Welcome

Welcome to the world of Motorola digital wireless communications! We are pleased that you have chosen the Motorola V555 GSM wireless phone.

- **Headphone Connector**
- **Menu Key**
  - 5-Way Navigation Key
    - Scroll to items.
- **Left Soft Key**
  - Perform function in lower left display.
- **Right Soft Key**
  - Perform function in lower right display.
- **Browser Key**
- **Volume Keys**
- **Smart Key**
- **Send Key**
  - Make & answer calls.
- **Accessory Connector**
- **Context Key**
- **Voice Key**
- **Camera Key**
- **Power & End Key**
  - Turn phone on/off, end calls, exit menu system.

Getting Started

CAUTION: Before using the phone for the first time, read the Important Safety and Legal Information included in the gray-edged pages at the back of this guide.

About This Guide
This guide describes the basic features of your Motorola wireless phone.

Optional Features
This label identifies an optional network, SIM card, or subscription-dependent feature that may not be offered by all service providers in all geographical areas. Contact your service provider for more information.

Optional Accessories
This label identifies a feature that requires an optional Motorola Original™ accessory.

Installing the SIM Card
Your Subscriber Identity Module (SIM) card contains your phone number, service details, and phonebook/message memory.
Caution: Do not bend or scratch your SIM card. Avoid exposing your SIM card to static electricity, water, or dirt.

Battery Tips

Battery life depends on the network, signal strength, temperature, features, and accessories you use.

- Always use Motorola Original batteries and battery chargers. The warranty does not cover damage caused by non-Motorola batteries and/or chargers.
• New batteries or batteries stored for a long time may take more time to charge.
• When charging your battery, keep it near room temperature.
• When storing your battery, keep it uncharged in a cool, dark, dry place, such as a refrigerator.
• Never expose batteries to temperatures below -10°C (14°F) or above 45°C (113°F). Always take your phone with you when you leave your vehicle.
• It is normal for batteries to gradually wear down and require longer charging times. If you notice a change in your battery life, it is probably time to purchase a new battery.

Contact your local recycling center for proper battery disposal.

Warning: Never dispose of batteries in a fire because they may explode.

Before using your phone, please read the battery safety information in the Safety and General Information section included in this guide.

**Installing the Battery**

Your phone is designed to use only Motorola Original batteries and accessories.
Charging the Battery

New batteries are shipped partially charged. Before you can use your phone, install and charge the battery as described below. Some batteries perform best after several full charge/discharge cycles.
Getting Started

Tip: You can safely leave the travel charger connected to your phone after charging is complete. This will not damage the battery.

Turning Your Phone On

Action

1. Press and hold the power key for 2 seconds to turn on the phone.

2. If necessary, enter your SIM card PIN code and press the OK key to unlock the SIM card.
   
   Caution: If you enter an incorrect PIN code 3 times in a row, your SIM card is disabled and your phone displays SIM Blocked.

3. If necessary, enter your 4-digit unlock code and press the OK key to unlock the phone.
**Getting Started**

---

**Adjusting Volume**

Press up or down on volume keys to:

- increase or decrease earpiece volume during a call
- turn off an incoming call alert
- increase or decrease the ringer volume setting when the home screen is visible

**Tip:** At the lowest volume setting, press the down volume key once to switch to vibrate alert. Press it again to switch to silent alert. Press the up volume key to cycle back to vibrate alert, then ring alert.

---

**Making a Call**

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>keypad keys dial the phone number</td>
</tr>
<tr>
<td>2</td>
<td>call key make the call</td>
</tr>
<tr>
<td>3</td>
<td>end key end the call and “hang up” the phone when you are finished</td>
</tr>
</tbody>
</table>
**Answering a Call**

When you receive a call, your phone rings and/or vibrates and displays an incoming call message.

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>answer the call</td>
</tr>
<tr>
<td>2</td>
<td>end the call and &quot;hang up&quot; the phone when you are finished</td>
</tr>
</tbody>
</table>

**Viewing Your Phone Number**

To view your phone number from the home screen, press # #.

While you are on a call, press # > **My Tel. Numbers**.

**Note:** Your phone number must be stored on your SIM card to use this feature. To store your phone number on the SIM card, see page 45. If you do not know your phone number, contact your service provider.
Highlight Features

You can do much more with your phone than make and receive calls! This section describes some of your phone’s highlight features.

Taking and Sending a Photo

Press \( \text{J} \) to display the camera viewfinder:

- Press \( \text{S} \) up or down to zoom in or out.
- Press \( \text{S} \) left or right to change brightness.
- Press \( \text{M} \) to open Pictures menu.
- Return to previous screen.
- Take a photo.

Remaining Memory
Point the camera lens at the photo subject, then:

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 CAPTURE key</td>
<td>take a photo</td>
</tr>
<tr>
<td>2 STORE key</td>
<td>view storage options</td>
</tr>
<tr>
<td>or DISCARD key</td>
<td>delete the photo and return to the active viewfinder</td>
</tr>
<tr>
<td>3 -○-</td>
<td>scroll to Send in Message, Store Only, Apply as Wallpaper, Apply as Screen Saver, or Apply as Phonebook Entry</td>
</tr>
<tr>
<td>4 SELECT key</td>
<td>perform the storage option of your choice</td>
</tr>
</tbody>
</table>

Press menu to open the **Pictures Menu** when the camera is active. The **Pictures Menu** can include the following options:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Go To Pictures</td>
<td>View pictures and photos stored on your phone.</td>
</tr>
<tr>
<td>Auto-Timed Capture</td>
<td>Set a timer for the camera to take a photo.</td>
</tr>
<tr>
<td>Pictures Setup</td>
<td>Open the setup menu to adjust picture settings.</td>
</tr>
<tr>
<td>View Free Space</td>
<td>See how much memory remains.</td>
</tr>
</tbody>
</table>
Recording Video Clips

To record a video on your phone:

Find the Feature ➤ Multimedia ➤ Videos ➤ New Video

The active viewfinder image displays.

Note: You can only zoom before you start recording.
Point the camera lens at the video subject, then:

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Capture key</td>
<td>start the video</td>
</tr>
<tr>
<td>2 Stop key</td>
<td>stop the video</td>
</tr>
</tbody>
</table>
Press M to open the Videos Menu when the camera is active. The menu can include the following options:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Go To Videos</td>
<td>View videos stored on your phone.</td>
</tr>
<tr>
<td>Videos Setup</td>
<td>Open the setup menu to adjust picture and video settings.</td>
</tr>
<tr>
<td></td>
<td><strong>Note:</strong> If you set Video Length to Maximum, your network might not let</td>
</tr>
<tr>
<td></td>
<td>you send the video in an MMS message. If necessary, ask your service provider</td>
</tr>
<tr>
<td></td>
<td>about limitations.</td>
</tr>
<tr>
<td>View Free Space</td>
<td>See how much memory remains.</td>
</tr>
</tbody>
</table>
## Sending a Multimedia Message

A Multimedia Messaging Service (MMS) message contains one or more slides with text and media objects (including photos, pictures, animations, sounds, voice records, and/or video clips). You can send the multimedia message to other wireless phone users, and to email addresses.

