Introduction

In This Section

- About This Guide
- What You Need
About This Guide

This guide provides an overview of the key features and functionality of your Sprint Power Vision™ Smart Device Treo™ 755P by Palm. It can help you get started with using your device’s most popular and most important features.

Where to Learn More

For a Quick Introduction

- **Quick Tour:** The Quick Tour introduces you to many of your Treo device’s features. It is already installed on your device, and you can open it anytime. Press Applications and select Quick Tour.

While Using Your Device

- **User Guide:** The User Guide provides complete information on using your device, including descriptions of advanced features not included in this Getting Started Guide. To download the User Guide, go to www.palm.com/mypalm/755psprint.

You can also download and view a copy of the User Guide right on your device. Press Applications, select My Treo, select the Support tab, and then select User Guide.

- **Tips:** Many of the built-in applications include helpful tips for getting the most out of your device. To view these tips, open an application, press Menu, and select Tips from the Options menu.

- **Information:** Many screens have a Tips icon in the upper-right corner. Select the Tips icon to learn about the tasks you can perform in the dialog box that contains the Tips icon.

- **Online support from Palm:** For up-to-date downloads, troubleshooting, and support information, go to www.palm.com/treo755psprint-support.
Setup help: If you need help with setup, call 1-866-750-PALM (7256). This service is FREE within 90 days of purchase. Our support staff can help you set up your device and get you up and running. We can best assist you if your device is fully charged and you call from a phone other than your Treo device.

If You Need More Information

- **Vista users:** For information on using your device and desktop software with Windows Vista, visit [www.palm.com/windowsvista](http://www.palm.com/windowsvista).
- **Books:** Many books on Palm OS devices are available in local or online book retailers (look in the computers section), or visit [www.palm.com](http://www.palm.com).
- **Online forums:** Consult online Treo device user discussion groups to swap information and learn about topics you may find nowhere else. Visit [www.palm.com](http://www.palm.com) for details.

Contacting Sprint

**Visiting the Sprint Web Site**

You can get up-to-date information on Sprint services and options by signing on to the Sprint Web site at [www.sprint.com](http://www.sprint.com).

When you visit Sprint online, you can:

- Review coverage maps.
- Learn how to use voicemail.
- Access your account information.
- Purchase accessories.
- Add more options to your service plan.
- Check out frequently asked questions.
- And more.
Reaching Sprint Customer Service

You can reach Sprint Customer Service many different ways:

- On your device, press Phone; enter *2, and then press Talk.
- Sign on to your account at www.sprint.com.
- Call toll-free at 1-888-211-4727 (consumer customers), or 1-888-788-4727 (business customers).
- Write to Sprint Customer Service, P.O. Box 8077, London, KY 40742.

Sprint 411

You have access to a variety of services and information through Sprint 411, including residential, business, and government listings; assistance with local or long-distance calls; movie listings; and hotel, restaurant, shopping, and major local event information. There is a per-call charge and you will be billed for air time.

- Press Phone, enter 411, and then press Talk.

Sprint Operator Services

Sprint Operator Services provides assistance when you are placing collect calls or placing calls billed to a local telephone calling card or third party.

- Press Phone, enter 0, and then press Talk.

For more information or to see the latest in products and services, visit Sprint online at www.sprint.com.
What You Need

Your smart device box contains the following:

**Hardware**
- Treo device.
- Rechargeable battery.
- AC charger.
- USB sync cable.
- Stereo headset.
- Sprint® charger adapter.

**Documentation**
- *Read This First* poster.
- *Welcome to Sprint* brochure.
- *Getting Started Guide* (this guide).
- *Setting Up Email* booklet.
- *Experience Sprint Power Vision* guide.
- Terms & Conditions.
- Warranty.
- Software License Agreement.

**Software**
- Palm Software Installation CD (includes desktop synchronization software, links to bonus software for your device, and a link to the comprehensive *User Guide*).

You’ll also need the following items for completing the installation and activation:
- An activated Sprint service plan.
- A location with wireless coverage for your device.
Creating Sprint Account Passwords

As a Sprint customer, you have unlimited access to your personal account information, your voicemail account, and your Sprint Power Vision account. To ensure that no one else has access to your information, you need to create passwords to protect your privacy.

Account Password

If you are the account owner, you’ll have an account password to use when signing on to www.sprint.com and when calling Sprint Customer Service. Your default account password is the last four digits of your Social Security number. If you are not the account owner (if someone else pays for your Sprint service), you can get a sub-account password at www.sprint.com.

Voicemail Password

You’ll create your voicemail password when you set up your voicemail. See “Setting Up Your Voicemail” on page 32.

Sprint Power Vision Password

With your smart device, you can choose to set up a Sprint Power Vision password. You can use this optional password to authorize the purchase of Premium Services content and to protect your personal information on multi-phone accounts.

To find more information or to change your passwords, sign on to www.sprint.com or call Sprint Customer Service at 1-888-211-4727.
Device and Phone Basics

In This Section

- Your New Treo™ 755p Smart Device by Palm
- Inserting the Battery
- Charging the Battery
- Turning Your Device On and Off
- Moving Around the Device Screen
- Using the Keyboard
- Opening Applications
- Using the Phone
- Resetting Your Device
1. **Indicator Light** provides status information for your device based on the color of the light and the blink state. The indicator is visible only when the light is on.

2. **Earpiece** serves as the speaker on your device when you are not using the speakerphone feature or a headset.

3. **5-way Navigator** gives you one-handed access to moving around the device screen and selecting options. See “Moving Around the Device Screen” on page 18 for instructions.
4. **Power/End** turns the device’s phone on and off, wakes up and turns off the screen, and hangs up calls.

5. **Applications** opens Applications view.

6. **Messaging** opens the Messaging application.

7. **Menu** opens the application menus.

8. **Option** activates the secondary function of a key or button. See “Using the Keyboard” on page 22 for details.

9. **Calendar** opens the Calendar application.

10. **Phone** opens the Phone application.

11. **Talk** dials when a phone number is selected or entered, and answers an incoming phone call.

12. **Side Button** records voice memos by default, and performs context-sensitive actions when an application is open, such as playing or pausing MP3 files in the Pocket Tunes™ application. You can also reassign this button to open your favorite application.

13. **Volume Button** adjusts the earpiece, speaker, and ringer volume levels.
14. **Self-Portrait Mirror** helps you to take a picture of yourself (if your device includes a camera).

15. **Camera Lens** enables you to take pictures using the built-in camera (if included). There are two models of the Treo 755p Smart Device by Palm: One comes with a camera and the other does not. The packaging for your device indicates whether a camera is included.

16. **Speaker** plays ringtones and alarms, and serves as the speaker for the speakerphone feature.

17. **Battery Door Release** opens the battery compartment.
18. **Headset Jack** enables you to connect a hands-free headset. Use only headsets that are compatible with your device.

19. **Multi-connector** enables you to attach the USB sync cable and AC charger to your device.

20. **Microphone** serves as the mouthpiece on your device’s phone.

21. **Expansion Card Slot** allows you to expand the capabilities of your device by using miniSD card. See “Using Expansion Cards” on page 71 for details.

22. **Infrared (IR) Port** uses infrared technology to transmit information to and receive information from other infrared-enabled devices that use compatible software.

**Your Device’s Features: Top View**

23. **Ringer Switch** controls the ringer setting. See “Selecting Ringtones” on page 43 for details on changing the settings. Silencing the ringer turns off all system sounds, including alarms.

24. **Stylus** allows you to tap options on your device’s screen. To use the stylus, slide it out of the slot and hold it as you would a pen or pencil.
Inserting the Battery

**WARNING:** Use only batteries and chargers that are approved by Sprint or Palm for use with your device. Failure to use an approved battery or charger may increase the risk that your device will overheat, catch fire, or explode, resulting in serious bodily injury, death, or property damage.

1. Use one hand to press the **Battery Door Release**, and use your other hand to slide the battery door downward to remove it from your device.

2. Align the battery contacts with the battery compartment contacts.
3. Insert the battery into the compartment at a 45-degree angle, and then press it into place.
4. Slide the battery door onto the back of the device until it clicks into place.
Charging the Battery

The battery comes with a sufficient charge to complete the setup process and activate your phone. After activation, we recommend charging your device for three and a half hours to give it a full charge.

1. Plug the AC charger into a wall outlet.
2. Connect the charger cable to the charger jack on the bottom of the device. Make sure the arrow on the connector is facing up, toward your device screen.
3. To confirm that your device is charging, check the indicator light.
   - Red indicates that your device is charging.
   - Green indicates that your device is fully charged.

If the battery is fully drained, it may take a few moments for the indicator light to turn on while the battery is charging.
The onscreen battery icon displays the power status:

- **Full battery icon** 📀: Battery is not connected to a wall outlet and is fully charged.
- **Partial battery icon** 📀: Battery is not connected to a wall outlet and has some power but is not fully charged.
- **Almost-empty battery icon with red at the bottom** 📀: Battery needs to be charged immediately.

<table>
<thead>
<tr>
<th>Note:</th>
<th>Your device’s indicator light blinks red when the battery needs to be charged.</th>
</tr>
</thead>
</table>

- **Red lightning bolt** 🔋: Battery is connected to a wall outlet and is charging.
- **Green lightning bolt** 🔋: Battery is connected to a wall outlet and is fully charged.

<table>
<thead>
<tr>
<th>Tip:</th>
<th>To see exactly how much power is left in your battery, tap the onscreen battery icon.</th>
</tr>
</thead>
</table>
Using a Sprint Charger Adapter

If the connector on your 1 Amp AC charger or vehicle charger is approved by Sprint and it doesn’t fit into the connector on the bottom of your device, use the included Sprint charger adapter.

**WARNING:** Use only with 1 Amp AC chargers distributed by Sprint for your device. Using any unapproved AC charger may destroy the AC charger and cause a fire.

1. Plug the AC charger into a power source.
2. Connect the Sprint charger adapter to the charger jack on the bottom of your smart device.
3. Connect the charger cable to the Sprint charger adapter.
4. Charge your smart device. See “Charging the Battery” on page 13.
You can turn on your device screen and your phone independently. For example, the device screen can be off while the phone is on, or the device screen can be on while the phone is off. You can also have both the device screen and the phone turned on or off at the same time.

**Waking Up the Screen**

When your device screen is off, you need to wake up the screen.

1. Press and release **Power/End** to wake up the screen.

2. Press **Center** to turn off **Keyguard**. For more information about turning **Keyguard** on and off, see “Locking Your Keyboard (Keyguard)” on page 75.

3. Press and release **Power/End** to turn off the screen.

**Note:**

You can also press any of the application quick buttons on the front of your device to wake up the screen and to go directly to the application associated with that button.
Turning Your Device’s Phone On and Off

When your phone is on, it is connected to the Sprint National Network (provided you are in a coverage area) so that you can make and receive phone calls and use wireless services, such as email, messaging, and the Web browser. During initial setup, your phone is on by default, so you can use wireless services right away.

If you turn off your phone, you can still use the organizer features such as Contacts and Calendar, as well as the media features such as the Pocket Tunes™ music application and Pics&Videos. This is sometimes referred to as flight mode and is ideal for using your device on airplanes and for maximizing battery life.

1. Wake up the screen.

2. Press and hold Power/End. (You hear a series of ascending tones and see a “Welcome” screen. When your device locates a signal, “Sprint” and the signal-strength icon appear at the top of the Phone application screen, indicating that you can use the phone and Internet features, if they are supported by the local network.)

