Section 1: Getting Started

This section explains how to start using your Samsung My Shot phone by activating your service, setting up your Voicemail, or getting an understanding of how this manual is put together.

Understanding this User Manual

The chapters of this manual generally follow the same order as the menus and sub-menus in your phone. A robust index for quick reference to most features begins on page 135.

Also included is important safety information that you should know before using your phone. Most of this information is near the back of the guide, beginning on page 112.

Notes and Tips

Throughout this manual some text is set apart from the rest. In this way, important information, quick methods for activating features, to define terms, and more are emphasized. The definitions for these methods are as follows:

- **Notes** — Explain alternative options within the current feature, menu, or sub-menu.

- **Tips** — Provide quick or innovative methods for performing functions related to the subject at hand.

- **Important** — Points out important information about the current feature that could affect performance, or even damage your phone.

Text Conventions

This manual provides condensed information about how to use your phone. To make this possible, the following terms and icon appear in place of repeatedly-used procedural steps:

- **highlight** — Use the Navigation key ( ) to move a highlighting effect onto a menu item or screen item of interest.

- **select** — After “highlighting” a menu item or screen item, press the MENU-OK button ( ) to launch, access, or save a highlighted menu item or screen field of interest.

- **➔** — Used in place of “select” in long “drill down” procedure steps.

Example: “...Settings ➔ Call Settings ➔ Call Answer...”

Charging the Battery

Your phone is powered by a rechargeable standard Li-Ion battery. Only use Samsung-approved charging devices and batteries. Samsung accessories are designed to maximize battery life. Use of other accessories may invalidate your warranty and may cause damage.
Use the Travel Adapter

The travel adapter included with your phone is a convenient, light-weight charger that rapidly charges your phone from any 120/220 VAC outlet.

1. Plug the large end of the Travel Adapter into a standard 120 VAC or 220 VAC wall outlet.

Important!: For connection to an electrical supply not located in North America, you must use an adaptor of the proper configuration for the power outlet. Use of the wrong adapter could damage your phone and void your warranty.

2. Insert the smaller end of the Travel Adapter into the charger/accessory connector at the bottom end of your phone.

Important!: You must unplug the adapter before removing the battery from the phone during charging to avoid damage.

Low battery indicator

The battery indicator ( ) in the upper-right corner of the display indicates power level. Monitor the battery strength and ensure your battery is adequately charged.

- Three bars ( ) indicate a full charge.
- An empty battery icon ( ) indicates a near empty battery.
- A blinking empty battery icon ( ) and a tone sounding indicate you have two to three minutes before the battery is too low to operate the phone.

If you continue to use your phone without charging its battery, the phone will shut down.

Activating Your Phone

Contact your Wireless Carrier and follow their instructions for obtaining service, if necessary. We suggest that you read this guide to fully understand the services your phone supports.

Install the Battery

Note: Your phone comes packaged with a partially charged rechargeable standard Li-Ion battery and travel adapter.
**Getting Started**

**Important!** You must fully charge the battery the first time you use your phone, otherwise you could damage the battery. From fully discharged to fully charged, the battery requires up to 4 hours of charge time.

1. Insert the top end of the battery first, matching the gold contacts on the inside of the battery to those on the phone.
2. Press lightly on the bottom end of the battery down into the phone until it slips into place.
3. Place the battery cover over the battery and slide the battery cover into place.

**Remove the Battery**

1. Press and hold **END** to turn off the phone (if on).
2. Press down on the battery cover release latch (1) and slide the cover (2) toward the bottom end of the phone.
3. Lift the battery (3) up and away from the phone, bottom end first.
Turn Your Phone On

1. Open the flip on your phone, as shown.
2. Press END.

Note: As with any other radio-transmitting device, do not touch the antenna while using your phone as this can affect call quality and can cause the phone to operate at a higher power level than is necessary.

3. The phone begins searching for a network signal.
4. Once the phone finds a signal, the time, date, and day appear in the second line of the display.
5. You’re now ready to place and receive calls.

Note: If you are outside of your carrier’s coverage or roaming area, the No Service icon ( ) appears at the top of the phone’s display. If you cannot place or receive calls, try later when service is available, or at another location.

Turn Your Phone Off

Press and hold END for two or more seconds. Your phone powers off.

Note: If your phone is on and you press END for less than one second, the phone will not power off. This prevents your phone from being turned off accidentally.

Setting Up Your Voicemail

Voicemail allows callers to leave voice messages, which can be retrieved any time.

Note: Once your Voicemail account has been set up, you can use the Voicemail folder (under the Message menu) to view details of voice messages in your Voicemail box.

1. In standby mode, press and hold # or dial your own mobile number to dial Voicemail.
2. Follow the prompts in the new user tutorial to setup your mail box.

Listen to Voicemail

1. In standby mode, press and hold # or dial your own mobile number to dial Voicemail. After connecting, you will hear your voice greeting.
2. You are prompted to enter your password.
Section 2: Understanding Your Phone

This section outlines some key features of your phone. It also describes the screen format and the icons that will be displayed when the phone is in use.

Features of Your Phone

- Domestic and international voice and text messaging service (available on participating networks).
- High speed data (CDMA 2000 1x Technology)
- Bluetooth® Wireless Technology (see Note)
- Global Positioning (GPS) Technology
- PIM Functions
- Picture (MMS) Messaging
- Text (SMS) Messaging
- E-mail Messaging
- Built-in 1.3 Megapixel Digital Camera
- Voice Dial

Note: The My Shot™ phone supports the wireless handsfree profile and the serial port profile for Bluetooth® wireless technology. The My Shot does not support Bluetooth OBEX profiles.

Closed View of Your Phone

Features

1. Volume Key — Lets you adjust the ring volume in standby mode, adjust the voice volume during a call, or mute the ringer during an incoming call.
2. **Power / Accessory Connector** — Used to connect charging accessories, a headset, or any available accessory cables to your phone.

3. **Camera Lens** — The lens of your built-in camera.

4. **Front Display** — Indicates the status of your phone, including status icons, message indicators, signal strength, and so on.

5. **Camera Key** — Launches the Camera feature of your phone and takes pictures, with the phone open or closed.

---

### Features

1. **Main Display** — Indicates the status of your phone, including numbers dialed, feature and function screens, status icons, message indicators and contents, signal strength, and so on.
2. **Navigation Key** — In Menu mode, lets you scroll through the phone menu options. In Standby mode, lets you access preset functions and one user-defined function.

3. **Left Soft Key** — Used to navigate through menus and applications and to select the choice indicated at the bottom left corner of the Main LCD.

4. **TALK Key** — Lets you place or receive a call. In standby mode, press the key once to access the recent call log.

5. **Voicemail Key** — Lets you speed dial your Voicemail account to review your voice messages.

6. **Special Function Keys** — Enter special characters. Perform various functions.

7. **Microphone** — Lets the other caller hear you clearly when you are speaking to them.

8. **Voice Recognition Key** — Used to launch VoiceSignal voice recognition system.

9. **Alpha-numeric Keys** — Use these keys to enter numbers, letters, and characters.

10. **BACK Key** — Deletes characters from the display when you are in text entry mode. Press this key to return to the previous menu or screen when navigating features on your phone.

11. **END Key** — Ends a call. If you press and hold the END key, the power goes On or Off. When you receive an incoming call, press to send the call to voicemail.

12. **Right Soft Key** — Used to navigate through menus and applications and to select the choice indicated at the bottom right corner of the Main Display.

13. **MENU-OK Key** — Pressing when navigating through a menu accepts the highlighted choice in a menu.

14. **Earpiece / Speaker** — Lets you hear ringing and alert tones, alarm tones, and the other parties to calls.

**Command Keys**

Functions for the soft keys are defined by what appears above each in the display. There are two soft keys, Left ( ) and Right ( ).
**Left Soft Key**

Some functions of the Left soft key ( ) are as follows:

- In standby mode, press the **Celltop** soft key ( ) to launch the Celltop application. (For more information, refer to “Celltop” on page 63.)
- When the Left soft key function is Edit, press the **Edit** soft key ( ) to edit a Contacts entry.

**Right Soft Key**

Some functions of the Right soft key ( ) are as follows:

- In standby mode, press the **Messages** soft key ( ) to launch the Messages menu.
- When the Right soft key function is Options, press the **Options** soft key ( ) and a pop-up menu appears.
- When the Right soft key function is Back, press the **Back** soft key ( ) to back up one menu level.

**MENU-OK Key**

- In standby mode, press the **MENU-OK** key ( ) to launch the Main Menu.
- In a menu, press ( ) to accept the highlighted selection.
- In camera mode, press ( ) to take a photo or to create a Picture message.
- When the **MENU-OK** key function is Edit, press the **Edit** key ( ) to edit a Draft message.

**TALK Key**

The TALK key ( ) is used to answer calls, dial calls, and to recall the last number(s) dialed, received, or missed.

- Press ( ) once to answer calls.
- Enter a number and briefly press ( ) to make a call.
- Briefly press ( ) in standby mode to display a list of recent calls to and from your phone.
- Press ( ) twice in standby mode to call the most recent number.
- Press ( ) to pick up a waiting call. Press ( ) again to switch back to the other call.

**BACK Key**

The BACK key ( ) is used to erase or clear numbers, text, or symbols from the display. You can also use the key to return to a previous menu or to return to standby mode from any menu.

- If you enter an incorrect character, briefly press ( ) to backspace (and delete) the character.
- To erase the entire sentence, press and hold ( ).
- To back up one menu level, briefly press ( ).

**END Key**

- Press and hold the END key ( ) to turn your phone on or off.
- Briefly press ( ) once to disconnect a call.
- Press ( ) to return to standby mode from any menu, or to cancel the last input.
**Navigation Key**

Use the directional keys on the Navigation key ( ) to browse menus, sub-menus, and lists. Each directional key also acts as a shortcut to launch applications.

**Camera Key**

Use the Camera key ( ) on the right side of the phone to activate the camera built into your phone and to take pictures.

**Volume Key**

Use the Volume key ( ) on the left side of the phone to adjust ringer volume (in standby mode), to adjust voice call volume (during a call), and to browse menu items.

**Star Key**

Use the Star key ( ) to lock your phone (in standby mode) and to shift capitalization and change text input mode when entering text.

**Pound Key**

Use the Pound key ( ) to launch the Axcess Search application (in standby mode) and to insert a space when entering text. (For more information about Axcess Search, refer to “Axcess Search” on page 64.)

---

**Understanding the Display Screen**

1. The top line of your phone’s display contains icons that indicate network status, battery power, signal strength, connection type, and more.

2. The center portion of the display shows information such as call progress information, messages, and photos.

3. The bottom line of the display shows current soft key functions. The sample screen shows that pressing the Left soft key ( ) will display a **Celltop** screen, pressing the **Menu-OK** key ( ) will display the Main Menu, and pressing the Right soft key ( ) will show the **Messages** menu.

**Display Screen Icons**

Your My Shot phone can show you definitions of the icons that appear on the top line of the display.
To access the Icon Glossary:

- In standby mode, select **MENU ➔ Phone Info ➔ Icon Glossary**. A list appears showing the icons that can appear on the top line of the displays.

**Dialogue Boxes**

Dialogue boxes prompt for action, inform you of status, or warn of situations such as low battery. Dialogue boxes and their definitions are outlined below.

- **Choice**
  - **Example:** “Save Message?”
- **Reconfirm**
  - **Example:** “Erase All Messages?”
- **Performing**
  - **Example:** “Sending...” “Connecting...”
- **Completed**
  - **Example:** “Message Saved”
- **Information**
  - **Example:** “New Message”
- **Error**
  - **Example:** “System Error!”
- **Warning**
  - **Example:** “Low Battery,” “Memory Full!”

**Backlights**

Backlights illuminate the display and the keypad. When you press any key or open the phone, the backlights come on. They go off when no keys are pressed within a period of time set in the Backlight menu.

**Note:** During a phone call, the display backlight dims and turns off after 10 seconds to conserve battery power, regardless of the Backlight setting.

(For more information, refer to “Backlight” on page 99.)

**Your Phone’s Modes**

**Call Answer Mode**

You can choose to answer a call by pressing any key except or , by pressing only the key, or by opening the phone’s flip. (For more information, refer to “Call Answer” on page 101.)

**Input mode**

Input mode determines how you enter text, numbers, and symbols. While at any text entry screen, press the Left soft key ( ), then choose the input mode from the pop-up menu using the Navigation key. Optional input modes are T9 Word, Abc, ABC, Symbols, and 123. (For more information, refer to “Text Entry Modes” on page 43.)
Tip: You can cycle between T9 Word, Abc, and 123 by repeatedly pressing and holding the key until the phone beeps.

Lock Mode

When the phone is in Lock Mode, restrictions are placed on phone use. You can receive calls and messages, but cannot place outgoing calls (except for emergency numbers) until you unlock the phone. Lock Mode also restricts access to menus and the Volume key.

To enter Lock Mode:

- In standby mode, press and hold * until “Entering lock mode” appears momentarily in the display, followed by “– Locked –”.

To exit Lock Mode:

1. While in Lock mode, press the Unlock soft key. You are prompted to enter the Lock Code.
2. Enter the lock code. “– Locked –” disappears from the display.

Note: The default lock code is the last four digits of your telephone number.

Standby Mode

Standby mode is the state of the phone once it has found service and is idle. The phone goes into standby mode:

- After you power the phone on.
- When you press END after a call or from within a menu.

In standby mode, you will see the time, day, and date as well as all phone status icons.

Place Calls in Standby Mode

1. In standby mode, enter a phone number, and press CALL to place a call.
2. Press END to return to standby mode.

Receive Messages in Standby Mode

While your phone is in standby mode, new incoming messages automatically appear in the screen as they are received. Use the Navigation key to scroll through text or to view complete images.

Talk Mode

You can place and receive calls only when your phone is on. While in a call your phone is in talk mode. Press the Options soft key to display a list of menu options. (For more information, refer to “The In-Use Options” on page 27.)

(For more information, refer to “Change Lock Code” on page 105.)
**Enter/Exit Silent Mode**

Silences the ringers, the alerts, and the tones your keypad makes when you press a key.

To enter Silent Mode:

► In standby mode, repeatedly press the Volume key ( ) Down until “Silence All” appears in the display, then press SET ( ).

To exit Silent Mode:

► While in Silent mode and standby mode, repeatedly press the Volume key ( ) Up until “Silence All” disappears from the display and the desired ringer value appears, then press SET ( ).

**Vibrate Mode**

► In standby mode, repeatedly press the Volume key ( ) down until “Vibrate” appears in the display, then press SET ( ).

**Note:** The Volume key is on the left side of phone.

**Adjust the Ringer**

To adjust the Ringer volume, while in standby mode, press the Volume key up or down.

1. In standby mode, press the Volume key up or down to set the call ringer volume as desired.

   Options are:
   - Silence All
   - Vibrate
   - 1 Beep
   - Low
   - Medium
   - Low/Medium
   - Medium/High
   - High

2. When you are satisfied with the setting, press SET ( ).

Your phone returns to standby mode.

**Note:** The Vibrate icon ( ) appears in the display when the phone is in Vibrate mode. The No Ring icon ( ) appears in the display when the phone is in Silence All mode.

**Camera Mode**

Camera mode lets you take pictures with your phone’s camera. In Camera mode, you can also adjust the resolution and appearance of your pictures.

For more information, refer to “Camera” on page 65.

- **Entering Camera Mode** — In standby mode, press and hold the Camera key ( ) — on the right side of the phone.
- **Exiting Camera Mode** — Press the key.
Section 3: Call Functions

This section explains how to make or answer a call. This section also includes the features and functionality associated with making or answering a call.

Making a Call — Number Entry Dialing

1. With the phone on, enter the number you wish to call using the keypad.
2. Press TALK to place the call.

Dialing Emergency Numbers

When you call an Emergency Number, such as 911, your phone locks itself in emergency mode, only allowing you to make calls to the emergency call center you originally contacted. This enables emergency operators to more easily dispatch aid, such as police, fire fighting, and emergency medical personnel.

1. With the phone on, enter 911 using the keypad.
2. Press TALK to place the call.

Important!: Emergency number 911 is preset into your phone. You can dial this number almost any time, even when the phone is locked or restricted.

If you call 911 an audible tone is heard and an Emergency prompt appears in the display for the duration of the call.

Important!: Because of various transmission methods, network parameters, and user settings necessary to complete a call from your wireless phone, a connection cannot always be guaranteed. Therefore, emergency calling may not be available on all wireless networks at all times.

Important!: DO NOT depend on this phone as a primary method of calling 911 or for any other essential or emergency communications.

Note: You can specify other numbers than 911 as emergency numbers using the Emergency # settings. (For more information, refer to “Emergency #” on page 105.)

Manual Pause Calling

When you call automated systems (like banking services), you are often required to enter a password or account number. Instead of manually entering the numbers each time, you can store the numbers in your Contacts along with special characters called pauses.

• P Pause — A hard pause stops the calling sequence until you press TALK.
• T Pause — A two-second pause stops the calling sequence for two seconds and then automatically sends the remaining digits.
To manually call a number with pause(s) without storing it to your Contacts:

1. Enter the number you wish to call.

2. Press the Options soft key.

   A pop-up menu containing the following options appears in the display:
   - **P Pause** — a hard pause (awaits input from you).
   - **T Pause** — a two-second pause.

   **Tip:** You can create pauses longer than two seconds by entering multiple T Pauses.

3. Use the navigation keys to highlight the desired pause option.

4. Press the navigation key to enter the highlighted pause into your number sequence.

5. Press the Talk key to call the number.

**Making a Call — Speed Dialing**

You can store phone numbers and contact names in your phone’s Contacts list. Speed Dialing lets you quickly and easily dial any contact in your Contacts list by using that contact’s location number in the list. You can assign and change location (speed dial) numbers for your contacts. (For more information, refer to “Assigning Speed Dial Numbers” on page 36.)

**One-Touch Dialing**

Speed Dial numbers 002 through 009 are special One-Touch dialing numbers. You can call the phone numbers stored in your phone’s Contacts list and assigned Speed Dial numbers 002 through 009 by pressing and holding a single key.

**Example:** For Speed Dial number 003, press and hold the navigation key until the name and number appear in the display and the number is dialed.

**Two-Touch Dialing**

Memory locations 010 through 099 are special Two-Touch dialing locations.

**Example:** For Speed Dial number 013, briefly press the navigation key, then press and hold the navigation key until the name and number appear in the display and the number is dialed.

**Three-Touch Dialing**

Memory locations 100 through 999 are special Three-Touch dialing locations.

**Example:** For Speed Dial number 113, briefly press the navigation key, briefly press the navigation key again, then press and hold the navigation key until the name and number appear in the display and the number is dialed.
Pause Dialing From a Contacts Entry

- If you speed dial a contact that contains (two-second) T Pause(s) simply wait for the pauses to pass and the dialing to complete.
- If you speed dial a contact that contains (hard) P Pauses, wait for the appropriate prompt(s) from the number you are calling (credit card number, bank account number, and so on) and press \( \text{TALK} \) to continue your dialing sequence.

Making a Call — Quick Search Dialing

Use the Quick Search feature to dial any number stored in your Contacts list by pressing the number keys that correspond to the first few letters of a Contact name.

Note: For information on activation, see “Quick Search” on page 108.

Quick Search Dialing a Contact

To find and dial a Contact, do the following:

1. In standby mode, press the number keys that correspond to the first few letters of the Contact name, as shown.
2. Press the Up navigation key. The Contact list Find screen appears showing the desired Contact name.
3. Highlight the desired Contact name, then press \( \text{TALK} \) to call the number.

Making a Call — Voice Dialing

Your My Shot mobile phone includes state-of-the-art voice recognition software that lets you dial numbers using your voice.

Using Voice Dial

Use the Voice Dial command to dial any number stored in your Contacts list by saying the name of the contact (Name Dialing). You can also use Voice Dial to dial any valid telephone number, even numbers not stored in your contact list, by speaking the individual digits in the number (Digit Dialing).

Voice Dialing Tips:

- Wait for the beep before speaking.
- Speak clearly at a normal volume, as if you were talking to someone on the phone.
- When saying a name, say the first name then the last name.

Dialing a Name

To dial a name, do the following:

1. In standby mode, press and hold the \( \text{ } \) key. “Say a Command” appears in the display and is pronounced through the earpiece.
2. Say, “Call”.
   You are prompted to “Say the name or #”.

Call Functions 18
3. Speak clearly and say the name of a person in your Contacts list, first name followed by last name.

If the name is recognized, Voice Dial repeats the name and dials the number.

If Voice Dial is not sure which name you said, it displays a choice list of up to three names and prompts you with “Did you say?” followed by the first name on the list.

4. Say “Yes” to confirm the name or “No” to hear the next name, or use the keypad to select the correct name from the list. (For more information, refer to “Choice Lists” on page 80.)
   - Press the Repeat soft key to say the name again.
   - Press Back to exit Voice Dial without dialing.
If the recognized name has multiple numbers stored for it (that is, Home, Work, Mobile, and so on), Voice Dial displays the possible choices and prompts you with “Which number?”

5. Say one of the following number types:
   - “Home”
   - “Work”
   - “Mobile”

Voice Dial dials the specified number.

Dialing a Number

To dial a number using Voice Dial, do the following:

1. In standby mode, press and hold the [ key.
   “Say a Command” appears in the display and is pronounced through the speaker.

2. Say “Call”.
VoiceSignal prompts you to “Say the name or #”.

3. Speak clearly and say the telephone number of the person you want to call. For example, say “7 8 1 9 7 0 5 2 0 0.”
If it recognizes the number, Voice Dial repeats and dials the number. If Voice Dial is not sure it has recognized the number, it displays a choice list of up to three numbers and prompts you with “Did you say?” followed by the first number on the list.

4. Say “Yes” to confirm the number or “No” to hear the next one, or use the keypad to select the correct number from the list.
Call Functions

(For more information, refer to “Choice Lists” on page 80.)

- Press the **Repeat** soft key to say the name again.
- Press **Back** to exit Voice Dial without dialing.

**Pause Dialing From a Contacts Entry**

- If you voice dial a contact that contains (hard waits) P Pauses(s), wait for the appropriate prompt(s) from the number you are calling (credit card number, bank account number, and so on) and enter the appropriate response(s).
- If you voice dial a contact that contains (two-second) T Pause(s) simply wait for the pauses to pass and the dialing to complete.

**Answering a Call**

Your phone notifies you of a call in the following ways:

- A ring tone sounds and/or your phone vibrates (Your phone provides eight ring volume settings including: **Silence All, Vibrate, 1 Beep, Low, Low/Medium, Medium, Medium/High, or High**, and/or different ring types to distinguish callers.)
- A phone number (unless blocked by the caller) and a name appear in the display (If the caller’s number and name are stored in your Contacts list).
- If the caller can’t be identified, **Call from unavailable#**, **Call from restricted number**, or no number appears in the display.
- Your phone continues to notify you of the call until one of the following events occurs:
  - You answer the call.
  - You ignore the call.
  - The calling party ends the call.
  - The call is sent to voicemail.

**Answering an Incoming Call**

- Press the **Talk** key. The ring tone and/or vibration stop and the caller’s voice can be heard in the earpiece.

**Tip:** You can set your phone to answer calls automatically or when you press any key but **Hang**. (For more information, refer to “Call Settings” on page 101.)

**Ignoring a Call**

When you ignore an incoming call, the call is immediately forwarded to your voice mail.

- During an incoming call, press the **Ignore** soft key. The caller is forwarded to your voice mail.

**Adjusting the Call Volume**

In standby mode, repeatedly press the volume key ( ) down until the Call Volume Level desired appears in the display. The volume key is on the left side of phone.
Calls Log

The Calls log retains information about Outgoing, Incoming, and Missed calls. You can also view times for your last call and the time totals for all calls.

