable medical device, such as a pacemaker or defibrillator, consult your physician before using this mobile device.

Persons with implantable medical devices should observe the following precautions:

- ALWAYS keep the mobile device more than 20 centimeters (8 inches) from the implantable medical device when the mobile device is turned ON.
- DO NOT carry the mobile device in the breast pocket.
- Use the ear opposite the implantable medical device to minimize the potential for interference.
- Turn OFF the mobile device immediately if you have any reason to suspect that interference is taking place.

Read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using your mobile device with your implantable medical device, consult your healthcare provider.

Driving Precautions

The use of wireless phones while driving may cause distraction. Discontinue a call if you can’t concentrate on driving.

Additionally, the use of wireless devices and their accessories may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of these products.

Responsible driving practices can be found in the “Smart Practices While Driving” section in this guide (or separate guide).

Operational Warnings

Obey all posted signs when using mobile devices in public areas.

Potentially Explosive Atmospheres

Areas with potentially explosive atmospheres are often, but not always, posted and can include fueling areas, such as below decks on boats, fuel or chemical transfer or storage facilities, or areas where the air contains chemicals or particles, such as grain dust, or metal powders.

When you are in such an area, turn off your mobile device, and do not remove, install, or charge batteries. In such areas, sparks can occur and cause an explosion or fire.
Symbol Key
Your battery, charger, or mobile device may contain symbols, defined as follows:

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>!</td>
<td>Important safety information follows.</td>
</tr>
<tr>
<td>✖️</td>
<td>Do not dispose of your battery or mobile device in a fire.</td>
</tr>
<tr>
<td>🔄️</td>
<td>Your battery or mobile device may require recycling in accordance with local laws. Contact your local regulatory authorities for more information.</td>
</tr>
<tr>
<td>🚫</td>
<td>Do not throw your battery or mobile device in the trash.</td>
</tr>
<tr>
<td>🚫</td>
<td>Do not let your battery, charger, or mobile device get wet.</td>
</tr>
<tr>
<td>🔊</td>
<td>Listening at full volume to music or voice through a headset may damage your hearing.</td>
</tr>
</tbody>
</table>

Batteries & Chargers
Caution: Improper treatment or use of batteries may present a danger of fire, explosion, leakage, or other hazard. For more information, see the “battery use & safety” section in the user’s guide.

Keep Your Mobile Device and Its Accessories Away From Small Children
These products are not toys and may be hazardous to children. For example:

- A choking hazard may exist for small, detachable parts.
- Improper use could result in loud sounds, possibly causing hearing injury.
- Improperly handled batteries could overheat and cause a burn.

Glass Parts
Some parts of your mobile device may be made of glass. This glass could break if the product is dropped on a hard surface or receives a substantial impact. If glass breaks, do not touch or attempt to remove. Stop using your mobile device until the glass is replaced by a qualified service center.
Seizures/Blackouts

Some people may be susceptible to epileptic seizures or blackouts when exposed to flashing lights, such as when playing video games. These may occur even if a person has never had a previous seizure or blackout.

If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult with your physician before playing video games or enabling a flashing-lights feature (if available) on your mobile device.

Discontinue use and consult a physician if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation. It is always a good idea to hold the screen away from your eyes, leave the lights on in the room, take a 15-minute break every hour, and stop use if you are tired.

Caution About High Volume Usage

Warning: Exposure to loud noise from any source for extended periods of time may affect your hearing.

The louder the volume sound level, the less time is required before your hearing could be affected. To protect your hearing:

- Limit the amount of time you use headsets or headphones at high volume.
- Avoid turning up the volume to block out noisy surroundings.
- Turn the volume down if you can’t hear people speaking near you.

If you experience hearing discomfort, including the sensation of pressure or fullness in your ears, ringing in your ears, or muffled speech, you should stop listening to the device through your headset or headphones and have your hearing checked.

For more information about hearing, see our Web site at {www.motorola.com/hearingsafety} (in English only).

Repetitive Motion

When you repetitively perform actions such as pressing keys or entering finger-written characters, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. If you continue to have discomfort during or after such use, stop use and see a physician.

{Mar0108}
The following statement applies to all products that have received FCC approval. Applicable products bear the FCC logo, and/or an FCC ID in the format FCC-ID:xxxxxx on the product label.

Motorola has not approved any changes or modifications to this device by the user. Any changes or modifications could void the user’s authority to operate the equipment. See 47 CFR Sec. 15.21.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See 47 CFR Sec. 15.19(3).

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
Latin America Warranty, except Mexico

Latin America Warranty
MOTOROLA INC.
Subscribers/Cellular Division

Through its own service centers and/or its authorized service centers, Motorola provides a 1-year warranty that covers the cellular phone, all its parts and labor against any defect and operation as long as the "Product" has been operated and handled under normal conditions. The term of 1 year begins when the "Product" is purchased.