3. Press and hold Power/End again to turn off your phone. (You hear a series of descending tones and see a “Powering off” screen. When your phone is off, Phone Off appears at the top of the Phone application screen. You can still use the nonwireless features of your device, such as Contacts, Calendar, Tasks, and Memos.)
Moving Around the Device Screen

To move around the device screen, you can use the 5-way navigator for one-handed navigation, or you can tap items on the screen with the stylus. With use, you will find your own favorite way to scroll, highlight, and select menu items.

**Note:** Some third-party applications may not work with the 5-way, and you must use the stylus instead. In this guide, arrow icons are used to indicate directions on the 5-way. These arrows are different from any onscreen scroll arrows or pick list arrows.

The 5-way includes Right, Left, Up, Down, and Center buttons.
Scrolling Through Screens
As on a computer, you scroll on the device to move from field to field or page to page, or in some cases to highlight an item or option in a list.

You can also scroll using the stylus. Tap an onscreen scroll arrow, or drag the slider of an onscreen scroll bar.

Highlighting and Selecting Items
On most screens, one item—a button, a list entry, or a check box—is highlighted by default. The highlight indicates which item is affected by your next action. Use the 5-way to move the highlight from one item to another before opening or selecting it.

After highlighting an item, you can select or activate it by pressing Center or by tapping the item with the stylus.

Accessing Command Buttons
In most applications, command buttons such as New, OK, and Details appear at the bottom of the screen. In many cases, you can jump directly to these buttons instead of scrolling to them.

Note: For detailed information on navigating with the 5-way, see the User Guide.
Selecting Menu Items

Many applications have menus to provide access to additional features. These menus are usually hidden from view, but they appear when you press Menu \(\text{Menu}\). To get the most out of your device, it’s a good idea to familiarize yourself with the additional features available through the various application menus.

1. Press Menu \(\text{Menu}\) to open an application’s menus.

2. Press Right \(\text{Right}\) and Left \(\text{Left}\) to switch between menus.

3. Press Up \(\text{Up}\) and Down \(\text{Down}\) to highlight a menu item.

4. Press Center \(\text{Center}\) to select the menu item, or press Menu \(\text{Menu}\) to close the menus and cancel your selection.

**Tip:**

Most menu items have menu shortcuts listed in the menu. To use a menu shortcut, press Menu plus the shortcut letter. You don’t have to see the menu item to use the menu shortcut. For example, when you’re in Calendar, you can press Menu + N to create a new event.
Selecting Options in a Pick List

A range of options is often presented in a type of menu called a pick list, which can be identified by a downward-pointing arrow. Pick lists are different from the application menus previously described. The application menus give you access to additional features, while pick lists enable you to select the contents for a particular field.

You can select an option from a pick list with the 5-way or the stylus:

- Use the 5-way to highlight the pick list, and then press Center to display the items in the list. Press Up and Down to highlight the item you want, and then press Center to select the highlighted item. To exit the pick list without making a selection, press Left or Right.

- Use your stylus to tap the pick list, and then tap the item you want from the list. To exit the pick list without making a selection, tap outside the list.
Using the Keyboard

When using the keyboard, most people find it easiest to hold the device with two hands and use the tips of both thumbs to press the keys.

The Backspace, Return, Space, and Shift keys, as well as the letter keys, work in the same way as the same keys on any computer keyboard. In addition, your device offers several special function keys.
<table>
<thead>
<tr>
<th>Key</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Option</strong></td>
<td>When pressed in conjunction with a second key, gives that key a secondary function. For example:</td>
</tr>
<tr>
<td></td>
<td>• <strong>Option</strong> + &lt;any lettered key&gt; enters the symbol or number displayed at the top of the key.</td>
</tr>
<tr>
<td></td>
<td>• <strong>Option</strong> + &lt;any quick button&gt; opens a secondary application (see “Using the Quick Buttons” on page 25).</td>
</tr>
<tr>
<td></td>
<td>• <strong>Option</strong> + Shift/Find opens the <strong>Find</strong> feature (see the <em>User Guide</em> for information on using <strong>Find</strong>).</td>
</tr>
<tr>
<td></td>
<td>• <strong>Option</strong> + Menu dims the device screen.</td>
</tr>
<tr>
<td><strong>Alt</strong></td>
<td>When pressed in conjunction with a lettered key, the period key, or the zero key, displays a variety of alternate characters that you can enter using that key. See the <em>User Guide</em> for details. For example, pressing R + <strong>Alt</strong> displays the © character.</td>
</tr>
<tr>
<td><strong>Menu</strong></td>
<td>Opens application menus. See “Selecting Menu Items” on page 20 for details.</td>
</tr>
</tbody>
</table>

**Tip:** Your device includes a keyboard backlight that turns on and off when the screen turns on or off. Press **Option** + P to adjust screen and keyboard backlight brightness. The backlight also dims when an active call lasts longer than a specified period of time. See the User Guide for details.
Entering Lowercase and Uppercase Letters

- To enter lowercase letters, press the desired keys.
- To enter an uppercase letter, press Shift/Find and then press a letter key. You don’t need to press and hold Shift/Find while entering uppercase letters. When Shift is active, an up arrow appears in the lower-right corner of the screen.
- To turn Caps Lock on, press Shift/Find twice. To turn it off, press Shift/Find once. When Caps Lock is on, an underlined up arrow appears in the lower-right corner of the screen.

Entering Numbers, Punctuation, and Symbols

To enter the characters that appear above the letters on the keys, do one of the following:

- Press Option and then press the key with the desired character shown above the letter. You don’t need to press and hold Option while pressing the second key. When Option is active, the symbol appears in the lower-right corner of the screen.
- To turn Option Lock on, press Option twice. To turn it off, press Option once. When Option Lock is on, the symbol appears in the lower-right corner of the screen.

Tip:
Some application views automatically default to Option Lock, such as the Dial Pad view of the Phone application, or the Calculator. In this case, you do not need to press Option to enter numbers.
Opening Applications

When you open an application using either a quick button or Applications view, you automatically close the application you were previously using.

Using the Quick Buttons

The front of your device has three buttons that you can use to open specific applications. The fourth button opens Applications view, which allows you to access all the applications on your device. You can also press any of the quick buttons or the Applications button to wake up your device screen.

Each of the three quick buttons opens an application. When you press Option first, each quick button opens a secondary application.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
Using Applications View

You can access all available applications through Applications view.

1. Press Applications \( \text{Applications} \) .

2. Use the 5-way \( \text{5-way} \) to highlight the application you want to open.

3. Press Center \( \text{Center} \) to open the selected application.

In Applications view, you can also do any of the following:

- Press Applications \( \text{Applications} \) repeatedly to cycle through various categories of applications. See the User Guide for more information on categories.

- Enter the first few letters of the application’s name to highlight it. For example, if you enter “p,” it highlights Phone; if you then enter “r,” it highlights Prefs. If you pause and then enter “r,” it highlights the first application that starts with “r.”
Using the Phone

Opening the Phone Application

Press Phone ☎️ to open the Main view of the Phone application.

Checking Signal Strength and Phone Status

You can monitor the status of your device’s signal strength and several other items, using the icons in the title bar of the Phone application. See the User Guide for details.

What’s My Phone Number?

1. Make sure your phone is on (see “Turning Your Device’s Phone On and Off” on page 17 for information).
2. Press Phone ☎️.
3. Press Menu 📢.
4. Select Options and then select Phone Info.
Making Calls

Your device offers several options for making phone calls. As you become familiar with your device, you’ll discover which method you prefer.

Dialing Using the Onscreen Dial Pad

1. Press Phone.
2. Enter the phone number by tapping the onscreen Dial Pad with the stylus.
3. Do any of the following to make the call:
   - Tap Dial.
   - Press Talk.
   - Press Center.

Dialing With the Keyboard

1. Press Phone.
2. Press the numbered keys to enter the phone number. (You don’t need to press Option.)
3. Press Talk to make the call.
Dialing by Contact Name

You need to have names and numbers in your contact list before you can dial a call by using a contact name (see “Adding a Contact” on page 51). You can also import names and numbers by synchronizing (see “Synchronizing Information—The Basics” on page 48).

1. Press Phone ☀.
2. Select the Contacts favorite button.
3. Using the keyboard, start entering one of the following for the contact you want to call:
   - First name (JOH for John).
   - Last name (SMI for Smith).
   - First initial and last name (JSM for John Smith).

For example, entering SM might display Smilla Anderson, John Smith, and Sally Martin. Entering JSM finds only John Smith.

4. Select the number you want to call, and press Talk ☀ to make the call.

Tip: To see more information for a contact, highlight the name and press Center on the 5-way. To restart your search, press Backspace to delete letters you’ve entered, or select Cancel to return to Main view.
Dialing With a Speed-Dial Favorite Button

For information on speed-dial favorite buttons, see “Defining Favorite Buttons” on page 38.

1. Press Phone.
2. Press Down ▼ to access your favorite buttons.
3. Use the 5-way to highlight the desired speed-dial favorite button. (Speed-dial favorite buttons are indicated by the icon.)
4. Press Center or tap the speed-dial favorite button to call the number associated with the selected button.

Tip: To view more favorite buttons, press Right or Down on the 5-way. If the highlighted favorite was added from Contacts, press Space to view all numbers associated with that contact.

Adjusting Call Volume

While a call is in progress, press the Volume button on the side of your device to adjust the call volume.

- To increase the volume, press the upper half of the Volume button.
- To decrease the volume, press the lower half of the Volume button.
Receiving Calls

To receive calls, your device’s phone must be on. This is different from having only the screen turned on (see “Turning Your Device’s Phone On and Off” on page 17). When your phone is off, your calls go to voicemail.

Answering Calls

- Press Talk.
  - or-
  Using the 5-way, select the onscreen Answer button.
  - or-
  If the headset is attached, press the headset button.

Sending Calls to Voicemail

- Press Power/End.
  - or-
  Using the 5-way, select the onscreen Ignore button.

- Using the 5-way, select the onscreen Ignore with Text button. This option sends the call to voicemail and opens a text message addressed to the caller.

Tip: Do not press Power/End to ignore a call-waiting alert; this hangs up your active call (the call-waiting alert then changes to an incoming-call alert). Use the 5-way method instead.

Adjusting Ringer Volume

- When you are not on a call, press the Volume button on the side of your device to adjust the ringer volume, and then press the Side button to confirm the change.
Silencing the Ring of an Incoming Call

- Press any key on your device except Talk, Power/End, or the 5-way.

-or-

To immediately silence all system sounds including the ringer, slide the Ringer switch to Sound Off (see “Silencing Sounds” on page 73).

If music is playing and a call arrives, the phone rings softly and the music automatically pauses. The music resumes if you ignore the call; if you answer the call, the music resumes when you hang up.

Using Voicemail

Setting Up Your Voicemail

The first time you call voicemail, you are prompted to enter your voicemail password. If necessary, contact Sprint for your password.

1. Make sure your phone is turned on (see “Turning Your Device’s Phone On and Off” on page 17).

2. Press Phone.

3. Press and hold 1, or select the Voicemail favorite button, to call the automated voicemail system.

4. Follow the voice prompts to set up your voicemail.

Retrieving Your Voicemail Messages

1. Press Phone.

2. Press and hold 1, or select the Voicemail favorite button, to call the voicemail system.

3. Enter your voicemail password by using the keyboard, or select Extra Digits if you defined this option (see “Defining Favorite Buttons” on page 38 for details on defining extra digits). Remember that you do not need to press Option to enter numbers, an asterisk ( * ), or a pound sign ( # ) while on a call.
Accessing Your Voicemail From Another Phone

1. Dial your wireless phone number.
2. Press * when your voicemail answers.
3. Enter your password, and then press #.

What Can I Do When I’m On a Call?

