Important information

Please read the *Important information* leaflet before you use your mobile phone.

⚠️ Some of the services and features described in this User guide are not supported in all countries/regions or by all networks and/or service providers in all areas. Without limitation, this applies to the GSM International Emergency Number 112. Please contact your network operator or service provider to determine availability of any specific service or feature and whether additional access or usage fees apply.
Android™—what and why?

Your Xperia smartphone from Sony runs on the Android platform. Android phones can perform many of the same functions as a computer and you can customize them to your own needs. For example, you can add and delete applications, or enhance existing applications to improve functionality. At Android Market™ you can download a range of applications and games from a constantly growing collection. You can also integrate applications on your Android™ phone with other applications and with online services that you use. For example, you can back up your phone contacts, access your different email accounts and calendars from one place, keep track of your appointments, and engage in social networking.

Android™ phones are constantly evolving. When a new software version is available and your phone supports this new software, you can update your phone to get new features and the latest improvements.

💡 Your Android™ phone is pre-loaded with Google™ services. To get the most out of the provided Google™ services, you should have a Google™ account and sign in to it when you first start your phone. You also need to have Internet access to use many of the features in Android™.

❗ New software releases may not be compatible with all phones.

Applications

An application is a phone program that helps you perform a task. For example, there are applications to make calls, take photos and download more applications.
Getting started

Assembly

To remove the back cover

- Using your thumbs, press down on the back cover, then slide it upward.

To insert the memory card and the SIM card

- Do not insert an incompatible SIM card in the SIM card slot. Doing so could permanently damage your SIM card or your phone.

- Turn off your phone and remove the back cover, then insert the memory card and the SIM card into the relevant slots.

- The memory card may not be included at purchase in all markets.

To remove the SIM card

1. Turn off your phone.
2. Remove the back cover.
3. Place your fingertip on the SIM card and slide it out of its slot.
To remove the memory card

1. Turn off the phone, or unmount the memory card from **Settings > Storage > Unmount SD card**.
2. Remove the back cover, then draw the memory card outward to remove it.

To attach the back cover

1. Place the back cover over the back of the phone, then fit it into the slots.
2. Slide the cover toward the bottom end of the phone. You hear a sound when the back cover locks into place.

**Turning the phone on and off**

To turn on the phone

⚠️ Make sure the battery is charged for at least 30 minutes before you turn on the phone for the first time.

1. Press and hold down the power key on the left side of the phone until the phone vibrates.
2. If your screen goes dark, briefly press the power key to activate the screen.
3. To unlock the screen, drag to the right across the screen.
4. Enter your SIM card PIN when requested, and select OK.
5. Wait a while for the phone to start.

💡 Your SIM card PIN is initially supplied by your network operator, but you can change it later from the **Settings** menu. To correct a mistake made entering your SIM card PIN, tap .

To turn off the phone

1. Press and hold down the power key until the options menu opens.
2. In the options menu, tap **Power off**.
3. Tap OK.

⚠️ It may take a while for the phone to shut down.
Setup guide

The first time you start your phone, a setup guide opens to explain basic phone functions and helps you enter essential settings. This is a good time to configure the phone to your specific needs. You can also skip some steps and access the setup guide manually at a later stage.

To access the setup guide manually
1. From the Home screen, tap 📱.
2. Find and tap Setup guide.

Screen lock

When your phone is on and left idle for a set period of time, the screen darkens to save battery power, and locks automatically. This lock prevents unwanted actions on the touchscreen when you are not using it. On the lockscreen, you can still view notifications, for example, notifications of missed calls and messages that arrived since the phone was last locked. You can also control the playback of audio tracks without unlocking the screen.

To activate the screen
• Briefly press the power key 🌋.

To view missed calls from the lockscreen
1. To activate the screen, briefly press the power key 🌋.
2. Drag 🔽 to the right across the screen.

To view new text messages from the lockscreen
1. To activate the screen, briefly press the power key 🌋.
2. Drag 🔽 to the right across the screen.

To play an audio track from the lockscreen
1. To activate the screen, briefly press the power key 🌋.
2. To display music player controls, place a finger on the time and date area and flick to the left.
3. Tap 🎵.

To pause an audio track from the lockscreen
1. To activate the screen, briefly press the power key 🌋.
2. When the music player controls appear, tap ◼.

To change the currently playing audio track from the lockscreen
1. To activate the screen, briefly press the power key 🌋.
2. When the music player controls appear, tap 🎵 or 🎵.

To unlock the screen
• Drag 🔽 to the right across the screen.

To lock the screen manually
• When the screen is active, briefly press the power key 🌋.
**Accounts and services**

Sign in to your online service accounts from your phone and benefit from a range of services. Combine services and get even more out of them. For example, collect contacts from your Google™ and Facebook™ accounts and integrate them into your phonebook, so you have everything in one place.

You can sign up to online services from your phone as well as from a computer. When you sign up for the first time, an account is created with your user name, password, settings and personal information. The next time you sign in, you get a personalized view.

**Google™ account**

Having a Google account is key to using a range of applications and services with your Android phone. You need a Google™ account, for example, to use the Gmail™ application in your phone, to chat to friends using Google Talk™, to synchronize your phone calendar with your Google Calendar™, and to download applications and games from Android Market™.

**Microsoft® Exchange ActiveSync® account**

Synchronize your phone with your corporate Microsoft® Exchange ActiveSync® account. This way, you keep your work email, contacts, and calendar events with you at all times.

**Facebook™ account**

Facebook™ connects you with friends, family and colleagues all over the world. Log in now to share your world with others.

**SyncML™ account**

Synchronize your phone with an Internet server using SyncML™. View and manage contacts, calendar events and bookmarks from your phone just as easily as you would from a computer.

Battery
Your phone has an embedded battery.
Charging the battery

Charge your phone for at least 30 minutes before you turn it on for the first time. When you connect the phone charger cable to a power source, such as a USB port or a phone charger, it may take a few minutes before the battery icon appears on the screen. You can still use your phone while it is charging. Charging the phone over a long period of time, for example, overnight, does not damage the battery or the phone.

! The battery will start to discharge a little after it is fully charged and then it charges again after a certain time when the phone charger is connected. This is to extend battery life and may result in the charge status showing a level below 100 percent.

To charge the phone

1. Plug the phone charger into a power outlet.
2. Plug one end of the USB cable into the charger (or into the USB port of a computer).
3. Plug the other end of the cable into the micro USB port on your phone, with the USB symbol facing up. The battery status LED lights up when charging starts. If the battery is completely discharged, it may take a few minutes before the LED lights up after you connect the phone charger cable to a power source.
4. When the battery status LED is green, the phone is fully charged. Disconnect the USB cable from your phone by pulling it straight outwards. Be sure not to bend the connector when removing the cable from the phone.

Battery LED status

<table>
<thead>
<tr>
<th>Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green</td>
<td>The battery is fully charged</td>
</tr>
<tr>
<td>Flashing red</td>
<td>The battery level is low</td>
</tr>
<tr>
<td>Orange</td>
<td>The battery is charging. The battery level is between low and full</td>
</tr>
</tbody>
</table>

To check the battery level

1. From the Home screen, tap .
2. Find and tap Settings > About phone > Status.

Improving battery performance

The following tips can help you improve battery performance:
• Charge your phone often. This will not affect the lifetime of the battery.
• Downloading data from the Internet is power consuming. When you’re not using the Internet, you can save power by disabling all data connections over mobile networks. This setting does not prevent your phone from transmitting data over other wireless networks.
• Turn off GPS, Bluetooth™, and Wi-Fi® when you don’t need these features. You can turn them on and off more easily by adding the Quick settings widget to your Home screen. You do not need to turn off 3G.
• Use the **Power Saver** feature to reduce battery consumption. You can select the power saving mode that best suits the way you use your phone. You can also customize the settings of each power saving mode.
• Set your synchronization applications (used to synchronize your email, calendar, and contacts) to synchronize manually. You can also synchronize automatically, but increase the synchronization intervals.
• Check the battery usage menu in the phone to see which applications use the most power. Your battery consumes more power when you use video and music streaming applications, such as YouTube™. Some Android Market™ applications also consume more power.
• Close and exit applications that you are not using.
• Lower the screen display brightness level.
• Turn off your phone or activate the **Airplane mode** setting if you are in an area with no network coverage. Otherwise, your phone repeatedly scans for available networks, and this consumes power.
• Use a Sony original handsfree device to listen to music. Handsfree devices demand less battery power than the phone’s loudspeakers.
• Keep your phone in standby whenever possible. Standby time refers to the time during which the phone is connected to the network and is not being used.
• Go to **www.sonymobile.com** to get the latest battery performance tips for your phone model.

To access the battery usage menu
1. From the Home screen, tap 📅.
2. Find and tap **Settings > About phone > Battery use** to see which installed applications consume the most battery power.

To add the Data traffic widget to your Home screen
1. From your Home screen, press 📅.
2. Tap **Add > Widgets > Tools**.
3. Flick left to find and select the **Data traffic** widget. You can now turn your data connection on and off more easily.

To add the Quick settings widget to your Home screen
1. From your Home screen, press 📅.
2. Tap **Add > Widgets > Tools**.
3. Select the **Quick settings** widget.

**Reducing battery consumption with Power Saver**

Use pre-set power saving modes to manage power consuming applications and reduce battery consumption. With Power Saver, you can also customize the settings within each power saving mode to the way you use your phone.

To activate a power saving mode
1. From your Home screen, tap 📅.
2. Find and tap **Power Saver**.
3. Tap the icon next to the power saving mode that you want to activate.

To deactivate a power saving mode
1. From your Home screen, tap 📅.
2. Find and tap **Power Saver**.
3. Tap the illuminated icon next to the active power saving mode to turn it off.
To change the settings for a power saving mode
1. From your Home screen, tap 📱.
2. Find and tap Power Saver.
3. To open the settings menu, tap the name of a power saving mode.
4. Mark the features that you want to turn off to save power.
5. Tap Done.

To display power saver notifications
1. From your Home screen, tap 📱.
2. Find and tap Power Saver.
3. Press 📲, then select Settings.
4. Mark the Notifications checkbox.

Using the keys

Using the touchscreen

A protective plastic sheet is attached to the screen of your phone when you buy it. You should peel off this sheet before using the touchscreen. Otherwise, the touchscreen might not function properly.

When your phone is on and left idle for a set period of time, the screen darkens to save battery power, and locks automatically. This lock prevents unwanted actions on the touchscreen when you are not using it. You can also set personal locks to protect your subscription and make sure only you can access your phone content.

Your phone screen is made from glass. Do not touch the screen if the glass is cracked or shattered. Avoid trying to repair a damaged screen yourself. Glass screens are sensitive to drops and mechanical shocks. Cases of negligent care are not covered by the Sony warranty service.

To open or highlight an item
• Tap the item.

To mark or unmark options
• Tap the relevant checkbox or list option.

Marked checkbox
Unmarked checkbox
Zooming
The zoom options available depend on the application you are using.

To zoom
• When available, tap or to zoom in or out.
  You may have to drag the screen (in any direction) to make the zoom icons appear.

To zoom with two fingers
• Place two fingers on the screen at once and pinch them together (to zoom out) or spread them apart (to zoom in).
  Use the zoom function when viewing photos and maps, or when browsing the Web.

Scrolling
Scroll by moving your finger up or down on the screen. On some web pages you can also scroll to the sides.
• Dragging or flicking will not activate anything on the screen.
To scroll

- Drag or flick your finger in the direction you want to scroll on the screen.

💡 To scroll more quickly, flick your finger in the direction you want to go on the screen.

To flick

- To scroll more quickly, flick your finger in the direction you want to go on the screen. You can wait for the scrolling movement to stop by itself, or you can stop it immediately by tapping the screen.

Sensors

Your phone has sensors that detect both light and proximity. The light sensor detects the ambient light level and adjusts the brightness of the screen accordingly. The proximity sensor turns the touchscreen off when your face touches the screen. This prevents you from unintentionally activating phone functions when you are engaged in a call.
Home screen

Your phone’s Home screen is the equivalent of the desktop on a computer. It’s the gateway to your phone’s main features. You can customize your Home screen with widgets, shortcuts, folders, themes, wallpaper, and other items.

The Home screen extends beyond the regular screen display width, so you need to flick left or right to view content in one of the screen’s four extensions. Shows which part of the Home screen you are in.

The items in the bar at the bottom of the screen are always available for quick access.

To go to the Home screen

• Press .

To browse the Home screen

• Flick right or left.

To share an item from your Home screen

1 Press to open your Home screen.
2 Touch and hold an item until it magnifies and the phone vibrates, then drag the item to .
3 Select an option and confirm, if necessary. You can now share the applications and widgets you like with your friends so they can download and use them.

Widgets

Widgets are small applications you can use directly on your Home screen. For example, the Music player widget allows you to start playing music directly.

To add a widget to the Home screen

1 From your Home screen, press .
2 Tap Add > Widgets.
3 Tap a widget.

To get an overview of all widgets on your Home screen

• Pinch on any area of your Home screen. All widgets from different parts of your Home screen are now displayed in one view.

💡 When all Home screen widgets are combined in one view, tap on any widget to go to the part of the Home screen containing that widget.

Rearranging your Home screen

Customize the appearance of your Home screen and change the features you can access from it. Change the screen background, move items around, create folders, and add shortcuts to contacts.
To open the options menu of your Home screen
You can open the Home screen options menu in two ways:

• From your Home screen, press 📞.
• Touch and hold on any part of your Home screen.

To add a shortcut to the Home screen
1 From your Home screen, press 📞.
2 Tap Add > Shortcuts.
3 Find and select a shortcut.

💡 Add an application shortcut directly from the Application screen by touching and holding the application.

To add a folder to the Home screen
1 From your Home screen, press 📞.
2 Tap Add > Folder.
3 Enter a name for the folder and tap Done.

Drag and drop an item on top of another item on your Home screen to create a folder automatically.

To add items to a folder
• Touch and hold an item until it magnifies and the phone vibrates, then drag the item to the folder.

To rename a folder
1 Tap the folder to open it.
2 Touch the folder's title bar to show the Folder name field.
3 Enter the new folder name and tap Done.