Review the Calls Log

1. In standby mode, press MENU, then select Calls.
2. Press the number key associated with the Calls log that you wish to review or the function you wish to access:
   - Press 1 for Outgoing Calls.
   - Press 2 for Incoming Calls.
   - Press 3 for Missed Calls.
   - Press 4 for All Calls.
   - Press 5 for Data Call.
   - Press 6 for Call Timer.
   - Press 7 for Data Counter.

Note: In cases where there is a Contacts match for a Calls log entry, the name associated with the number appears in the display instead of the number.

Outgoing Calls

Your phone retains information about the last 90 outgoing calls and stores them in the Outgoing calls log. You can review the

Outgoing calls log for the time and date of a call, as well as other information.

Note: To quickly view your most recent calls, briefly press in standby mode. Up to 270 of your most recent outgoing, incoming, and missed calls appear in the display.

1. In standby mode, press MENU, then select Calls ➔ Outgoing Calls. A list of your outgoing calls appears in the display.
2. Select a call to view further information about it.
3. Press the Options soft key. A pop-up menu containing the following options appears in the display:
   - Save — Save the number to your Contacts.
   - Details — Calls to Contacts Only — Shows the entry for the called Contact.
   - Erase — Erase the selected call from your Outgoing call log.
   - Lock/Unlock — Protect the selected call from being erased.
   - Erase All — Erase all calls from your Outgoing call log.
   - View Timer — Shows the number of calls and/or the total time spent on the Last Call, Outgoing Calls, Incoming Calls, Roaming Calls, All Calls, Last Reset, and Lifetime Calls.
4. Press the **Msg** soft key. The following options appear in the display:

- **Text Message** — Lets you send a text message to the selected number called.
- **Picture Message** — Lets you send a picture message to the selected number called.
- **Postcard** — Lets you send a postcard to the selected number called.

**Note:** For more information, refer to “Creating and Sending New Messages” on page 47.

5. Select an option to perform its function.

### Incoming Calls

Your phone retains information about the last 90 Incoming calls and stores them in the Incoming call log. You can review the Incoming call log for the time and date of the call, as well as other information.

1. In standby mode, press **MENU**, then select **Calls → Incoming Calls**. A list of your Incoming calls appears in the display.

2. Select a call to view further information about it.

3. Press the **Options** soft key. A pop-up menu containing the following options appears in the display:

- **Save** — Save the number to your Contacts.
- **Details** — Calls from Contacts Only — Shows the entry for the calling Contact.
- **Erase** — Erase the selected call from your Incoming calls log.
- **Lock/Unlock** — Protect the selected call from being erased.
- **Erase All** — Erase all calls from your Incoming calls log.
- **View Timer** — Shows the number of calls and/or the total time spent on the Last Call, All Calls, Outgoing Calls, Incoming Calls, Roaming Calls, Lifetime Calls.

4. Press the **Msg** soft key. The following options appear in the display:

- **Text Message** — Lets you send a text message to the selected calling number.
- **Picture Message** — Lets you send a picture message to the selected calling number.
- **Postcard** — Lets you send a postcard to the selected number called.

**Note:** For more information, refer to “Creating and Sending New Messages” on page 47.

5. Select an option to perform its function.
**Missed Calls**

Your phone retains information about the last 90 missed calls (calls that were never picked up) and stores them in the Missed call log. You can review the Missed call log for the time and date of the call, as well as other information.

1. In standby mode, press **MENU**, then select **Calls → Missed Calls**. A list of your missed calls appears in the display.
2. Select a call to view further information about it.
3. Press the **Options** soft key. A pop-up menu containing the following options appears in the display:
   - **Save** — Save the number to your Contacts.
   - **Details** — Calls from Contacts Only — Shows the entry for the calling Contact.
   - **Erase** — Erase the selected call from your Missed call log.
   - **Lock/Unlock** — Protect the selected call from being erased.
   - **Erase All** — Erase all calls from your Missed call log.
   - **View Timer** — Shows the number of calls and/or the total time spent on the Last Call, All Calls, Outgoing Calls, Incoming Calls, Roaming Calls, Lifetime Calls.
4. Press the **Msg** soft key. The following options appear in the display:
   - **Text Message** — Lets you send a text message to the selected called number.
   - **Picture Message** — Lets you send a picture message to the selected called number.
   - **Postcard** — Lets you send a postcard to the selected number called.

**Note:** For more information, refer to “Creating and Sending New Messages” on page 47.

5. Select an option to perform its function.

**All Calls**

You can review all of the calls log entries (outgoing, incoming, and missed calls) for the time and date of a call, as well as other information.

1. In standby mode, press **MENU**, then select **Calls → All Calls**. A list of all logged calls appears in the display.
2. Select a call to view further information about it.
3. Press the **Options** soft key. A pop-up menu containing the following options appears in the display:
   - **Save** — Save the number to your Contacts.
   - **Details** — Calls from Contacts Only — Shows the entry for the calling/called Contact.
• **Erase** — Erase the selected call from your Calls log.
• **Lock/Unlock** — Protect the selected call from being erased.
• **Erase All** — Erase all calls from your Calls log.
• **View Timer** — Shows the number of calls and/or the total time spent on the Last Call, All Calls, Outgoing Calls, Incoming Calls, Roaming Calls, Lifetime Calls.

4. Press the **Msg** soft key. The following options appear in the display:

   • **Text Message** — Lets you send a text message to the selected calling/called number.
   • **Picture Message** — Lets you send a picture message to the selected calling/called number.
   • **Postcard** — Lets you send a postcard to the selected number called.

**Note:** For more information, refer to “Creating and Sending New Messages” on page 47.

5. Select an option to perform its function.

### Data Call

Your phone retains information about the last 90 data calls and stores them in the Data call log. You can review the Data call log for the time, date, and duration of a data call, as well as other information.

1. In standby mode, press **MENU**, then select **Calls** ➔ **Data Call**. A list of your data calls appears in the display.
2. Select a call to view further information about it.
3. Press the **Options** soft key. A pop-up menu containing the following options appears in the display:
   • **Erase** — Erase the selected data call from your Data Call log.
   • **Lock / Unlock** — Protect the selected data call from being erased.
   • **Erase All** — Erase all calls from your Outgoing call log.
   • **Data Counter** — Shows the total data Transmitted during the call, Received during the call, Total data transmitted and received during the call, the date and time the Data Counters were last reset, and the Lifetime Data Counter.

4. Select an option to perform its function.

### Call Timer

View the duration of your last call, total calls, and calls made during the life cycle of your phone using the Call Timer feature.

**Note:** Call Timer is not for billing purposes.

1. In standby mode, press **MENU**, then select **Calls** ➔ **Call Timer**.
The following options appear in the display:

- **Last Call** — View the duration of your last call.
- **Outgoing Calls** — View the duration of the total outgoing calls made on your phone since the last erasure.
- **Incoming Calls** — View the duration of the total incoming calls received on your phone since the last erasure.
- **Roaming Calls** — View the total calls duration on your phone while roaming since the last erasure.
- **All Calls** — View the duration of the total call, incoming, outgoing, and data calls made on your phone since the last erasure.
- **Last Reset** — View the time and date all timers were last reset.
- **Lifetime Calls** — View the duration of all calls since your phone was activated.

2. Press the **Reset ( )** to reset a selected counter except Last Reset and Lifetime Calls.

3. Press the **Reset All ( )** to reset all counters except Lifetime Calls.

4. Press or END if you wish to exit the list.

**Note:** Although Total call timers can be erased, the Lifetime call timer can never be erased.

---

**Data Counter**

View the amount of Transmit data, Receive data, and Total data transmitted or received since the last time you reset the data counters, and the Lifetime amount of data transmitted or received.

**Note:** Data Counter is not for billing purposes.

1. In standby mode, press **MENU ➔ Calls ➔ Data Counter.** The following options appear in the display:

   - **Transmit** — View the total amount of data transmitted by your phone since the last reset.
   - **Received** — View the total amount of data received by your phone since the last reset.
   - **Total** — View the total amount of data sent or received by your phone since the last reset.
   - **Last Reset** — View the time and date all timers were last reset.
   - **Lifetime Data Counter** — View the total amount of data sent or received by your phone since activation (Lifetime Data Counter cannot be reset).

2. Press the **Reset ( )** to reset a selected counter except Last Reset and Lifetime Data Counter.

3. Press the **Reset All ( )** to reset all counters except Lifetime Data Counter.
4. Press # or BACK if you wish to exit the list.

Note: Although Total data counters can be erased, the Lifetime Data Counter can never be erased.

Roaming
What is Roaming?
Roaming lets you use your phone when you travel outside of your Wireless Provider’s coverage area. The Roaming icon (R) appears in the top line of the display when Roaming is active, and extra charges may apply when making or receiving calls.

Note: Some features may be unavailable while roaming. Roaming also consumes additional power from the battery requiring more frequent recharging. Contact your Wireless Provider for more information about Roaming.

How Roaming Works
Roam Option lets you set roaming preferences if you move in and out of your home network. The following roaming options are available:

- **Home only** — Your phone is available for normal operation only in the designated coverage area.

- **Automatic** — Your Wireless Provider’s Preferred Roaming List (PRL) of networks is used to acquire service. If no preferred networks are found, any digital system is acquired.

Note: For more information, refer to “System Select” on page 107.
Section 4: Menu Navigation

This section explains the menu navigation for your phone. It also includes an outline of the menus available with your phone.

Menu Navigation

Access menus using the **MENU** key ( ), the Navigation key ( ), the soft keys (  ), or a shortcut.

1. In standby mode, press **MENU** ( ). The Main Menu appears in the display.
2. Use the Navigation key ( ) to browse phone menus.
3. Press  to access a menu or sub-menu highlighted in the display.

Return to the Previous Menu

Press  or **Back** ( ) to return to the previous menu.

Navigation Key Shortcuts

In standby mode, press a navigation key (as illustrated below) to launch its corresponding application.

The In-Use Options

Access numerous menus and features even while in a call.

Note: If the call is disconnected while accessing the In-Use Option, the In-Use Option disappears from the display and the phone eventually returns to standby mode.

1. While in a call, press **Options** ( ). The following menu items appear in the display:
   - **Contacts** — The Contacts Find screen appears in the display.
   - **Call History** — View, respond to, and manage your recent outgoing, incoming, and missed calls.
   - **Message** — The Messages menu appears in the display. (For more information, refer to “Messaging” on page 47.)
• **Connect Bluetooth** — Connects a Bluetooth device, such as a headset, in place of the phone’s earpiece and microphone.

• **Speakerphone** — Enables Speakerphone mode to share the call with others nearby.

• **Voice Memo** — Record a voice memo.

Do one of the following:

• Use the Navigation key to highlight a menu or feature. Press the key to open the highlighted menu or to activate the highlighted feature.

• Press the key to exit the menu.

**Tip:** You can block sound going to the other party(ies) on this call by pressing Mute / Unmute. This can reduce noise on conference calls.

You can launch Speakerphone mode to conduct this call hands-free by pressing Options Speaker On.

---

**Navigate Using Shortcuts**

**Using Menu Item Number Shortcuts**

You can also access menus and sub-menus using menu item numbers. This method is often called a “shortcut.” To shortcut to a menu or sub menu, press MENU ( ), then enter the menu and/or sub menu number(s) for the feature in question.

1. In standby mode, press MENU ( ). The main menu appears in the display.

2. Press the number of the menu, sub menu, and so on to arrive at the desired feature.

**Example:** Pressing MENU ➔ 8 ➔ 5 ➔ 2 takes you to your phone’s Language setting.

---

**Using Quick Search**

You can also access menus, sub-menus, and menu items by name.

**Note:** For information on activation, see “Quick Search” on page 108.

1. In standby mode and using the alpha-numeric keys, enter the first few characters of the name to the desired menu, sub-menu, or menu item.

2. Press the Down navigation key. The Menu List screen appears in the display listing the menu(s), sub-menu(s), and menu item(s) with matching names.

3. Use the Up/Down navigation keys to highlight the desired name, then press OK ( ) to access your selection.
Section 5: Understanding Your Contacts

This section explains how to manage your daily contacts by storing their name and number in your Contacts. Contacts entries can be sorted by name.

Your Contacts List

Your Contacts list can store up to 500 entries, with each contact having up to five associated phone numbers, an e-mail address, and a picture ID.

Each phone number can be up to 48 digits in length, including hard pauses. Contact names can be up to 32 characters in length. You can also specify a memory location for each entry, and you can restrict access to the Contacts list to prevent unauthorized use.

Tip: One-Touch, Two-Touch, and Three-Touch Dialing allow you to call numbers stored in your Contacts list faster. (See page 17.)

Open Your Contacts List

1. In standby mode, press MENU ( ) and select Contacts. The following Contacts sub-menus and options appear in the display:
   - Find — Find a phone number by entering a Contact name.

Adding a New Contacts Entry

You can add an entirely new entry to your Contacts list or add information to an existing entry.

Using the Contacts Add Option

1. In standby mode, press MENU ( ) and select Contacts ➔ Add New Contact. The New Contact screen appears in the display with the Name field highlighted.

2. Enter a name or phrase to associate with the type using the keypad. (For more information, refer to “Entering Text” on page 43.)
3. Use the Up and Down navigation keys to highlight each field.

4. Enter a phone number (Mobile, Home, or Work) or an e-mail address (E-mail) for the new Contacts entry.

5. If desired, assign the new Contact to a Group. This lets you send messages to and find this Contact and other related contacts. (For more information, refer to “Group” on page 34.)

6. If desired, select a unique Ringtone and/or MsgRingtone to identify this new Contact. (For more information, refer to “Ringer Type” on page 100.)

7. If desired, enter an additional phone number (My Circle or Fax) or e-mail address (Email 2) for the new Contacts entry.

8. If desired, select an identifying image by highlighting the photo ID field and pressing the Set soft key. The My Images screen appears in the display. (For more information, refer to “Using My Images Gallery” on page 73.)

9. Press SAVE ( ) to save the new Contacts entry.

---

**Saving a Number from a Call**

Once you’ve finished a call, you can save the number of the caller to your Contacts list.

**Note:** If the call was incoming and Caller ID information was unavailable, then the Save option is also unavailable.

1. After you press END to end your call, the call time, length of call, phone number, and name of the other party (if available) appear in the display.

2. Press the Save soft key. The Save screen appears in the display showing the following options:
   - Create New — Lets you create a new Contacts entry.
   - Update Existing — Lets you add the number or e-mail address you just entered to an existing Contacts entry.

**Tip:** You can also store a phone number from standby mode by entering the number, and pressing the Save soft key.
Creating a new Contacts entry:

3. Select Create New. The following (number type) icons appear in the display:

   - Mobile
   - Home
   - Work
   - My Circle
   - Fax

4. Select the number type that matches your new entry. The New Contact screen appears in the display with the number being save populating the selected number type field. (For more information on creating a new Contacts entry, see “Using the Contacts Add Option” on page 29.)

Adding the number to an existing Contacts entry:

5. Use the navigation keys to highlight Update Existing, then press . The Update Existing screen appears in the display showing your current Contacts list.

6. Enter the first few characters of the Contacts entry name under which you will store the saved number. (For more information on finding a Contacts entry, see “Using the Contacts Add Option” on page 29.)

7. Select the desired Contacts entry. The following (number type) icons appear in the Update Existing screen:

   - Mobile
   - Home
   - Work
   - My Circle
   - Fax

8. Select the appropriate unassigned number type. The Edit Contact screen appears in the display.

9. Make any added changes you wish to the Contacts entry. (For more information, refer to “Editing an Existing Contact Entry” on page 35.)

10. Press SAVE ( ) to save the entry.

Storing Number from a Calls Log

You can store numbers from the Calls logs to your Contacts.

1. In standby mode, press MENU ( ), then select Calls.

2. Select from the following Calls logs:
   - Outgoing Calls
   - Incoming Calls
   - Missed Calls
• All Calls
A list of your calls appears in the display.

3. Highlight the number you wish to store in Contacts.

4. Press the Options soft key. The following options appear in the display:
  • Save — Saves the selected number to your Contacts list.
  • Details — Calls to/from Contacts Only — Shows the entry for the called Contact.
  • Erase — Deletes the selected number from the selected Calls log.
  • Lock / Unlock — Prevents/allows deletion of the selected number.
  • Erase All — Deletes all numbers from the selected Calls log.
  • View Timer — Shows the call times for the Last Call, All Calls, Incoming Calls, Outgoing Calls, Roaming Calls, Last Reset, and Lifetime Calls timers for the selected Calls log.

5. Select Save. The following options appear in the display:
  • Create New — Lets you create a new Contacts entry.
  • Update Existing — Lets you add the number or e-mail address you just entered to an existing Contacts entry.

For more information on saving the number, see “Saving a Number from a Call” on page 30.

Finding a Contacts Entry

Voice Method

Use the VoiceSignal Contacts command to view contact information for any named contact stored in your Contacts list by saying the name.

Note: The Contacts command shows the requested contact information in the display but does not dial any phone numbers for the contact.

To look up information for a specific contact:

1. In standby mode, press and hold for Voice Service.
   “Say a Command” appears in the display and is pronounced through the speaker.

2. Say “Lookup”.
   VoiceSignal prompts you to “Say the name or #.”

3. Speak clearly and say the full name of the person you want to call, exactly as it is entered in your contact list.
   • If VoiceSignal recognizes the name you said, the contact information for that name appears in the display.
   • If VoiceSignal does not recognize the name you said, a choice list of up to three names appears in the display, and VoiceSignal prompts you with “Did you say?” followed by the first name on the list.
4. Say “Yes” to confirm the name or “No” to hear the next name, or use the keypad to select the correct name from the list. (For more information, refer to “Choice Lists” on page 80.)
   - To say the name again, press the Repeat soft key.
   - To exit VoiceSignal without dialing, press .
5. The contact information for the name you selected appears in the display.

Keypad Methods

Find by Name

If you have stored a named contact in your Contacts list, Find lets you locate the entry quickly.

1. In standby mode, do one of the following:
   - Press the Down navigation key (Contacts Find shortcut).
   - Press MENU ( ) and select Contacts → Find.

The FIND screen appears in the display with an alphabetical list of Contacts showing.

2. Enter the first few characters of the name of the contact as it appears in your Contacts list.

Example: If you saved a contact name as “Amy Smith”, begin your search for that contact by pressing for “A”.

Note: As you enter letters, the entry names of the closest matches (thus far) appear in the display.

3. When the desired Contacts entry is listed in the display, highlight the contact using the navigation keys (if necessary). Then, do one of the following
   - To dial the number associated with the named Contact, press .
   - To change the information about the contact, press the Edit soft key.
   - To show information about the contact, press VIEW ( ).
   - To access other options, press the Options soft key. The following options appear in the display:
     - New Contact — Lets you add a new number to your Contacts list or to the selected contact.
     - Erase — Lets you delete the highlighted contact.
     - Send Message — Lets you send a text or picture message to the selected contact.
     - Call — Lets you place a call to the highlighted contact.
     - Send Name Card With Bluetooth — Lets you send a Name Card containing the selected Contact’s information to another Bluetooth device.
– **Set as/Remove Speed Dial** — Lets you assign a speed dial number to a contact. You can select the number by either entering it in the *Go To* box or by using the Navigation key, then press # to set the number.

**Group**

This option lets you find a Contacts list entry with a specific Group name.

1. In standby mode, press **MENU ( )** and select **Contacts ➔ Group**. The **Group List** screen appears in the display.
2. Select the group you wish to browse. The selected Group list appears in the display.
3. Highlight the desired Contacts entry, then do one of the following:
   - To delete the selected contact from the Group, press the **Remove** soft key. (Does not apply to the General group.)
   - To **ADD** an existing contact entry to the selected Group, press the Contacts key. (Does not apply to the General group.)
   - To send a text or picture message to selected Contact(s) in the current Group, press the **Options** soft key.
4. Select the desired option to enter that option’s sub-menu.

**Search by Number**

This option lets you find a Contacts list entry by one of its phone numbers.

1. In standby mode, enter the first few numbers of the Contacts list entry you wish to find (such as the area code or area code and exchange — for example, 888-987).
2. Press the **Options** (right) soft key ( ). The following menu options appear in the display:
   - **Search** — Lets you find Contacts list entries by their phone numbers.
   - **P pause** — Adds a hard pause (awaits input from you).
   - **T pause** — Adds a two-second pause.
   - **Send Message** — Lets you send a text or picture message to the entered number.
3. Select the **Search** option. The **FIND** screen appears in the display listing all phone numbers in your Contacts list that contain the entered digits.
4. Highlight the desired Contacts entry. Then do one of the following:
   - To dial the highlighted number, press **TALK**.
   - To display information about the Contacts entry associated with the highlighted number, press **VIEW ( )**. From the **View Contact** screen, you can erase or edit the selected Contacts entry.
Editing an Existing Contact Entry

Once stored in the Contacts, an entry can be changed quite easily.

1. Find the desired entry in the Contacts list. (For more information, refer to “Finding a Contacts Entry” on page 32.)
2. Press the Edit soft key. The Edit Contact screen appears in the display with the contact name highlighted.
3. Highlight a number stored in this contact entry.
4. To backspace and delete numbers, press \-.
5. To clear all numbers in the highlighted field, press and hold \-.

Note: You can also add numbers (such as a My Circle number or a Fax number) to the entry, assign it to a Group, and add other information.

6. When you’re finished editing the entry, press \#. Your changes are saved and a confirmation message appears in the display.

Adding Pauses to Contacts Numbers

When you call automated systems (like banking services), you are often required to enter a password or account number. Instead of manually entering the numbers each time, you can store the numbers in your Contacts along with special characters called pauses.

- **P pause** — A hard pause stops the calling sequence until further input from you.
- **T pause** — A two-second pause stops the calling sequence for two seconds and then automatically sends the remaining digits.

Tip: You can enter multiple two-second pauses to extend the length of a pause. For example, two consecutive two-second pauses cause a total pause time of four seconds.

Note: Keep in mind that pauses count as digits towards the 32-digit maximum.

Store Pauses in a New Contacts Entry

1. In standby mode, enter the number you wish to store (such as your bank’s teleservice number).
2. Press the Options soft key.

The following menu options appear in the display:
• **Search** — Lets you find Contacts list entries by their phone numbers.
• **P pause** — Adds a hard pause (awaits input from you).
• **T pause** — Adds a two-second pause.
• **Send Message** — Lets you send a text or picture message to the entered number.

3. Select the pause option of your choice to enter the highlighted pause into your number sequence.

4. When you're finished entering the number and pauses, press the **Save** soft key to store the number in your Contacts.

**Add Pauses to an Existing Contacts Entry**

1. Find the desired entry in the Contacts list. (For more information, refer to “Finding a Contacts Entry” on page 32.)

2. Press the **Edit** soft key. The **Edit Contact** screen appears in the display with the contact name highlighted.

3. Highlight a number stored in this contact entry.

4. Use the Left and Right navigation keys to place the cursor where you want to add a pause (usually at the right-hand end of the number).

5. Press the **Options** soft key. The following menu options appear in the display:
   • **Set Speed Dial / Remove speed dial** — lets you assign or remove a Speed Dial number for this Contacts entry.
   • **Set as default** — your phone automatically dials this number when you find this Contacts entry and press the **Talk** key.
   • **T pause** — a two-second pause.
   • **P pause** — a hard pause (awaits input from you).

6. Select the pause option of your choice to enter the highlighted pause into your number sequence.

7. When you’re finished entering pauses, press **Talk** to save your changes to the number in your Contacts list.

**Assigning Speed Dial Numbers**

When you add or edit an entry to the Contacts list, you have the option of assigning a Speed Dial number using the Options pop-up menu or of returning to the Contacts menu and using the Speed Dial option. You can also change a contact’s Speed Dial number.