When you make or receive a call, **Active Call** view appears. Use the **5-way** to access the onscreen buttons in this view.

The onscreen buttons in **Active Call** view perform the following functions:

- **Hang Up All**
  - Ends the call immediately. You can also press the headset button (if the headset is attached).

- **Spkr-phone**
  - Turns on the speakerphone. When the speakerphone is on, you can take the device away from your ear and use other features during a call. For example, you can check your calendar or look up contact information.
Turns off the speakerphone when it is on.

Replaces the **Spkr-phone** button when a Bluetooth® hands-free device, such as a headset or car kit, is attached. Select this button to transfer the call from the Bluetooth hands-free device to the built-in earpiece.

Places the current call on hold.

Enables you to make another call while the first call is on hold. For information on making a second call, see the *User Guide*.

Opens the **Dial Pad** so you can manually dial additional numbers, such as an extension or a response to a voice prompt.

Dials any extra digits (such as a password or an extension) that you assigned to a favorite button. This button replaces the **Dial Pad** button during outgoing calls to numbers that include predefined extra digits. See “Defining Favorite Buttons” on page 38 for information on defining extra digits.

Mutes the microphone so that you cannot be heard.

---

**Tip:** To avoid accidentally activating onscreen buttons while holding the device to your ear, you can disable the screen’s touch-sensitive feature during active calls (see “Locking Your Screen” on page 76).
Ending a Call

Do one of the following to end a call:

- Press **Power/End**.
- Select **Hang Up All**.
- Press the button on the headset (if the headset is attached).

<table>
<thead>
<tr>
<th>Note:</th>
<th>If the End Call dialog box appears, select OK to continue.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Tip:</th>
<th>When a call lasts longer than two minutes, the screen dims. Press any key except <strong>Power/End</strong> to restore the screen brightness, and then press <strong>Power/End</strong> to hang up the call. Be careful not to press <strong>Power/End</strong> to wake up the screen, because this will accidentally end the call.</th>
</tr>
</thead>
</table>

Saving Phone Numbers

After you complete an outgoing call to a number that is not in your **Contacts** list, you are prompted to add the number to your **Contacts** list. You are also prompted to add new numbers from incoming calls with caller ID.

- To create a new contact entry for this number, select **Create a New Contact**, and enter the contact’s information.
- To add this number to an existing contact entry, select **Add to a Contact** and then select the contact. The number is pasted into the first available phone number field for that contact.
- To decline adding this number, select **Cancel**.
- To disable the **Add New Number** prompt, check the **Don’t ask me this again** box.

<table>
<thead>
<tr>
<th>Add New Number</th>
<th>Add 1-510-555-0237 to your contacts list?</th>
</tr>
</thead>
<tbody>
<tr>

<td>Cancel</td>
</tr>
</tbody>
</table>
Answering a Second Call (Call Waiting)

When you are on a call, you can receive a second call. When the second call comes in, you hear a call-waiting tone and the Call Waiting dialog box appears. You can do any of the following to handle the second call:

- To place the current call on hold and answer the new call, press Talk or use the 5-way to select Answer.
- To send the new call to voicemail, use the 5-way to select Ignore.
- To send the new call to voicemail and send the caller a text message, use the 5-way to select Ignore with Text.
- To hang up the current call and answer the new call, press Power/End. When the incoming call message reappears, select Answer or press Talk.

Tip: Once you have answered a second call, to switch back and forth between the original call and the call you answered, use the 5-way to select Swap.

Note: When you answer a second call and then select the Hang Up All button, it ends both calls. In this situation, if the first caller has not yet hung up the phone, the Sprint National Network automatically redials your number from the first caller’s number and you see an incoming call alert. You can answer to continue your call with the first caller.
Using Sprint Voice Command

If you subscribe to the Sprint Voice Command service, you can call a number by just saying a name. (There is a monthly charge for this service.)

To activate Sprint Voice Command:
1. Make sure your phone is turned on (see “Turning Your Device’s Phone On and Off” on page 17).
2. Press Phone.
3. Press *, press 2, and then press Talk to contact Sprint Customer Service and sign up.

To use Sprint Voice Command, you must set up your personal address book.
1. From the Main view of the Phone application, press *, and then press Talk. Follow the system prompts.
2. Say “Add Name” to begin setting up your personal address book, and then follow the voice prompts.

To make a call with Sprint Voice Command
1. From the Main view of the Phone application, press *, and then press Talk. (You’ll hear a tone followed by the prompt “Ready.”)
2. After the prompt, say “Call” and the name you’ve assigned to the number you want to call. (Your request will be repeated and you will be asked to verify it.)
3. Say “Yes” to make the call. Say “No” to cancel.
Defining Favorite Buttons

Your device provides 70 programmable favorite buttons for quick access to common tasks such as dialing a phone number (speed dial); opening an application; accessing a Web page; addressing a text, email, or Picture Mail message; or accessing voicemail.

Sprint may preset favorite buttons on your device that are customized for their services. You can customize all favorite buttons except Voicemail—either delete and reassign existing favorite buttons or create new ones—to perform any of the supported tasks.

Creating a Speed-Dial Favorite Button

1. Press Phone 
2. Use the 5-way to select a blank favorite button.
3. Enter a label for the favorite.
   - If the entry is for an existing contact, select Lookup. Start entering the contact’s last name, and then select the number you want for the contact when it appears in the lookup list.
   - If the entry is for a new contact, enter the Label, press Down , and enter the Number.
4. (Optional) Enter a Quick Key, a letter that you can press and hold from the Main, Dial Pad, or Favorites view of the Phone application, to call this speed-dial number.
5. Select OK.
Creating Other Types of Favorite Buttons

1. Press Phone ☏.

2. Use the 5-way ☐ to select a blank favorite button.

3. Select the Type pick list and select Call Log, Dial Pad, Contacts, Application, Message, Email, or Web Link.

4. Enter a label for the favorite and enter any other necessary information on the screen.

5. (Optional) Enter a Quick Key, a letter that you can press and hold from the Main, Dial Pad, or Favorites view of the Phone application, to open the favorite.

6. Select OK.
Using a Phone Headset

You can connect a phone headset for hands-free operation. If you need to use your device while driving and this is permitted in your area, we recommend using a phone headset (wired headset included) or a hands-free car kit (sold separately).

**Note:** For a list of compatible hands-free devices, go to [www.palm.com/treo755psprint-support](http://www.palm.com/treo755psprint-support).

Check the specifications for your headset or car kit to confirm compatibility. Please note that you cannot use stereo headphones with Bluetooth wireless technology to listen to music files.

**Using a Wired Headset**

When using the headset that is included with your device, you can press the headset button to answer an incoming call or a call-waiting call, pick up a call that is on hold, switch between an active call and a call on hold (if the second call is incoming), and more.
Connecting to a Bluetooth Hands-Free Device

Once you set up a partnership with a Bluetooth hands-free device such as a headset or car kit, you can communicate with that device whenever it is turned on and within range. Bluetooth range is up to 30 feet (10 meters) in optimum environmental conditions. Performance and range may be reduced by physical obstacles, radio interference from nearby electronic equipment, and other factors.

1. Press Applications and select Bluetooth, or tap the Bluetooth icon in the title bar.
2. Select Bluetooth On.
3. (Optional) Enter a device name that identifies your device when it is discovered by other Bluetooth devices.

Note: Use the same device name for all your Bluetooth connections. If you change the device name, you need to recreate any partnerships you have already created.

4. Prepare your hands-free device to accept a connection from another Bluetooth device. (For instructions, see the documentation that came with your hands-free device.)
5. Select Setup Devices.
7. Follow the onscreen instructions to create a partnership with the specific hands-free device. When prompted, enter a passkey.

Note: In the documentation for the other device, a partnership might be referred to by a term such as trusted pair, trusted device, or pairing.
8. After you finish setting up the device, select **Done** to return to **Trusted Devices** view.

9. (Optional) Enable advanced hands-free features by pressing the **multifunction** button (MFB) on the hands-free device.

   You know that the connection is successful when you see a light-blue headset icon in the title bar of the Phone application. You can now use your Treo device with the Bluetooth hands-free device.

   **Using a Bluetooth Hands-Free Device**

   After you create a partnership with your Bluetooth hands-free device and you turn it on within range (up to 30 feet or 10 meters), your Treo device automatically routes all calls to the hands-free device instead of to the earpiece on your Treo device. When a call comes in, your Treo device rings and the hands-free device beeps. Even if you answer the call on your Treo device, the call goes to the hands-free device. If you prefer to route calls to the earpiece on your Treo device, you can change the settings on your Treo device to do this; see the **User Guide** for information on customizing advanced settings for your hands-free device.

**Important:** Some hands-free devices have a predefined passkey. If your device has a predefined passkey, you can find the passkey in the documentation for that device. Other devices provide a screen where you enter a passkey that you make up. In either case, you must use the same passkey on both your Treo device and your hands-free device. We recommend that, where possible, you make up a passkey of 16 alphanumeric characters (letters and numerals only) to improve the security of your Treo device. The longer the passkey, the more difficult it is for the passkey to be deciphered.

**Note:** For some car kits, you need to initiate a Bluetooth connection from your Treo device to complete the partnership process. To do this, highlight the car kit in Trusted Devices view, press Menu, and then select Connect.
The features of a hands-free device vary by model. Check the documentation for your hands-free device for details about these features. Your Treo device can support the following actions, provided that your hands-free device also supports them:

- Answer an incoming call.
- Hang up a call and answer a call-waiting call.
- Place a call on hold and answer a call-waiting call.
- Hang up a single call.
- Transfer a call from the earpiece on your Treo device to the hands-free device.
- Ignore an incoming call.
- Redial the last number you called from the hands-free device.

**Selecting Ring tones**

You can set various tones for various types of incoming phone calls.

1. Press **Phone**.
2. Press **Menu**.
3. Select **Options** and then select **Sound Preferences**.
4. Select the **Application** pick list, and then select **Ring Tones**.
5. Select the **Volume** pick list, and then select the volume level.
6. Select the **Vibrate** pick list, and then select when you want the vibrate option to turn on.
7. (Optional) Check the **Escalate ring tone volume** box if you want the ringtone to play softly and then increase to full volume the longer it rings.
8. Select ringtones from the following pick lists:
   - **Known Caller** for an incoming call from someone in your **Contacts** or **Favorites**.
   - **Unknown Caller** for an incoming call from someone identified by caller ID who is not in your **Contacts** or **Favorites**.
   - **Roaming** for incoming calls when you’re outside the Sprint National Network.

9. Select **Done**.
Resetting Your Device

If your device is not responding or you have trouble synchronizing with your computer, a soft reset may help. All your information is retained when you perform a soft reset.

1. Press **Power/End** to turn off the screen.
2. Press the **battery door release**, and slide the battery door downward to remove it from your device.
3. Remove the **battery** from the battery compartment.
4. Align the **metal contacts** on the battery with the contacts inside the battery compartment, insert the battery at a 45-degree angle, and then press it into place.
5. Slide the **battery door** onto the back of your device until it clicks into place.

**Tip:** If the phone and Bluetooth signals were on before a reset, these signals automatically turn on after the reset.

If your device still does not respond after a soft reset, you may need to do a system reset or a hard reset. See the *User Guide*.