### Find the Feature

- Phone: > Messages > Create Message
- > New Multimedia Msg

### Press

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>keypad keys</td>
</tr>
<tr>
<td>2</td>
<td>open the MMS Menu</td>
</tr>
<tr>
<td>3</td>
<td>scroll to Insert</td>
</tr>
<tr>
<td>4</td>
<td>SELECT key</td>
</tr>
<tr>
<td>5</td>
<td>scroll to a type of object to insert</td>
</tr>
<tr>
<td>6</td>
<td>SELECT key</td>
</tr>
<tr>
<td>7</td>
<td>highlight the object you want</td>
</tr>
<tr>
<td>8</td>
<td>SELECT key</td>
</tr>
</tbody>
</table>
  - To add another slide to the message, continue. |
  - To send the message, go to step 14. |
<p>| 9     | open the MMS Menu to insert a new slide |</p>
<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>10 -Ø-</td>
<td>scroll to Insert</td>
</tr>
<tr>
<td>11 SELECT key</td>
<td>display a list of items you can insert</td>
</tr>
<tr>
<td>12 -Ø-</td>
<td>scroll to New Page</td>
</tr>
</tbody>
</table>
| 13 SELECT key | insert a new slide after the current slide  
Repeat steps 1 to 8 to enter contents for the new slide. |
| 14 OK key | store the message |
| 15 -Ø- | scroll to a Send To option:  
- Highlight [One Time Entry] to enter one or more phone numbers and/or email addresses.  
- Highlight [New Phonebook Entry] to enter a number/address and add it to the phonebook.  
- Or highlight an existing phonebook entry. |
| 16 SELECT key | select [One Time Entry] or [New Phonebook Entry] and enter a number/address  
or  
ADD key | add a phonebook entry to the list of recipients |
| 17 DONE key | store the numbers/addresses |
Receiving a Multimedia Message

When you receive a multimedia message or letter, your phone displays the (message waiting) indicator and a New Message notification, and sounds an alert.

Multimedia messages that you receive can contain different media objects:

- Photos, pictures, and animations are displayed as you read the message.
A sound file or video clip begins playing when its slide is displayed. Use the volume keys to adjust the volume as the sound file or video clip plays.

Note: In a multimedia letter, you may have to highlight an indicator in the text to play a sound file or video clip.

Attached files are added to the end of the message. To open the attachment, highlight the file indicator/filename and press the View key (image file type), Play key (sound file or video clip), or Open key (object such as phonebook or datebook entry, or unknown file type).

Using the Phonebook

This section briefly describes basic phonebook operations. For more information about using the phonebook, see page 66.

Storing a Phone Number

Enter a phone number in the home screen, then press the Store key to create a phonebook entry with that number. Fill in the other fields to complete the entry.

Select More to store another number (for example, a work number) under the same Name.

Recording a Voice Name

When creating a phonebook entry, scroll to Voice Name and press the Record key. Press and release the voice key and say the entry’s name (within 2 seconds). When prompted,
Highlight Features

press and release the voice key and repeat the name. Press the **DONE** key to store the voice name.

**Note:** This option is not available for entries stored on the SIM card.

**Storing a Picture for Caller ID**

You can store a picture for a phonebook entry. The picture appears when you receive calls from the entry.

**Note:** This option is not available for entries stored on the SIM card.

When creating a phonebook entry, scroll to **Picture** and press the **CHANGE** key. Press **OK** to select a picture, and press the **SELECT** key to store it for the entry.

**Dialing a Number**

Press **** > **Phonebook** > **entry** to call **.**

**Tip:** To quickly highlight entries in your **Phonebook** list: If your entries are sorted by Speed No., press an entry’s speed number to highlight it. For example, press **15** for entry number 15. If your entries are sorted by **Name**, **Voice Name**, or **Email**, enter the first letter of the entry’s name to highlight it. For example, press **55** for the first entry that starts with “K”.

**Voice Dialing a Number**

Press and release the voice key, and say the entry’s name (within 2 seconds).

**Note:** To voice dial a phonebook entry you must first record a voice name for the entry (see page 20).
**Sorting Phonebook Entries**

Press  > Phonebook, press  > Setup > Sort by, then select whether you want to sort the phonebook list by Name, Speed No., Voice Name, or Email.

When sorting by name, you can view All numbers or just the Primary number for each name. To set the primary number for a name, see page 68.

**Viewing Entries By Category**

Press  > Phonebook, press  > Categories, then select whether you want to view All entries, entries in a predefined category (Business, Personal, General, VIPs), or entries in a category you created.

To set the category for a phonebook entry, see page 68.

**Setting Picture ID View**

Press  > Phonebook, press  > Setup > View by > Picture.
Learning to Use Your Phone

See page 1 for a basic phone diagram.

Using the Display

The home screen displays when you are not on a call or using the menu. You must be in the home screen to dial a phone number.

Press the 5-way navigation key (↑↓←→) left, right, up, or down to select one of the menu feature icons. If you select a menu icon by mistake, press (esc) to return to the home screen.

Note: Your home screen may look different from the display shown above. For example, your service provider may hide the menu feature icons to allow a better view of
the wallpaper image. You can still select the menu icons when they are hidden from view. To show or hide the menu icons, see page 70.

The \( \mathbb{T} \) (menu) indicator indicates that you can press the menu key (\( \mathbb{T} \)) to enter the main menu.

Labels at the bottom corners of the display show the current soft key functions. Press the left or right soft key to perform the function indicated by the left or right soft key label.

Your phone can display an analog or digital clock in the home screen (see page 70).

The following status indicators can display:

1. **Signal Strength Indicator**
   Vertical bars show the strength of the network connection. You cannot make or receive calls when the \( \mathcal{v} \) (no signal) indicator or \( \mathcal{v}\times \) (no transmit) indicator displays.

2. **GPRS Indicator**
Shows that your phone is using a high-speed General Packet Radio Service (GPRS) network connection. GPRS allows faster data transfer speeds. Indicators can include:

- GPRS PDP context active
- GPRS packet data available

3. Data Transmission Indicator

Shows connection and data transmission status. Indicators can include:

- Secure packet data transfer
- Insecure packet data transfer
- Secure application connection
- Insecure application connection
- Secure Circuit Switch Data (CSD) call
- Insecure CSD call
- Secure Bluetooth® connection

4. Roam Indicator

Shows when your phone is seeking or using another network outside your home network. Indicators can include:

- 2.5G home
- 2.5G roam
- 2G home
- 2G roam

5. Active Line Indicator
Shows ✈️ to indicate an active call, or ✈️ to indicate when call forwarding is on. Icons for dual-line-enabled SIM cards can include:

✈️ = line 1 active          ✈️ = line 2 active
✈️✈️ = line 1 active, call forward on
✈️✈️ = line 2 active, call forward on

6. Messaging Presence Indicator
When a Java™ application is active, a 📱 (Java midlet) indicator will display in this location.

7. Message Indicator
Displays when you receive a new message. Indicators can include:

✉️ = text message          ✉️ = voicemail message
✉️✉️ = voicemail and text message

8. Location Indicator
Your phone may be able to send location information to the network during an emergency call. Indicators show when your phone is sending location information:

🧷 = location on          🧷 = location off

9. Ring Style Indicator
Shows the ring style setting.

\[ \Delta \phi = \text{loud ring} \quad \Delta \sigma = \text{soft ring} \]
\[ \| \_ \_ = \text{vibrate} \quad \_\_ \_ \_ = \text{vibrate and ring} \]
\[ \_\_\_\_\_ = \text{silent} \]

10. Battery Level Indicator
Vertical bars show the battery charge level. Recharge the battery when \textit{Low Battery} displays and the battery alert sounds.

\textbf{Using the 5-Way Navigation Key}

Use the 5-way navigation key (\( \Delta \phi \)) to scroll up, down, left, or right through the menu system, highlight menu items, change feature settings, and play games. Press the center select button to select a highlighted menu item.
Using Menus

From the home screen, press \( M \) to enter the main menu.

Press \( S \) to scroll to and highlight a menu feature icon in the main menu. The following icons represent features that may display in the main menu, depending on your service provider and service subscription options.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Feature</th>
<th>Icon</th>
<th>Feature</th>
</tr>
</thead>
<tbody>
<tr>
<td>🎮</td>
<td>Games &amp; Apps</td>
<td>🎥</td>
<td>Multimedia</td>
</tr>
<tr>
<td>📊</td>
<td>Office Tools</td>
<td>🎃</td>
<td>Settings</td>
</tr>
</tbody>
</table>
Selecting a Menu Feature

To select a menu feature, starting from the home screen:

Find the Feature \( \text{ } \) > Recent Calls > Dialed Calls

This example shows that from the home screen, you must press \( \text{ } \text{ } \), scroll to and select \( \text{ } \text{ } \) Recent Calls \( \text{ } \text{ } \) from the main menu, then scroll to and select \( \text{ } \text{ } \) Dialed Calls. Press \( \text{ } \text{ } \) to scroll, and the left/right soft keys to select the functions displayed in the bottom left and right corners of the display.