1. Find and highlight the desired entry in the Contacts list.
   (For more information, refer to “Finding a Contacts Entry” on page 32.)
2. Do one of the following:

Using the **Options** soft key:

3. Press the **Options** soft key. The following menu options appear in the display:
   - **New Contact** — Lets you add a new number to your Contacts list or to the selected contact.
   - **Erase** — Lets you delete the highlighted contact.
   - **Send Message** — Lets you send a text or picture message to the selected contact.
   - **Call** — Lets you place a call to the highlighted contact.
   - **Send Name Card With Bluetooth** — Lets you send a Name Card containing the selected Contact's information to another Bluetooth device.
   - **Set as Speed Dial** — Lets you assign a speed dial number to a contact. You can select the number by either entering it into the Go To box or using the navigation keys, then press \[
\] to set the number.

4. Select **Set as Speed Dial**. The **Speed Dial** menu appears in the display.

5. Select an unassigned Speed Dial number to assign it to the selected Contact. You are prompted to confirm the assignment.

6. Press the **Yes** soft key to assign the selected Speed Dial number.

Using the **Edit** soft key:

7. Press the **Edit** soft key. The **Edit Contact** screen appears in the display with the Contact name highlighted.

8. Highlight a number stored in this Contact entry.

---

**Note:** If a Contact has more than one stored number (such as Home and Office), you can select which of these numbers your phone will dial when you speed dial that Contact.

9. Press the **Options** soft key. The following menu options appear in the display:
   - **Set Speed Dial / Remove speed dial** — lets you assign or remove a Speed Dial number for this Contacts entry.
   - **Set as default** — your phone automatically dials this number when you Find this Contacts entry and press \[
\].
   - **P pause** — a hard pause (awaits input from you).
   - **T pause** — a two-second pause.

10. Select **Set as/Remove Speed Dial**. The **Speed Dials** screen appears in the display. (If a speed dial number has been set previously, you can remove it by pressing \[
\]. If none has been set, continue with the next step.)
11. Select an unassigned Speed Dial number to assign it to the selected Contact. You are prompted to confirm the assignment.

12. Press the Yes soft key to assign the selected Speed Dial number. The Edit Contact screen appears in the display.

13. Press 📲 to save the new Speed Dial number assignment.

**Adding a Number to My Circle**

When you add or edit an entry to the Contacts list, you have the option of entering a number in the My Circle field. When you view an entry to the Contacts list, you have the option of assigning an existing number to My Circle by using the Options pop-up menu. You can also change a contact’s My Circle number.

**Entering a My Circle Number**

1. Find and edit the desired entry in the Contacts list. (For more information, refer to “Finding a Contacts Entry” on page 32 and to “Editing an Existing Contact Entry” on page 35.)

— Or —

Add a new Contact. (For more information, refer to “Adding a New Contacts Entry” on page 29.)

2. Highlight the My Circle field, then enter the My Circle number.

3. Press 📲 to save the new My Circle number assignment.

**Assigning a Number to My Circle**

1. Find and highlight the desired entry in the Contacts list. (For more information, refer to “Finding a Contacts Entry” on page 32.)

2. Press VIEW ( ). The View Contact screen appears in the display listing the numbers and settings for this Contact.

3. Highlight the number to be added to your My Circle group, then press the Options soft key. The following menu options appear in the display:

   - **Send Message** — Lets you send a text or picture message to the selected contact.
   - **Call** — Lets you place a call to the highlighted contact.
   - **Set as / Remove My Circle** — lets you add the contact to/remove the contact from your My Circle group.
   - **Set voice call ringtone** — Lets you assign a specific voice call ringtone to the selected Contact to indicate calls from this Contact.
   - **Set Msg Ringtone** — Lets you assign a specific Message ringtone to the selected Contact to indicate messages from this Contact.
- **Buy a Ringtone** — Launches Celltop to let you buy a ringtone. (For more information, refer to “Celltop” on page 63.)

4. Select **Set as My Circle**.

  **Note:** The first time you select this option, you are prompted to “go to alltel.com/myaccount to update Your Circle numbers.” [For more information, refer to the Celltop Guide or call 1-800-ALLTEL-1 (1-800-255-8351).]

  “Contact updated” pops-up momentarily in the display. You are returned to the **Find** screen, with the default number indicator [such as the default, Mobile icon (표)] changed to the My Circle icon (등록).

**Removing a Number from My Circle**

1. Find and highlight the desired entry in the Contacts list. (For more information, refer to “Finding a Contacts Entry” on page 32.)

2. Press VIEW (표). The **View Contact** screen appears in the display listing the numbers and settings for this Contact.

3. Highlight the number to be added to your My Circle group, then press the **Options** soft key. The following menu options appear in the display:

   - **Send Message** — Lets you send a text or picture message to the selected contact.
   - **Call** — Lets you place a call to the highlighted contact.
   - **Set as / Remove My Circle** — lets you add the contact to/remove the contact from your My Circle group.
   - **Set voice call ringtone** — Lets you assign a specific voice call ringtone to the selected Contact to indicate calls from this Contact.
   - **Set Msg Ringtone** — Lets you assign a specific Message ringtone to the selected Contact to indicate messages from this Contact.
   - **Buy a Ringtone** — Lauches Celltop to let you buy a ringtone. (For more information, refer to “Celltop” on page 63.)

4. Select **Remove My Circle**.

  “Contact updated” pops-up momentarily in the display. You are returned to the **Find** screen, with the default changed from the My Circle icon (등록) to another number type icon number indicator [such as the default, Mobile icon (표)].

**Add a Number or Email Address to an Existing Entry**

1. Find the desired entry in the Contacts list. (For more information, refer to “Finding a Contacts Entry” on page 32.)
2. Press the **Edit** soft key. The **Edit Contact** screen appears in the display with the contact name highlighted.

3. Highlight a number field or the **Email** field in this Contacts entry.

4. Enter the phone number or e-mail address for the new Contacts entry.

5. Press 🔄 to add the number or Email address to the existing entry.

**Edit an Existing Email Address**

1. Find the desired entry in the **Contacts** list. (For more information, refer to “Finding a Contacts Entry” on page 32.)

2. Press the **Edit** soft key. The **Edit Contact** screen appears in the display with the contact name highlighted.

3. Highlight the **E-mail** or **Email 2** field (labeled with the @ symbol).

4. Use the keypad to edit the e-mail address. (For more information, refer to “Entering Text” on page 43.)
   - To insert the @ symbol, do the following:
     - Press the Left soft key. A pop-up menu appears in the display with **Abc** highlighted.
     - Highlight **Shortcuts**, then press 🔄. 
     - Highlight the @ symbol, and press 🔄. 
     - Enter the remainder of the Email address using the keypad. (For more information, refer to “Entering Text” on page 43)
   - To add the domain type to the end of the Email address, do the following:
     - Press the Left soft key. A pop-up menu appears in the display with **Abc** highlighted.
     - Highlight **Shortcuts**, then press 🔄.
     - Select the desired domain type (such as, .com, .net, or .edu) to add to the Email address.

5. Press 🔄 to save your changes.

**Speed Dial Numbers**

You can assign and change Speed Dial numbers for Contacts entries.

1. In standby mode, press **MENU (’int’)** and select **Contacts ➔ Speed Dial**. The **Speed Dial** list appears in the display.

**Tip:** You can also assign a Speed Dial number when creating or editing a Contacts entry. For more information, refer to “Assigning Speed Dial Numbers” on page 36

2. Highlight a Speed Dial number.
3. Press SET ( ). The Set Speed Dial screen appears in the display.

4. Enter or highlight a Contact entry, then press . You are prompted to confirm the new Speed Dial setting.

5. To save the new setting, press the Yes soft key. To discard the new setting, press the No soft key.

Renaming a Contacts Group

Use this option to rename a Group in your Contacts list.

1. In standby mode, press MENU ( ) and select Contacts ➔ Group. A list of Group names (like the following list) appears in the display:
   - General
   - Family
   - Friends
   - Colleagues
   - Business

2. Highlight the Group (other than General) that you wish to rename, then press the Options soft key and select Rename.

3. The Rename Group screen appears in the display. The current name of the selected Group shows with a flashing cursor at the end of the name.

4. Enter a new Group name using the keypad. (For more information, refer to “Entering Text” on page 43.)

5. Press to save the changed group name.

Deleting a Contacts Entry

1. Find and highlight the desired entry in the Contacts list. (For more information, refer to “Finding a Contacts Entry” on page 32.)

2. Press the Options soft key and select Erase. The phone prompts you to confirm the erasure.

3. To erase the selected Contact entry, press the Yes soft key. To keep the selected Contact entry, press the No soft key.

Sending a Contacts Entry

Use the Send Name Card With Bluetooth option to send one or more selected Contacts entries to another, compatible phone or other device over a Bluetooth connection.
1. Find and highlight the desired entry in the Contacts list. (For more information, refer to “Finding a Contacts Entry” on page 32.)

2. Press the Options soft key, then select Send Name Card With Bluetooth. The Send Name Card With Bluetooth screen appears in the display with the highlighted Contacts entry marked.

3. Highlight another Contacts entry you wish to send and press MARK ( ) to mark the entry for sending. Repeat this step for all other Contacts entries you wish to send.

4. When you have marked all the entries you wish to send, press the Done soft key. The Choose device screen appears in the display.

5. Use the Up and Down navigation keys to highlight the name of the receiving device, then press . Your phone automatically connects with the other device and sends the selected Contact entries.

**Memory Info**

Use the Memory sub-menu to view the amount of Contacts entries you have stored, as well as the remaining memory.

- In standby mode, press MENU ( ) and select Contacts ➔ Memory Info. The amounts of memory used and remaining for Contacts entries appear in the display.

---

**Note:** For information on turning off the Bluetooth connection, see “Bluetooth” on page 83.
Section 6: Entering Text

This section outlines how to select the desired text input mode when entering characters into your phone. This section also describes how to use the T9 predictive text entry system to reduce the amount of key strokes associated with entering text.

Text Entry Modes

You can compose text messages using alphabetical characters, symbols, and numbers. Each method of character entry (symbol, number, and so on) is called a text entry mode. There are four text entry modes, as indicated:

• **Alpha**—Alphabetical text entry mode. Options are:
  – **ABC** — All upper case
  – **Abc** — Initial capital
  – **abc** — All lower case

• **Symbols**—Symbol entry mode. Enter symbols into your message by pressing the corresponding number that appears above it in the display.

• **123** — Number entry. Enter numbers by pressing the corresponding key on the keypad.

• **T9 Word** — Predictive text mode. Press each key only once to enter the letter of the word that you’re spelling.

Your current mode of text entry [**Abc**, **123**, or **T9 Word**] is indicated in the lower left part of the display when composing a text message.

Changing the Text Entry Mode

1. While composing a text message, press the Left soft key (** ), A pop-up menu containing the following options appears in the display:
   • **T9 Word**
   • **Abc**
   • **ABC**
   • **123**
   • **Symbols**
   • **Add T9 Word**

**Abc** is highlighted. Use the Up and Down navigation keys to choose any of the other four text entry modes. Uses of the text entry modes are explained in greater detail in “Messaging” on page 47.
Entering Text in Alpha (Abc) Mode

1. Enter characters while in Alpha (Abc) mode by pressing the key with the desired characters (such as, pressing  once for “G”).
2. Press the key repeatedly until the desired character appears in the display (such as, pressing  two times for “H”).
3. Pause briefly and the displayed character is accepted and inserted into your message.
4. Press the  key to enter a space.

Entering Text in T9 Word Mode

T9 Word recognizes commonly used words for a sequence of keypresses and inserts the word into your message. Using T9 mode is much faster than the more traditional method Alpha mode, since T9 requires only one key press per letter of the word that you are spelling.

Example: If you press the key sequence , the word “Bad” is likely to appear in the text entry field. In the pop-up list, “Bad”, “Ace”, and “Caf” appear.

Note: See “Changing the Text Entry Mode” on page 43 for instructions on changing text entry modes.

1. While in T9 Word mode, press each key that corresponds to a desired letter, in sequence, one time. A list of words and/or abbreviations pops-up at the bottom of the text entry screen.

Example: If you press the key sequence , the word “Bad” is likely to appear in the text entry field. In the pop-up list, “Bad”, “Ace”, and “Caf” appear.

2. When you have completed pressing all the keys for the desired word, review the word appearing in the text entry field and pop-up list.
3. If the word in the text entry field is not the one you meant to enter, use the Up and Down navigation keys to highlight the desired word in the pop-up list.

Example: When you press the key sequence , the word “And” appears on the screen. Suppose the word you want is “cod”. Just press the Up and Down navigation keys until “Cod” is highlighted in the display.

4. Press  to accept the highlighted word.

For practice, enter the word “SAMSUNG” into your message by pressing each of the following keys only once:
T9 Word recognizes that the most commonly used word for the sequence of keys you just pressed is “Samsung.”

**Tip:** To enter words not likely to be in the T9 Word dictionary, such as uncommon abbreviations or slang, try changing the text entry mode from T9 Word to Abc, abc, or ABC.

### Adding Words to the T9 Word Dictionary

If pressing the keys corresponding to a word you want to enter and then scrolling through the pop-up list does not display that word, do the following:

1. Clear the word using the key.
2. Change the text entry mode to Add T9 Word.

**Note:** See “Changing the Text Entry Mode” on page 43 for instructions on changing the text entry mode to Add T9 Word.

3. Enter the word you want to add to the T9 Word dictionary.

**Note:** In Add T9 Word mode, you enter a word using the same multiple keypress method as when in Abc text entry mode.

4. Press . The word is added to the T9 dictionary.

### Entering Upper and Lower Case Letters

In Abc and T9 Word modes, you can select to enter only upper case letters (ABC/T9 WORD), only lower case letters (abc/T9 word), or a mix of the two (Abc/T9 Word).

1. While in T9 Word or Abc mode, repeatedly press the key to change the capitalization setting.

   The left soft key label changes to indicate the current capitalization setting.

   For example, if the left soft key label is ABC, and you want to enter the word “BALL”, press the key until the left soft key label changes to abc, then enter the word “ball”.

**Tip:** To enter a capital letter within a word, such as “SimTam”, change the capitalization setting to Abc at the beginning of the word and before entering the “T”. The capitalization setting will automatically change to abc after you enter each upper case letter.

### Entering Numbers

Enter numbers into a text message while in number mode (123).

**Note:** See “Changing the Text Entry Mode” on page 43 for instructions on changing text entry modes.
While in 123 mode, press the key labeled with the number that you wish to insert into your message. For example, press 4 to enter the number ‘4’ in your message.

**Entering Symbols**

Symbol mode enables you to enter symbols such as @ or % in a text message.

---

**Note:** See “Changing the Text Entry Mode” on page 43 for instructions on changing text entry modes.

---

1. While in **Symbols** mode, use the **Prev** soft key and the **Next** soft key to page through the symbols, if necessary.

2. Press the key that corresponds to the symbol that you wish to enter. For example, press 4 for an exclamation point (!).

---

**Note:** You can also use the navigation keys to highlight the desired symbol and then press  to enter the selected symbol into your message.

---

3. Repeat steps 1 and 2 to insert as many symbols into your message as desired.
Section 7: Messaging

This section explains how to create, send, receive, and view different types of messages. This section also describes the features and functionality associated with messaging.

Creating and Sending New Messages

This section guides you through procedures for creating and sending text, picture, and postcards.

Creating and Sending a Text Message

1. In standby mode, press the Message soft key, then select Create Message → Text Message. The Create Text Msg screen appears in the display showing the To list.

Tip: You can also access Messages by pressing MENU ( ) and select Messages.

2. Address your message by selecting contacts and/or entering number(s) or e-mail address(es) of message recipient(s):
   - To select a mobile number or e-mail address using your Contacts list, press the Add soft key. The following options appear in the display:
     - Contacts
     - Groups
     - Recent Calls
   Select Contacts. The Add Contacts screen appears in the display. For more information, refer to “Finding a Contacts Entry” on page 32.
   - Highlight a Contact. Use the Left and Right navigation keys to highlight a phone Number or E-mail address for the highlighted Contact. Press MARK ( ) to mark your selection.
   - To add the selected contacts to the To list, press the Done soft key. The Create Text Msg screen appears in the display showing the populated To list.
   - To enter recipient e-mail address(es), press and hold the key to change the text entry mode from 123 to T9 word or abc. (For more information, refer to “Add a Number or Email Address to an Existing Entry” on page 39.)

3. When you are finished addressing your message, press . The Text field appears in the display.

4. Enter the text for your message using the keypad. (For more information, refer to “Entering Text” on page 43.)
5. At any point while composing a message, you can set message send options by pressing the Options soft key. (For more information, refer to “Message Send Options” on page 52.)

6. Once you’re finished composing your message, press SEND ( ) to send your message.

Creating and Sending a Picture Message

1. In standby mode, press the Message soft key, then select Create Message ➔ Picture Message. The Create PIC Msg screen appears in the display showing the To list.

   Tip: You can also access Messages by pressing MENU ( ) and select Messages.

2. Address your message by selecting contacts and/or entering number(s) or e-mail address(es) of message recipient(s). (For more information, refer to “Creating and Sending a Text Message” on page 47. See Step 2.)

3. After addressing your picture message, the Subject field becomes highlighted.

4. If desired, enter the Subject text using the keypad. (For more information, refer to “Entering Text” on page 43.)

5. Press the Down navigation key. The Text field becomes highlighted.

6. Enter the message text using the keypad. (For more information, refer to “Entering Text” on page 43.)

7. To set message send options, press the Options soft key. (For more information, refer to “Send Picture Messages in Camera Mode” on page 49.)

8. To add a picture to the message, highlight the PIC field.

   - Press the My PIC soft key to access the picture gallery. If there are no pictures in the gallery, press the Camera soft key to launch the camera, then take a picture. With pictures in the gallery, thumbnail images appear in the display. Then, do the following:
     - Highlight a picture in the gallery.
     - To expand the highlighted picture to fill the display, Press the View soft key.
     - To activate the phone’s camera and take a new picture, Press the Camera soft key. (For more information, refer to “Camera” on page 65.)

9. Once you have highlighted a photo, press . The Create Pic Msg screen appears in the display with the selected photo in the PIC field.

   The Sound field becomes highlighted.
10. To add a sound file to your message, press the Sounds soft key. The Record New option and a list of sound files appear in the display with the Record New option highlighted.

11. Record a new sound file or select a listed sound file.
   - If you select the Record New option, the Record New screen appears in the display. Press REC (REC) to begin recording.
   - Wait for the beep, then start speaking. As it is recording the phone displays a countdown timer that shows the seconds remaining for the recording.
     - To pause the recording, press the Pause soft key. When a memo is paused, press the Resume soft key to continue recording.
     - To stop recording, press SAVE (SAVE). The Record New option and a list of sound files appear in the display with the Record New option highlighted.
   - Select your new sound file. The Create Pic Msg screen reappears in the display with your selected sound file in the Sound field.

12. Once you're finished composing your picture message, do one of the following:
   - Press SEND (SEND) to send the message.
   - Press the Options soft key. For more information, refer to "Send Picture Messages in Camera Mode" on page 49.

Send Picture Messages in Camera Mode

Picture messages can be sent to recipients with compatible phones or devices. You can even accompany a Picture message with a voice memo or preloaded sound.

Tip: You can send a Picture message to up to ten recipients. Enter each recipient’s address or phone number in a separate To field of the Picture message composer.

1. In standby mode, press and hold the Camera key ( ). The camera viewfinder screen appears in the display.

2. Using the display as a viewfinder, when the image that you wish to send appears in the display, press TAKE (TAKE) to take a picture.

Note: For more information about using the camera feature in your phone, see “Camera” on page 65.

3. Press SEND (SEND) to save the picture and begin delivery process. You are prompted to send a copy of the picture to axcess mypics. The following options appear in the display:
   - Yes
4. Select the desired option. The **Create Pic Msg** screen then appears in the display with the **To:** list showing.

**Note:** If you select the **Yes** option, “**Online Album**” appears as the first addressee in the **To:** list.

5. Enter the phone number or E-mail address of the recipient of the Picture message, then press **[Send]**.

**Tip:** Press the **Add** soft key to display a pop-up menu containing: **Contacts, Groups, and Recent Calls**. These options allow you to find and add recipients to the **Send To:** list.

6. The **Subject:** field appears in the display. Enter a subject for the Picture message using the keypad. (For more information, refer to “**Entering Text**” on page 43.)

7. Press the Down navigation key until the **Text:** field is highlighted, then enter the message text using the keypad. (For more information, refer to “**Entering Text**” on page 43.)

8. Your new picture appears in the **PIC:** field.

9. If you wish to insert a sound into your Picture message, use the Down navigation key to highlight the **Sound:** field and do the following; otherwise, proceed to step 10.

   - Press the **Sounds** soft key. The **My Sounds** screen appears in the display showing the following options:
     - **Record New** — Record a new memo to insert into the message.

**Note:** You can record and insert a voice memo of up to 60 seconds in length, if you record first before attaching a picture. If a picture is attached before recording, the size of the voice memo is limited to the amount of remaining memory.

   - **Audio files list** — Select from the list of previously recorded voice memos and preloaded audio files on your phone.
     Select the desired option to insert a sound into your message.

10. Press the **Options** soft key to complete the message text and set message send options. The following options appear in the display:

   - **Preview** — View the picture as the recipient will see it.
   - **Add Quick Text** — Add pre-composed text to your message.
   - **Save As Draft** — Save the message to your Draft folder.
   - **Priority Level** — Choose **High**, **Normal**, or **Low**.
   - **Validity Period** — Enter the **Date** when this message will cease to be valid, then use the Left and Right navigation keys to choose the **Time**.
• **Deferred Delivery** — Select the Date and Time to deliver the message.

• **Delivery Ack** — Choose On or Off — Requests confirmation when your message is received.

• **Remove PIC** — Remove the picture from your message.

• **Remove Sound** — Remove the sound file from your message.

• **Add To Contacts** — Save the recipient’s number or e-mail address as a Contacts list entry.

Use the Up/Down navigation keys to highlight an option, then press to invoke the option.

11. Press to send the message. “Connecting...” followed by “Sending Message” appear in the display and a progress bar indicates the send status.

**Postcards**

Postcard lets you quickly send photos overlaid with handwritten messages as Picture messages, rather than using the keypad to enter your message. You can also include a sound file and keypad-entered text.

1. In standby mode, press the **Message** soft key, then select **Create Message ➔ Postcard**. The **Gallery** screen appears in the display.

   **Tip:** You can also access Messages by pressing **MENU ( )** and select **Messages**.

2. Select the desired picture to appear as the background of your handwritten Postcard or press the **Camera** soft key to take and save a picture. (For more information, refer to “**Taking Pictures**” on page 65.)

   After you select the desired photo, the Camera viewfinder screen appears in the display in Sketch color tone with normal brightness, Fine quality, and low resolution with Zoom functionality.

3. Position your handset so that the complete handwritten text for the message appears within the image corners. (For more information, refer to “**Simple Snap Shot**” on page 65.)

   **Tip:** For best results, write your message on white or light-colored, unruled paper (that is, no lines).
4. Use the Left and Right navigation keys to increase or decrease magnification of the message, as needed.
5. Press **TAKE ( ).** “MERGING” appears in the display, followed by a high-contrast picture of your message.
6. To change the appearance and location of your overlaid text, press the **Options** soft key. The following options pop-up in the display:
   - **Ink Color** — Change the color of the overlaid text to any one of 11 choices.
   - **Shadow** — Add/remove a drop shadow for the overlaid text.
   - **Rotate** — Rotate overlaid text clockwise/counter-clockwise.
   - **Zoom** — Zoom Out from/In on the overlaid text.
   - **Move** — Slide the overlaid text up/down or side-to-side.
7. Select the desired option and repeatedly press or press and hold the Navigation keys until you achieve each desired effect.
8. Press **OK ( )** to save each change.
9. When you are satisfied with the picture of your message, press **SAVE ( ).** The **Create Pic Msg** screen appears in the display with a **To:** field highlighted.
10. Complete and send your new Postcard. (For more information, refer to “Creating and Sending a Picture Message” on page 48.)

