1. **Safety Precaution**

Not following these simple guidelines may be dangerous or illegal. Read the complete user guide for further information.

**TURN ON SAFELY**
Do not turn on the phone when wireless phone is prohibited or when it may cause interference or danger.

**ROAD SAFETY**
Obey all road safety laws. Always use both of your hands to operate the vehicle while driving.

**INTERFERENCE**
All wireless phones may be sensitive to interference, which may affect performance.

**TURN OFF IN HOSPITALS**
Follow all restrictions. Turn off the phone near medical equipment.

**TURN OFF ON AIRCRAFTS**
Follow all restrictions. Wireless devices can cause interference on aircrafts.

**TURN OFF WHEN REFUELING**
Do not use the phone at/near refueling stations. Do not use near fuel or chemicals.

**USE SENSIBLY**
Only qualified personnel may install or repair this product.
ENHANCEMENTS AND BATTERIES
Use only appropriate enhancements and batteries. Do not connect incompatible products.
WATER-RESISTANCE
Your phone is not water-resistant. Keep it dry.

BACKUP COPIES
Remember to make back-up copies or keep a written record of all important information stored in your phone.

CONNECTING TO OTHER DEVICES
When connecting to any external device, read its user guide for detailed safety instructions. Do not connect with incompatible products.
2. Getting started

Installing the cards and the Battery

The line schematic diagram is noted how to install SIM card, Micro SD card and battery.

Insert SIM cards and memory card

Install battery

ATTENTION:
1) To insert the SIM card and Micro SD card, please make sure your phone is Power off, then remove the cover, battery and other external power connection, as shown in the image.
2) Insert SIM card and memory card into card slots, and install battery as shown as the above drawings.

Charging the Battery

The lithium battery delivered with the mobile phone can be put into use immediately after being unpacked. Your mobile phone can monitor and display the battery state.

- Normally the remaining energy of the battery is indicated by the battery level icon at the upper right corner of the display screen.

- When the battery energy is insufficient, the mobile phone prompts "Battery low". If you have set an alert tone, an alert tone will be given off when the battery level is too low.

- A charging animation appears when the battery is being charged. When the charging is complete, the animation disappears.

- It is normal of the battery to become hot during the charging period.

- The battery icon does no longer flicker when the charging process ends.

- Use only the battery provided by the vendor. Otherwise, damages or even injuries could be caused during the charging.

- Power off the mobile phone before removing the battery.
The charging process lasts a longer time for a new battery or a battery not in use for long. If the battery voltage is too low to enable the mobile phone to be powered on, charge the battery for a longer time.

During the charging, ensure the battery is placed in a room temperature environment or in an environment close to room temperature.

Immediately stop using the battery if the battery produces odor, overheats, cracks, distorts or has other damage, or if the electrolyte leaks.

The battery wears out with use. A longer charging time is required as the battery is put into use for a long time.

3. Input method

This mobile phone provides multiple input methods, including English input in both upper and lower case, French, Spanish, Portuguese and numeric input method.

To Shift Entry Methods

Press # key to switch between input methods.

Numeric and English Input

5. **Use of USB**

**Notices before use**

Always connect and stop USB device correctly. For other operation systems, the connection between PC and the mobile phone cannot be conducted unless USB driver is installed.

6. **Maintenance & Safety**

Please read and observe the following information for safe and proper use of your phone and to prevent damage. Also, keep the user guide in an accessible place at all the times after reading it.

**After sales service**

You are kindly referred to the Warranty Card provided in the sales package box.

**Charger and Adapter Safety**

Charger and adapter are designed for indoor use only.

**Battery Information and Care**

- Please dispose of your battery properly.
- Do not disassemble or short-circuit the battery.
- Keep the battery’s metal contacts clean.
Recharge the battery after long periods of non-use to maximize battery life.

Battery life will vary due to usage patterns and environmental conditions.

The self-protection function of the battery cuts the power of the phone when its operation is in an abnormal status. In this case, remove the battery from the phone, reinsert it, and turn the phone on.

Other Warning

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.
SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.
Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC. Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC.
For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the handset a minimum of 1.0 cm from the body.
Non-compliance with the above restrictions may result in violation of RF exposure guidelines.