To move an item on the Home screen
1 Press 🏡 to open your Home screen.
2 Touch and hold an item until it magnifies and the phone vibrates, then drag the item to the new location.

To delete an item from the Home screen
• Touch and hold an item until it magnifies and the phone vibrates, then drag the item to 📞.

Changing the background of your Home screen
Adapt the Home screen to your own style using wallpapers and different themes.

To change your Home screen wallpaper
1 From your Home screen, press 📞.
2 Tap Wallpaper, then select a wallpaper.

💡 You can use a photo you have taken, or an animation. Go to Android Market™ and other sources to download, for example, live wallpapers that change with the changing hours of the day.

To set a theme
1 From your Home screen, press 📞.
2 Tap Theme, then select a theme.

⚠️ When you change a theme, the background also changes in some applications.

Accessing and using applications
Open applications from shortcuts on your Home screen or from the Application screen.
Application screen

The Application screen, which you open from your Home screen, contains the applications that come installed with your phone as well as the applications you download.

The Application screen extends beyond the regular screen width, so you need to flick left and right to view all content.

To open the Application screen

• From your Home screen, tap 📱.

To browse the Application screen

• Open the Application screen, then flick right or left.

To create a shortcut to an application on the Home screen

1 From your Home screen, tap 📱.
2 Touch and hold an application until it appears on your Home screen, then drag it to the desired location.

To share an application from your Application screen

1 From your Home screen, tap 📱.
2 Touch and hold an application until it appears on your Home screen, then drag the item to 📱.
3 Select an option and confirm, if necessary. You can now share the applications you like with your friends so they can download and use them.

Opening and closing applications

To open an application

• From your Home screen or the Application screen, tap the application.

To close an application

• Press 📱.

💡 Some applications are paused when you press 📱 to exit, while other applications may continue to run in the background. In the first case, the next time you open the application, you can continue where you left off.

Recently used applications window

You can view and access recently used applications from this window.

To open the recently used applications window

• Press and hold down 📱.

Application menu

You can open a menu at any time when you are using an application by pressing the 📱 key on your phone. The menu will look different depending on which application you are using.
To open a menu in an application

• While using the application, press 

! A menu is not available in all applications.

Rearranging your Application screen
Move the applications around on the Application screen according to your preferences.

To arrange applications on the Application screen
1 From your Home screen, tap  to go to the Application screen.
2 Tap  and select an option.

To move an application on the Application screen
1 Open the Application screen, then tap .
2 Touch and hold an item until it magnifies and the phone vibrates, then drag the item to the new location.
3 Tap  to exit edit mode.

! You can only move your applications when  is selected.

To uninstall an application from the Application screen
1 From your Home screen, tap  .
2 Tap . All uninstallable applications are marked with a  icon.
3 Tap the application you want to uninstall, then tap  OK.

Status and notifications
The status bar at the top of your screen shows what’s going on in your phone. To the left you get notifications when there is something new or ongoing. For example, new message and calendar notifications appear here. The right side shows the signal strength, battery status, and other information.

A notification light also gives you battery status information and some notifications. For example, a flashing blue light means there is a new message or a missed call. The notification light may not work when the battery level is low.

Checking notifications and ongoing activities
You can drag down the status bar to open the Notification panel and get more information. For example, you can use the panel to open a new message or view a
calendar event. You can also open some applications that run in the background, such as the music player.

To open the Notification panel

- Drag the status bar downwards.

To close the Notification panel

- Drag the tab at the bottom of the Notification panel upward.

To open a running application from the Notification panel

- From the Notification panel, tap the icon for the running application to open it.

To clear the Notification panel

- From the Notification panel, tap Clear.

**Phone settings menu**

View and change your phone settings from the Settings menu.

To access the phone settings

1. From the Home screen, tap 📱.
2. Tap Settings.
Typing text

On-screen keyboard
Tap the keys of the on-screen QWERTY keyboard to enter text conveniently. Some applications open the on-screen keyboard automatically. You can also open this keyboard by touching a text field.

Using the on-screen keyboard

1. Change the character case and turn on the caps lock. For some languages, this key is used to access extra characters in the language.
2. Close the on-screen keyboard view. Please note that this icon does not show in portrait mode.
3. Display numbers and symbols.
4. Display smileys.
5. Enter a space.
6. Open the input settings menu to make a change, for example, under Writing languages. This key also changes the writing language when more than one input language is selected.
7. Enter a carriage return or confirm text input.
8. Delete a character before the cursor.

⚠ All illustrations are for illustration purposes only and may not accurately depict the actual phone.

To display the on-screen keyboard to enter text
• Tap a text entry field.

To hide the on-screen keyboard
• When the on-screen keyboard is open, press ←.

To use the on-screen keyboard in landscape orientation
• When you enter text, turn the phone sideways.

💡 For the keyboard to support this feature, landscape mode must be supported by the application you are using, and your screen orientation settings must be set to automatic.
To enter text using the on-screen keyboard

- To enter a character visible on the keyboard, tap the character.
- To enter a character variant, touch and hold a regular keyboard character to get a list of available options, then select from the list. For example, to enter "é", touch and hold "e" until other options appear, then, while keeping your finger pressed on the keyboard, drag to and select "é".

To shift between upper-case and lower-case letters

- Before you enter a letter, tap \textcolor{red}{H} to switch to upper-case \textcolor{red}{A}, or vice versa.

To turn on the caps lock

- Before you type a word, tap \textcolor{red}{H} or \textcolor{red}{A} until \textcolor{red}{A} appears.

To enter numbers or symbols

- When you enter text, tap \textcolor{red}{123}. A keyboard with numbers and symbols appears. Tap \textcolor{red}{ABC} to view more options.

To enter common punctuation marks

1. When you finish entering a word, tap the space bar.
2. Select a punctuation mark from the candidate bar. The selected mark is inserted before the space.

- To quickly enter a full stop, tap the space bar twice when you finish entering a word.

To insert a smiley

1. When you enter text, tap \textcolor{red}{😊}.
2. Select a smiley.

To delete characters

- Tap to place the cursor after the character you want to delete, then tap \textcolor{red}{X}.

To enter a carriage return

- When you enter text, tap \textcolor{red}{Enter} to enter a carriage return.

To edit text

1. When you enter text, touch and hold the text field until the Edit text menu appears.
2. Select an option.

Using the Gesture input function to write words

You can input text by sliding your finger from letter to letter on the on-screen keyboard. You can lift your finger between words so that the phone recognizes them.

- Gesture input is only available when you use the on-screen keyboard.

To change the Gesture input settings

1. When you enter text using the on-screen keyboard, tap \textcolor{red}{Menu}. If you have selected more than one writing language, touch and hold the input language key instead. For example, touch and hold \textcolor{red}{Français (France)}.
2. Tap Keyboard settings > Text input settings.
3. Mark or unmark the Gesture input checkbox.
4. If you want to automatically add a space between gestures without having to tap the space bar each time, mark the Space between gestures checkbox.
To enter text using the Gesture input function

1. When you enter text using the on-screen keyboard, slide your finger from letter to letter to spell the word you want to write. Lift up your finger when you’ve finished entering a word.

2. The phone suggests a word based on the letters you have traced. If necessary, select the correct word in the candidate bar. To view more options, scroll right or left in the word candidate bar. If you cannot find the desired word, tap once to delete the entire word. Then you can try again or tap each letter to enter the word.

3. If the **Space between gestures** setting is activated, slide on the keyboard to enter the next word. Otherwise, enter a space and then slide to enter the next word.

*Tip* To enter joined compound words when the **Space between gestures** setting is activated, you may need to slide to enter the first part of the word, then tap each letter to enter the rest of the word.

**Phonepad**

The Phonepad is similar to a standard 12-key telephone keypad. It gives you predictive text and multi-tap input options. You can activate the Phonepad text input method via the keyboard settings. The Phonepad is only available in portrait orientation.

**Using the Phonepad**

![Phonepad diagram]

1. Choose a text input option
2. Change the character case and turn on the caps lock
3. Display numbers
4. Display symbols and smileys
5. Enter a space
6. Open the input settings menu to change, for example, the **Writing languages**. This key also changes the writing language when more than one input language is selected.
7. Enter a carriage return or confirm text input
8. Delete a character before the cursor

*Tip* All illustrations are for illustration purposes only and may not accurately depict the actual phone.

To switch between the on-screen keyboard and the Phonepad

1. When you enter text, tap 📞. If you have selected more than one writing language, touch and hold the input language key instead, for example, 🇺🇸.

2. Tap **Keyboard settings > Keyboard layout**, then select an option.

*Tip* The Phonepad is only available in portrait orientation.
To enter text using the Phonepad

- When 🚂 appears in the Phonepad, tap each character key only once, even if the letter you want is not the first letter on the key. Tap the word that appears or tap 🚂 to view more word suggestions and select a word from the list.
- When 🚂 appears in the Phonepad, tap the on-screen key for the character you want to enter. Keep pressing this key until the desired character is selected. Then do the same for the next character you want to enter, and so on.

To enter numbers using the Phonepad
- When the Phonepad is open, tap 📷. A Phonepad with numbers appears.

To insert symbols and smileys using the Phonepad
1 When the Phonepad is open, tap ⏺. A grid with symbols and smileys appears.
2 Scroll up or down to view more options. Tap a symbol or smiley to select it.

Keyboard and Phonepad settings
You can select settings for the on-screen keyboard and the Phonepad, such as writing language and automatic correction.

To access the on-screen keyboard and Phonepad settings
1 When you enter text using the on-screen keyboard or Phonepad, tap 🚂. If you have selected more than one writing language, touch and hold the input language key instead, for example, 🇪🇸.
2 Tap Keyboard settings.

To add a writing language to the on-screen keyboard or the Phonepad
1 When you enter text using the on-screen keyboard or Phonepad, tap 🚂. If you have selected more than one writing language, touch and hold the input language key instead, for example, 🇪🇸.
2 Tap Writing languages and mark the checkbox for the languages you want to use for writing. When you have finished, press 🎯 to confirm.
3 To switch between languages, tap the input language key, for example, 🇪🇸.

Text input settings
When entering text using the on-screen keyboard or the Phonepad, you can access a text input settings menu that helps you set options for text prediction. For example, you can decide how you want the phone to present word alternatives and correct words as you type, or enable the text input application to remember new words you write.

To change the text input settings
1 When you enter text using the on-screen keyboard or the Phonepad, tap 🚂. If you have selected more than one writing language, touch and hold the input language key instead, for example, 🇪🇸.
2 Tap Keyboard settings > Text input settings.
3 Select the desired settings.

Entering text using voice input
When you enter text, you can use the voice input function instead of typing the words. Just speak the words that you want to enter. Voice input is an experimental technology from Google™, and is available for a number of languages and regions.

⚠️ You must have a data connection on a mobile or Wi-Fi® network to use this service. Additional charges may apply.
To enable voice input
1 When you enter text, tap ✰. If you have selected more than one writing language, touch and hold the input language key instead, for example. ✰
2 Tap Keyboard settings > Voice input fr. keyboard.
3 Mark the Google voice typing key checkbox, read the information carefully, then tap OK to confirm.
4 To set a language for voice input, tap Language, then select the language you want to use.
5 To automatically insert the most likely word suggestion, mark the Use best choice checkbox.
6 Press ✰ to save your settings. A microphone icon ✰ appears on your on-screen keyboard or Phonepad.

To enter text using voice input
1 When you enter text, make sure the voice input function is enabled and you have a working data connection.
2 When ✰ appears on your on-screen keyboard or Phonepad, tap it. When the input language key, for example, ✰ appears, touch and hold it. An arrow appears. Move the arrow until it points to the microphone, then release your finger.
3 When Speak now appears on your screen, speak to enter text.
4 When the Use best choice function is activated, the most likely word suggestion appears underlined. If the word is not correct, tap ✰ once to delete it, then start again. When the Use best choice function is not activated, the search results appear in a list. Select the word you want.

To access Xperia™ keyboard settings when voice input is enabled
• When ✰ appears on your on-screen keyboard or Phonepad, touch and hold it, then select Keyboard settings.
• When the input language key, for example, ✰ appears on your on-screen keyboard or Phonepad, touch and hold it. An arrow appears. Move the arrow until it points to ✰, then release your finger.

Customizing your phone
Adapt the phone to your needs by adjusting, for example, your personal ringtone, phone language and your Privacy settings.

Adjusting the volume
You can adjust the ringtone volume for phone calls and notifications as well as for music and video playback.

To adjust the ring volume with the volume key
• Press the volume key up or down.

To adjust the media playing volume with the volume key
• When playing music or watching video, press the volume key up or down.

To set the phone to silent and vibrate mode
1 From the Home screen, tap ✰.
2 Find and tap Settings > Sound.
3 Mark the Silent mode checkbox.
4 Select Vibrate and choose an option.

To enhance the speaker loudness
1 From the Home screen, tap ✰.
2 Find and tap Settings > Sound.
3 Mark the xLOUD™ checkbox.
Time and date

You can change the time and date in your phone.

To set the date manually
1. From the Home screen, tap Settings.
2. Find and tap Settings > Date & time.
3. Unmark the Automatic checkbox, if it is marked.
4. Tap Set date.
5. Adjust the date by scrolling up and down.
6. Tap Set.

To set the time manually
1. From your Home screen, tap Settings.
2. Find and tap Settings > Date & time.
3. Unmark the Automatic checkbox, if it is marked.
4. Unmark the Use 24-hour format checkbox, if it is marked.
5. Tap Set time.
6. Scroll up or down to adjust the hour and minute.
7. Tap am to change to pm, or vice versa.
8. Tap Set.

To set the time zone
1. From the Home screen, tap Settings.
2. Find and tap Settings > Date & time.
3. Unmark the Automatic checkbox, if it is marked.
4. Tap Select time zone.
5. Select an option.

To set the date format
1. From your Home screen, tap Settings.
2. Find and tap Settings > Date & time > Select date format.
3. Select an option.

