231 glossary
235 regulatory information
241 specifications
245 index
Congratulations on the purchase of your Treo™ 650 smartphone by palmOne. In one compact and indispensible device, you now have all of the following:

- An advanced mobile phone*
- A Palm Powered™ organizer with portable expansion capability (MultiMediaCard/SD/SDIO)
- Email**
- Web browsing**
- Text and multimedia** messaging*
- A digital camera

* Requires service contract with Cingular Wireless.
** Requires high-speed wireless data services from Cingular Wireless, such as GPRS or EDGE.

This guide helps you set up your Treo 650 smartphone and quickly learn to use it.
What’s in the box

You should have received all of the following components in the Treo 650 smartphone box:

**Hardware**
- Treo smartphone handset
- Cingular Wireless SIM card
- AC charger
- Rechargeable battery
- USB sync cable
- Headset

**Documentation and software**
- *Start Here* booklet
- *Using Your Treo 650 Smartphone* (this guide)
- *Read This First* (poster)
- *Treo 650 Email Setup Guide*
- Software Installation CD (includes desktop synchronization software and bonus software)
- palmOne warranty

The Software Installation CD includes free bonus software for your phone and synchronization software for your computer.
What do I need to get started?

As you work through the instructions in this guide, you’ll need all the items that came in the Treo™ 650 smartphone box (see “What’s in the box” on page 7) as well as the following:

- A subscriber identity module (SIM) card for which you have an activated mobile account with data services*
- A location with wireless coverage for your phone
- An electrical outlet
- The computer with which you will synchronize your personal information
- The Software Installation CD included in the box

*We recommend selecting either the GPRS or EDGE data service option. You need data services of some type to use email, web browsing, and photo messaging.
setting up
Treo smartphone overview

The following illustrations show the locations and names of the physical features of the Treo™ 650 smartphone. Refer to these illustrations while following the instructions in this guide.

Top view

- A. Ringer switch
- B. Infrared (IR) port
- C. Antenna
- D. SIM slot
- E. Expansion card slot
- F. Stylus
Front view

A. Indicator light (phone and charge indicator)
B. Earpiece
C. 5-way navigator
D. Messaging button
E. Power/End button
F. Microphone
G. Multi-connector
H. Headset jack
I. Calendar button
J. Phone/Send button
K. Side button
L. Volume button

Protect your screen against scratching and crushing. Store it in a place where other items won’t damage it. Visit www.palmOne.com to find carrying cases that protect the screen and other useful accessories.
Back view

A. Camera lens
B. Self-portrait mirror
C. Battery Door Release button
D. Speaker

IMPORTANT: The Treo 650 speaker includes a large magnet, so be sure to store your Treo smartphone away from credit cards or other items that could be demagnetized.
Installing the battery

1. Press the Battery Door Release button and slide the battery door downward to remove it from your Treo smartphone.
2. Align the metal contacts on the battery with the contacts inside the battery compartment.
3. Insert the battery into the compartment at a 45 degree angle and then press it into place.
4. Slide the battery door onto the back of the phone until it clicks into place.
5. When the Welcome screen appears, follow the onscreen instructions to set up your Treo 650 smartphone.

A. Battery Door Release button
B. Battery contacts
C. Notch
D. Phone contacts
Charging the battery

Before using your Treo 650 smartphone, we recommend that you charge the battery. We recommend four hours for a full charge, or until the indicator light is solid green.

1. Plug the AC charger into a wall outlet. If necessary, connect an adapter.
2. Connect the charger cable to the bottom of the Treo smartphone. Make sure the arrow on the connector is facing up, toward your Treo screen.

When your Treo smartphone is connected to a power source, the indicator light glows solid (versus flashing), and the color of the light indicates the charging state.

3. To confirm your smartphone is charging, check the indicator light.
   - When the indicator light is solid red, your smartphone is charging.
   - When the indicator light turns solid green, your smartphone is fully charged.
   - If the indicator light does not turn on when you connect your smartphone to the AC charger, double-check the cable connection and the electrical outlet to which it is connected.

Battery consumption varies based on personal usage. Consumption factors include signal strength, speakerphone usage, and whether calls are data or voice calls.
After you turn on your smartphone, the onscreen battery icon displays power status:

- **Full battery icon** 🍃: Battery is charged
- **Partial battery icon** ☀️: Battery has some power and is not charging
- **Empty battery icon** 🍃: Battery needs to be charged immediately
- **Battery icon with red lightning bolt** 🌪️: Charging
- **Battery icon with green lightning bolt** 🌪️: Finished charging

To see exactly how much power is left in your battery, tap the onscreen battery icon.
Maximizing battery life

Battery life depends on individual usage. When used as a phone, your Treo battery provides up to 6 hours of talk time or up to 300 hours of standby time. You can increase the life of your Treo battery by following a few easy guidelines. Remember that battery life depends on how you use your smartphone.

- Charge your smartphone whenever you’re at your desk, or charge it overnight each day. The Li-Ion battery in your smartphone has a much longer useful life when it is topped off frequently, versus charging it after it is fully drained.
- The wireless features (phone, email, messaging, and web) of your smartphone generally consume more power than its organizer features. However, if you spend a lot of time using the camera, games, media players, eBooks, or other Palm OS applications, keep an eye on the battery icon and charge when necessary.
- If you don’t plan to use the wireless features on your smartphone for a while, you may want to turn off your phone (see “Turning your phone on and off” on page 18). You can forward calls to a different number or let all calls be picked up by voicemail (see “Forwarding calls under certain conditions” on page 54).
- If the battery drains to the point where your smartphone doesn’t turn on, the smartphone stores your info safely until you recharge the battery. To avoid draining the battery, we recommend that you charge and synchronize your smartphone every day, especially if you use your phone often.
- As with any mobile phone, if you are in an area with no wireless coverage, your Treo smartphone searches for a signal, which consumes power. If you cannot move to an area of better coverage, temporarily turn off your phone.
- Turn down the screen brightness (see “Adjusting the brightness” on page 186).
- Decrease the Auto-off setting in Power Preferences (see “Locking your phone and info” on page 191). This turns off your screen automatically after a shorter period of inactivity.
Inserting the SIM card

Your subscriber identity module (SIM) card contains account information such as your phone number and voicemail access number. To use the phone, email, or web features of your Treo 650 smartphone, you need to insert the SIM card. If a SIM card did not come with your Treo 650 smartphone, Cingular Wireless will give you one when you subscribe. If you have an older, 5-volt SIM card, you should request a newer, 3-volt SIM card. This Treo smartphone is not compatible with older 5-volt SIM cards.

1. Slide the SIM tray out of the phone.
2. Insert the SIM card into the SIM tray by aligning the notches until you feel it lock into place.
3. Slide the SIM tray back into the phone.
4. If your SIM card is not already activated, follow the activation steps provided by Cingular Wireless or contact Cingular Wireless directly for assistance. If you want to use email, web browsing, and multimedia messaging, be sure to confirm that your SIM card is activated for data services.

Cingular Wireless may already have inserted the SIM card into your smartphone. In that case, skip to "Turning your smartphone on and off" on page 18.

To remove the SIM card, lift the SIM tray out of the slot and remove the card from the tray.
Turning your smartphone on and off

You can use the Palm OS® organizer features of your Treo 650 smartphone independently of the wireless features and applications. In other words, the screen and phone are designed to be turned off and on separately.

Waking up the screen
To use the Palm OS organizer features when your smartphone is off, you need to wake up the screen. You can also turn off your smartphone’s screen without turning off your smartphone’s wireless features.
1. Press Power/End to wake up the screen.
2. Briefly press Power/End to turn off the screen.

Turning your phone on and off
When you turn on your phone, it connects to a mobile network so that you can make and receive phone calls and use other wireless services.
1. Press and hold Power/End to turn on your phone. If Sound On is on you'll hear a series of ascending tones. (See “Setting the Ringer switch” on page 184 for more information.) After your phone locates a signal, you can use the phone and Internet features (if supported by the local network).
2. Press and hold Power/End again to turn off your phone. If the Ringer switch is set to Sound On, you'll hear a series of descending tones. When your phone is off, your Treo smartphone is not connected to any mobile network. You can still use the organizer and other Palm OS features. This is ideal for airplane flights and for maximizing battery life.
Making your first call

We recommend that you charge your Treo 650 smartphone for a full four hours (or until the indicator light is solid green) before using it for the first time.

1. Press and hold Power/End ✈. You will hear a series of ascending tones.
2. Allow the Treo smartphone to complete a network search. The search may take several seconds. When it is complete, the Network Status icon ▶ appears in the upper-right.
3. Press Phone/Send ☏.
4. Using the number pad on the smartphone onscreen dial pad, enter the desired phone number.
5. Press Phone/Send ☏ to dial.
6. When your call is complete, press Power/End ✈.

If No Service appears in the upper left, you are out of a wireless coverage area. If you believe you are in a wireless coverage area and this problem persists, contact Cingular Wireless for assistance.

If you are inside a coverage area and cannot complete a call, your SIM card may not be activated. Please contact Cingular Wireless for assistance.

To quickly redial your most recent call, press and hold the Phone/Send button to display the redial list.
Adjusting call volume

While a call is in progress, press the Volume button on the side of your smartphone to adjust call volume.

What’s my number?

1. Make sure your phone is on (see “Turning your phone on and off” on page 18).
2. Press Phone/Send.
3. Open the menus.
4. Select Options, and then select Phone Info.

If your phone number is not displayed, exit Phone Info, and make sure your SIM card is properly inserted in the SIM slot. If your phone number still does not appear in Phone Info, look for the number on the plastic holder to which the SIM card was attached. If you still need assistance, please consult Cingular Wireless.

A. Volume button
B. Side button

A. Look here for your phone number
Setting up your computer

You can enter or change information on your smartphone or on your computer (using Palm® Desktop software or Microsoft Outlook for Windows), and then synchronize to automatically update the info in both places, so there's no need to enter the info twice. We strongly recommend that you synchronize your smartphone with your computer frequently to keep your information up-to-date (and backed up) in both locations. Before you can synchronize, you need to install the desktop synchronization software on your computer.

System requirements

Your computer should meet the following minimum system profiles for Windows or Mac computers.

Windows 2000 or XP (or later)
- 32MB of available memory (RAM)
- 170MB of free hard disk space
- CD drive
- Available USB port
- USB sync cable (included with your Treo 650 smartphone)

Mac OS 10.2 or later
- 128MB of total memory (RAM)
- 190MB of free hard disk space
- CD drive
- USB port
- USB sync cable (included with your Treo 650 smartphone)

Even if you already own a Palm Powered™ device and have installed a previous version, you must install the software that came with your smartphone on the Software Installation CD.

If you want to synchronize with another desktop software program, contact the software developer to obtain a conduit if one is available.
Upgrading from another Palm Powered™ device

Note: If you're setting up your first Palm Powered device, skip ahead to “Connecting your Treo smartphone to your computer” on page 27.

You can transfer all compatible applications and information from your previous device to your new Treo™ 650 smartphone.

1. Calculate how much space your applications and information occupy on your old device. From the Applications Launcher (on some devices this is called the Home screen), open the menus. Select Info on the App menu. At the bottom of the screen, select Size. Look at the numbers on the Free Space line and subtract the number on the left from the number on the right to calculate the space used. For example, on the device shown here, 19.6 - 17.8 = 1.8. This means that 1.8MB of space is occupied on this device.

2. If the space occupied on your old device is less than 20MB, go to step 3. If more than 20MB is occupied, then do any of the following to reduce the amount of information and applications that needs to be transferred before you go to the next step:
   • Delete any third-party applications that you no longer use.
   • Move large files, such as eBooks and images, to an expansion card.
   • Move third-party applications to an expansion card.
   • Purge old information in applications such as Calendar (Date Book), To Do, and email.
     Refer to the documentation that came with your old device for instructions on the items listed above.

3. Synchronize your old device with your old desktop software to back up your information one last time.
4. Install the desktop synchronization software from the Software Installation CD (see “Installing the desktop synchronization software on your computer” on page 26).

5. During the installation process, sync your new Treo smartphone with your new desktop software as instructed. When prompted to select a username for your new smartphone, be sure to select the existing username for your old device.

6. (Mac users only) If you have pictures on your old device, copy them from your old device to an expansion card or beam them to your new Treo 650 smartphone.

7. If you plan to continue using your old device, perform a hard reset (see “Performing a hard reset” on page 206) to remove its associated username. Each device you synchronize with your computer must have a unique name. The next time you synchronize with your old device, be sure to assign it a new username.

If any third-party applications are quarantined during the installation, do not manually install any of the quarantined files. Contact the third-party developer for software updates and information about compatibility with your Treo 650 smartphone.

What's new on your Treo 650 smartphone
After upgrading, there are a few things you need to know about your new Treo smartphone. If you’re upgrading from a Treo™ 600 smartphone, all of the following items apply to you. If you’re upgrading from another device, some of these items may not apply to you.

- **Address Book**: This application is now called Contacts. To open Contacts, press the Phone/Send button, and then use the 5-way navigator to select the Contacts favorite.
- **Date Book+**: This application is now called Calendar. To access this application, press the Calendar button.
- **Applications**: Some previous Palm Powered devices called this the Home screen or Applications Launcher. To access this screen, press Applications. 

To access a menu shortcut, open the menus, and then press the letter for the menu shortcut. Once you remember a shortcut letter, such as X for copy, you can simply open the menus and enter the shortcut letter without viewing the menu item.
• **Find:** Some previous Palm Powered devices opened this global search engine by tapping the Magnifying Glass icon in the Graffiti® area. Now you can access it by pressing Option  and then pressing Shift/Find  ...

• **Menu items:** Users familiar with Graffiti's Menu command can now access system menus by pressing Menu  (see “Selecting menu items” on page 35).

• **Backlight:** Your Treo smartphone includes a keyboard backlight. The keyboard backlight activates automatically when the screen turns on. It shuts off automatically when the screen turns off and when an active call lasts longer than a minute.

• **Center button:** If you used a previous Treo smartphone, you probably pressed the Spacebar to activate commands or dial numbers. With this Treo smartphone, we recommend pressing Center  to activate commands and pressing Phone/Send  to dial.

• **Power/End button:** The fourth button on the right is used to control the screen and is not an application button.

• **Internet connection:** This Treo smartphone was designed to work on high-speed wireless data network, such as a GPRS or EDGE. When you sign up for a GPRS or an EDGE wireless data account, these settings are automatically configured on your smartphone. If you prefer to use an older, manual dial-up connection, enter your Internet service provider’s settings in Network Preferences.

• **5-way navigator compatibility:** Some Palm OS 5 applications are optimized for a 5-way navigator on devices other than Treo smartphone. You may notice inconsistencies with software that is not designed with a Treo smartphone in mind.

• **Web browser bookmarks:** You can use the Web browser on your Treo 650 smartphone to store up to 100 bookmarks, but you cannot import or transfer bookmarks from other web browsers, such as Web Pro.

• **Photos:** You can use the Media Desktop application to transfer photos from your old device onto your Treo 650 smartphone (Windows only). To transfer photos from
your old device onto your Treo 650 smartphone, open the Media Desktop application, select your username, click Add Media and locate the files in the backup folder. The files may be located in any of the following folders:

- `C:\Program Files\palmOne\Treo Pictures\(user name)`
- `C:\Program Files\Handspring\Treo Pictures\(user name)`
- `C:\Program Files\Palm\Treo Pictures\(user name)`
Installing the desktop synchronization software on your computer

Even if you already own a Palm Powered device and have installed a previous version of the desktop software, you must install the software from the palmOne Software Installation CD that came with your Treo 650 smartphone.

1. Close any applications that are currently running on your computer, including those that are minimized. Your computer needs to have all its resources available to install the software.

2. Insert the palmOne Software Installation CD into the CD drive on your computer.

3. If you are installing on a Mac, double-click the CD icon on the desktop, and then double-click the palmOneSoftware.pkg icon.

4. When the installation wizard opens, follow the onscreen instructions. Please note these important points about the installation process:
   - When the language selection screen appears, click the same language you selected on your smartphone.
   - You can choose which desktop software you want to use for synchronization: Palm Desktop software or Microsoft Outlook (Windows only).
   - When the install process prompts you to connect your phone to your computer, go to "Connecting your Treo smartphone to your computer" on page 27.
Connecting your Treo smartphone to your computer

1. Plug the AC charger into a wall outlet. If necessary, connect an adapter.
2. Plug the USB sync cable into an available USB port or a powered USB hub on your computer.
3. Connect the sync cable to the Multi-connector on the bottom of your smartphone with the HotSync® button facing up. Do not press the HotSync button until you are instructed to do so.
4. Connect the charger cable to the Multi-connector on the sync cable.

For best performance, plug your sync cable directly into a USB port on your computer. If you use a USB hub, make sure it is a powered hub.

A. USB sync cable
B. Sync button
Synchronizing information

Synchronizing means that information that is entered or updated in one place (your phone or your computer) is automatically updated in the other—no need to enter information twice. We strongly recommend that you synchronize your Treo smartphone and your computer frequently to keep your information up-to-date (and backed up) in both locations.

Before you can synchronize your contacts and other personal information, you must install the software from the CD that came with your Treo smartphone. See “Installing the desktop synchronization software on your computer” on page 26 for instructions.

If you use the default settings, information from all the following applications is transferred each time you synchronize your smartphone with your computer:

- Calendar
- Contacts
- Memos
- Media
- Tasks
- VersaMail

If you choose to synchronize with Outlook, information from Contacts, Calendar, Tasks, and Memos is synchronized with Outlook. You can also set up the VersaMail® application to synchronize with Outlook. Other info, such as photos, is synchronized with Palm Desktop software.

1. Connect your Treo 650 smartphone to your computer, as described in “Connecting your Treo smartphone to your computer” on page 27.
2. Press the Sync button on the sync cable.
3. Wait for your smartphone to display a message indicating that the process is complete.
   • If nothing happens, make sure that you installed the desktop synchronization software from the Software Installation CD that came with your Treo smartphone, and that it is running on your computer.
   • If you want to synchronize information with applications other than Palm Desktop or Microsoft Outlook, you need to purchase additional third-party conduit software.
   • If you have any problems synchronizing, see “Synchronization” on page 215 for troubleshooting suggestions.

If you use Microsoft Exchange ActiveSync®, these synchronization steps may be different. See “Working with Microsoft Exchange ActiveSync” on page 83 for more information.
moving around
Moving around the screen

To move around the Treo™ 650 smartphone screen, you can use the 5-way navigator or you can tap items on the screen with the stylus. With use, you will find your own favorite way to scroll, highlight, and select menu items.

The 5-way includes Right →, Left ←, Up ↑, Down ↓, and Center ↗ buttons.

Some third-party applications may not work with the 5-way navigator, and you must use the stylus instead.

In this guide, we use arrow icons to indicate directions on the 5-way. These are different from any onscreen arrows that you tap with your stylus or select with the 5-way to display pick lists.

5-way buttons:

Onscreen arrows:

A. Up
B. Right
C. Down
D. Left
E. Center

Scrolling through screens

As on a computer, you scroll on the smartphone to move from field to field or page to page, or in some cases to highlight an item or option in a list. There are several methods of scrolling:

- Press the 5-way on the front of the smartphone. Press Right →, Left ←, Up ↑, and Down ↓ to move to the next field, button, or action in that direction.
- Press and hold Up ↑ to quickly scroll to the top of a list, or press and hold Down ↓ to quickly scroll to the bottom of a list.
• Tap an onscreen scroll arrow.

• When viewing a list screen, such as the Memo list:
  • Press Up ▲ or Down ▼ to scroll one screen at a time.
  • Press Center ◇ and then press Up ▲ or Down ▼ to scroll between line items.
  • Press Left ◄ to switch from item scrolling to screen scrolling.
  • Press Option ◌ and Up ▲ or Down ▼ to scroll to the next page of information within the current record.
  • When inside a text field, press Right ▶ and Left ◄ to scroll to the next character or word, and press Up ▲ and Down ▼ to scroll between lines.
  • Drag the slider of an onscreen scroll bar.

Highlighting items

The 5-way lets you highlight items before opening or selecting them.

• When an onscreen button (OK, Cancel, etc.) or pick list is highlighted, the button acquires a glow around its border.

• When a phone number, email address, or web link is highlighted on a web page or in a message, the text appears in reverse type (light text on a dark background).

• When an entire text entry field is highlighted, you can press Center ◇ to edit the text. After you edit the text, press Center ◇ again to highlight the entire field.
You can also use the stylus to highlight text on the screen. When text is highlighted, it appears in reverse type.

- Drag the stylus across the text you want to highlight.
- Double-tap a word to highlight it.
- Triple-tap a line of text to highlight it.

**Accessing command buttons**

Command buttons such as New, OK, and Details appear at the bottom of the screen. In many cases, you can jump directly to these buttons instead of scrolling to them.

- From a list screen, such as the Contacts list or Memos list, press Right ‹ to jump to the first button.
- From a screen where you create or edit entries, such as Edit Contacts, press Center ⍌ to jump to the first button.
- From a dialog box, such as Edit Categories, press Up ⬆️ and Down ⬇️ to scroll to the buttons.

**Selecting or activating items**

After highlighting an item with the 5-way, you can select or activate it by pressing Center ⍌. You can also select an item by tapping it with the stylus.
Selecting menu items

Many applications have menus to provide access to additional features. These menus are usually hidden from view, but they appear when you open the menus.

1. Press Menu to display an application’s menus.
2. Press Right and Left to switch between menus.
3. Press Up and Down to highlight a menu item.
4. Press Center to select the menu item, or press Menu to close the menu and cancel your selection.

Selecting options in a pick list

A range of options is often presented in a type of menu called a pick list, which can be identified by a downward-pointing arrow. Pick lists are different from the application menus described above.

- Use the 5-way to highlight the pick list, and then press Center to display the items in the list. Press Up and Down to highlight the item you want, and then press Center to select the highlighted item.
- To exit the pick list without making a selection, press Left or Right.
- Use your stylus to tap the pick list, and then tap the item you want from the list.
Using the keyboard

When using the keyboard, most people find it easiest to hold the smartphone with two hands and use the tips of both thumbs to press the keys, as shown above.

The keyboard backlight may not be visible in bright sunlight.

Using the keyboard backlight

Your Treo smartphone includes a keyboard backlight for low light conditions. The keyboard backlight activates automatically when the screen turns on. It turns off automatically when the screen turns off and when an active call lasts longer than a minute.
Entering lowercase and uppercase letters

- To enter lowercase letters, press the desired keys.
- To enter an uppercase letter, press Shift/Find 🍔 or Right Shift 🍔, and then enter a letter. You don't need to press and hold Shift while entering a letter.
- To turn Caps Lock on, press Shift/Find 🍔 or Right Shift 🍔 twice. To turn it off, press Shift/Find 🍔 or Right Shift 🍔 again. When Caps Lock is on, this symbol appears in the lower right: 🅱️.

Entering numbers, punctuation, and symbols

Numbers, punctuation, and symbols appear above the letters on the keys. To enter these characters, do one of the following:
- Press Option 🍔, and then press the key with the desired character shown above the letter. You don't need to press and hold Option while pressing the second key.
- To turn Option Lock on, press Option 🍔 twice. To turn it off, press Option 🍔 again. When Option Lock is on, this symbol appears in the lower right: 🅱️.