**Message Send Options**

You can set priority, validity, and other options before you send a message. Which options appear in the Send Options list depends on what type of message you have composed and what message field you have highlighted.

1. After you’ve composed a Text or Picture message, press the **Options** soft key. The following are Send Options that can appear in the display:
   - **Edit Send To** — Lets you add, delete, or change numbers or E-mail addresses in a Text message **Send To:** list.
   - **Preview** — Lets you view a Picture message as the recipient will see it.
   - **Add** — Lets you add **Graphics, Animations, Sounds, or Quick Text** to a Text message.
   - **Add Quick Text** — Lets you add **Quick Text** to a Picture message.
   - **Edit Text Format** — Lets you select text Size, Alignment, Color, Style, and Background in a Text message.
   - **Save As Draft** — Saves this message in the Drafts folder.
   - **Priority Level** — Lets you assign a **High, Normal**, or **Low** (picture messages only) priority to the message.
Validity Period — Lets you set a Date and Time when this message will no longer be available to the recipient. After the set period of time, your message is recalled.

Deferred Delivery — Lets you set a Date and Time when this message will be delivered.

Enh. Delivery Ack / Delivery Ack — Set to On to be alerted when your message is received by the addressee.

Remove Pic — Removes the picture from a Picture message.

Remove Sound — Removes the sound file from a Picture message.

Add To Contacts — Lets you add the addressee numbers or E-mail addresses to your Contacts list.

2. Select a desired option and a value for that option. You’re returned to the Create Msg screen.

Receiving New Messages

When you receive a message in standby mode, one of the following occurs:

- **If Auto View and Auto Scroll are both set to On** — An alert sounds (unless turned off) and the message text automatically appears in the display and scrolls slowly to the end of the message. (For more information, refer to “Text Message Settings” on page 59.)

- **If Auto View is set to Off** — An alert sounds (unless turned off) and a New Message notification appears in the display along with the closed envelope icon (✉️). The date and time of the message and the following options also appear in the display:
  - **View Now** — Opens the message where you have the option to Reply, Forward, Erase, Save Text, Save Contact, Lock/Unlock, or Save Media.
  - **View Later** — Closes the popup and saves the message to your inbox where you can view it later.

Select the desired option.

Receive Messages While in a Call

When you receive a message while in a call, one of the following occurs:

- **If Auto View and Auto Scroll are both set to On** — The message text automatically appears in the display and scrolls slowly to the end of the message. (For more information, refer to “Text Message Settings” on page 59.)

- **A New Message** notification appears in the display along with the closed envelope icon (✉️). The date and time of the message and the following options also appear in the display:
  - **View Now** — Opens the message where you have the option to Reply, Forward, Erase, Save Text, Save Contact, Lock/Unlock, or Save Media.
  - **View Later** — Closes the popup and saves the message to your inbox where you can view it later.

Select the desired option.
Voicemail

Voicemail allows callers to leave voice messages in your voice mailbox, and lets you review, play, and delete your voice messages any time you are in your Carrier’s network coverage area.

Voice Mail Setup

Before callers can leave voice mail messages, you must first set up your account. For more information, refer to “Setting Up Your Voicemail” on page 7 and to “General Message Settings” on page 59.

Checking your Voicemail

1. In standby mode, press and hold 1 until you’re connected to your Wireless Carrier’s voicemail system. A recorded message prompts you for a password.

2. Enter your password, then follow the recorded prompts, to listen to your voice message(s), change administrative options, and so on.

Tip: You can also access your Voicemail by using the entries in the Voicemail folder. For more information, refer to “Voicemail” on page 54.

Message Folders

Inbox

Received messages of all types (except Voice Mail) are stored in the Inbox.

1. In standby mode, press the Message soft key, then select Inbox, to open the Inbox folder.

2. Highlight a message, then do one of the following:
   - To delete the message, press the Erase soft key.
   - To view the highlighted message, press OPEN ( ) then proceed to Step 3.
   - To access other options, press the Options soft key. The following options appear in the display:
     - Reply — Lets you compose and send a message to the sender.
     - Reply With Copy — Text Message only — Lets you reply to a message and include a copy of the original message.
     - Forward — Lets you forward the message to other E-mail addresses or mobile phone numbers.
     - Lock / Unlock — Blocks or allows erasure of the selected message.
     - Add To Contacts — Lets you add the addressee numbers or E-mail addresses to your Contacts list.
     - Erase Inbox — Deletes selected/all unlocked messages from the Inbox folder.
– **Message Info** — Lets you display status information about a message.
Select an option to perform the function for that option.
• To return to the **Messages** menu, press 🔄

3. **While viewing a selected message, do one of the following:**
• To delete the message, press the **Erase** soft key.
• To compose and send a message to the sender of the highlighted message, press **REPLY** (✍️).
• Press the **Options** soft key, The following options appear in the display:
  – **Go To URL** — Lets you browse any Internet address included in the message.
  – **Play Again** — Picture Messages only — Replay a sound file included with a message.
  – **Forward** — Lets you forward the message to other E-mail addresses or mobile phone numbers.
  – **Reply With Copy** — Text Message only — Lets you reply to a message and include a copy of the original message.
  – **Save Pic** — Picture Messages only — Saves a copy of the image included in the selected message to the images Gallery.
  – **Save Sound** — Picture Messages only — Saves the sound file in the message to the My Sounds gallery.
  – **Save Quick Text** — Saves the message text as a Quick Text entry.
  – **Lock / Unlock** — Block or allow changes to the selected message.
• To return to the **Inbox** list, press 🔄

**Messages and Lock Mode**

Your phone can still receive messages while in Lock Mode. The time and date of the message appear in the display, but you cannot access the message until you enter the lock code. (For more information, refer to “Lock Phone” on page 104.)

**Outbox**

Your phone stores outgoing messages in the Outbox, regardless of whether the message was successfully sent to, or received by, the addressee.

Tip: Verify whether and when a message or e-mail was successfully received by enabling the **Delivery Ack** message send option. (For more information, refer to “Send Picture Messages in Camera Mode” on page 49.)

1. In standby mode, press the **Message** soft key, then select **Outbox**. A list of your outgoing messages appears in the display.
2. Highlight a message, then do one of the following:
   - To delete the message, press the Erase soft key.
   - To view the highlighted message, press OPEN ( ) then proceed to Step 3.
   - Press the Options soft key. The following options appear in the display:
     - Forward — Send the message to another addressee.
     - Resend — Re-send the message.
     - Lock / Unlock — Block a message from being erased or free a message to be erased.
     - Add To Contacts — Lets you add the addressee numbers or E-mail addresses to your Contacts list.
     - Erase Outbox — Erase all messages in the Outbox folder.
     - Message Info — Lets you display status information about picture messages.
   Select an option to perform the function for that option.
   - To return to the Messages menu, press back.

3. While viewing a selected message, do one of the following:
   - To delete the message, press the Erase soft key.
   - To resend a message to the original addressee, press RESEND ( ).
   - Press the Options soft key. The following options appear in the display:
     - Go To URL — Go to a URL included in this message.
     - Play Again — Picture Messages only — Replay a sound file included with a message.
     - Forward — Send the message to another addressee.
     - Erase — Picture Messages only — Delete the message from the Outbox folder.
     - Lock / Unlock — Block a message from being erased or free a message to be erased.
     - Save Quick Text — Save the message text in the Quick Text folder.
     - Add To Contacts — Lets you add the addressee numbers or E-mail addresses to your Contacts list.
     - Call — Lets you call the recipient of the message.
     - Message Info — Lets you display status information about picture messages.
   Select an option to perform the function for that option.
   - To return to the Outbox list, press back.

Drafts Folder
Messages in the Drafts folder are those that have been composed but never sent. You can return to the Drafts folder at any time to view, edit, or send a draft message.

1. In standby mode, press the Message soft key, then select Drafts. A list of your draft messages appears in the display.
2. Use the navigation keys to highlight the message that you wish to edit, then do one of the following:

- To delete the message, press the **Erase** soft key.
- To view the highlighted message, press **EDIT ( )** then proceed to one of the following screens:
  - **Text Message** — **Create Text Msg** screen showing the **To** field appears in the display.
  - **Picture Message** — **Create Pic Msg** screen showing the **To** list appears in the display. Change or add numbers and addresses, then press **.**

  Proceed to Step 3.

- Press the **Options** soft key. The following options appear in the display:
  - **Send** — Send the message to the current addressee(s).
  - **Lock / Unlock** — Block a message from being erased or free a message to be erased.
  - **Add To Contacts** — Lets you add the addressee numbers or E-mail addresses to your Contacts list.
  - **Save Quick Text** — Save the message text in the Quick Text folder.
  - **Erase Drafts** — Erase all messages in the Drafts folder.

  Select an option to perform the function for that option.

- To return to the **Messages** menu, press **BACK**.

3. If you press **EDIT ( )** in the **Text** screen/field, do one of the following:

- To change text options, press the Left soft key. (For more information, refer to “Entering Text” on page 43.)
- To send the message, press **SEND ( )**.
- Press the **Options** soft key. (For more information, refer to “Message Send Options” on page 52.)

4. Once you’re finished composing your message, do one of the following:

- To send the message, press **SEND ( )**.
- To exit the message, press **.** You are prompted to save your changed message to the Drafts folder.

**Voicemail**

New voice messages in your voice mailbox are logged in the Voicemail folder of the Messages menu. Open the Voicemail folder to view the Callback # (if available), Urgency, and other details of new voicemail messages.

1. In standby mode, press the **Message** soft key, then select **Voicemail**. A Voicemail status screen indicating the number of new messages in your voice mailbox, their urgency, and any callback numbers appears in the display.
2. Press \text{Talk} to call your voice mailbox and listen to your voice messages.

\textbf{Note:} You can, in standby mode, also press and hold \text{Talk} to dial your voice mailbox.

\section*{Erasing Messages}

You can erase all of the messages in each/all of your message folders from one convenient location.

\textbf{Note:} This function erases all messages in a selected message folder or in all message folders. To delete a single message, from the Messages menu, open the message folder where the message to be deleted is stored, then select and delete the message from the Option menu while viewing the message content.

1. In standby mode, press the \text{Message} soft key, then select \textbf{Erase Messages}. The following options appear in the display:
   - \textbf{Inbox} — Lets you delete all messages from your Inbox.
   - \textbf{Outbox} — Lets you delete all messages from your Outbox.
   - \textbf{Drafts} — Lets you delete all draft messages from the Drafts folder.
   - \textbf{All Messages} — Lets you delete all messages from all message folders.

2. Select the folder containing the messages that you wish to delete. You are prompted to confirm the erasure of all messages in that folder.

3. To cancel deleting any messages, press the \textbf{No} soft key. To delete all messages from the selected folder, press the \textbf{Yes} soft key.

\section*{Message Settings}

The \text{Msg Settings} options let you define numerous message settings such as ringer types and save options.

1. In standby mode, press the \text{Message} soft key, then select \textbf{Msg Settings}. The following options appear in the display:
   - \textbf{General} — Lets you set default option values for Text, Picture, and Voice messages.
   - \textbf{Text Message} — Lets you set default message text option values for both Text and Pic messages.
   - \textbf{Picture Message} — Lets you set default picture message option values.

2. Select the desired option to perform the function(s) for that option.
**General Message Settings**

1. In standby mode, press the **Message** soft key, then select **Msg Settings ➔ General**. The following options appear in the display:
   - **Auto Save** — Lets you set whether to automatically save to the Outbox folder, to discard, or to prompt you to save unsent messages when you exit them.
   - **Auto Erase** — Automatically erase the oldest read message after memory is full.
   - **Quick Text** — Lets you change pre-composed text or compose text for addition to your outgoing messages.
   - **Voicemail #** — Lets you update your Voicemail access number.
   - **Entry Mode** — Lets you set the default text entry mode [T9 Word, Abc/ABC (alphabetically), or 123 (numerical)] for composing message text.
   - **Callback #** — Lets you disable, enable, and update the callback number that can be inserted in outgoing messages.
   - **Signature** — Lets you disable, enable, and update the text signature that can be inserted in outgoing messages.
   - **Reminder** — Lets you set the message receipt reminder to play **Once**, **Every 2 Minutes**, **Every 15 Minutes**, or not to play (Off).

2. Select the desired sub-menu to enter the sub-menu and change the selected message settings.

**Text Message Settings**

1. In standby mode, press the **Message** soft key, then select **Msg Settings ➔ Text Message**. The following options appear in the display:
   - **Auto View** — Automatically view messages as they are received.
   - **Auto Scroll** — When set to On, the phone automatically scrolls message text, letting you see the complete message text without using the navigation keys.

2. Select the desired sub-menu to enter the sub-menu and change the selected message settings.

**Picture Message Settings**

1. In standby mode, press the **Message** soft key, then select **Msg Settings ➔ Picture Message**. The following option appears in the display:
   - **Auto Receive** — Lets you choose whether to be prompted to retrieve picture messages from your provider’s e-mail server or to automatically retrieve all picture messages as they are received by the server.

2. Select **Auto Receive** to enter the sub-menu and change the selected message setting.
Section 8: Axcess Shop

This section explains the Axcess Shop features where users can download multimedia, applications, games, and check news and sports.

Finding Applications

With Axcess Shop, you can download full featured applications over the air including games, personalized ring tones, pictures, and more.

In standby mode, do one of the following to launch Axcess Shop:

- Press the Right navigation key.
- Press MENU ( ), then select Axcess Shop.

Note: The first time you launch Axcess Shop, the warning message “Browse & Download use airtime.” pops up in your display. To have this message repeat the next time you launch Axcess Shop, press the Continue soft key. To stop this message repeating, press the Remove soft key.

The Axcess Shop screen appears in the display with the my apps tab highlighted. You have the following options:

- Select the shop tab. The shop menu appears in the display. You can use the items in this menu to browse or search for, purchase, and download applications.
- Select an application on your phone that you wish to launch.
Section 9: Axcess Web

This section outlines how to launch Axcess Web, how to navigate to other pages on the web, and how the keys on the keypad are used with the web application. Additionally, links to other sites are briefly discussed.

Axcess Web

With Axcess Web, you can conveniently surf the web and download ringtones and wallpapers using your phone. Each time you launch Axcess Web, your phone connects to the Internet and the service indicator icon with a red arrow ( ) appears in the display.

Stored Web Content

Axcess Web ends an Internet connection after a certain period of inactivity, however some information from your session remains stored in the phone (if you leave your phone turned on). You can access this information without reconnecting to the Internet. However, if you are viewing stored information, and you select a link to a site that was not accessed in your last session, you automatically re-connect to the Internet.

Launching Axcess Web

1. In standby mode, do one of the following to launch Axcess Web:
   - Press the Up navigation key.
   - Press MENU ( ), then select Axcess Web.

Note: The first time you launch Axcess Web, the warning message “Browse & Download use airtime.” pops up in your display. To have this message repeat the next time you launch Axcess Web, press the Continue soft key. To stop this message repeating, press the Remove soft key.

A list of categories (each representing one or more web sites) appears in the display.

2. Highlighted the desired category, then press the soft key to enter the category list.

Exit Axcess Web

To exit Axcess Web, press END.

Using Axcess Web

When you use Axcess Web, some of the keys operate differently than during a normal phone call. Axcess Web presents on-screen items in any of the following ways:

- Text or numeric input.
- Links (embedded in content).
- Numbered options (some may not be numbered).
• Simple text.

You can act upon options or links by using the soft keys.

**Axcess Web soft keys**

The bottom of the Axcess Web display is a bar that contains browser commands. The Left and Right (← →) soft keys on the keypad are used to execute the command that appears above them in the display. These are called “soft keys” because their function changes depending on the application.

**Using Links**

Links have several purposes, such as jumping to a different page, to a different site, or even initiating a phone call. Links are shown inside of brackets ([   ]). You can normally press 🆕 to select a link when it is highlighted.

**How Axcess Web Keys Work**

The following table lists Axcess Web keys and their functions.

<table>
<thead>
<tr>
<th><strong>Navigation keys</strong> — Use to browse lists and options.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>BACK Key</strong> — A browse, back-up key. Press once to back up one page. Press and hold to go back to home page. Press to clear the last number, letter, or symbol entered. Press and hold to completely clear the display.</td>
</tr>
</tbody>
</table>

| **Asterisk/Shift Key** — Press before entering text to enable uppercase characters. |
| **Last Key** — Press to enter a zero (0), or to move to the last item in a menu. |
| **Pound/Space Key** — Press to insert a space when entering text. |
| **Number 1 thru 9** — Use the number keys to select items in a menu if they are numbered. |
| **End Key** — Press to exit the Axcess Web and return the phone to standby mode. |
| **Left Soft Key** — Press to activate the command that appears above it in the display. |
| **Right Soft Key** — Press to activate the command that appears above it in the display. |
Section 10: Celltop

Celltop (an Alltel application and service) displays cells on your phone to provide you with information you choose, instantly—anytime, anywhere.

This section outlines how to launch Celltop on your phone.

Note: For more information, refer to the Celltop Guide or call 1-800-ALLTEL-1 (1-800-255-8351).

Celltop

With Celltop, you can display any of a set of customizable cells listing information, such as:

- Messages in your Inbox.
- Call records in your Calls Log.
- Ringtones, those already available on your phone and those you can get.
- Current weather at your chosen locations.
- Scores and standings of your favorite sports.
- Stock quotes that interest you.
- Latest headlines from selected news services.

Note: For more information, refer to the Celltop Guide or call 1-800-ALLTEL-1 (1-800-255-8351).

Launching Celltop

- In standby mode, press the Celltop soft key. One of the following appears in the display:
  
  • CELLTOP SETUP screen
  
  • Two of your Celltop cells
Axcess Search (an Alltel application and service) lets you search for information related to a location or topic that you specify. This section outlines how to launch Axcess Search on your phone.

**Note:** For more information, call 1-800-ALLTEL-1 (1-800-255-8351).

### Axcess Search

With Axcess Search, you can search for and display information, such as:

- Specific Games and Applications.
- Current Weather, Maps, and Directions for a specific location.
- News and Sports related to a specific topic.
- “Yellow Pages” information for a specific location.
- “White Pages” information for a specific location.

**Note:** For more information, call 1-800-ALLTEL-1 (1-800-255-8351).

---

**Launching Axcess Search**

- In standby mode, press and hold 📡. A screen similar to the following appears in the display:

  ![Axcess Search Menu](image)

  **Note:** When launching Axcess Search while roaming, a message pops-up to advise you that “Browse & Download use air time.”

  You have the option of blocking future occurrences of this message or of retaining it as a reminder.
Section 12: Camera

Use your My Shot phone to take full color digital pictures, display them on your phone’s vivid color display, and instantly share them with family and friends.

Taking Pictures
Taking pictures with the built-in camera is as simple as choosing a subject, pointing the lens [located on the outside of the folder (above the external display)], and pressing a button.

Simple Snap Shot
To take a single picture using the current camera settings, do the following:

1. In standby mode, with the phone open or closed, press and hold the Camera key ( ) on the right side of the phone.

   The message “Loading...” followed by a camera viewfinder screen appears in the display. (See “Camera Screen” on page 66 for more information.)

   Note: You can also activate the camera (from standby mode) by selecting MENU ➔ Multimedia ➔ Camera.

2. Point the camera lens at your subject.

3. Using the display as a viewfinder, press TAKE ( ) when the image that you wish to capture appears in the display.

4. Press the Save soft key to save the picture to the Image gallery in your phone, a part of the phone’s memory devoted to storing, browsing, and viewing saved pictures.

   Press SEND ( ) to save the picture and include it in a Picture message. (See “Send Picture Messages in Camera Mode” on page 49.)

   Press the Erase soft key to erase the photo.

Tip: You can change a number of the camera’s settings to suit particular uses for your pictures. See “Camera Shortcuts” on page 67 for more information.
Camera Screen

When you activate your phone’s camera, the second line of the display is reserved for the current camera resolution setting and the picture counter. The center of the display shows a viewfinder image of the subject at which the camera is pointed. The soft key labels on the bottom line of the display change to the following:

- **Gallery** — Pressing the **Gallery** soft key opens the images gallery so you can view or manage your stored pictures.
- **TAKE** — Pressing  takes a picture of the image currently appearing on the display.
- **Options** — Pressing the **Options** soft key opens a pop-up menu of camera settings.

**Camera Screen Icons**

- **Camera** — Indicates that your phone is in Camera mode.
- **Night Shot** — Replaces the Camera icon. Indicates that your phone is ready to take photos in low light.

<table>

<td><img src="multi_shot.png" alt="Multi Shot" /></td>
<td><strong>Multi Shot</strong> — Automatically or manually takes a series of or array ( ) of multiple pictures (series shown) after you press .</td>
</tr>
</tbody>
</table>
Camera Shortcuts

You can use the Navigation key to quickly access both the Brightness and Zoom capabilities of the built in camera. When you exit the camera mode, all camera options (including Brightness and Zoom) return to default values.

Brightness

1. In camera mode, change the brightness of your pictures using the Left and Right navigation keys. Options are +4 – 4.
2. Press 📷 to take the picture.

Zoom in on a Subject

Your camera has digital zoom capabilities of up to x9 with Resolution set to 640x480 and below.

Note: Pictures may appear somewhat grainy as you zoom in; this is a normal result of digital enhancement.

Note: The Zoom setting is affected by the Resolution setting (camera mode). With Resolution set to 1280x960, no zoom is available. With Resolution set to 640x480 and lower, Zoom settings 0 – 9 are available.

1. In camera mode, press the Up and Down navigation keys to zoom in and out on your subject.
2. Press 📷 to take the picture.

Camera Options

The Camera Options let you temporarily override your default camera settings. Any settings you change using the Camera Options only apply to the current camera session or until you make another change using the Camera Options.

Delay Pictures with the Self Timer

Self Timer lets you delay a picture long enough so you or the person taking the picture can join others in the picture.

1. In camera mode, press the Options soft key. The following options appear in the display:
   • Self Timer
   • Multi Shot
   • White Balance
   • Fun Tools
   • Settings
2. Use the Left and Right navigation keys to highlight Self Timer. The following options appear in the display:
   • Off
   • 2 Sec.
   • 5 Sec.
3. Use the Up/Down navigation keys to highlight the desired delay, then press . The camera screen appears in the display.

The next time you press , a countdown timer appears in the display that indicates the time remaining before the camera takes the picture.

**Multi Shot**

Multi Shot lets you take multiple pictures in succession at the touch of the TAKE key ( ).

**Series Shots**

1. In camera mode, select **Options ➔ Multi Shot ➔ Series Shot**. The following options appear in the display:
   - Off
   - On (3 pictures taken in succession).

2. Use the Up and Down navigation keys to highlight the desired option, then press the key to save the option.

The Multi Shot Series icon ( ) appears in the display.

The next time you press the key, the camera takes 3 pictures in rapid succession, if the Auto/Manual option is set to Auto.

**Divided Shots**

1. In camera mode, select **Options ➔ Multi Shot ➔ Divided Shot**. The following options appear in the display:
   - Off
   - On (4 pictures taken in succession).

2. Use the Up and Down navigation keys to highlight the desired option, then press the key to save the option.

The Multi Shot Divided icon ( ) appears in the display.

The next time you press the key, the camera takes 4 pictures in rapid succession, if the Auto/Manual option is set to Auto.

**Note:** If the Auto/Manual option is set to Manual, you can take up to 3 pictures as fast as you can repeatedly press .
White Balance

White Balance allows you to adjust picture quality according to available light.

1. In camera mode, select Options ➔ White Balance. The following White Balance options appear in the display:
   - **Auto** — The camera automatically adjusts picture quality to available light.
   - **Sunny** — Use this setting when taking pictures in full sun.
   - **Cloudy** — Use this setting when taking pictures in cloudy conditions.
   - **Tungsten** — Use this setting when taking pictures under incandescent lights.
   - **Fluorescent** — Use this setting when taking pictures under fluorescent lights.