Ringtone settings

To set a phone ringtone
1. From your Home screen, tap Settings.
2. Find and tap Settings > Sound > Phone ringtone.
3. Select a ringtone.
4. Tap Done.

To enable touch tones
1. From your Home screen, tap Settings.
2. Find and tap Settings > Sound.
3. Mark the Audible touch tones and Audible selection checkboxes.

To select a notification ringtone
1. From your Home screen, tap Settings.
2. Find and tap Settings > Sound > Notification ringtone.
3. Select a ringtone.
4. Tap Done.

To set a vibrating alert
1. From your Home screen, tap Settings.
2. Find and tap Settings > Sound.
3. Select Vibrate and choose an option.
Screen settings

To adjust the screen brightness
1 From your Home screen, tap.
2 Find and tap **Settings > Display > Brightness**.
3 Drag the slider to adjust the brightness.
4 Tap OK.

*Tip: The brightness level affects your battery performance. For tips on how to improve battery performance, see **Improving battery performance** on page 14.*

To set the screen to vibrate
1 From your Home screen, tap.
2 Find and tap **Settings > Sound**.
3 Mark the **Haptic feedback** checkbox. The screen now vibrates when you tap soft keys and certain applications.

To adjust the idle time before the screen turns off
1 From your Home screen, tap.
2 Find and tap **Settings > Display > Screen timeout**.
3 Select an option.

*Tip: To turn off the screen quickly, briefly press the power key.*

To keep the screen on while charging the phone
1 From the Home screen, tap.
2 Find and tap **Settings > Applications > Development**.
3 Mark the **Stay awake** check box.

Phone language
You can select a language to use in your phone.

To change the phone language
1 From your Home screen, tap.
2 Find and tap **Settings > Language & keyboard > Select language**.
3 Select an option.
4 Tap **Done**.

*Tip: If you choose the wrong language and cannot read the menu texts, find and tap the **Settings** icon. Then select the entry beside , and select the first entry in the following menu. You can then select the language you want.*

Flight mode
In Airplane mode, your phone’s network and radio transceivers are turned off to prevent disturbance to sensitive equipment. However, you can still play games, listen to music, watch videos and other content, as long as all this content is saved on your memory card or internal storage. You can also be notified by alarms, if alarms are activated.

*Tip: Turning on Airplane mode reduces battery consumption.*

To turn on Flight mode
1 From your Home screen, tap.
2 Find and tap **Settings > Wireless & networks**.
3 Mark the **Airplane mode** checkbox.

*Tip: You can also select Airplane mode from the **Phone options** menu. To access the **Phone options** menu, press and hold the power key.*
Memory
You can save content to a memory card, to your phone’s internal storage, and to the phone memory. Music, video clips, and photos are saved to the internal storage or the memory card while applications, contacts, and messages are saved to the phone memory.

⚠️ You can move some applications from the phone memory to the internal storage.

To move an application to the phone’s internal storage
1. From your Home screen, tap.
2. Find and tap Settings > Applications > Manage applications.
3. Select the application you want to move to the internal storage.
4. Tap Move to internal storage.

⚠️ It is not possible to move some applications from the phone memory to the internal storage.

Memory card
⚠️ You may have to purchase a memory card separately.

Your phone supports a microSD™ memory card, which is used for media content. This type of card can also be used as a portable memory card with other compatible devices.

Safely removing the memory card
You can safely remove the memory card from your phone any time when the phone is turned off. If you want to remove the memory card when your phone is on, you must first unmount the memory card before you physically remove it from the phone. This can prevent damaging the memory card or losing data stored on the memory card.

To unmount the memory card
1. From your Home screen, tap.
2. Find and tap Settings > Storage > Unmount SD card.

Formatting the memory card
You can format the memory card in your phone, for example, to free up memory. This means that you erase all data on the card.

⚠️ All content on the memory card gets erased when you format it. Make sure you make backups of everything you want to save before formatting the memory card. To back up your content, you can copy it to your computer. For more information, refer to the chapter Connecting your phone to a computer on page 121.

To format the memory card
1. From your Home screen, tap.
2. Find and tap Settings > Storage > Unmount SD card.
3. After you have unmounted the memory card, tap Erase SD card.
Using a headset with your phone

Use the accessories provided with your phone, or other compatible accessories, for optimal performance.

To use a headset

1. Connect the headset to your phone.
2. To answer a call, press the call handling key.
3. To end the call, press the call handling key.

† If a headset is not included with the phone, you may purchase one separately.

† If you are listening to music, the music stops when you receive a call and resumes when the call ends.

Internet and messaging settings

To send text and multimedia messages or to access the Internet, you must have a 2G or 3G mobile data connection with the correct settings. There are different ways to adjust these settings:

• For most mobile phone networks and operators, Internet and messaging settings come preinstalled on your phone. You can then start sending messages or using the Internet right away.
• In some cases you will have the option to adjust Internet and messaging settings the first time you turn on your phone. It is also possible to adjust these settings later from the Settings menu.
• You can manually adjust or change Internet and network settings in your phone at any time. Contact your network operator for detailed information about Internet and messaging settings.

To download Internet and messaging settings

1. From your Home screen, tap .
2. Find and tap Settings > Xperia™ > Internet settings.

To view the current Access Point Name (APN)

1. From the Home screen, tap .
3. Tap Access Point Names.

† If you have several available connections, the active network connection will be indicated by a marked button to the right.
To configure APN settings manually

1. From the Home screen, tap 📱.
3. Press 📱.
4. Tap New APN.
5. Tap Name and enter the name of the network profile you want to create.
6. Tap APN and enter the access point name.
7. Enter all other information required by your service provider.
8. Press 📱 and tap Save 📱.

! Contact your service provider for detailed information about your network settings.

To reset the default Internet settings

1. From the Home screen, tap 📱.
3. Press 📱.
4. Tap Reset to default.

Usage info

For quality purposes, Sony collects anonymous bug reports and statistics regarding your phone usage. None of the information gathered includes personal data. By default, the usage info sending option is not activated. But you can choose to activate it if you like.

To send usage info

1. From your Home screen, tap 📱.
2. Find and tap Settings > Xperia™ > Usage info settings.
3. Mark the Send usage info checkbox.

Using Data monitor

Use the Data monitor to keep track of the amount of data your phone sends and receives. This application tracks the approximate data traffic over 2G/3G networks from a predefined start day. The values are reset monthly. For example, if the start day is set to 15, the data traffic counter is reset on the 15th day of every month. The first time you start the Data monitor, the start day is set to 1.

Get the Data monitor to alert you when the amount of transferred data reaches a certain limit. You can set limits separately for sent data, received data and total data. You can also activate the Data monitor as a widget on the Home screen.

! Data amounts indicated are approximate. Please consult your service provider to verify actual data usage.

! Data sent or received over Wi-Fi® or Bluetooth™ connections is not tracked.

To set the Data monitor start day

1. From your Home screen, tap 📱.
2. Find and tap Data monitor.
3. Tap Settings > Month period.
4. Adjust the start day by scrolling up and down.
5. When finished, tap OK.

To set a Data monitor alert

1. From your Home screen, tap 📱.
2. Find and tap Data monitor.
3. Tap the bell icon next to Sent data, Received data or Total data, depending on which alert you want to set.
4. Adjust the values by scrolling up and down.
5. When finished, tap OK.
To clear a Data monitor alert
1. From your Home screen, tap 📱.
2. Find and tap Data monitor.
3. Tap the bell icon next to Sent data, Received data or Total data, depending on the alert you want to remove.
4. Tap Reset. The alert limit is reset to zero and the alert is deactivated.

Turning off data traffic
You can disable all data connections in 2G or 3G networks with your phone to avoid any unwanted data downloads and synchronisations. Contact your network operator if you need detailed information about your subscription plan and data traffic costs.

💡 You can still use Wi-Fi® and Bluetooth™ connections when the data traffic is turned off. You can also send and receive multimedia messages.

To turn off all data traffic
1. From your Home screen, tap 📱.
3. Unmark the Data enabled checkbox.

Data roaming
Depending on your service provider, it might be possible to allow mobile data connections via 2G/3G outside of your home network (roaming). Please note that data transmission charges may apply. Contact your network operator for more information.

⚠ Applications may sometimes use the Internet connection in your home network without any notification, for example, when sending search and synchronization requests. Additional charges may apply for data roaming. Consult your service provider.

To activate data roaming
1. From the Home screen, tap 📱.
3. Mark the Data roaming checkbox.

⚠ You can’t activate data roaming when data connections have been deactivated

Network settings
Your phone automatically switches between networks depending on available networks over different locations. Initially, your phone is configured to use the fastest mobile network mode available for data. But you can configure your phone manually to only use a slower 2G network mode for data, to extend the life of your battery between charges. You can also configure your phone to access a different set of network modes entirely, or to behave in particular ways when roaming.

To select a network mode
1. From your Home screen, tap 📱.
3. Tap Network Mode.
4. Select a network mode.
To select another network manually

1. From the Home screen, tap 📢.
3. Tap Search mode.
5. Select a network.

⚠️ If you select a network manually, your phone will not search for other networks, even if you move out of range of the manually selected network.

To activate automatic network selection

1. From the Home screen, tap 📢.
3. Tap Search mode.
4. Tap Automatic.
Calling

Emergency calls
Your phone supports international emergency numbers, for example, 112 or 911. You can normally use these numbers to make emergency calls in any country, with or without the SIM card inserted, if you are within range of a network.

To make an emergency call
1 From your Home screen, tap 📞.
2 Find and tap Phone.
3 Enter the emergency number and tap Call. To delete a number, tap 🗑.

💡 You can make emergency calls when no SIM card is inserted or when outgoing calls are barred.

To make an emergency call while the SIM card is locked
1 Tap Emergency call.
2 Enter the emergency number and tap Call. To delete a number, tap 🗑.

Call handling
You can make a call by manually dialing a phone number, by tapping a number saved in your phone’s contact list, or by tapping the phone number in your call log view.

When you make a call, your phone’s main microphone works together with the second microphone to suppress noise and background sound.

⚠️ Do not cover the second microphone while making a call.

To make a call by dialing
1 From your Home screen, tap 📞.
2 Find and tap Phone.
3 Enter the number of the recipient and tap Call. To delete a number, tap 🗑.

To end a call
• Tap End call.

To make an international call
1 From your Home screen, tap 📞.
2 Find and tap Phone.
3 Touch and hold 0 until a “+” sign appears.
4 Enter the country code, area code (without the first 0), and phone number, then tap Call.

To answer a call

• Drag 📞 to the right across the screen.

⚠️ If you are using regular headphones without a microphone, you have to remove the headphones from the headset connector to be able to answer the call.

To decline a call
• Drag 🗑 to the left across the screen.
To change the ear speaker volume during a call
• Press the volume key up or down.

To turn on the loudspeaker during a call
• Tap 📡.

To mute the microphone during a call
• Tap 🎤.

To activate the screen during a call
• Press 🏛.

To enter numbers during a call
1 During a call, tap 📲. A keypad appears.
2 Enter numbers.

To mute the ringtone for an incoming call
• When you receive the call, press the volume key.

Recent calls
In the call log, you can view recently missed 📞, received 📞 and dialed 📞 calls.

To view your missed calls
1 When you have missed a call, 📞 appears in the status bar. Drag the status bar downwards.
2 Tap Missed call.

To call a number from your call log
1 From your Home screen, tap 📲.
2 Find and tap Phone. The call log view appears on the upper part of the screen.
3 To call a number directly, tap the number. To edit a number before calling, touch and hold the number, then tap Edit number before call.

! You can also call a number by tapping 📲 > Call back.

To add a number from the call log to your contacts
1 From your Home screen, tap 📲.
2 Find and tap Phone. The call log view appears on the upper part of the screen.
3 Touch and hold the number, then tap Add to contacts.
4 Tap the desired contact, or tap Create new contact.
5 Edit the contact details and tap Done.

Voicemail
If your subscription includes a voicemail service, callers can leave voice messages for you when you can’t answer calls. Your voicemail service number is normally saved on your SIM card. If not, you can get the number from your service provider and enter it manually.

To enter your voicemail number
1 From the Home screen, tap 📲.
2 Find and tap Settings > Call settings > Voicemail settings > Voicemail number.
3 Enter your voicemail number.
4 Tap OK.
To call your voicemail service
1. From your Home screen, tap 📞.
2. Find and tap Phone.
3. Touch and hold 1.

**Multiple calls**
If you have activated call waiting, you can handle multiple calls at the same time. When it is activated, you will be notified by a beep if you receive another call.

**To activate or deactivate call waiting**
1. From the Home screen, tap 📞.
2. Find and tap Settings > Call settings > Additional settings.
3. To activate or deactivate call waiting, tap Call waiting.

**To reject a second call**
- When you hear repeated beeps during a call, tap Busy.

**To answer a second call and end the ongoing call**
- When you hear repeated beeps during a call, tap End current call and answer.

**To answer a second call and put the ongoing call on hold**
- When you hear repeated beeps during a call, tap Answer.

**To make a second call**
1. During an ongoing call, tap 📞.
2. Enter the number of the recipient and tap ☑.
3. If the recipient answers, the first call is put on hold.

💡 The same procedure applies to subsequent calls.

**To switch between multiple calls**
- To switch to another call and put the current call on hold, tap the desired number or contact.

**To end the ongoing call and return to the next call on hold**
- Tap ☎️.

**Conference calls**
With a conference or multiparty call, you can have a joint conversation with two or more people.

**To make a conference call**
1. During an ongoing call, tap 📞.
2. Dial the number of your second participant and tap ☑.
3. If the second participant answers, the first call is put on hold.
4. Tap ☎️.

💡 To add more participants, repeat steps 1 to 4.

**To have a private conversation with a conference call participant**
1. During an ongoing conference call, tap the button showing the number of participants. For example, tap 3 participants if there are three participants on the call.
2. Tap the name of the participant you want to talk to privately.
3. To end the private conversation and return to the conference call, tap ☎️.
To release a participant from a conference call
1 During an ongoing conference call, tap the button showing the number of participants. For example, tap 3 participants if there are three participants.
2 Tap ✪ next to the participant you want to release.