Selecting a Feature Option

Some features require you to select an option from a list:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Feature</th>
<th>Icon</th>
<th>Feature</th>
</tr>
</thead>
<tbody>
<tr>
<td>( \text{ } )</td>
<td>Phonebook</td>
<td>( \text{ } )</td>
<td>Web Access</td>
</tr>
<tr>
<td>( \text{ } )</td>
<td>Messages</td>
<td>( \text{ } )</td>
<td>Recent Calls</td>
</tr>
</tbody>
</table>

Highlighted Option

Press \( \text{ } \) to go back to previous screen.

Press \( \text{ } \) to open sub-menu

Press \( \text{ } \text{ } \) to scroll down to other options.

Press \( \text{ } \text{ } \) to view details of highlighted option.
Press  to scroll up or down to highlight the option you want.

In a numbered list, press a number key to highlight the option.

In an alphabetized list, press a key repeatedly to cycle through the letters on the key and highlight the closest matching list option.

When an option has a list of possible values, press left or right to scroll through and select a value.

When an option has a list of possible numeric values, press a number key to set the value.

**Entering Text**

Some features require you to enter information.

Highlighted Option

Press CHANGE key to enter or edit information.

Press CANCEL key to exit without changes.

DONE displays after you make changes.
The message center lets you compose and send text messages. A Character Counter indicates how many more characters will fit in the message.

Choosing a Text Entry Mode

Multiple text entry modes make it easy for you to enter names, numbers, and messages. The mode you select remains active until you select another mode.

Press # in any text entry screen to select one of the following entry modes:

- **Primary**: The primary text entry mode (see below to set).
- **Numeric**: Enter numbers only (see page 38).

For indicator descriptions, see following section.

Flashing cursor indicates insertion point.

Press **CANCEL** key to exit without making changes.

Press **INSERT** key to insert a quick note, picture, or sound.

Press **#** to open sub-menu.
Alternatively, you can select a text entry mode in any text entry screen by pressing 📷 > Entry Mode.

**Setting Up a Text Entry Mode**

Press 📷 > Entry Setup from any text entry screen. Select Primary Setup or Secondary Setup, and choose:

- **ITAP**: Let the phone predict each word as you press keys (see page 36).
- **Tap**: Enter letters and numbers by pressing a key one or more times.
- **Tap Extended**: Enter letters, numbers, and symbols by pressing a key one or more times.
- **None**: Hide the Secondary setting (only available for Secondary Setup).

**Using Capitalization**

Press ⌘ in any text entry screen to change text case. The following indicators show capitalization status:

- \( \text{abc} \) = no capital letters
- \( \text{Abc} \) = capitalize next letter only
- \( \text{ABC} \) = all capital letters
Text Entry Mode Indicators

When you select the Primary or Secondary text entry mode, the following indicators identify the text entry setting:

<table>
<thead>
<tr>
<th>Primary</th>
<th>Second.</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2</td>
<td>Tap, no capital letters</td>
</tr>
<tr>
<td>1♀</td>
<td>2♀</td>
<td>Tap, capitalize next letter only</td>
</tr>
<tr>
<td>1♂</td>
<td>2♂</td>
<td>Tap, all capital letters</td>
</tr>
<tr>
<td></td>
<td></td>
<td>iTAP, no capital letters</td>
</tr>
<tr>
<td></td>
<td></td>
<td>iTAP, capitalize next letter only</td>
</tr>
<tr>
<td></td>
<td></td>
<td>iTAP, all capital letters</td>
</tr>
</tbody>
</table>

The following indicators identify Numeric or Symbol entry mode:

123 = numeric mode   @ = symbol mode

Using Tap Mode

This is the standard mode for entering text on your phone. Tap mode cycles through the letters and number of the key you press. Tap Extended mode also cycles through additional symbols as shown in the chart on page 35.
In a text entry screen, you can press # to switch entry modes. If Tap or Tap Extended is not available as the Primary or Secondary entry mode, see page 32.

When you enter text with Tap or Tap Extended mode, the soft key functions change.

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>A keypad key one or more times select a letter, number, or symbol</td>
</tr>
<tr>
<td>2</td>
<td>keypad keys enter remaining characters. Tip: Press * right to accept a word completion, or # to insert a space.</td>
</tr>
<tr>
<td>3</td>
<td>OK key store the text</td>
</tr>
</tbody>
</table>

In a text entry screen, you can press # to switch entry modes. If Tap or Tap Extended is not available as the Primary or Secondary entry mode, see page 32.

When you enter text with Tap or Tap Extended mode, the soft key functions change.

- After 2 seconds, character is accepted and cursor moves to next position.
- Press DELETE key to delete character to left of insertion point.
- Press OK key to accept and store text.
When you enter 3 or more characters in a row, your phone may guess the rest of the word. For example, if you enter `prog` you might see:

If you want a different word (such as `progress`), continue pressing keypad keys to enter the remaining characters.

**Character Chart**

Use this chart as a guide for entering characters with Tap Extended mode.

| 1  | . ? ! @ " - _ : ; ( ) & ~ 1 0 ë í % £ $ ¥ ¤ £ + x * / { [ ] = > < # § |
| 2  | a b c 2 à â ã ç æ |
| 3  | d e f é è ê ë |
| 4  | g h i í íí |
| 5  | j k l 5 |
| 6  | m n o ó ô ò ô õ œ |
| 7  | p q r s 7 |
| 8  | t u v 8 ú ü ū ū |
| 9  | w x y z 9 |
Note: This chart may not reflect the exact character set available on your phone. In an email address or URL editor, first shows common characters for that editor.

**Tap Mode Text Entry Rules**

- Press a keypad key repeatedly to cycle through its characters.
- Press (-) left or right to move the flashing cursor to the left or right in a text message.
- The first character of every sentence is capitalized. If necessary, press (-) down to force the character to lowercase before the cursor moves to the next position.
- If you enter or edit information and do not want to save the changes, press (✓) to exit without saving.

**Using iTAP® Mode**

iTAP software provides a predictive text entry mode that lets you enter a word using one keypress per letter. This can be faster than Tap mode, because your phone combines the keypresses into common words.
For example, if you press 7764, letter combinations that match your key presses display:

If you want a different word (such as Progress), continue pressing keypad keys to enter the remaining characters.

**Entering Words**

In a text entry screen, you can press # to switch entry modes. An indicator shows which mode is active (see page 33). If iTAP mode is not available as the Primary or Secondary entry mode, see page 32.

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>keypad keys (1 press per letter) show possible letter combinations at the bottom of the display</td>
</tr>
<tr>
<td>2</td>
<td>* left or right highlight the combination you want</td>
</tr>
</tbody>
</table>
If you enter a word your phone does not recognize, the phone stores it to use as one of your word options. When you fill memory space for unrecognized words, your phone deletes the oldest words to add new words.

**Using Numeric Mode**

In a text entry screen, press # to switch entry modes until the 123 (numeric) indicator displays.

Press keypad keys to enter the numbers you want. When you finish entering numbers, press # to switch to another entry mode.

**Using Symbol Mode**

In a text entry screen, press # to switch entry modes until the @ (symbol) indicator displays.
### Press To

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 keypad keys (one press per symbol)</td>
<td>show possible symbol combinations at the bottom of the display</td>
</tr>
<tr>
<td>2 left or right</td>
<td>highlight the combination you want</td>
</tr>
<tr>
<td>3 SELECT key</td>
<td>lock a highlighted combination You can press keypad keys to add more symbols to the end of the combination.</td>
</tr>
</tbody>
</table>

**Symbol Chart**

Use this chart as a guide for entering characters with symbol mode.

| 1 | . ? ! , @ " ' - _ : ; ( ) & " ~ 1 0 © ¡ % £ $ ¥ ¤ £ + x * / \ [ ] = > < # § |
| 2 | @ _ \ a B |
| 3 | / : d D e j F |
| 4 | " & ' g G h i |
| 5 | () [] {} k i L |
| 6 | © í m n w W |
| 7 | <> = p P r s S |
| 8 | $ £ ¥ ö è q Q t u |
Note: This chart may not reflect the exact character set available on your phone. In an email address or URL editor, first shows common characters for that editor.

