If you are using a hearing aid, contact the manufacturer for information about radio interference
The radio frequency emitted by your device may interfere with some hearing aids. Before using your device, contact the manufacturer of your hearing aid to determine whether or not its hearing aid will be affected by radio frequency emitted by the device.
Do not use your device near medical devices or apparatuses that emit radio frequencies such as sound systems or radio towers.
Radio frequencies may cause your device to malfunction. Turn off the device in potentially explosive environments
Turn off your device in potentially explosive environments instead of removing the battery. Always comply with instructions, signs and signals in potentially explosive environments.
Do not use your device at refueling points (petrol stations), near flammable liquids, gases or explosives.
Do not store or carry flammable liquids, gases, or explosives in your device, on your person, or inside its battery, parts, or accessories.
Get to know your device and its convenience features, such as speed dial and redial. These features help you reduce the time needed to place or receive calls on your mobile device.
• Position your device within easy reach. Make sure you can access your wireless device without taking your eyes off the road. If you receive an incoming call at an inconvenient time, let your voicemail answer for you.
• Suspends calls in heavy traffic or hazardous weather conditions. Rain, sleet, snow, ice, heavy traffic can be hazardous.
• Do not take notes or look up phone numbers. Jotting down “to do” list or calling a friend with a handheld device takes attention away from your primary responsibility of driving safely.
• Do not use your device while driving. Place calls when you are not moving or before pulling into traffic. Try to plan calls when your car is parked.
• Do not get stressed or emotional conversations that may be distracting. Make the person you are talking to aware that you are driving and suspend conversations that could potentially divert your attention from the road.
Care and use your mobile device properly
Keep your device dry.
• Humidity and liquids may damage the parts or electronic circuits in your device.
• Do not turn on your device if it is wet. If your device is already on, turn it off and remove the battery immediately (if the device will not turn off, remove the battery). Leave it as is. Then, dry the device with a towel and take it to a service centre.
• Liquids will change the colour of the label that indicates water damage inside the device. Water damage to your device can void its warranty.
Store your device only on flat surfaces.
If your device falls, it may be damaged. Do not store your device in very hot or very cold areas. It is recommended to use your device at temperatures from 5 °C to 35 °C.
Do not store the device in very hot or very cold areas such as inside a car in the summer or winter. Doing so may cause the screen to malfunction, result in damage to the device, or cause the battery to explode.
Do not expose your device to direct sunlight for extended periods of time (on the dashboard of a car, for example).
• Store the battery at temperatures from 0 °C to 45 °C.
Do not store your device with metal objects, such as coins, keys, and necklaces.
• Your mobile device may malfunction or be damaged.
• If the battery terminals come into contact with metal objects, this may cause the device to malfunction.
Do not store your device near magnetic fields.
• Your device may malfunction or the battery may discharge from exposure to magnetic fields.
• Magnetic stripe cards, including credit cards, phone cards, passports, and boarding passes, may be damaged by magnetic fields.
Do not use your device or applications for a while if the device is overheated.
Prolonged exposure of your skin to an overheated device may cause low temperature burns, especially if your skin is sensitive and pimplies.
Do not use your device with the back cover removed.
The battery may fall out of the device, which may result in damage or malfunction.
If your device has a camera flash or light, do not use it close to the eyes of people or pets.
Using a flash close to the eyes may cause temporary loss of vision or damage to the eyes.
Use caution when exposed to flashing lights.
• While using your mobile device in any indoor room and do not hold the screen close to your eyes.
• Scoliosis or blackouts can occur when you are exposed to flashing lights while watching videos or playing Flash-based games for extended periods. If you feel any discomfort, stop using the device immediately.
Do not do the device for anything other than its intended use.
• In the event your device is lost or stolen, change the passwords on your accounts to protect your personal information.
• Avoid using applications from unknown sources and lock your device with a pattern, password, or PIN.
Do not distribute copyrighted material.
Do not distribute copyrighted material without the permission of the copyright owner. This includes copyrighted work such as music, photos, videos, and literature.
You may not distribute copyrighted work if the manufacturer is not liable for any legal issues caused by your use of copyrighted material.
Malware and viruses
Protect your device from malware and viruses, follow these usage tips. Failure to do so may result in damages or loss of data that may not be covered by the warranty service.
Do not download unknown applications.
Do not visit untrusted websites.
Do not open email messages from unknown senders. Set a password and change it regularly.
Delete suspicious messages or email from unknown senders.
Disable a virus by changing the Bluetooth setting on your device.
If the device behaves abnormally, run an antivirus program to check for viruses. Run an antivirus program on your device before you newly download software or purchase a mobile phone.
Install antivirus programs on your computer and run them regularly to detect viruses and other threats.
Do not add registry settings or modify the device’s operating system.
Specific Absorption Rate (SAR) certification information
This DEVICES MEET INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES
Your mobile device is a radio transmitter and receiver. It is designed to not exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines. The guidelines were developed by an independent scientific organisation (ICNIRP) and include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR for mobile devices is 2.0 W/kg. Test results are based on a small number of operating positions from the device transmitting at its highest certified power level in all tested modes. These SAR values under the ICNIRP guidelines for this device model are:

<table>
<thead>
<tr>
<th>SAR Value (W/kg)</th>
<th>Description</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.94 W/kg</td>
<td>Head SAR</td>
<td>Body-worn</td>
</tr>
</tbody>
</table>

During use, the actual SAR values for this device are usually well below the values stated above. This is because, for purposes of system efficiency and to avoid performance disruptions on the network, the operating power of your mobile device is automatically decreased when full power is not necessary. This allows the device to operate at lower power levels, the lower its SAR value.