To end a conference call
• During the conference call, tap End conference call.

Call settings

Barring calls
You can bar all or certain categories of incoming and outgoing calls. When you use call barring for the first time, you need to enter your PUK (Personal Unblocking Key) and then a new password to activate the call barring function.

To bar incoming or outgoing calls
1 From your Home screen, tap ☎️.
2 Find and tap Settings > Call settings > Call blocking.
3 Select an option.
4 Enter the password and tap Enable.

Forwarding calls
You can forward calls, for example, to another phone number, or to an answering service.

To forward calls
1 From your Home screen, tap ☎️.
2 Find and tap Settings > Call settings > Call forwarding.
3 Select an option.
4 Enter the number you want to forward the calls to, then tap Enable.

To turn off call forwarding
1 From your Home screen, tap ☎️.
2 Find and tap Settings > Call settings > Call forwarding.
3 Select an option, then tap Disable.

Showing or hiding your phone number
You can select to show or hide your phone number on call recipients’ devices when you call them.

To show or hide your phone number
1 From your Home screen, tap ☎️.
2 Find and tap Settings > Call settings > Additional settings > Caller ID.

Fixed Dialing Numbers
If you have received a PIN2 code from your service provider, you can use a list of Fixed Dialing Numbers (FDN) to restrict outgoing calls.

To enable or disable fixed dialing
1 From your Home screen, tap ☎️.
2 Find and tap Settings > Call settings > Fixed Dialing Numbers.
3 Tap Activate fixed dialing or Deactivate fixed dialing.
4 Enter your PIN2 and tap OK.
To access the list of accepted call recipients

1. From your Home screen, tap 📞. 
2. Find and tap Settings > Call settings > Fixed Dialing Numbers > Fixed Dialing Numbers.
Contacts

Use the Contacts application to store and manage all your numbers, email addresses, and other contact data in one place. Just tap on a contact to see all communications with that contact in one easy overview.

You can add new contacts in your phone and synchronize them with contacts saved in your Google™ account, Microsoft® Exchange ActiveSync® account, or other accounts that support synchronization. The Contacts application automatically creates new entries and also helps you match data such as email addresses with existing entries. You can also manage this process manually. For more information, go to www.sonymobile.com/support.

Transferring contacts to your new phone

There are several ways to transfer contacts to your new phone. Select a transfer method that best suits your situation.

Transferring contacts using a PC

You can use a PC to transfer contacts from several phone brands, including iPhone, Samsung, HTC and Nokia.

You need:

- An Internet-connected PC running Windows®
- A USB cable for your old phone
- A USB cable for your new Android™ phone
- Your old phone
- Your new Android™ phone

If you don’t have access to all of the items listed above, go to www.sonymobile.com/support/contacts to find out about other ways to transfer your contacts.

Using the PC Companion program to transfer contacts

If you are transferring contacts using a PC, use the PC Companion program. It’s free, and the installation files are already saved on your new phone. PC Companion also offers a range of other features, including help with updating your phone software.

To install PC Companion

1 New phone: Turn on your new Android™ phone and connect it to a PC using a USB cable.
2 New phone: Tap Install to install PC Companion on the PC.
3 Computer: If a popup window appears, select Run Startme.exe. In the new popup window that appears, click Install to start the installation and then follow the instructions to complete the installation.

To transfer contacts to your new phone using PC Companion

1 Make sure that PC Companion is installed on your PC.
2 Open the PC Companion program on the PC, then click Contacts Setup and follow the instructions to transfer your contacts.
Transferring contacts using an Apple® Mac® computer

For detailed instructions on how to use an Apple Mac computer to transfer contacts from your old phone, go to www.sonymobile.com/support/contacts.

Transferring contacts using synchronization accounts

Your phone works with popular online synchronization accounts such as Google Sync™, Microsoft® Exchange ActiveSync® or Facebook™. If you have synced the contacts in your old phone or your computer with an online account, you can transfer your contacts to your new phone using that account. For more detailed information about synchronization, see Synchronizing data on your phone on page 71.

To synchronize your phone contacts with a synchronization account

1. From your Home screen, tap , then tap .
2. Press , then tap Settings > Accounts & sync.
3. To set up a synchronization account, tap Add account and follow the on-screen instructions. If you have already set up a synchronization account and you want to sync with that account, tap the account, press , and tap Sync now.

To import contacts from a SIM card

1. From your Home screen, tap , then tap .
2. Press , then tap Import contacts > SIM card.
3. If you have set up a synchronization account, you can choose to add the SIM card contacts under that account. Or you can choose to only use these contacts in the phone. Select your desired option.
4. To import an individual contact, find and tap the contact. To import all contacts, press , then tap Import all.

To import contacts from a memory card

1. From your Home screen, tap , then tap .
2. Press , then tap Import contacts > SD card.
3. If you have set up a synchronization account, you can add the imported memory card contacts under that account. Or you can choose to only use the imported contacts in the phone. Select your desired option.
4. If you have more than one vCard file on the SD card, a list appears showing different batches of phone contacts, with the corresponding dates for when they were created. Select the batch you want to import.

To receive contact data sent using Bluetooth™ technology

1. Make sure you have the Bluetooth™ function turned on and your phone set to visible. If not, then you cannot receive data from other devices.
2. When you are asked to confirm whether you want to receive the file, tap Accept.
3. Drag down the Notification panel and tap the file you received to import the contact data.

To receive contacts sent using a messaging service

1. When you receive a new text message, multimedia message, or email message, open the message.
2. The received contact data appears as a vCard attachment. Tap, or touch and hold the vCard file to open a menu so you can save the contact data.
Contacts screen overview

1 Tap here to create a contact
2 Contact search field
3 Touch a contact to view its details
4 Alphabetical index for browsing contacts
5 Tap a contact thumbnail to access the Quick Contact menu
6 Shortcut tabs

Managing your contacts

You can create, edit and synchronize your contacts in a few simple steps. You can select contacts saved in different accounts and manage how you display them in the phone.

If you synchronize your contacts with more than one account, you can join contacts in your phone to avoid duplicates.

Some synchronization services, for example, some social networking services, do not allow you to edit contact details.

To view your contacts

* From your Home screen, tap , then tap . Your contacts are listed here.

To select which contacts to display in the Contacts application

1 From your Home screen, tap , then tap .
2 Press , then tap Filter.
3 In the list that appears, mark and unmark the desired options. If you have synchronized your contacts with a synchronization account, that account appears in the list. To further expand the list of options, tap the account.
4 When you are finished, tap OK.

To add a contact

1 From your Home screen, tap , then tap .
2 Tap .
3 If you have synchronized your contacts with one or more accounts, select the account to which you want to add this contact, or tap Phone contact if you only want to use this contact in your phone.
4 Enter or select the desired information for the contact.
5 When you are finished, tap Done.

If you add a plus sign and the country code before a contact phone number, you can use the number when you make calls from other countries.
To edit a contact
1. From the Home screen, tap , then tap .
2. Touch and hold the contact you want to edit, then tap Edit contact.
3. Edit the desired information. When you are finished, tap Done.

To associate a picture with a contact
1. From your Home screen, tap , then tap .
2. Touch and hold the contact you want to edit, then tap Edit contact.
3. Tap and select the desired method for adding the contact picture.
4. When you have added the picture, tap Done.

You can also add a picture to a contact directly from the Gallery application.

To view your communication with a contact
1. From the Home screen, tap , then tap .
2. Tap the contact you want to view.
3. To view your communication with the contact for different media, tap or flick through the filter items at the bottom of the screen.

To delete contacts
1. From your Home screen, tap , then tap .
2. Press , then tap Delete contacts.
3. Mark the contacts you want to delete, or tap Mark all if you want to delete all contacts.
4. Tap Delete > OK.

To edit contact information about yourself
1. From your Home screen, tap , then tap .
2. Touch and hold Myself at the top of the contact list, then tap Edit contact.
3. Enter the new information or make the changes you want.
4. When you are done, tap Done.

Avoiding duplicate entries in the Contacts application
If you synchronize your contacts with a new account or import contact information in other ways, you could end up with duplicate entries in the Contacts application. If this happens, you can join such duplicates to create a single entry. And if you join entries by mistake, you can separate them again later.

To link contacts
1. From your Home screen, tap , then tap .
2. Touch and hold the contact you want to link with another contact, then tap Link contact.
3. From the list that appears, tap the contact whose information you want to join with the first contact, then tap OK to confirm. The information from the first contact is merged with the second contact, and the first contact is no longer displayed in the Contacts list.

To separate linked contacts
1. From your Home screen, tap , then tap .
2. Touch and hold the linked contact you want to edit, then tap Edit contact.
3. Tap Unlink contact.
4. Tap OK.

Favorites
You can mark a contact as a favorite. The Favorites tab gives you quick access to your marked contacts. In Favorites, you can also find a list of the contacts you communicate with most frequently.
To mark or unmark a contact as a favorite
1 From the Home screen, tap Contacts, then tap .
2 Tap the contact you want to add to or remove from your favorites.
3 Tap

Communicating with your contacts

To search for a contact
1 From your Home screen, tap Contacts, then tap .
2 Enter the first few letters of the contact name in the Search field. All contacts beginning with those letters appear.

The quick contact menu
Tap a contact’s thumbnail to view quick communication options for a particular contact. Options include calling the contact, sending a text or multimedia message, and starting a chat using the Google Talk™ application.

! For an application to appear as an option in the quick contact menu, you may need to set up the application in your phone and be logged in to the application. For example, you need to start the Gmail™ application and enter your login details before you can use Gmail™ from the quick contact menu.

Sharing your contacts

To send your business card
1 From your Home screen, tap Contacts, then tap .
2 Tap Myself.
3 Press , then tap Send contact > OK.
4 Select an available transfer method and follow the on-screen instructions.

To send a contact
1 From your Home screen, tap Contacts, then tap .
2 Tap the contact whose details you want to send.
3 Press , then tap Send contact > OK.
4 Select an available transfer method and follow the on-screen instructions.

To send several contacts at once
1 From your Home screen, tap Contacts, then tap .
2 Press , then tap Send contacts.
3 Mark the contacts you want to send, or select all if you want to send all contacts.
4 Tap Send, then tap OK to confirm.
5 Select an available transfer method and follow the on-screen instructions.

Backing up contacts
You can use a memory card, a SIM card, or an online synchronization tool such as Microsoft® Exchange ActiveSync® to back up contacts.

To export all contacts to a memory card
1 From your Home screen, tap Contacts, then tap .
2 Press , then tap Back up contacts > SD card.
3 Tap OK.
To export contacts to a SIM card

1. From your Home screen, tap ☰, then tap ☰.
2. Press ☰, then tap Back up contacts > SIM card.
3. Mark the contacts you want to export, or tap Mark all if you want to export all your contacts.
4. Tap Back up.
5. Select Add contacts if you want to add the contacts to existing contacts on your SIM card, or select Replace all contacts if you want to replace the existing contacts on your SIM card.

⚠️ When you export contacts to a SIM card, not all information may get exported. This is due to memory limitations on SIM cards.
Messaging

Using text and multimedia messaging

You can send and receive text messages from your phone using SMS (Short Message Service). If your subscription includes MMS (Multimedia Messaging Service), you can also send and receive messages that contain media files, for example, pictures and videos. A single text message may contain up to 160 characters. If you exceed 160 characters, then all your single messages are linked and sent together. You are charged for each 160-character message sent. When you view your messages, they appear as conversations, which means that all messages to and from a particular person are grouped together.

⚠ To send multimedia messages, you need the correct MMS settings in your phone. See Internet and messaging settings on page 32.

To create and send a message
1 From your Home screen, tap ☏, then find and tap 📩.
2 Tap ✉.
3 To add a recipient, tap ⚫, then find and mark the checkbox next to the recipient name. To add more than one recipient, mark the checkboxes for the desired recipients. You can also enter the full number in the search field manually, then tap Add.
4 When you are finished adding recipients, tap Done.
5 Tap Write message and enter your message text.
6 If you want to add a media file, tap 📌 and select an option.
7 To send the message, tap Send.

✍ If you exit a message before sending, it gets saved as a draft. The conversation gets tagged with the word Draft:

To read a received message
1 From your Home screen, tap ☏, then find and tap 📩.
2 Tap the desired conversation.
3 If the message is not yet downloaded, tap and hold the message, then tap Download message.

✍ You can also open messages from the status bar when 📞 appears there. Just drag down the bar and tap the message.

To reply to a message
1 From your Home screen, tap ☏, then find and tap 📩.
2 Tap the conversation containing the message.
3 Enter your reply and tap Send.

To forward a message
1 From your Home screen, tap ☏, then find and tap 📩.
2 Tap the conversation containing the message you want to forward.
3 Touch and hold the message you want to forward, then tap Forward message.
4 Select a recipient from the list, or tap 📌 to add a recipient who is not in the list.
5 Edit the message and tap Send.

To delete a message
1 From your Home screen, tap ☏, then find and tap 📩.
2 Tap the conversation containing the message you want to delete.
3 Touch and hold the message you want to delete, then tap Delete message > Yes.
To delete conversations
1. From your Home screen, tap , then find and tap .
2. Press , then tap Delete several.
3. Mark the checkboxes for the conversations you want to delete, then tap Delete.

To save a message sender’s number
1. From your Home screen, tap , then find and tap .
2. Tap a conversation.
3. Press , then tap Add to Contacts.
4. If you want to add the number to an existing contact, select the relevant contact. Or tap if you want to create a new contact.
5. Select the account you want to save the contact to.
6. Edit the contact information and tap Done.

To call a message sender
1. From your Home screen, tap , then find and tap .
2. Tap a conversation.
3. Tap the recipient name or number at the top of the screen, then select the recipient name or number from the list that appears.
4. If the recipient is saved in your contacts, tap the phone number that you want to call. If you have not saved the recipient in your contacts, tap .
5. Tap if you want to create a new contact.
6. Select the account you want to save the contact to.
7. Edit the contact information and tap Done.

To save a file contained in a message you receive
1. From your Home screen, tap , then find and tap .
2. Tap the conversation you want to open.
3. If the message has not been downloaded yet, tap and hold the message, then tap Download message.
4. Touch and hold the file you want to save, then select the desired option.

