Warning

Failure to comply with safety warnings and regulations can cause serious injury or death.

Do not use damaged power cords, or plug or unplug your device while it is charging.

Do not touch the power cord with wet hands or disconnect the cord by pulling on the plug. When removing the plug from the wall, grasp the plug itself. Never pull on the cord.

Do not bend or damage the power cord.

Do not use power devices while it is charging or touch your device's power button. Doing so may cause electric shock.

Do not disassemble your device. The device may cause electric shock.

Do not use your device or applications for a while if the charging capacity of the device or battery has changed significantly.

Do not drop your device or battery onto hard surfaces.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.

Do not store your device near magnetic fields.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not use your device near radio transmitters or other equipment that may cause electromagnetic interference.

Do not store your device in high temperature environments.

Do not store your device in areas where there is high or low temperature, high humidity, or dust.

Do not store your device in areas with metal objects, such as coins, keys, and necklaces.

If the battery terminals come into contact with metal objects, this may result in electric shock.