Deleting Letters and Words

Place the cursor to the right of the text you want to delete, and then:

<table>
<thead>
<tr>
<th>Action</th>
<th>Press the DELETE key to delete one letter at a time.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Hold the DELETE key to delete all the text.</td>
</tr>
</tbody>
</table>

Using the Smart Key

The smart key (see the diagram on page 1) gives you another way to perform many basic phone functions. It anticipates the next action you are likely to perform. For example, when you highlight a menu item, you can press the smart key to select it. The smart key usually performs the same function as the right soft key.

Using the External Display

When the flip is closed, the external display shows time and phone status information. It also displays messages to
notify you of incoming calls and other events. See page 23 for descriptions of the status indicators that may appear in the external display.

**Note:** You cannot make or receive calls when the phone is closed unless you attach a headset.

**Using the Handsfree Speaker**

**Note:** The use of wireless devices and their accessories may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of these products.

When you activate your phone's built-in handsfree speaker, you can talk to the other party without holding the phone to your ear.

Press the **SPEAKER** key to turn the handsfree speaker on or off during a call.

When you turn the handsfree speaker on, your phone displays **Speaker On** in the home screen. The handsfree speaker remains on until you press the **SPEAKER** key again or turn the phone off.

**Note:** The handsfree speaker is disabled when you connect your phone to a handsfree car kit or headset accessory.

**Changing a Code, PIN, or Password**

Your phone's 4-digit unlock code is originally set to 1234, and the 6-digit security code is originally set to 000000.
Your service provider may reset these codes before you receive your phone.

If your service provider has not reset these codes, we recommend that you change them to prevent others from accessing your personal information. The unlock code must contain 4 digits, and the security code must contain 6 digits.

You can also reset your SIM card PIN code, or PIN2 code if necessary.

To change a code or password:

Find the Feature  > Settings > Security
> New Passwords

**Locking and Unlocking Your Phone**

You can lock your phone manually or set the phone to lock automatically whenever you turn it off.

To use a locked phone, you must enter the unlock code. A locked phone still rings or vibrates for incoming calls or messages, but you must unlock it to answer.

You can make emergency calls on your phone even when it is locked (see page 53).

**Locking Your Phone Manually**

Find the Feature  > Settings > Security
> Phone Lock > Lock Now
Unlocking Your Phone

Your phone's unlock code is originally set to 1234. Your service provider may reset the unlock code to the last 4 digits of your phone number. At the Enter Unlock Code prompt:

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 keypad keys</td>
<td>enter your unlock code</td>
</tr>
<tr>
<td>2 OK key</td>
<td>lock the phone</td>
</tr>
</tbody>
</table>

Setting Your Phone to Lock Automatically

You can set your phone to lock every time you turn it off:

Find the Feature

Find the Feature > Settings > Security > Phone Lock > Automatic Lock > On

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 keypad keys</td>
<td>enter your unlock code</td>
</tr>
<tr>
<td>2 OK key</td>
<td>activate automatic lock</td>
</tr>
</tbody>
</table>
If You Forget a Code, PIN, or Password

Your phone’s 4-digit unlock code is originally set to 1234, and the 6-digit security code is originally set to 000000. Your service provider may reset the unlock code to the last 4 digits of your phone number before you receive your phone.

If you forget your unlock code, try entering 1234 or the last 4 digits of your phone number. If that does not work, at the Enter Unlock Code prompt:

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>display the unlock code bypass screen</td>
</tr>
<tr>
<td>2</td>
<td>keypad keys enter your security code</td>
</tr>
<tr>
<td>3</td>
<td>OK key submit your security code</td>
</tr>
</tbody>
</table>

If you forget your security code, SIM card PIN code, or PIN2 code, contact your service provider.
Setting Up Your Phone

Storing Your Name and Phone Number

To store or edit your name and phone number information on your SIM card:

Shortcut: Press M# from the home screen to edit your name and phone number.

If you do not know your phone number, contact your service provider.

Setting the Time and Date

Your phone uses the time and date for the Datebook. To change the time or date on your phone.

Find the Feature M > Settings > Phone Status
> My Tel. Numbers

If you see an Autoupdate option under Time and Date, you can select Autoupdate > On to have the network update your phone’s time and date automatically.
Setting a Ring Style

Your phone rings or vibrates to notify you of an incoming call or other event. This ring or vibration is called an alert.

You can select one of five different ring styles. The ring style indicator in the display shows the current ring style (see page 26).

To set a ring style:

Find the Feature  > Settings > Ring Styles > Style

Press

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 -Ø-</td>
<td>scroll to the ring style</td>
</tr>
<tr>
<td>2 SELECT key</td>
<td>select the ring style</td>
</tr>
</tbody>
</table>

Each ring style contains settings for specific event alerts, ringer ID, and ringer and keypad volume. To change these settings, press  > Settings > Ring Styles > style Detail.

Setting Answer Options

You can activate additional modes for answering calls:

Find the Feature  > Settings > In-Call Setup > Answer Options

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Multi-key</td>
<td>answer by pressing any key</td>
</tr>
<tr>
<td>Open to Answer</td>
<td>answer by opening the phone</td>
</tr>
</tbody>
</table>
Setting a Wallpaper Image

You can set a photo, picture, or animation as a wallpaper (background) image in your phone’s home screen. The wallpaper image appears as a faint watermark in text and menu displays.

Find the Feature

- Settings
- Personalize
- Wallpaper

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>- scroll to <strong>Picture</strong></td>
</tr>
<tr>
<td>2 CHANGE key</td>
<td>open the picture viewer</td>
</tr>
<tr>
<td>3 - up or down</td>
<td>scroll to a picture/animation</td>
</tr>
<tr>
<td>4 SELECT key</td>
<td>select the image</td>
</tr>
<tr>
<td>5 -</td>
<td>scroll to <strong>Layout</strong></td>
</tr>
<tr>
<td>6 CHANGE key</td>
<td>adjust the image layout</td>
</tr>
<tr>
<td>7 -</td>
<td>scroll to <strong>Center</strong>, <strong>Tile</strong>, or <strong>Fit-to-screen</strong></td>
</tr>
<tr>
<td></td>
<td><strong>Center</strong> places the image in the center of the display.</td>
</tr>
<tr>
<td></td>
<td><strong>Tile</strong> fills the display with multiple copies of the image.</td>
</tr>
<tr>
<td></td>
<td><strong>Fit-to-screen</strong> resizes the image, if necessary, to fit the display.</td>
</tr>
<tr>
<td>8 SELECT key</td>
<td>confirm the layout setting</td>
</tr>
<tr>
<td>9 BACK key</td>
<td>save wallpaper settings</td>
</tr>
</tbody>
</table>
Setting a Screen Saver Image

Set a photo, picture, or animation as a screen saver image.

The screen saver image displays when the phone is on and no activity is detected for a specified time. The image shrinks to fill the display, if necessary. An animation repeats for 1 minute, then the first frame of the animation displays.

Tip: Turn off the screen saver to extend battery life.

Find the Feature

Find the Feature

Press To

1 - menu scroll to Picture
2 CHANGE key open the picture viewer
3 - menu up or down scroll to a picture/animation
   Scroll to (None) to turn off the screen saver image.
4 SELECT key select the image
5 - menu scroll to Delay
6 CHANGE key set the delay interval
7 - menu scroll to the inactivity interval that triggers the screen saver
8 SELECT key confirm the delay setting
9 BACK key save the screen saver settings
Setting Display Skin
Change the look and feel of your phone’s display by selecting a different skin setting.