Synchronizing Information—The Basics

Synchronizing means that information that is entered or updated in one place (your device or your computer) is automatically updated in the other, so there’s no need to enter the information twice. We strongly recommend that you synchronize your Treo™ 755p Smart Device by Palm with your computer or corporate server frequently to keep your information up-to-date (and backed up) in both locations.

| Important: | **Windows XP users:** To sync your information, you must install the software from the Palm Software Installation CD that came with your device—even if you sync with Outlook (sold separately) or another third-party application. See the *User Guide* for information. |
| Important: | **Windows Vista users:** Before inserting the Palm Software Installation CD, please visit [www.palm.com/windowsvista](http://www.palm.com/windowsvista). You’ll find installation instructions, along with the most current information on using your device and desktop software with Windows Vista. |

Information from all the following applications is updated by default each time you synchronize your device with your desktop software:

- Calendar
- Contacts
- Memos
- Pics&Videos
- Tasks

| Tip: | You can also set up the VersaMail® application to synchronize email on your device with email on your computer. See the User Guide for the VersaMail Application at [www.palm.com/mypalm/755psprint](http://www.palm.com/mypalm/755psprint) for information. |
How each application syncs depends on your computer type and the desktop software you are using, as follows:

<table>
<thead>
<tr>
<th>Computer</th>
<th>Desktop</th>
<th>What Syncs and Where</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows</td>
<td>Outlook</td>
<td>- Calendar, Contacts, Memos, and Tasks sync with Outlook.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Pics&amp;Videos syncs with Palm Desktop software.</td>
</tr>
<tr>
<td>Windows</td>
<td>Palm Desktop software</td>
<td>All applications sync with Palm Desktop.</td>
</tr>
<tr>
<td>Mac</td>
<td>Palm Desktop software</td>
<td>All applications sync with Palm Desktop.</td>
</tr>
</tbody>
</table>

**Tip:** You can download a trial version of Microsoft Outlook and learn about discount offers by visiting: [www.palm.com/mypalm/755psprint-bonus](http://www.palm.com/mypalm/755psprint-bonus).

1. Connect your device to your computer. See the *User Guide* for instructions.

**Note:** If you’re performing initial setup, your device should already be connected to your computer and you should have already installed the desktop synchronization software from the Palm Software Installation CD.
2. Press the sync button on the sync cable.

Messages appear on both your device and your computer, indicating that synchronization is in progress.

3. Wait for messages indicating that the process is complete before you disconnect the sync cable.

If you’re finishing your initial setup, you now have the option to install bonus software on your device. See “Installing Applications” on page 68 for additional information on installing your bonus software.

**Note:** For more information on synchronization, as well as troubleshooting tips, see the *User Guide*. 
Personal Information Management

Managing Your Contacts

Adding a Contact

1. Press Phone 

2. Select the Contacts favorite button.

Tip: You can also open Contacts from Applications view.

3. Select New Contact.

4. Use the 5-way to move between fields as you enter information.

5. (Optional) Do any of the following:
   - Add a caller ID photo: Select the Picture box, and then do one of the following:
     1. Select Camera to take a picture and add it to this contact when you save the picture (camera version only).
     1. Select Photos to add an existing picture to this contact.
   - Add a caller ID ringtone: Select the Ringtone pick list and select a ringtone from the list to give incoming calls from this contact a distinctive ring.
   - Place the entry in a category or mark it private: Select Details (see the User Guide for more information).
   - Add a note to an entry: Select Note .
   - Display additional fields for this contact: Select Plus .

6. After you enter all the information, select Done.
Viewing or Changing Contact Information

1. In the Contacts list, begin entering one of the following for the contact you want to view or edit:
   - First name (JOH for John).
   - Last name (SMI for Smith).
   - First initial and last name (JSM for John Smith).

2. Select the name of the entry you want to open.

3. Select Edit.

4. Make changes to the entry as necessary, and then select Done.

Defining Your Business Card

1. Create a new contact with your own business card information.

2. Open the contact entry containing your business card information.

3. Press Menu (Menu).

4. Select Select Business Card from the Record menu.

After you define your business card, you can beam it to other Palm OS® devices. In Contacts or in any Phone view, press Menu (Menu) and select Beam Business Card from the Record menu.
Creating and Viewing Your Calendar

Displaying Your Calendar

- Press **Calendar** repeatedly to cycle through the various views:
  - **Agenda** view shows your daily schedule, the number of unread email messages, and any items on your Tasks list that are overdue or due today. If there’s room, **Agenda** view also shows your schedule for the next dates that have events scheduled.
  - **Day** view shows your daily schedule one day at a time.
  - **Week** view shows your schedule for an entire week. The time frames are based on the **Start Time** and **End Time** settings in Calendar Preferences.
  - **Month** view shows your schedule for a whole month.
- From any **Calendar** view, open the **Options** menu and select **Year** view to view a calendar for an entire year.
- From any **Calendar** view (except **Agenda** view), use the 5-way or stylus to move to another day, week, month, or year (based on the current view).
- From any **Calendar** view (except **Agenda** view), select **Go To**, and then select a date from the calendar.

| Tip: | You can customize your phone to display the most current **Calendar** event on the **Main** view in the **Phone** application. Press **Phone**, press **Menu**, and then select **Options**. Select **Phone Display Options** and check the **Show Calendar Event** box. |
Creating an Event

1. Press Calendar until Day view appears.
2. Press Left or Right to select the desired day.
4. Using the keyboard, enter a starting hour and minute for the event. (For example, enter 545 for 5:45.)
5. Select the End Time box, and then select the ending hour and minute for the event.
6. (Optional) To assign a time zone to the event, select the Time Zone pick list and select a city in the time zone you want.
7. Select OK.
8. Enter a description for the event.
Scheduling a Repeating Event

1. Create an event, and then select it.
2. Select Details.
3. Select the Repeat pick list, and then select a repeat interval. (If the interval you need doesn’t appear on the list, select Other to define a custom interval.)
4. For weekly events, select the day(s) the event is repeated; for monthly events, select Day or Date to indicate the repeating method.
5. If the event has an ending date, select the End on pick list, select Choose Date, and then select the ending date.
6. Select OK.

Tip: To enter a birthday or anniversary, add the information to the person’s Contacts entry and it automatically appears in your Calendar.

This Icon Indicates a Repeating Event
Managing Your Tasks

Adding a Task

1. Press **Applications** and select **Tasks**.

2. Select **New** to create a new task.

3. Enter a description of the task. (The text can be longer than one line.)

4. (Optional) Select **Details** to customize this task, or select **Note** to add a note to this task.

| Note: | Selecting **Details** lets you set a priority, category, due date, alarm, repeat interval, and privacy status for the selected task. |
Working With Your Pictures and Videos

Your device comes with an easy-to-use, built-in, 1.3-megapixel camera with 2x digital zoom (camera version only). You can also receive and view photos and videos, send photos and videos to other people as attachments or as Sprint Picture Mail, and use photos to personalize your device.

Taking a Picture

1. Press Applications and select Camera.

2. By default, the Camera application stores your pictures in the Palm album on your device. If you have an expansion card inserted into your device’s expansion card slot, the Camera application creates a Palm album on the card and stores pictures there. To store the picture in a different location, select the album pick list in the lower-right corner of the screen, and then do one of the following:
   - Select <Album name> to store the picture in the selected album. The storage location is based on the location of the album (device or expansion card).
   - Select New Albums to open a dialog box where you can enter an album name and select the storage location (device or expansion card).

3. (Optional) Adjust the zoom setting by pressing Up to select 2x or by pressing Down to select 1x.

4. Point the lens on the back of your device at the subject you want to photograph.
5. Press Center to take the picture.

6. Select one of the following icons:

   - Saves the picture in the location you selected in step 2.
   - Deletes the picture.
   - Lets you add an audio caption.

Opens a list of options for sending the picture:

- Select Send with PictureMail to send the picture as part of a Picture Mail message (see “Creating and Sending a Sprint Picture Mail Message” on page 85).
- Select Send with Online Services to send the picture using one of the available Sprint Vision Online Services (see the User Guide for information).
- Select Upload to Online Albums to upload the picture to your online album (see the User Guide for information).
Recording a Video

1. Press Applications ☰ and select Camcorder 📹.

2. By default, the Camcorder application stores your videos in the Palm album on your device. If you have an expansion card inserted into your device’s expansion card slot, the Camcorder application creates a Palm album on the card and stores videos there. To store the video in a different location, select the album pick list in the lower-right corner of the screen, and then do one of the following:
   - Select <Album name> to store the video in the selected album. The storage location is based on the location of the album (device or expansion card).
   - Select New Albums to open a dialog box where you can enter an album name and select the storage location (device or expansion card).

3. Adjust the position of your device until you see the subject you want to record on the screen.

4. Press Center ◄ to start recording.

5. After you finish recording, press Center ◄ again to stop.
6. Select one of the following icons:

- Begins playback.
- Saves the video in the location you selected in step 2.
- Deletes the video.
- Opens a dialog box where you can adjust the volume during playback.
- Opens a list of options for sending the video:
  - Select Send with PictureMail to send the video as part of a Picture Mail message (see “Creating and Sending a Sprint Picture Mail Message” on page 85).
  - Select Send with Online Services to send the video using one of the available Sprint Vision Online Services (see the User Guide for information).
  - Select Upload to Online Albums to upload the video to your online album (see the User Guide for information).

**Note:** The video recording screen displays the approximate recording time you have left, based on the space available on your device or expansion card. Actual recording time may vary depending on how fast you are moving, how many colors you are recording, and so on.
Viewing a Picture

In addition to viewing the pictures you capture with the built-in camera, you can view pictures captured on many popular digital cameras or downloaded from the Internet.

1. Press Applications and select Pics&Videos.
2. Select the album that contains the picture you want to see.
3. Select the picture you want to view.
4. Press Right or Left to scroll to the next item in the album.
5. If the picture has an audio caption, select to hear it.
6. Tap the photo or press Center to return to Thumbnail view.

Viewing a Video

In addition to viewing the videos you capture with the built-in camcorder, you can view videos captured on many popular digital video cameras.

1. Press Applications and select Pics&Videos.
2. Select the album that contains the video you want to see.
3. Select the video you want to view. Playback begins automatically.
4. Hold down Right or Left to seek within the current video, or press Right or Left to scroll to the next item in the album.
5. Tap the video or press Center to return to Thumbnail view.
Listening to Music

Setting Up Windows Media Player for MP3

On a Windows computer, you need to set Windows Media Player settings to save your music files in MP3 format in order for the files to be compatible with the Pocket Tunes™ music application on your device.

The version of Pocket Tunes that is included with your device is compatible with Windows Media Player version 9 and version 10; it is not compatible with Windows Media Player version 11.

1. Connect your device to your computer with the sync cable.
2. On your device, press Applications and select pTunes.
3. On your computer, open Windows Media Player, and then click the full-screen icon in the upper-right corner to maximize the window.
4. Click Tools and then click Options.
5. Click the Rip Music tab, click the Format pick list, and then select mp3. Click OK.
6. Click Tools and then click Options.
7. Click the Devices tab, select your Treo device from the Devices list, and then click Properties.

Note: For information on using your device and desktop software with Windows Vista, visit www.palm.com/windowsvista.
8. Click the **Quality** tab and uncheck the **Convert files as required by this handheld (recommended)** box. Click **Apply**.

9. Click **OK** and then click **OK** again.

**Setting Up iTunes for MP3**

On a Mac, use iTunes (included with OS X) to convert music from a CD to MP3 format. For more information on using the iTunes software, see the documentation that came with your Mac.