2. Use the Up/Down navigation keys to highlight one of the White Balances, then press , the camera applies the selected White Balance setting to your next picture.

Fun Tools

Fun Frame

Fun Frame lets you temporarily apply one of the preloaded picture frames in your phone to characterize or enhance one or more pictures.

1. In camera mode, select Options ➔ Fun Tools ➔ Fun Frames. The following options appear in the display:

Note: Choose Normal to disable Fun Frames.

- **Normal** — Subjects and pictures appear with no fun frame.
- **Afro**
- **Balloon**
- **Birthday**
- **Clown**
- **Fish**
- **Flowers**
- **Frame 1—4**

2. Use the Left/Right navigation keys to highlight the fun frame of your choice, then press . You’re returned to the camera viewfinder screen.

3. When you take your next picture, the phone’s display previews your subject image with the selected fun frame.

Color Effect

Color Effect lets you change your pictures from full-color to two-color, (black plus a color you select).
1. In camera mode, select **Options ➔ Fun Tools ➔ Color Effect**. The following Color Effects options appear in the display:
   - **Normal** (full-color)
   - **Black&White** (monochrome)
   - **Sepia**
   - **Negative**
   - **Green**
   - **Aqua**

2. Use the Up/Down navigation keys to highlight one of the Color Tones, then press , the camera applies the selected Color Tone setting to your next picture.

### Settings

Camera Settings (unlike other Camera Options) do not return to their respective default values when you end the current Camera session. Instead, Camera Settings apply to future Camera sessions until you change individual Settings values or until you use Reset Settings.

### Auto Save

1. In camera mode, select **Options ➔ Settings ➔ Auto Save**. The following options appear in the display:
   - **Off** — You are prompted to save a new photo when you press .
   - **On** — Your phone automatically saves a new photo when you press .

2. Use the Up/Down navigation keys to highlight the Auto Save setting of your choice, then press . You’re returned to the camera viewfinder screen.

### Icon Display

1. In camera mode, select **Options ➔ Settings ➔ Icon Display**. The following options appear in the display:
   - **Display All** — Shows camera icons as seen in “Camera Screen” on page 66.
   - **Guideline** — Shows a cross hatch pattern in the view finder screen.
   - **No Icons** — Shows a nearly full-display subject image and without icons.

2. Use the Up/Down navigation keys to highlight the viewfinder screen setting of your choice, then press the key. You’re returned to the camera viewfinder screen.
**View Mode**

1. In camera mode, select the Options ➔ Settings ➔ View Mode. The following options appear in the display:
   - **Landscape** — Shows a wider, more panoramic view of the subject.
   - **Portrait** — Shows a narrower, more vertically oriented view of the subject.

2. Use the Up/Down navigation keys to highlight the view mode setting of your choice, then press 🎥. You’re returned to the camera viewfinder screen.

**Night Shot**

Night Shot lets you take pictures in low light without a flash.

Note: To avoid blurred pictures when taking Night Shots, hold your phone very steady for two seconds after pressing TAKE (📸).

1. In camera mode, select Options ➔ Settings ➔ Night Shot, then press 🎥. The following options appear in the display:
   - **Off**
   - **On**

2. Use the Up/Down navigation keys to highlight the Night Shot setting of your choice, then press 🎥. You’re returned to the camera viewfinder screen.

**Shutter Sounds**

Choose from three different sounds whenever you take a picture. Aside from being a cool sound effect, Shutter Sounds acts as an audible reminder that your camera has taken the picture.

1. In camera mode, select Options ➔ Settings ➔ Shutter Sounds. The following options appear in the display:
   - **Off** — No Shutter Sound plays when you press the TAKE key (📸).
   - **Shutter**
   - **OK**
   - **Ding Dong**

2. Use the Up/Down navigation keys to highlight the desired Shutter Sound (each sound plays as it is highlighted) setting, then press 🎥. The camera applies the selected Shutter Sound setting to your next picture.
Quality

1. In camera mode, select **Options ➔ Settings ➔ Quality**. The following options appear in the display:
   - Fine
   - Normal
   - Economy

2. Use the Up/Down navigation keys to highlight the desired picture quality setting, then press . The camera applies the selected Quality setting to your next picture.

Resolution

1. In camera mode, select **Options ➔ Settings ➔ Resolution**. The following options appear in the display:
   - 1260x960 (pixels)
   - 640x480 (pixels)
   - 320x240 (pixels)
   - 160x120 (pixels)
   - Picture ID — lets you take pictures the correct size and resolution for Contacts list picture IDs.

2. Use the Up/Down navigation keys to highlight the desired resolution setting, then press . The camera applies the selected Resolution setting to your next picture.

Reset Settings

1. In camera mode, select **Options ➔ Settings ➔ Reset Settings**, then press 🔄. The following options appear in the display:
   - Off — Keeps the current camera settings.
   - On — Resets the camera settings to default values.
Section 13: Multimedia

Your phone contains galleries where you can, store, access, and manage your photos (see “Camera” on page 65), downloaded images and ringtones, sound recordings (voice memos), and shuffle sets (images and melodies).

Using My Images Gallery

My Images lets you manage your photos and pictures you download, and lets you choose the pictures that appear in your phone’s display when you turn it on or off, while in standby mode (wallpaper), and as image IDs for your contacts.

1. In standby mode, press MENU ( ), then select Multimedia ➔ My Images. A multiple-page matrix of thumbnail views of saved photos and images appears in the display.

Note: You can also access My Images while in Camera mode, by pressing the Gallery soft key.

2. Highlight an image or photo, then do one of the following:
   • To take new photos, press the Camera soft key.
   • To expand the highlighted picture to fill the screen, press VIEW ( ).
   • To access other options, press the Options soft key. The following options appear in the display:
     – Send — Send to someone as part of a Picture message. (See “Send Picture Messages in Camera Mode” on page 49 for more information.)
     – Online Album — Lets you access pictures stored in your album on your Wireless Carrier’s server.
     – Set As — Lets you set the highlighted picture as the Main Wallpaper, Front Wallpaper, or as a Picture ID for one of your Contacts.
     – Create Postcard — Lets you use the highlighted image as the background for a Postcard. (For more information, refer to “Postcards” on page 51.)
     – Rename — Change the file name for the highlighted picture.
     – Lock / Unlock — Block/permit erasure of the highlighted image.
     – Erase — Erase this pictures (if Unlocked) from My Images.
     – Erase All — Erase all pictures (if Unlocked) from My Images.
     – Photo Info — Shows the picture file’s name, date and time, resolution, and size.
   
   Select the desired option to launch it’s function.

3. To return to the previous menu, press . To return to standby mode, press END .

Using My Ringtones Gallery

My Ringtones lets you assign ringtones for calls, alarms, and other alerts.
1. In standby mode, press **MENU ( )**, then select **Multimedia ➔ My Ringtones**. A list of ringtones appears in the display.

2. Highlight a ringtone, then do one of the following:
   - To assign the highlighted ringtone to be used as a Ringtone, Contact ID, or Alert Tone, press the **Set As** soft key.
   - To hear the ringtone, press **PLAY ( )**.
   - To show title and file type for the highlighted ringtone, press the **Info** soft key.

3. To return to the previous menu, press **BACK**. To return to standby mode, press **END**.

**Using My Sounds Gallery**

My Sounds lets you record and manage voice memo files and lets you assign melodies as ringers or alerts.

1. In standby mode, press **MENU ( )**, then select **Multimedia ➔ My Sounds**.

   The following options appear in the display:
   - **Record New** — Lets you record voice memos.
   - **A list of recorded voice memo files and melodies.**

**Recording Voice Memos**

1. In standby mode, press **MENU ( )**, then select **Multimedia ➔ My Sounds ➔ Record New**. The **Record New** screen appears in the display.

   2. Press **REC ( )** to begin recording a voice memo.

   3. Press the **Pause / Resume** soft key to pause/resume recording.

   4. Press **SAVE ( )** to stop recording and save the voice memo.

**Using and Managing Voice Memos**

1. In standby mode, press **MENU ( )**, then select **Multimedia ➔ My Sounds**.

2. Highlight a saved voice memo file, then do one of the following:
   - To erase the selected voice memo file, if it is unlocked, press the **Erase** soft key.
   - To listen to the voice memo, press **PLAY ( )**.
   - To access other options, press the **Options** soft key. The following options appear in the display:
     - **Send** — Send to someone as part of a Picture message. (See “Send Picture Messages in Camera Mode” on page 49 for more information.)
     - **Set As** — Assign the highlighted ringtone to be used as a **Ringtone**, **Contact ID**, or as the **Alert Tone**.
     - **Rename** — Change the name of the voice memo file.
Lock / Unlock — Block/permit erasure of the highlighted image.
Erase All — Erase all unlocked voice memos.
Sound Info — Shows the title, size, type, and date for the file.

**Using and Managing Melodies**

1. In standby mode, press **MENU** ( ), then select Multimedia ➔ My Sounds.

2. When you highlight a melody file, you have the following options:
   - To hear the melody, press **PLAY** ( ).
   - To access the following options, press the Options soft key:
     - Send — Send to someone as part of a Picture message. (See “Send Picture Messages in Camera Mode” on page 49 for more information.)
     - Set As — Assign the highlighted ringtone to be used as a Ringtone, Contact ID, or as the Alert Tone.
     - Erase All — Erase all unlocked melodies.
     - Sound Info — Shows the title, size, and type for the file.
   
   Select the desired option to launch it’s function.

3. To return to the previous menu, press **BACK**. To return to standby mode, press **END**.

**Setting Up Shuffle**

The Shuffle option lets you assign images and/or melody files to Shuffle sets and to be shown and played in random order.

1. In standby mode, press **MENU** ( ), then select Multimedia ➔ Shuffle. The following options appear in the display:
   - Image Shuffle — Lists assigned preloaded and downloaded image files that can be shown in random sequence as Wallpaper.
   - Melody Shuffle — Lists assigned preloaded and downloaded melody files that can be played in random sequence as ringers.

**Image Shuffle**

1. From the Shuffle menu, select Image Shuffle. The Image Shuffle screen appears in the display.

   **Note:** If you have no Image Shuffle set, “No Image Shuffle” appears in the Image Shuffle screen.

2. Press the Add soft key. The following options appear in the display:
   - My Images — Lists available downloaded image files.
   - Preset Images — Lists available preloaded image files.

3. Select the desired images folder. A 2-by-2 matrix of thumbnail images appears in the display.
4. Highlight an image to be included in the Image Shuffle, then press MARK ( ) or press the Options soft key. The following options appear in the display:
   • View — Toggles the highlighted image between full screen and thumbnail views.
   • Mark All — Marks all available files in this folder for inclusion in the Image Shuffle.

5. Select the desired option to invoke. Repeat Steps 4 and 5 as needed.

6. Once you have marked all the files you want to include in the Shuffle, press the Done soft key. You are prompted to confirm saving your selections.
   • To save your selections to the Image Shuffle, press the Yes soft key.
   • To discard your selections, press the No soft key.
You are returned to the Image Shuffle screen that shows thumbnail views of your selected images.

7. To delete any or all images from your Image Shuffle, press the Options soft key. The following options appear in the display:
   • Erase — Discards the highlighted image from the Image Shuffle.
   • Erase All — Discards all images from the Image Shuffle.

8. When you are satisfied with the images assigned to your Image Shuffle, press BACK to return to the Shuffle sub-menu.

9. Highlight the Image Shuffle option, then press the Set As soft key.
   The following options appear in the display:
   • On — Activates the Image Shuffle for assignment as the Wallpaper in the background of your phone’s idle screen.
   • Off — Deactivates the Image Shuffle.

10. Select the desired option, you are returned to the Shuffle sub-menu.

   Note: Once you create an Image Shuffle, it is ready to be assigned using the Wallpaper setting. (For more information, refer to “Wallpaper” on page 97.)

---

**Melody Shuffle**

1. From the Shuffle menu, select Melody Shuffle. The Melody Shuffle screen appears in the display.

   Note: If you have no Melody Shuffle set, “No Melody Shuffle” appears in the Melody Shuffle screen.
2. Press the **Add** soft key. The following options appear in the display:

- **My Ringtones** — Lists available preloaded and downloaded ringtone files.
- **My Sounds** — Lists available preloaded and downloaded melody files.

3. Select the desired sound files folder. A list of ringtones or melodies appears in the display.

4. Highlight a ringtone or melody to be included in the Melody Shuffle, then press **MARK** (.Keyword) or the **Mark All** soft key to mark the desired file(s).

5. Once you have marked all the files you want to include in the Melody Shuffle, press the **Done** soft key. You are prompted to save your selections:

- To save your selections to the Melody Shuffle, press the **Yes** soft key.
- To discard your selections, press the **No** soft key.

6. To delete any or all sound files from your Image Shuffle, press the **Options** soft key. The following options appear in the display:

- **Erase** — Discards the highlighted sound file from the Melody Shuffle.
- **Erase All** — Discards all sound files from the Melody Shuffle.

You are prompted to erase your selections:

- To erase your selections from the Melody Shuffle, press the **Yes** soft key.
- To keep your selections in the Melody Shuffle, press the **No** soft key.

You are returned to the **Melody Shuffle** screen which shows a list of your selected ringtones and/or melodies.

7. When you are satisfied with the sound files assigned to your Melody Shuffle, press **BACK** to return to the **Shuffle** sub-menu.

8. Highlight the **Melody Shuffle** option, then press the **Set As** soft key. The following options appear in the display:

- **On** — Activates the Melody Shuffle for assignment as the call ringer.
- **Off** — Deactivates the Melody Shuffle.
9. Select the desired option, you are returned to the **Shuffle** sub-menu.

---

**Note:** Once you create a Melody Shuffle, it is ready to be assigned using the **Ringer Type** setting. (For more information, refer to “Ringer Type” on page 100.)
Section 14: Tools

This section explains how to use your phone’s digital assistant functions to view today’s calendar, schedule events, set reminders, perform calculations, and more.

Accessing Your Phone’s Tools

To launch the Tools menu:

- In standby mode, press MENU ( ), then select Tools. The Tools menu appears in the display.

Voice Service

Your My Shot includes VoiceSignal, state-of-the-art voice recognition software that lets you use your voice to dial numbers, access your Contacts list, and open Tools. To access your phone’s voice recognition, do the following:

1. At the Tools menu, select Voice Service. The following options appear in the display:

   - **Voice Commands** — Lets you place calls, access your Contacts List, review your appointments, and more by speaking commands into your phone. (Also see “Using Voice Dial” on page 18 and see “Voice Method” on page 32 for more information.)

   - **Voice Settings** — Lets you tailor VoiceSignal to better respond to your voice and your phone use preferences. (For more information, refer to “Digit Dialing” on page 81.)

2. Highlight the desired sub-menu, then press 📞 .

Voice Commands

1. To access the Voice Commands menu, do one of the following:
   - In standby mode, press and hold the ⌚ key.
   - From the Tools menu, select Voice Service ➔ Voice Commands.

   Note: You can also set your phone to start VoiceSignal when you open the flip or connect an optional headset to the phone. (For more information, refer to “Voice Launch” on page 83)

   “Say a Command” appears in the display and is pronounced through the earpiece, followed by a list of available commands:

   - **Call** — Lets you dial the phone by saying any name stored in your contact list, without ever having to record, or “train” that name. VoiceSignal automatically voice-activates all your contacts, even if you have hundreds of them stored on your phone. You can also dial any telephone number, even if it is not stored in your contact list, by saying the digits in the number. (For more information, refer to “Using Voice Dial” on page 18.)

   - **Send Text** — Lets you access Create Text Message.
• **Send Picture** — Lets you access Create Picture Message.
• **Lookup** — Lets you find a Contact by name and review the Contact’s information.
• **Go to** — Lets you access the following list of your phone’s features and functions:
  - Messages
  - Axcess Shop
  - Axcess Web
  - Contacts
  - Calls
  - Multimedia
  - Tools
  - Settings
  - Phone Info
• **Check** — Lets you say a single command (such as “Status”) to verify your phone’s: Status, Battery, Signal, Network, or My phone #.

2. Speaking clearly, say the command that you want to use.

If VoiceSignal does not recognize a command, it prompts you to repeat the command.

If VoiceSignal still does not recognize the command, it tells you “No match found” and offers you the option of selecting **Settings** or **Repeat** before canceling voice recognition.

**Voice Command Tips:**

• Make sure you wait for the beep before speaking.
• Speak clearly at a normal volume, as if you were talking on the phone.

**Voice Settings**

**Choice Lists**

When VoiceSignal cannot recognize a name or number, it displays a choice list of up to three possible choices, and prompts you to confirm the correct one.

You can select how VoiceSignal will use choice lists with name dialing, digit dialing, and contacts.

To change the way VoiceSignal uses choice lists:

1. From the **Tools** menu, select **Voice Service** → **Voice Settings** → **Choice Lists**.

2. Highlight the Choice List behavior you prefer:
   • **Automatic** — VoiceSignal displays a choice list only when it is not sure if it has correctly recognized the name or number.
• **Always On** — VoiceSignal always displays a choice list, even when there is only one choice.

• **Always Off** — VoiceSignal never displays a choice list.

3. Press the OK soft key or \( \rightarrow \) to accept the new setting.
Press \( \leftarrow \) to discard the new setting and return to the Voice Settings menu.

### Sensitivity

1. From the Tools menu, select Voice Service ➔ Voice Settings ➔ Sensitivity.

2. Use the Up and Down navigation keys to adjust the selected Sensitivity setting incrementally between **Reject** More spoken commands or names and **Reject Less** spoken commands or names.

3. Press the OK soft key or \( \rightarrow \) to accept the new setting.
Press \( \leftarrow \) to discard the new setting and return to the Voice Settings menu.

### Digit Dialing

If you regularly have trouble with VoiceSignal not recognize the numbers you say, try adapting digit dialing to your voice. Adapting can improve the accuracy of digit recognition, especially for people with strong regional accents.

---

**Note:** After you adapt Digit Dial, your phone is customized to your voice, and your voice only. Others will not be able to use it unless they reset the phone to factory defaults.

Adaptation involves recording several sequences of four digits each. The recording process takes about a minute.

**Tips for Adapting Digit Dialing:**

- Use Adapt Digits in a quiet place.
- Make sure you wait for the beep before starting to speak.
- Speak clearly, and say each digit distinctly.
- If you make a mistake while recording a sequence of digits, or if there is an unexpected noise that spoils the recording, re-record that sequence.
- Only adapt digits if you are regularly having problems with digit dialing. Once you adapt, digit dialing will not work as well for other people using your phone. (You can always reset digit adaptation to its original state, as described below.)

**Adapt Digits**

To adapt digit dialing, do the following:

1. From the Tools menu, select Voice Service ➔ Voice Settings ➔ Digit Dialing ➔ Adapt Digits. Your phone displays text describing the Adapt Digits process.

---

81
2. Press the OK soft key or ➔. Your phone displays the first digit sequence and “Please say” plays through the speaker followed by the four digits appearing in the display.

3. Wait for the beep and say the digits using your normal tone of voice. After a moment, the phone plays back the recording and prompts “Did the recording sound ok?”
   • If the recording was good, say “Yes.”
   • If you need to re-record, say “No.”

If you say “No,” the phone prompts you to pronounce the digits again. Wait for the beep and then say the digits. Repeat this step until you’re satisfied with the recording.

4. After confirming that the recording sounds “ok”, continue the recording process with the next set of digits.

5. After 10 sets of digits, the phone asks whether you want to do more adaptation. Answer “Yes.”

6. Repeat steps 4 and 5 for another 10 sets of digits. After the second group of 10 sets of digits, “Adaptation complete” plays through the speaker and you are returned to the Digit Dialing menu.

Reset Digits

To reset digit dialing to factory default settings, do the following:

1. From the Tools menu, select Voice Service ➔ Voice Settings ➔ Digit Dialing ➔ Reset Digits. The phone prompts you to confirm digit reset.

2. Press the OK soft key or ➔ to reset your digit adaptation, or press the Back soft key or ➔ to cancel.

Sound

Sound lets you specify what (if any) text prompts you want your phone to read to you through the earpiece.

1. From the Tools menu, select Voice Service ➔ Voice Settings ➔ Sound. The following options appear in the display:
   • Prompts — On/Off — Enables or disables audio prompts.
   • Digits — On/Off — Enables or disables digit playback.
   • Names — On/Off — Enables or disables name playback.
   • Name Settings — Lets you adjust the Speed (Faster or Slower) and Volume (Louder or Softer) of your phone’s audio name playback.

2. Highlight the desired option, then press ➔.

3. Highlight the desired setting.
4. Press the OK soft key or \( \text{OK} \) to accept the new setting.
   Press \( \text{BACK} \) to discard the new setting and return to the
   Voice Settings menu.

**Voice Launch**

To set the key or action that launches VoiceSignal, do the following:

1. From the Tools menu, select Voice Service ➔ Voice Settings ➔ Voice Launch. The following options appear in the display:
   - Key Only — Press and hold \( \) to activate VoiceSignal for one call.
   - Key/EarMic — Attach a headset to your phone. Press and hold \( \) or press and hold the button on the headset to activate VoiceSignal.
   - Key/Flip — Open the flip or press and hold \( \) to activate VoiceSignal.

2. Highlight the option you want.

3. Press the OK soft key or \( \text{OK} \) to accept the new setting.
   Press \( \text{BACK} \) to discard the new setting and return to the Voice Settings menu.

**About**

This option causes the About VoiceSignal screen to appear in the display, showing version and build information about the VoiceSignal software included on your phone.

- From the Tools menu, select Voice Service ➔ Voice Settings ➔ About.

The About VoiceSignal screen appears in the display showing the version level of the VoiceSignal software currently installed on your phone.

**Bluetooth**

Bluetooth is a short-range wireless communications technology capable of exchanging information over a distance of about 30 feet without requiring a physical connection.

Unlike infrared, you don’t need to line up the devices to beam information with Bluetooth. If the devices are within a range of one another, you can exchange information between them, even if they are located in different rooms.

The Bluetooth wireless technology settings menu provides the ability to view and change the device name, show the visibility, and set the security for the device.
**Turn Bluetooth On/Off**

When the Bluetooth is turned on, you can use the Bluetooth features available. When the Bluetooth is turned off, you cannot send or receive information via Bluetooth. To save battery life or in situations where Bluetooth use is prohibited, such as airline traveling, you can turn off the Bluetooth wireless technology headset.

To turn Bluetooth support on:

1. From the Tools menu, select **Bluetooth ➔ Bluetooth Settings ➔ Enable**.
   - “Bluetooth set to on” and the black Bluetooth On icon (Bluetooth icon) appear in the display.

To turn Bluetooth support off:

1. From the Tools menu, select **Bluetooth ➔ Bluetooth Settings ➔ Disable**.
   - “Bluetooth set to off” appears in the display and the black Bluetooth On icon (Bluetooth icon) disappears.

**Add New Device**

To search for available Bluetooth devices:

1. From the Tools menu, select **Bluetooth ➔ Add New Device**.

If Bluetooth is off, you are prompted to “Turn Bluetooth on?”. Press the **Yes** soft key to turn Bluetooth on.

---

**Note:** Press the **No** soft key to leave Bluetooth off and return to the **Bluetooth** sub menu.

1. “Place device you are connecting to in discoverable mode” appears in the display.
2. Place the Bluetooth device in discoverable mode. (See the device user manual for more information.)
4. Highlight the device you want to pair with your phone.
5. Press **PAIR** (Bluetooth icon) to pair the highlighted device with the phone. You are prompted to enter the passkey or PIN for the selected device.
6. Enter the device passkey or PIN and press (Bluetooth icon). (See the device user manual for more information.) Pop-up messages appear to inform you that pairing with the device and connecting to it are complete.
Registered List

This menu provides a list of Bluetooth wireless technology devices discovered by your handset.