Entering other symbols and accented characters

1. Enter the character that corresponds to the symbol or accented character you want. See the table on the next page.
2. Press Alt 🅰️.
3. Press Up ▲ or Down ▼ to highlight the desired character.
4. Press Center 🎤 to insert the character, or just continue entering the next character.

Opening applications

When you open an application using either the Applications View or an application button, you automatically close the application you were previously using.

Using Applications View
1. Press Applications (Applications).
2. Use the 5-way navigator to highlight the application you want to use.
3. Press Center (Center) to open the selected application.

In Applications View, you can also do any of the following:
• Press Applications (Applications), repeatedly to cycle through different categories of applications.
• Enter the first few letters of the application’s name to highlight it. For example, if you enter “p” it highlights Phone; if you then enter “r” it highlights Prefs. If you pause and then enter “r,” it highlights the first application that starts with “r.”
Using the quick buttons

There are three buttons on the front of the Treo 650 smartphone. The fourth button turns your phone on and off, wakes up the screen, and controls the keyguard. Each quick button can be used to open two applications. To access a button’s primary application, simply press the button. To access a button’s secondary application, press Option ⏥, and then press the quick button.

<table>

You can also customize the buttons yourself; see “Reassigning buttons” on page 190 for details.
using your phone
Phone overview

The Phone application lets you make and receive calls and store favorites for contacting people and opening applications. Be sure you know how to turn on your phone before reading this section (see "Turning your phone on and off" on page 18).

Accessing the Phone application

- Press Phone/Send.

![Phone application interface](image)
Making calls

Your Treo™ 650 smartphone offers several options for making phone calls. As you get familiar with your Treo smartphone, you'll discover which method you prefer.

Dialing using the onscreen Dial Pad
1. Press Phone/Send.
2. Tap the onscreen Dial Pad to enter the number.
3. Press Phone/Send to dial.

Dialing with the keyboard
1. Press Phone/Send.
2. Using the numbered keys on the keyboard, start entering a phone number. You do not need to press Option to access the numbers on the keyboard.
3. Press Phone/Send to dial.

Dialing by contact name
Before you can dial a call by contact name, you must create some contacts (see “Adding a contact” on page 146), import them by synchronizing (see “Synchronizing information” on page 28), or import them from your SIM card (see tip on “Viewing your SIM Phonebook” on page 148).
1. Press Phone/Send.
2. Select the Contacts favorite button.
3. Using the keyboard, begin entering one of the following for the contact you want to call:
   - First initial and last name
   - First name
   - Last name
4. Select the number you want to dial.
5. Press Phone/Send to dial.

Dialing with a Speed Dial favorite button
You can use Speed Dial favorite buttons to quickly dial the numbers of people you call frequently. Before you can use Speed Dial favorite buttons, you must create some favorites entries. See "Defining favorite buttons" on page 56.
1. Press Phone/Send.
2. Use the 5-way to access Favorites.
3. Highlight the desired button.
4. Press Center to dial the selected button.
Dialing from a web page or message

Your smartphone recognizes most phone numbers that appear in web pages or in text, email, or multimedia messages.

1. Use the 5-way to highlight the phone number you want to dial in the web page or text message.
2. Press Center to open the Dial dialog box.
3. Press Phone/Send to dial.

Redialing a recently called number

• To dial the last number: From the Main View in the Phone application, press and hold Phone/Send to dial the last number you called.
• To select from your most recently dialed numbers: From the Main View in the Phone application, press Phone/Send, select the number you want to call, and then press Phone/Send again to dial.
• To select from a chronological list of calls: Select the Call Log favorite. You can also access the Call Log by pressing Phone/Send twice, and then selecting Call Log from the recent call list.

If you can't highlight and dial a phone number on a web page or in a text message using the 5-way or stylus, it means that your smartphone does not recognize it as a phone number. Instead, you can copy and paste the number into the Dial Pad.
Receiving calls

To receive calls, your phone must be on. This is different from having just the screen turned on (see “Turning your phone on and off” on page 18). When your phone is off, incoming calls go to voicemail.

To answer a call, do one of the following:

- Press Phone/Send ☎️.
- Using the 5-way navigator, select the onscreen Answer button.
- If the headset is attached, press the headset button.

To ignore a call and send it to voicemail, do one of the following:

- Press Power/End 📷.
- Using the 5-way, select the onscreen Ignore button.

To silence the ringer while your phone is ringing:

- Press the Volume button or any key on your smartphone except Phone/Send, Power/End, or the 5-way.
- To immediately silence all system sounds including the ringer, slide the Ringer switch to Sound Off 🎵.

When you silence the ringer, you can either answer the call or let it ring through to voicemail.

If music is playing, and a call arrives, the phone rings softly. The audio continues playing, but you won’t hear it during your call. To pause the music, press the Side button. To answer the call, do one of the following:

- Using the 5-way, select the onscreen Answer button.
- Press the headset button (if a headset is attached).
Using voicemail

Setting up voicemail
1. Make sure your phone is turned on (see "Turning your phone on and off" on page 18).
2. Press Phone/Send  
3. Use the 5-way navigator to access Favorites.
4. Select the Voicemail favorite button.

Your smartphone connects to Cingular Wireless’s automated voicemail system. Follow the prompts to set up your voicemail system.

Voicemail notification
When you have a new voicemail message, you are notified with an Alert screen. A Voicemail icon  may also appear at the top of your screen (this feature is not supported by all mobile networks).

Retrieving voicemail messages
1. Press Phone/Send  
2. From the Phone application Main View, Dial Pad, or Favorites, press and hold 1 on the keyboard. Your smartphone dials the Cingular Wireless’s voicemail system.
3. Enter your voicemail password using the smartphone keyboard, or select Extra Digits if you defined this option (see "Editing or deleting an existing favorite button" on page 58 for information on editing favorite buttons). Remember, you do not need to press Option to enter numbers, *, or # while on an active call.
Managing active calls

When you make or receive a call, the Active Call View appears. Use the 5-way navigator to access the onscreen buttons in this view.

- **End Call**
  - Ends the call immediately. You can also press the headset button (if the headset is attached).

- **Speakerphone**
  - Switches to the speakerphone so you can use other features, such as checking your calendar, during a call.

- **Turn off Speakerphone**
  - Turns off the speakerphone when it’s on.

- **Switch Headset**
  - Switches from a headset with Bluetooth wireless technology to the built-in earpiece. This button replaces the Spkr-phone button when a headset with Bluetooth wireless technology is attached.

Press Phone/Send repeatedly to toggle between the Active call screen and the Main View of the Phone application.

To avoid accidentally pressing onscreen buttons while you’re holding the phone up to your ear to speak, you can disable the screen’s touch-sensitive feature during active calls (see “Locking your screen” on page 192).

When a call lasts longer than one minute, the screen turns off. Press any key except Power/End to wake up the screen.

A. Caller’s name and number
B. Current duration of call

Caller: Janeفارسی 653-555-1234
Active: 00:02
Managing active calls

Ending a call
Do one of the following:
• Press Power/End.
• Select Hang Up.
• Press the headset button (if the headset is attached).

Returning to an active call from another application
You can use many other applications on your smartphone while holding a phone conversation, including the organizer and text messaging (SMS) features. You cannot browse the web or send and receive email while on an active call.
• From any application, press Phone/Send to return to the Active Call View.
Saving phone numbers
After you complete an incoming call from a number (with caller ID) that is not in your Contacts list, you are prompted to add the number to your Contacts list.

- To add the number, select Yes.
- To decline adding the number, select No.
- To permanently disable the Add New Contact prompt, check the Never ask me to add new Contacts box when the prompt appears.

If you don’t add a number right away, follow these steps to add it later:
1. In the Call Log (see “Redialing a recently called number” on page 47), highlight the number you want to save.
2. Select Add Contact.
3. Enter the information for the entry.
4. Select Done.

Making a second call
You can make a second call while your first call is still active.
1. After dialing the first number, use the 5-way navigator to select Hold.
2. Use the 5-way to select Add Call.
3. Dial the second number using Favorites, Contacts, or Dial Pad (see “Making calls” on page 45).

When two calls are active, the Active Call View includes two status lines, each representing one of the calls. To switch between the two calls, select Swap.
Answering a second call (call waiting)
When you are on an active call, you can receive a second call. When the second call comes in, the Call Waiting dialog box appears, giving you the following options for handling the second call:
- To place the current call on hold and answer the new call, use the 5-way navigator to select Answer.
- To send the new call to voicemail, use the 5-way to select Ignore.
- To hang up the current call and answer the new call, press Power/End.

Making a conference call
You can join a total of five other calls in a conference session, provided that your network and service plan include 6-way conferencing. Please contact Cingular Wireless for more information. Additional charges may apply and minutes in your mobile account may be deducted for each active call you place.
1. While the first call is active, place or answer a second call.
2. Use the 5-way to select Conf. This joins the two active calls in a conference session.
3. Repeat this process to add other calls to the conference call.
4. To end the conference, use the 5-way to select Hang Up and end all the calls.
Managing active calls

Forwarding all calls
You can forward all your calls to another telephone number. You can also selectively forward certain calls (see “Forwarding calls under certain conditions” in the next section). Please check with Cingular Wireless about availability and pricing of forwarded calls, as additional charges may apply.

1. Press Phone/Send  
2. Open the menus .
3. Select Options, and then select Call Preferences.
4. Select the Forward all calls pick list.
   • If the forwarding number appears in the pick list, select the number.
   • If the forwarding number does not appear in the pick list, select Edit Numbers, and then select New. Enter a forwarding number, including the area code or country code if it is different from your mobile phone number. Select OK.
5. Select OK.

Forwarding calls under certain conditions
You can forward calls to another number when the line is busy, a call is unanswered, your phone is off, or you are outside a coverage area.

1. Press Phone/Send  
2. Open the menus .
3. Select Options, and then select Call Preferences.
4. Select the Forward all calls pick list and select Don’t forward calls.
5. Select any of the following pick lists:
   • When busy: Forwards calls if the phone is busy.
   • Not answered: Forwards calls instead of sending to voicemail.
• **Off/No service:** Forwards calls when your phone is not connected to a mobile network.

6. If the forwarding number appears in the pick list, select the number. If the forwarding number does not appear in the pick list, select Edit Numbers then select New, enter a forwarding number, and select OK.

7. Select OK.

**Barring calls**

Call Barring lets you prevent unauthorized calls on your smartphone. This feature may not be available on all mobile networks.

You must enter your Call Barring password every time you change your Call Barring preferences. Contact Cingular Wireless if you do not know this password or if you need more information.

1. Press Phone/Send.
2. Open the menus.
3. Select Options, and then select Call Barring.
4. Select the onscreen pick lists, and then select your Call Barring preferences.
5. Select OK.

**Viewing minutes usage**

1. Press Phone/Send.
2. Select the Call Log favorite button.
3. Open the menus.
4. Select Totals from the Record menu.
5. (Optional) To reset the counters to zero, select Reset Counters.
6. Select Done.
Defining favorite buttons

Your Treo smartphone provides approximately 70 programmable favorite buttons for quick access to the following common tasks:

- Dialing a phone number (speed dial)
- Accessing your Call Log.
- Accessing the onscreen Dial Pad.
- Opening an application
- Accessing a web page
- Addressing a text, MMS (multimedia messaging system), or email message
- Accessing voicemail (preset on your Treo smartphone)

When you are in the Main, Favorites, or Dial Pad View, you can press and hold a Quick Key to open the favorite associated with that key. Quick Keys are optional and can be letters or numbers, but you can’t use both the letter and number for the same key. For example, the voicemail Quick Key is 1. The letter equivalent for that key is E, so you cannot assign E as a Quick Key to another favorite button.
Creating a speed dial favorite button

1. Press Phone/Send.
2. Use the 5-way navigator to access Favorites.
3. Select a blank button.
4. Select the Types pick list and select Speed Dial.
5. Enter a label for the favorite:
   - If the entry is for an existing contact, select Lookup. Start entering the last name of the contact and select the contact when it appears in the lookup list.
   - If the entry is for a new contact, enter the Label, press Down, and enter the Number.
6. (Optional) Enter a Quick Key. When you are in the Phone application, you can press and hold the Quick Key to instantly open the favorite.
7. (Optional) Select the Ringtone pick list and select a special ringtone for incoming calls from that contact.
8. (Optional) Select More, and select advanced options:
   - **Extra Digits**: Lets you define additional digits to dial, such as a password or extension.
   - **Dial Extra Digits Automatically**: Dials predefined Extra Digits immediately after dialing the phone number, when checked.
9. Select OK.
Creating other types of favorite buttons

1. Press Phone/Send .
2. Use the 5-way to access Favorites.
3. Select a blank button.
4. Select the Types pick list and select Call Log, Dial Pad, Application, Message, Email, or Web Link.
5. Enter a label for the favorite and enter any other necessary information on the screen.
6. (Optional) Enter a Quick Key that opens the favorite when pressed and held.
7. Select OK.

Editing or deleting an existing favorite button

1. Press Phone/Send .
2. Use the 5-way to access Favorites.
3. Highlight the favorite button you want to edit or delete.
4. Open the menus .
5. Select Edit, and then select Edit Favorites Button.
6. Make the desired changes.
7. To delete the entry, select Delete.
8. Select OK.
Using a phone headset

You can connect a phone headset for hands-free operation. If you need to use your phone while driving and this is permitted in your area, we recommend using a phone headset (sold separately).

- You can press the headset button to perform any of the following tasks:
  - Answer an incoming call
  - Answer a call waiting call
  - Switch between two active calls
  - Hang up a single call

If you’re using a headset with Bluetooth wireless technology and you want to return to the handset or a wired headset during a call, select Cancel Bluetooth on the Active Call screen.
Using a wired headset

Your Treo smartphone uses a 2.5mm, 3-pin headset connector. Your smartphone works with headsets that are designed for this type of connector. When in doubt, ask the third-party headset manufacturer if the product is compatible with Treo smartphones. If you hear a headset buzz or poor microphone performance, your headset may be incompatible with your Treo smartphone.

Your Treo™ 650 smartphone is also compatible with headsets enabled with Bluetooth® 1.1 wireless technology. This includes most of the headsets with Bluetooth wireless technology currently available, as many of these headsets support both Bluetooth 1.1 and 1.2 wireless technology. For a list of compatible Bluetooth hands-free devices, go to www.palmOne.com/us/support/bluetooth/treo650_bluetooth_compatibility.html. Please note, however, that you cannot use a headset with Bluetooth wireless technology to listen to MP3 files.

With your phone’s built-in Bluetooth wireless technology, you can connect to a number of devices with Bluetooth wireless technology such as a headset, car kit, printer, or GPS receiver, as well as to other phones and handhelds with Bluetooth wireless technology. If your computer is enabled with Bluetooth wireless technology, you can synchronize wirelessly, and even use your phone as a wireless modem for your computer.

Once you set up a connection with a device with Bluetooth wireless technology, you can communicate with that device whenever it is within range (about 30 feet).
Connecting to a headset or car kit with Bluetooth wireless technology

1. Go to Applications and select Bluetooth.
2. Select On.
3. Enter a device name for your phone. This is the name that appears on the other Bluetooth device’s screen when it connects to your phone.
4. Prepare your headset or car kit to accept a connection from another Bluetooth device. See the documentation that came with your hands-free device for instructions.
5. Select Setup Devices.
7. Follow the onscreen instructions to create a partnership with the specific hands-free device. When prompted, enter a passkey. Some hands-free devices may have a built-in passkey; other devices may provide a screen where you enter the passkey. In either case, you must use the same passkey on both your phone and your hands-free device. We recommend that you use a passkey of 16 digits, where possible, to improve the security of your phone. The longer the passkey, the more difficult it is for the passkey to be deciphered. If the hands-free device has a built-in passkey, see the device’s documentation for the passkey.

Your smartphone does not support Bluetooth wireless connections to stereo headsets or keyboards.

If you’re using a hands-free device with Bluetooth wireless technology and it is within range, your Treo smartphone automatically routes all calls to the hands-free device instead of to the handset. When a call comes in, your smartphone rings and the headset beeps. Even if you pick up the call on your smartphone, the call goes to the headset.
8. After you finish setting up the device, select Done to return to the Applications View.
Customizing phone settings

Selecting ringtones
You can set different tones for different types of incoming phone calls and alerts.

1. Press Phone/Send.
2. Open the menus.
3. Select Options, and then select Sound Preferences.
4. Select the Tones box.
5. Select ringtones and alerts from any of the following pick lists:
   - **Known Caller Tone**: An incoming call from someone in your Contacts or Favorites.
   - **Unknown Caller Tone**: An incoming call from someone identified by caller ID who is not in your Contacts or Favorites.
   - **Roaming Tone**: A special tone for incoming calls when you're outside your home mobile network.
   - **Voicemail Tone**: A tone to let you know you have new voicemail.
   - **Service Tone**: A warning of a service change, such as moving into and out of a mobile network coverage area.

6. Select Done.
Selecting Alert Volume and Vibrate settings

1. Press Phone/Send.
2. Open the menus.
3. Select Options, and then select Sound Preferences.
4. Select the Alert Volume pick list and select a volume level.
5. Select the first Vibrate pick list and indicate if you want your phone to vibrate when you receive a call or alert and the Ringer switch is set to Sound On.
6. Select the second Vibrate pick list and indicate if you want your phone to vibrate when you receive a call or alert and the Ringer switch is set to Sound Off.
7. Select Done.

Adjusting call or music volume

While a call is in progress, press the Volume button on the side of your Treo™ 650 smartphone to adjust the call volume. While music is playing, press the Volume button to adjust the music volume.

Adjusting ringer volume

When a call is not in progress and music is not playing, press the Volume button on the side of your smartphone to adjust ringer volume, and then press the Side button to confirm your selection.
Assigning a caller ID photo

1. Press Phone/Send.
2. Select the Contacts favorite button.
3. Open the contact you want to give a photo caller ID.
4. Select the Picture box.
5. Select Camera to take a photo and add it to this contact entry when you save the photo, or select Photos to add an existing photo to this contact entry.
6. Select Done.
Assigning a caller ID ringtone

1. Press Phone/Send.
2. Select the Speed Dial favorite you want to give a ringtone.
3. Open the menus.
4. Select Edit Favorites Button on the Record menu.
5. Select the Ringtone pick list and select a tone for this contact entry.
6. Select OK.

Selecting wallpaper for the Phone application

If you have images stored on your smartphone, you can select different wallpaper for the Main View in the Phone application.

1. Press Phone/Send.
2. Open the menus.
3. Select Options, and then select General Preferences.
4. Select the pick list at the top of the screen and select Show Wallpaper.
5. Select the thumbnail image and select a wallpaper image for your Phone application.
6. Select OK.

If you prefer to use the onscreen Dial Pad, assign the Dial Pad as the default wallpaper.

If you remove the Dial Pad as the wallpaper, you can still access it quickly. Press Phone/Send, and then press Center on the 5-way. 

You can also set the background for the Calendar’s Agenda View. See “Customizing display options for your calendar” on page 153 for details.
What are all those icons?

You can monitor the status of several items using icons at the top of the Phone screen:

<table>
<thead>
<tr>
<th>Network name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Displays Cingular Wireless when your phone is on and you are in a coverage area. If you are outside a coverage area, No service or SOS Only appears instead. When you turn off your phone, Phone Off appears.</td>
<td></td>
</tr>
<tr>
<td>Appears when call forwarding is active.</td>
<td></td>
</tr>
<tr>
<td>Appears when you have voicemail. If you have alternate line service (ALS), the left side is shaded when you have voicemail on line 1, and the right side is shaded when you have voicemail on line 2. Some networks use a full-screen alert instead. Call Cingular Wireless for more information.</td>
<td></td>
</tr>
<tr>
<td>Appears in gray when Bluetooth® wireless technology is off. Appears in blue when Bluetooth wireless technology is on. Appears in reverse blue when your phone is communicating with other devices using Bluetooth wireless technology.</td>
<td></td>
</tr>
<tr>
<td>Replaces the Bluetooth icon when your smartphone is connected to a headset that is enabled with Bluetooth wireless technology.</td>
<td></td>
</tr>
<tr>
<td>Appears when your phone is on. The bars display the signal strength. The stronger the signal, the more bars appear. If you are outside a coverage area, no bars appear.</td>
<td></td>
</tr>
</tbody>
</table>

To display the remaining battery power, tap the battery icons at the top of the screen.

If you have multiple alerts, the Alert screen displays all your pending alerts. Select an item’s description to jump to that item, or check the box to clear that item. To view all your pending alerts from any screen on your phone, press and hold Center.

To quickly access the Bluetooth Preferences panel, tap the Bluetooth icon.
<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Triangle" /></td>
<td>The triangle appears when your phone is on and a GPRS or EDGE network is within range. Some service providers do not show the triangle.</td>
</tr>
<tr>
<td><img src="image" alt="GPRS EDGE" /></td>
<td>Appears when you are connected to a GPRS or EDGE network. You can still receive calls.</td>
</tr>
<tr>
<td><img src="image" alt="Battery" /></td>
<td>Displays the battery charge status. When the battery drains to 20% of its capacity, the icon changes from blue to red. At 10% of its capacity, you begin to receive warning messages, and at 5% of its capacity, your smartphone beeps and the icon changes from red to clear.</td>
</tr>
<tr>
<td><img src="image" alt="Charging" /></td>
<td>Appears when your smartphone battery is charging. The lightning bolt turns from red to green when the battery is fully charged and your phone remains connected to the AC charger.</td>
</tr>
<tr>
<td><img src="image" alt="Full Battery" /></td>
<td>Appears when your smartphone battery is fully charged.</td>
</tr>
<tr>
<td><img src="image" alt="Text Messages" /></td>
<td>Indicates the number of unread text and multimedia messages.</td>
</tr>
<tr>
<td><img src="image" alt="Email Messages" /></td>
<td>Indicates the number of unread email messages. You can select this icon to retrieve your messages.</td>
</tr>
<tr>
<td><img src="image" alt="Calendar" /></td>
<td>Displays the current (or next) event from the Calendar application. If you have an event conflict during the current time period, a red bar appears next to the event description.</td>
</tr>
</tbody>
</table>

To display the current event from the Calendar application in the Main View of the Phone application, open the Options menu and select General Preferences. Check the Show Calendar event box. You can then select this event to jump to the Calendar application.
using email
Using email on your smartphone

You can send and read email on your Treo™ 650 smartphone much as you do from a computer. You can add and view attached files, forward email, file email into folders, maintain multiple email accounts (including personal and corporate accounts), and so on.

The Treo 650 smartphone has three applications for using email: VersaMail®, Cingular Xpress Mail™, and GoodLink. You can use either or both programs; see below for a guide to choosing between them.

To use email on your smartphone, you'll need to already have a personal email account with an email provider such as EarthLink, AOL, MSN, or Yahoo; you can also use your corporate email account. For either a personal or a corporate account, you need to set up VersaMail or Xpress Mail to work with that account; for example, if you have an EarthLink account, janessmith4028@earthlink.net, you'll set up VersaMail or Xpress Mail to work with that account so that you can send and receive messages from that account on your smartphone.