1. On your Mac, open **iTunes**.
2. Select **Preferences**.
3. Click the **Advanced** button at the top of the window, and then click **Importing**.
4. Click the **Import Using** pop-up menu and select **MP3 Encoder**.
5. (Optional) Click the **Setting** pop-up menu and select **Good Quality**.

**Transferring MP3 Files From Your Computer**

The Pocket Tunes software that comes with your device is compatible with the popular MP3 audio file format. If your MP3 files are already on your computer’s hard drive, you need to transfer them to your device to listen to them on your device.

If an expansion card is inserted into the device, on a Windows computer, Windows Media Player copies the MP3 files to the expansion card. If you don’t have an expansion card inserted, the MP3 files are copied to device memory.

If you are transferring MP3 files from a Mac computer, you must insert an expansion card into the device. You cannot transfer MP3 files to device memory from a Mac.

---

**Important:**

You must synchronize your device with your computer at least once before you can transfer MP3 files from your computer.
1. Connect your device to your computer with the USB sync cable.

2. On your device, press **Applications** and select **pTunes**.

3. If you are transferring from a Mac computer, insert an expansion card into your device. This step is optional for Windows users.

4. Do one of the following:
   - **Windows.** Open **Windows Media Player** on your computer. Select the **Sync** tab, and then select **Palm Handheld** from the drop-down list. Select **Start Sync**. The files are transferred to your device or to an expansion card automatically; do not press the sync button on the sync cable.
   - **Mac.** Drag and drop the MP3 files onto the **Send To Handheld** droplet in the **Palm** folder. Select your device name (username), the file name, and the destination (card). Click **OK**. Synchronize your device with your computer. Be patient; transferring music to an expansion card can take several minutes.

**Note:** There may be restrictions that prevent you from downloading, viewing, and/or copying a video or music file (for example, a DVD, CD, or MP3 file). You may also be prohibited from providing copies of the video or music file to any third person. It is your responsibility to ensure that you have obtained the legal right to use the video or music file for personal use and to honor any restrictions imposed by the original content providers.

**Tip:** You can also use a card reader accessory (sold separately) to transfer MP3 files from your computer to your expansion card. Create a **Music_Audio** folder in the root directory of the card, and store your MP3 files in this folder.
Listening to Music on Your Device

1. Press Applications and select pTunes.
2. Do any of the following:
   - To play the current song, select Play or press Space.
   - To play the next song, select Next Song.
   - To play the previous song, select Previous Song.
   - To play a different song, select Choose Songs and select a song from the list.
   - To adjust the volume during playback, press the Volume button on the side of your device.
   - To pause playback, select Pause.

Tip: You can also use the 5-way to navigate among songs, pause and resume playback, and adjust the volume during playback.
Pocket Tunes continues playing until it reaches the end of your list or until you select **Pause**. Music continues to play even if you switch to another application or turn off your screen. If you want to stop playing music when you exit Pocket Tunes, press **Menu**, select **Background Prefs** on the **Prefs** menu, uncheck the **Enable Background Playback** box, and then select **OK**.

| Tip:         | If you don’t hear anything when you play a song, make sure the **Ringer** switch is in the **Sound On** position. See “Silencing Sounds” on page 73 for more information. |
Working With Your Office Files

With the **Documents To Go®** application on your device, you can take your important office information with you. You can create, view, and edit Microsoft Word (DOC and TXT) documents and Excel (XLS) spreadsheets directly on your device. You can also view and manage PowerPoint (PPT) presentations and Adobe Acrobat (PDF) files.

**Note:** The version of Documents To Go that comes with your device does not support Microsoft Office 2007. To access Office 2007 files on your device, you must save the files in Office 2003 format. For information about an upgrade that supports Office 2007, go to [www.dataviz.com/office2007](http://www.dataviz.com/office2007) (additional fees may apply).

**Opening a Document**

1. Press **Applications** and select **Documents**.
2. Select the document you want from the list.

**Tip:** If you install the Documents To Go desktop software (from [www.palm.com/mypalm/755psprint](http://www.palm.com/mypalm/755psprint)), you can use Documents To Go to transfer files to your device when you synchronize. For complete information on the **Documents To Go** application, install the Documents to Go desktop software, click the **Documents To Go** icon on your computer, and then click **Help**; or go to [www.dataviz.com](http://www.dataviz.com).
Installing Applications

Your device comes with several built-in and ready-to-use applications. You can also install free bonus software, such as business software, games, and more. You can install the bonus software wirelessly, using the My Treo application on your device. You can also download the bonus software from www.palm.com/mypalm/755psprint-bonus to your computer and then synchronize to install it on your device. You can use similar methods to purchase and install other third-party Palm OS® applications as well.

Installing Bonus Software From My Treo on Your Device

My Treo lets you download and install bonus software that you can use on your device. If the bonus software has both a desktop component in addition to a device component, you need to download the software to your computer first. See “Installing Bonus Software From My Palm on Your Computer” on page 69 for details.

1. Press Applications and select My Treo.
2. Select the Bonus tab.
3. Select the Install link below the name of the application you want to install.
4. Repeat step 3 to install additional applications.

Installing applications from the Internet

You can use the Web browser on your smart device to install Palm OS files (PRC or PDB) directly from the Internet. When you download a PRC or PDB file, it is automatically installed on your smart device. If a file is compressed (ZIP or SIT), you need to download it to your computer and expand the file before installing it on your smart device.

Note: The instructions in this section tell you how to install basic PRC (Palm OS application) and PDB (Palm OS database) files on your smart device. Some Palm OS software uses an installer or wizard to guide you through the process. For details, consult the documentation that came with the software.
1. Open the Web browser (see “Viewing a Web Page” on page 88).
2. Go to the page that contains the link to the application you want to download.
3. Press Left ◀ or Right ▶ to highlight the link to the file, and then press Center ⋄ to initiate the download process.
4. Follow the onscreen instructions to accept and install the application.

Installing Bonus Software From My Palm on Your Computer

Some bonus software applications require the installation of a desktop component. To install these applications, you must first install Palm® Desktop software from the Palm Software Installation CD that came with your device, and then download the applications to your computer.

2. Follow the onscreen instructions to download the applications you want to install.
3. Synchronize your device with your computer to install the application(s) on your device.

Installing Other Third-Party Applications From a Computer

To install other third-party applications from a computer, you must first install Palm Desktop software from the Palm Software Installation CD that came with your device.

| Important: Windows Vista users: Before inserting the Palm Software Installation CD, please visit www.palm.com/windowsvista. You’ll find installation instructions, along with the most current information on using your device and desktop software with Windows Vista. |

When you download an application to your computer, it may be in a compressed format such as a ZIP or SIT file. If the file is compressed, you need to use a decompression utility on your computer, such as WinZip or Allume StuffIt Expander, before you install the application on your device.
1. On a Windows computer, drag and drop the application file(s) onto the Palm™ Quick Install icon on the Windows desktop.
   On a Mac computer, drag and drop the application file(s) onto the Send To Handheld droplet in the Palm folder.

2. Select your device name from the User list, and then click OK.

3. Synchronize your device with your computer to install the application(s) on your device.

Tip: You can open a window that lets you select whether to install files on your device or on an expansion card. On a Windows computer, double-click the Palm Quick Install icon. On a Mac computer, open the HotSync menu and select Install Handheld files.
Using Expansion Cards

The expansion card slot on your device enables you to insert miniSD cards (sold separately) to extend the storage capacity of your device. For example, expansion cards can store pictures, MP3 files, email attachments, games, eBooks, Microsoft Office files, Adobe Acrobat files, applications, databases, and more.

Inserting an Expansion Card

1. Open the door of the expansion card slot.
2. Hold your device with the screen facing you, and hold the card with the label facing you. (The notch on the card should be in the lower-left corner next to the keyboard.)
3. Insert the card into the expansion card slot until you feel the card lock into place.
4. Close the door of the expansion card slot.

Removing an Expansion Card

1. Open the door of the expansion card slot.
2. Press the card into the expansion card slot to release it from the slot.
3. After you feel the expansion card slot eject the card, remove it from the slot.
4. Close the door of the expansion card slot.

**Tip:** Your device has a push-push mechanism: push in gently to insert a card; push in gently to remove it.

If the Ringer switch is in the Sound On position, you hear a confirmation tone when you insert or remove an expansion card.
Opening Applications on an Expansion Card

1. Insert the expansion card into the expansion card slot. Applications view automatically appears.
2. Select the icon for the application you want to open.
3. Press Center to open the application.

Copying Applications Between an Expansion Card and Your Device

1. Make sure the card is not write-protected. (For details, see the instructions that came with your card.)
2. Press Applications.
3. Press Menu.
4. Select Copy on the App menu.
5. Select the Copy To pick list and select the destination: <card name> or Phone.
6. Select the From pick list and select the location of the application you want to copy: <card name> or Phone.
7. Highlight the application you want to copy.
8. Select Copy.
Customizing Your Device

Silencing Sounds
You can immediately silence all alerts, ringtones, music that plays through the built-in speaker, and system sounds by sliding the Ringer switch to **Sound Off**. This does not, however, mute the audio during a phone call.

1. Slide the Ringer switch to **Sound Off**. Your device vibrates once to let you know that you’ve turned sounds off.
2. To hear all sounds again, slide the Ringer switch to **Sound On**.

When you slide the Ringer switch back to **Sound On**, it restores the previous sound settings.

Tip: Your device includes a silent alarm that can vibrate even when the Ringer switch is in the **Sound Off** position. For information on setting the vibrate option, see the *User Guide*.
Adjusting the Brightness

Depending on the lighting conditions when you’re using your device, you may need to adjust the brightness of the screen and keyboard backlight.

1. Press Option and then press Backlight.

2. Press Left and Right to adjust the brightness.

3. Select Done.

Aligning the Screen

Occasionally, if the wrong feature is activated when you tap the screen, your device screen may need to be readjusted.

1. Press Applications and select Prefs.

2. Select Touchscreen.

3. Follow the onscreen instructions and tap the screen where indicated.

4. Select Done.
Locking Your Keyboard and Screen

Tip: In addition to locking your keyboard and screen as described here, you can also lock your phone, your device, and individual entries. See the User Guide for details.

Locking Your Keyboard (Keyguard)

The Keyguard feature locks the keyboard so that buttons aren’t accidentally pressed or items on the screen aren’t activated while your device is in a pocket or bag.

By default, Keyguard turns on whenever the screen is off. Each time you wake up the screen, you must turn off Keyguard to unlock the keyboard and use your device.

To turn off Keyguard, do the following:

1. If the screen is off, press Power/End to wake up the screen.
2. Press Center to turn off Keyguard.

   To turn on Keyguard, press Option and then press Power/End.

You can change how quickly Keyguard turns on, or you can disable the feature altogether. To change the Keyguard settings, do the following:

1. Press Applications and select Prefs.
2. Select Keyguard.
3. Select the **Auto-Keyguard** pick list, and then do one of the following:
   - Select how quickly you want **Keyguard** to turn on: **When power is turned off**, **5 seconds after power off**, or **30 seconds after power off**.
   - Select **Disabled** to completely disable the **Keyguard** feature until you turn it on again.

4. Select **Done**.

**Locking Your Screen**

You can set your device to automatically lock the screen’s touch-sensitive features in certain situations.