Find the Feature 🗺 > Settings > Personalize > Skin

Setting Display Brightness

Find the Feature 🗺 > Settings > Initial Setup > Brightness

Adjusting the Backlight
Set the amount of time that the display and keypad backlights remain on.

Find the Feature 🗺 > Settings > Initial Setup > Backlight

Setting Display Timeout
Set the display to turn itself off when no activity is detected for a specified time.

Find the Feature 🗺 > Settings > Initial Setup > Display Timeout

Conserving Battery Power
Some networks and phones include a battery save setting to extend battery life. When this feature is activated, your
phone automatically turns off the keypad backlight when it detects that enough ambient light is available.

Find the Feature > Settings > Initial Setup
> Battery Save
Calling Features

For basic instructions on how to make and answer calls, see page 11.

Changing the Active Line

Change the active phone line to make and receive calls from your other phone number.

Note: This feature is available only for dual-line-enabled SIM cards.

Find the Feature

M > Settings > Phone Status > Active Line

Tip: The active line indicator in the display shows the currently active phone line (see page 25).

Redialing a Number

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 C</td>
<td>view the dialed calls list</td>
</tr>
<tr>
<td>2</td>
<td>scroll to the entry you want to call</td>
</tr>
<tr>
<td>3 C</td>
<td>redial the number</td>
</tr>
</tbody>
</table>
Using Automatic Redial

When you receive a busy signal, your phone displays Number Busy.

To redial the phone number:

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 or RETRY key</td>
<td>activate automatic redial</td>
</tr>
</tbody>
</table>

Your phone automatically redials the number. When the call goes through, your phone rings or vibrates one time, displays Redial Successful, and then connects the call.

Using Caller ID

Incoming Calls

Calling line identification (Caller ID) displays the phone number for incoming calls in your phone’s display.

The phone displays the caller’s name (and picture, if available) when the name is stored in your phonebook, or Incoming Call when caller ID information is not available.

Note: Caller ID requires additional service through your local phone company. Check with your local phone company for availability.

Outgoing Calls

You can show or hide your phone number as an ID for the calls that you make.
Calling Features

Shortcut: While dialing (with digits visible in the display), press M > Hide ID/Show ID.

**Canceling an Incoming Call**

While the phone is ringing or vibrating:

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>M</td>
<td>cancel the incoming call</td>
</tr>
</tbody>
</table>

Depending on your phone settings and/or service subscription, the call may be forwarded to another number, or the caller may hear a busy signal.

**Turning Off a Call Alert**

You can turn off your phone’s incoming call alert before answering the call.

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>either volume key</td>
<td>turn off the alert</td>
</tr>
</tbody>
</table>

**Calling an Emergency Number**

Your service provider programs one or more emergency phone numbers, such as 911 or 112, that you can call under any circumstances, even when your phone is locked or the SIM card is not inserted.
Note: Emergency numbers vary by country. Your phone’s preprogrammed emergency number(s) may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>keypad keys</td>
</tr>
<tr>
<td>2</td>
<td>0</td>
</tr>
</tbody>
</table>

**Dialing International Numbers**

Press and hold 0 to insert the local international access code (+) for the country from which you are calling.

**Viewing Recent Calls**

Your phone keeps lists of the calls you recently received and dialed, even if the calls did not connect. The lists are sorted from newest to oldest entries. The oldest entries are deleted as new entries are added.

**Shortcut:** Press  from the home screen to view the dialed calls list.

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>-D-</td>
</tr>
<tr>
<td>2</td>
<td>SELECT key</td>
</tr>
</tbody>
</table>
The Last Calls Menu can include the following options:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Store</td>
<td>Create a phonebook entry with the number in the No. field.</td>
</tr>
<tr>
<td>Delete</td>
<td>Delete the entry.</td>
</tr>
<tr>
<td>Delete All</td>
<td>Delete all entries in the list.</td>
</tr>
<tr>
<td>Hide ID/Show ID</td>
<td>Hide or show your caller ID for the next call.</td>
</tr>
<tr>
<td>Send Message</td>
<td>Open a new text message with the number in the To field.</td>
</tr>
<tr>
<td>Add Digits</td>
<td>Add digits after the number.</td>
</tr>
</tbody>
</table>

Press | Press | To
--- | --- | ---
3 | 3 | scroll to an entry
   | ✔ | means the call connected.
4 | 4 | call the entry’s number
   | or | Press and hold 4 for 2 seconds to send the number as DTMF tones during a call.
   | or | VIEW key | view entry details
   | or | | open the Last Calls Menu to perform various operations on the entry

The Last Calls Menu can include the following options:
Returning an Unanswered Call

Your phone keeps a record of your unanswered calls, and displays:

- **X Missed Calls**, where **X** is the number of missed calls

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>VIEW key see the received calls list</td>
</tr>
<tr>
<td>2</td>
<td>-Ø- select a call to return</td>
</tr>
<tr>
<td>3</td>
<td>☑️ make the call</td>
</tr>
</tbody>
</table>

Using the Notepad

The most recent set of digits entered on the keypad are stored in your phone’s notepad memory. This can be a phone number that you called, or a number that you entered but did not call. To retrieve the number stored in the notepad:

Find the Feature ☐ Recent Calls > Notepad
Calling Features

Attaching a Number

While dialing (with digits visible in the display):

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>call the number</td>
</tr>
<tr>
<td>or</td>
<td>open the Dialing Menu to attach a number or insert a special character</td>
</tr>
<tr>
<td>or</td>
<td>create a phonebook entry with the number in the No. field</td>
</tr>
<tr>
<td>STORE key</td>
<td>call the number</td>
</tr>
</tbody>
</table>

Press 1 keypad keys to enter the speed dial number for the entry you want to call.

Calling With Speed Dial

Each entry you store in your phonebook is assigned a unique speed dial number.

To see an entry’s speed dial number, press 
1 > Phonebook, scroll to the entry, press VIEW key.

Press 1 keypad keys to enter the speed dial number for the entry you want to call.
Calling With 1-Touch Dial

To call phonebook entries 1 through 9, press and hold the single-digit speed dial number for one second.

Tip: You must specify which phone number list you want to use with this feature: phone memory phonebook or SIM card phonebook (see page 69).

Press | To
--- | ---
2 | submit the number
3 | call the entry

Using Voicemail

Voicemail messages that you receive are stored on the network. To listen to your messages, you must call your voicemail phone number.

Your service provider may include additional information about using this feature.

Listening to Voicemail Messages

Find the Feature > Messages > Voicemail

The phone calls your voicemail phone number. If no voicemail number is stored, your phone prompts you to store a number.
Receiving a Voicemail Message

When you receive a voicemail message, your phone displays the * (voicemail message) indicator and a New Voicemail notification.

To

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>CALL key</td>
<td>listen to the message</td>
</tr>
</tbody>
</table>

The phone calls your voicemail phone number. If no voicemail number is stored, your phone prompts you to store a number.

Storing Your Voicemail Number

If necessary, use the following procedure to store your voicemail phone number on your phone. Usually, your service provider has already done this for you.

Find the Feature

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td><code>1</code> keypad keys</td>
<td>enter your voicemail number</td>
</tr>
<tr>
<td><code>2</code> OK key</td>
<td>store the number</td>
</tr>
</tbody>
</table>

You cannot store a `p` (pause), `w` (wait), or `n` (number) character in this number. If you want to store a voicemail number with these characters, create a phonebook entry for it. Then, you can use the entry to call your voicemail.
Using Call Waiting

When you are on a call, an alert tone sounds to indicate that you have received a second call.