You can also use the web browser to view email from the Internet, as you would with any web browser. (For example, if you use Yahoo! Plus Mail™, you can view your Yahoo email account from the web browser.) See "Browsing the web" on page 116.
### Which email application should I use?

<table>
<thead>
<tr>
<th>I want to ...</th>
<th>Then use ...</th>

*Recommend for secondary email accounts only.
VersaMail

Before you can use VersaMail, you need to enter your email account settings. If you have multiple email accounts, you must enter settings for each email account.

How do I get started?

1. If you already use the VersaMail application on a Palm Powered™ device, and you want to transfer those settings to your new smartphone, see the User Guide for the VersaMail Application on the Software Installation CD.

2. If you're entering settings for an email account on a Microsoft Exchange ActiveSync® server, a Lotus Notes server, or a Microsoft MAPI server, see the User Guide for the VersaMail Application on the Software Installation CD for setup steps.

3. If your email provider is listed in the following table, go to "Setting up VersaMail to work with common providers" on page 74.

<table>
<thead>
<tr>
<th>AOL</th>
<th>Comcast</th>
<th>RCN</th>
</tr>
</thead>
<tbody>
<tr>
<td>Apple .Mac</td>
<td>CompuServe</td>
<td>SBC/PacBell</td>

<td>Mail.com</td>
<td>Yahoo! (Mail Plus only)</td>
</tr>
<tr>
<td>Charter</td>
<td>NetZero</td>
<td></td>
</tr>
</tbody>
</table>

4. If your email provider’s name is not listed, then you need to obtain the following info from your system administrator or ISP:
   - Mail protocol: POP or IMAP

VersaMail is not an email provider. It works with an account from a provider—your Earthlink or AOL account, for example—or a corporate account to transfer messages to your phone.

Your email provider is the service you use to send and receive email. Your email provider’s name appears between the @ symbol and the dot symbol in your email address.

The server port numbers are filled in on the account setup screens based on your mail protocol. Only change the prepopulated numbers if your server administrator or ISP gives you different port numbers.
Incoming mail server name, such as mail.myisp.com
Incoming and outgoing mail server port numbers, such as 110 (incoming POP), 143 (incoming IMAP), or 25 (outgoing POP or IMAP)
(If necessary) Security settings: APOP, ESMTP, SSL

You should also note the following outgoing mail server settings:

- **Former AT&T customers who are now Cingular customers:** Use smtp.mymmode.com as your outgoing mail server.
- **Cingular customers who were not formerly AT&T customers:** Use cwmx.com as your outgoing mail server.

### Setting up VersaMail to work with common providers

1. Go to Applications and select VersaMail.
2. If prompted to select an initial setup option, then select Continue.
   - If no prompt is displayed, open the menus, select Accounts, select Account Setup, and then select New.
3. In the Account Name field, enter a descriptive name, such as Work Email.
4. Select the Mail Service pick list, and then select your email provider, such as EarthLink. Select Next.
5. Enter the username for your email account. Your username appears before the @ symbol in your email address.
6. Select the Password box, enter your email account password, and then select OK.
7. Select Next.
8. Select Next, and then select Done.
Setting up VersaMail to work with other providers

1. Go to Applications and select VersaMail.
2. If prompted to select an initial setup option, then select Continue.
   If no prompt is displayed, open the menu, select Accounts, select Account Setup, and then select New.
3. In the Account Name field, enter a descriptive name, such as My Cingular.
4. Select the Mail Service pick list, and select Other.
5. Select the Protocol pick list, and then select POP or IMAP (based on the info you got from your system administrator or ISP). Select Next.
6. Enter the username for your email account. Your username appears before the @ symbol in your email address.
7. Select the Password box, enter your email account password, and then select OK, and then select Next.
8. Enter your email address and the names of the incoming and outgoing mail servers, and then select Next.
9. If your system administrator or ISP provided port numbers or security settings, select Advanced, and then enter those settings.
10. Select Done.
Creating and sending messages

1. From the Inbox, select New.
2. Begin entering the addressee’s email address, first name, or last name. If the information you are entering matches one or more entries in Contacts, VersaMail displays the matching contacts. To accept a suggestion, select the correct contact. To send to a different address, keep entering the email address or name.
3. Enter the subject and message text. To move between fields, press Up ↑ or Down ↓.
4. Select Send to connect and send all messages immediately, Outbox to put the message in the Outbox to send later, or Drafts to save the message and continue working on it at another time. If you select Send and the message cannot be sent for any reason, the message is stored in your Outbox. VersaMail makes up to five attempts to automatically send the message; if automatic send is not successful, an alert message appears and you must try to manually send the message again.

Attaching photos and videos

1. Create the message to which you want to attach the photo or video.
2. On the New Message screen, tap the red paper clip icon ⬇ in the upper-right corner.
3. Select Photo/Video from the Type pick list.
4. On the Select Media screen, select the Album pick list to go to the album containing the photo or video you want, and then check the box to the left of the photo or video.
5. Select Done.
Attaching ring tones
1. Create the message to which you want to attach the ringtone.
2. On the New Message screen, tap the red paper clip icon in the upper-right corner.
3. Select Sounds from the Type pick list.
4. Select the ringtone you want, and then select Insert.
5. Select Done.

Attaching Word, Excel, and PowerPoint files
1. Create the message to which you want to attach the item.
2. On the New Message screen, tap the red paper clip icon in the upper-right corner.
3. Select Documents from the Type pick list.
4. Select the file you want on the Documents screen.
5. Select Done.

Attaching other types of files
1. Create the message to which you want to attach the item.
2. On the New Message screen, tap the red paper clip icon in the upper-right corner.
3. Select the type of file to attach—for example, Address, Appointment, or Memo/Text—from the Type pick list.
4. Select the file you want from the list in the Type box.
5. Select Done.

Receiving and viewing messages
1. Make sure your phone is turned on (see “Turning your smartphone on and off” on page 18).
2. From any mailbox, select Get or Get & Send.
3. From the Inbox, select the message you want to view.
4. If a large incoming message is truncated, select More .
5. Select Done.

Replying to or forwarding messages
When you respond to messages, you can select whether to include the original text (see “Customizing your email settings” on page 80).
1. From the Inbox or another folder, open the message to which you want to respond.
2. From the Message View, select Reply. Select whether to reply to just the sender or to reply to both the sender and all addressees on the messages.
3. Enter your reply.
4. Select Send.

Viewing attachments
There are a number of attachment types you can open with the built-in software on your smartphone (for example, Microsoft Word, Excel, and PowerPoint files; ringtones; and photos).
1. From any folder, open the message with the attachment you want to view.

If an attachment is not downloaded because it is larger than your maximum message size, the paper clip icon does not appear, and the attachment does not display at the bottom of the message screen. Select More to download and display any attachments.

Messages with downloaded attachments are indicated by a paper clip icon to the left of the message icon.
2. Tap the attachment name at the bottom of the message screen to view it in the default viewer on your phone. Or, tap the folder icon to the left of the attachment name to open a menu of tasks you can do with the attachment, including View, Install, or Unzip, depending on the attachment file type; Save to card to save the attachment to an expansion card; or Select Viewer to select the application you want to use to view the attachment.

3. When you finish with the attachment, select Done to return to the Attachments dialog box. If there is no Done button, go to Applications and select VersaMail to return to the Inbox of the account you were in.

Managing your messages
The status icons that appear near the messages in your Inbox indicate the following:

- You have not read the message.
- You have read the message.
- The message includes an attachment.
- This message is high priority.

You can rearrange the VersaMail list to make it easier to find and view messages.
- In the Inbox, select Sort, and then select one of the following: Sort by Date, Sort by Name, Sort by Subject.
- To quickly switch between folders in list view, select the folder pick list at the top of the screen and select the desired folder.

Deleting selected messages from the Inbox
When you delete a message from the Inbox, it moves to the Trash folder.
1. Select the bullet next to the icon of each message that you want to delete. To select adjacent messages, drag the stylus so it hits the bullet to the left of each message. Lift the stylus and drag again to select more adjacent messages.
2. Open the menus.
3. Select Delete on the Message menu.
4. If a confirmation dialog box appears, select OK to confirm deletion.

Deleting messages by date
You can quickly delete a group of messages by selecting a range of dates.
1. Open the menus.
2. Select Delete Old on the Message menu.
3. Select the folder and a date range for the messages you want to delete.
4. Select OK.
5. If a confirmation dialog box appears, select OK to confirm deletion.

Switching accounts
You can switch between different email accounts.
1. Open the menus.
2. Select Accounts, and then select an account.

Customizing your email settings
You can customize the VersaMail settings for each individual email account on your Treo smartphone. The preferences you set apply only to the email account you are currently viewing. If you have multiple accounts, configure each account separately.
You can set up a schedule to automatically retrieve email messages; set preferences for how and when messages are retrieved; add a signature to an outgoing message; and more. For complete information on all of the email settings you can customize, see the VersaMail User Guide on the CD.

Scheduling Auto Sync
You can set up VersaMail to automatically download new email messages to your phone with the Auto Sync feature.
1. Open the menus.
2. Select Options, and then select Preferences.
3. Select Auto Sync.
4. Check the Sync automatically box.
5. Select the Every pick list and select the time interval, from 5 minutes to 12 hours. Note that if you set a more frequent interval, you may need to recharge your phone's battery more often.
6. Select the Start and End Time boxes, and then select the hour, the minute, and AM or PM to enter the time for the first and last Auto Sync to take place. Select OK.
7. Select the days you want the schedule to be active. You can choose any number of days, but you can set up only one schedule for each email account.
8. Select OK, and then select Get Mail.

Selecting alert tones
When you schedule Auto Sync for a given account, you can choose a sound—such as a bird, a phone, or an alarm—to let you know when new email arrives.
1. From any mailbox screen, open the menus.
2. Select Options, and then select Preferences.
3. Select Auto Sync.
4. Select Alerts.
5. Check the Alert me of new mail box.
6. Select the Alert Sound pick list, and then select a sound. Your smartphone plays a brief demo of the sound.
7. Select OK.

Setting preferences for getting messages
1. From any mailbox screen, open the menus.
2. Select Options, and then select Preferences.
3. Select Delivery Options.
4. Set any of the following preferences.
   - **Get**: Indicates whether to get message subjects only or entire messages.
   - **Ask Every Time**: Indicates if you want to see a dialog box for selecting subjects only or entire messages each time you retrieve email. If the box is unchecked, messages are retrieved according to the option you select in the Get pick list.
   - **Unread messages** (IMAP accounts only): Downloads only unread mail to your phone. If you don’t check this box and you select Get & Send, all of your messages on your provider’s mail server are downloaded to your Inbox, including messages you have already read.
   - **Mail from last**: Gets messages sent within the number of days you specify.
   - **Download attachments**: Automatically downloads files attached to email. Attachments that exceed the maximum message size cannot be downloaded.
   - **Maximum message size**: Sets the maximum size of an incoming email message. Enter the size in kilobytes (KB). The default is 5KB, but you can enter any size up to 2048KB (approximately 2 megabytes, or 2MB), including attachments. The maximum message size that you can retrieve is 60KB for the body text and approximately 5MB of total data for any attachments.
   - **Message Format**: Sets the format in which you retrieve messages. Select HTML to display any messages sent in HTML format with basic HTML formatting intact, and other messages as plain text. Select Text to display all messages as plain text, regardless of the format in which they were sent. The default setting is HTML.
5. Select OK.
Attaching a signature to a message
You can attach a personal signature, with info like your company's address and fax and telephone numbers, to the bottom of all messages you send.
1. From any mailbox screen, open the menus (巧).
2. Select Options, and then select Preferences.
3. Select Signature.
4. Check the Attach Signature box.
5. Enter your signature information, and then select OK.

Working with Microsoft Exchange ActiveSync
Microsoft Exchange ActiveSync works with the VersaMail and Calendar applications on your phone to directly access corporate groupware information on a Microsoft Exchange 2003 server. You can access business email and calendar info on the Exchange 2003 server from your phone without using a desktop computer.
When you create a Microsoft Exchange ActiveSync account in the VersaMail application, both your email and calendar info synchronize directly with the Exchange server; information does not synchronize with the desktop software application on your computer, such as Microsoft Outlook or Palm Desktop software. Other information, such as contacts, tasks, and memos, continues to synchronize with your desktop software.
For complete information on using a Microsoft Exchange ActiveSync account, see the VersaMail User Guide on the CD.
Before you can use Xpress Mail to work with email on your smartphone, you need to do the following:

- Enter your email account information on the Cingular Xpress Mail website from your computer.
- Download and install the Xpress Mail desktop software.
- Set up the Xpress Mail desktop software.
- Install the Xpress Mail software on your smartphone.
- Set up Xpress Mail on your smartphone to work with your email account.

You must install the Xpress Mail desktop software on the computer where you access your email. To access your email the Xpress Mail desktop must be running and must be connected to your mail server.

How do I get started?
You need to enter the following information on both the Cingular Xpress Mail website and in the Xpress Mail application on your smartphone:

- Your email address
- Your smartphone’s phone number (see “What’s my number?” on page 20)

**Entering account information on the Cingular Xpress Mail website**

1. On your computer, make sure you're logged into your Exchange or Domino server, and then open a web browser.
2. Go to https://xpressmail.cingular.com/subscriber and click Register Now.
3. Fill in the blanks.
4. Click Save.

**Installing the Xpress Mail desktop software**

1. While still on the Xpress Mail website, when prompted, click Download to copy the Xpress Mail desktop software to your computer.

2. Click Save to store the file on your computer. When prompted, select the folder where you want to store the file, and then click Save.

3. Open My Computer and double-click the XpressMailDesktopClientSetup.exe file you just downloaded, and then click Yes to open the Setup Wizard.
4. Close all programs that are running on your computer except your web browser, and then click Next.

5. Follow the onscreen prompts to finish the installation, and then click Finish.

Setting up the Xpress Mail desktop software

1. Enter the username and password you created for your Xpress Mail account on the web, and then click Next. Leave the two boxes checked.
2. Leave the Enable mobile access to mail, calendar, and contacts box checked, select the type of mail server you want to connect to, and then click Next.

3. Uncheck the Enable access to your documents via your mobile PDA box, and then click Finish.

4. Wait for Xpress Mail to connect to your server. After it makes the connection, the Smart Device Clients screen is displayed.

5. Click Skip.

6. On the Setup Complete screen, click Done.
Installing Xpress Mail on your smartphone

1. If your smartphone screen is off, press Power/End to wake up the screen, and then press Center to turn off Keyguard.
2. If Phone Off is displayed in the upper-left corner of the screen, press and hold Power/End to turn on your phone.
3. Go to Applications and select XpressMail.
4. Select Install Now.
5. If prompted, select Yes to connect to the Internet. You're connected to the Cingular Xpress Mail software website.
6. Tap Download Now on the Xpress Mail Download Page, and then press Center.
7. Select Yes to download and install the software. Be sure that Applications is selected in the Save to option.
8. Wait a few minutes for the Download Complete screen to appear, and then select Save and open.
9. Select Yes to accept Xpress Mail into Applications.
10. After the software is transferred, select Reset to reset your smartphone. Resetting is done when the Dial Pad appears.

Setting up Xpress Mail to work with your email account

1. If your smartphone screen is off, press Power/End to wake up the screen, and then press Center to turn off Keyguard.
2. Press and hold Power/End to turn on your phone again.
3. Go to Applications and select XpressMail.
4. Enter your smartphone’s phone number, and then select Next.
5. If prompted, select Yes to connect to the Internet.
6. On the Xpress Mail Registration screen, select Personal Edition, and then select Next.
7. On the Xpress Mail Registration screen, enter the username and password you entered on the Xpress Mail website. Select Next.

Xpress Mail generates security keys to protect your information when sending and receiving email messages. When this process has finished, the Inbox of your account is displayed.

**Setting up Xpress Mail to work with other accounts**

After you have set up Xpress Mail to work with your corporate email account, you can easily set up the application to work with other accounts, such as a personal email account. You can set up Xpress Mail to work with as many as three accounts.

**What do I need to set up Xpress Mail to work with another account?**

Depending on the account type, you need to obtain certain information before you set up Xpress Mail to work with another account:

- If your email provider is listed in the following table, you need only your account username and password. Then you can skip ahead to “Setting up Xpress Mail to work with common providers” on page 90.

<table>
<thead>
<tr>
<th>ATT Worldnet</th>
<th>EarthLink</th>
<th>Yahoo! (Mail Plus only)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bell South</td>
<td>NetZero</td>
<td></td>
</tr>
<tr>
<td>Comcast</td>
<td>SBC Global</td>
<td></td>
</tr>
</tbody>
</table>
If your email provider’s name is not listed, then you need to obtain the following info from your system administrator or ISP, and then skip to “Setting up Xpress Mail to work with other providers” on page 91:
- Account username and password
- Mail protocol: POP or IMAP
- Incoming mail server name, such as mail.myisp.com
- Incoming mail server port number, such as 110 (POP) or 143 (IMAP)
- (If necessary) SSL security setting
- For IMAP accounts only, the name of the Sent, Trash, and Root folders on the server

Setting up Xpress Mail to work with common providers

1. If your smartphone screen is off, press Power/End to wake up the screen, and then press Center to turn off Keyguard.
2. Press Mail.
3. Open the menus, select Accounts, and then select Manage.
4. Select New.
5. Select the pick list, and then select your email provider.
6. In the Account Name field, enter a descriptive name for this account.
7. Enter the username (or ID for a Yahoo! account) and password you use for this account.
8. (Optional) If you would like message recipients to reply to a different email address, enter the address in the Reply Email field.
9. Select Next.
10. To download messages from this account, select Sync Now. To go to the Inbox without downloading messages, select Sync Later.

Setting up Xpress Mail to work with other providers

1. If your smartphone screen is off, press Power/End to wake up the screen, and then press Center to turn off Keyguard.
2. Press Mail.
3. Open the menus, select Accounts, and then select Manage.
4. Select New.
5. Select the pick list, and then select Other POP or Other IMAP, depending on the protocol (based on the information you obtained from your email provider or server administrator).
6. In the Account Name field, enter a descriptive name for this account.
7. Enter the username and password you use for this account.
8. (Optional) If you would like message recipients to reply to a different email address, enter the address in the Reply Email field.
9. Select Next.
10. Enter the name of the incoming mail server. If the server port number is different from the one displayed, enter the new number. Check the box if your account uses SSL encryption. Select Next.
11. For IMAP accounts only, enter the names of the server mail folders. Select Next.
12. To download messages from this account, select Sync Now. To go to the Inbox without downloading messages, select Sync Later.

Getting email with Xpress Mail

1. Make sure your phone is turned on (see “Turning your smartphone on and off” on page 18).
2. Press Mail.

If an email has an attachment (such as a photo or a text file), the envelope icon shown with each email in the list will also show a paperclip.

**Sorting email in Xpress Mail**

1. From the Inbox (or any other folder) select Sort by.
2. Choose the way you want your email sorted. You can have emails listed:
   - Alphabetically by the sender's name
   - Alphabetically by subject
   - By date
   - By priority
   - By size of the message

To reverse the sorting order (for example, from oldest to newest, or by name from Z-A instead of A-Z), select the sorting method you want twice.
Reading email with Xpress Mail
1. From the Inbox (or any folder) select an email from the list. The screen displays the email you chose.

Viewing attachments in Xpress Mail
If a message has an attachment, the name of the attachment will be shown next to an icon of a paper clip.

1. From the Inbox (or any folder), select an email to read.
2. Select the paper clip icon to view it.
3. Select the attachment you want from the list of attachments for that email. Select Done.
If the entire attachment hasn’t been downloaded to your smartphone, select OK to download it.

4. To save a draft of your reply of forwarded message—for example, if you need to finish it later—select Cancel, and then select Save.

Repping to email with Xpress Mail

1. From the Inbox (or any folder), select an email to reply to.
2. Select Reply . If the original email was sent to other people besides yourself, and you want your reply to go to them as well as the person who sent it, select Reply All .
3. Enter your message.
4. To add an attachment, see “Adding attachments to email with Xpress Mail” on page 97.
5. Select Send Now to send the email right away; select Send to send it later. (Send is useful if you’re not currently connected to the Internet.)

Forwarding email with Xpress Mail

1. From the Inbox (or any folder), select an email to reply to.
2. Select Forward .
3. Enter the name of the email recipient.
4. Enter your message.
5. To add an attachment, see “Adding attachments to email with Xpress Mail” on page 97.
6. Select Send Now to send the email right away; select Send to send it later. (Send is useful if you’re not currently connected to the Internet.)

Creating and sending email with Xpress Mail

1. From the Inbox (or any folder), select New.
2. Enter the addressee’s email address, a subject, and your message. Separate recipients’ names with commas (for example: “janesmith4028@earthlinkn.com, joesmith9056@yahoo.com“)
3. To add an attachment, see “Adding attachments to email with Xpress Mail” on page 97.
4. Select Send Now to send the email right away; select Send to send it later. (Send is useful if you’re not currently connected to the Internet.)

Shortcuts for addressing email in Xpress Mail

You can have your smartphone enter addresses in new emails for you. There are three ways to automatically address new emails:

- By using an email link contained in an email you’ve received.
• By using the Search feature, which finds addresses for you.
• By using the autocompletion feature, which completes addresses for you.

To use an email address in an email you've received:
1. From an open email, select a blue email address contained in the body of the message.
2. Enter the subject and text for the email you're sending.
3. Select Send Now to send the email right away; select Send to send it later. (Send is useful if you're not currently connected to the Internet.)

To use the Search feature:
1. From the Inbox (or any folder), select New.
2. Tap the To: field.
3. If the recipient's name appears in the list of contacts, check the box next to it.
4. If the recipient's name doesn't appear in the list:
   • Type the first letters of the last name of the person you want.
   • Select the Search in pick list and choose a source for your contacts.
   • Select Go.
   • Check the box next to the name when it appears in the list below.
5. Select any additional recipient names.
6. Select Add.
7. Select Close.
To use the autocompletion feature:

1. From the Inbox (or any folder), select New.
2. In the To: field, begin entering the name or email address of the message recipient. A list of names and addresses from your Contacts list that matches the characters you’ve entered is displayed. Continue entering characters to narrow the list, and select the name or address you want when it appears.

Adding attachments to email with Xpress Mail

1. Start a new email, either by replying to or forwarding an existing email, or by creating a new email altogether.
2. Select the attachment icon \[\image\]. The Attachments screen comes up.
3. Select the documents you want to attach.
4. Select Attach. Your email now shows the attachment.
Deleting email messages with Xpress Mail

1. From the Inbox (or any folder), place a check mark in the box for the emails you want to delete.
2. Select Delete.

To retrieve deleted messages, see "Using different folders with Xpress Mail" on page 98.

Using different folders with Xpress Mail

Xpress Mail uses six preset folders:

- Email you receive goes into the Inbox folder (usually just called the Inbox).
- Email you compose goes into the Sent folder when you select Send Now.
- Email you compose goes into the Outbox folder when you select Send (because you want to send the message later—for example, if you are not currently able to connect to the Internet).
- Email you compose goes into the Drafts folder when you select Save (for example, if you want to finish composing the message later).
- Email you receive goes into the Saved folder if after reading the message you open the menus and select Save from the Message menu.
- Email you delete after you receive it goes into the Deleted folder.