To star a message
1. From your Home screen, tap , then find and tap .
2. Tap the conversation you want to open.
3. In the message you want to star, tap .
4. To unstar a message, tap .

To view starred messages
1. From your Home screen, tap , then find and tap .
2. Press , then tap Starred messages.
3. All starred messages appear in a list.

To search for messages
1. From your Home screen, tap , then find and tap .
2. Press , then tap Search.
3. Tap Search Messaging.
4. Enter your search keywords, then tap .

Text and multimedia message options

To change your message notification settings
1. From your Home screen, tap , then find and tap .
2. Press , then tap Settings.
3. To set a notification sound, tap Notification tone and select an option.
4. For other notification settings, check or uncheck the relevant checkboxes.
To change the delivery report settings for outgoing messages
1. From your Home screen, tap ☏, then find and tap ☏.
2. Press ☏, then tap Settings.
3. Tap Delivery report to activate or deactivate delivery reports.

When a message has been delivered to a recipient, ✔ appears in the message.

To view messages saved on the SIM card
1. From your Home screen, tap ☏, then find and tap ☏.
2. Press ☏, then tap Settings > SIM messages.
Email

Use the Email application in your phone to send and receive emails through your regular email account or through your corporate account. Or you can do both. Your phone can handle several email accounts at the same time. You can set up these accounts to run through one combined inbox, or through separate inboxes. Note that emails you receive to your Gmail™ account can be accessed in the phone from both the Email and the Gmail™ applications.

Your corporate Microsoft® Outlook® email messages have to be stored on a Microsoft® Exchange server for the functionality described above to work. See Synchronizing your corporate email, calendar and contacts on page 71 for more information.

To set up an email account in your phone

1. From your Home screen, tap Email.
2. Find and tap Email.
3. Enter your email address and password, then tap Next.
4. If the settings for the email account cannot be downloaded automatically, complete the setup manually. If necessary, contact your email service provider for detailed settings. For corporate email setup on your phone, select Exchange Active Sync as the account type.
5. When you are prompted, enter a name for your email account, so that it is easily identifiable. The same name shows in the emails you send from this account.

When you are finished, tap Done.

You can set up more than one email account. See To add an extra e-mail account in your phone on page 53.

Using e-mail

To create and send an email message

1. From your Home screen, tap Email, then find and tap Email.
2. If you are using several email accounts, tap the account you want to send the message from, then tap .
3. Tap To and start typing the recipient’s address. Matches are displayed in a dynamic list. Tap the relevant match or continue typing the complete email address. To add more recipients, enter a comma ( , ) or a semi colon ( ; ) and start typing another name. To delete a recipient, tap the key.
4. To select an email address saved in your contacts, tap , then find and mark the checkbox next to a recipient field. To add more than one recipient, mark the checkboxes for the desired recipients. When you are finished, tap Done.
5. Tap Subject and enter the email subject.
6. To attach a file, tap . Select the type of file, then tap the file you want to attach from the list that appears.
7. In the message area, enter your message text.
8. To set a priority level, press , then tap Set priority and select an option.
9. To add Cc/Bcc fields, press , then tap Add Cc/Bcc.
10. To send the email, tap .

To receive email messages

1. From your Home screen, tap Email.
2. Tap Email.
3. If you are using several email accounts, tap the account that you want to check. If you want to check all your email accounts at once, tap Combined Inbox.
4. To download new messages, press , then tap Refresh.

If you have set up a corporate email account, you can set the checking frequency to Automatic (Push).
To read your email messages
1. From your Home screen, tap  
2. Find and tap Email.
3. If you are using several email accounts, tap the account you want to check. If you want to check all your email accounts at once, tap Combined Inbox.
4. In the email inbox, scroll up or down and tap the email you want to read.

To use the email preview pane
1. From your Home screen, tap  
2. Find and tap Email.
3. If you are using several email accounts, tap the account you want to check. If you want to check all your email accounts at once, tap Combined Inbox.
4. Hold your phone horizontally. The email preview pane appears.
5. Scroll up or down in the email inbox and tap the email you want to read. The email opens in the preview pane. To view more information about the email, tap the downward arrow next to the sender's name. In the body text field, pinch two fingers together, or spread them apart, to zoom in or out.
6. To return to the inbox view, drag the split bar accordingly.

* To hide the preview pane, hold your phone vertically, or change the preview pane settings.

To change email preview pane settings
1. From your Home screen, tap  
2. If you are using several email accounts, tap the account you want to check.
3. Press , then tap More > Preview pane and select an option.

* To change email preview pane settings when you're using the combined inbox, press , then tap Preview pane, and select an option.

To view an email message attachment
1. From your Home screen, tap  
2. Find and tap Email.
3. Find and tap the desired message in your email inbox. Emails with attachments are identified by 📂.
4. Tap the downward arrow beside the sender's name, tap an attachment, and select Open or Save.

To save a sender's email address to your contacts
1. From your Home screen, tap  
2. Find and tap Email.
3. Find and tap the desired message in your email inbox.
4. Tap the name of the sender at the top of the screen.
5. Tap OK when you are prompted to add the name to your contacts.
6. Select an existing contact, or tap Create new contact if you want to create a new contact.
7. Edit the contact information and tap Done.

To reply to an e-mail message
1. From your Home screen, tap  
2. Tap Email.
3. In your email inbox, touch and hold the message you want to reply to.
4. Tap Reply or Reply all.
5. Enter your reply, then tap ✉️.
To forward an e-mail message
1. From your Home screen, tap Email.
2. Tap Email.
3. In your email inbox, touch and hold the message you want to forward.
4. Tap Forward.
5. Tap To and enter the recipient’s address. Or tap 📞 to select a recipient from your contacts.
6. Enter your message text, then tap 📧.

To delete an email message
1. From your Home screen, tap Email.
2. Tap Email.
3. In your email inbox, touch and hold the message you want to delete, then tap Delete.

To sort your emails
1. From your Home screen, tap Email.
2. Tap Email.
3. If you are using several email accounts, tap the account that you want to check. If you want to check all your email accounts at once, tap Combined Inbox.
4. Press ⌁, then tap Sort.
5. Select a sorting option.

To search for emails
1. From your Home screen, tap Email. Then find and tap Email.
2. If you are using several email accounts and want to check just one account, tap the account name. Press ⌁, then tap Search.
3. Tap Search, enter your search text, then tap ⏎.
4. The search result appears in a list sorted by date. Tap the email you want to open.
5. To change search options, tap ⌁ and select a different option.

To manage your email in batches
1. From your Home screen, tap Email, then find and tap Email.
2. If you are using several email accounts, tap the account that you want to check. If you want to check all your email accounts at once, tap Combined Inbox.
3. Press ⌁, then tap Mark several.
4. Mark the checkboxes for the emails that you want to select.
5. When you are finished, tap one of the icons at the bottom of the screen to, for example, delete the selected emails. You can also mark them as read or unread. For more options, press ⌁.

💡 In an Exchange Active Sync account, you can also tap 📥 to move selected emails to another folder.

To view all folders for one email account
1. From your Home screen, tap Email. Then find and tap Email.
2. If you are using several email accounts, tap the account you want to check.
3. Press ⌁, then tap Folders to view all the folders in this account.

To change the inbox checking frequency
1. From your Home screen, tap Email.
2. Find and tap Email.
3. If you are using several email accounts, tap and hold the account you want to adjust, then tap Account settings. If you are viewing the inbox of one account, press ⌁, then tap More > Account settings.
4. Tap Inbox check frequency and select an option.
To set an Out of Office auto-reply in an Exchange Active Sync account

1. From your Home screen, tap Email, then find and tap Email.
2. If you are using several email accounts, touch and hold the desired EAS (Exchange Active Sync) account, then select Account settings > Out of office.
3. Mark the Out of office checkbox.
4. If needed, mark the Set time range checkbox and set the time range for the auto reply.
5. Enter your Out of Office message in the body text field.
6. Tap OK to confirm.

Using email accounts

To add an extra e-mail account in your phone

1. From your Home screen, tap Email.
2. Find and tap Email.
3. If you have more than one email account in your phone, all accounts appear in a list. If you only have one email account in your phone, press Accounts, then tap More > Accounts.
4. Press Accounts, then tap Add account.
5. Enter the email address and password, then tap Next. If the settings for the email account cannot be downloaded automatically, complete the setup manually.
6. When prompted, enter a name for your email account so that it is easily identifiable. The same name shows in the emails you send from this account.
7. When you are finished, tap Done.

To set an email account as your default account

1. From your Home screen, tap Email.
2. Find and tap Email.
3. Tap and hold the account you want to use as the default account for composing and sending email, then tap Account settings.
4. Mark the Default account checkbox.
5. If you only have one email account, this account is automatically the default account.
6. To remove an e-mail account from your phone

1. From your Home screen, tap Email.
2. Find and tap Email.
3. If you have several email accounts in your phone, go to step 4. If you only have one email account, press Accounts, then tap More > Accounts.
4. Touch and hold the account you want to remove, then tap Remove account > OK.

Gmail™ and other Google™ services

If you have a Google™ account, you can use the Gmail™ application in your phone to read, write and organize email messages. After you set up your Google™ account to work in the phone, you can also chat to friends using the Google Talk™ application, synchronize your phone calendar application with your Google Calendar™, and download applications and games from Android Market™.

* The services and features described in this chapter may not be supported in all countries/regions or by all networks and/or service providers in all areas.
To set up a Google™ account in your phone
1 From your Home screen, tap 📱.
2 Find and tap Settings > Accounts & sync > Add account > Google.
3 Follow the registration wizard to create a Google™ account, or sign in if you already have an account. Your phone is now ready to use with Gmail™, Google Talk™, and Google Calendar™.

💡 You can also sign in or create a Google™ account from the setup guide the first time you start your phone. Or you can go online and create an account at www.google.com/accounts.

To open the Gmail™ application
1 From the Home screen, tap 📱.
2 Find and tap Gmail™.
Google Talk™

You can use Google Talk™ instant messaging in your phone to chat with friends who also use this application.

To start Google Talk™
1. From your Home screen, tap 📞.
2. Find and tap Talk.

To reply to an instant message with Talk
1. When someone contacts you on Talk, 📩 appears in the status bar.
2. Drag the status bar downwards, then tap the message and begin to chat.
Timescape™

Timescape™ collects all your communications into one integrated view. Events such as Facebook™ or Twitter™ updates appear as tiles in a chronological flow on the screen. Browse the files to get a snack-size preview of events before choosing to open them and view the full content. Timescape™ also features an infinite button that gives you access to a range of content about the item you are currently viewing.

⚠️ The services and features described in this chapter may not be supported in all countries or regions, or by all networks and/or service providers in all areas.

To start Timescape™
1. From your Home screen, tap 📱.
2. Find and tap Timescape™.
3. If you are starting Timescape™ for the first time, tap the tile in the welcome screen to set up Timescape.
4. Tap the Services screen to log in to social networking services such as Facebook™ or Twitter™, or to search for Timescape-related extensions on Android Market™.
5. If you do not want to log in to any social networking accounts or search Android Market™, tap Done.

**Timescape™ main view**

1. Your status on the web services you have selected
2. Timescape™ tiles, in chronological order, with the most recent tile at the top
3. Timescape™ event filter

**Using Timescape™**

To scroll through tiles in Timescape™
1. From your Home screen, tap 📱.
2. Find and tap Timescape™.
3. Flick up or down to scroll through the tiles.
To preview a tile in Timescape™
1. From your Home screen, tap 🔄.
2. Find and tap Timescape™.
3. Scroll to the tile you want to preview, and then tap it.

**Timescape™ event filter overview**

<table>
<thead>
<tr>
<th>Filter</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>🔄 All events</td>
<td>Updates from your Twitter™ contacts</td>
</tr>
<tr>
<td>🔄 Updates from your Facebook™ contacts</td>
<td></td>
</tr>
</tbody>
</table>

More events appear in the Timescape™ event filter if you have installed other Timescape services.

To filter the events displayed in Timescape™
1. From your Home screen, tap 🔄.
2. Find and tap Timescape™.
3. Tap or flick through the filter icons.

To refresh the main view in Timescape™
- When the Timescape™ event filter is set to show all events, press 🔄, then tap Refresh.
- When you refresh the main view, your phone may connect to the Internet to update information from web service accounts that you have linked to Timescape™.

To log in to Facebook™ or Twitter™ from Timescape™
1. From your Home screen, tap 🔄.
2. Find and tap Timescape™.
3. Press 🔄, then tap Settings > Set up services.
4. Tap the service you want to log in to.
5. Enter your login details.

When you have logged in to a web service, you can update your status or view updates from the web service in Timescape™.

To update your Facebook™ or Twitter™ status in Timescape™
1. From your Home screen, tap 🔄.
2. Find and tap Timescape™.
3. Tap 🔄 > Update status.
4. Tap the service for which you want to update your status. If you are not signed in to the service, you need to sign in before proceeding. When you have selected the desired service, tap Continue.
5. Tap the text field and enter your new status, then tap Post.

To log out of Facebook™ or Twitter™ from Timescape™
1. From your Home screen, tap 🔄.
2. Find and tap Timescape™.
3. Press 🔄, then tap Settings > Set up services.
4. Tap the service you want to log out of.

Your account information gets deleted when you log out.

**Downloading new services for Timescape™**

You can perform an extension search in Android Market™ and download new services for Timescape™. Such services include applications and plug-ins that add extra features.
to Timescape. For example, you can download applications that update Timescape with your activities on various social networking sites.

To download and install new services for Timescape™
1. From your Home screen, tap
2. Find and tap Timescape™
3. Press , then tap Settings > Set up services > Extension search.
4. If you don’t have a Google account set up on your phone, follow the on-screen instructions to add one. Otherwise, you are directed straight to Android Market™.
5. In Android Market™, select a service to download from the list that appears, then follow the instructions to download and install it.

You can delete installed Timescape services the same way you delete any other installed application.