Conditions

1. For warranty service, return the "Product" and this warranty to the place of purchase or to any Motorola authorized service center.

If additional information is needed, please contact any of our service centers:

Motorola de México, S.A.
Bosques Alisos No. 125
Bosques de las Lomas
CP 05120 México, D.F.
Telephone: 257-6700

Motorola de Brasil
Rua Bandeira, Paulista 580
São Paulo, Brazil 05424-010
Telephone: 821-9991
Warranty (except Mexico)

If the cellular phone has been installed in a vehicle, take the vehicle to the service center to analyze the equipment, or the installation on the vehicle. This warranty does not cover the installation of the cellular phone.

Motorola Inc., through its own service centers and/or their authorized service centers, will repair or replace the cellular phone at no charge. This warranty covers shipping expenses, only if it is needed to make the repair.

Motorola Inc. through its own service centers and/or their authorized service centers, at its own discretion, will repair, replace, or reimburse the purchase price of the defective cellular phone only during the warranty period, as long as the “Product”, in accordance with the conditions established in this warranty, is returned to a Motorola service center or to a Motorola authorized service center. All the accessories, batteries, parts, small boards or equipment of the cellular telephone that by virtue of being defective are replaced in fulfillment of this warranty, will automatically become property of Motorola Inc.

To receive warranty service, present your cellular phone or accessory to any Motorola service center or to any Motorola authorized service center along with your receipt of purchase or comparable substitute that indicates the date of purchase, serial number of the transceiver, and/or electronic serial number.

The repair time will not be greater than 30 days, starting from the day the equipment was received at the service center.

To purchase parts, spare parts, accessories and service not covered by this warranty, contact one of the following service centers:

Centro de Servicio
Motorola de Colombia
Diagonal 127A N. 17-64
Bogotá, Colombia
Telephone: 615-5759
Telephone: 615-5769

Bosques de las Lomas CP 05120 México, D.F.
Telephone: 257-6700

Motorola de Brasil
Rua Bandeira, Paulista 580
Sao Paulo, Brazil 05424-010
Telephone: 821-9991
Warranty (except Mexico)

81

Or to any authorized service center in your locality.

6 This warranty is not valid in the following cases:
   a Defects or damages derived from abnormal use.
   b Defects or damages derived from accident or negligence.
   c Defects or damages derived from tests, unsuitable operation, maintenance, installation and adjustments, or derived from any alteration or modification of any type.
   d Damage caused to antennas, unless they are consequences of defects in material or workmanship.
   e When the cellular phone has been disassembled and/or repaired so that its operation has been affected or that it can not be tested to verify any claim that grants this warranty.
   f Any cellular phone with a serial number that has been removed, altered, or obliterated.
   g Defects or damages caused by food spills or liquids.
   h When the cables of the control unit have been stretched or the module tongue-piece has broken.
   i When the surface of the “Product” and its pieces have been scratched or damaged due to the normal use.
   j Leather cases.
   k Rented cellular phones.
   l When the “Product” has been altered or repaired by non-Motorola authorized service centers.
   m When the “Product” has not been operated in agreement with the instructions that accompany the “Product”.

The batteries (Nickel-Cadmium) are warranted only if their capacity is reduced by 80% below its predicted capacity. This warranty is null for all types of batteries if:
   a The batteries are charged by a charger that has not been approved by MOTOROLA.
   b If any of the battery seals are broken or tampered with.
   c If the batteries were used or installed in non-MOTOROLA equipment.

“Product”:
Brand: Motorola Model:

Warranty (except Mexico)  81
Limited Warranty (Mexico)

For Motorola Personal Communication Products and Accessories that are Purchased in Mexico

I. Concepts Covered by this Warranty
This warranty covers all the parts, components, accessories and labor of the Motorola “product” from defects in materials and workmanship under normal consumer usage.

II. Length of Warranty Coverage
The length of coverage is one (1) year from the date the new “Product” was purchased from an authorized distributor.
III. Place where consumers can make the warranty effective, obtain parts, components, and accessories:

Motorola de México, S.A.
Bosques de Alisos 125
Col. Bosques de las Lomas
Del. Cuajimalpa
Te (55) 5257-6700

IV. Procedure to Make the Warranty Effective

For warranty service, return the “Product” (with its components and accessories, such as batteries, antennas, and charger) to the place of purchase, to the address above, or to an authorized service center, or call 01 800 021 0000. To request a refund, you must present this warranty, sealed by the place of purchase, along with the “Product.”