You can restore a message from the Deleted folder if you decide you want to keep it. Go to the Deleted folder, highlight the message, and then select the Move to Inbox icon (leftmost icon) at the bottom of the screen.
When you are in one folder, you can easily switch to another folder:

1. From the Inbox (or any folder), select the menu at the top right of the screen. (It displays the folder you’re currently in.)
2. Select the folder you want to switch to.

**Switching Xpress Mail email accounts**

If you set up Xpress Mail to work with more than email account (see “Setting up Xpress Mail to work with other accounts” on page 89), it is easy to switch between accounts:

1. From the Inbox (or any folder) of an account, open the menus.
2. Select Accounts, and then select the name of another account. The Inbox of the new account is displayed.

**Attaching a signature to a message**

You can attach a personal signature, with info like your company’s address and fax and telephone numbers, to the bottom of all messages you send.

1. From the Inbox (or any folder), open the menus.
2. Select Settings, and then select Preferences.
3. Select the pick list in the upper-right corner of the screen, and then select Mail.
4. Select Signature.
5. Check the Append Signature box.
6. Enter your signature information, and then select OK.
Using filters
Filters provide a convenient way to receive messages the way you want.
1. From the Inbox (or any folder), open the menus.
2. Select Settings, and then select Preferences.
3. Select the pick list in the upper-right corner of the screen, and then select Mail.
4. Select Filters.
5. Select any one or more of the following options:
   - Check the box if you only want to receive messages that name you as a recipient in the To or cc field. Checking this box means that you will not receive any messages in which your name or address appears in the bcc field.
   - Select the Fetch pick list and select the maximum number of messages you want Xpress Mail to retrieve each time you get new messages.
   - Select the When retrieving messages pick list and select how much of each incoming message to retrieve, or whether to retrieve header information (sender, subject, and size) only.
6. Select OK.

Receiving alerts of incoming messages
You can choose to have your smartphone alert you with a sound or a vibration, or both when new email messages are downloaded to your Inbox.
1. From the Inbox (or any folder), open the menus.
2. Select Settings, and then select Preferences.
3. Select the pick list in the upper-right corner of the screen, and then select Mail.
4. Select Alerts.
5. Select either or both of the following options:
   - Check the Audible notification box to be notified of new messages by a sound, and then select the pick lists to select the sound volume and type.
   - Check the Vibrate box if you want your smartphone to vibrate to notify you of new messages.
6. Select OK.

**Scheduling automatic message retrieval**

Xpress Mail gives you options for automatically retrieving email messages from the server, as well as automatically uploading any new or changed messages to the server.

1. From the Inbox (or any folder), open the menus.
2. Select Settings, and then select Preferences.
3. Select the pick list in the upper-right corner of the screen, and then select Schedule.
4. Select either or both of the following options:
   - Check the first box to have the server periodically push new email messages to your Inbox. If you select this option, you do not need to do anything to retrieve new email.
   - Check the second box to set up a schedule for automatic sync between your smartphone and the server. Use the pick lists to select a time interval for weekdays and weekends: select never if you do not want scheduled sync to take place at either time. When scheduled sync occurs, any new or changed messages on your smartphone are uploaded to the server.
5. Select OK.
Receiving confirmation messages
Xpress Mail lets you choose whether to receive confirmation messages before completing common tasks.
1. From the Inbox (or any folder), open the menus .
2. Select Settings, and then select Preferences.
3. Select the pick list in the upper-right corner of the screen, and then select General.
4. Check any one of more of the boxes if you want to receive a message asking you to confirm that you want to delete messages, download files, or switch to a different account before you complete that task.
5. Select OK.

Setting time options
You can choose the time zone for an account and whether to observe daylight savings time.
1. From the Inbox (or any folder), open the menus .
2. Select Settings, and then select Preferences.
3. Select the pick list in the upper-right corner of the screen, and then select Time.
4. Select the Time Zone pick list, and then select your time zone.
5. Check the box if your location observes daylight savings time.
6. Select OK.
Updating Xpress Mail software

1. From the Inbox (or any folder), open the menus.
2. Select Settings.
3. Select Check for Updates.
Using GoodLink

You can install the optional GoodLink application for secure, real-time access to your Microsoft Outlook email, calendar, contacts, tasks, and notes. GoodLink offers real-time push synchronization of email and personal info; as messages are received on the server, they are automatically downloaded to your phone. The GoodLink application also offers attachment viewing through the Documents application on your phone and integration with your corporate Global Address List (GAL).

Your corporate email system must use GoodLink software with your Microsoft Exchange server in order for you to use the GoodLink email software on your smartphone. Contact your system administrator for information about setting up GoodLink and using it. For more information, visit www.good.com.

1. Go to Applications and select Get Good.
2. Follow the onscreen instructions to download and install the software.
using other wireless features
Messaging

You can exchange brief text and multimedia messages with other mobile phones that support these forms of messaging (also known as SMS and MMS) and with email addresses. Before you use your Treo™ 650 smartphone to send or receive messages, consult Cingular Wireless for pricing and availability of text and multimedia messaging services.

Creating and sending a text message

Each text (SMS) message can hold up to 160 characters. Messages with more than 160 characters are automatically split into several messages. (If you send a text message to an email address, the email address is deducted from the 160 character count.)

1. Make sure your phone is turned on (see “Turning your phone on and off” on page 18)
2. Press Messaging.

To address a message to multiple recipients, separate the addresses with a space or a comma. If you address a single message to three people, you will be billed for three messages.

When entering a message, you can insert emoticons by pressing Center.

To add a new QuickText phrase, select Edit QuickText from the list.
4. Select the To pick list to address the message:
   • If the recipient's name appears in the To pick list, select it from the list.
   • If the recipient is in your Contacts list, select Lookup in Contacts, and then enter
     the first few letters of the recipient's first or last name. Highlight the recipient's
     phone number or email address, and then select Add.
   • If the recipient's name is not in the pick list or your Contacts list, enter the full
     phone number or email address.
5. Enter your message, or select QuickText to insert predefined phrases.
6. (Optional) Open the menus, and then select a priority setting on the
   Compose menu.
7. Select Send.

Creating and sending a multimedia message
Multimedia (MMS) messages consist of photos, videos, text, and sounds presented as
one or more pages. You can include any of the following items:
   • Ringtones
     • MIDI
     • iMelody
   • Sound clips
     • AMR
   • Photos
     • JPEG
     • GIF
     • BMP
     • TIFF (including LZW compressed files)
   • Videos
     • MPEG4
     • H.263
     • 3GP
1. Make sure your phone is turned on (see “Turning your phone on and off” on page 18).
2. Press Messaging 📩.
4. Select Add.
5. Select the To pick list to address the message:
   - If the recipient’s name appears in the To pick list, select it from the list.
   - If the recipient is in your Contacts list, select Lookup in Contacts, and then start entering the first few letters of the recipient’s first or last name. Highlight the recipient’s phone number or email address, and then select Add.
   - If the recipient’s name is not in the pick list or your Contacts list, enter the full phone number or email address.
6. Select Add.
7. Select one or more of the following:
   - **Add Photo**: Lets you insert one or more photos. You can take the photos with the built-in camera or insert an existing photo.
   - **Record Sound**: Lets you record a message, such as a voice caption for a photo, or insert an existing sound, such as a ringtone. You can add only one sound per page. If you capture a photo with the built-in camera and save it with a voice caption, the voice caption does not count as a sound file.

A multimedia message can contain multiple pages. To navigate between pages or to add a new one, select the Pg pick list at the bottom of the screen.

To delete an item from a message you’re creating, highlight it and then press Backspace.

If you are out of a coverage area or if your phone is off, outgoing messages go into the Outbox. When you return to a coverage area, your pending messages are sent automatically and transferred to the Sent folder.
• **Add Movie**: Lets you insert one or more movies. You can capture a movie with the built-in camera or insert an existing video clip. If you insert a movie, you cannot add photos or sounds to the same page.

8. Enter a subject and a text message or caption.
9. (Optional) Select Preview to view the message as the recipient will see it.
10. Select Send.

**Receiving messages**

When your phone is on and in an area of wireless coverage, you will automatically receive new text messages. For multimedia messages, you can configure your smartphone to automatically download new messages or to notify you that a message is ready to download. You can also configure your smartphone to notify you when a new text or multimedia message arrives, using a ringtone and vibration or an onscreen alert.

The new message alert may include any of the following buttons:

- **OK**: Dismisses the alert and places the message in your Inbox.
- **Reply**: Opens the Chat View so you can respond to the message.
- **Call Back**: Dials the sender’s phone number.
- **Go To Mag**: Opens the message so you can view its full contents.

If you have multiple alerts, the Alert screen displays all your pending alerts. Select an alert description to jump to the item, or check the box to clear that alert. To view all your pending alerts from any screen on your smartphone, press and hold Center on the 5-way.

You can send and receive text messages even while you are on a phone call. This is easiest when using a hands-free headset or the speakerphone.
Using links in messages

When you receive a text message that contains a telephone number, email address, or URL, you can dial the number, send an email message, or go to the web page immediately. Your smartphone automatically opens the appropriate application from the link.

1. Select a message from the list.
2. Select the phone number, email address, or URL (appears as underlined blue text).

Viewing/playing a multimedia message

1. From the Inbox, select the message you want to view.
2. If there are sounds or multiple pages, playback begins immediately.
3. Do any of the following:
   - Use the onscreen controls to scroll to other pages and messages.
   - To play or save a sound, select the Sound icon . You can access saved sounds later by going to Applications and selecting Sounds.
   - To save a photo, tap it with your stylus or finger. You can access saved photos later by going to Applications and selecting Media.
   - To select the text, position the cursor in the text area, and then press Center.
   - To stop playback of a message, select Play/Stop.
4. Select OK.

Select the header icons at the top of the screen (to the left of the signal strength icon) to view brief or complete message header information.
Managing your messages

The status icons that appear next to each message in the Inbox and Outbox folders indicate the following:

- 📬 A text message. Urgent messages appear with a red exclamation point (!).
- 🔄 A chat session.
- 📞 A voicemail or numeric page.
- 📸 An incoming message with photos or videos.
- 🎨 An incoming message with sound.

In Messaging lists, you can rearrange the messages in any folder using the Sort command.
1. From list view, open the menus ☰.
2. Select View, and then select Sort by Name or Sort by Date.

In Messaging lists, you can delete several messages at once from any folder using the Purge command.
1. From a Messaging list, open the menus ☰.
2. Select Purge on the Message menu.
3. Select the Purge pick list and select an option.
4. Select OK.

Chatting with Messaging

When you exchange more than one message with a single contact, your messages are grouped into a chat session. The upper part of the Chat View displays all messages you’ve exchanged with this contact, and the lower part provides a text entry area. You can carry on multiple chats at the same time and easily switch between them, using the pick list at the top of the screen.

1. Press Messaging.
2. Do one of the following:
   • Start a new chat: Select a message and reply to it.
   • Continue an existing chat: Select a message with the chat icon.  
3. Enter your message.
4. Select Send.
Customizing your Messaging settings

1. Press Messaging.
2. From the Inbox, open the menus.
3. Select Options, and then select Preferences.
4. Select the Messages tab and select any of the following preferences:
   - Create new messages as: Indicate whether you want to default to text or multimedia messages when you create a new message.
   - Always request delivery receipts: Indicate if you want to receive a confirmation when an outgoing MMS message is received.
   - Always request read receipts: Indicate if you want to receive a confirmation when a message is read.
   - Confirm message deletions: Indicate if you want deletion confirmation messages to appear.
   - Privacy Mode (hide text): Indicate if you want the body text to appear in the alert when you receive a new message.
   - Message validity period: Set how long you want Cingular Wireless to attempt to deliver your outgoing messages. If a message can't be delivered within the specified period of time, the message is discarded. This setting doesn't affect your incoming messages.

5. Select the Chat tab and select any of the following preferences for chat sessions.
   - Thread messages from one person: Indicate when you want to group messages from the same person.
   - Show timestamps in chats: Indicate if you want to see the local date and time the message was sent next to each message.
6. Select the Connection tap and select your preferences for network connections.
   - Automatically collect MMS messages: Indicate if you want to automatically receive multimedia messages.
   - Even when roaming: Indicate if you want to automatically receive multimedia messages while roaming.

7. Select OK.
Selecting alert tones

1. Press Messaging.
2. Open the menus.
3. Select Options, and then select Alerts.
4. Select the Alert Volume pick list and select a volume level.
5. Select the first Vibrate pick list and indicate if you want your phone to vibrate during an incoming alert, when the Ringer switch is set to Sound On.
6. Select the second Vibrate pick list and indicate if you want your phone to vibrate during an incoming alert, when the Ringer switch is set to Sound Off.
7. Select the Tones box.
8. Select the Message Tone pick list and select an alert tone for incoming messages.
9. Check any of the following boxes if they appear on your screen:
   - Show Message Alerts: Indicate if you want to receive onscreen alerts when a new message arrives.
   - Show Receipts Alerts: Indicate if you want to receive onscreen alerts when a receipt arrives.
10. Select Done.
Browsing the web

The Web browser on your Treo smartphone provides quick and easy access to web pages. You can view most sites you use on your computer, including those with security and advanced features, such as JavaScript and frames. To browse the web, you must activate data services from Cingular Wireless.

Viewing a web page

The Blazer® Web browser uses patent-pending technology to optimize web pages for your phone. By default, the browser reformats web pages into a single column and resizes images on your screen. This way, you can see most content without scrolling left or right.

1. Make sure your phone is turned on (see "Turning your phone on and off" on page 18).
2. Press and hold the Side button to open the Web browser.
3. Navigate to the web page you want:
   - To view mobile content designed specifically for your Treo smartphone, select .
   - To adjust the font size, open the Options menu and select Font. To fit more text on the screen, select Small. To make the text easier to read, select Large.
To go to any web page on the Internet, enter the address in the Address Bar, or select .

If you browse to a secure web page, a Lock appears in the Address bar.

To view the previous or next page, select or .

To view a page in a wide layout format (as on your computer), select and then select Wide Page Mode.

To refresh the page with the latest content from the Internet, select .

To scroll through the page in Optimized View, press Up or Down . In Wide Page View, press Up, Down, Left, or Right to scroll in all directions.

To follow a link to another web page in Optimized View, press Left or Right to highlight the link, and then press Center to go to the selected page. You can also tap the link on the screen with your stylus.

Creating a bookmark

Bookmarks let you instantly access a web page without needing to enter the address every time. The Web browser can store up to 100 bookmarks or saved pages, allowing you to open your favorite web pages quickly. Remember, a bookmark is different from a favorite (see “Defining favorite buttons” on page 56).

1. Go to the page you want to bookmark.
2. Open the menus .
3. Select Add Bookmark on the Page menu.
4. If desired, change the Name and Description.
5. Select OK, and then select OK again.

Want to get to the icons faster? Press Space to jump to the icons, or open the menus to access the same commands through the menus.

You can also open the Web browser from the Applications View. Go to Applications and select Web.

Always using bookmarks? Make Bookmark View the default view when you open the browser. Open the Options menu and select Preferences. Select the Start With pick list and select Bookmarks.
Saving a page
The Web browser lets you save a page for offline viewing, so you don't need an Internet connection to view it later.
1. Go to the page you want to save.
2. Open the menus.
3. Select Save Page from the Page menu.
4. Select OK, and then select OK again.

Viewing bookmarks or saved pages
Bookmarks and saved pages both appear in Bookmarks View. Saved pages are indicated by a small triangle in the upper-right corner of the bookmark.
1. Select the Bookmarks View icon.
2. Select the bookmark or saved page you want to view.

Editing or deleting a bookmark or saved page
1. From the Bookmarks View, open the menus.
2. Select Edit Bookmarks on the Bookmarks menu.
3. Select the bookmark you want to edit or delete.
4. Enter the desired changes.
5. Select OK.

Arranging bookmarks and saved pages
The Bookmarks View includes ten pages of bookmarks so that you can arrange bookmarks and saved pages in a logical fashion. For example, you can store travel links on one bookmark page, stock links on another, and business links on a third page.
1. From the Bookmarks View, open the menus.
2. Select Edit Bookmarks on the Bookmarks menu.
3. Enter a new title for this page.
4. Use the stylus to drag and drop bookmarks into different slots on the current page. To move a bookmark to a different page, drag and drop it on the Page icon.
5. Select OK.

**Downloading files from a web page**

The Web browser lets you download files of up to 2MB that are usable on your smartphone, such as new applications, MIDI ringtones, or pictures that are specifically tagged for download. When you download a file, it is automatically sent to the application that can use the file. For example, if you download an MP3 file, you can store it on an expansion card and play it on your smartphone later in the RealPlayer® application. You can also download files to an expansion card, even if the files are not usable on your smartphone.

1. Go to the page that contains the link to the file you want to download.
2. Press Left or Right to highlight the link to the file, and then press Center to initiate the download process.
Copying text from a web page
You can copy text from a web page and paste it in other applications.
1. Use the stylus to highlight the text you want to copy.
2. Open the menus.
3. Select Edit, and then select Copy.
4. Go to the application in which you want to paste, and then position the cursor where you want to paste the text.
5. Open the menus.
6. Select Edit, and then select Paste.

Using the History list
The History list stores the addresses of the last 100 pages you visited. Items in the History list are sorted chronologically.
1. Press and hold the Side button to open the Web browser.
2. If the browser opens to Bookmarks View, select Page View.
3. Open the menus.
4. Select History on the Page menu.
5. Press Down to navigate through the list.
6. Select the web page you want to load.

Finding text on a web page
1. Press and hold the Side button to open the Web browser.
2. If the browser opens to Bookmarks View, select Page View.
3. Open the menus.
4. Select Find Text on Page on the Page menu.
5. Enter the text you want to find.
6. Check or uncheck the Wrap Search box to indicate if you want the search to wrap from the end of the page to the beginning when the end is reached.
7. Select Find to start the search.
Customizing your Web browser settings

1. Open the menus.
2. Select Options, and then select Preferences.
3. Select Page and set any of the following preferences:
   - **Start With**: Determines which view displays every time you open the Web browser.
   - **Home Page**: Sets the page that appears when you select.
   - **Restore Default**: Selects the original home page, if you changed it.
   - **Show Address Bar**: Sets whether the web address appears in Page View. When it is visible, you can select the address bar pick list to go to a previously viewed page or enter a URL directly from Page View.
4. Select General and set any of the following preferences:
   - **Disable Auto Complete**: Determines whether the Web browser suggests text, based on your previous entries, when you begin entering info.
   - **Disable Images (faster)**: Determines whether images appear when you load a web page. If you don't view images, web pages will load faster. If you disable images, web pages will load faster and you can still see any image by selecting the placeholder box on the web page.
   - **Disable JavaScript**: Bypasses JavaScript elements on the web pages you view.
   - **Disable Cookies**: Determines if some web sites can store personalized info on your smartphone. Some sites do not work properly if you select this option.
   - **Tap and Drag**: Determines whether dragging the stylus selects text or scrolls through the content of the page.

Visit secure websites. The security certificates and 128-bit SSL, strong encryption let you browse secure sites, such as online shopping, banking, and email. Remember: Some secure sites also require specific browsers, and may not work with the Web browser.

The Web browser supports JavaScript, Secure Socket Layer (SSL), and cookies, but does not support plug-ins (Flash, Shockwave, etc.) or Java applets.
5. Select Advanced and set any of the following preferences:
   - **Set memory limit for storing pages**: Sets the amount of memory used for your cache. Pages are cached so they load faster the next time you view them.
   - **Cookies**: Indicates how much memory is being used by cookies. To free up this memory, select Clear Cookies.
   - **Cache**: Indicates how much memory is being used by your cache to store recent pages and history. To free up this memory, select Clear Cache.
   - **Clear cache on exit**: Determines if the cache clears each time you exit the Web browser.
   - **Set Proxy**: Sets up a proxy server to access the Internet. If your connection requires a proxy server, please contact your Internet service provider or IT administrator for this information.

6. Select OK.
Dial-up networking

If your Windows computer is enabled with Bluetooth wireless technology, you can use your smartphone as a wireless modem to access the Internet from your computer. Dial-up networking (DUN) is the feature that converts your smartphone into a wireless modem. To configure DUN, complete the following procedures:

• “Creating a trusted pair between your smartphone and your computer” on page 123
• “Setting up your Windows computer for a DUN connection” on page 124
• “Enabling DUN on your smartphone” on page 126
• “Accessing the Internet from your computer” on page 126

Creating a trusted pair between your smartphone and your computer

After creating the trusted pair, you can use your smartphone as a modem any time it is within range of your computer, bypassing the discovery and authentication process. You need to do this only once.

1. Make sure that your computer’s Bluetooth setting is on and that your computer is discoverable. Check the documentation that came with your computer to find and change these settings.

2. On your smartphone, go to Applications and select Bluetooth.

3. Select On if it is not selected, and then select Setup Devices.
4. Select Trusted Devices.

5. Select Add Device. The discovery icon appears, indicating that the discovery process is active.
6. Select your computer from the Trusted Devices list, and then select OK.
7. Enter a passkey on the Bluetooth Security screen, and then select OK. The passkey can be any number you choose. We recommend that you use at least four digits in your passkey.
8. Enter the same passkey number on your computer when prompted.
9. Select Done, and then select Done again to return to the Bluetooth screen.

Setting up your Windows computer for a DUN connection

To set up your computer, you need your data services username, password, and APN information. Check with Cingular Wireless Customer Care or consult the documentation that came with your service plan for these settings.

1. On your computer, open the Start menu, and then select Control Panel.
2. Select Phone and Modem Options. You may be asked to enter a location for your modem. If so, enter the area code for your wireless phone number.
3. Click the Modems tab, and then select the Bluetooth modem.
4. Click Properties, and then click the Advanced tab.

5. Enter the following in the Extra initialization commands field:
   
   AT+CGDCONT=1, "ip", "XXX"
   
   where XXX is the APN information for your Cingular Wireless data plan. This information is different for all providers. Be sure to enter the text exactly as it appears, including commas and quotation marks.

6. Click OK on each screen until you have exited Phone and Modem Options.

7. Close Control Panel.
Enabling DUN on your smartphone

You must enable DUN on your smartphone each time you wish to use your phone as a wireless modem.

1. Go to Applications and select Bluetooth.
2. Select the Dial-up Networking pick list, and then select On. When DUN is successfully enabled, the DUN icon appears.
3. Select OK on the warning screen that appears. This screen reminds you to disable DUN when you want to stop the Internet session on your computer.

Accessing the Internet from your computer

The steps for accessing the Internet on your computer may vary depending on your operating system and how Bluetooth wireless technology is set up on your computer—for example, if it is built in versus if you are using a wireless Bluetooth adapter. If the following procedure does not work with your computer, check your computer's documentation for how to set up Bluetooth technology to access the Internet using a DUN connection.

Before you begin, verify that DUN is enabled on both your computer and your smartphone.

1. Open the Bluetooth panel on your computer and look for the option for paired devices. Check your computer's documentation for how to bring up this screen and the name of the paired devices option.
2. Double-click the icon or option representing your smartphone. Your computer connects to your smartphone and shows that DUN services are available.
3. Double-click the DUN icon.
4. Enter the username and password information required to access the Cingular Wireless data network.