To view an event in Timescape™
1. From the Home screen, tap
2. Find and tap Timescape™
3. Scroll to and tap the tile for the desired event so it appears in preview mode. Then tap the tile again.

The infinite button in Timescape™
When you tap a tile, the infinite button appears in the upper right corner. If the tile is connected to a contact, you can access related content by tapping the infinite button.

To view all communication with a contact in Timescape™
1. From your Home screen, tap
2. Find and tap Timescape™
3. Tap a tile for an event related to a contact.
4. Tap . All communication with the contact appears.
5. Tap or flick the filter items at the bottom of the screen to view communication with the contact through other media.

Timescape™ settings

To access Timescape™ settings
1. From the Home screen, tap
2. Find and tap Timescape™
3. Press , then tap Settings.

To schedule web service content updates in Timescape™
1. From your Home screen, tap
2. Find and tap Timescape™
3. Press , then tap Settings > Update mode.
4. Tap the desired option. If you select Manual, no automatic updates get scheduled.

Timescape™ Feed widget
The Timescape™ Feed widget shows all your most recent Timescape™ events in one view. You can flick up or down within the widget to view the full content of every event. You can also tap an event to view its content in full screen format or react to it using comments, likes, and retweets.
**Timescape™ Feed widget view**

1. Shortcut to the Timescape™ main view
2. Shortcut to update status
3. Refresh the widget view
4. Most recent online event

To add the Timescape™ Feed widget to your Home screen
1. From your Home screen, press `[ ]`.  
2. Tap **Add > Widgets**.
3. Tap **Timescape™ Feed**.

To remove the Timescape™ Feed widget from your Home screen
1. From your Home screen, touch and hold the Timescape™ Feed widget.
2. Drag the widget to `[ ]`.

**Timescape™ Friends widget**

The Timescape™ Friends widget notifies you of the latest social networking activities related to you and your friends. You can view all activities and communicate with your friends using comments, likes, and retweets.

**Timescape™ Friends widget view**

1. Shortcut to the Timescape™ main view
2. Tap to refresh the view
3. Activity indicator – indicates updates to feeds
4. Tap to show friends with most recent social networking activity
5. Open this tab to show the friends you are following and add other friends
To add the Timescape™ Friends widget to your Home screen
1. From your Home screen, press 📱.
2. Tap Add > Widgets.
3. Tap Timescape™ Friends.

To remove the Timescape™ Friends widget from your Home screen
1. From your Home screen, touch and hold the Timescape™ Friends widget.
2. Drag the widget to 📱.

Timescape™ Share widget
Share your status through one of the services that you have logged in to from your phone. For example, you can post updates on Facebook™ or Twitter™.

Timescape™ Share widget view

1. Icon showing the service currently used to send posts
2. Shortcut to the Timescape™ main view
3. Enter new posts here

To add the Timescape™ Share widget to your Home screen
1. From your Home screen, press 📱.
2. Tap Add > Widgets.
3. Tap Timescape™ Share.

To remove the Timescape™ Share widget from your Home screen
1. From your Home screen, touch and hold the Timescape™ Share widget.
2. Drag the widget to 📱.
Getting started with Android Market™

Open Android Market™ and enter a world of applications and games. You can browse these applications and games through different categories. You can also rate an application or game and send feedback on it.

To use Android Market™, you need to have a Google™ account. See To set up a Google™ account in your phone on page 54.

Android Market™ may not be available in all countries or regions.

To open Android Market™
1 From the Home screen, tap 📲.
2 Find and tap Market.

Downloading from Android Market™
You can download all kinds of applications from Android Market™, including free applications.

Before you download applications
Before you start downloading from Android Market™, make sure that you have a working Internet connection.

Also, remember that you might incur data traffic charges when you download content to your phone. Contact your operator for more information.

To download a free application
1 In Android Market™, find an item you wish to download by browsing categories, or by using the search function.
2 Tap the item to view its details, and follow the instructions to complete the installation.
3 If the application you want to download requires access to your data or control of any functions on your phone, an additional screen appears with details. Read this screen carefully because the functionality of your phone may be seriously affected if you proceed. Tap OK if you agree, or Cancel if you wish to cancel the download.

To download a paid application
1 In Android Market™, find an item you wish to download by browsing categories, or by using the search function.
2 Tap the item to view its details, and follow the instructions on your phone to complete your purchase.
3 If the application you want to download requires access to your data or control of any functions on your phone, an additional screen appears with details. Read this screen carefully because the functionality of your phone may be seriously affected if you proceed. Tap OK if you agree, or Cancel if you wish to cancel the download.

To open a downloaded application
1 In Android Market™, press 📲, then tap My Apps.
2 Tap the downloaded application.

You can also access downloaded applications from the Application screen.

Clearing your application data
You may sometimes need to clear data for an application. This might happen if, for example, the application memory becomes full, or you want to clear high scores for a
game. You might also want to erase incoming email, text and multimedia messages in some applications.

To clear all cache for an application
1. From your Home screen, tap 📱.
2. Find and tap Settings.
3. Tap Applications > Manage applications.
4. Tap the application for which you want to clear all cache.
5. Tap Clear cache.

⚠️ It is not possible to clear the cache for some applications.

To delete an installed application
1. From the Home screen, tap 📱.
2. Find and tap Settings.
3. Tap Applications > Manage applications.
4. Tap the desired application.
5. Tap Uninstall.

⚠️ It is not possible to delete some preinstalled applications.

Permissions

Some applications need to access parts of your phone to be able to work properly. For example, a navigation application needs permissions to send and receive data traffic, and access your location. Some applications might misuse their permissions by stealing or deleting data, or reporting your location. Make sure you only install and give permissions to applications you trust.

To view permissions of an application
1. From the Home screen, tap 📱.
2. Find and tap Settings.
3. Tap Applications > Manage applications.
4. Tap the desired application.
5. Scroll down to view Permissions.

Installing applications not from Android Market™

Installing applications of unknown or unreliable origin can damage your phone. By default, your phone is set to block such installations. However, you can change this setting and allow installations from unknown sources.

⚠️ Sony does not warrant or guarantee the performance of any third-party applications or content transferred via download or other interface to your phone. Similarly, Sony is not responsible for any damage or reduced performance of your phone attributable to the transfer of third-party content. Only use content from reliable sources. Contact the content provider if you have any questions or concerns.

To allow the installation of applications not from Android Market™
1. From the Home screen, tap 📱.
2. Find and tap Settings > Applications.
3. Mark the Unknown sources checkbox.
PlayNow™ service

You can use the PlayNow™ service to download applications, music, games, ringtones, and wallpapers. The PlayNow™ service offers both free and non-free downloads.

💡 The PlayNow™ service is not available in all countries.

Before you download content

Before you download, make sure that you have an Internet connection. Also, you may need to have a memory card inserted in your phone to download content.

⚠️ When you download content to your phone, you might be charged for the amount of data transferred. Contact your operator for information about data transfer rates in your country.

To start PlayNow™
1. From the Home screen, tap 📱.
2. Find and tap 📱.

Downloading from the PlayNow™ service

Download a range of content from the PlayNow™ service direct to your phone. Choose from a variety of applications, games, music, ringtones, and other content. Note that payment options for non-free applications may vary per country.

To download a PlayNow item to your phone
1. From your Home screen, tap 📱.
2. Find and tap PlayNow™.
3. Find an item you want to download by browsing categories, or by using the search function.
4. Tap the item to view its details.
5. Click “Buy now!” to start the purchase process. After your purchase has been validated, you can start to download your content.
Video Unlimited™

Use the Video Unlimited™ service to rent and purchase videos that you can view not only on your phone, but also on your PC, PlayStation® Portable (PSP®), and PlayStation® 3. Take your pick from the latest Hollywood releases, action movies, comedies, classics, and a range of other categories.

Video Unlimited™ might not be available in all countries or regions.

To open Video Unlimited™
1. From your Home screen, tap 📺.
2. Find and tap 🎥.

Video Unlimited™ menu overview

- View your account information
- Search for a video
- View the download status for all your items
- View and change settings for your account, purchases, and downloads
- Add the current video to a wish list
- Delete all items in your wish list
- Delete the video you’re currently viewing from the wish list
- Share information about the current video via a social network, email, Bluetooth, or other method
- View legal information

The Video Unlimited™ menu is dynamic, which means that all options are not always available. For example, the option to delete all items in your wish list is only available when you are viewing the list.

To open the Video Unlimited™ menu
• Open Video Unlimited, then press 🎥.

Creating a Video Unlimited™ account

You need to create a Video Unlimited™ account if you want to buy or rent movies through the Video Unlimited™ service. If you already have a PlayStation® network account, then you can use that account instead.

Exploring the Video Unlimited™ selection

Browse videos by category, or enter text to search for a particular item. You can also choose to preview videos you’re interested in.

Renting or buying a video

When you rent a video, you have a fixed amount of time in which to view it. This time period varies from market to market. You can also choose to download a purchased video to most Sony™ devices that are connected to your Video Unlimited™ account.
Video Unlimited™ notifications overview

When you buy or rent videos, the following notifications may appear:

- Downloading of video is completed
- Downloading has failed. You need to check that, for example, your phone is connected to a Wi-Fi® network, and you have enough free space on your memory card.
- Downloading of video is ongoing
- Downloading is paused
- Confirmation of successful purchase
- Rental countdown period has started

Watching a video from Video Unlimited™

You can watch your rented or purchased videos on most Sony™ device that are connected to your Video Unlimited™ account.

Video menu overview

When you watch a video from Video Unlimited™, you can open a menu to get the following options:

- Delete the current video
- View information about the current video
- Change the audio language
- Change the language of subtitles, or remove subtitles
Music Unlimited™

Music Unlimited™ is a subscription-based service that offers access to millions of songs over a 3G or Wi-Fi® connection. You can manage and edit your personal music library in the cloud from a variety of devices, or sync your playlists and music using a PC that runs the Windows® operating system. For more information, visit www.sonyentertainmentnetwork.com.

⚠️ Music Unlimited™ might not be available in all countries or regions.

To open Music Unlimited™

1. From your Home screen, tap 📞.
2. Find and tap 📞.
Getting organized

**Calendar**

Your phone has a calendar for managing your time schedule. If you have a Google™ account, you can also synchronize your phone calendar with your web calendar. See *Synchronizing data on your phone* on page 71.

To set the calendar view
1. From your Home screen, tap 📅, then find and tap Calendar.
2. Tap Month, Week or Day to select an option.

To view multiple calendars
1. From your Home screen, tap 📅, then find and tap Calendar.
2. Press ☰, then tap Calendars.
3. Select the calendars you want to view.

To create a calendar event
1. From your Home screen, tap 📅, then tap Calendar.
2. Press ☰, then tap New event.
3. Enter the name, time, location, and description for the event.
4. If desired, select another option under Repetition.
5. Select a reminder for the event. To add a new reminder for the event, tap ☰.
6. Tap Save.

When the appointment time approaches, your phone plays a short sound to remind you. Also, 🕒 appears in the status bar.

To view a calendar event
1. From your Home screen, tap 📅, then tap Calendar.
2. Tap the event you want to view.

To change the calendar settings
1. From your Home screen, tap 📅, then tap Calendar.
2. Press ☰, then tap Settings.
3. Tap the setting you want to change, then edit as desired.

**Alarm clock**

Use your phone as an alarm clock and select any sound in your phone as your alarm signal. The alarm does not sound if your phone is turned off. But it does sound when your phone is set to silent mode.

To open the alarm clock
1. From your Home screen, tap 🕒.
2. Find and tap Alarm.

To set a new alarm
1. From your Home screen, tap 🕒.
2. Find and tap Alarm.
3. Tap Add alarm.
4. Adjust the time by scrolling up and down.
5. If desired, edit other alarm settings.
6. Tap Done.
To edit an existing alarm
1. From your Home screen, tap 📣.
2. Find and tap Alarm.
3. Tap the alarm you want to edit.
4. Scroll up or down to adjust the time.
5. If desired, edit other alarm settings.
6. Tap Done.

⚠️ The alarm time format displayed is the same as the format you select for your general time settings, for example, 12-hour or 24-hour.

To deactivate an alarm
1. From your Home screen, tap 📣.
2. Find and tap Alarm.
3. Unmark the checkbox next to the alarm you want to deactivate.

To activate an existing alarm
1. From your Home screen, tap 📣.
2. Find and tap Alarm.
3. Tap the checkbox next to the alarm you want to activate.

To delete an alarm
1. From your Home screen, tap 📣.
2. Find and tap Alarm.
3. Touch and hold the alarm you want to delete.
4. Tap Delete alarm, then tap Yes.

To set the ringtone for an alarm
1. From your Home screen, tap 📣.
2. Find and tap Alarm.
3. Tap the alarm you want to edit.
4. Unmark Style settings checkbox.
5. Tap Alarm sound and select an option.
6. Tap Done.

To set a recurring alarm
1. From your Home screen, tap 📣.
2. Find and tap Alarm.
3. Tap the alarm you want to edit.
4. Tap Repeat.
5. Mark the checkboxes for the desired days, then tap OK.

To set the title for an alarm
1. From your Home screen, tap 📣.
2. Find and tap Alarm.
3. Tap the alarm you want to edit.
4. Tap the Alarm text field and enter a name for the alarm.
5. Tap Done.

To activate the vibrate function for an alarm
1. From your Home screen, tap 📣.
2. Find and tap Alarm.
3. Tap the alarm you want to edit.
4. Mark the Vibrate checkbox.

To set alarms to sound when the phone is in silent mode
1. From your Home screen, tap 📣.
2. Find and tap Alarm, then tap to select an alarm.
3. Mark the Alarm in silent mode checkbox, then tap Done.
To snooze an alarm when it sounds
• Tap Snooze - min.

To turn off an alarm when it sounds
• Slide 🕒 to the right.
Scanning with the NeoReader™ application

Use your phone as a barcode scanner to find out more about items you scan. For example, you see a coat in a magazine ad and want to find the nearest retail outlet to buy it. If the ad contains a readable barcode, the NeoReader™ application uses this code to access mobile web content, such as a web page with more product information or a map of nearby outlets. NeoReader™ supports most standard barcode types.