V. Warranty Limitations or Exceptions

The warranty is not valid:

1. When the “Product” has been used in conditions different from the normal ones.

2. When the “Product” has not been operated as described in the operating instructions.

3. When the “Product” has been altered or repaired by someone other than Motorola, or its authorized service centers.

If repairs are not covered by this warranty, Motorola, at the request of the purchaser, will provide information regarding availability, prices, and other conditions for the repair of the “Product.”
To obtain information on Products that need repairs not covered by this warranty, please call 01 800 021 0000.

**Note:** In other countries, consult the laws and local regulations under the warranty and its local Motorola office.

**Information from the World Health Organization**

Present scientific information does not indicate the need for any special precautions for the use of mobile phones. If you are
concerned, you may want to limit your own or your children’s RF exposure by limiting the length of calls or by using handsfree devices to keep mobile phones away from your head and body.

Caring for the Environment by Recycling

This symbol on a Motorola product means the product should not be disposed of with household waste.

Disposal of your Mobile Device

Packaging and User’s Guide

Product packaging and user’s guides should only be disposed of in accordance with national collection and recycling requirements. Please contact your regional authorities for more details.

Disposal of your Mobile Device and Accessories

Please do not dispose of mobile devices or electrical accessories (such as chargers, headsets, or batteries) with your household waste. These items should be disposed of in accordance with the national collection and recycling schemes operated by your local or regional authority. Alternatively, you may return unwanted mobile devices and electrical accessories to any Motorola Approved Service Center in your region. Details of Motorola approved national recycling schemes, and further information on Motorola recycling activities can be found at: www.motorola.com/recycling
Privacy and Data Security

Motorola understands that privacy and data security are important to everyone. Because some features of your mobile device may affect your privacy or data security, please follow these recommendations to enhance protection of your information:

- **Monitor access**—Keep your mobile device with you and do not leave it where others may have unmonitored access. Lock your device’s keypad where this feature is available.

- **Keep software up to date**—If Motorola or a software/application vendor releases a patch or software fix for your mobile device that updates the device’s security, install it as soon as possible.

- **Erase before recycling**—Delete personal information or data from your mobile device prior to disposing of it or turning it in for recycling. For step-by-step instructions on how to delete all personal information from your device, see the section entitled “master clear” or “delete data” in the user’s guide.

  **Note:** For information on backing up your mobile device data before erasing it, go to www.motorola.com and navigate to the “downloads” section of the consumer Web page for “Motorola Backup” or “Motorola Phone Tools.”

- **Understanding AGPS**—To provide location information for emergency calls, certain Motorola mobile devices incorporate Assisted Global Positioning System (AGPS) technology. AGPS technology also can be used in non-emergency applications to track and monitor a user’s location—for example, to provide driving directions. Users who prefer not to permit such tracking and monitoring should avoid using such applications.

If you have further questions regarding how the use of your mobile device may impact your privacy or data security, please contact Motorola at privacy@motorola.com, or contact your service provider.
Smart Practices While Driving

Drive Safe, Call Smart

Check the laws and regulations on the use of mobile devices and their accessories in the areas where you drive. Always obey them. The use of these devices may be prohibited or restricted in certain areas -- for example, handsfree use only. Go to www.motorola.com/callsmart (in English only) for more information.

Your mobile device lets you communicate by voice and data—almost anywhere, anytime, wherever wireless service is available and safe conditions allow. When driving a car, driving is your first responsibility. If you choose to use your mobile device while driving, remember the following tips:

- Get to know your Motorola mobile device and its features such as speed dial and redial. If available, these features help you to place your call without taking your attention off the road.
- When available, use a handsfree device. If possible, add an additional layer of convenience to your mobile device with one of the many Motorola Original handsfree accessories available today.
- Position your mobile device within easy reach. Be able to access your mobile device without removing your eyes from the road. If you receive an incoming call at an inconvenient time, if possible, let your voicemail answer it for you.
- Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow, ice, and even heavy traffic can be hazardous.
- Do not take notes or look up phone numbers while driving. Jotting down a "to do" list or going through your address book takes attention away from your primary responsibility—driving safely.
- Dial sensibly and assess the traffic; if possible, place calls when your car is not moving or before pulling into traffic. If you must make a call while moving, dial only a few numbers, check the road and your mirrors, then continue.
- Do not engage in stressful or emotional conversations that may be distracting. Make people you are talking with aware you are driving and suspend conversations that can divert your attention away from the road.
• Use your mobile device to call for help. Dial 911 or other local emergency number in the case of fire, traffic accident, or medical emergencies.*

• Use your mobile device to help others in emergencies. If you see an auto accident, crime in progress, or other serious emergency where lives are in danger, call 911 or other local emergency number, as you would want others to do for you.*

• Call roadside assistance or a special non-emergency wireless assistance number when necessary. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number.*

* Wherever wireless phone service is available.