5. Enter the following in the Dial field:
   
   *99***1#

6. Click Dial. Once the connection is successfully established, you can browse the Internet on your computer or download your email.

To verify that you are connected, look for a network connection icon in the task bar at the bottom of your computer screen. To check the status of the connection, right-click the Bluetooth network icon.

**Terminating an Internet session**

To terminate an Internet session, first disconnect from DUN on your computer, and then turn DUN off on your smartphone.

1. On your computer, right-click the icon or option representing your smartphone, and then click Disconnect.

2. On your smartphone, go to Applications (<⊐) and select Bluetooth (<⊐).

3. Select the Dial-up Networking pick list, and then select Off. When the Bluetooth status icon (<⊐) reappears at the top of the screen, you have successfully switched off DUN.

If you are asked, we recommend that you choose to remember the dial text to avoid errors and the inconvenience of entering it for every session.

You may need to use a virtual private network (VPN) to access corporate email. Check with your system administrator for more information.
Connections with Bluetooth devices

After you set up a connection with your computer or other accessory devices with Bluetooth wireless technology, you may want to set up other trusted devices, such as a friend’s handheld. When your smartphone recognizes a trusted device, it automatically accepts communication, bypassing the discovery and authentication process.

Once you set up a connection with a device with Bluetooth wireless technology, you can communicate with that device whenever it is within range (about 30 feet).

Requesting a connection with another Bluetooth device

1. Go to Applications and select Bluetooth.
2. Select On.
3. If you haven’t already done so, enter a device name for your phone. This is the name that appears on the other Bluetooth device’s see when it connects to your phone.
4. Select Setup Devices, and then select Trusted Devices.
5. Select Add Device. The Discovery icon appears to indicate that the discovery process is active.
6. Select the device you want to add as a trusted device. If the device you want to add does not appear on the discovery results list, select Find More to search again.
7. Enter the same passkey on your smartphone and the other device and select OK.
   **IMPORTANT:** Some devices with Bluetooth wireless technology have a built-in passkey; others let you choose the passkey. In either case, you must use the same passkey on both the other device and your phone. We recommend that you use a passkey of 16 digits, where possible, to improve the security of your smartphone. The longer the passkey, the more difficult it is for the passkey to be deciphered. If the Bluetooth device has a built-in passkey, see the device's documentation for the passkey.
8. Select Done.

**Accepting a connection from another Bluetooth device**

1. Go to Applications and select Bluetooth.
2. Select On.
3. If you haven’t already done so, enter a device name for your phone. This is the name that appears on the other Bluetooth device's see when it connects to your phone.
4. Select the Discoverable pick list and select Yes.
5. Enter the same passkey on your smartphone and the other device and select OK.
   **IMPORTANT:** Some devices with Bluetooth wireless technology have a built-in passkey; others let you choose the passkey. In either case, you must use the same passkey on both the other device and your phone. We recommend that you use a passkey of 16 digits, where possible, to improve the security of your smartphone. The longer the passkey, the more difficult it is for the passkey to be deciphered. If the Bluetooth device has a built-in passkey, see the device's documentation for the passkey.
6. (Optional) Check the Add to trusted device list box if you want to form a partnership with the requesting device.
7. Select Done.

media files
Taking photos and videos

Your phone comes with an easy-to-use built-in camera that allows you to instantly take and view pictures and videos and send them to your friends and family. To add a personal touch to your smartphone, use your pictures as wallpaper on the Main View of the Phone application and as caller ID images.

Taking a photo

You can store photos on your smartphone or on an expansion card.

1. Go to Applications <Applications> and select Camera <Camera>.
2. Select the Album pick list and select the album where you want to save the photo.
3. (Optional) Adjust the zoom and resolution settings.
4. Point the lens on the back of your smartphone at the subject you want to photograph.
5. Press Center <Center> to capture the photo.
6. (Optional) Select Audio <Audio> to add a voice caption.
7. Select Save <Save> to keep the photo, select Delete <Delete> to discard it, or select Send <Send> to send the photo.
Recording a video
You can store videos on your smartphone or on an expansion card.

1. Go to Applications 📱, and select Camera 📹.
2. Select Video 🎥.
3. Select the Album pick list and select the album where you want to save the video.
   To create a new album or change where the video is stored, select Manage Albums from the list.
4. (Optional) Adjust the resolution settings.
5. Point the lens on the back of your smartphone at the subject you want to record.
6. Press Center 🎥 to start recording.
7. When you’re done recording, press Center 🎥 again to stop.
8. Select Play 🎥 to review the video.
9. Select Save 🎥 to keep the video, select Delete 🎥 to discard it, or select Send 🎥 to send the video.
Viewing a photo
1. Go to Applications and select Media.
2. Select the photo you want to view.
3. Press Up and Down to zoom in and out.
4. If the photo has a voice caption, select Audio to hear it.
5. Select Done.

Viewing a video
1. Go to Applications and select Media.
2. Select the video you want to view.
3. Press Up and Down to adjust the volume.
4. Select Done.

Viewing a slide show
1. Go to Applications and select Media.
2. Select Slide show.
3. Tap the screen to return to the Gallery.
Sending a photo or video
You can send a photo or video to other photo-enabled mobile phones or to an email address.

1. Go to Applications and select Media.
2. Select the photo or video you want to send.
3. When the Messaging application opens, address and send the message.
   (See "Creating and sending a multimedia message" on page 107 for details.)

Copying photos and videos
You can copy photos or videos from your phone to an expansion card, and vice versa.

1. Go to Applications and select Media.
2. Select the photo(s) or video(s) you want to copy.
3. Open the menus.
4. Select Copy to Card (for items on your phone) or Copy to Device (for items on an expansion card) from the Media menu.

You cannot send copyrighted photos or videos that appear with a Lock icon in the Gallery View.

You can also send photos and videos as email attachments. See "Attaching photos and videos" on page 76 for details.

To copy an entire album, open the Media menu and select Copy Album to Card or Copy Album to Device. Select the album you want, and then select Copy.
Organizing photos and videos
1. Go to Applications and select Media 📷.
2. Select the pick list at the top of the screen, and select the album you want to organize.
3. Select Organize 📷.
4. Select a photo or video to add it to or to remove it from the album.
5. Select Done.

Saving a photo as wallpaper
1. Go to Applications and select Media 📷.
2. Select the photo you want to use as wallpaper.
3. Open the menus 📷.
4. Select Save as Wallpaper on the Media menu.
5. When the confirmation message appears, confirm by selecting Yes, or decline by selecting No.
Deleting a photo or video
1. Go to Applications and select Media 📷.
2. Select the photo or video you want to delete.
3. Open the menus 📷.
4. Select Delete from the Media menu.
5. Select Delete to confirm deletion.

Customizing your Camera settings
1. From any Camera view, open the menus 📷.
2. Select Options, and then select Preferences.
3. Set any of the following preferences:
   - Effects: Sets the color palette for the current photo or video. You cannot change an item's palette after you take the photo or video.
   - Prompt sounds: (photos only) Sets the sound that plays before you take the photo.
   - Shutter sounds: Determines if a sound plays when you take a photo.
   - Microphone: (videos only) Turns the microphone on and off so that you can record videos with or without sound.
   - Resolution: Sets the default size for newly captured photos or videos.
   - Date stamp: (photos only) Determines if the date the photo is taken appears on your photos.
   - Review photos/videos: Determines if you can review photos or videos before saving them and how quickly they are automatically saved.
   - Auto naming: Assigns a name to a series of photos to be captured, such as Seattle001, Seattle002, and so on.
Viewing photos and videos on your computer

When you synchronize, your photos and videos are copied to your desktop computer. You can view photos in JPEG format and videos in .3GP format, and you can email them to friends using your desktop email application.

- **Windows:** Refer to the Palm® Desktop software Online Help for information about using the palmOne™ Media desktop application.
  - To find all synchronized images, look in  
    \C:\Program Files\palmOne\<User folder>\Photos\offline copy location
  - To find your captured pictures, look in \C:\Documents and Settings\<User name>\My Documents\My Pictures\palmOne Photos\<User Folder>
  - To find your captured videos, look in \C:\Documents and Settings\<User name>\My Documents\My Videos\palmOne Videos\<User Folder>
  - Use QuickTime 6.5 for Windows to play videos on your computer.
- **Mac:** There is no palmOne Media desktop application for Mac computers.
  - To find your photos, open Home/Pictures/palmOne Photos/<palmOne User Name>, and then double-click the photo you want view.
  - To find your videos, open Home/Movies/palmOne Videos/<palmOne User Name>. Use an application that supports 3GP files, such as QuickTime, to play your videos.
Listening to music

You can listen to music through the speaker on the back of your smartphone or through a stereo headphone (stereo headphone adapter or 2.5mm stereo headphone required, sold separately).

Transferring MP3 files from your computer

The RealOne® software that comes with your phone is compatible with the popular MP3 audio file format as well as the RealAudio® RA, RM, and RMJ file formats. If your songs are already on your computer's hard drive in one of these formats, you can use palmOne® Quick Install software to transfer your songs to an expansion card (sold separately) so that you can listen to them on your phone.

If your songs are on a CD, you can use the RealPlayer® desktop software on your Windows computer to convert the files and transfer them to an expansion card. See the RealPlayer desktop online Help for details. You can install the RealPlayer desktop software from the Software Essentials section on the Software Installation CD that came with your Treo™ 650 smartphone.

If you want to download songs from the Real® Music Store (additional fees may apply), you need to download and install a special version of RealPlayer for palmOne that is compatible with Real Music Store files. To download this special version, visit www.real.com.

You must use an expansion card to listen to music on your phone. You cannot store music in your phone's internal memory.

You can also use a card reader accessory (sold separately) to transfer MP3 files from your computer to your expansion card. Create an SD_Audio folder in the root directory of the card, and store your MP3 files in this folder.
1. Connect your smartphone to your computer with the USB sync cable.
2. Insert an expansion card into your smartphone.
3. Do one of the following:
   - **Windows**: Drag and drop the file(s) or folder onto the palmOne Quick Install icon on the Windows desktop.
   - **Mac**: Drag and drop the MP3 files onto the Send To Device droplet in the Palm folder.
4. Select your Username, the File name, and the Destination (card).
5. Click OK.
6. Synchronize your smartphone with your computer. Be patient; transferring music to an expansion card can take several minutes.

**Transferring music from a CD to your smartphone**

To transfer music from a CD to your smartphone, you must first install the RealPlayer desktop application onto your Windows computer. You must install this software from the Software Installation CD even if you already have a version of RealPlayer on your computer. After you install the software, follow these steps to transfer music to your phone.

1. Double-click the RealPlayer icon on your computer desktop.
2. Insert the CD into your computer's CD drive. If the track list doesn't appear, click Music & My Library, and then click CD/DVD in the View menu.
3. Click Save Tracks, and follow the onscreen instructions to select and copy tracks.

4. Go to Applications and select Music.

5. Connect your phone and your computer to the USB sync cable.

6. In RealPlayer on your computer, click Burn/Transfer. If necessary, select palmOne Handheld from the Current Burn/Transfer Device drop-down list.

Do not press the Sync button on your cable. RealPlayer transfers the files, so there’s no need to do anything.
7. Drag the song files you want from the My Library window on the left into the palmOne device window on the right.

8. Be sure your smartphone is on and that RealPlayer is open. If it is, a green Connected light appears in the lower-left corner of RealPlayer on your computer.

9. Click Start Transfer. When the transfer is complete, the tracks you selected should say "On Device."

Listening to music on your smartphone

1. Go to Applications and select RealPlayer.

2. Do any of the following:
   - To play (or pause) the current song, press Center or the Side button.
   - To play the next song, press Right.
   - To play the previous song, press Left.
   - To play a different song, use the stylus to select Songs and select a song from the list.
   - To select random or continuous playback, use the stylus to select the onscreen controls.
   - To adjust the volume during playback, press the Volume button.

You can customize your Treo smartphone so that pressing and holding the Side button on the side of your smartphone opens RealPlayer. See "Reassigning buttons" on page 190 for details.

To view details for the song that is currently playing, open the Music menu and select Song Details.
RealPlayer continues playing until it reaches the end of your list or until you select Stop. Music continues to play even if you switch to another application or turn off your screen. If you want to stop playing music when you exit RealPlayer, open the Options menu and select Preferences. Uncheck the Enable Background Playback box, and then select OK.

Creating a playlist
1. Go to Applications and select RealPlayer.
2. Select Playlists.
4. Enter a Name for the playlist.
5. Select Add.
6. Check the box next to the songs you want to include on the playlist.
7. Select Done, and then select Done again.
Listening to music

144

Editing a playlist

1. Go to Applications and select RealPlayer.
2. Select Playlists.
3. Select the playlist you want to edit.
4. Select Edit.
5. Do any of the following:
   • To delete a song from the playlist, select the song, and then select Remove.
   • To add a song, select Add, check a song's box, and then select Done.
   • To move a song up or down one slot, select a song, and then select the up
     or down arrow.
6. Select Done, and then select Done two more times.
using organizer features
Contacts

Contacts is where you enter information about people you know. You can access this info from the Phone application to dial phone numbers and create favorites, and from the Messaging and email applications to send messages. When you create a contact, you can also assign a photo and ringtone ID to that contact, so you know when they call you.

Adding a contact
1. Press Phone/Send.
2. Select the Contacts favorite button.
3. Select New Contact.
4. Use the 5-way navigator to move between fields as you enter information.
5. To add a caller ID photo that displays when that person calls, select the Picture box. Select Camera to take a photo and add it to this contact entry when you save the photo, or select Photos to add an existing photo to this contact entry.
6. To place the entry in a category or mark it private, select Details.
7. To add a note to an entry, select Note.
8. To display additional fields for this contact, select Plus.
9. After you enter all the information, select Done.

Viewing or changing contact information
1. In the Contacts list, begin entering one of the following for the contact you want to view or edit:
   - First initial and last name
   - First name
   - Last name
2. Select the name of the entry you want to open.
3. Select Edit.
4. Make changes to the entry as necessary.
5. Select Done.

Deleting a contact
1. Open the contact you want to delete.
2. Open the menus.
3. Select Delete Contact on the Record menu.
4. Select OK.

Defining your business card
1. Create a new contact and enter your own business card information.
2. While still in Contact Edit View, open the menus.
3. Select Business Card on the Record menu.
4. Now you can beam your business card to other Palm Powered devices. In any Phone view, open the menus.
   Select Beam Business Card on the Record menu.
Viewing your SIM Phonebook

By default, you can view your SIM Phonebook right in the Contacts application.

1. In the Contacts list, open the menus.
2. Select Options, and then select Preferences.
3. Make sure the Show SIM Phonebook Category box is checked.
4. Select OK.
5. In the Contacts list, select the category pick list at the top of the screen and select SIM Phonebook.

When the Show SIM Phonebook Category box is checked, your SIM Phonebook entries also appear when you select the All category in the Contacts list or search for a contact.

If you exported contacts from your SIM to Contacts, you may want to uncheck the Show SIM Phonebook Category box to avoid seeing duplicate entries.

Need to copy a contact to your SIM Phonebook?
In Contacts, select the contact you want to copy, open the Record menu, and then select Export to SIM.
Calendar

Displaying your calendar

- Press Calendar repeatedly to cycle through the various views:
  - Agenda View: Shows your daily schedule and any items on your Tasks list that are overdue or due today. If there’s room, Agenda View also shows your schedule for the next dates that have events scheduled.
  - Day View: Shows your daily schedule one day at a time.
  - Week View: Shows your schedule for an entire week. The timeframes are based on the Start Time and End Time settings in Calendar Preferences.
  - Month View: Shows your schedule for a whole month.

- From any Calendar view, open the Options menu and select Year View to view a calendar for an entire year.
- From Day View, Week View, Month View, or Year View, use the 5-way to move to another day, week, month, or year (based on the current view).
- From Day View, Week View, Month View, or Year View, select Go To, and then select a date from the calendar.

Creating an event

1. Press Calendar until you are in Day View.
2. Press Left and Right to select the desired day.
3. Using the keyboard, enter a starting hour for the event. For example, enter 5 for 5:00 (remember to press Option before entering numbers).
4. Select the starting minute for the event.
5. Select the End Time box and select the ending hour and minute for the event.
6. (Optional) Select the Time Zone pick list and select a time zone.
7. Select OK.
8. Enter a description for the event.

IMPORTANT: If you use Palm Desktop software, do not add time zones to your events. Palm Desktop does not support time zones. If you use Microsoft Outlook, you can use the time zone feature, but you must install the conduit that came with your Treo™ 650 smartphone (or a subsequent update) on all the computers you sync your smartphone with. Chapura PocketMirror and other earlier Microsoft Outlook conduits do not support time zones.

To automatically assign a time zone to your events, open the Options menu, select Preferences, and check the New events use time zones box. All your new events will be assigned to your local time zone, and you can change this setting for individual events. If you sync with Outlook and you select the time zone option on the Contacts conduit sync screen, then time zones will sync for any new events you create in Outlook. Time zone settings are not added to any events that you created before you set these time zone settings.

Adding an alarm reminder to an event
1. In Calendar, select the event.
2. Select Details.
3. Check the Alarm box and select the number of minutes, hours, or days before the event you would like to receive the alarm.
4. Select OK.

Creating an untimed event

An untimed event, such as a birthday or anniversary, does not occur at a particular time.

1. Press Calendar until you are in Day View.
2. Press Left and Right to go to the date of the event.
3. Make sure nothing is highlighted.
4. Enter a description for the event. A diamond appears next to the description of an untimed event.

Color-coding your schedule

Use color-coding to quickly spot different types of events. For example, make your appointments with family green, work blue, and friends yellow.

1. From Day View, select an event description or select an empty timeslot.
2. Select Details.
3. Select the Category pick list and select Edit Categories.
4. Do one of the following:
   • To create a new category, select New and then enter a category name.
   • To add a color to an existing category, select a category and select Edit.

The silent alarm for untimed events is defined by minutes, days, or hours before midnight of the date of the event.

When an alert occurs, the Alert screen displays all your pending alerts. Select an alert’s description to jump to the item, or check the box to clear that alert.
5. Select the color you want to give this category, and then select OK.
6. (Optional) Repeat steps 4 and 5 to add or edit more categories.
7. Select OK two more times.

Now that the category is set up, you can assign a specific event to this category. See the next section for details.

Editing or deleting an event
1. Select the event you want to change.
2. Select Details.
3. In addition to the settings covered earlier in this chapter, you can also change any of the following settings:
   - **Date and Time**: When the event takes place. Change these settings to reschedule the event.
   - **Location**: A description of where the event takes place.
   - **Category**: The color-coded category for this event.
   - **Note**: Space for you to enter additional text.
   - **Delete**: The event is erased from your calendar.
4. Select OK.

Scheduling a repeating event
1. Create an event, and then select it.
2. Select Details.
3. Select the Repeat pick list, and then select a repeat interval.
4. For weekly events, select the day(s) the event repeats; for monthly events, select Day or Date to indicate the repeating method.
5. If the event has an ending date, select the End on pick list, select Select Date, and then select the ending date.
Customizing display options for your calendar

1. From any Calendar view, open the menus .
2. Select Options, and then select Display Options.
3. Select the Default View pick list and select the view you want to see when you open Calendar.
4. Select the Agenda box and set any of the following options:
   - **Show Due Tasks**: The tasks that are due today and the tasks that are overdue display in Agenda View.
   - **Show Messages**: The number of read and unread email messages displays in Agenda View.
   - **Background**: A favorite photo becomes the Agenda View background. Check the Background box, select the photo thumbnail, and then select a photo. Adjust the fade setting so that the text is easy to read against the photo.
5. Select the Day box and set any of the following Day View options:
   - **Show Category List:** The Category pick list displays in Day View.
   - **Show Time Bars:** The time bars appear in the Day View to show the duration of an event and to illustrate event conflicts.
   - **Compress Day View:** When this box is checked, all time slots display. When this box is unchecked, start and end times display for each event, but blank time slots toward the bottom of the screen disappear to minimize scrolling.
   - **Show Category Column:** The color-coded category marker appears between the time and description to indicate which category the event is filed under.

6. Select the Month box and set any of the following Month View options:
   - **Show Category List:** The Category pick list appears in Month View.
   - **Timed Events:** The events that are scheduled for a specific time appear in Month View.
   - **Untimed Events:** The events that are scheduled for a specific date but not a specific time appear in Month View.
   - **Daily Repeating Events:** The events that repeat every day appear in Month View.

7. Select OK.

If you use Microsoft Exchange ActiveSync®, your email and calendar information synchronize directly with your company’s Exchange server. You must retrieve email and calendar updates from the VersaMail application; they do not update when you synchronize with your computer. See “Working with Microsoft Exchange ActiveSync” on page 83 for more information.

Your contacts, tasks, and memos sync with Palm Desktop software or Microsoft Outlook, depending on which desktop application you use.
Selecting alarm tones

1. From Day View in Calendar, open the menus.
2. Select Options, and then select Sound Preferences.
3. Select the Volume box.
4. Select each pick list and select an Alert Volume and Vibrate setting.
5. Select the Tones box.
6. Select from any of the following:
   - **Alarm Sound:** The tone played the first time your alarm goes off
   - **Reminder Sound:** The tone played if an alarm is not acknowledged and the alarm repeats itself
   - **Play Sound:** The number of times an alert tone will play during the alarm sequence
   - **Repeat Alarm:** The number of times the alarm repeats itself if the alarm is not acknowledged
   - **Every:** The interval between alarm repeats if the alarm is not acknowledged
   - **Alarm Preset:** The default for the number of minutes, hours, or days before the event for which the alarm goes off
7. Select Done.
You can set Tasks to record the date that you completed the task, and you can select to show or hide completed tasks. Completed tasks remain in the memory of your smartphone until you purge them.

You can display your tasks in your calendar. See “Customizing display options for your calendar” on page 153 details.

Open the menus to access other features such as importing phone numbers into the Tasks list.

---

**Tasks**

You can use Tasks as a reminder of tasks you need to complete and to keep a record of when you finish tasks.

**Adding a task**

1. Go to Applications and select Tasks.
2. Select New to create a new task.
3. Enter a description of the task. The text can be longer than one line.
Setting task priority, due date, and other details

The Details dialog box enables you to assign several values for tasks.

1. Go to Applications <Applications> and select Tasks <Tasks>.
2. Select the task to which you want to assign details.
3. Select Details.
4. Set any of the following:
   - **Priority**: Select the Priority number for this task (1 is most important). Later you can arrange your tasks based on the importance of each task.
   - **Category**: Assign the task to a specific category.
   - **Due Date**: Select the Due Date pick list and select a due date for the task.
   - **Alarm**: Set an alarm for this task.
   - **Repeat**: Indicate if the task occurs at regular intervals and how often it repeats.
   - **Private**: Check this box to mark this task private.
   - **Note**: Enter additional text you want to associate with the task.
5. Select OK.

You can also set the priority by selecting the Priority number next to a task in the Task list and then selecting a priority level from the list.

If you turn on the Show Due Dates option in the Tasks Preferences screen, you can tap directly on the due date in the Task list to select a new date.
Checking off a task
1. Select the task you want to check off.
2. Press Center ⋄ to check off the task.