To start the NeoReader™ application
1. From the Home screen, tap .
2. Find and tap NeoReader™.

To scan a barcode
1. When the NeoReader™ application is open, hold the phone camera over the barcode until the complete barcode is visible in the viewfinder.
2. The phone automatically scans the barcode, and vibrates when the barcode is recognized. If the barcode is not recognized, tap to scan the code manually.

To enter a barcode manually
1. When the NeoReader™ application is open, tap .
2. Tap the text field, then enter the numbers of the barcode.

NeoReader™ application menu overview

The following menu options are available in the NeoReader™ application:

- Capture the barcode using a higher image resolution in cases where NeoReader™ does not recognize the barcode automatically
- Enter the bar code numbers manually. This option can be used if your camera has difficulty reading the bar code
- View a list of previously scanned bar codes
- Select preferences for how you use the NeoReader™ application
- View information about the NeoReader™ application
- Read more about different bar code types, and about how to use NeoReader™
- Select your personal settings, such as language or country. This information is used to personalize bar code content
- Send a text message to invite a friend to download the NeoReader™ application
Synchronizing data on your phone

You can sync contacts, email, calendar events, and other information with your phone from multiple email accounts, synchronization services and other kinds of accounts, depending on the applications installed on your phone. Synchronizing your phone with other information sources is an easy and practical way to stay up to date.

You can:

- access your Gmail™, Google Calendar™, Google™ contacts, and other Google services you use.
- access your corporate email, contacts and calendar applications.
- access your Facebook™ contacts, calendar, albums, and other services you use.
- synchronize your phone with an Internet server using SyncML™.

Synchronizing with Google™

Synchronize your phone with your Gmail™, Google Calendar™, Google™ contacts, and data from other Google services you use. View and manage them from your phone just as easily as you would from a computer.

After synchronizing, you can find Gmail™ in the Gmail™ application; Google Calendar™ in the Calendar application; Google™ contacts in the Contacts application; and other data in corresponding Google applications that you have installed.

To set up a Google™ account in your phone for synchronization

1. From your Home screen, tap  
2. Tap Settings > Accounts & sync.  
3. Make sure the Activate auto-sync checkbox is marked so that applications can synchronize data automatically.  
4. Tap Add account > Google.  
5. Follow the registration wizard to create a Google™ account, or sign in if you already have an account.  
6. Mark the Back up & restore checkbox if you want to back up data to your Google™ account, then tap Accept.  
7. Tap Done.  
8. Tap your newly created Google™ account, then tap the items you want to synchronize.

To synchronize manually with your Google™ account

1. From the Home screen, tap  
2. Tap Settings > Accounts & sync.  
3. Tap the Google™ account you want to synchronize.  
4. Press  then tap Sync now.

To remove a Google™ account from your phone

1. From your Home screen, tap  
2. Tap Settings > Accounts & sync.  
3. Tap the Google™ account you want to remove from the accounts list.  
4. Tap Remove account.  
5. Tap Remove account again to confirm.

! You can remove all your Google™ accounts from the accounts list, except for the first one. To remove the first account, you have to completely reset your phone. See Resetting the phone on page 138.

Synchronizing your corporate email, calendar and contacts

Access your corporate email messages, calendar appointments and contacts directly from your phone. View and manage them just as easily as you would from a computer.
After setup, you can find your information in the Email, Calendar and Contacts applications.

⚠️ For you to access the functionality described above, your corporate information must be stored on a Microsoft® Exchange server.

To set up corporate email, calendar and contacts in your phone

1. From your Home screen, tap 
2. Tap Settings > Accounts & sync.
3. Make sure the Activate auto-sync checkbox is marked so that your data will synchronize automatically according to the sync interval you set.
4. Tap Add account > Exchange Active Sync.
5. Enter your corporate email address and password.
6. Tap Next.
7. Follow the steps to configure your account and select the kinds of data you want to sync to the phone, such as contacts and calendar. If the settings for your corporate account are not found automatically, complete the setup manually. Contact your corporate network administrator if you need more information.
8. When the setup is done, enter a name for this corporate account, so that it is easily identifiable, then tap Done.
9. If prompted, activate the device administrator to allow your corporate server to control certain security features in your phone. Device administrators for your phone are typically email, calendar, or other applications to which you grant authority to implement security policies on the phone when you connect to enterprise services that require this authority.

To edit the setup of corporate email, calendar and contacts

1. From your Home screen, tap 
2. Tap Settings > Accounts & sync and select your corporate account.
3. Tap Account settings.
4. Change the settings to suit your needs. For example, you can decide:
   • how often the phone should check for new email messages.
   • to get your corporate calendar and contacts in your phone.
   • server settings in Incoming settings.

To set a synchronization interval for a corporate account

1. From your Home screen, tap 
2. Tap Settings > Accounts & sync and select your corporate account.
3. Tap Account settings.
4. Tap Inbox check frequency and select an interval option.

To remove a corporate account from your phone

1. From your Home screen, tap 
2. Tap Settings > Accounts & sync, then tap your corporate account.
3. Tap Remove account.
4. Tap Remove account again to confirm.

Synchronizing with Facebook™

Set up your phone to synchronize your Facebook™ contacts, calendar entries, photos, and data from other services you use. When you set up Facebook to work in your phone, you may get the option to create a Facebook inside Xperia™ account, which allows easier access to Facebook from other applications in your phone.
To set up a Facebook™ account on your phone
1. From your Home screen, tap 📲.
2. Tap Settings > Accounts & sync.
3. Make sure the Activate auto-sync checkbox is marked so that applications can synchronize data automatically.
4. Tap Add account > Facebook.
5. Follow the registration wizard to create a Facebook™ account, or sign in if you already have a Facebook account.
6. Select a synchronization option for your account, then tap Finish. The Facebook account is now set up to work on your phone.
7. If the Facebook icon appears in the status bar, drag down the status bar and tap Facebook inside Xperia™ to get more information.
8. If you want to add a Facebook inside Xperia™ account, mark the Facebook integration checkbox and then follow the on-screen instructions.

To synchronize manually with your Facebook™ account
1. From your Home screen, tap 📲.
2. Tap Settings > Accounts & sync.
3. Tap the Facebook™ account or the Facebook inside Xperia™ account.
4. Press ⌚, then tap Sync now.

To remove a Facebook™ account from your phone
- When you remove a Facebook™ account from your phone, the Facebook account is not deleted and you can still access it from a computer.
1. From your Home screen, tap 📲.
2. Tap Settings > Accounts & sync.
3. Tap the Facebook account.
4. Tap Remove account.
5. Tap Remove account again to confirm. The Facebook account and the Facebook inside Xperia™ account are now removed from your phone.

Synchronizing using SyncML™
Synchronize your phone with an Internet server using SyncML™. View and manage contacts, calendar, and bookmarks from your phone just as easily as you would from a computer.

To set up a SyncML™ account in your phone
1. From your Home screen, tap 📲.
2. Find and tap Settings > Accounts & sync.
3. Make sure the Activate auto-sync checkbox is marked so that your data will synchronize automatically according to the interval you set.
4. Tap Add account > SyncML.
5. Tap the Name, Server address, Username, and Password fields, and enter the information required.
6. Tap Sync interval and select how often you want the phone to synchronize automatically.
7. Tap a field you want to synchronize, for example, Contacts. Then enter the information required. Repeat this step for each item you want to synchronize.
8. When you're finished, tap Done.
- Contact your SyncML™ service provider for more information about your account settings.

To synchronize manually with your SyncML™ account
1. From your Home screen, tap 📲.
2. Tap Settings > Accounts & sync.
3. Tap the SyncML™ account that you want to synchronize.
4. Press ⌚, then tap Sync now.
To set a synchronization interval

1. From your Home screen, tap 📱.
2. Tap **Settings > Accounts & sync**, then tap your SyncML™ account.
3. Tap **Account settings**.
4. Tap **Sync interval** and select an interval option.

To remove a SyncML™ account from your phone

1. From your Home screen, tap 📱.
2. Tap **Settings > Accounts & sync**, then tap your SyncML™ account.
3. Tap **Remove account**.
4. Tap **Remove account** again to confirm.
NFC

NFC (Near Field Communication) is a short-range wireless technology that lets you exchange data with other devices, pay for goods using your phone, and scan special tags that give you more information about a product or service. You can share tags that you scan. You can also create your own tags and use them to send information to other NFC-compatible devices such as phones.

The tags you can create include contacts, URLs, map locations, or text. To scan or share a tag, you have to hold the NFC detection area of your phone right over the tag or next to the NFC detection area of the other device. The maximum reading distance is about one centimeter, which helps prevent unauthorized communications.

⚠️ NFC may not be available in all countries and/or regions.

To turn on the NFC function
1. From your Home screen, tap
3. Mark the NFC checkbox.

NFC detection area

⚠️ The location of the NFC detection area is not the same on all phones. When sharing data with another phone using NFC, refer to the User guide of the other phone for more information.

To share a contact with another phone using NFC
1. Make sure that both your phone and the receiving phone have the NFC function turned on and that both phone screens are active.
2. To view contacts in your phone, go to your Home screen, tap ☑️, then tap ☑️.
3. Tap the contact that you want to share.
4. Hold your phone and the receiving phone back to back so that the NFC detection area of each phone touches the other. When the phones recognize each other, they both vibrate and the data transfer starts.
5. Separate the two phones immediately after they vibrate.
6. When the transfer is done, the contact information is displayed on the screen of the receiving phone and is also saved in the Contacts application.

💡 Separating the phones immediately after they vibrate prevents repeated connection attempts that could interfere with the data transfer.
To share a music file with another phone using NFC

1. Make sure both your phone and the receiving phone have the NFC function turned on, the Share my tag checkbox under Tags > My tag is unchecked, and both phone screens are active.
2. To open the music player, go to your Home screen, then tap Media > . If is not displayed, tap , then find and tap .
3. Tap the MY MUSIC tab to open the music library.
4. Select a music category and browse to the track you want to send.
5. Tap the track to play it. You can then tap to pause the track. The transfer works whether the track is playing or paused.
6. Hold your phone and the receiving phone back-to-back so the NFC detection area of each phone touches the other. When the phones connect, they both vibrate and the data transfer starts.
7. Separate the two phones immediately after they vibrate.
8. When the transfer is done, the music file plays immediately on the receiving phone. At the same time, the file is saved in the Music application.

🌟 Separating the phones immediately after they vibrate prevents repeated connection attempts that could interfere with the data transfer.

You might not be able to copy, send, or transfer copyright-protected items.

To share a photo or video with another phone using NFC

1. Make sure both your phone and the receiving phone have the NFC function turned on, the Share my tag checkbox under Tags > My tag is unchecked, and both phone screens are active.
2. To view photos and videos in your phone, go to your Home screen, then tap Media > . If is not displayed, tap , then find and tap .
3. Tap the album that contains the photo or video you want to share.
4. Tap the photo or video you want to share.
5. Hold your phone and the receiving phone back-to-back so the NFC detection area of each phone touches the other. When the phones recognize each other, they both vibrate and the data transfer starts.
6. Separate the two phones immediately after they vibrate.
7. When the transfer is done, the photo or video is displayed on the screen of the receiving phone. At the same time, it is saved in the Gallery application.

🌟 Separating the phones immediately after they vibrate prevents repeated connection attempts that could interfere with the data transfer.

Scanning NFC tags

Your phone can scan various kinds of NFC tags. For example, it can scan embedded tags on a poster, on a billboard advertisement, or beside a product in a retail store. You can receive additional information, such as a web address, or a phone number.

To scan an NFC tag

1. Make sure that your phone has the NFC function turned on and that the screen is active.
2. Place your phone over the tag so that the phone’s NFC detection area touches it. Your phone scans the tag and displays the content collected. Tap the content of the tag to open it.
3. To open the tag, tap it.
4. To save the tag and return to the previous screen, tap Done.

Working with tags

You can use the Tags application to work with the tags you scan. For example, you can view tags and categorize the ones you like the most as favorites.
To view tags that you have scanned
1 From your Home screen, tap 📱.
2 Find and tap Tags. All tags you have scanned and saved appear under the Tags tab.

💡 To open a tag, tap its content. For example, if the content is a URL, a webpage opens when you tap the URL.

To star a tag
1 Open the Tags application and tap a tag. The tag opens in a screen with information about the tag and a list of its contents.
2 To star this tag, tap the star icon. To remove the tag from the list of starred tags, tap the star icon again.
3 Tap Done.

💡 To view all starred tags, tap the Starred tab.

Sharing tags
You can create tags that you can later share with others who have a phone or other device that can scan NFC tags. The tags you add can include information from one of your contacts, a URL of a web site, or text. Remember you can only share the tag that is currently selected for sharing.

To create a tag
1 From your Home screen, tap 📱.
2 Find and tap Tags > My tag > Add new tag.
3 Select the type of tag you want to add.
4 Tap Save. The tag is added to the Manage my tags list and is made your current tag.

To share a tag
1 From your Home screen, tap 📱.
2 Find and tap Tags > My tag.
3 Mark the Share my tag checkbox. Make sure that the NFC function is turned on and that the phone screen is active.
4 To stop sharing this tag, uncheck the Share my tag checkbox.

To change the tag currently selected for sharing
1 From your Home screen, tap 📱.
2 Find and tap Tags > My tag > Active tag.
3 In the dialog that opens, tap the tag that you want to share. The tag is now selected for sharing.

To delete a shared tag
1 From your Home screen, tap 📱.
2 Find and tap Tags > My tag.
3 Tap and hold a tag in the Manage my tags list.
4 In the dialog that opens, tap Delete tag.
Connecting to wireless networks

You can access the Internet wirelessly from your phone using Wi-Fi® technology. This way you can browse the web and access cheaper call and data rates.

If your company or organization has a virtual private network (VPN), you can connect to this network with your phone. You can use a VPN to access intranets and other internal services at your company.

**Wi-Fi®**

Using Wi-Fi® technology you can access the Internet wirelessly with your phone. To access the Internet using a Wi-Fi® connection, you first need to search for and connect to an available Wi-Fi® network. The signal strength of the Wi-Fi® network may differ depending on your phone’s location. Moving closer to the Wi-Fi® access point may increase the signal strength.