1. Press **Applications** and select **Prefs** .
2. Select **Keyguard**.
3. Do one or both of the following:
   - Check the **Incoming calls received** box to disable the screen when the phone rings. When this box is checked, you must use the **5-way** to select the onscreen **Answer** and **Ignore** buttons, or press **Talk** to answer the call or **Power/End** to ignore the call.
   - Check the **On a call** box to disable the screen after you answer a call. When this box is checked, you must use the **5-way** to select the onscreen buttons during the call. Use this setting to avoid accidentally activating onscreen buttons while you’re holding your device near your ear to speak.
4. Select **Done**.
Wireless Features

- Beaming Information
Using Sprint Vision

Sprint Vision provides wireless access to the Internet anywhere on the Sprint National Network. To sign up for Sprint Vision services or to access complete instructions, visit www.sprint.com.

Enabling Sprint Vision

1. Make sure your device’s phone is turned on, as described in “Turning Your Device’s Phone On and Off” on page 17.

2. Press Option and then press Phone.

3. When the Connect to the Internet dialog box appears, select Yes to open your device’s Web browser and make a Sprint Vision connection.
   - If you have not already done so, select Now when the Preparing Vision Services dialog box appears. This initiates a one-time process to configure your Sprint Vision services. At the end of this two-minute process, your device connects to the Sprint Vision home page.
   - If you want to cancel the connection, select No.

4. Use the 5-way to scroll around and select from a variety of online services.

5. Press Applications to exit the browser and end your session.
Sprint Vision Features

With Sprint Vision services, you have access to additional features, better performance, faster Web connections, and a wider variety of online services. Features such as Web access and sending/receiving digital images are available on your Treo™ 755P smart device by Palm through the Sprint National Network.

- **Sprint Picture Mail**<sup>SM</sup> lets you instantly shoot, share, and print sharp, high-resolution digital pictures, and take and send short video clips with your device.
- **Messaging** lets you send and receive email, text, and multimedia messages, or chat.
- **Sprint TV**<sup>SM</sup> lets you watch live Mobile Digital TV (MDTV) on the go with full-motion video and vivid sound.
- **Web** lets you experience full-color graphic versions of popular Web sites.
- **On Demand** lets you set and then receive customized, up-to-date information on sports, weather, news, money, and more, on demand—the way you want it.
Working With Sprint Power Vision

Sprint Power Vision combines unmatched visual and sound clarity with broadband-like speeds on your wireless phone. Utilizing the fastest commercially available wireless network technology (1x and EVDO) and leveraging continued investment in handset and application development, Sprint Power Vision offers the ultimate in wireless entertainment, real imaging solutions, instant communication, and personalized information at broadband-like speeds. Your device is equipped with the latest in multimedia, imaging, and processing technology, and offers exclusive services, such as Sprint TV and On Demand. If you sign up for the Sprint Power Vision Phone as Modem plan, you can also use your device’s phone as a modem to access the Internet from your computer.

For information on the On Demand service and using your phone as a modem, see the Experience Sprint Power Vision guide.
Using Email

What Email Applications Can I Use on My Smart Device?

Your device includes two email application options:

- The VersaMail® application.
- Good Mobile Messaging™.

You can also access Web-based email from your device’s Web browser.

For information on setting up Good Mobile Messaging and the Web browser to work with email, see the Setting Up Email booklet.

**Note:** An email application is not an email provider. It works with an account from a provider—your Sprint account, for example—or a corporate account to transfer messages to your device.

The VersaMail Application

VersaMail enables you to access up to eight email accounts—personal or corporate. Before you can use VersaMail, you need to enter your email account settings. Then see the *User Guide for the VersaMail® Application* at [www.palm.com/mypalm/755psprint](http://www.palm.com/mypalm/755psprint) for information on sending and receiving messages and customizing your VersaMail settings.

**How Do I Get Started?**

1. If you’re entering settings for an email account on a Microsoft Exchange server, a Lotus Notes server, or a Microsoft MAPI server, see the *User Guide for the VersaMail Application* at [www.palm.com/mypalm/755psprint](http://www.palm.com/mypalm/755psprint) for setup steps.

2. If your email provider is listed here, skip to “Setting Up VersaMail to Work With Common Providers” on page 83.
<table>

3. If your email provider’s name is not listed in step 2, see the *User Guide for the VersaMail Application* at [www.palm.com/mypalm/755psprint](http://www.palm.com/mypalm/755psprint) for setup steps.
Setting Up VersaMail to Work With Common Providers

1. Press Applications and select Email.

2. If the Initial Setup dialog box appears, select Continue.

3. Make up a name that describes this account and enter it in the Account Name field. For example, Work Email.

   **Tip:** If the Account Setup screen does not appear, press Menu, select Accounts, select Account Setup, and then select New.

4. Select the Mail Service pick list, select your email provider, such as Earthlink, and then select Next.

5. Enter the username for your email account. (Your username appears before the @ symbol in your email address.)

6. Select the Password box, enter your email account password, select OK, and then select Next.

7. Select Next and then select Done.

8. If prompted, select Yes to overwrite settings for this account.

9. On the Account Setup screen, select OK to go to the Inbox of this account.
Sending and Receiving Text and Picture Mail Messages

You can exchange brief text messages with other wireless phones that have text messaging capability. You can also send Sprint Picture Mail messages (including images, videos, voice memos, and text) to other users. Before you use your device to send or receive messages, please verify pricing and availability with Sprint, and make sure your phone is turned on, as described in “Turning Your Device’s Phone On and Off” on page 17.

Creating and Sending a Text Message

1. Press Messaging \(\text{_emails}\).
2. Select New.
3. Select the To field to address the message:
   - Press Center \(\text{center}\). If the recipient’s name appears in the list of recent addresses, select it from the list.
   - If the recipient is in your Contacts list, enter the first initial and last name (no spaces), and then select the recipient’s phone number or email address, depending on where you want to send the message.
   - If the recipient’s name isn’t in the list of recent addresses or your Contacts list, enter the phone number or email address.

   **Tip:** If you see numbers when you expect to see letters (or the other way around), you need to turn Option Lock on by pressing Option twice or turn it off by pressing Option once.

4. Press Down \(\text{down}\) to jump to the body of the message.
5. Enter your message or select QuickText \(\text{quicktext}\) to insert predefined phrases. To insert emoticons, select \(\text{emoticons}\).
6. Select Send.
Creating and Sending a Sprint Picture Mail Message

Sprint Picture Mail messages consist of pictures, videos, text, and sounds. You can include pictures and videos you captured with the built-in camera (camera version only) as well as any of the following items:

- Pictures.
- Videos.
- Text messages.
- Voice memos.

The first time you share a picture or video, you are prompted to establish a Sprint Picture Mail account and password. Enter a four- to eight-digit, alphanumeric password and press Center. Once you receive confirmation, you can continue to send or upload pictures and videos.

1. Press Messaging.
2. Select New.
3. Select the To field to address the message:
   - Press Center. If the recipient’s name appears in the list of recent addresses, select it from the list.
   - If the recipient is in your Contacts list, enter the first initial and last name (no spaces), and then select the recipient’s phone number or email address, depending on where you want to send the message.
   - If the recipient’s name is not in the list of recent addresses or in your Contacts list, enter the mobile number or email address.

**Tip:** You may need to press Option to enter letters or numbers. The Option Lock setting defaults to the setting you used the last time you addressed a message.
4. Select **Add media**.

5. Select the **Media** icon and select one of the following:
   - **Attach from device** lets you attach a picture or video from your device.
   - **Attach from Online** lets you attach a picture or video from your online album. See the *User Guide* for information.
   - **Take new picture** prompts you to take a new picture with the built-in camera and attach it to the message (camera version only).
   - **Take new video** prompts you to capture a new video with the built-in camcorder and attach it to the message (camera version only).

6. Repeat step 5 for each item you want to attach.

7. Enter your message or select **QuickText** to insert predefined phrases. To insert emoticons, select 😊.

8. Select **Send**.

Your device uploads the pictures or videos to the Sprint Picture Mail Web site ([www.sprint.com/picturemail](http://www.sprint.com/picturemail)), creates a private Guest Book for the recipient on the Sprint Picture Mail Web site, and sends your message to the recipient.
Receiving Messages

When your phone is on and is in an area of wireless coverage, you automatically receive new text messages.

The new message alert may include any of the following buttons:

- **OK** dismisses the alert and places the message in your Inbox.
- **Reply** opens Chat view, where you can reply to a text message. To send a multimedia message reply, select **Add** from Chat view.
- **Call Back** dials the sender’s phone number.
- **Go To Msg** opens the message so you can view its full contents.
- **Go To URL** opens the Web browser so you can view the full contents of the message in your online Sprint Picture Mail account. See the *User Guide* for details.
- **Delete** removes the received message from your device.
Browsing the Web

Viewing a Web Page

The Web browser optimizes Web pages for your device, so that you can see most of the content without scrolling left or right.

1. Make sure your phone is turned on (see “Turning Your Device’s Phone On and Off” on page 17).

2. Press Applications and confirm that data services are available. You should see either the or the icon.

4. Enter a Web page address (URL) in the address bar and select Go. If you browse to a secure Web page, a lock appears in the address bar.

5. Do any of the following to navigate within the Web page:
   - **View a page in wide layout format** (as on your computer): Press Menu, select Options, and then select Wide Page Mode.
   - **Scroll through the page:** In Optimized Mode (the default format, which is optimized for your device screen), press Up or Down. In Wide Page Mode, press Up, Down, Left, or Right to scroll in all directions.

**Note:** If you do not see either of the above icons, data services are not available in your current location and you cannot connect to the Internet.
- **Follow a link to another Web page**: In Optimized Mode, highlight the link by pressing Up ▲, Down ▼, Left ◀, or Right ▶, and then press Center ○ to go to the selected page.

  **Tip:** In Wide Page Mode, use the stylus to tap a link.

- **Submit a form**: Enter the information and then select the onscreen button to submit the form. If the form doesn’t have an onscreen button, press Return ◘.

6. Use the 5-way ◐ to access any of the following icons in the title bar:

  **Tip:** To quickly jump to the title bar from anywhere on a Web page, press Space to go to the address bar, and then press Up on the 5-way.

- ![Home icon](image.png) Goes to your home page.
- ![Globe icon](image.png) Opens a dialog box where you can enter a Web address you want to go to or view a list of recently viewed Web pages.
- ![Prev icon](image.png) Goes to the previous Web page.
- ![Next icon](image.png) Goes to the next Web page.
- ![Reload icon](image.png) Refreshes the page with the latest content from the Internet.
- ![Fast icon](image.png) Opens a list where you can select Fast Mode (no images or style sheets) or Normal Mode (with images and style sheets).
**Downloading Files From a Web Page**

The Web browser lets you download files that are recognized by one of the applications on your device.

<table>
<thead>
<tr>
<th>Item</th>
<th>Supported File Types</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pictures</td>
<td>JPEG, BMP, WBMP, GIF, PNG</td>
</tr>
<tr>
<td>Videos</td>
<td>MP4, 3G2, ASF</td>
</tr>
<tr>
<td>Ringtones</td>
<td>MIDI, QCELP, AAC, AAC+</td>
</tr>
<tr>
<td>Music</td>
<td>MP3</td>
</tr>
</tbody>
</table>

1. Go to the page that contains the link to the file you want to download.
2. Press **Left** or **Right** to highlight the link to the file, and then press **Center**.
3. If prompted, select what you want to do with the file: **Play**, **Save To Device**, or **Save To Card**.
4. Select **Yes**.
Creating Bookmarks

With bookmarks, you can quickly access a Web page without entering the address every time.