Organizing your tasks
In the Tasks list, select one of these options:

- All: Displays all your tasks.
- Date: Displays tasks that are due in a specific time frame. Select the Date pick list (in the upper-right) to select Due Today, Last 7 Days, Next 7 Days, or Past Due.
- Category: Displays tasks that are assigned to the selected category. Select the Category pick list to select a different category.

Deleting a task
1. Select the task you want to delete.
2. Open the menus ᐅ, ᐃ.
3. Select Delete Task on the Record menu.
4. Select OK.
Customizing Tasks

The Tasks Preferences screen enables you to control the appearance of the Tasks list screen.

1. In the Tasks list, open the menus.
2. Select Options, and then select Preferences.
3. Set any of the following preferences:

   - **Sort by:** Indicates the order in which your tasks appear in the list.
   - **Show Completed Tasks:** Displays tasks you've checked off.
   - **Record Completion Date:** Replaces due date with the completion date when you complete (check) the task.
   - **Show Due Dates:** Displays task due dates, and inserts an exclamation point (!) next to overdue tasks.
   - **Show Priorities:** Displays the priority setting for each task.
   - **Show Categories:** Displays the category for each task.
   - **Alarm Sound:** Sets the sound for the alarms you assign to your tasks.

4. Select OK.
Memos

Memos are a great way to store notes on your Treo 650 smartphone.

Creating a memo
1. Go to Applications and select Memos.
2. Enter the text you want to appear in the memo.
3. Select Done.

Deleting a memo
1. Go to Applications and select Memos.
2. Select the memo you want to delete.
3. Open the menus.
4. Select Delete Memo on the Record menu.
5. Select OK.
staying productive
World Clock

World Clock displays the day and time in three cities around the globe. Whether you're travelling or at home, it's easy to keep track of the best time to reach your business associates, friends, and family in far away places.

Selecting cities

World clock shows the system date and time above the world map. If you enabled the Local Network Time option, Cingular Wireless's network automatically updates the time display to match the local time when you travel. Below the world map you can view the time in two other cities. If you travel a lot you may want to select your home city as one of these two cities, so that you always know what time it is at home.

1. Go to Applications and select World Clock.
2. Select a City pick list, and select a city in the same time zone.

![World Clock screen shot]

A. Home city
Adding cities

If the city you want to display is not in the predefined list, you can add it.
1. Select a City pick list and select Edit List.
2. Select Add.
3. Select a location in the same time zone as the city you want to add, and then select OK.
4. Enter the name of the city.
5. Select Location, select Map, select the location of the city, and then select OK.
6. If the city is not on Daylight Saving Time, uncheck this box. If Daylight Saving Time is observed, enter Start and End dates.
7. Select OK.

Setting an alarm

The next time you travel, don't rely on a hotel alarm clock to get you to that important meeting. Use your phone instead. World Clock includes a built-in alarm feature that you can use as a travel alarm.
1. Select Off in the upper-right corner.
2. Select the time you want the alarm to sound.
3. Select OK.
Calculator

Calculator includes a basic calculator, plus an advanced calculator with scientific, financial, and conversion functions.

Switching between Basic and Advanced Calculator Modes
1. Go to Applications and select Calculator.
2. Open the menus.
3. Select Options, and then select Advanced Mode or Basic Mode.

Selecting functions in Advanced Calculator Mode
1. Switch to Advanced Calculator Mode (see above).
2. Open the menus.
3. Select Options, and then select the function you want to use:
   - Math: Advanced mathematical functions such as exponents, roots, and logarithms.
   - Trig: Trigonometric functions such as sine, cosine, tangent, and variants.
   - Finance: Financial calculator functions such as APR and amortization.
- **Logic**: Hexadecimal characters in keypad, plus logic functions such as and, or, not, and xor. In place of Float/Degrees (see below), this view includes options for class (bin, oct, SDec, UDec, hex) and bits (8, 16, 32).
- **Statistics**: Statistical functions such as sum, factorial, and random number generator.
- **Weight/Temp**: Weight and temperature conversions for metric and English values.
- **Length**: Length conversions for metric and English values.
- **Area**: Area conversions for metric, traditional, and English values.
- **Volume**: Volume conversions for metric and English values.

4. Enter an integer for the number of decimal places to display.
5. Open the menus.
6. Select Pref, and then select the decimal display format: Float, Fixed (x), Sci (x), or Eng (x).
7. Open the menus.
8. Select Pref, and then select the number display format: degrees, radians, or grads.
managing files and applications
Using Find

The Find feature locates any text in the built-in applications and databases and in some third-party applications. The Find feature searches for the group of characters you specify, including characters that are part of a word. Find is not case sensitive.

1. Press Option ⌘, and then press Shift/Find ⌘ to open the Find dialog box.
2. Enter the text you want to find.
3. Select OK to start the search.
4. In the search results, select the text you want to review, or select Find More to continue the search.
Installing applications

Your Treo™ 650 smartphone comes with several built-in and ready to use applications. You can also install any of the bonus software included on the Software Installation CD as well as other third-party Palm OS® applications, such as business software, games, and more. To learn more, go to www.palmOne.com/software.

When you download an application to your computer, it is probably in a compressed format such as a ZIP or SIT file. If the file is compressed, you need to use a decompression utility on your computer, such as Winzip or Unstuffit, before you install the applications on your smartphone.

These instructions tell you how to install basic PRC (Palm OS application) and PDB (Palm OS database) files onto your smartphone. Some Palm OS software uses an installer or wizard to guide you through the process. Consult the documentation that came with the software for details.

Installing applications from the Internet

You can install Palm OS applications directly from the Internet, using the Web browser. When you download an application, it automatically installs on your smartphone. Remember: Palm OS applications have PRC or PDB at the end of their file names.

5. Open the Web browser (see “Viewing a web page” on page 116).
6. Go to the page that contains the link to the application you want to download.
7. Press Left ◀ or Right ▶ to highlight the link to the file, and then press Center ◤ to initiate the download process.
Installing applications from a Windows computer
1. Drag and drop the file(s) onto the palmOne™ Quick Install icon on the Windows desktop.
2. Select your username from the list, and then click OK.
3. Synchronize your smartphone with your computer to install the application(s) on your smartphone.

Installing applications from a Mac computer
1. Drag and drop the file(s) onto the Send To Device droplet in the Palm folder.
2. Select your username from the list, and then click OK.
3. Synchronize your smartphone with your computer to install the application(s) on your smartphone.

Getting help with third-party applications
If you encounter a problem with a third-party application (such as an error message), contact the application's author or vendor. For general troubleshooting of third-party applications, see “Third-party applications” on page 226.
Removing applications

If you decide that you no longer need an application, or you want to free up memory on your smartphone, you can remove applications from your smartphone or an expansion card (for more on expansion cards, see “Inserting and removing expansion cards” on page 179). You can remove only applications, patches, and extensions that you install; you cannot remove the built-in applications that reside in the ROM portion of your smartphone.

1. Go to Applications.
2. Open the menus.
3. Select Options, and then select Delete.
4. If you want to remove an application from an expansion card, insert the card into your smartphone.
5. Select the Delete From pick list and select the location of the application you want to remove.
6. Select the application that you want to remove.
7. Select Delete.
8. Synchronize to remove the application from the Backup folder on your computer.

Some applications are factory-installed in your phone and cannot be deleted. These are listed with a Lock icon next to them.

If you upgraded from a previous version of Palm Desktop software your backup folder may be located in the Palm folder.

Applications deleted from your phone are kept on your computer, in the Archive folder of your user folder.
If the application re-appears on your smartphone, you may need to manually delete it from your computer. Locate your Backup folder on your computer (Windows: C:\Program Files\palmOne\username; Mac: Mac HD\Applications\palmOne\Users\username). If you find a PRC or PDB file for the application you just removed, delete the file from the Backup folder.
Viewing application info

The Info screens display basic statistics about the applications on your smartphone.
1. Go to Applications.
2. Open the menus.
3. Select Info on the App menu.
4. At the bottom of the screen, select the type of information you want to view:
   • **Version**: The version numbers of applications on your smartphone.
   • **Size**: The size (in kilobytes) of applications and information on your smartphone.
   • **Records**: The number of entries in different applications on your smartphone.
5. Select Done.
Sending information with Bluetooth® wireless technology

Sending information over a Bluetooth wireless connection
You can send an individual entry or a category. When you send a category, the items within the category appear as unfiled items on the receiving device.

1. Go to Applications and select Bluetooth.
2. Select On.
3. Open an application.
4. Select the entry or category you want to send.
5. Open the menus.
6. Select Send on the leftmost menu.
7. Select Bluetooth, and then select OK.
8. Select the receiving device on the Discovery Results screen, and then select OK.

Sending an application over a Bluetooth wireless connection

1. Go to Applications, and select Bluetooth.
2. Select On.
3. Go to Applications.
4. Open the menus.
5. Select Send on the App menu.
6. Select the Send From pick list and select whether the application you want to send is located on your smartphone or on an expansion card.
7. Select the application you want to transfer. It cannot have a lock next to it.
8. Select Send.
9. Select Bluetooth, and then select OK.
10. Select the receiving device on the Discovery Results screen, and then select OK.

**Receiving information over a Bluetooth wireless connection**

1. Go to Applications and select Bluetooth.
2. Select Bluetooth On.
3. If you already have a trusted pair with the other device, your smartphone is ready to receive the info. If you don’t have a trusted pair with the other device, select the Discoverable pick list and select Yes.
4. Use the other device to discover your smartphone and send information to it:
   - See the other device’s documentation to learn how to discover and send information over a Bluetooth wireless connection.
   - If the Ringer switch is set to Sound On, your smartphone beeps to notify you of the connection, and then prompts you to accept the info. Select a category or expansion card to file the item. If you don’t select a category, the item goes into the Unfiled category.
5. Select Yes to receive the information or No to refuse it.
Beaming information

Your smartphone is equipped with an IR (infrared) port that lets you beam information to another Palm Powered device with an IR port. The IR port is located on the top of your smartphone, between the antenna and the Ringer switch, behind the small dark shield.

**Beaming an entry**

1. Select the entry or category you want to beam. If a lock 🗝️ appears next to the item, it can’t be beamed.
2. Open the menus 📚.
3. Select Record, and then select one of the following:
   - **Beam**: Sends an individual record.
   - **Beam Category**: Sends all entries in the current category.
4. When the Beam Status dialog box appears, point the IR port on your smartphone directly at the IR port of the receiving device.
5. Wait for the Beam Status dialog box to indicate that the transfer is complete before you continue using your smartphone.

You can store a beamed application on your phone, or send it to an expansion card inserted in the expansion card slot.

Beam your business card in two key presses: From the Main View in the Phone application, open the menus, and then press M.

If you beam a bookmark or saved page from the Web browser, it beams the URL, not the contents of that page.
Beaming an application

Not all applications can be beamed. A Lock icon appears on the Beam screen next to applications that cannot be beamed.

1. Go to Applications.
2. Open the menus.
3. Select Beam on the App menu.
4. Select the Beam From pick list and select whether the application you want to beam is located on your smartphone or on an expansion card.
5. Select the application you want to transfer.
6. Select Beam.

For best results, the path between the two devices must be clear of obstacles, and both devices kept stationary. If you have difficulty beaming, shorten the distance and avoid bright sunlight.

If you do not select a category upon receiving a beamed item, the item is placed in the Unfiled category.

If you can’t receive beamed information, try a soft reset (see “Resetting your smartphone” on page 205).
7. When the Beam Status dialog box appears, point the IR port on your smartphone directly at the IR port of the receiving device.
8. Wait for the Beam Status dialog box to indicate that the transfer is complete before you continue using your smartphone.

Receiving beamed information
1. Turn on your screen.
2. Point the IR port on your smartphone directly at the IR port of the transmitting device to open the Beam Status dialog box.
3. When the Beam Status dialog box appears, select a category for the entry.
4. Press Up to receive the beam or press Down to refuse it.
Using expansion cards

The expansion card slot on your smartphone enables you to add SD cards and MultiMediaCard cards to extend the storage capacity of your smartphone. For example, SD or MultiMediaCard expansion cards can store:

- Photos
- MP3 audio files
- Email attachments
- Games
- eBooks
- Applications
- Databases
- ... and more

Your smartphone is also compatible with SDIO cards, which let you add accessories, such as a presentation module, to your smartphone.

Although expansion cards are sold separately, your smartphone includes a dummy, non-functional card inside the expansion card slot. When you do not have a functioning card inside the expansion card slot, reinsert the dummy card to protect the slot opening.

Inserting and removing expansion cards

1. Press down and release the dummy card.
2. After you feel the expansion card slot eject the dummy card, remove the card from the slot.

SD cards are faster than MultiMediaCard cards for reading and writing information.

The warranty does not cover damage by Secure Digital (SD) cards that do not meet SD Memory Card Specifications. SD cards that do not meet SD Memory Card Specifications may damage your smartphone. SD cards that do meet SD Memory Card Specifications are marked with the following logo:
3. Hold your smartphone with the screen facing you and the card with the label facing you. The notch on the card should be in the lower-left corner next to the antenna.

4. Insert the card into the expansion card slot until you feel it lock into place and hear the confirmation tone.

When you insert an expansion card, the card name appears as a category with a Card icon next to the name. To switch between the applications on the expansion card and your phone, select the category pick list at the top of the screen and select another category.

In order to run an application on an expansion card, you must have enough free space in the internal memory of your smartphone to accommodate the program.
Opening applications on an expansion card
After you insert an expansion card in the expansion card slot, you can open any of the applications stored on the expansion card.
1. Insert the expansion card into the expansion card slot. The Applications View automatically appears.
2. Select the icon for the application you want to open.
3. Press Center to open the application.

Copying applications to an expansion card
You can copy applications between your smartphone and your expansion card.
1. Go to Applications.
2. Open the menus.
3. Select Copy on the App menu.
4. Select the Copy To pick list and select the destination: card name or Phone.
5. Select the From pick list and select the location of the application you want to copy: card name or Phone.
6. Highlight the application you want to copy.
7. Select Copy.
### Viewing expansion card information
The Card Info application displays general information about the expansion card that is currently in the expansion card slot.

- Go to Applications and select Card Info.

### Renaming an expansion card
If you change the contents of an expansion card, you may at some point want to rename the card to better match its contents.

1. Insert the expansion card into the expansion card slot.
2. Select the category pick list at the top of the screen and select All.
3. Select Card Info.
4. Open the menus.
5. Select Rename Card on the Card menu.
6. Enter a new name for the card.
7. Select OK.

### Formatting an expansion card
Formatting an expansion card is similar to formatting a disk on a computer. When you format an expansion card, you erase all the information stored on the card.

1. Insert the expansion card into the expansion card slot.
2. Select the category pick list at the top of the screen and select All.
3. Select Card Info.
4. Open the menus.
5. Select Format Card on the Card menu.
6. Enter a new name for the card.
7. Select OK.

---

Before copying information to, renaming, or formatting an expansion card, make sure the card is not write-protected. See the instructions that came with your card for details.
customizing your smartphone
System sound settings

You can immediately silence all sounds on your smartphone, including phone ringtones, Calendar alerts, and system sounds. This does not mute the speaker on your Treo™ 650 smartphone during a phone call.

Setting the Ringer switch

1. Slide the Ringer switch to Sound Off.
2. To hear all sounds again, slide the Ringer switch to Sound On.

When you slide the Ringer switch back to the Sound On position, it restores the previous sound settings. For example, if the phone ring volume is set to 7 and you slide the Ringer switch to Sound Off, you will not hear the phone ring. When you move the Ringer switch back to Sound On, the phone ring volume is still set to 7.

Want more ringtones? You can download any compatible ringtone directly to your smartphone (see “Downloading files from a web page” on page 119). You can also download ringtones to your computer and then email them to your smartphone.

A. Sound On
B. Sound Off
Setting system volume levels

You can set the volume level for system sounds, such as the tone that plays when you synchronize.

1. Go to Applications <Applications> and select Sounds <Sounds>.
2. Select the Application pick list and select General.
3. Select the System Volume and Game Volume pick lists and select a volume level.
4. Select Done.

If the Ringer switch is set to no sound, the ringer setting overrides the sound settings and all sounds are turned off.

Your smartphone includes a silent alarm that can vibrate even when the Ringer switch is set to Sound Off.
Display and appearance

Adjusting the brightness
Depending on the lighting conditions in which you're using your smartphone, you may need to adjust the brightness of the screen.
1. Press Option 📀, and then press Backlight 🌃.
2. Press Left ⬅️ and Right ➤️ to adjust the brightness.
3. Select Done.

Changing the screen text size
You can change the screen font in Calendar, Contacts, Memos, Messaging, and Tasks. The font styles may vary between applications.
1. Open the application in which you want to change the font.
2. Open the menus 📐.
3. Select Options, and then select Font.
4. Select a font style.
5. Select OK.

- A. Small font
- B. Small bold font
- C. Large font
- D. Large bold font
Setting date and time formats

Formats Preferences enables you to select number conventions based on geographic regions. For example, in the United Kingdom, time often is expressed using a 24-hour clock. In the United States, time is expressed using a 12-hour clock with an AM or PM suffix. All the built-in applications on your smartphone use the Formats Preferences settings.

1. Go to Applications and select Prefs.
2. Select Formats.
3. Set any of the following preferences:
   - **Preset to**: The standard number conventions for your country. When you select a country, the other Formats Preferences are automatically set to that country's conventions. You can also edit each option individually.
   - **Time**: The time format. Select HH:MM to display a 24-hour clock.
   - **Date**: The date format.
   - **Week starts**: The first day of the week (usually Sunday or Monday).
   - **Numbers**: The format for numbers with decimal points and commas.
4. Select Done.
Aligning the screen
Occasionally, your smartphone screen may need to be readjusted. If this occurs, you may see the wrong feature being activated when you tap the screen. To fix the problem, you can align the screen any time.

1. Go to Applications and select Prefs.
2. Select Touchscreen.
3. Follow the onscreen instructions.
4. Select Done.

Changing the system color scheme

1. Go to Applications and select Prefs.
2. Select Color Theme.
3. Select a color scheme.
4. Select Done.

You can also set the wallpaper for the Main View in the Phone application (see "Selecting wallpaper for the Phone application" on page 66) and the background for the Calendar’s Agenda View (see “Customizing display options for your calendar” on page 153).
Applications settings

Arranging applications by category
You can assign an application to a category and then display a specific category of applications in the Applications View.
1. Go to Applications.
2. Open the menus.
3. Select Category on the App menu.
4. Select the pick list next to each application and select a category.
5. Select Done.

Displaying applications by category
Do one of the following:
- Press Applications repeatedly to cycle through the categories.
- Select the category pick list at the top of the screen and select a category.
Reassigning buttons
Buttons Preferences lets you select which applications are associated with the quick buttons on your smartphone.

We recommend that you leave the primary button assignments on the factory settings until you become comfortable with the features of your smartphone. If you do change them, remember that the directions in this guide, as well as other help features, may refer to the original settings.

1. Go to Applications and select Prefs.
2. Select Buttons.
3. Select the pick list next to the button or key combination you want to re-assign and select an application.
4. Select Done.

Setting default applications
Sometimes, one application looks for another application to handle information (for example, a mail application might open a browser when you select a link in an email message).

1. Go to Applications and select Prefs.
2. Select Default Apps.
3. Select each pick list and select the application you want to associate with that function.
4. Select Done.
Locking your phone and info

Your Treo smartphone includes several features to protect your phone from inadvertent use and keep your information private. You can lock any of the following features on your phone:

- **Keyboard**: You can use the Keyguard feature to disable the keyboard and all buttons to prevent accidental presses in your bag or pocket.
- **Screen**: You can disable the screen’s touch-sensitive feature during an active call or call alert.
- **Phone**: You can use the Phone Lock feature to set your phone to require a password to make calls. The built-in security software lets you make emergency calls even if your phone is locked.
- **Phone**: You can set phone to require a password for you to see any information on your smartphone.
- **Entries**: You can mask or hide entries marked as private and set your phone to require a password for viewing them.

**Locking your keyboard (Keyguard)**

Your smartphone includes a feature that locks the keyboard so that you don’t accidentally press buttons or activate screen items while the phone is in a pocket or bag.

1. With the smartphone screen on, press Option and the Power/End button to enable Keyguard.
2. To disable Keyguard, press Center .

To avoid accidentally pressing onscreen buttons while you’re holding the phone up to your ear to speak, you can disable the screen’s touch-sensitive feature during active calls. When the screen’s touch-sensitive feature is disabled, you must use the 5-way navigator to access the buttons on the Active call screen. (See “Locking your screen” on page 192).
Locking your screen
Auto-Keyguard lets you automatically lock the keyboard after a period of inactivity.
1. Go to Applications (Works), and select Prefs .
2. Select Keyguard.
3. Set either of the following preferences:
   • Auto-Keyguard: The period of inactivity that passes before the keyboard automatically locks.
   • Disable touchscreen when: The conditions that disable the screen’s touchscreen feature.
4. Select Done.

Locking your phone (Phone Lock)
You can lock your SIM card to prevent unauthorized use of your mobile account.
When your SIM card is locked, you must enter the correct PIN to unlock it, even if you move it to a different phone.
1. Press Phone/Send .
2. Open the menus .
3. Select Options, and then select Phone Lock.
4. Check the Lock SIM box.
5. When prompted, enter the current PIN and select OK. (Unless you changed your PIN, enter the default PIN, provided with Cingular Wireless’s account materials.)
6. If you want to change the PIN, select Change PIN, enter a new PIN, and then select OK. Repeat this step to verify the new PIN.
7. Turn your phone off to activate the phone lock feature.
8. To turn your phone on again, press and hold the Power/End button , enter your PIN, and then select OK to unlock your phone.
Your SIM card locks again when you turn off your phone and then turn it back on.
To permanently unlock your SIM card:
1. Press Phone/Send.
2. Open the menus.
3. Select Options, and then select Phone Lock.
4. Uncheck the Lock SIM box.
5. When prompted, enter the current PIN and select OK.

**Locking your smartphone**

To protect your personal information, you can lock your smartphone so that you need to enter your password to access any of your information or use other features of your smartphone.

1. Go to Applications and select Security.
2. Select the Password box.
3. Assign a password and a password hint.
4. Select the Auto Lock Device box.
5. When prompted, enter your password.
6. Select one of the following options:
   - **Never**: Prevents your smartphone from locking automatically.
   - **On power off**: Locks your smartphone when you turn off the screen, or when it shuts off with the Auto-off feature.
   - **At a preset time**: Locks your smartphone at a specific time of day.
   - **After a preset delay**: Locks your smartphone after a period of inactivity.
7. Select OK.

Important: If you lock your system, you must enter the exact password to unlock it. If you forget the password, you need to perform a hard reset to resume using your smartphone. Performing a hard reset deletes all the entries in your smartphone. However, you can restore all previously synchronized info the next time you sync (see “Synchronizing information” on page 28).

To lock your system manually, select Lock & Turn Off and then select Off & Lock.
8. Do one of the following:
   - Select Lock & Turn Off to lock your smartphone immediately.
   - Press Applications to accept your settings and continue using your smartphone.

Setting Owner Preferences
You can use Owner Preferences to record information that you want to associate with your smartphone, such as your name, company name, and phone number. If you lock your device, the Owner Preferences information appears on the screen that requests your password to unlock it, and you must also enter your password to change the Owner Preferences information.