1. From the Tools menu, select Bluetooth ➔ Registered List.
   A list of registered Bluetooth devices appears in the display.

Connecting to a Bluetooth Device

From the Registered List,

1. Select a device.

2. If you are unable to connect with the device a pop-up appears in the display. Press the Yes soft key to retry.

Disconnecting from a Bluetooth Device

From the Registered List,

➤ Highlight the device and press the Off soft key.

Managing Your Registered List

From the Registered List,

1. Highlight a device and press the Options soft key. The following options appear in the display:
   • Remove Device — Deletes the device from the Registered List.
   • Rename Device — Lets you change or replace the device name, as needed.
   • Device Info — Shows the type of device, status, address, the date when it was paired with your phone, and the date the device was last connected with your phone.

2. Select the desired option.

Bluetooth Settings

Enable/Disable

Selecting this option turns Bluetooth on or off. (For more information, see “Turn Bluetooth On/Off” on page 84)

Discovery Mode

Allows other users to see your accessibility. Select On for other devices to see your device, or Off for no visibility.

Device Name

Shows the handset name. You may change this name. Enter the text and press .
**Supported Profiles**

Lists the Bluetooth profiles your phone supports. Selecting a profile shows a description of that profile.

**Device Info**

Shows the Bluetooth Type, Status, and Address of your phone.

**Calendar**

Calendar allows you to view the current, past, or future month in calendar format. While viewing the calendar, the current date is highlighted, and days with scheduled events are surrounded by a box.

**Navigating the Calendar**

1. From the Tools menu, select Calendar.

   The calendar appears in the display with the current date highlighted. The month and year appear at the top of the display.

2. Use the following controls to highlight a date in the Calendar screen:
   - **Left/Right navigation keys** — Move the highlighting back/ahead one day per keypress.
   - **Up/Down navigation keys** — Move the highlighting back/ahead one week per keypress.
   - **Up/Down volume keys** — Moves the date and screen back/ahead one month per keypress.

**Add a New Event**

1. From the Tools menu, select Calendar.

   The calendar appears in the display with the current date highlighted. The month and year appear at the top of the display.

2. Navigate to a desired date. (For more information, refer to “Navigating the Calendar” on page 86.)

3. Press Add. The New Event screen appears in the display with the Appointment Name option highlighted.

4. Enter the Appointment Name using the keypad. (For more information, refer to “Entering Text” on page 43.)

5. Use the Up/Down navigation keys to highlight the following New Event options:
   - **Start Date** — Populated with highlighted Calendar date. To change the date, use the keypad.
• **Start Time** — Populated with the current time (rounded to the nearest half-hour). To change the time, use the keypad.
  – Use the Left/Right navigation keys to select **AM** or **PM**.
• **End Date** — Populated with highlighted Calendar date. To change the date, use the keypad.
• **End Time** — Populated with a time one half-hour later that **Start Time**. To change the time, use the keypad.
  – Use the Left/Right navigation keys to select **AM** or **PM**.
• **Alert** — Select **Tone** / **Vibrate** using the Left/Right navigation keys.
  – To select a particular Tone, use the Up/Down navigation keys to highlight the current Tone and press the Left/Right navigation key. The **Alert Tone** menu appears in the display. (For more information, refer to “Ringer Type” on page 100.)
• **Reminder** — Select **Once** / **Every 2 Minutes** / **Every 15 Minutes** / **Off** using the Left/Right navigation keys.
• **Alert Time** — Select **15 Min. Before** / **30 Min. Before** / **1 Hour Before** / **3 Hours Before** / **5 Hours Before** / **1 Day Before** / **On Time** / **5 Min. Before** / **10 Min. Before** using the Left/Right navigation keys.

6. To store this Event in your Calendar, press **SAVE ( )**. An alarm will notify you prior to the Event, if **Reminder** is set to a value other than **Off**.

**View/Change an Event**

1. From the **Tools** menu, select **Calendar**.

A calendar appears in the display with the current date highlighted. The month and year appear at the top of the display.

2. Navigate to a desired date. (For more information, refer to “Navigating the Calendar” on page 86.)

3. To open the highlighted date and show a list of Events, press **VIEW ( )**.

4. Highlight an Event to view, then press **VIEW ( )** to display the specifics of the highlighted Event.

5. To scroll the Event contents, use the Up/Down navigation keys.

6. To change the event details, press the **Edit** soft key. (For more information, refer to “Add a New Event” on page 86.)

7. To return to the Events list, press **( )**.

8. For other options, press **Options**. The following options appear in the display:

   • **Monthly** — Returns you to the Calendar screen.
   • **Erase** — Remove this event from the Calendar.
   • **Erase All** — Erase all events from the Calendar.
9. Select an option to invoke its function.

**Memo Pad**

Create notes and store them in Memo Pad. Notes that you create in Memo Pad can’t be prioritized or assigned an alert. Return to Memo Pad anytime to review and edit your notes.

**Create a Memo**

1. From the **Tools** menu, select **Memo Pad**. A list of any stored Memos appears in the display.

2. To add a Memo, press **Add**. A numbered Memo screen appears in the display.

3. Enter Memo text using the keypad. (For more information, refer to “Entering Text” on page 43.)

4. When you’re finished entering details for the Memo, press **OK**. The Memo is saved.

5. To discard this Memo and return to the **Memo Pad** screen, press **Cancel**.

**Review, Edit, and Erase Memos**

1. From the **Tools** menu, select **Memo Pad**. A list of any stored Memos appears in the display.

2. To review a Memo:
   - Highlight a Memo and press **VIEW** ( ). The numbered Memo view screen appears in the display.
   - Use the Up/Down navigation keys to scroll the Memo text.

3. To edit a Memo:
   - From the **Memo Pad** screen, highlight the Memo and press **Options**. The following options appear in the display:
     - **Edit** — Change the currently highlighted Memo.
     - **Erase** — Erase the highlighted Memo.
     - **Erase all** — Erase all of the unlocked memos.
     - **Lock / Unlock** — Prevent/allow erasure of the highlighted Memo.
   - Select **Edit**. The numbered Memo edit screen appears in the display.
   - From the **Memo** view screen, press **Edit**. The numbered Memo edit screen appears in the display.
   - Use the keypad to change the Memo text. (For more information, refer to “Entering Text” on page 43.)
   - When you’re finished changing the Memo, press **OK**. The changed Memo is saved.
4. To erase a Memo:
   • From the Memo Pad screen, highlight the Memo and press Options. The following options appear in the display:
     – Edit — Change the currently highlighted memo.
     – Erase — Erase the highlighted memo.
     – Erase all — Erase all of the unlocked memos.
     – Lock / Unlock — Prevent/allow erasure of the highlighted memo.
   Select Erase. You are prompted to confirm the erasure.
   • From the Memo view screen, press Options. The following options appear in the display:
     – Erase — Erase the Memo you are viewing.
     – Add New Memo — Add a new Memo to Memo Pad.
     – Lock / Unlock — Prevent/allow erasure of the Memo you are viewing.
   Select Erase. You are prompted to confirm the erasure.
   • To erase the Memo, press Yes. To keep the Memo, press No.

Set an Alarm

1. From the Tools menu, select Alarm Clock. The following options appear in the display:
   • Alarm 1
   • Alarm 2
   • Alarm 3

2. Select the alarm clock that you wish to set. The selected Set Alarm screen appears in the display with the Alarm option highlighted and with the current time showing above it.

3. Use the Up/Down navigation keys to highlight the following Set Alarm options:
   • Alarm — Use the Left/Right navigation keys to select On or Off.
   • Time — Populated with the current time. To change the time, use the keypad.
     – Use the Left/Right navigation keys to select AM or PM.
   • Frequency — Use the Left/Right navigation keys to select Daily / Mon.–Fri. / Weekends / Once.
   • Ringer — Select Tone / Vibrate using the Left/Right navigation keys.

Alarm Clock

Your phone has three alarm clocks that you can set to go off once, or to recur daily at a specific time. Once set, an alarm clock is easy to change or turn off completely.

Note: The Alarm Clock doesn’t function when the phone is turned off. If the time for an alarm that was set for Once has elapsed while the phone is off, the alarm occurs at the specified time on the next day.
To select a particular Tone, use the Up/Down navigation keys to highlight the current Tone, then press the Left/Right navigation key. The Alert Tone menu appears in the display. (For more information, refer to “Ringer Type” on page 100.)

4. When you’re finished entering the time and frequency for the alarm, press SAVE. If the Alarm is set to On, the alarm icon ( ) appears in the top of the display.

**When an Alarm Sounds**

An animated alarm clock appears in the display and an alert sounds when the specified time for the alarm arrives.

- To silence the alarm, press .
- If the alarm was set as a Daily alarm, the alarm icon remains in the top of the display.
- If the alarm was set as a Once only alarm, the alarm icon disappears from the top of the display.

**Turn Off an Alarm**

1. From the Tools menu, select Alarm Clock. The following options appear in the display:
   - Alarm 1
   - Alarm 2
   - Alarm 3

2. Highlight the Alarm you wish to turn off, then press Options. The following options appear in the display:
   - Off —— Disables the highlighted Alarm and retains the current settings.
   - Reset Alarm —— Disables the highlighted Alarm and resets the Alarm settings to default values.
   - Reset All —— Disables all Alarms and resets all Alarm settings to default values.

3. Select the desired option to turn the selected Alarm(s) off.

**World Time**

World Time lets you view the time of day or night in any of the 24 different time zones around the world.

**Note:** To use World Time, you need to subscribe to your Wireless Provider’s digital service.

1. From the Tools menu, select World Time. A world map appears in the display.

2. Use the Left/Right navigation keys to browse cities and their current times.
The following cities are supported.

<table>
<thead>
<tr>
<th>EST/EDT : New York</th>
<th>EST/EDT : Montreal</th>
<th>EST/EDT : Boston</th>
</tr>
</thead>
<tbody>
<tr>
<td>Caracas</td>
<td>Brasilia</td>
<td>Mid Atlantic</td>

<td>EST/EDT : Detroit</td>
<td>EST/EDT : Washington D.C</td>
</tr>
</tbody>
</table>

3. Do one of the following:
   - To set the selected city/time zone as the default time zone for your phone, press.
   - To return to the Tools menu without changing the default time zone, press.

**Enable Daylight Savings Time (DST)**

1. While viewing the World Time map, press the Options soft key. DST Off / DST On pops-up in the display.
2. Press to accept the highlighted setting. If the DST icon ( ) appears in the display, it indicates that Daylight Savings Time is enabled.

**Calculator**

You can perform calculations, including addition, subtraction, multiplication and division using your phone.

1. From the Tools menu, select Calculator. The Calculator screen appears in the display.
2. Enter the first number in your equation using the keypad. (Numbers can be up to 9 digits long, and can include a decimal point followed by up to 2 more digits.)
   - Press to enter a decimal point.
   - Press to change the sign for a number to a negative.
3. Press Operator to add parentheses \([ \()\])\] to your equation or to enter a Power exponent \((^)\), such as, \(3^2\), which is the equivalent of \(3^2\).
4. Press the Clear soft key to clear current entries.
5. Use the Navigation keys (as shown in the Calculator screen) to set the type of calculation that you wish to perform. Your choices are as follows.
   - \([+]\) Addition
   - \([x]\) Multiplication
   - \([-]\) Subtraction
   - \([\div]\) Division
6. Use the keypad to enter the second number into your equation.
7. Press to perform the calculation and view the result.

Stop Watch
You can use this function to set a stop watch.

1. From the Tools menu, select Stop Watch. The Stop Watch screen appears in the display.
2. Press to start, stop, and resume the Stop Watch count.
3. Press Record at the start of each succeeding event/lap to record the completion time for the previous event/lap. You can record up to eight event/lap times.
4. Press Reset to reset the Stop Watch and to erase all Stop Watch (lap) times recorded.
Converter

The conversion menu provides the following conversion categories:
- Currency
- Length
- Weight
- Volume
- Area
- Temperature

Using Converters

To convert a currency, length, weight, volume, area, or temperature, do the following:

1. From the Tools menu, select Converter. The following list of converters appears in the display:
   - Currency
   - Length
   - Weight
   - Volume
   - Area
   - Temperature

2. Select the conversion feature you wish to use.

3. Use the Navigation key to select the units to be converted From and To.

4. Enter the quantity you want converted in the From field. The converted quantity appears in the To field.

Note: To include a decimal point, press the key.

Currency — Reviewing/Editing Exchange Rates

The Currency Converter includes long-term average exchange rates as default values. To review and/or change a default exchange rate to the current exchange rate, do the following:

1. From the Tools menu, select Converter ➔ Currency.

2. Press the Rate soft key. The Exchange Rate list appears in the display.

3. Press EDIT ( ). The Edit Exchange Rate list appears in the display showing U.S. Dollar (USD)-based exchange rates.

4. Highlight a currency whose exchange rate you wish to change.

5. Use the keypad keys to change the selected U.S. Dollar (USD)-based exchange rate value.
6. Press to save the changed exchange rate. The Exchange Rate list appears in the display.

7. To change any other exchange rates, repeat Steps 3 – 6.

8. Press the Cancel soft key to return to the Converter screen.

Currency — Adding Exchange Rates

You can use the Currency Converter to convert from and to obscure currencies by adding exchange rates for these currencies. To add a currency and its exchange rate to the Currency Converter, do the following:

1. From the Tools menu, select Converter ➔ Currency.

2. Press the Rate soft key. The Exchange Rate list for the From currency appears in the display.

3. Press the Add soft key. The Add Exchange Rate screen appears in the display with the Base field highlighted.

4. Use the Left/Right navigation key to select the Base currency to be converted from.

5. Press the Down navigation key to highlight the Currency field.

6. Enter an identifier of up to 5 characters for the new currency using the keypad. (For more information, refer to “Entering Text” on page 43.)

7. Highlight the Exchange Rate field.

8. Enter a decimal exchange rate for the new currency using the keypad.

Note: Press the key to enter the decimal point.

The Exchange Rate field only accepts up to five digits after the decimal point.

9. To add the new exchange rate to the list, press SAVE.

Currency — Erasing Exchange Rates

You cannot erase the preloaded currencies from the Exchange Rate list. You can erase a currency that you have added to the list by doing the following:

1. From the Tools menu, select Converter ➔ Currency.

2. Press Rate. The Exchange Rate list for the From currency appears in the display.

3. Highlight the user-added currency exchange rate to be erased.
4. Press **Erase**. You are prompted to confirm the erasure.

   **Note:** The **Erase** soft key is undefined for preloaded Exchange Rates. This prevents you from erasing them.

5. To erase the selected exchange rate, press **Yes**. To keep the selected exchange rate, press **No**.

### Tip Calculator

Tip Calculator automatically calculates the following amounts:

- Gratuity (tip)
- Individual payment (for groups)

Calculations are based on the total amount of the check, a selected gratuity percentage, and the number of people paying.

1. From the **Tools** menu, select **Tip Calculator**. The **Tip Calculator** screen appears in the display with the **Bill** field highlighted.
2. Enter the total amount of the bill using the keypad.

   **Note:** To include a decimal point, press the ‹ key.

3. If needed, press the Down navigation key to highlight the **Tip** field.
4. Enter a tip percentage using the keypad.
5. If needed, press the Down navigation key to highlight the **# Paying** field.
6. Enter the number of persons paying using the keypad.
7. The amount of the **Tip**, the bill **Total**, and the amount each person should pay appear in the lower half of the screen.
Section 15: Changing Your Settings

This section explains how to customize your phone to suit your needs and preferences.

Settings Menu

To access the Settings menu, press MENU ( ), then select Settings. The Settings menu appears in the display.

Location

This function identifies your location to the network via the Global Positioning System (GPS). You can set this function for continuous operation or to operate only in the event that you dial 911.

Note: Contact your Wireless Provider to determine whether, when, or where location-based services are available.

1. From the Settings menu, select Location. The following options appear in the display:
   - Location On — GPS location setting is on whenever you make or receive a call, wherever the feature is available.
   - 911 Only — GPS location setting is on only when you dial 911.
2. Select the desired Location setting. You’re returned to the Settings menu.

Display Settings

Using the Display menu, you can set the menu style, set the standby mode animation, customize the backlight settings, and more.

1. From the Settings menu, select Display Settings. The following options appear in the display:
   - Menu Style — Lets you choose whether the Main Menu appears as a matrix of icons or as a list of menus.
   - Wallpaper — Lets you choose the picture(s) that display(s) on your phone when in standby mode.
   - Clock Format — Lets you choose whether to show the time in the display in digital or analog format.
   - Theme — Lets you select the main menu color scheme.
   - Dialing Font Size — Lets you choose how the number will display on the display screen.
   - Banner — Lets you create your own personalized greeting that appears in the display when your phone is in standby mode.
   - Backlight — Lets you set backlight options for the LCDs, keypad, and set the brightness.
   - Front Contrast — Lets you set the contrast for your phone’s front display.
2. Select the desired sub-menu. The following sections describe the Display sub-menus in greater detail.

**Menu Style**

Menu Style allows you to choose how main menus appear in your display.

1. From the Settings menu, select **Display Settings → Menu Style**. The following options appear in the display:
   - **Icon** — Display main menus as icons.
   - **List** — Display main menus in a list format.

2. Select the desired option. You are returned to the **Display Settings** menu.

**Wallpaper**

Wallpaper lets you choose the pictures that appear in your phone’s displays while in standby mode.

1. From the Settings menu, select **Display Settings → Wallpaper**. The following options appear in the display:
   - **Main Screen**
   - **Front Screen**

Note: When you select **Front Screen**, your Wallpaper selection automatically changes the **Clock Format** setting for the **Front Clock** to **Off**.

2. Select the sub-menu you wish to enter.

The following options appear in the display:

- **My Images** — Choose a picture to appear in the display when the phone is in standby mode.
- **Preset Images** — Choose a preset image to appear in the display when the phone is in standby mode.
- **Image Shuffle** — Main Display only — Choose your Image Shuffle set of images to appear in the main display as a slide show when the phone is in standby mode. (For more information, refer to “Setting Up Shuffle” on page 75.)

3. Select the sub-menu that you wish to enter.

   - For **My Images** and **Preset Images** up to four pictures or images appear in the display.

4. Select a picture or image to display when the phone is in standby mode.

**Clock Format**

Clock Format lets you choose whether to show the time in the display in digital or analog format. You can set both the Main Clock and the Front Clock.

1. From the Settings menu, select **Display Settings → Clock Format**.
2. Select Main Clock or Front Clock. The following options appear in the display:

- **Digital** — The current time appears as large numbers on the second line from the top of the display (Main Clock) or in the center of the display (Front Clock).
- **Analog** — The current time appears as sweep hand positions on a clock image. Individual hours appear as Roman numerals (I – XII).
- **Off** — The current time appears as small numbers on the second line from the bottom of the display (Main Clock) or in the center of the display with the Front Screen Wallpaper in the background.

**Note:** The Clock Format setting for the Front Clock automatically changes to Off when you change the Wallpaper setting for the Front Screen. (For more information, refer to “Wallpaper” on page 97.)

3. Highlight the desired setting, then press \( \leftarrow \rightarrow \) to save the setting.

### Theme

Theme lets you select the color scheme your phone uses to highlight menu items and scroll bar positions.

1. From the Settings menu, select Display Settings \( \rightarrow \) Theme.

The following options appear in the display:

2. Select the desired theme. You are returned to the Display Settings menu, now showing the selected theme.

### Dialing Font Size

With Zoom-out enabled, Dialing Font Size adjusts the size of the numbers that appear in the dialing screen when you dial more than 10 digits. This lets you see as many of the digits you’ve dialed as possible.

1. From the Settings menu, select Display Settings \( \rightarrow \) Dialing Font Size.
The following options appear in the display:

- **Enable Zoom-out**
- **Disable Zoom-out**

2. Select the desired dialing font size value.

**Banner**

Create your own personalized greeting that appears in the display while your phone is in standby mode.

1. From the **Settings** menu, select **Display Settings ➔ Banner**. The **Banner** text entry screen appears in the display.

   **Note:** If necessary, press and hold [Back] to erase an existing banner.

2. Enter a word or short phrase (up to 12 characters) to appear in your phone’s display while in standby mode. (For more information, refer to “Entering Text” on page 43.)

3. Press [Save] to save the new banner.

**Backlight**

You can set the backlight for your display or keypad to remain on or off or to remain on for a specified period of time.

**Note:** Prolonged backlight use drains your battery faster.

1. From the **Settings** menu, select **Display Settings ➔ Backlight**. The following sub-menus appear in the display:

- **Main Display** — Sets the amount of time the main display backlight remains on with the phone idle. Optional settings are 7, 15, and 30 Seconds and Always On (this setting uses much more power than the timed settings) and Always Off.
- **Keypad** — Sets the amount of time the main display backlight remains on with the phone idle. Optional settings are 7, 15, and 30 Seconds and Always On (this setting uses much more power than the timed settings) and Always Off.
- **Brightness** — Use the Left and Right soft keys to select between any of 5 optional settings.

2. Select a Backlight option a setting for the option.

**Front Contrast**

Set the Front (Sub) LCD contrast to your preference.

1. At the **Settings** menu, select **Display Settings ➔ Front**...
Changing Your Settings

Contrast

The Front Contrast screen appears in the display.

2. Use the Left and Right navigation keys to adjust the contrast for the Front Display. The results of your adjustments appear in the display.

3. Press to save your new contrast setting.

Sounds Settings

The Sounds Settings menu provides a variety of options to customize audio properties for such things as ringers, keypad tones alerts, and more.

Ringer Type

You can assign ringer types and melody tones for calls, alarms, and other alerts, in the Ringer Type sub-menu.

1. From the Settings menu, select Sounds Settings ➔ Ringer Type.

The following options appear in the display:

- Voice Calls — Lets you set which ringtone, sound file, and/or one of a set of ringtones and/or sound files plays when you receive a voice call.
- Messages — Lets you set which ringtone or sound file plays when you receive a Text Message, Picture Message, and/or Voicemail message.

- Buy a Ringtone — Connects you with the network and lets you buy a ringtone.

2. Select the desired sub-menu. The following sub-menu options appear in the display:

- For Voice Calls, the following options appear in the display:
  - My Ringtones
  - My Sounds
  - Melody Shuffle (For more information, refer to “Setting Up Shuffle” on page 75.)

- For Messages, the following options appear in the display:
  - Text Message
  - Picture Message
  - Voicemail

3. Select the desired sub-menu option, then select the desired ringer.

Alerts

You can set your phone to sound an alert whenever you enter or leave your service area, connect or disconnect a call, as well as other options.

1. From the Settings menu, select Sounds Settings ➔ Alerts.
The following Alerts options appear in the display:

- **Minute Beep** — Sounds an alert ten seconds before each elapsed minute of a call.
- **Roaming** — Sounds an alert when you leave your home service area during a call.
- **Call Connect** — When you make a call, an alert sounds when the call is answered.
- **Power On/Off** — Plays a melody when the phone is being turned on or off.

2. Select the desired Alert option.
3. Select the desired value for the selected Alert.

**Key Tone**

Key Tone lets you adjust the volume level and length of tone that the keypad generates each time you press a key.

1. From the **Settings** menu, select **Sounds Settings** → **Key Tone**. The following sub-menus appear in the display:
   - **Tone Level** (volume)
   - **Tone Length**

2. Select the desired Key Tone sub-menu.

For **Tone Level**, do the following:
- Use the Volume keys or Navigation key to set the keypad tones volume.
- Press \[ key to save your setting and return to the **Key Tone** sub-menu.

For **Tone Length**, do the following:
- Highlight **Normal** or **Long**.
- Press \[ key to save your setting and return to the **Key Tone** sub-menu.

**Vibrating Alert**

Vibrating Alert lets you set your phone to vibrate in sync with ringtones and melodies your phone plays.