1. Navigate to the Web page you want to bookmark.
2. Press Menu.
3. Select Add Bookmark from the Page menu.
4. (Optional) Change the entries in the Name and Description fields.
5. Select OK and then select OK again.

Viewing a Bookmark

1. Select the Bookmarks view icon at the top of a Web page.
2. Select the bookmark or saved page you want to view.
Watching Sprint TV

The Sprint TV application enables you to view streamed audio and video media from various channels on your device.

Accessing Streamed Media

1. Press **Applications** and select **Sprint TV**.
2. On the **Media Player** screen, select the channel list you want.
3. To stream audio or video content, select a channel. The 🎧 icon indicates audio content; the 🎥 icon indicates video content. The 📀 icon indicates that the channel contains multiple content items. Select the channel to view all items.

Tip: Select the arrows to the left and right of the channel list name to scroll to other channel lists. Select the Web browser’s **home** icon to return to the **Media Player** screen.
Viewing Streamed Media

Once you connect to the server, playback begins immediately. Use the following controls when viewing or listening to streaming media:

- Select ← to return to the channel list.
- Select ▪ or press Center □ to pause playback of nonlive content such as videos on demand.
- Select ○ or press Center □ to stop playback of live content.
- Select ▶ or press Center □ to resume playback after pausing.
- Select ▵ or press Left ◀ to view the channel list with the first channel highlighted.
- Select ▼ or press Right ▶ to view the channel list with the last channel highlighted.
- Select △ to zoom the image in and out.
- A few seconds after playback begins, the toolbar is hidden and you can view the content on the full screen. Press Up ▲ or Down ▼ to display the toolbar; press Up ▲ or Down ▼ again to hide the toolbar again.
- Press the Volume button on the side of your device to adjust the volume.
Connecting to Devices With Bluetooth® Wireless Technology

With your device’s built-in Bluetooth® wireless technology, you can connect to a number of Bluetooth devices, such as a headset, car kit, printer, or GPS receiver, as well as to other phones and handhelds that are equipped with Bluetooth wireless technology. If your computer is enabled with Bluetooth wireless technology, you can also synchronize wirelessly or use your device as a wireless modem. See the User Guide for details.

You can create a list of Bluetooth devices that you trust to communicate with your Treo device. When communicating with trusted devices, your Treo device skips the discovery process and creates a secure link as long as the Bluetooth device is within range. Bluetooth range is up to 30 feet (10 meters), depending on environmental conditions, including obstacles, radio interference from nearby electronic equipment, and other factors.

Entering Basic Bluetooth Settings

To use your Treo device’s Bluetooth functionality, you need to turn the Bluetooth feature on, and you may need to make your device either temporarily or permanently visible. You can also enter a name for your device.

1. Press Applications and select Bluetooth.
2. Select Bluetooth On.
3. (Optional) Enter a device name that identifies your Treo device when it is discovered by other Bluetooth devices.

**Note:** Use the same device name for all your Bluetooth connections. If you change the device name, you need to recreate any partnerships you have already created.
4. Select the **Visibility** pick list and select one of the following:

- **Visible** enables Bluetooth devices that are not on your **Trusted Device** list to request a connection with your device. Your device remains accessible to other devices until you turn this option off.

- **Temporary** enables Bluetooth devices that are not on your **Trusted Device** list to request a connection with your device during the next two minutes. Your device reverts to the **Hidden** setting and becomes inaccessible to other devices after two minutes.

  | Important: | For your Treo device to be visible to other Bluetooth devices, the Bluetooth setting must be set to **On**, and visibility must be set to **Visible** or **Temporary**. Your Treo device screen does not need to be turned on. If you are requesting a connection with another device, or if you are accepting a request from a trusted device, your Treo device can be set to any of the **Visibility** options.

- **Hidden** allows only devices with which you have previously formed a partnership to request a connection with your Treo device. New devices cannot request a connection.

**Requesting a Connection With Another Bluetooth Device**

1. Press **Applications** and select **Bluetooth**.

2. If you have not already done so, enter the basic Bluetooth settings as described in “Entering Basic Bluetooth Settings” on page 94.

3. Select **Setup Devices**.
4. Select **Trusted Devices**.

5. Select **Add Device**. (The **Discovery** icon appears, indicating that the discovery process is active.)

6. Select the **Show** pick list and select **Nearby devices**.

7. If the device you want to add doesn’t appear in the discovery results list, make sure that the other device is ready to receive a connection request (see the device’s documentation), and then select **Find More** on your Treo device.

8. Enter the same passkey on your Treo device and on the Bluetooth device, and then select **OK**.

```
**Important:** Some Bluetooth devices have a predefined passkey. If your device has a predefined passkey, you can find the passkey in the documentation for that device. Other Bluetooth devices provide a screen where you enter a passkey that you make up. In either case, you must use the same passkey on both your Treo device and your Bluetooth device. We recommend that, where possible, you make up a passkey of 16 alphanumeric characters (letters and numerals only) to improve the security of your Treo device. The longer the passkey, the more difficult it is for the passkey to be deciphered.
```

9. Select **Done**.

```
**Tip:** To accept a connection request from another Bluetooth device, enter the correct settings as described in “Entering Basic Bluetooth Settings” on page 94, and then enter the same passkey on your Treo device and on the Bluetooth device. If you want to form a partnership with the requesting device, check the Add to trusted device list box. Select OK.
```
Beaming Information

Your device is equipped with an IR (infrared) port that enables you to beam information to another Palm OS device with an IR port. The IR port is located on the side of your smart device, above the expansion card slot, behind the small dark shield.

For best results, the path between the two devices must be clear of obstacles.

Beaming an Entry or a Category

1. Select the entry or category you want to beam. (You cannot beam an item that has a lock next to it.)
2. Press Menu.
3. From the Record menu, select Beam to send an individual entry, or select Beam Category to send all entries in the current category.
4. When the Beam Status dialog box appears, point the IR port on your Treo device directly at the IR port of the receiving device.
5. Wait for the Beam Status dialog box to indicate that the transfer is complete before you continue using your Treo device.

Tip: You can beam your business card. From the Main view in the Phone application, press Menu, and then press M. You can also beam an application; see the User Guide for information.
Receiving Beamed Information

1. Turn on your screen.

2. Select the beam command on the transmitting device.

3. Point the IR port on your Treo device directly at the IR port of the transmitting device to open the **Beam Status** dialog box.

4. When the **Beam Status** dialog box appears, select a category or an expansion card. (If you don’t select a category, the item is placed in the Unfiled category.)

5. Select **Yes** to receive the information or **No** to refuse it.
Important Safety Information

In This Section

- General Precautions
- Maintaining Safe Use of and Access to Your Device
- Using Your Phone With a Hearing Aid Device
- TTY Use With Sprint Service
- Caring for the Battery
- Radiofrequency (RF) Energy
- Static Electricity, ESD, and Your Device
- Owner’s Record
- User’s Guide Proprietary Notice

This guide contains important operational and safety information that will help you safely use your Treo™ 755p Smart Device by Palm. Failure to read and follow the information provided in this guide may result in serious bodily injury, death, or property damage.
General Precautions

There are several simple guidelines to operating your device properly and maintaining safe, satisfactory service.

- Speak directly into the microphone.
- Avoid exposing your device and accessories to rain or liquid spills. If your device does get wet, immediately turn the power off and remove the battery.
- Although your device is quite sturdy, it is a complex piece of equipment and can be broken. Avoid dropping, hitting, bending, or sitting on it.
- Any changes or modifications to your device not expressly approved in this document could void your warranty for this equipment and void your authority to operate this equipment.

**Note:** For the best care of your device, you must allow only Sprint authorized personnel to service your device and accessories. Failure to do so may be dangerous and void your warranty.
Maintaining Safe Use of and Access to Your Device

Do Not Rely on Your Device’s Phone for Emergency Calls

Wireless phones such as the one on your Treo device operate using radio signals, which cannot guarantee connection in all conditions. Therefore you should never rely solely upon any wireless phone for essential communication (for example, medical emergencies). Emergency calls may not be possible on all cellular networks or when certain network services and/or phone features are in use. Check with your local service provider for details.

Using Your Phone While Driving

Talking on your phone while driving (or operating the phone without a hands-free device) is prohibited in some jurisdictions. Laws vary as to specific restrictions. Remember that safety always comes first.

Tip: Purchase an optional hands-free accessory at your local Sprint Store, or call the Sprint Accessory Hotline at 1-800-974-2221 or by entering #222 on your device.

Following Safety Guidelines

To operate your device safely and efficiently, always follow any special regulations in a given area. Turn your device’s phone off in areas where use is forbidden or when it may cause interference or danger.

Using Your Device’s Phone Near Other Electronic Devices

Most modern electronic equipment is shielded from radiofrequency (RF) signals. However, RF signals from wireless phones may affect inadequately shielded electronic equipment. RF signals may affect improperly installed or inadequately shielded electronic operating systems and/or entertainment systems in motor vehicles. Check with the manufacturer or their representative to determine if these systems are adequately shielded from external
RF signals. Also check with the manufacturer regarding any equipment that has been added to your vehicle.

Consult the manufacturer of any personal medical devices, such as pacemakers and hearing aids, to determine if they are adequately shielded from external RF signals.

**Note:** Always turn off the phone in health care facilities and request permission before using the phone near medical equipment.

**Turning Off Your Phone Before Flying**

Turn off your phone before boarding any aircraft. To prevent possible interference with aircraft systems, the U.S. Federal Aviation Administration (FAA) regulations require you to have permission from a crew member to use your phone while the plane is on the ground. To prevent any risk of interference, FCC regulations prohibit using your phone while the plane is in the air.

**Turning Off Your Phone in Dangerous Areas**

To avoid interfering with blasting operations, turn your phone off when in a blasting area or in other areas with signs indicating that two-way radios should be turned off. Construction crews often use remote-control RF devices to set off explosives.

Turn your phone off when you’re in any area that has a potentially explosive atmosphere. Although it’s rare, your phone and accessories could generate sparks. Sparks can cause an explosion or fire, resulting in bodily injury or even death. These areas are often, but not always, clearly marked. They include:

- Fueling areas such as gas stations.
- Below deck on boats.
- Fuel or chemical transfer or storage facilities.
- Areas where the air contains chemicals or particles such as grain, dust, or metal powders.
- Any other area where you would normally be advised to turn off your vehicle’s engine.
Restricting Children’s Access to Your Device

Your Treo device is not a toy. Do not allow children to play with it, because they could hurt themselves and others, damage the device and/or its phone, or make calls that increase your Sprint invoice.

Note: Never transport or store flammable gas, flammable liquid, or explosives in the compartment of your vehicle that contains your phone or accessories.
Using Your Phone With a Hearing Aid Device

Your Treo device is compliant with the FCC Hearing Aid Compatibility (HAC) requirements. For additional HAC information, including the HAC rating of this product, please refer to www.palm.com/treoHAC.

Your device has been tested for hearing aid device compatibility. When some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate.

The wireless telephone industry has developed ratings for some of their mobile phones, to assist hearing-device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that have been rated have a label on the box. Your Treo 755p Smart Device by Palm phone has an M3 and T3 rating.

These ratings are not guarantees. Results will vary, depending on the level of immunity of your hearing device and the degree of your hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

**M-Ratings:** Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference with hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

**T-Ratings:** Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device’s telecoil (“T Switch” or “Telephone Switch”) than unrated phones. T4 is the better/higher of the two ratings. (Note that not all hearing devices contain telecoils.)