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>answer the new call</td>
</tr>
<tr>
<td>2</td>
<td>switch between calls</td>
</tr>
<tr>
<td>or</td>
<td>connect the 2 calls</td>
</tr>
<tr>
<td>or</td>
<td>end the call on hold</td>
</tr>
</tbody>
</table>

You must turn on call waiting to use the feature. To turn call waiting on or off:

Find the Feature: "Settings > In-Call Setup > Call Waiting"

Putting a Call On Hold

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>&gt; Hold</td>
<td>put the call on hold</td>
</tr>
</tbody>
</table>

Transferring a Call

You can announce that you are transferring an active call to another party, or you can directly transfer the call.
### Announce the Call Transfer

**Find the Feature**  
[ ] > Hold

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>keypad keys</td>
</tr>
<tr>
<td>2</td>
<td>[ ]</td>
</tr>
<tr>
<td>3</td>
<td>[ ]</td>
</tr>
<tr>
<td>4</td>
<td>[ ]</td>
</tr>
<tr>
<td>5</td>
<td>SELECT key</td>
</tr>
<tr>
<td>6</td>
<td>OK key</td>
</tr>
</tbody>
</table>

### Do Not Announce the Call Transfer

**Find the Feature**  
[ ] > **Transfer**

<table>
<thead>
<tr>
<th>Press</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>keypad keys</td>
</tr>
<tr>
<td>2</td>
<td>[ ]</td>
</tr>
</tbody>
</table>

### Feature Quick Reference

This section helps you locate features on your phone that are not described in this guide.

#### Calling Features

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
</table>
| Conference Call     | During a call:  
  M > Hold, dial next number, press 0, press the LINK key |
| Call Forwarding     | Set up or cancel call forwarding:  
  M > Settings > Call Forward |
| Restrict Calls      | Restrict outgoing or incoming calls:  
  M > Settings > Security > Restrict Calls |
| TTY Calls           | Set up your phone for use with an optional TTY device:  
  M > Settings > Initial Setup > TTY Setup |
### Messages

<table>
<thead>
<tr>

Troubleshooting

If you have questions or need assistance, we're here to help.

Go to www.motorola.com/consumer/support, where you can select from a number of customer care options. You can also contact the Motorola Customer Support Center at 1-800-331-6456 (United States), 1-888-390-6456 (TTY/TDD United States for hearing impaired), or 1-800-461-4575 (Canada).
Specific Absorption Rate Data

This model wireless phone meets the government's requirements for exposure to radio waves.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government and by the Canadian regulatory authorities. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age or health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC and by the Canadian regulatory authorities is 1.6 W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC and by Industry Canada with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the power output.

Before a phone model is available for sale to the public in the U.S. and Canada, it must be tested and certified to the FCC and Industry Canada that it does not exceed the limit established by each government for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) reported to the FCC and available for review by Industry Canada. The highest SAR value for this model phone when tested for use at the ear is 1.40 W/kg, and when worn on the body, as
described in this user guide, is 0.57 W/kg. The SAR value for this product in its data transmission mode (body-worn use) is 0.41 W/kg. (Body-worn measurements differ among phone models, depending upon available accessories and regulatory requirements).  

While there may be differences between the SAR levels of various phones and at various positions, they all meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) Web site:

http://www.phonefacts.net

or the Canadian Wireless Telecommunications Association (CWTA) Web site:

http://www.cwta.ca

1. In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

2. The SAR information includes the Motorola testing protocol, assessment procedure, and measurement uncertainty range for this product.

Safety and General Information

IMPORTANT INFORMATION ON SAFE AND EFFICIENT OPERATION.
READ THIS INFORMATION BEFORE USING YOUR PHONE.

The information provided in this document supersedes the general safety information in user's guides published prior to December 1, 2002.

Exposure To Radio Frequency (RF) Energy

Your phone contains a transmitter and a receiver. When it is ON, it receives and transmits RF energy. When you communicate with your phone, the system handling your call controls the power level at which your phone transmits.

Your Motorola phone is designed to comply with local regulatory requirements in your country concerning exposure of human beings to RF energy.

Operational Precautions

To assure optimal phone performance and make sure human exposure to RF energy is within the guidelines set forth in the relevant standards, always adhere to the following procedures.

External Antenna Care

Use only the supplied or Motorola-approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone.

Do NOT hold the external antenna when the phone is IN USE. Holding the external antenna affects call quality and may cause the phone to operate at a higher power level than needed. In addition, use of unauthorized antennas may result in non-compliance with the local regulatory requirements in your country.
Phone Operation
When placing or receiving a phone call, hold your phone as you would a wireline telephone.

Body-Worn Operation
To maintain compliance with RF energy exposure guidelines, if you wear a phone on your body when transmitting, always place the phone in a Motorola-supplied or approved clip, holder, holster, case, or body harness for this phone, if available. Use of accessories not approved by Motorola may exceed RF energy exposure guidelines. If you do not use one of the body-worn accessories approved or supplied by Motorola, and are not using the phone held in the normal use position, ensure the phone and its antenna are at least 1 inch (2.5 centimeters) from your body when transmitting.

Data Operation
When using any data feature of the phone, with or without an accessory cable, position the phone and its antenna at least 1 inch (2.5 centimeters) from your body.

Approved Accessories
Use of accessories not approved by Motorola, including but not limited to batteries and antennas, may cause your phone to exceed RF energy exposure guidelines. For a list of approved Motorola accessories, visit our website at www.Motorola.com.

RF Energy Interference/Compatibility
Note: Nearly every electronic device is susceptible to RF energy interference from external sources if inadequately shielded, designed, or otherwise configured for RF energy compatibility. In some circumstances your phone may cause interference.
Facilities
Turn off your phone in any facility where posted notices instruct you to do so. These facilities may include hospitals or health care facilities that may be using equipment that is sensitive to external RF energy.

Aircraft
When instructed to do so, turn off your phone when on board an aircraft. Any use of a phone must be in accordance with applicable regulations per airline crew instructions.

Medical Devices
Pacemakers
Pacemaker manufacturers recommend that a minimum separation of 6 inches (15 centimeters) be maintained between a handheld wireless phone and a pacemaker.

Persons with pacemakers should:
• ALWAYS keep the phone more than 6 inches (15 centimeters) from your pacemaker when the phone is turned ON.
• NOT carry the phone in the breast pocket.
• Use the ear opposite the pacemaker to minimize the potential for interference.
• Turn OFF the phone immediately if you have any reason to suspect that interference is taking place.

Hearing Aids
Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer to discuss alternatives.

Other Medical Devices
If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from RF energy. Your physician may be able to assist you in obtaining this information.
**Use While Driving**

Check the laws and regulations on the use of phones in the area where you drive. Always obey them.

When using your phone while driving, please:

- Give full attention to driving and to the road.
- Use handsfree operation, if available.
- Pull off the road and park before making or answering a call if driving conditions so require.

Responsible driving best practices may be found in the “Wireless Phone Safety Tips” at the end of this manual and at the Motorola website: www.Motorola.com/callsmart.

**Operational Warnings**

**For Vehicles With an Air Bag**

Do not place a phone in the area over an air bag or in the air bag deployment area. Air bags inflate with great force. If a phone is placed in the air bag deployment area and the air bag inflates, the phone may be propelled with great force and cause serious injury to occupants of the vehicle.

**Potentially Explosive Atmospheres**

Turn off your phone prior to entering any area with a potentially explosive atmosphere. Do not remove, install, or charge batteries in such areas. Sparks in a potentially explosive atmosphere can cause an explosion or fire resulting in bodily injury or even death.

**Note:** The areas with potentially explosive atmospheres referred to above include fueling areas such as below decks on boats, fuel or chemical transfer or storage facilities, areas where the air contains chemicals or particles, such as grain, dust, or metal powders. Areas with potentially explosive atmospheres are often but not always posted.
**Blasting Caps and Areas**

To avoid possible interference with blasting operations, turn OFF your phone when you are near electrical blasting caps, in a blasting area, or in areas posted “Turn off electronic devices.” Obey all signs and instructions.

