Safety precautions

To prevent injury to yourself and others or damage to your device, read all of the following information before using your device.

Proper care and use of your mobile device

Keep your device dry.

- Humidity and all types of liquids may damage device parts or electronic circuits.
- Do not turn your device on if it is wet. If your device is already on, turn it off and remove the battery immediately (if the device will not turn off you cannot remove the battery, leave it as-is). Then, dry the device with a towel and take it to a service centre.
- Liquids will change the colour of the label that indicates water damage in the device. Water damage to your device can void your manufacturer's warranty.
- Do not use or store your device in dusty, dirty areas.
- Dust can cause damage to device's electronic components.
- Do not store your device on slopes if your device fails, it can be damaged.
- Do not store your device in hot or cold areas. Use your device at temperatures from 0 °C to 35 °C.
- Your device can explode if left inside a closed vehicle, as the inside temperature can reach up to 80 °C.
- Do not expose your device to direct sunlight for extended periods of time (such as on the dashboard of a car).
- Store the battery at 0 °C to 40 °C.

Do not store your device with such metal objects as coins, keys and necklaces.

- Your device may become deformed or malfunction.
- If the battery terminals are in contact with metal objects, it may cause a fire.

Do not use your device near magnetic fields.

- Your device may malfunction or the battery may discharge from exposure to magnetic fields.
- Magnetic strips, including credit cards, phone cards, passports, and boarding passes, may be damaged by magnetic fields.
- Do not use carrying cases or accessories with magnetic closures or allow your device to come in contact with magnetic fields for extended periods of time.
- Do not store your device near or in heaters, microwaves, hot cooking equipment, or high pressure containers.
- The heat from these devices will discharge and must be recharged before use.
- Do not charge the battery by pulling on the cord.
- Do not drop your device or cause impacts to your device.
- The screen of your device may be damaged.
- If dropped, your device may be damaged or parts may be broken.
- Do not use your device or applications for a while if the device is very hot.
- Prolonged exposure of your skin to an overheated device may cause low temperature burn symptoms, such as red spots and pigmentation.
- If your device has a camera flash or light, do not use a flash close to the eyes of pets or people.
- Using a flash close to the eyes may cause temporary loss of vision or damage to the eyes.

Use caution when exposing to flashing lights.

- Visual discomfort may occur when you are exposed to flashing lights while watching videos or playing Flash-based games for extended periods. If you feel any discomfort, stop using the device immediately.

Reduce the risk of repetitive motion injuries

When repetitively perform actions, such as pressing keys, drawing characters on a touch screen with your fingers, or playing games, you may experience discomfort in your hands, neck, shoulders, or other parts of your body. When using your device for extended periods, take the following steps to reduce strain and fatigue:
- Take frequent breaks.
- Use the minimum volume setting necessary to hear your voice.
- Excessive exposure to loud sounds can cause hearing damage.
- Avoid using your device in an auto accident, a crime in progress, or a serious emergency.
- Do not place your device near your body.
- Do not use your device near a pacemaker.
- Do not use your mobile device with your body part near a heart pacemaker.
- Some hearing aids may be interfered with by the radio frequency of your device. Contact the manufacturer to ensure the safety of your hearing aid.

Specific Absorption Rate (SAR) certification information

This DEVICE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the exposure limits for radio waves specified by the International Commission on Non-Ionizing Radiation Protection (ICNIRP). The specific limits are set by public health organizations to ensure that exposure to radio waves is safe for all users. The SAR value is tested with the device transmitting at a maximum power output as specified in theTechnical Specification. SAR values are measured at the highest volume level permitted by the applicable standards. In addition, it is tested during each model approval test at a distance of 0.5 cm from the SAR marked position.

The maximum radio frequency energy absorbed by the user's body is lower than the radiation limits specified in international guidelines. SAR values are measured at the highest volume level permitted by the applicable standards. In addition, it is tested during each model approval test at a distance of 0.5 cm from the SAR marked position.

Your mobile device is designed to be used at a distance of at least 1.5 cm from your body to ensure that exposure to radio waves is at a low level.
To turn your phone on, enter an area code and a phone number. When a call comes in, press \[1.\] to answer.