The more immune your hearing aid device is, the less likely you are to experience interference noise from your wireless phone. Hearing aid devices should have ratings similar to those of phones. Ask your hearing health-care professional for the rating of your
hearing aid. Add the rating of your hearing aid and your phone to determine probable usability:

- Any combined rating equal to or greater than six offers best use.
- Any combined rating equal to five is considered normal use.
- Any combined rating equal to four is considered usable.

Thus, if you pair an M3 hearing aid with an M3 phone, you will have a combined rating of six for “best use.” This is synonymous for T ratings.

Sprint Nextel further suggests that you experiment with multiple phones (even those not labeled M3/T3 or M4/T4) while in the store to find the one that works best with your hearing aid device. If you experience interference or find the quality of service unsatisfactory after purchasing your device, promptly return it to the store within 30 days of purchase. With the Sprint 30-day Risk-Free Guarantee, you may return the device within 30 days of purchase for a full refund.

**Getting the Best Hearing Device Experience With Your Device**

To further minimize interference:

- There is usually less interference on the microphone setting than on the telecoil setting.
- Set the phone’s screen and keyboard backlight settings to ensure the minimum time interval.
- Move the phone around to find the point with the least interference.
- If your hearing aid is equipped with a telecoil, turn on the HAC setting on your device.

**Turning on the HAC Setting**

When the HAC setting is on, your device sends the audio from your phone calls to the telecoil rather than to the microphone of your hearing aid. You are likely to hear calls much better because volume is increased and background noise and feedback are diminished. The HAC setting improves only the calls you listen to through the earpiece. It does not affect calls heard on the speakerphone or with a car kit or headset. HAC requires extra battery power, so watch your battery consumption when it's turned on.
1. Make sure your phone is turned on (see “Turning Your Device’s Phone On and Off” on page 17).

2. Press Phone.

3. Press Menu.

4. Select Options and then select Phone Preferences.

5. Check the Hearing Aid Compatibility box.

6. Select OK.

Caution: Do not turn on the HAC setting unless you use a hearing aid with a telecoil. Using this setting without a hearing aid or with a hearing aid without a telecoil may be harmful to your hearing.
TTY Use With Sprint Service

A TTY (also known as a TDD or Text Telephone) is a telecommunications device that allows people who are deaf or hard of hearing, or who have speech or language disabilities, to communicate by telephone.

Your device is compatible with select TTY devices. You can connect a TTY/TDD machine, headset, or hands-free kit to your device through the headset jack while this mode is enabled. Please check with the manufacturer of your TTY device for connectivity information and to ensure that the TTY device supports digital wireless transmission.

When establishing your Sprint service, please call Sprint Customer Service via the state Telecommunications Relay Service (TRS) by first pressing 711 and then pressing Talk. Then provide the state TRS with this number: 866-727-4889.

<table>
<thead>
<tr>
<th>WARNING:</th>
<th>911 Emergency Calling</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sprint recommends that TTY users make emergency calls by other means, including Telecommunications Relay Services (TRS), analog cellular, and landline communications. Wireless TTY calls to 911 may be corrupted when received by public safety answering points (PSAPs), rendering some communications unintelligible. The problem encountered appears to be related to TTY equipment or software used by PSAPs. This matter has been brought to the attention of the FCC, and the wireless industry and PSAP community are currently working to resolve this.</td>
<td></td>
</tr>
</tbody>
</table>
Selecting a TTY Setting on your Device

1. Make sure your phone is turned on (see “Turning Your Device’s Phone On and Off” on page 17).

2. Press Phone.

3. Press Menu.

4. Select Options and then select Phone Preferences.

5. Check the TTY/TDD pick list and select one of the following:
   - Default Mode sends and receives text.
   - VCO Mode (Voice Carry Over) sends voice and receives text.
   - HCO Mode (Hearing Carry Over) sends text and receives voice.

6. Select OK.
Caring for the Battery

Protecting Your Battery

The guidelines listed here help you get the most out of your battery’s performance.

- Recently there have been some public reports of wireless phone batteries overheating, catching fire, or exploding. It appears that many, if not all, of these reports involve counterfeit or inexpensive, aftermarket-brand batteries with unknown or questionable manufacturing standards. Sprint is not aware of similar problems with Sprint Treo devices resulting from the proper use of batteries and accessories approved by Sprint or the manufacturer of your phone. Use only Sprint or manufacturer-approved batteries and accessories found at Sprint Stores or through your device’s manufacturer, or call 1-866-343-1114 to order. They’re also available at www.sprint.com — click the Accessories link under Shop & Browse. Buying the right batteries and accessories is the best way to ensure that they’re genuine and safe.

- To avoid damage, charge the battery only in temperatures that range from 32° F to 113° F (0° C to 45° C).

- Don’t use the battery charger in direct sunlight or in high humidity areas, such as the bathroom.

- Never dispose of the battery by incineration.

- Keep the metal contacts on top of the battery clean.

- Don’t attempt to disassemble or short-circuit the battery.

- The battery may need recharging if it has not been used for a long period of time.

- It’s best to replace the battery when it no longer provides acceptable performance. It can be recharged hundreds of times before it needs replacing.
Don’t store the battery in high temperature areas for long periods of time. It’s best to follow these storage rules:

- Less than one month:
  -4° F to 140° F (-20° C to 60° C)
- More than one month:
  -4° F to 113° F (-20° C to 45° C)

**Disposal of Lithium-Ion (Li-Ion) Batteries**

Do not handle a damaged or leaking li-ion battery; you can be burned.

For safe disposal options of your li-ion batteries, contact your nearest Sprint authorized service center.

**Special Note:** Be sure to dispose of your battery properly. In some areas, the disposal of batteries in household or business trash may be prohibited.
Radiofrequency (RF) Energy

Understanding How Your Phone Operates

Your phone is basically a radio transmitter and receiver. When it’s turned on, it receives and transmits radiofrequency (RF) signals. When you use your phone, the system handling your call controls the power level. This power can range from 0.006 watts to 0.2 watts in digital mode.

Knowing Radiofrequency Safety

The design of your Treo device complies with updated NCRP standards described below.

In 1991-92, the Institute of Electrical and Electronics Engineers (IEEE) and the American National Standards Institute (ANSI) joined in updating ANSI’s 1982 standard for safety levels with respect to human exposure to RF signals. More than 120 scientists, engineers and physicians from universities, government health agencies and industries developed this updated standard after reviewing the available body of research. In 1993, the Federal Communications Commission (FCC) adopted this updated standard in a regulation. In August 1996, the FCC adopted hybrid standard consisting of the existing ANSI/IEEE standard and the guidelines published by the National Council of Radiation Protection and Measurements (NCRP).

Body-Worn Operation

To maintain compliance with FCC RF exposure guidelines, if you wear a handset on your body, use the carrying case, holster, or other body-worn accessory that is supplied by or approved by Sprint. If you do not use a body-worn accessory, ensure that the antenna is at least 7/16 inches (1.5 centimeters) from your body when transmitting. Use of accessories that are not approved by Sprint may violate FCC RF exposure guidelines.

For more information about RF exposure, visit the FCC Web site at www.fcc.gov.
Specific Absorption Rate (SAR) for Wireless Phones

The SAR is a value that corresponds to the relative amount of RF energy absorbed in the head of a user of a wireless handset.

The SAR value of a phone is the result of an extensive testing, measuring, and calculation process. It does not represent how much RF the phone emits. All phone models are tested at their highest value in strict laboratory settings. But when in operation, the SAR of a phone can be substantially less than the level reported to the FCC. This is because of a variety of factors including its proximity to a base station antenna, phone design, and other factors. What is important to remember is that each phone meets strict federal guidelines. Variations in SARs do not represent a variation in safety.

All phones must meet the federal standard, which incorporates a substantial margin of safety. As stated above, variations in SAR values between different model phones do not mean variations in safety. SAR values at or below the federal standard of 1.6 W/kg are considered safe for use by the public.

The highest reported (FCC) SAR values of the Treo 755P Smart Device by Palm are:

<table>
<thead>
<tr>
<th>Maximum SAR Values</th>
<th>CDMA Cellular</th>
<th>CDMA PCS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Held to Ear</td>
<td>1.07 (W/1Kg)</td>
<td>1.46 (W/1Kg)</td>
</tr>
<tr>
<td>Body-Worn</td>
<td>.89 (W/1Kg)</td>
<td>.33 (W/1Kg)</td>
</tr>
</tbody>
</table>

The highest reported (FCC) SAR values of the Treo 755P Smart Device by Palm on the Sprint Power Vision Network (EVDO mode) are:

<table>
<thead>
<tr>
<th>Maximum SAR Values</th>
<th>EVDO Cellular</th>
<th>EVDO PCS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Body-Worn</td>
<td>0.887 (W/1Kg)</td>
<td>0.303 (W/1Kg)</td>
</tr>
</tbody>
</table>
FCC Radiofrequency Emission

This phone meets the FCC Radiofrequency Emission Guidelines and is certified with the FCC as:

**FCC ID number: 08F-895.**

More information on the phone’s SAR can be found from the following FCC Web site: https://gullfoss2.fcc.gov/prod/oet/cf/eas/reports/GenericSearch.cfm.
Static Electricity, ESD, and Your Device

Electrostatic discharge (ESD) can cause damage to electronic devices if discharged into the device, so you should take steps to avoid such an occurrence.

Description of ESD
Static electricity is an electrical charge caused by the buildup of excess electrons on the surface of a material. To most people, static electricity and ESD are nothing more than annoyances. For example, after walking over a carpet while scuffing your feet, building up electrons on your body, you may get a shock—the discharge event—when you touch a metal doorknob. This little shock discharges the built-up static electricity.

ESD-Susceptible Equipment
Even a small amount of ESD can harm circuitry, so when working with electronic devices, take measures to help protect your electronic devices, including your Palm® device, from ESD harm. While Palm has built protections against ESD into its products, ESD unfortunately exists and, unless neutralized, could build up to levels that could harm your equipment. Any electronic device that contains an external entry point for plugging in anything from cables to docking stations is susceptible to entry of ESD. Devices that you carry with you, such as your Palm device, build up ESD in a unique way because the static electricity that may have built up on your body is automatically passed to the device. Then, when the device is connected to another device such as a docking station, a discharge event can occur.

Precautions Against ESD
Make sure to discharge any built-up static electricity from yourself and your electronic devices before touching an electronic device or connecting one device to another. The recommendation from Palm is that you take this precaution before connecting your device
to your computer, placing the device in a cradle, or connecting it to any other device. You can do this in many ways, including the following:

- Ground yourself when you’re holding your device by simultaneously touching a metal surface that is at earth ground. For example, if your computer has a metal case and is plugged into a standard three-prong grounded outlet, touching the case should discharge the ESD on your body.
- Increase the relative humidity of your environment.
- Install ESD-specific prevention items, such as grounding mats.

**Conditions That Enhance ESD Occurrences**

Conditions that can contribute to the buildup of static electricity in the environment include the following:

- Low relative humidity.
- Material type (The type of material gathering the charge. For example, synthetics are more prone to static buildup than natural fibers like cotton.)
- The rapidity with which you touch, connect, or disconnect electronic devices.

While you should always take appropriate precautions to discharge static electricity, if you are in an environment where you notice ESD events, you may want to take extra precautions to protect your electronic equipment against ESD.
Owner’s Record

The model number, regulatory number, and serial number are located on a nameplate inside the battery compartment. Record the serial number in the space provided below. This will be helpful if you need to contact us about your phone in the future.

Model: Sprint Power Vision™ Smart Device Treo™ 755p by Palm