**Batteries**

Batteries can cause property damage and/or bodily injury such as burns if a conductive material such as jewelry, keys, or beaded chains touch exposed terminals. The conductive material may complete an electrical circuit (short circuit) and become quite hot. Exercise care in handling any charged battery, particularly when placing it inside a pocket, purse, or other container with metal objects. **Use only Motorola original batteries and chargers.**

Your battery or phone may contain symbols, defined as follows:

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>⚠️</td>
<td>Important safety information will follow.</td>
</tr>
<tr>
<td>✖️</td>
<td>Your battery or phone should not be disposed of in a fire.</td>
</tr>
<tr>
<td>🔥</td>
<td>Your battery or phone may require recycling in accordance with local laws. Contact your local regulatory authorities for more information.</td>
</tr>
<tr>
<td>✖️</td>
<td>Your battery or phone should not be thrown in the trash.</td>
</tr>
<tr>
<td>LiIon BATT</td>
<td>Your phone contains an internal lithium ion battery.</td>
</tr>
</tbody>
</table>

**Seizures/Blackouts**

Some people may be susceptible to epileptic seizures or blackouts when exposed to flashing lights, such as when watching television or playing
video games. These seizures or blackouts may occur even if a person never had a previous seizure or blackout.

If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult with your doctor before playing video games on your phone or enabling a flashing-lights feature on your phone. (The flashing-light feature is not available on all products.) Parents should monitor their children’s use of video game or other features that incorporate flashing lights on the phones. All persons should discontinued use and consult a doctor if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation.

To limit the likelihood of such symptoms, please take the following safety precautions:

- Do not play or use a flashing-lights feature if you are tired or need sleep.
- Take a minimum of a 15-minute break hourly.
- Play in a room in which all lights are on.
- Play at the farthest distance possible from the screen.

**Repetitive Motion Injuries**

When you play games on your phone, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. Follow these instructions to avoid problems such as tendonitis, carpal tunnel syndrome, or other musculoskeletal disorders:

- Take a minimum 15-minute break every hour of game playing.
- If your hands, wrists, or arms become tired or sore while playing, stop and rest for several hours before playing again.
- If you continue to have sore hands, wrists, or arms during or after play, stop playing and see a doctor.
**FDA Consumer Information on Wireless Phones**

The U.S. Food and Drug Administration (FDA) provides consumer information on wireless phones at:

http://www.fda.gov/cellphones/qa.html

Following are safety-related questions and answers discussed at this website.

**Do wireless phones pose a health hazard?**

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of radio frequency energy (RF) in the microwave range while being used. They also emit very low levels of RF when in the stand-by mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

**What is FDA’s role concerning the safety of wireless phones?**

Under the law, FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to emit radio
frequency energy (RF) at a level that is hazardous to the user. In such a case, FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace or recall the phones so that the hazard no longer exists.

Although the existing scientific data do not justify FDA regulatory actions, FDA has urged the wireless phone industry to take a number of steps, including the following:

- Support needed research into possible biological effects of RF of the type emitted by wireless phones;
- Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and
- Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.

FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group:

- National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Federal Communications Commission
- Occupational Safety and Health Administration
- National Telecommunications and Information Administration

The National Institutes of Health participates in some interagency working group activities, as well.

FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. FCC relies on FDA and other health agencies for safety questions about wireless phones.
FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones. Base stations are thus not the primary subject of the safety questions discussed in this document.

**What is FDA doing to find out more about the possible health effects of wireless phone RF?**

FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to radio frequency energy (RF).

FDA has been a leading participant in the World Health Organization International Electromagnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The Project has also helped develop a series of public information documents on EMF issues.

FDA and the Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research and Development Agreement (CRADA) to do research on wireless phone safety. FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through contracts to independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.
What steps can I take to reduce my exposure to radio frequency energy from my wireless phone?

If there is a risk from these products—and at this point we do not know that there is—it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to radio frequency energy (RF). Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure.

If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna.

Again, the scientific data do not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

What about children using wireless phones?

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to radio frequency energy (RF), the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and increasing the distance between the user and the RF source will reduce RF exposure.

Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly
precautionary; it was not based on scientific evidence that any health hazard exists.

**Do hands-free kits for wireless phones reduce risks from exposure to RF emissions?**

Since there are no known risks from exposure to RF emissions from wireless phones, there is no reason to believe that hands-free kits reduce risks. Hands-free kits can be used with wireless phones for convenience and comfort. These systems reduce the absorption of RF energy in the head because the phone, which is the source of the RF emissions, will not be placed against the head. On the other hand, if the phone is mounted against the waist or other part of the body during use, then that part of the body will absorb more RF energy. Wireless phones marketed in the U.S. are required to meet safety requirements regardless of whether they are used against the head or against the body. Either configuration should result in compliance with the safety limit.

**Do wireless phone accessories that claim to shield the head from RF radiation work?**

Since there are no known risks from exposure to RF emissions from wireless phones, there is no reason to believe that accessories that claim to shield the head from those emissions reduce risks. Some products that claim to shield the user from RF absorption use special phone cases, while others involve nothing more than a metallic accessory attached to the phone. Studies have shown that these products generally do not work as advertised. Unlike “hand-free” kits, these so-called “shields” may interfere with proper operation of the phone. The phone may be forced to boost its power to compensate, leading to an increase in RF absorption. In February 2002, the Federal Trade Commission (FTC) charged two companies that sold devices that claimed to protect wireless phone users from radiation with making false and unsubstantiated claims. According to FTC, these defendants lacked a reasonable basis to substantiate their claim.
Motorola Limited Warranty for the United States and Canada

What Does this Warranty Cover?

Subject to the exclusions contained below, Motorola, Inc. warrants its telephones, pagers, messaging devices, and consumer and professional two-way radios (excluding commercial, government or industrial radios) that operate via Family Radio Service or General Mobile Radio Service, Motorola-branded or certified accessories sold for use with these Products (“Accessories”) and Motorola software contained on CD-ROMs or other tangible media and sold for use with these Products (“Software”) to be free from defects in materials and workmanship under normal consumer usage for the period(s) outlined below. This limited warranty is a consumer's exclusive remedy, and applies as follows to new Motorola Products, Accessories and Software purchased by consumers in the United States or Canada, which are accompanied by this written warranty:

Products and Accessories

<table>
<thead>
<tr>
<th>Products Covered</th>
<th>Length of Coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Products and Accessories as defined above, unless otherwise provided for below.</td>
<td>One (1) year from the date of purchase by the first consumer purchaser of the product unless otherwise provided for below.</td>
</tr>
<tr>
<td>Decorative Accessories and Cases. Decorative covers, bezels, PhoneWrap™ covers and cases.</td>
<td>Limited lifetime warranty for the lifetime of ownership by the first consumer purchaser of the product.</td>
</tr>
</tbody>
</table>
Exclusions

Normal Wear and Tear. Periodic maintenance, repair and replacement of parts due to normal wear and tear are excluded from coverage.

Batteries. Only batteries whose fully charged capacity falls below 80% of their rated capacity and batteries that leak are covered by this limited warranty.

Abuse & Misuse. Defects or damage that result from: (a) improper operation, storage, misuse or abuse, accident or neglect, such as physical damage (cracks, scratches, etc.) to the surface of the product resulting from misuse; (b) contact with liquid, water, rain, extreme humidity or heavy perspiration, sand, dirt or the like, extreme heat, or food; (c) use of the Products or Accessories for commercial purposes or subjecting the Product or Accessory to abnormal usage or conditions; or (d) other acts which are not the fault of Motorola, are excluded from coverage.

Use of Non-Motorola Products and Accessories. Defects or damage that result from the use of Non-Motorola branded or certified Products, Accessories, Software or other peripheral equipment are excluded from coverage.

Products Covered | Length of Coverage
--- | ---
Monaural Headsets. Earbuds and boom headsets that transmit mono sound through a wired connection. | Limited lifetime warranty for the lifetime of ownership by the first consumer purchaser of the product.
Consumer and Professional Two-Way Radio Accessories. | Ninety (90) days from the date of purchase by the first consumer purchaser of the product.
Products and Accessories that are Repaired or Replaced. | The balance of the original warranty or for ninety (90) days from the date returned to the consumer, whichever is longer.
Unauthorized Service or Modification. Defects or damages resulting from service, testing, adjustment, installation, maintenance, alteration, or modification in any way by someone other than Motorola, or its authorized service centers, are excluded from coverage.