1. Go to Applications and select Prefs.
2. Select Owner.
3. If you assigned a password with the Security application, select Unlock, enter your password, and then select OK to continue.
4. Enter the text that you want to appear in the Owner Preferences screen.
5. Select Done.

Working with private entries
In most applications you can mark individual entries as private. All private entries remain visible and accessible until you select the Security setting to hide or mask them. When you hide entries, they do not appear anywhere in the application. When you mask entries, a visual placeholder appears where the entry would normally appear. If you define a system password, you must enter it to display private entries. If you do not define a system password, you (or anyone else) can reveal private entries without a password.

1. Display the entry that you want to mark private.
2. Select Details.
3. Check the Private box.
4. Select OK.

Hiding or masking all private records
Make sure the entries you want to mask are marked private.

1. Go to Applications and select Security.
2. Select the Current Privacy pick list and select either Hide Records or Mask Records.
Viewing all private records
Make sure the entries you want to mask are marked private.
1. Go to Applications and select Security.
2. Select the Current Privacy pick list and select Show Records.
3. If the Show Private Records dialog box appears, enter your password, and then select OK.

Viewing private entries in a specific application
Open the application that contains the private entries you want to display.
1. Open the menus.
2. Select Options, and then select Security.
3. Select the Current Privacy pick list and select Show Records.
4. Select OK.

Security and Palm Desktop software (Windows)
The Windows version of Palm Desktop software observes the security password for your smartphone. If you forget your smartphone password, you cannot view your information in Palm Desktop. You can change your password, but all entries marked as private will be deleted. You can restore these entries the next time you sync.
1. Go to Applications and select Security.
2. Select the Password box.
3. Select the Lost Password box.
4. Select Yes.

If you want additional security for Palm Desktop files, you may wish to purchase a third-party solution.
Connecting to a virtual private network

If you want to use your smartphone to access your corporate email account or other files on your corporate server, you may need to set up a virtual private network (VPN) on your smartphone. A VPN enables you to log in to your corporate server through the company’s firewall (security layer). Without a VPN, you cannot break through the firewall to gain access to the server.

You need to set up a VPN to access a corporate server in either of the following two situations:

• Your company’s wireless local area network (LAN) is located outside the firewall.
• Your company’s wireless LAN is located inside the firewall, but you are trying to access the network from outside the firewall (for example, from a public location or at home).

Check with your company’s system administrator to see if a VPN is required to access the corporate network. If you need a VPN, you must purchase and install a third-party VPN client to use this feature.

1. Install your third-party VPN client. See “Installing applications” on page 169 for details.
2. Go to Applications and select Prefs.
3. Select VPN.
4. Enter the settings provided by your corporate system administrator.

The Auto Sync feature in the VersaMail® application may not work with a VPN connection.
System settings

Setting the date and time

Date & Time Preferences enables you to set the time, date, time zone, and Daylight Savings Time setting for your smartphone.

1. Go to Applications and select Prefs.
2. Select Date & Time.
3. Uncheck the Enable Local Network Time box.
4. Select the Location pick list and select the city closest to your current location. If a nearby city is not on the list, follow these steps to add a city:
   - Select Edit List.
   - Select Add.
   - Select a city in your time zone, and then select OK.
   - If necessary modify any of the settings in the Edit Location dialog box.
   - Select OK.
5. Select the Set Date box. Highlight the current year, month, and date, and then press Center to set the date.
6. Select the Set Time box, and then select the current time.
7. Select OK.
8. Select the Daylight Saving pick list and select On or Off.
9. Select Done.

You can check the Enable Local Network box to synchronize the date and time on your phone with the network. Then whenever your phone is on and you are inside a coverage area, the date and time are updated.
Optimizing power settings

1. Go to Applications ⬇️ and select Prefs ⬇️.
2. Select Power.

<table>
<thead>
<tr>
<th>Preferences</th>
<th>Power</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto-off After</td>
<td>2 mins</td>
</tr>
<tr>
<td>Beam Receive</td>
<td>On</td>
</tr>
</tbody>
</table>

3. Set any of the following preferences:
   - Auto-off After: The time that elapses before your screen turns off automatically.
   - Beam Receive: The setting for whether you want your smartphone to receive beamed information.

4. Select Done.
finding help
Trouble upgrading?

If you experience problems with your Treo™ 650 smartphone after performing the upgrade steps in this guide, you may have incompatible applications or settings that were not quarantined during the installation process. These files reside in your Backup subfolder. Incompatible applications or settings can lead to numerous issues, including system resets and freezes. If you experience problems after upgrading, follow these steps to correct the problem:

1. Locate your user folder on your computer:
   - **Windows:** If your username is one word, your user folder name is the same as your username. If your username is two words, your user folder name consists of the first six characters of the second word of your username followed by the first letter of the first word. For example, if your username is John Smith, your user folder is called SmithJ. Your user folder is usually located inside one of the following folders:
     - C:\Program Files\palmOne\
     - C:\Program Files\Palm\
     - C:\Program Files\Handspring\
   - **Mac:** Your user folder name is the same as your username and is usually found in this location:
     - (Mac hard drive) : Users : (Your Mac username) : Documents : Palm : Users.

2. Make a copy of your user folder and store it in a safe place.
   - **Windows:** Copy the folder, and then paste it to your Windows desktop.
   - **Mac:** Select the folder, and then Option-drag it to your Mac desktop.

3. Confirm that your copy includes the Backup subfolder and that all the files in the original Backup subfolder are also in the copy of the Backup subfolder.

4. Delete all files from the original Backup subfolder.

Always use the same language for your smartphone, your operating system, and your desktop software. Otherwise, you may lose information or have difficulty with synchronization. Support is not provided for mix-and-match language setups.

Some third-party utilities allow you to back up your old device's information onto an expansion card, and then transfer the information to your smartphone. We do not recommend this method because any incompatible applications are also transferred to your Treo.
5. Perform a hard reset on your smartphone. See "Resetting your smartphone" on page 205 for instructions.

6. Sync your smartphone with your new desktop software; be sure to select your existing username.

7. Reinstall third-party applications from the copy of your Backup subfolder. (See "Installing applications" on page 169 for instructions.) We recommend that you install one application at a time to help you identify the application that caused the problem. We also recommend that you DO NOT install any applications that fall into any of the following categories:
   - Modify phone functions, such as ring tones, dialing, or caller ID
   - Replace organizer applications, such as contacts or calendar
   - Set data connection features, such as activating or ending data connections
   - Web clipping applications or files, such as PQA files
   - Instant Messaging applications

If you want to continue using these types of applications, please contact the third-party developer for software updates and information about compatibility with your smartphone.
Trouble installing the desktop software?

If you are having trouble installing the desktop software, you may have the wrong version of the software or some of your computer’s resources may be unavailable. Follow these steps to retry the installation.

1. Make sure your computer profile includes administrator rights to install software. In large organizations, these are usually granted by the system administrator.
2. Restart your computer.
3. Quit any active applications, including virus scanners and Internet security applications.
4. Make sure you’re installing the version of the software that came with your smartphone on the Software Installation CD. Other versions may not work with this smartphone.
5. Insert the Software Installation CD to restart the installation.

The Software Installation CD installs the software that lets you synchronize with Palm Desktop software or Microsoft Outlook for Windows. If you want to synchronize with a different personal information manager (PIM), you must install a third-party solution. Contact the PIM’s author or vendor to learn if software is available for your smartphone.

Always use the same language for your smartphone, your operating system, and your desktop software. Otherwise, you may lose information or have difficulty with synchronization. Support is not provided for mismatched language setups.
Resetting your smartphone

Performing a soft reset
A soft reset is similar to restarting a computer. If your smartphone is not responding or you have trouble synchronizing with your computer, a soft reset may help.
1. Press the Battery Door Release button and slide the battery door downward to remove it from your smartphone.
2. Use the stylus tip to gently press the reset button on the back of your smartphone.

Performing a system reset
A system reset, also called a safe or warm reset, tells your smartphone to stop what it's doing and start over again without loading any system extras. If your smartphone loops or freezes during a soft reset, a system reset may help. Performing a system reset allows you to get out of an endless loop in order to uninstall a third-party application causing the looping.
1. Press the Battery Door Release button and slide the battery door downward to remove it from your smartphone.
2. While pressing and holding Up ▲, use the tip of the stylus to gently press the reset button on the back of your smartphone.
3. When the Palm Powered logo appears, release Up ▲.
4. Delete the third-party application that you suspect is causing the problem.
5. Perform a soft reset. The wireless features of your smartphone are not available until you complete this step.

Performing a hard reset

A hard reset erases all information and third-party software on your smartphone. Never perform a hard reset without first trying a soft reset and a system reset. You can restore previously synchronized information the next time you sync.

A hard reset can tell you whether a problem stems from your smartphone or from an application installed on it. If you do not experience the problem after you perform a hard reset, the problem may be related to software you installed. See "Third-party applications" on page 226 for suggestions on diagnosing third-party software issues.

1. Press the Battery Door Release button and slide the battery door downward to remove it from your smartphone.
2. While pressing and holding Power/End ◄, use the tip of the stylus to gently press the reset button on the back of your smartphone.
3. Continue pressing and holding Power/End ◄. First the palmOne logo appears with a progress bar, and then the circular Palm Powered logo appears. When the circular Palm Powered logo appears, release Power/End ◄.
4. When the "Erase all data?" prompt appears, press Up ▲ to confirm the hard reset.
5. If a language selection screen appears, select the same language you selected for your desktop software.
Replacing the battery

Your Treo™ 650 smartphone comes with a replaceable battery. Be sure to use a replacement battery that is compatible with smartphone.

1. Press Power/End  to turn off the screen.
2. Press the Battery Door Release button and slide the battery door downward to remove it from your smartphone.
3. Place a finger in the notch next to the battery and lift the battery up at a 45 degree angle.
4. Align the metal contacts on the battery with the contacts inside the battery compartment.
5. Insert the battery into the compartment at a 45 degree angle, pressing it into place. Slide the battery door onto the back of the smartphone until it clicks into place.
6. Wait for your smartphone to turn on, and then enable the network time or set the date and time when prompted.

Be sure to dispose of your old battery properly. In some areas, disposal in household or business trash is prohibited.
A. Battery Door Release button  
B. Battery contacts  
C. Notch  
D. Phone contacts

Replacing the battery
Screen

The screen appears blank
1. When a call lasts longer than one minute, the screen automatically turns off. Press any key except Power/End to wake up the screen. Pressing Power/End hangs up the call.
2. Look closely at the screen. If you can see a dim image, try adjusting the screen brightness (see “Adjusting the brightness” on page 186).
3. If that doesn’t work, perform a soft reset (see “Performing a soft reset” on page 206).
4. If that doesn’t work, connect the smartphone to the AC charger (see “Charging the battery” on page 14) and perform a soft reset again.
5. If that doesn’t work, perform a hard reset (see “Performing a hard reset” on page 206).

The screen doesn’t respond accurately to taps or activates wrong features
1. Go to Applications  and select Prefs .
2. Select Touchscreen.
3. Follow the onscreen instructions to align the screen.
4. Select Done.

To find carrying cases that protect the screen and other useful accessories, visit www.palmOne.com.
Network connection

Signal strength is weak
1. If you're standing, move about 10 feet in any direction.
2. If you're in a building, move near a window. Open any metal blinds.
3. If you're in a building, move outdoors or to a more open area.
4. If you're outdoors, move away from large buildings, trees, or electrical wires.
5. If you're in a vehicle, move your smartphone level with a window.

My smartphone won't connect to the mobile network
1. Try the suggestions above for weak signals.
2. Turn off your phone and turn it on again (see “Turning your phone on and off” on page 18).
3. Remove the SIM card and re-insert it (see “Inserting the SIM card” on page 17).
4. Perform a soft reset (see “Performing a soft reset” on page 205).

My smartphone hangs up when I hold it to my ear
You may be accidentally pressing the onscreen Hang Up button with your cheek. Try holding the phone so your face doesn’t press against the screen. If this is not convenient, you may want to disable the screen’s touch-sensitive feature during active calls (see “Locking your screen” on page 192).

My smartphone seems to turn off by itself
If a system error and reset occur, your smartphone automatically turns the phone on if it was on before the reset. However, if your smartphone can’t determine if your phone was on before the reset, it does not automatically turn on the phone (see “Turning your phone on and off” on page 18).
My smartphone makes or answers calls when it’s in a briefcase or pocket

Items in your briefcase or pocket may be pressing the onscreen Answer button or otherwise activating screen items. If this happens, be sure to press Power/End to turn off the screen before placing your smartphone in a briefcase or pocket. You may also want to disable the screen’s touch-sensitive feature during incoming calls (see “Locking your screen” on page 192).

I can’t tell if data services are available

When your phone is on, the following icons appear in the title bar in the Main View of the Phone application and the Applications View to indicate whether data services are available and whether a data connection is active:

- Your phone is on and a GPRS or EDGE network is within range.
- Your phone is on but not connected to a GPRS or EDGE network.
- Your phone is connected to a GPRS or EDGE network. When the arrows above the signal bars are green, you can still receive calls.
- Your phone is actively using a dial-up, circuit-switched data (CSD) connection. When the arrows above the signal bars are black, you cannot make a call unless you interrupt the data connection. You can still receive calls.

If your phone is on and none of these icons are displayed, then data services are not available in your current location.
My smartphone won’t connect to the Internet

Your smartphone supports GPRS and EDGE wireless data networks. To connect to the Internet, you must subscribe to and activate GPRS or EDGE data services with Cingular Wireless.

Contact Cingular Wireless to verify that your subscription plan includes high-speed data services and that these services have been correctly activated. Cingular Wireless should also be able to tell you if there are any outages in your location.

1. Press and hold the Power/End button to turn off your phone. Then press and hold the same button to turn it back on again.
2. Press Phone and look for an icon in the title bar to indicate that you data services are available. See “I can’t tell if data services are available” on page 211 for a description of icons.
3. If you see these icons, you are in a data coverage area. Try connecting to the Internet again. If you do not see either of these icons, go to Applications (see “Enabling DUN on your smartphone” on page 126), and select Prefs , and continue with the following steps.
4. Select Network.
5. If the Service field says Untitled, select the Service pick list and select the appropriate data service.
6. Select Connect.
7. If the connection is successful, go the web browser. If you still can’t make a connection, perform a soft reset (see “Performing a soft reset” on page 205).
8. If your phone did not turn on automatically, press and hold the Power/End button to turn on your phone, and try connecting to the Internet.
I can't send or receive text or multimedia messages

- Make sure the SIM card is inserted correctly (see "Inserting the SIM card" on page 17) and your phone is turned on (see "Turning your smartphone on and off" on page 18).
- Contact Cingular Wireless to verify that your plan includes messaging services, that these services have been correctly activated, and that they are available at your location (Cingular Wireless should be able to tell you if messaging services have been experiencing transmission delays).
- If possible, contact the recipient of the message, and make sure the receiving device can handle the type of file that is being sent.
- Confirm that the DUN setting is turned off in the Bluetooth® application (see "Enabling DUN on your smartphone" on page 126).
- If a message arrives but does not display an alert, perform a soft reset (see "Performing a soft reset" on page 205).

I can't make or receive calls using a hands-free device with Bluetooth technology

Check all of the following:

- The Bluetooth setting is turned on in the Bluetooth application.
- Your hands-free device with Bluetooth wireless technology is charged and turned on.
- Move the smartphone and hands-free device closer to each other.
- Confirm that the DUN setting is turned off in the Bluetooth® application (see "Enabling DUN on your smartphone" on page 126).
- The Bluetooth application screen is closed.
Dial-up networking

My computer does not appear on the Trusted Devices screen

- If you select Add Device and your computer does not appear on the list, select Find More.
- Make sure that the computer’s Bluetooth setting is on and that the computer is discoverable. Check with your computer manufacturer for help with locating and changing these settings.
- Select Find More on the Trusted Devices screen.

I get a message that there is an error creating a DUN connection with my smartphone

- Re-create the trusted pair between your smartphone and your computer (see “Creating a trusted pair between your smartphone and your computer” on page 123).
- Make sure that the Bluetooth DUN setting on your smartphone is on (see “Enabling DUN on your smartphone” on page 126).

I get an Error 691 message when trying to connect

This error usually is followed by a text message indicating that your username or password is incorrect. Check your username/password and try to connect again.
Synchronization

Synchronization lets you back up your smartphone's information onto your computer. If you ever need to perform a hard reset or otherwise erase all your information on your smartphone, you can synchronize your smartphone with your computer to restore the info. To make sure you always have an up-to-date backup of your info; synchronize frequently.

Before you attempt to synchronize, make sure you've installed the desktop synchronization software from the Software Installation CD.

Palm Desktop does not respond to a synchronization attempt
1. Make sure that the USB sync cable is securely connected to the USB port on your computer and on the bottom of your smartphone (see “Setting up your computer” on page 21).
2. Make sure that HotSync® Manager is running:
   • Windows: Right-click the HotSync Manager icon in the taskbar in the lower-right corner of your computer screen, and make sure that Local USB is checked. If you don't see the HotSync Manager icon, click Start, select Programs, select palmOne, and then select HotSync Manager.
   • Mac: Find the Palm folder on your Mac hard drive. Double-click the HotSync Manager icon in the Palm folder. In the Connection Settings panel, set the Local Setup Port to palmOne USB.

Every device needs a unique name. Never synchronize more than one device to the same username on your computer.
3. Synchronize. If the synchronization is successful, you do not need to complete the remaining steps.
4. Perform a soft reset (see “Performing a soft reset” on page 205).
5. Synchronize. If the synchronization is successful, you do not need to complete the remaining steps.
6. If problems persist and you’re synchronizing through a USB hub, try connecting the sync cable to a different USB port or directly to your computer’s built-in USB port.
7. Synchronize. If the synchronization is successful, you do not need to complete the remaining steps.
8. On a Windows computer, uninstall palmOne software. Click Start, select Settings, select Control Panel, select Add or Remove Programs, select Palm Desktop software, and then click Change/Remove.
9. Reboot your computer and reinstall the software that came with your smartphone.

**Synchronization starts but stops without finishing**

If you upgraded from a previous Palm Powered device or received a system error, such as Sys0505, there may be conflicts with software on your smartphone.
1. Locate your Backup folder and rename the folder (e.g. BackupOld):
   - Windows: C:\Program Files\palmOne\username
   - Mac: Mac HD\Applications\palmOne\Users\username
2. Synchronize.
3. Manually reinstall any third-party applications you want on your smartphone. If necessary, use the items in the old Backup folder you moved.
4. (Windows only) If the Windows New Hardware Wizard appears, the synchronization process may be timing out before the wizard completes its job. Follow all instructions in the New Hardware Wizard, and synchronize again.
5. Uninstall palmOne software.
6. Reboot your computer.
7. Reinstall the Software Installation CD that came with your smartphone.
Synchronization finishes but info doesn’t appear where it should

1. Make sure you’re synchronizing with the intended desktop personal information manager (PIM). The Software Installation CD lets you synchronize with Palm Desktop or Microsoft Outlook for Windows. If you use a different PIM, you will need to install third-party software to synchronize. Consult the company that makes the PIM for more information.

2. If there are multiple Palm Powered devices synchronizing with your computer, make sure you are synchronizing with the correct username. If info is not appearing in Palm Desktop, make sure the correct username is selected in the toolbar of Palm Desktop.

3. Open HotSync Manager on your computer, and make sure the necessary conduits are set to Synchronize the files.

4. Uninstall palmOne software, then reboot your computer and reinstall the software from the Software Installation CD that came with your smartphone.

5. (Outlook only) With the included software, your smartphone can synchronize with the root folders of Contacts, Calendar, Tasks, and Notes. If you want to synchronize with a global Exchange Address Book, you must copy the addresses to your local Contacts list in Outlook (right-click the addresses and select Add to Personal Address Book).

6. (Outlook only) Outlook subfolders and public folders are not accessible with the included software. You may wish to use a third-party solution instead.

7. (Outlook only) If you’re trying to synchronize offline, be sure to set your Outlook Calendar, Contacts, Notes, and Tasks to be available offline.
I have duplicate entries in Microsoft Outlook after I sync
1. Open Microsoft Outlook and delete the duplicate entries.
2. Manually enter information you've added to your smartphone for the affected application since the last time you synchronized.
3. Go to the conduit dialog box for the affected application, and select Desktop overwrites handheld.
4. Synchronize your phone and your computer.
5. Go to the conduit dialog box you selected in step 3, and select Synchronize the files.

My appointments show up in the wrong time slot after I sync
If you create an appointment in the wrong time zone (i.e., your desktop was set to the wrong time zone), it shows up in the wrong time zone on your smartphone. To be safe, enable local network time and avoid assigning time zones to your appointments.
If you're using Microsoft Outlook:
1. Make sure that you installed the Microsoft Outlook conduit that came with your Treo 650 smartphone. If you're not sure whether this software is installed, reinstall it.
2. Open Microsoft Outlook and correct the wrong entries.
3. Manually enter Calendar information you've added to your phone since the last time you synchronized.
4. Go to the Calendar conduit dialog box, and select Desktop overwrites handheld.
5. Synchronize your phone and your computer.
6. Go to the conduit dialog box, and select Synchronize the files.

You should now be able to assign time zones to your events without encountering this problem.
If you're using Palm Desktop software:

1. On your phone, press Calendar.
2. Open the menus.
3. Select Options, and then select Preferences.
4. Uncheck the New events use time zones box (if it's checked).
5. On your computer, open Palm Desktop software and correct the wrong entries.
6. Manually enter any information you've added to your phone since the last time you synchronized.
7. Go to the Calendar conduit dialog box, and select Desktop overwrites handheld.
8. Synchronize your phone and your computer.
9. Go to the conduit dialog box, and select Synchronize the files.

To avoid this problem in the future, do not assign time zones to your events.
Palm Desktop software does not support time zones.
Email

I have problems using my account on my smartphone
Occasionally you may experience problems using an email account after you set it up. If you followed the account setup procedure and are experiencing problems using the account, verify that the account complies with your email provider's requirements by following these steps:

• Verify both your password and your username for your email account.
• Some email service providers require you to be on their network to use your email account. If this is the case, be sure to use your provider's network as the connection type for the account.
• Some email service providers have other requirements specific to their service. For example, Yahoo! requires you to set up POP mail forwarding for your Yahoo! account to download email messages to your phone. Check with your service provider to see if any provider-specific requirements exist.
• Service provider settings frequently change. If your email account was working but you are currently experiencing problems, check with your service provider to see if any of the account settings have changed.

I have problems sending and receiving email
Short periods of time when email is unavailable are common due to server problems or poor wireless coverage. If you have problems sending or receiving mail for an extended period of time, check with your ISP or email service provider to verify that the service is working properly.
Auto Sync is not working
If Auto Sync is occurring and you turn your phone off or the connection to your email service provider is disconnected, the Auto Sync fails.