A body-worn SAR has been performed on this device at a separation distance of 1.5 m. To meet RF exposure guidelines during body use, the device must be positioned at least 1.5 m away from the body.

Organisations such as the World Health Organisation and the US Food and Drug Administration have both suggested that people are concerned and want to reduce their exposure, they could use a hands-free accessory to avoid contact with the device while using the device, or reduce the amount of time spent using the device.

For more information, visit the Samsung.com, samsung.com and search for your mobile device name.

Correct disposal of waste products (Waste Electrical & Electronic Equipment) (Applicable in countries with separate collection systems) This marking on the product, accessories, or literature indicates the product and its electronic accessories are not to be disposed of as waste. Instead they should be given to collection facilities provided for this purpose by the reseller, retailer or the manufacturer. If you are a private household user and want to discard the waste electric and electronic devices, you should use the public waste disposal system or contact the local government for more information. If you are a business user and want to discard the waste electric and electronic devices, you should contact your supplier for information about the take-back program. The WEEE symbol indicates that the manufacturer and importers must take back the waste products and pay part or all of the disposal costs. If you are a business user and want to dispose of waste electric and electronic devices, you should contact your supplier for the correct disposal method. The symbol of two crossed-out wheeled bins indicates that the waste product should not be disposed of with household waste. If you are a business user and want to discard the waste electric and electronic devices, you should contact your supplier for the correct disposal method. This symbol indicates that the battery contains lead, mercury, cadmium, or other heavy metals. The symbol indicates that the battery contains lead, mercury, or cadmium. If you are a business user and want to discard the waste electric and electronic devices, you should contact your supplier for the correct disposal method. The symbol indicates that the battery contains lead, mercury, cadmium, or other heavy metals. If you are a business user and want to dispose of waste electric and electronic devices, you should contact your supplier for the correct disposal method. The symbol indicates that the battery contains lead, mercury, cadmium, or other heavy metals. If you are a business user and want to dispose of waste electric and electronic devices, you should contact your supplier for the correct disposal method. The symbol indicates that the battery contains lead, mercury, cadmium, or other heavy metals. If you are a business user and want to dispose of waste electric and electronic devices, you should contact your supplier for the correct disposal method.
Instructional icons

Access menus
To access your phone's menus,
1. In idle mode, enter a phone number and press [1].
2. Select Create contact.
3. Select a contact number (if necessary).
4. Enter contact information.
5. Press the Confirm key to add the contact to memory.

Send and view messages

To create a text message:
1. In Menu mode, select Messages → Create message.
2. Enter a recipient number and scroll down.
3. Enter your message text. See "Enter text."
4. Press the Confirm key to send the message.

View text messages:
1. In Menu mode, select Messages → Inbox.
2. Select a text message.

Make fake calls
You can simulate an incoming call when you want to get out of meetings or unwanted conversations.

To activate the fake call feature
In Menu mode, select Programs → Applications → Call → Fake call → Call hot key → On.

To make fake calls:
1. In idle mode, press and hold the Navigation key down.
2. When you access a menu requiring the PIN2, you must enter the PIN2 supplied with the SIM card.
3. When you are finished setting contacts, press the Confirm key to save the recipients.
4. Scroll down and enter the sender's name.
5. Press the Confirm key → Accept.

Activate and send an SMS message
In an emergency, you can send SMS messages to your family or friends for help.

To activate the SMS feature:
1. In Menu mode, select Settings → Settings → SOS messages → Sending options.
2. Press the Confirm key to select On.
3. Scroll down and press the Confirm key to open the recipient list.
4. Press Options → Contact list to open your recipient list.
5. Press OK to open your contact list.
6. Select a contact.
7. When you are finished selecting contacts, press the Confirm key to save the recipients.
8. Scroll down and set the number of times to repeat the SMS message.

To send an SMS message:
1. With the keys locked, press [1] four times to send an SMS message to preset numbers.
2. The phone switches to SMS mode and sends the preset SOS message.
3. To exit SMS mode, press [2].
4. Press OK to send the message.
5. Select a contact.
6. Select a number (if necessary).
7. When you are finished selecting contacts, press the Confirm key to save the recipients.
8. Scroll down and set the number of times to repeat the SMS message.

Change your ringtone
1. In Menu mode, select Settings → Profiles.
2. Scroll to the profile you are using.
3. Press Options → Edit.
4. Select Call ringtone.
5. Select a ringtone.
6. To change the volume of voice during a call, press the Volume key.
7. To return to silent mode, press the Silent key.
8. To return to normal mode, press the Normal key.
9. To return to night mode, press the Night key.
10. To adjust the volume of the ringtone, press the Volume key.

Add a new contact
The memory location to save new contacts may be preset depending on your service provider.
1. In idle mode, select Messages → Create message.
2. Enter a recipient number and scroll down.
3. Enter your message text. See "Enter text."
4. Press the Confirm key to send the message.