1. From the **Settings** menu, select **Sounds Settings** → **Vibrating Alert**.
2. Select **On** or **Off**. You are returned to the **Sound Settings** menu.

**Call Settings**

**Call Answer**

You can select a specific answer mode when you receive an incoming call.

1. From the **Settings** menu, select **Call Settings** → **Call Answer**.

The following call answer settings appear in the display:

- **Any Key** — Press any key except the \[ or Left soft key (\[) to answer an incoming call.
- **Talk Key** — Press \[ key to answer an incoming call.
• Flip Open — Open the flip or press \(\text{Talk}\) to answer an incoming call.

Tip: You can set your phone to answer calls automatically, without any input from you. (For more information, refer to “Auto Answer” on page 102)

2. Select the desired call answering method.

**Call Alert**

1. From the Settings menu, select Call Settings \(\rightarrow\) Call Alert. The following Call Alert settings appear in the display:
   - **Ring Only** — Phone rings for an incoming call.
   - **Caller ID + Ring** — Phone rings and the display shows caller ID for an incoming call.
   - **Name Repeat** — Phone repeats displaying Contact name or caller ID.

2. Select the desired call alerting method.

**Auto Answer**

Auto Answer enables your phone to automatically answer calls after a period of time that you specify.

1. From the Settings menu, select Call Settings \(\rightarrow\) Auto Answer. The following settings appear in the display:
   - **Off** — Disables automatic answering of calls
   - **After 1 Second** — Phone automatically answers calls after 1 second
   - **After 3 Seconds** — Phone automatically answers calls after 3 seconds
   - **After 5 Seconds** — Phone automatically answers calls after 5 seconds

2. Select the desired call automatic answering method.

**Auto Retry**

Auto Retry automatically re-dials a number if the connection fails. Depending upon your location, the number of times your phone automatically dials the number may vary.

1. From the Settings menu, select Call Settings \(\rightarrow\) Auto Retry. The following settings appear in the display:
   - **Off** — Disables automatic re-dialing of numbers
   - **Every 10 Seconds** — Phone automatically re-dials a number every 10 seconds
   - **Every 30 Seconds** — Phone automatically re-dials a number every 30 seconds
   - **Every 60 Seconds** — Phone automatically re-dials a number every 60 seconds

2. Select the desired call automatic retrying method.
TTY Mode

Your phone is fully compatible with TTY equipment used by those who are hearing impaired. TTY equipment is connected to your phone through the power/accessory connector on the left side of the phone. TTY Mode must be enabled before you can use your phone with a TTY device.

1. From the Settings menu, select Call Settings → TTY Mode. You are prompted to confirm you want to change the current TTY Mode setting.

2. To access the TTY Mode settings, press the Yes soft key. To return to the Call Settings sub-menu, press the No soft key.

3. If you press the Yes soft key, the following settings appear in the display:
   - TTY Full — Enables TTY mode and disables microphone and earpiece
   - TTY + Talk — Enables TTY mode and microphone
   - TTY + Hear — Enables TTY mode and earpiece
   - TTY Off — Disables TTY mode

4. Select the desired TTY Mode.

Note: The “Enabling TTY may impair headset use and non-TTY accessory performance” message pops up when you select TTY Mode.

Voice Privacy

Voice Privacy when enabled (that is, set to Enhanced), turns on advanced voice encryption.

1. From the Settings menu, select Call Settings → Voice Privacy. The following settings appear in the display:
   - Standard — Voice privacy is disabled
   - Enhanced — Voice privacy is enabled

2. Select the desired Voice Privacy setting.

Data Settings

Use the Data Settings menu to configure data connection settings.

1. From the Settings menu, select Call Settings → Data Settings. The following settings appear in the display:
   - Data Off — No incoming data calls accepted.
   - Data For Next Call — Wait for data call for the next 10 minutes.
   - Data Until Powered Off — Data calls only, no voice calls accepted, until you power the phone off and on again.

2. Select the desired data call connection setting.
Phone Settings

Airplane Mode

When set to **On**, Airplane Mode disables all radio functions of your phone. This prevents you from receiving or making calls (except emergency calls), but allows you to use other features (such as the camera and the Tools) safely in sensitive environments, such as on board an aircraft.

1. From the **Settings** menu, select **Phone Settings ➔ Airplane Mode**. The following settings appear in the display:
   - **On** — Disables the radio transmitter and receiver in your phone
   - **Off** — Enables the radio transmitter and receiver in your phone

2. Select the desired Airplane Mode setting.

Language

The language option on your phone can change the language of voice prompts, menus, and key-input.

1. From the **Settings** menu, select **Phone Settings ➔ Language**. The following settings appear in the display:
   - **English**
   - **Spanish**

2. Select the desired Language setting.

Security

Use the Security menu to lock your phone, set up emergency numbers, set restrictions, as well as other security options.

Lock Phone

Locking the phone limits all outgoing calls except calls to 911 emergency and the three user-programmable emergency numbers. You can lock the phone manually during use, or set the phone to lock automatically when it is turned on. With the phone in lock mode, you can answer incoming calls, but you must unlock the phone to place outgoing calls (except to emergency and secret numbers).

1. From the **Settings** menu, select **Phone Settings ➔ Security**. You’re prompted to enter the lock code.

---

Note: The default lock code is the last four digits of your telephone number.

2. Enter the lock code, then select **Lock Phone**. The following phone Lock mode settings appear in the display:
   - **Lock** — Locks the phone immediately (The phone stays locked until you enter the lock code.)
   - **Unlock** — Unlocks the phone.
   - **On Power Up** — The phone locks automatically the next time your phone is powered ON (The phone stays locked until you enter the lock code.)
3. Select the desired phone Lock mode setting.

Tip: You can manually lock your phone by pressing and holding . (For more information, refer to “Lock Mode” on page 14.)

Change Lock Code

The default lock code for your phone is generally the last four digits of your phone number. It is advisable to change the default lock code to a secret code for security purposes.

1. From the Settings menu, select Phone Settings ➔ Security. You’re prompted to enter the lock code.

Note: The default lock code is the last four digits of your telephone number.

2. Enter the lock code, then select Change Lock Code. You’re prompted to enter the new lock code.

3. Enter the new lock code. You’re prompted to re-enter the new lock code for verification.

4. Enter the new lock code again. Your new Lock Code is stored.

Note: Your phone does not allow you to view the Lock Code for obvious security reasons. If you change the Lock Code, be sure to write down or memorize the new code.

Emergency #

Your phone provides the option of storing three emergency numbers. Each number can be up to 32 digits in length. All emergency numbers can be manually called at any time, even when your phone is locked or restricted. This can be a useful feature for controlling outgoing calls from your phone.

Note: Emergency number 911 is hard-coded into your phone. You can dial this number any time, even when the phone is locked or restricted. If you call 911 an audible tone is heard and an Emergency prompt appears in the display for the duration of the call.

Important!: Because of various transmission methods, network parameters, and user settings necessary to complete a call from your wireless phone, a connection cannot always be guaranteed. Therefore, emergency calling may not be available on all wireless networks at all times.

Important!: DO NOT depend on this phone as a primary method of calling 911 or for any other essential or emergency communications.

Remember to always turn your phone on and check for adequate signal strength before placing a call.

Store Emergency Numbers

1. From the Settings menu, select Phone Settings ➔ Security. You’re prompted to enter the lock code.
Note: The default lock code is the last four digits of your telephone number.

2. Enter the lock code, then select Emergency #.
3. Select from the three emergency number entries.
4. Enter an emergency number (up to 32 digits in length).
5. Press to save the number that you entered.

Call Emergency Numbers in Lock Mode
1. In standby mode, enter the emergency number.
2. Press TALK to place the call.

Reset Phone
Reset Phone returns all Settings to their factory default values.
1. From the Settings menu, select Phone Settings ➔ Security.
   You're prompted to enter the lock code.

   Note: The default lock code is the last four digits of your telephone number.

2. Enter the lock code, then select Reset Phone. You are prompted to confirm that you want to restore default settings (except for the Contacts and Voice Dial).
   • To return to the Security sub-menu without resetting the phone, press the No soft key.
   • To restore default settings, press the Yes soft key.

Erase All Contacts
Erase memory erases your Contacts and Group information (except Default). This feature is useful if you want to give your phone to someone else.
1. From the Settings menu, select Phone Settings ➔ Security. You’re prompted to enter the lock code.

   Note: The default lock code is the last four digits of your telephone number.

2. Enter the lock code, then select Erase All Contacts. You are prompted to confirm erasure of all Contacts entries.

   Note: This procedure does not delete your Photo Gallery. The Photo Gallery needs to be deleted separately.

3. To erase all entries, press the Yes soft key. To keep the current entries and return to the Security sub-menu, press the No soft key.

Restrictions
Restrictions lets you restrict the use of your phone for outgoing calls, incoming calls, and calls placed from your Contacts.
1. From the Settings menu, select Phone Settings ➔ Security. You’re prompted to enter the lock code.
Note: The default lock code is the last four digits of your telephone number.

2. Enter the lock code, then select Restrictions.

3. Select Outgoing Calls or Incoming Calls. The following options appear in the display:
   - **Allow All** — No restriction on selected calls.
   - **Allow None** — Restrict (block) all selected calls.
   - **Allow Contacts** — Restrict selected calls from/to numbers not in your Contacts list.

4. Select the desired call Restrictions setting.

**NAM Selection**

The Network menu allows you to select NAM (Number Assignment Module) settings for your phone. You can store two NAM settings, which are essentially telephone numbers, for your phone.

1. From the Settings menu, select Phone Settings ➔ NAM Selection. The following options appear in the display:
   - **NAM1** — Your service contract has one phone line.
   - **NAM2** — Your service contract has two phone lines.

2. Select the desired NAM setting. The phone powers itself off and back on.

**System Select**

The System Select menu allows you to select the roaming setting for your phone.

1. From the Settings menu, select Phone Settings ➔ System Select.

   The following roaming options appear in the display:
   - **Home only** — Your phone is available for normal operation only within your designated coverage area.
   - **Automatic-A** — Your Wireless Provider’s Preferred Roaming List (PRL) of networks is used to acquire service. If no preferred networks are found, any digital “A” system is acquired.
   - **Automatic-B** — Your Wireless Provider’s PRL is used to acquire service. If no preferred networks are found, any digital “B” system is acquired.

2. Select desired roaming option.

**Set Time**

Use the Set Time option to set the current date and time.

Note: In digital service mode, the Set Time feature is disabled. The network adjusts time and date automatically.

With Airplane Mode set to On, this function is enabled. In digital service mode, setting Airplane Mode to Off also disables Set Time. (For more information, refer to “Airplane Mode” on page 104.)
1. From the Settings menu, select Phone Settings ➔ Set Time. The following options appear in the display:
   - Set Date
   - Set Time
2. Select the desired option.
   - For Set Date, the Set Date screen appears in the display.
     - Enter the current date using your keypad. The month and day must be entered using two digits each. The year must be entered using all four digits.
     - Press  to save your date setting.
   - For Set Time, the Set Time screen appears in the display.
     - Enter the current time using your keypad. The hour and minute must be entered using two digits each and in 12/24-hour format.
     - Use the Left and Right navigation keys to select AM, PM, or 24 Hours.
     - Press  to save your time setting.

Quick Search

Quick Search is an easy way to locate Menu items and Contacts.

1. From the Settings menu, select Phone Settings ➔ Quick Search. The following options appear in the display:
   - On — Quick Search is enabled.
   - Off — Quick Search is disabled.
2. Select the desired Quick Search setting.

Searching for a Menu Item

1. In standby mode, press the first few numeric keys that correspond to the letters of the menu item name.
   For example, to search for “Inbox” you could enter:

   ![Image of Menu List screen with “Inbox” highlighted]

   2. Press the Down navigation key. The Menu List screen appears in the display with the first menu item matching your entry highlighted.
3. Select the desired menu item.

Tip: If the menu item you are searching for does not appear in the Menu List screen, try expanding your search by pressing the  key to delete the last digit of your entry.
Searching for a Contact

1. In standby mode, press the first few numeric keys that correspond to the letters of the Contact name.

   For example, to search for “Sally” you could enter:

   ![Image of numeric keypad with keys 7, 2, and 5 highlighted]

   S A L

2. Press the Up navigation key.

   The Find screen appears in the display with the first Contact name matching your entry highlighted.

3. Select the desired Contact and press to call the contact.

Memory Info

Memory Info lets you quickly and easily review and manage your phone memory usage. To access Memory Info, do the following:

1. From the Settings menu, select Memory Info. The following information appears in the display:

   - Total Used memory usage
   - Available unused memory
   - My Photos memory usage
   - My Ringtones memory usage
   - My Sounds memory usage
   - Applications memory usage

2. Press to return to the Memory Info menu.

Software Update

Software Update lets you update your phone’s software by downloading and installing improved software elements from your wireless provider’s network.

1. From the Settings menu, select Software Update. The following option appears in the display:

   - Check for Update — Checks your Wireless Provider’s server for software updates for your phone.

2. Press . You are prompted to confirm the software update check.

3. To proceed with the software update check, press the Yes soft key. “Session in Progress.” appears in the display.

To cancel the software update check, press the No soft key.
4. When the software update check is complete:
   
   - If a software update is found, you are prompted to confirm the software update.
     To install the software update now, press the **Yes** soft key. To cancel the software update until later, press the **No** soft key.
   
   - If there are no updates found, your phone returns to standby mode.
Section 16: Phone Info

This section explains Phone Info options that let you identify the hardware and software versions of your phone and let you identify the phone number assigned to your phone.

Phone Number

This option causes the Phone Number screen to appear in the display and show the ten-digit number assigned to your phone by your Wireless Provider.

1. In standby mode, press MENU ( ), then select Phone Info ➔ Phone Number. The phone number assigned by your Wireless Provider appears in the display.

2. To return to the Phone Info menu, press .

Icon Glossary

This option causes the Icon Glossary list to appear in the display and show the icons that can appear in the display and the names of the icons.

1. In standby mode, press MENU ( ), then select Phone Info ➔ Icon Glossary. A list shows of the icons that can appear on the top line of the display.

2. To return to the Phone Info menu, press .

Version

You can view both the software and hardware version of your phone using this feature. This feature is helpful if you need to contact Customer Service.

1. In standby mode, press MENU ( ), then select Phone Info ➔ Version.

   Your phone’s hardware and software version information appears in the display.

2. To return to the Phone Info menu, press .
Section 17: Health and Safety Information

This section outlines the safety precautions associated with using your phone. These safety precautions should be followed to safely use your phone.

**Health and Safety Information**

**Exposure to Radio Frequency (RF) Signals**

**Certification Information (SAR)**

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the exposure limits for radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. government.

These FCC exposure limits are derived from the recommendations of two expert organizations, the National Counsel on Radiation Protection and Measurement (NCRP) and the Institute of Electrical and Electronics Engineers (IEEE).

In both cases, the recommendations were developed by scientific and engineering experts drawn from industry, government, and academia after extensive reviews of the scientific literature related to the biological effects of RF energy.

The exposure limit set by the FCC for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate (SAR). The SAR is a measure of the rate of absorption of RF energy by the human body expressed in units of watts per kilogram (W/kg). The FCC requires wireless phones to comply with a safety limit of 1.6 watts per kilogram (1.6 W/kg).

The FCC exposure limit incorporates a substantial margin of safety to give additional protection to the public and to account for any variations in measurements.

SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC. Tests for each model phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC.

For body worn operation, this phone has been tested and meets FCC RF exposure guidelines when used with an accessory that
contains no metal and that positions the handset a minimum of 1.5 cm from the body.

Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

The FCC has granted an Equipment Authorization for this mobile phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. The maximum SAR values for this model phone as reported to the FCC are:

- **Head:** 1.16 W/kg
- **Body-worn:** 0.907 W/kg

SAR information on this and other model phones can be viewed online at [http://www.fcc.gov/oet/ea](http://www.fcc.gov/oet/ea). To find information that pertains to a particular model phone, this site uses the phone FCC ID number which is usually printed somewhere on the case of the phone.

Sometimes it may be necessary to remove the battery pack to find the number. Once you have the FCC ID number for a particular phone, follow the instructions on the website and it should provide values for typical or maximum SAR for a particular phone. Additional product specific SAR information can also be obtained at [www.fcc.gov/cgb/sar](http://www.fcc.gov/cgb/sar).

---

**Samsung Mobile Products and Recycling**

Samsung cares for the environment and encourages its customers to recycle Samsung mobile phones and genuine Samsung accessories.

**UL Certified Travel Adapter**

The Travel Adapter for this phone has met applicable UL safety requirements. Please adhere to the following safety instructions per UL guidelines.

FAILURE TO FOLLOW THE INSTRUCTIONS OUTLINED MAY LEAD TO SERIOUS PERSONAL INJURY AND POSSIBLE PROPERTY DAMAGE

IMPORTANT SAFETY INSTRUCTIONS - SAVE THESE INSTRUCTIONS.

DANGER - TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, CAREFULLY FOLLOW THESE INSTRUCTIONS.

FOR CONNECTION TO A SUPPLY NOT IN NORTH AMERICA, USE AN ATTACHMENT PLUG ADAPTOR OF THE PROPER CONFIGURATION FOR THE POWER OUTLET. THIS POWER UNIT IS INTENDED TO BE CORRECTLY ORIENTATED IN A VERTICAL OR HORIZONTAL OR FLOOR MOUNT POSITION.
Consumer Information on Wireless Phones

The U.S. Food and Drug Administration (FDA) has published a series of Questions and Answers for consumers relating to radio frequency (RF) exposure from wireless phones. The FDA publication includes the following information:

What kinds of phones are the subject of this update?

The term wireless phone refers here to hand-held wireless phones with built-in antennas, often called "cell," "mobile," or "PCS" phones. These types of wireless phones can expose the user to measurable radio frequency energy (RF) because of the short distance between the phone and the user’s head. These RF exposures are limited by Federal Communications Commission safety guidelines that were developed with the advice of FDA and other federal health and safety agencies.

When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person’s RF exposure decreases rapidly with increasing distance from the source. The so-called "cordless phones," which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures well within the FCC's compliance limits.

Do wireless phones pose a health hazard?

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of radio frequency energy (RF) in the microwave range while being used. They also emit very low levels of RF when in the stand-by mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

What is FDA’s role concerning the safety of wireless phones?

Under the law, FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to emit radio frequency energy (RF) at a level that is hazardous to the user. In such a case, FDA could require the manufacturers of wireless phones to notify users of the
FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. FCC relies on FDA and other health agencies for safety questions about wireless phones.

FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones.

Base stations are thus not the primary subject of the safety questions discussed in this document.

**What are the results of the research done already?**

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of radio frequency energy (RF) exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that showed increased tumor development used animals that had been genetically engineered or treated with...
cancer-causing chemicals so as to be pre-disposed to develop cancer in absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we don’t know with certainty what the results of such studies mean for human health.

Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuroma, tumors of the brain or salivary gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phones RF exposures.

However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.

**What research is needed to decide whether RF exposure from wireless phones poses a health risk?**

A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but ten or more years' follow-up may be needed to provide answers about some health effects, such as cancer.

This is because the interval between the time of exposure to a cancer-causing agent and the time tumors develop - if they do - may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.

**What is FDA doing to find out more about the possible health effects of wireless phone RF?**

FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to radio frequency energy (RF).

FDA has been a leading participant in the World Health Organization international Electromagnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The Project has also helped develop a series of public information documents on EMF issues.
FDA and Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research and Development Agreement (CRADA) to do research on wireless phone safety. FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through contracts to independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

What steps can I take to reduce my exposure to radio frequency energy from my wireless phone?

If there is a risk from these products - and at this point we do not know that there is - it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to radio frequency energy (RF). Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure.

- If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna.

Again, the scientific data do not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

What about children using wireless phones?

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to radio frequency energy (RF), the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and increasing the distance between the user and the RF source will reduce RF exposure.

Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000.

They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it
was not based on scientific evidence that any health hazard exists.

**Do hands-free kits for wireless phones reduce risks from exposure to RF emissions?**

Since there are no known risks from exposure to RF emissions from wireless phones, there is no reason to believe that hands-free kits reduce risks. Hands-free kits can be used with wireless phones for convenience and comfort. These systems reduce the absorption of RF energy in the head because the phone, which is the source of the RF emissions, will not be placed against the head. On the other hand, if the phone is mounted against the waist or other part of the body during use, then that part of the body will absorb more RF energy. Wireless phones marketed in the U.S. are required to meet safety requirements regardless of whether they are used against the head or against the body. Either configuration should result in compliance with the safety limit.

**Do wireless phone accessories that claim to shield the head from RF radiation work?**

Since there are no known risks from exposure to RF emissions from wireless phones, there is no reason to believe that accessories that claim to shield the head from those emissions reduce risks. Some products that claim to shield the user from RF absorption use special phone cases, while others involve nothing more than a metallic accessory attached to the phone. Studies have shown that these products generally do not work as advertised. Unlike "hand-free" kits, these so-called "shields" may interfere with proper operation of the phone. The phone may be forced to boost its power to compensate, leading to an increase in RF absorption. In February 2002, the Federal trade Commission (FTC) charged two companies that sold devices that claimed to protect wireless phone users from radiation with making false and unsubstantiated claims. According to FTC, these defendants lacked a reasonable basis to substantiate their claim.

**What about wireless phone interference with medical equipment?**

Radio frequency energy (RF) from wireless phones can interact with some electronic devices. For this reason, FDA helped develop a detailed test method to measure electromagnetic interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical instrumentation (AAMI). The final draft, a joint effort by FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI. FDA has tested
wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that no interference occurs when a person uses a compatible phone and a compatible hearing aid at the same time. This standard was approved by the IEEE in 2000.

FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, FDA will conduct testing to assess the interference and work to resolve the problem.

Additional information on the safety of RF exposures from various sources can be obtained from the following organizations (Updated 12/1/2006):

**Road Safety**

Your wireless phone gives you the powerful ability to communicate by voice, almost anywhere, anytime. But an important responsibility accompanies the benefits of wireless phones, one that every user must uphold.

When driving a car, driving is your first responsibility. When using your wireless phone behind the wheel of a car, practice good common sense and remember the following tips:

1. Get to know your wireless phone and its features, such as speed dial and redial. If available, these features help you to place your call without taking your attention off the road.

2. When available, use a hands-free device. If possible, add an additional layer of convenience and safety to your wireless phone with one of the many hands free accessories available today.
3. Position your wireless phone within easy reach. Be able to access your wireless phone without removing your eyes from the road. If you get an incoming call at an inconvenient time, let your voice mail answer it for you.

4. Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow, ice and even heavy traffic can be hazardous.

5. Do not take notes or look up phone numbers while driving. Jotting down a "to do" list or flipping through your address book takes attention away from your primary responsibility, driving safely.

6. Dial sensibly and assess the traffic; if possible, place calls when you are not moving or before pulling into traffic. Try to plan calls when your car will be stationary. If you need to make a call while moving, dial only a few numbers, check the road and your mirrors, then continue.

7. Do not engage in stressful or emotional conversations that may be distracting. Make people you are talking with aware you are driving and suspend conversations that have the potential to divert your attention from the road.

8. Use your wireless phone to call for help. Dial 9-1-1 or other local emergency number in the case of fire, traffic accident or medical emergencies.

9. Use your wireless phone to help others in emergencies. If you see an auto accident, crime in progress or other serious emergency where lives are in danger, call 9-1-1 or other local emergency number, as you would want others to do for you.

10. Call roadside assistance or a special non-emergency wireless assistance number when necessary. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or other special non-emergency number.
"The wireless industry reminds you to use your phone safely when driving."

For more information, please call 1-888-901-SAFE, or visit our web-site www.ctia.org.

**Important!:** If you are using a handset other than a standard numeric keypad, please call 1-888-901-7233.

Provided by the Cellular Telecommunications & Internet Association.