I have problems sending email
If you are able to receive email messages but cannot send them, try these steps, in turn:

• Make sure your email provider allows you to access email on a wireless phone. Several providers, like Hotmail, do not offer this option at all; other providers require an upgrade to access email on a wireless phone.
• Turn on ESMTP. Many services require authenticated access, or ESMTP, to use their SMTP servers. See the User Guide for the VersaMail Application for details.
• Contact your email provider to find out the name of the outgoing mail server to use. Many ISPs, such as cable companies, require that you have an Internet connection to their network to send email through their servers. In this case, you can almost always receive email from these accounts, but if you want to send email, you must send it through another server.

I have problems synchronizing messages on my smartphone with messages on my computer
Make sure you have chosen the same settings for the account on both your smartphone and your computer. For example, if the account is set up on your smartphone to use the POP protocol, check the HotSync Manager on your computer to make sure that POP is selected as the protocol for that account.
My vCard or vCal email attachment isn’t forwarding correctly

Palm Desktop software provides several features that work with email client software on a Windows computer. For these features to work correctly, the email client software must be properly set up. Follow these steps to check the settings:

1. Click Start on your computer, and then select Settings.
2. Select Control Panel.
3. Select Internet Options, and then click the Programs tab.
4. Make sure that the email field is set to the correct email client software.
5. Click OK.
6. Start the email client software and make sure it is configured as the default MAPI client. Consult the documentation for your desktop email application for more information.

After I get messages, either manually or through Auto Sync, messages disappear from my Inbox

If you have an account that uses Microsoft Exchange ActiveSync®, when you perform an Auto Sync, the last seven days’ worth of email messages are downloaded from your mail server to your Inbox. All messages older than seven days are deleted from your Inbox; they are not, however, deleted on the server.

You can change the setting in VersaMail® preferences to download fewer than seven days’ worth of messages (in which case, more-recent messages will be deleted from your Inbox), or to downloaded all messages regardless of the date (in which case all messages will continue to appear in your Inbox).
I am using Microsoft Exchange ActiveSync, but the last seven days of email messages and Calendar events are not downloading to my smartphone.

Check with your system administrator to obtain the name of the mail server that offers you wireless access to the corporate mail system. If you cannot obtain the name of this server (some companies do not give it out, because they do not want wireless access to their servers), you cannot synchronize email messages and Calendar events with the server using Microsoft Exchange ActiveSync.
I can’t access a page

First, make sure you have Internet access: Open the Web browser and try to view a web page you’ve loaded before. To ensure you’re viewing the page directly from the Internet, open the menus, and then select Connect on the Page menu. After confirming your Internet connection, try to view the page in question again. If it comes up blank, open the menus, select Go, and then select Refresh.

If you’re still having trouble, the page may contain elements that are not supported by the Web browser. These include Flash, Shockwave, VBScript, WML script, and other plugins.

Some websites use a redirector to their true home page (for example, if you enter the address http://www.palmOne.com/support it may resolve to http://www.palmOne.com/us/support). If the Web browser can’t follow the redirect, try using a desktop browser to see the landing page of the redirector, and enter that address in the Web browser.

An image or map displays too small on the smartphone screen

The Web browser has two modes: Optimized and Wide Page. Optimized Mode resizes all images and page elements to fit in a single column on the smartphone screen. Switch to Wide Page Mode to see the full-size image (see “Viewing a web page” on page 116).

A secure site refuses to permit a transaction

Some websites don’t support certain browsers for transactions. Please contact the site’s webmaster to make sure the site allows transactions using the Web browser.
Here are some tips for taking good photos with the built-in camera:

- Clean the camera’s lens with a soft, lint-free cloth.
- Take photos in bright lighting conditions. Low-light images may be grainy, due to the sensitivity of the camera.
- Hold the camera as still as possible. You may want to support your photo-taking arm against your body or a stationary object (such as a wall).
- Keep the subject of the photos still. Exposure time is longer with lower light levels, so you may see a blur.
- For best results, verify that you have the brightest light source coming from behind you, lighting the subject’s face. Avoid taking indoor photos with the subject in front of a window or light.
- Make sure the subject is at least 18 inches away from the camera to ensure good focus.

Remember, when you synchronize, your Camera images are stored in the My Pictures/palmOne Photos folder on your hard drive (see “Viewing photos and videos on your computer” on page 138).

The Camera preview image looks strange
Some third-party applications overwrite the smartphone’s color settings with their own 8-bit color settings. This can affect the Camera Preview Mode. Delete third-party applications one by one until the preview image improves.
Third-party applications

Sometimes, third-party applications can cause conflicts on your smartphone. Third-party applications that modify wireless features may require extra troubleshooting. If you recently installed an application and your smartphone seems to be stuck, try the following:

1. Perform a soft reset (see “Performing a soft reset” on page 205).
2. If the problem persists, perform a system reset (see “Performing a system reset” on page 205).
3. Delete the most recently installed application from your smartphone (see “Removing applications” on page 171).
4. If the problem persists, perform another system reset.
5. If possible, synchronize to backup your most recent info.
6. If you’re unable to perform the steps above or the problem persists, locate your Backup folder on your computer and rename the folder (e.g. BackupOld):
   - Windows: C:\Program Files\palmOne\username
   - Mac: Mac HD\Applications\palmOne\Users\username
7. Perform a hard reset (see “Performing a hard reset” on page 206).
8. Synchronize to restore the info in your built-in applications.
9. If the problem is resolved, begin reinstalling your third-party applications one at a time: double-click a single file in the original Backup folder that you renamed.
10. If the problem recurs, delete the last application you installed and report the problem to its developer.

Getting more help
Contact the author or vendor of any third-party software if you require further assistance.

Remember, not all third-party applications were written with the Treo keyboard and 5-way navigator in mind. You may encounter strange behavior or errors in these applications if you use the keyboard and 5-way navigator.
Error messages

Your smartphone is designed to minimize interruptions when a system error occurs. If your smartphone encounters a system error, it automatically resets itself and resumes functioning as normal. If possible, it even turns your phone back on if it was on before the error occurred.

Sometimes, you might want to know more about an error. Your smartphone uses a special interface to show error messages in greater detail.

1. Press Phone/Send.
2. Press Center, and then select Dial Pad.
3. Enter # * 377, and then press Phone/Send.
4. Review the screen with details about the conditions that lead up to the most recent automatic reset.
5. Select OK.

Please note that third-party developers create their own error messages. If you do not understand an error message, please contact the developer of the application for help.
Making room on your smartphone

If you store a large number of records, or install many third-party applications, the internal memory on your smartphone may fill up. Here are some common ways to clear space on your smartphone:

- **VersaMail**: Emails that have large attachments can quickly consume memory on your smartphone. Delete emails with large attachments. If you have hundreds of messages with or without attachments, you may wish to delete older messages to make room (see "Deleting selected messages from the Inbox" on page 79).

- **Camera**: Large size images take up a lot of memory. Move images to an expansion card or delete images from your smartphone (see "Viewing photos and videos on your computer" on page 138).

- **Messaging**: Multimedia content can also consume excessive memory. Move multimedia content to an expansion card, or delete large files from your smartphone (see "Managing your messages" on page 111).

- **Internet**: If you set a large Web browser cache, you may want to use the Web browser's advanced Memory Management settings to clear all recent pages (see "Customizing your Web browser settings" on page 121).

- **Third-party applications**: You can delete infrequently used applications or move them to an expansion card (see "Copying applications to an expansion card" on page 181).

Also, remember that your smartphone includes an expansion card slot, and that you can store applications and information on expansion cards. However, you still need free memory on the smartphone itself to run applications from an expansion card.
Voice quality

Is the other person hearing an echo?
- Try decreasing the volume on your smartphone to avoid coupling or feedback on the other person's end. This applies to both the speakerphone and to the handset earpiece.
- Position the smartphone handset closer to your ear to prevent sound leaking back to the microphone. Keep your hand away from the microphone hole, which is on the bottom right side of your smartphone.
- If you're using Speakerphone mode with your smartphone lying on a flat surface, try turning the smartphone "face down" (screen facing the surface).

Are you hearing your own voice echo?
Ask the other person to turn down their volume or to hold the phone closer to their ear.

Is your voice too quiet on the other end?
Be sure to place the bottom of the smartphone, or the hands-free microphone, close to your mouth.

Check the signal strength indicator. If the signal is weak, try to find an area with better coverage.
Where to learn more

For a quick introduction

- **Quick Tour**: The Quick Tour teaches you how to use many features of your smartphone. It is already installed on your smartphone, and you can open it any time.

While using your smartphone

- **Tips**: Many of the built-in applications include helpful tips for getting the most out of your smartphone. To view these tips, open an application, open the menus, select Options, and then select Tips.
- **Information**: Many screens have a Tips icon in the upper-right corner. Select the Tips icon to learn about the tasks you can perform in that dialog box.
- **Online support from palmOne**: For up-to-date downloads, troubleshooting, and support information, check out [www.palmOne.com/support/treo650](http://www.palmOne.com/support/treo650).

If you need more information

- **Books**: Many books on Palm Powered devices, such as "Now You Know Treo", are available in local or online book retailers (look in the computers section), or visit [www.palmOne.com](http://www.palmOne.com).
- **Online forums**: Consult online Treo 650 smartphone user discussion groups to swap information and learn about topics you may find nowhere else. Visit [www.palmOne.com](http://www.palmOne.com) for details.
- **Customer service from Cingular Wireless**: For questions about your mobile account or features available on the network, contact Cingular Wireless for the latest information and help.
glossary
Alt (alternative): A keyboard key. Enter a letter on the keyboard, and then press Alt to access variations such as international characters and symbols.

Applications: The screen on your smartphone from which you can open all applications.

Auto-off interval: The time of inactivity that passes before the screen on your smartphone turns off. The wireless features on your phone are unaffected by this setting.

Beam: The process of sending or receiving an entry or application using the infrared port on your smartphone.

CSD (circuit-switched data): A dial-up Internet connection. You pay for the connection time, not how much information you transfer. Contrast with GPRS.

EDGE (Enhanced Data for GSM Environments): An enhanced version of GPRS that delivers data speeds that are up to three times faster than standard GPRS connections.

GPRS (General Packet Radio Service): A mobile Internet connectivity technology that allows persistent data connections. You pay for the amount of information you transfer, not the connection time.

HotSync: The PalmSource technology that synchronizes your smartphone and your computer with the simple press of a button.

HotSync Manager: The computer application that manages the synchronization with your smartphone.

Infrared (IR): A way of transmitting information using light waves. The IR port on your smartphone lets you transfer information between other IR devices within a short radius.

Lithium Ion (Li-ion): The rechargeable battery technology used in smartphones.

MMS (Multimedia Messaging System): An enhanced form of messaging that lets you send photos, animations, and ringtones almost instantly.

Option key: The keyboard button that lets you access the alternative feature that appears above the letter on each key.

Palm Desktop software: A PIM application for computers that helps you manage your personal information and keep your personal information synchronized with your smartphone.

Palm OS: The operating system of your smartphone phone. A trademark of PalmSource, Palm OS is known for its simplicity of use and for the large number of applications that can be added to your smartphone.

palmOne Quick Install: The component on your Windows computer that enables you to install Palm OS applications and other information on your smartphone.
Phone/Send: The application on your smartphone that provides quick access to the most commonly used applications on your smartphone.

PIM (Personal Information Manager): A genre of software that includes applications such as Palm Desktop software, Microsoft Outlook, Lotus Notes, and ACT! PIMs generally store contacts, schedules, tasks, and memos.

PIN (Personal Identification Number): The four-digit password assigned to your SIM card by Cingular Wireless. Turning on the PIN lock secures your wireless account. See also PUK.

PUK (PIN Unlock Key): A special extended password assigned to your SIM card. If you enter the wrong PIN more than three times, your SIM will be blocked, and you must call Cingular Wireless for the PUK.

SIM (Subscriber Identity Module): The smartcard, inserted in your smartphone, that contains your Global System for Mobile Communications (GSM) mobile account information. SIM cards are portable between GSM phones — your mobile subscriber information moves to whatever phone houses the SIM.

SMS (Short Messaging Service): The service that exchanges short text messages almost instantly between mobile phones. These messages can usually include up to 160 characters. Treo™ 650 smartphones can send and receive text messages while you are on a voice call.

Username: The name associated with your Treo smartphone that distinguishes it from other Palm Powered™ devices. When you first synchronize your Treo smartphone, you are asked to give it a username.
FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF Safety Exposure

To Radio Frequency Energy (SAR) Radio transmitting devices radiate Radio Frequency (RF) energy during its operation. RF energy can be absorbed into the human body and potentially can cause adverse health effects if excessive levels are absorbed. The unit of measurement for human exposure to RF energy is “Specific Absorption Rate” (SAR).

The Federal Communications Commission (FCC), Industry Canada (IC), and other agencies around the world have established limits that incorporate a substantial safety margin designed to assure the safety of all persons using this equipment.

In order to certify this unit for sale in the US, Canada and Europe this unit has been tested for RF exposure compliance at a qualified test laboratory and found to comply with the regulations regarding exposure to RF Energy.

SAR was measured with the unit transmitting at its maximum certified RF power. Often, however, during normal operation the unit will transmit much less than maximum power. Transmit power is controlled automatically and, in general is reduced as you get closer to a cellular base station. This reduction in transmit power will result in a lower RF energy exposure and resulting SAR value.

FCC RF Safety Statement

In order to comply with FCC RF exposure safety guidelines, users MUST use one of the following types of body-worn accessories.

1. A Palm™ brand body-worn accessory that has been tested for SAR compliance and is intended for use with this product.

2. An accessory that contains NO metal (snaps, clips, etc) and provides AT LEAST 1.5 cm of separation between the users body and the unit. Do NOT use the device in a manner such that it is in direct contact with the body (i.e. on the lap or in a breast pocket). Such use will likely exceed FCC RF safety exposure limits. See www.fcc.gov/odpsafety/ for more information on RF exposure safety.

Responsible party

(North America) palmOne, Inc.

(Europe) Francois Bornibus
Backhurst Court
Wokingham, Berkshire RG40 1PA, UK

Antenna Care/Unauthorized Modifications

Use only the supplied integral antenna. Unauthorized antenna modifications or attachments could damage the unit and may violate FCC regulations. Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Potentially Unsafe Areas

Potentially explosive atmospheres: Turn off your smartphone when you are in any areas with a potentially explosive atmosphere, such as fueling areas (gas or petrol stations) or storage facilities for fuel or chemicals.

Declaration of Conformity

Treo Model 650

palmOne declares that the above model of Treo smartphone is compliant with the regulations below. The declaration applies to the smartphone and its associated accessories (power supply, headset, and USB cable) where applicable.

Operational Warnings

IMPORTANT INFORMATION ON SAFE AND EFFICIENT OPERATION. Read this information before using your integrated multi-service portable radio.

For the safe and efficient operation of your radio, observe these guidelines:

Potentially Unsafe Areas / Potentially explosive atmospheres  Obey all signs and instructions regarding turning off your smartphone. In particular, turn off your smartphone when you are in any areas with a potentially explosive atmosphere, such as fueling areas (gas or petrol stations, below deck on boats), storage facilities for fuel or chemicals, blasting areas and areas near electrical blasting caps, and areas where there are chemicals or particles (such as metal powders, grains, and dust) in the air.

Interference to Medical and Personal Electronic Devices  Most but not all electronic equipment may not be shielded against the RF signals from your smartphone.

Using TTY

A TTY (also known as TDD or text telephone) is a telecommunications device that allows people who are deaf or hard of hearing, or who have speech or language disabilities, to communicate by telephone.

Your Treo 650 is compatible with select TTY devices. You can connect a TTY/TDD machine to your phone through the headset jack, but you cannot use your headset jack with a headset while this mode is enabled. Please check with the manufacturer of your TTY device for connectivity information and to ensure that the TTY device supports digital wireless transmission.

To use TTY, you may need to make additional arrangements with Cingular Wireless. Please contact Cingular Wireless’s customer service department for more information.

1. Press the Phone/Send button.
2. From the Dial Pad View, tap #*TTY.
3. Select OK. A red “T” appears at the top of the Phone screen whenever TTY is enabled.

To disable TTY, repeat steps 1 and 2.

Pacemakers  The Health Industry Manufacturers Association recommends that a minimum separation of six inches (6") be maintained between a smartphone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by the recommendations of Wireless Technology Research.

Persons with pacemakers should:
- ALWAYS keep the smartphone more than six inches from their pacemaker when the smartphone is turned ON.
- Not carry the smartphone in a breast pocket.
- Use the ear opposite the pacemaker to minimize the potential for interference.
- Turn the smartphone OFF immediately if you have any reason to suspect that interference is taking place.

Audio Safety  Some hearing aids may be affected by some digital smartphones. You may want to consult your doctor in the event of you experience interference with your hearing aid while using your smartphone. When using the speakerphone feature, it is recommended that you place your smartphone at a safe distance from your ear.

Other Medical Devices  If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Turn your smartphone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

Interference to Other Electronic Devices  RF energy may affect improperly installed or inadequately shielded electronic operating and entertainment systems in motor vehicles. Check with the manufacturer or representative to determine if these systems are adequately shielded from external RF energy. Also check with the manufacturer of any equipment that has been added to the vehicle.

Repetitive Motion Injuries  When using the keyboard or playing games on your smartphone, you may experience discomfort in your neck, shoulders, hands, arms, or other parts of the body. To avoid any injury, such as tendinitis, carpal tunnel syndrome, or other musculoskeletal disorders, make sure to take necessary breaks from use, take longer rests (such as several hours) if discomfort or tiring begins, and see a doctor if discomfort persists.

regulatory information :: 237
Blackouts and Seizures  Blinking lights, such as those experienced with television or playing video games, may cause some people to experience blackout or seizures, even if never experienced before. In the event a smartphone user should experience any disorientation, loss of awareness, convulsion, eye or muscle twitching or other involuntary movements, stop use immediately and consult a doctor. Individuals with personal or family history of such events should consult a doctor before using the device. To limit the possibility of such symptoms, wherever possible every hour take a minimum of 15 minutes, use in a well lighted area, view the screen from the farthest distance and avoid exposure to blinking lights if you are tired.

Aircraft  While in aircraft, follow all instructions regarding the operation of your smartphone. Use of your smartphone while on board an aircraft must be done in accordance with airline instructions and regulations.

Vehicles with Air Bags  Your smartphone should not be placed in a position that would affect the operation of air bag deployment or in a position that, should the air bag inflate, could propel the smartphone. Air bags will inflate with great force and care should be taken to protect within a vehicle that has air bags.

Battery  Your smartphone includes an internal lithium ion battery. Please note that use of certain data applications can result in heavy battery use and may require frequent battery charging. Any disposal of the smartphone must comply with laws and regulations pertaining to lithium ion batteries.

Driving Safety Tips Overview  Always obey all laws and regulations on the use of smartphones in your driving area.

Safety – Your most important call. The Wireless Industry reminds you to use your smartphone safely when driving.

1. Get to know your smartphone and its features such as speed dial and redial.
2. When available, use a hands-free device.
3. Position your smartphone within easy reach. Make sure you place your smartphone within easy reach and where you can grab it without removing your eyes from the road. If you get an incoming call at an inconvenient time, let your voice mail answer it for you.
4. Suspend conversations during hazardous driving conditions or situations. Let the person you are speaking to know you are driving. If necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow and ice can be hazardous, but so is heavy traffic. As a driver, your first responsibility is to pay attention to the road.
5. Do not take notes or look up phone numbers while driving. If you are reading an address book or business card while driving a car, or writing a “to do” list, then you are not watching where you are going. It’s common sense. Don’t get caught in a dangerous situation because you are reading or writing and not paying attention to the road or nearby vehicles.
6. Dial sensibly and assess the traffic. If possible, place calls when you are not moving or before pulling into traffic. Try to plan your calls before you begin your trip, or attempt to coincide your calls with times you may be stopped at a stop sign, red light or otherwise stationary. But if you need to dial while driving, follow this simple tip: dial only a few numbers, check the road and your mirrors, then continue.
7. Do not engage in stressful or emotional conversations that may be distracting. Stressful or emotional conversations and driving do not mix—they are distracting and even dangerous when you are behind the wheel. Make people you are talking with aware you are driving and if necessary, suspend phone conversations which have the potential to divert your attention from the road.
8. Use your smartphone to call for help. Your smartphone is one of the greatest tools you can own to protect yourself and your family in dangerous situations. With your smartphone at your side, help is only three numbers away: Dial 9-1-1 in the case of fire, traffic accident, road
9. Use your smartphone to help others in emergencies. Your smartphone provides you a perfect opportunity to be a “good Samaritan” in your community. If you see an auto accident, crime in progress, or other serious emergency where lives are in danger, call 9-1-1, so you would want others to do for you.

10. Call roadside assistance or a special wireless non-emergency assistance number when necessary. Certain situations you encounter while driving may require attention, but are not urgent enough to merit a call to 9-1-1. But you can still use your smartphone to lend a hand. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number.

NOTICE FOR CONSUMERS WITH HEARING DISABILITIES

Digital Wireless Phones to be Compatible with Hearing Aids

On July 10, 2003, the Federal Communications Commission (FCC) modified the exemption for wireless phones under the Hearing Aid Compatibility Act of 1988. This means that wireless phone manufacturers and service providers must make digital wireless phones accessible to individuals who use hearing aids.

For more information, please go to the FCC's Consumer Alert on accessibility of digital wireless phones at http://www.fcc.gov/cgb/consumerfacts/accessiblewireless.html.

Wireless telephones are hand-held phones with built-in antennas, often called cell, mobile, or PCS phones. These phones are popular with callers because they can be carried easily from place to place.

Wireless telephones are two-way radios. When you talk into a wireless telephone, it picks up your voice and converts the sound to radio frequency energy (or radio waves). The radio waves travel through the air until they reach a receiver at a nearby base station. The base station then sends your call through the telephone network until it reaches the person you are calling.

When you receive a call on your wireless telephone, the message travels through the telephone network until it reaches a base station close to your wireless phone. Then the base station sends out radio waves that are detected by a receiver in your telephone, where the signals are changed back into the sound of a voice.

The Federal Communications Commission (FCC) and the Food and Drug Administration (FDA) each regulate wireless telephones. FCC ensures that all wireless phones sold in the United States follow safety guidelines that limit radio frequency (RF) energy. FDA monitors the health effects of wireless telephones. Each agency has the authority to take action if a wireless phone produces hazardous levels of RF energy.

FCC derives its authority to regulate wireless telephones from the National Environmental Policy Act of 1969 (NEPA) and the Telecommunications Act of 1996 [http://www.fcc.gov/telecom.html].

Hands-Free Capability

All CTIA Certified portable products provide the consumer with a toll-free number for the purchase of a compatible hands-free device.
specifications
| **Radio** | - GSM 850/900/1800/1900 quad band world phone  
- GPRS class 10, class B; also supports CSD  
- EDGE up to 170kbps |
| **Phone features** | - Personal speakerphone  
- Hands-free headset jack (2.5 mm, 3-barrel connector)  
- Microphone mute option  
- TTY compatible  
- 6-way calling |
| **Processor technology** | - Intel PXA270 312MHz processor |
| **Expansion** | - SD/MMC/SDIO card slot |
| **Battery** | - Rechargeable Lithium Ion  
- Removable for replacement  
- Up to 6 hours talk time  
- Up to 300 hours standby  
- 4 hours full charge time |
| **Palm OS® version** | - Palm OS 5.4 |