Altered Products. Products or Accessories with (a) serial numbers or date tags that have been removed, altered or obliterated; (b) broken seals or that show evidence of tampering; (c) mismatched board serial numbers; or (d) nonconforming or non-Motorola housings, or parts, are excluded from coverage.

Communication Services. Defects, damages, or the failure of Products, Accessories or Software due to any communication service or signal you may subscribe to or use with the Products Accessories or Software is excluded from coverage.

Software

<table>
<thead>
<tr>
<th>Products Covered</th>
<th>Length of Coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Software. Applies only to physical defects in the media that embodies the copy of the software (e.g. CD-ROM, or floppy disk).</td>
<td>Ninety (90) days from the date of purchase.</td>
</tr>
</tbody>
</table>

Exclusions

Software Embodied in Physical Media. No warranty is made that the software will meet your requirements or will work in combination with any hardware or software applications provided by third parties, that the operation of the software products will be uninterrupted or error free, or that all defects in the software products will be corrected.

Software NOT Embodied in Physical Media. Software that is not embodied in physical media (e.g. software that is downloaded from the internet), is provided “as is” and without warranty.

Who is Covered?

This warranty extends only to the first consumer purchaser, and is not transferable.
What Will Motorola Do?

Motorola, at its option, will at no charge repair, replace or refund the purchase price of any Products, Accessories or Software that does not conform to this warranty. We may use functionally equivalent reconditioned/refurbished/pre-owned or new Products, Accessories or parts. No data, software or applications added to your Product, Accessory or Software, including but not limited to personal contacts, games and ringer tones, will be reinstalled. To avoid losing such data, software and applications please create a back up prior to requesting service.

How to Obtain Warranty Service or Other Information

You will receive instructions on how to ship the Products, Accessories or Software, at your expense, to a Motorola Authorized Repair Center. To obtain service, you must include: (a) a copy of your receipt, bill of sale or other comparable proof of purchase; (b) a written description of the problem; (c) the name of your service provider, if applicable; (d) the name and location of the installation facility (if applicable) and, most importantly; (e) your address and telephone number.

What Other Limitations Are There?

ANY IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A
PARTICULAR PURPOSE, SHALL BE LIMITED TO THE DURATION OF
THIS LIMITED WARRANTY, OTHERWISE THE REPAIR,
REPLACEMENT, OR REFUND AS PROVIDED UNDER THIS EXPRESS
LIMITED WARRANTY IS THE EXCLUSIVE REMEDY OF THE
CONSUMER, AND IS PROVIDED IN LIEU OF ALL OTHER
WARRANTIES, EXPRESS OR IMPLIED. IN NO EVENT SHALL
MOTOROLA BE LIABLE, WHETHER IN CONTRACT OR TORT
(INCLUDING NEGLIGENCE) FOR DAMAGES IN EXCESS OF THE
PURCHASE PRICE OF THE PRODUCT, ACCESSORY OR SOFTWARE,
OR FOR ANY INDIRECT, INCIDENTAL, SPECIAL OR
CONSEQUENTIAL DAMAGES OF ANY KIND, OR LOSS OF REVENUE
OR PROFITS, LOSS OF BUSINESS, LOSS OF INFORMATION OR
DATA, SOFTWARE OR APPLICATIONS OR OTHER FINANCIAL LOSS
ARISING OUT OF OR IN CONNECTION WITH THE ABILITY OR
INABILITY TO USE THE PRODUCTS, ACCESSORIES OR SOFTWARE
TO THE FULL EXTENT THESE DAMAGES MAY BE DISCLAIMED BY
LAW.

Some states and jurisdictions do not allow the limitation or
exclusion of incidental or consequential damages, or limitation on
the length of an implied warranty, so the above limitations or
exclusions may not apply to you. This warranty gives you specific
legal rights, and you may also have other rights that vary from state
to state or from one jurisdiction to another.

Laws in the United States and other countries preserve for Motorola
certain exclusive rights for copyrighted Motorola software such as the
exclusive rights to reproduce and distribute copies of the Motorola
software. Motorola software may only be copied into, used in, and
redistributed with, the Products associated with such Motorola software.
No other use, including without limitation disassembly of such Motorola
software or exercise of the exclusive rights reserved for Motorola, is
permitted.
Product Registration

Online Product Registration:
http://www.motorola.com/warranty

Product registration is an important step toward enjoying your new Motorola product. Registering helps us facilitate warranty service, and permits us to contact you should your product require an update or other service. Registration is for U.S. residents only and is not required for warranty coverage.

Please retain your original dated sales receipt for your records. For warranty service of your Motorola Personal Communications Product you will need to provide a copy of your dated sales receipt to confirm warranty status.

Thank you for choosing a Motorola product.

RF Energy Interference

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Export Law Assurances

This product is controlled under the export regulations of the United States of America and Canada. The Governments of the United States of America and Canada may restrict the exportation or re-exportation of this product to certain destinations. For further information contact the U.S. Department of Commerce or the Canadian Department of Foreign Affairs and International Trade.
Your wireless phone can be recycled. Recycling your wireless phone reduces the amount of waste disposed in landfills and allows recycled materials to be incorporated into new products.

The Cellular Telecommunications Industry Association (CTIA) and its members encourage consumers to recycle their phones and have taken steps to promote the collection and environmentally sound recycling of end-of-life wireless devices.

As a wireless phone user, you have an important role in ensuring that this phone is recycled properly. When it comes time to give this phone up or trade it in for a new one, please remember that the phone, the charger, and many of its accessories can be recycled. It’s easy. To learn more about CTIA’s Recycling Program for Used Wireless Devices in the United States, including information on where to recycle wireless devices near you, please visit www.recyclewirelessphones.com.
Wireless Phone Safety Tips

“Safety is your most important call!”

Your Motorola wireless telephone gives you the powerful ability to communicate by voice—almost anywhere, anytime, wherever wireless phone service is available and safe conditions allow. But an important responsibility accompanies the benefits of wireless phones, one that every user must uphold.

When driving a car, driving is your first responsibility. If you find it necessary to use your wireless phone while behind the wheel of a car, practice good common sense and remember the following tips:

1. Get to know your Motorola wireless phone and its features such as speed dial and redial. If available, these features help you to place your call without taking your attention off the road.
2 When available, use a hands-free device. If possible, add an additional layer of convenience to your wireless phone with one of the many Motorola Original™ hands-free accessories available today.

3 Position your wireless phone within easy reach. Be able to access your wireless phone without removing your eyes from the road. If you receive an incoming call at an inconvenient time, if possible, let your voice mail answer it for you.

4 Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow, ice, and even heavy traffic can be hazardous.

5 If you receive an incoming call at an inconvenient time do not take notes or look up phone numbers while driving. Jotting down a “to do” list or going through your address book takes attention away from your primary responsibility—driving safely.

6 Dial sensibly and assess the traffic; if possible, place calls when you are not moving or before pulling into traffic. Try to plan calls when your car will be stationary. If you need to make a call while moving, dial only a few numbers, check the road and your mirrors, then continue.

7 Do not engage in stressful or emotional conversations that may be distracting. Make people you are talking with aware you are driving and suspend conversations which have the potential to divert your attention away from the road.
8 **Use your wireless phone to call for help.** Dial 9-1-1 or other local emergency number in the case of fire, traffic accident or medical emergencies.*

9 **Use your wireless phone to help others in emergencies.** If you see an auto accident, crime in progress or other serious emergency where lives are in danger, call 9-1-1 or other local emergency number, as you would want others to do for you.*

10 **Call roadside assistance or a special non-emergency wireless assistance number when necessary.** If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number.*

* Wherever wireless phone service is available.
Check the laws and regulations on the use of wireless telephones and their accessories in the areas where you drive. Always obey them. The use of these devices may be prohibited or restricted in certain areas.

For more information, please call 1-888-901-SAFE or visit the CTIA Web site at www.wow-com.com™