**Responsible Listening**

**Caution!:** Avoid potential hearing loss.

Damage to hearing occurs when a person is exposed to loud sounds over time. The risk of hearing loss increases as sound is played louder and for longer durations. Prolonged exposure to loud sounds (including music) is the most common cause of preventable hearing loss. Some scientific research suggests that using portable audio devices, such as portable music players and cellular telephones, at high volume settings for long durations may lead to permanent noise-induced hearing loss. This includes the use of headphones (including headsets, earbuds, and Bluetooth or other wireless devices). Exposure to very loud sound has also been associated in some studies with tinnitus (a ringing in the ear), hypersensitivity to sound and distorted hearing.

Individual susceptibility to noise-induced hearing loss and potential hearing problem varies. Additionally, the amount of sound produced by a portable audio device varies depending on the nature of the sound, the device settings, and the headphones that are used. As a result, there is no single volume setting that is appropriate for everyone or for every combination of sound, settings and equipment.

You should follow some commonsense recommendations when using any portable audio device:

- Set the volume in a quiet environment and select the lowest volume at which you can hear adequately.
- When using headphones, turn the volume down if you cannot hear the people speaking near you or if the person sitting next to you can hear what you are listening to.
- Do not turn the volume up to block out noisy surroundings. If you choose to listen to your portable device in a noisy environment, you noise-cancelling headphones to block out background environmental noise. By blocking background environment noise, noise cancelling headphones should allow you to hear the music at lower volumes than when using earbuds.
- Limit the amount of time you listen. As the volume increases, less time is required before you hearing could be affected.
• Avoid using headphones after exposure to extremely loud noises, such as rock concerts, that might cause temporary hearing loss. Temporary hearing loss might cause unsafe volumes to sound normal.
• Do not listen at any volume that causes you discomfort. If you experience ringing in your ears, hear muffled speech or experience any temporary hearing difficulty after listening to your portable audio device, discontinue use and consult your doctor.

You can obtain additional information on this subject from the following sources:

**Operating Environment**
Remember to follow any special regulations in force in any area and always switch your phone off whenever it is forbidden to use it, or when it may cause interference or danger.

When connecting the phone or any accessory to another device, read its user's guide for detailed safety instructions. Do not connect incompatible products.
As with other mobile radio transmitting equipment, users are advised that for the satisfactory operation of the equipment and for the safety of personnel, it is recommended that the equipment should only be used in the normal operating position (held to your ear with the antenna pointing over your shoulder if you are using an external antenna).

**Using Your Phone Near Other Electronic Devices**

Most modern electronic equipment is shielded from radio frequency (RF) signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone. Consult the manufacturer to discuss alternatives.

**Implantable Medical Devices**

A minimum separation of six (6) inches should be maintained between a handheld wireless phone and an implantable medical device, such as a pacemaker or implantable cardioverter defibrillator, to avoid potential interference with the device.

Persons who have such devices:

- Should ALWAYS keep the phone more than six (6) inches from their implantable medical device when the phone is turned ON;
- Should not carry the phone in a breast pocket;
- Should use the ear opposite the implantable medical device to minimize the potential for interference;
- Should turn the phone OFF immediately if there is any reason to suspect that interference is taking place.
- Should read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using your wireless phone with such a device, consult your health care provider.

For more information see:

http://www.fcc.gov/oet/rfsafety/ rf-faqs.html

**FCC Hearing-Aid Compatibility (HAC) Regulations for Wireless Devices**

On July 10, 2003, the U.S. Federal Communications Commission (FCC) Report and Order in WT Docket 01-309 modified the exception of wireless phones under the Hearing Aid Compatibility Act of 1988 (HAC Act) to require digital wireless phones be compatible with hearing-aids.

The intent of the HAC Act is to ensure reasonable access to telecommunications services for persons with hearing disabilities.

While some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate.
The wireless telephone industry has developed a rating system for wireless phones, to assist hearing device users find phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label located on the box.

The ratings are not guarantees. Results will vary depending on the user’s hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

**M-Ratings:** Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

**T-Ratings:** Phones rated T3 or T4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. T4 is the better/higher of the two ratings.

Hearing devices may also be rated. Your hearing device manufacturer or hearing health professional may help you find this rating. Higher ratings mean that the hearing device is relatively immune to interference noise. The hearing aid and wireless phone rating values are then added together. A sum of 5 is considered acceptable for normal use. A sum of 6 is considered for best use.

In the above example, if a hearing aid meets the M2 level rating and the wireless phone meets the M3 level rating, the sum of the two values equal M5. This is synonymous for T ratings. This should provide the hearing aid user with "normal usage" while using their hearing aid with the particular wireless phone. "Normal usage" in this context is defined as a signal quality that is acceptable for normal operation.

The M mark is intended to be synonymous with the U mark. The T mark is intended to be synonymous with the UT mark. The M and T marks are recommended by the Alliance for Telecommunications Industries Solutions (ATIS). The U and UT marks are referenced in Section 20.19 of the FCC Rules.
The HAC rating and measurement procedure are described in the American National Standards Institute (ANSI) C63.19 standard.

**Other Medical Devices**

If you use any other personal medical devices, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information. Switch your phone off in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

**Vehicles**

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

**Posted Facilities**

Switch your phone off in any facility where posted notices require you to do so.

---

**Potentially Explosive Environments**

Switch your phone off when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Users are advised to switch the phone off while at a refueling point (service station). Users are reminded of the need to observe restrictions on the use of radio equipment in fuel depots (fuel storage and distribution areas), chemical plants or where blasting operations are in progress.

Areas with a potentially explosive atmosphere are often but not always clearly marked. They include below deck on boats, chemical transfer or storage facilities, vehicles using liquefied petroleum gas (such as propane or butane), areas where the air contains chemicals or particles, such as grain, dust or metal powders, and any other area where you would normally be advised to turn off your vehicle engine.

**Emergency Calls**

This phone, like any wireless phone, operates using radio signals, wireless and landline networks as well as user-programmed functions, which cannot guarantee connection in all conditions. Therefore, you should never rely solely on any wireless phone for essential communications (medical emergencies, for example).
Remember, to make or receive any calls the phone must be switched on and in a service area with adequate signal strength. Emergency calls may not be possible on all wireless phone networks or when certain network services and/or phone features are in use. Check with local service providers.

To make an emergency call:

1. If the phone is not on, switch it on.
2. Key in the emergency number for your present location (for example, 911 or other official emergency number). Emergency numbers vary by location.
3. Press the TALK key.

If certain features are in use (call barring, for example), you may first need to deactivate those features before you can make an emergency call. Consult this document and your local cellular service provider.

When making an emergency call, remember to give all the necessary information as accurately as possible. Remember that your phone may be the only means of communication at the scene of an accident; do not cut off the call until given permission to do so.

**Restricting Children’s access to your Phone**

Your phone is not a toy. Children should not be allowed to play with it because they could hurt themselves and others, damage the phone or make calls that increase your phone bill.

**FCC Notice and Cautions**

**FCC Notice**

The phone may cause TV or radio interference if used in close proximity to receiving equipment. The FCC can require you to stop using the phone if such interference cannot be eliminated.

Vehicles using liquefied petroleum gas (such as propane or butane) must comply with the National Fire Protection Standard (NFPA-58). For a copy of this standard, contact the National Fire Protection Association, One Batterymarch Park, Quincy, MA 02269, Attn: Publication Sales Division.

**Cautions**

Any changes or modifications to your phone not expressly approved in this document could void your warranty for this equipment, and void your authority to operate this equipment. Only use approved batteries, antennas and chargers. The use of any unauthorized accessories may be dangerous and void the phone warranty if said accessories cause damage or a defect to the phone.
Although your phone is quite sturdy, it is a complex piece of equipment and can be broken. Avoid dropping, hitting, bending or sitting on it.

**Other Important Safety Information**

- Only qualified personnel should service the phone or install the phone in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty applicable to the device.
- Check regularly that all wireless phone equipment in your vehicle is mounted and operating properly.
- Do not store or carry flammable liquids, gases or explosive materials in the same compartment as the phone, its parts or accessories.
- For vehicles equipped with an air bag, remember that an air bag inflates with great force. Do not place objects, including both installed or portable wireless equipment in the area over the air bag or in the air bag deployment area. If wireless equipment is improperly installed and the air bag inflates, serious injury could result.
- Switch your phone off before boarding an aircraft. The use of wireless phone in aircraft is illegal and may be dangerous to the aircraft's operation.
- Failure to observe these instructions may lead to the suspension or denial of telephone services to the offender, or legal action, or both.

**Product Performance**

**Getting the Most Out of Your Signal Reception**

The quality of each call you make or receive depends on the signal strength in your area. Your phone informs you of the current signal strength by displaying a number of bars next to the signal strength icon. The more bars displayed, the stronger the signal.

If you're inside a building, being near a window may give you better reception.

**Understanding the Power Save Feature**

If your phone is unable to find a signal after searching, a Power Save feature is automatically activated. If your phone is active, it periodically rechecks service availability or you can check it yourself by pressing any key.

Anytime the Power Save feature is activated, a message displays on the screen. When a signal is found, your phone returns to standby mode.

**Understanding How Your Phone Operates**

Your phone is basically a radio transmitter and receiver. When it's turned on, it receives and transmits radio frequency (RF) signals. When you use your phone, the system handling your call controls the power level. This power can range from 0.006 watts to 0.2 watts in digital mode.
Maintaining Your Phone’s Peak Performance

For the best care of your phone, only authorized personnel should service your phone and accessories. Faulty service may void the warranty.

There are several simple guidelines to operating your phone properly and maintaining safe, satisfactory service.

- To ensure that the Hearing Aid Compatibility rating for your phone is maintained, secondary transmitters such as Bluetooth and WLAN components must be disabled during a call. For more information, refer to “Turn Bluetooth On/Off” on page 84.
- If your phone is equipped with an external antenna, hold the phone with the antenna raised, fully-extended and over your shoulder.
- Do not hold, bend or twist the phone’s antenna, if applicable.
- Do not use the phone if the antenna is damaged.
- If your phone is equipped with an internal antenna, obstructing the internal antenna could inhibit call performance.
- Speak directly into the phone’s receiver.
- Avoid exposing your phone and accessories to rain or liquid spills. If your phone does get wet, immediately turn the power off and remove the battery. If it is inoperable, call Customer Care for service.

Availability of Various Features/Ring Tones

Many services and features are network dependent and may require additional subscription and/or usage charges. Not all features are available for purchase or use in all areas. Downloadable Ring Tones may be available at an additional cost. Other conditions and restrictions may apply. See your service provider for additional information.

Battery Standby and Talk Time

Standby and talk times will vary depending on phone usage patterns and conditions. Battery power consumption depends on factors such as network configuration, signal strength, operating temperature, features selected, frequency of calls, and voice, data, and other application usage patterns.

Battery Precautions

- Avoid dropping the cell phone. Dropping it, especially on a hard surface, can potentially cause damage to the phone and battery. If you suspect damage to the phone or battery, take it to a service center for inspection.
- Never use any charger or battery that is damaged in any way.
- Do not modify or remanufacture the battery as this could result in serious safety hazards.
- If you use the phone near the network’s base station, it uses less power; talk and standby time are greatly affected by the signal strength on the cellular network and the parameters set by the network operator.
- Follow battery usage, storage and charging guidelines found in the user’s guide.
Battery charging time depends on the remaining battery charge and the type of battery and charger used. The battery can be charged and discharged hundreds of times, but it will gradually wear out. When the operation time (talk time and standby time) is noticeably shorter than normal, it is time to buy a new battery.

If left unused, a fully charged battery will discharge itself over time.

Use only Samsung-approved batteries and recharge your battery only with Samsung-approved chargers. When a charger is not in use, disconnect it from the power source. Do not leave the battery connected to a charger for more than a week, since overcharging may shorten its life.

Do not use incompatible cell phone batteries and chargers. Some Web sites and second-hand dealers, not associated with reputable manufacturers and carriers, might be selling incompatible or even counterfeit batteries and chargers. Consumers should purchase manufacturer or carrier recommended products and accessories. If unsure about whether a replacement battery or charger is compatible, contact the manufacturer of the battery or charger.

Misuse or use of incompatible phones, batteries, and charging devices could result in damage to the equipment and a possible risk of fire, explosion, leakage, or other serious hazard.

Extreme temperatures will affect the charging capacity of your battery: it may require cooling or warming first.

Do not leave the battery in hot or cold places, such as in a car in summer or winter conditions, as you will reduce the capacity and lifetime of the battery. Always try to keep the battery at room temperature. A phone with a hot or cold battery may temporarily not work, even when the battery is fully charged. Li-ion batteries are particularly affected by temperatures below 0 °C (32 °F).

Do not place the phone in areas that may get very hot, such as on or near a cooking surface, cooking appliance, iron, or radiator.

Do not get your phone or battery wet. Even though they will dry and appear to operate normally, the circuitry could slowly corrode and pose a safety hazard.

Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object (coin, clip or pen) causes a direct connection between the + and - terminals of the battery (metal strips on the battery), for example when you carry a spare battery in a pocket or bag. Short-circuiting the terminals may damage the battery or the object causing the short-circuiting.

Do not permit a battery out of the phone to come in contact with metal objects, such as coins, keys or jewelry.

Do not crush, puncture or put a high degree of pressure on the battery as this can cause an internal short-circuit, resulting in overheating.

Dispose of used batteries in accordance with local regulations. In some areas, the disposal of batteries in household or business trash may be prohibited. For safe disposal options for Li-Ion batteries, contact your nearest Samsung authorized service center. Always recycle. Do not dispose of batteries in a fire.
Care and Maintenance

Your phone is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you fulfill any warranty obligations and allow you to enjoy this product for many years.

- Keep the phone and all its parts and accessories out of the reach of small children.
- Keep the phone dry. Precipitation, humidity and liquids contain minerals that will corrode electronic circuits.
- Do not use the phone with a wet hand. Doing so may cause an electric shock to you or damage to the phone.
- Do not use or store the phone in dusty, dirty areas, as its moving parts may be damaged.
- Do not store the phone in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- Do not store the phone in cold areas. When the phone warms up to its normal operating temperature, moisture can form inside the phone, which may damage the phone’s electronic circuit boards.
- Do not drop, knock or shake the phone. Rough handling can break internal circuit boards.
- Do not use harsh chemicals, cleaning solvents or strong detergents to clean the phone. Wipe it with a soft cloth slightly dampened in a mild soap-and-water solution.

- Do not paint the phone. Paint can clog the device’s moving parts and prevent proper operation.
- Do not put the phone in or on heating devices, such as a microwave oven, a stove or a radiator. The phone may explode when overheated.
- If your phone is equipped with an external antenna, use only the supplied or an approved replacement antenna. Unauthorized antennas or modified accessories may damage the phone and violate regulations governing radio devices.
- If the phone, battery, charger or any accessory is not working properly, take it to your nearest qualified service facility. The personnel there will assist you, and if necessary, arrange for service.
Section 18: Warranty Information

Standard Limited Warranty

What is Covered and For How Long?
SAMSUNG TELECOMMUNICATIONS AMERICA, LLC ("SAMSUNG") warrants to the original purchaser ("Purchaser") that SAMSUNG's Phones and accessories ("Products") are free from defects in material and workmanship under normal use and service for the period commencing upon the date of purchase and continuing for the following specified period of time after that date:

- Phone: 1 Year
- Batteries: 1 Year
- Leather Case: 90 Days
- Holster: 90 Days
- Other Phone Accessories: 1 Year

What is Not Covered? This Limited Warranty is conditioned upon proper use of Product by Purchaser. This Limited Warranty does not cover: (a) defects or damage resulting from accident, misuse, abuse, neglect, unusual physical, electrical or electromechanical stress, or modification of any part of Product, including antenna, or cosmetic damage; (b) equipment that has the serial number removed or made illegible; (c) any plastic surfaces or other externally exposed parts that are scratched or damaged due to normal use; (d) malfunctions resulting from the use of Product in conjunction with accessories, products, or ancillary/peripheral equipment not furnished or approved by SAMSUNG; (e) defects or damage from improper testing, operation, maintenance, installation, or adjustment; (f) installation, maintenance, and service of Product, or (g) Product used or purchased outside the United States or Canada.

This Limited Warranty covers batteries only if battery capacity falls below 80% of rated capacity or the battery leaks, and this Limited Warranty does not cover any battery if (i) the battery has been charged by a battery charger not specified or approved by SAMSUNG for charging the battery, (ii) any of the seals on the battery are broken or show evidence of tampering, or (iii) the battery has been used in equipment other than the SAMSUNG phone for which it is specified.

What are SAMSUNG's Obligations? During the applicable warranty period, SAMSUNG will repair or replace, at SAMSUNG's sole option, without charge to Purchaser, any defective component part of Product. To obtain service under this Limited Warranty, Purchaser must return Product to an authorized phone service
facility in an adequate container for shipping, accompanied by Purchaser’s sales receipt or comparable substitute proof of sale showing the date of purchase, the serial number of Product and the sellers' name and address. To obtain assistance on where to deliver the Product, call Samsung Customer Care at 1-888-987-4357. Upon receipt, SAMSUNG will promptly repair or replace the defective Product. SAMSUNG may, at SAMSUNG’s sole option, use rebuilt, reconditioned, or new parts or components when repairing any Product or replace Product with a rebuilt, reconditioned or new Product. Repaired/replaced leather cases, pouches and holsters will be warranted for a period of ninety (90) days. All other repaired/replaced Product will be warranted for a period equal to the remainder of the original Limited Warranty on the original Product or for 90 days, whichever is longer. All replaced parts, components, boards and equipment shall become the property of SAMSUNG.

If SAMSUNG determines that any Product is not covered by this Limited Warranty, Purchaser must pay all parts, shipping, and labor charges for the repair or return of such Product.

**WHAT ARE THE LIMITS ON SAMSUNG'S WARRANTY/LIABILITY?**

EXCEPT AS SET FORTH IN THE EXPRESS WARRANTY CONTAINED HEREIN, PURCHASER TAKES THE PRODUCT "AS IS," AND SAMSUNG MAKES NO WARRANTY OR REPRESENTATION AND THERE ARE NO CONDITIONS, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT, INCLUDING BUT NOT LIMITED TO:

- THE MERCHANTABILITY OF THE PRODUCT OR ITS FITNESS FOR ANY PARTICULAR PURPOSE OR USE;
- WARRANTIES OF TITLE OR NON-INFRINGEMENT;
- DESIGN, CONDITION, QUALITY, OR PERFORMANCE OF THE PRODUCT;
- THE WORKMANSHIP OF THE PRODUCT OR THE COMPONENTS CONTAINED THEREIN; OR
- COMPLIANCE OF THE PRODUCT WITH THE REQUIREMENTS OF ANY LAW, RULE, SPECIFICATION OR CONTRACT PERTAINING THERETO.

NOTHING CONTAINED IN THE INSTRUCTION MANUAL SHALL BE CONSTRUED TO CREATE AN EXPRESS WARRANTY OF ANY KIND WHATSOEVER WITH RESPECT TO THE PRODUCT. ALL IMPLIED WARRANTIES AND CONDITIONS THAT MAY ARISE BY OPERATION OF LAW, INCLUDING IF APPLICABLE THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE HEREBY LIMITED TO THE SAME DURATION OF TIME AS THE EXPRESS WRITTEN WARRANTY STATED HEREIN. SOME STATES/PROVINCES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU. IN ADDITION, SAMSUNG SHALL NOT BE LIABLE FOR ANY DAMAGES OF ANY KIND RESULTING FROM THE PURCHASE, USE, OR MISUSE OF, OR INABILITY TO USE THE PRODUCT OR ARISING DIRECTLY OR INDIRECTLY FROM THE USE
OR LOSS OF USE OF THE PRODUCT OR FROM THE BREACH OF
THE EXPRESS WARRANTY, INCLUDING INCIDENTAL, SPECIAL,
CONSEQUENTIAL OR SIMILAR DAMAGES, OR LOSS OF
ANTICIPATED PROFITS OR BENEFITS, OR FOR DAMAGES ARISING
FROM ANY TORT (INCLUDING NEGLIGENCE OR GROSS
NEGLIGENCE) OR FAULT COMMITTED BY SAMSUNG, ITS AGENTS
OR EMPLOYEES, OR FOR ANY BREACH OF CONTRACT OR FOR
ANY CLAIM BROUGHT AGAINST PURCHASER BY ANY OTHER
PARTY. SOME STATES/PROVINCES DO NOT ALLOW THE
EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL
DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT
APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL
RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY
FROM STATE TO STATE/PROVINCE TO PROVINCE. THIS LIMITED
WARRANTY SHALL NOT EXTEND TO ANYONE OTHER THAN THE
ORIGINAL PURCHASER OF THIS PRODUCT AND STATES
PURCHASER’S EXCLUSIVE REMEDY. IF ANY PORTION OF THIS
LIMITED WARRANTY IS HELD ILLEGAL OR UNENFORCEABLE BY
REASON OF ANY LAW, SUCH PARTIAL ILLEGALITY OR
UNENFORCEABILITY SHALL NOT AFFECT THE ENFORCEABILITY
FOR THE REMAINDER OF THIS LIMITED WARRANTY WHICH
PURCHASER ACKNOWLEDGES IS AND WILL ALWAYS BE
CONSTRUED TO BE LIMITED BY ITS TERMS OR AS LIMITED AS
THE LAW PERMITS. THE PARTIES UNDERSTAND THAT THE
PURCHASER MAY USE THIRD-PARTY SOFTWARE OR EQUIPMENT
IN CONJUNCTION WITH THE PRODUCT. SAMSUNG MAKES NO
WARRANTIES OR REPRESENTATIONS AND THERE ARE NO
CONDITIONS, EXPRESS OR IMPLIED, STATUTORY OR
OTHERWISE, AS TO THE QUALITY, CAPABILITIES, OPERATIONS,
PERFORMANCE OR SUITABILITY OF ANY THIRD-PARTY SOFTWARE
OR EQUIPMENT, WHETHER SUCH THIRD-PARTY SOFTWARE OR
EQUIPMENT IS INCLUDED WITH THE PRODUCT DISTRIBUTED BY
SAMSUNG OR OTHERWISE, INCLUDING THE ABILITY TO
INTEGRATE ANY SUCH SOFTWARE OR EQUIPMENT WITH THE
PRODUCT. THE QUALITY, CAPABILITIES, OPERATIONS,
PERFORMANCE AND SUITABILITY OF ANY SUCH THIRD-PARTY
SOFTWARE OR EQUIPMENT LIE SOLELY WITH THE PURCHASER
AND THE DIRECT VENDOR, OWNER OR SUPPLIER OF SUCH
THIRD-PARTY SOFTWARE OR EQUIPMENT, AS THE CASE MAY BE.
This Limited Warranty allocates risk of Product failure between
Purchaser and SAMSUNG, and SAMSUNG’s Product pricing
reflects this allocation of risk and the limitations of liability
contained in this Limited Warranty. The agents, employees,
distributors, and dealers of SAMSUNG are not authorized to make
modifications to this Limited Warranty, or make additional
warranties binding on SAMSUNG. Accordingly, additional
statements such as dealer advertising or presentation, whether
oral or written, do not constitute warranties by SAMSUNG and
should not be relied upon.
Precautions for Transfer and Disposal

If data stored on this device is deleted or reformatted using the standard methods, the data only appears to be removed on a superficial level, and it may be possible for someone to retrieve and reuse the data by means of special software.

To avoid unintended information leaks and other problems of this sort, it is recommended that the device be returned to Samsung’s Customer Care Center for an Extended File System (EFS) Clear which will eliminate all user memory and return all settings to default settings. Please contact the Samsung Customer Care Center for details.

Important!: Please provide warranty information (proof of purchase) to Samsung’s Customer Care Center in order to provide this service at no charge. If the warranty has expired on the device, charges may apply.