**Before using Wi-Fi®**

To browse the Internet using a Wi-Fi® connection, you need to search for and connect to an available Wi-Fi® network and then open the Internet browser. The signal strength of the Wi-Fi® network may differ depending on your phone’s location. Move closer to the Wi-Fi® access point to increase the signal strength.

**To turn on Wi-Fi®**

1. From the Home screen, tap 
2. Find and tap **Settings > Wireless & networks**.
3. Mark the **Wi-Fi** checkbox. The phone scans for available Wi-Fi® networks.

   ! It may take a few seconds before Wi-Fi® is enabled.

**To connect to a Wi-Fi® network**

1. From the Home screen, tap 
2. Find and tap **Settings > Wireless & networks > Wi-Fi settings**.
3. Available Wi-Fi® networks are displayed under **Wi-Fi networks**. The available networks may be open or secured. Open networks are indicated by and secured networks are indicated by next to the Wi-Fi® network name.
4. Tap a Wi-Fi® network to connect to it. If you are trying to connect to a secure Wi-Fi® network, you are asked to enter a password. is displayed in the status bar once you are connected.

   ! Your phone remembers Wi-Fi® networks you connect to. The next time you come within reach of a previously connected Wi-Fi® network, your phone automatically connects to it.

   🎨 In some locations, open Wi-Fi® networks require you to log in to a web page before you can get access to the network. Contact the relevant Wi-Fi® network administrator for more information.

**To connect to another Wi-Fi® network**

1. From the Home screen, tap 
2. Find and tap **Settings > Wireless & networks > Wi-Fi settings**. Detected Wi-Fi® networks are displayed in the **Wi-Fi networks** section.
3. Tap another Wi-Fi® network to connect to it.

**Wi-Fi® network status**

When you are connected to a Wi-Fi® network or when there are Wi-Fi® networks available in your vicinity, it is possible to see the status of these Wi-Fi® networks. You can also enable the phone to notify you whenever an open Wi-Fi® network is detected.
To enable Wi-Fi® network notifications
1 Turn on Wi-Fi®, if it is not already on.
2 From your Home screen, tap.
3 Find and tap Settings > Wireless & networks > Wi-Fi settings.
4 Mark the Network notification checkbox.

To scan for Wi-Fi® networks manually
1 From your Home screen, tap.
2 Find and tap Settings > Wireless & networks > Wi-Fi settings.
3 Press.
4 Tap Scan. The phone scans for Wi-Fi® networks and displays available networks in a list.
5 Tap a Wi-Fi® network in the list to connect to it.

Advanced Wi-Fi® settings
Before you add a Wi-Fi® network manually, you need to turn on the Wi-Fi® setting in your phone.

To add a Wi-Fi® network manually
1 From the Home screen, tap.
2 Find and tap Settings > Wireless & networks > Wi-Fi settings.
3 Tap Add Wi-Fi network.
4 Enter the Network SSID for the network.
5 Tap the Security field to select a security type.
6 If required, enter a password.
7 Tap Save.

Contact your Wi-Fi® network administrator to get the Network SSID name and Wireless password.

To view detailed information about a connected Wi-Fi® network
1 From the Home screen, tap.
2 Find and tap Settings > Wireless & networks > Wi-Fi settings.
3 Tap the Wi-Fi® network that you are currently connected to. Detailed network information is displayed.

Wi-Fi® sleep policy
By adding a Wi-Fi® sleep policy, you can specify when to switch from Wi-Fi to mobile data.

If you are not connected to a Wi-Fi® network, the phone uses mobile data connection to access the Internet (if you have set up and enabled a mobile data connection in your phone).

To add a Wi-Fi® sleep policy
1 From the Home screen, tap.
2 Find and tap Settings > Wireless & networks > Wi-Fi settings.
3 Press.
4 Tap Advanced.
5 Tap Wi-Fi sleep policy.
6 Select a Wi-Fi sleep policy to use.

Using a static IP address
You can set up the phone to connect to a Wi-Fi® network using a static IP address.
To set up a static IP address

1. From the Home screen, tap.
2. Find and tap Settings > Wireless & networks > Wi-Fi settings.
3. Press.
4. Tap Advanced.
5. Mark the Use static IP checkbox.
6. Tap and enter the information needed for your Wi-Fi® network:
   - IP address
   - Gateway
   - Netmask
   - DNS 1
   - DNS 2
7. Press and tap Save.

WPS

WPS (Wi-Fi Protected Setup) is a computing standard that helps you establish secure wireless network connections. If you have little background knowledge of wireless security, WPS makes it easy for you to set up Wi-Fi Protected Access (WPA) encryption to secure your network. You can also add new devices to an existing network without entering long passwords.

Use one of these methods to enable WPS:

- Push button method – simply push a button on a WPS access point, for example, a router.
- PIN method – your phone creates a random PIN (Personal Identification Number), which you enter on the network access point device.

To connect to a Wi-Fi® network using a WPS button

1. From your Home screen, tap.
3. Mark the Wi-Fi checkbox.
4. Tap Wi-Fi settings > Auto setup (WPS).
5. Press the WPS button on the access point within two minutes.

To connect to a Wi-Fi® network using a WPS PIN

1. From your Home screen, tap.
3. Mark the Wi-Fi checkbox.
4. Tap Wi-Fi settings.
5. Tap a network indicated by and select Use PIN.
6. Follow the instructions that appear.

Using the Connected devices feature to share files

Share media files in your phone with other devices over a shared Wi-Fi® connection using the Connected devices feature. For example, you can use a connected client device to view photos or play music tracks that are saved on your phone. Or you can open files from the other device on your phone. A connected client device can be, for example, a computer, a camera, TV, or a PlayStation®3. All devices must be DLNA Certified™ by the Digital Living Network Alliance.
To set up file sharing using the Connected devices feature

1. Connect your phone to a Wi-Fi® network.
2. From your Home screen, tap , then find and tap Connected devices.
3. Press , then tap Media server.
4. Tap ✿ and edit your phone name, if desired. This name will later appear on other client devices connected to the Wi-Fi network, to identify your phone.
5. Mark the Share contents checkbox. ✿ appears in the status bar. Your phone can now work as a media server.
6. Connect your computer or other device(s) to the same Wi-Fi® network as your phone.
7. A notification appears in the status bar of the phone. Tap it and set access permissions.
8. To close the Connected devices view, press . The Media server function stays running in the background.
9. To turn off the media server, go to the Connected devices view in the phone and unmark the Share contents checkbox.

The instructions described above may differ depending on the client devices. Also refer to your client device User guide. If the device cannot connect, check that your local network is working.

To set access permissions for a pending device

1. From your Home screen, tap , then find and tap Connected devices.
2. Press ✿, then tap Media server.
3. Select a device from the Pending devices list.
4. Select an access permission level.

To change the name of a registered device

1. From your Home screen, tap , then find and tap Connected devices.
2. Press ✿, then tap Media server.
3. Select a device from the Registered devices list, then select Change name.
4. Enter a new name for the device.

To change the access level of a registered device

1. From your Home screen, tap , then find and tap Connected devices.
2. Press ✿, then tap Media server.
3. Select a device from the Registered devices list.
4. Tap Change access level and select an option.

To get help about sharing content with other devices

• When the Connected devices view is open, press ✿, then tap Help.

Playing files from other devices on your phone

Once you have set up the Connected devices feature, you can start playing media files from other devices on your phone.

To play a shared media file on your phone

1. Make sure the devices that you want to share files with are connected to the same Wi-Fi® network as your phone.
2. From your Home screen, tap , then find and tap Connected devices.
3. Select a connected device under Server list.
4. Browse the folders of the connected device and select the media file you want to open. The file starts playing automatically.

Playing shared media files on other devices

You can use the Connected devices feature to access photos and videos saved to the internal storage or memory card of your phone from other devices.
To view photos or videos from your phone on another device
1 Make sure the devices that you want to share files with are connected to the same Wi-Fi® network as your phone.
2 From your Home screen, tap Gallery.
3 Find and tap Gallery.
4 Open the album containing the files you want to view.
5 Touch and hold any photo or video. Checkboxes appear for each item.
6 Mark the item or items that you want to view, then press , and then tap .
7 Select a device. The selected files start playing in chronological order on the device you select.

To play a music track from your phone on another device
1 Make sure the devices that you want to share files with are connected to the same Wi-Fi® network as your phone.
2 From your Home screen, tap , then find and tap .
3 Tap MY MUSIC to open the music library.
4 Select a music category and browse to the track you want to play.
5 Tap .
6 Select a device. The track plays automatically on the device you select.

You can also play a track from your phone on another device by tapping the cover art for the track and then tapping Play on device.

Sharing your phone’s mobile data connection
You can share your phone’s mobile data connection with a single computer using a USB cable. This process is called USB tethering. You can also share your phone’s data connection with up to eight devices at once, by turning your phone into a portable Wi-Fi® hotspot.

When your phone is sharing its data connection, the following icons may appear in the status bar or in the Notification panel:

- USB tethering is active
- Portable Wi-Fi® hotspot is active
- Both USB tethering and portable hotspot are active

To share your phone’s data connection using a USB cable
1 Deactivate all USB cable connections to your phone.
2 Using the USB cable that came with your phone, connect your phone to a computer.
3 From your Home screen, tap .
4 Find and tap Settings > Wireless & networks > Tethering.
5 Mark the USB tethering checkbox. The phone starts sharing its mobile network data connection with the computer over the USB connection. An ongoing notification appears in the status bar and the Notification panel.
6 Unmark the USB tethering checkbox, or disconnect the USB cable to stop sharing your data connection.

You cannot share your phone’s data connection and SD card over a USB cable at the same time. For more information, see Connecting your phone to a computer on page 121.

You may need to prepare your computer to establish a network connection via USB cable. Go to android.com/tether to get the most current information.
To share your phone’s data connection as a portable Wi-Fi® hotspot

1. From the Home screen, tap :.
3. Tap Portable Wi-Fi hotspot settings > Configure Wi-Fi hotspot.
4. Enter the Network SSID for the network. Tap the Security field to select a security type.
5. If required, enter a password.
6. Tap Save.
7. Mark the Portable Wi-Fi hotspot checkbox. The phone starts broadcasting its Wi-Fi® network name (SSID). You can now connect to this network with up to 8 computers or other devices.
8. Unmark the Portable Wi-Fi hotspot checkbox when you want to stop sharing your data connection via Wi-Fi®.

To rename or secure your portable hotspot

1. From the Home screen, tap :.
3. Make sure the Portable Wi-Fi hotspot checkbox is marked.
4. Tap Portable Wi-Fi hotspot settings > Configure Wi-Fi hotspot.
5. Enter the Network SSID for the network.
6. Tap the Security field to select a security type.
7. If required, enter a password.
8. Tap Save.

Virtual private networks (VPNs)

Use your phone to connect to virtual private networks (VPNs), which allow you to access resources inside a secured local network from outside the actual network. For example, VPN connections are commonly used by corporations and educational institutions for users who need to access intranets and other internal services when they are outside of the internal network, for example, when they are travelling.

VPNs can be set up in many ways, depending on the network. Some networks may require you to transfer and install a security certificate in your phone. See Connecting your phone to a computer on page 121 for more information on how to transfer content to your phone. For detailed information on how to set up a connection to your virtual private network, please contact the network administrator of your company or organization.

To add a virtual private network

1. From the Home screen, tap :.
2. Find and tap Settings > Wireless & networks > VPN settings.
3. Tap Add VPN.
4. Select the type of VPN to add.
5. Enter your VPN settings.
6. Press and tap Save.

To connect to a virtual private network

1. From the Home screen, tap :.
2. Find and tap Settings > Wireless & networks > VPN settings.
3. In the list of available networks, tap the VPN you want to connect to.
4. Enter the required information.
5. Tap Connect.

To disconnect from a virtual private network

1. Drag the status bar downwards.
2. Tap the notification for the VPN connection to turn it off.
Web browser

Use your web browser to view and navigate web pages, add pages as bookmarks, and create shortcuts to your Home screen. You can open several browser windows at the same time and use the zoom function when navigating a web page.

To open the web browser
1. From your Home screen, tap 🌐.
2. Find and tap 🌐.

Toolbar

The toolbar options make browsing easy:

- Open a new browser window
- 🌱 Add, open or edit a bookmark. View your most visited web pages or open web pages from the browser history
- 📚 View open windows
- 🔄 Refresh the current web page
- ➡️ Go forward one page in the browsing history
- ⋯ Open a menu to see more options

To open the toolbar
• From the browser, press 🌐.

Browsing the web

Search and address bar

Use the search and address bar to browse the web.

1. View the download progress of the current web page
2. Enter a search word to search for a web page, or enter a web page address to load a web page
3. Cancel the download of the current web page

💡 When a page has finished downloading, tap the bookmark icon 🌐 next to the search and address bar to bookmark it.

To open a web page
1. In your browser, tap the text field in the search and address bar to activate the keypad.
2. Enter a web address.
3. If you are using portrait view, tap 🌐. If you are using landscape mode, tap Go.

To search for a web page
1. Tap the search and address text field to activate the keypad.
2. Enter a search word or phrase.
3. If you are using portrait view, tap 🌐. If you are using landscape mode, tap Go.
To exit the web browser

• While browsing, press 

When you open the browser again, the browser appears exactly as it did before you exited, that is, with the same number of windows, position and zoom levels.

Navigating web pages

To select a link

• To select a link in a web page, tap the link. The selected link is highlighted in orange, and the web page is loaded when you release your finger.

If you select a link by mistake before releasing your finger, you can deselect it by dragging your finger away until the link is no longer highlighted.

To go to the previous page while browsing

• Press 

To zoom in or out on a webpage

Use one of the following methods to zoom in or out on a web page:

• Touch an area of the page with two fingers at once and spread them apart to zoom in, or pinch them together to zoom out.
• Slide your finger on the screen to make the zoom controls appear. Tap the icon to zoom in, or tap to zoom out.
• Double-tap to zoom in on the web page, or double-tap again to zoom out.

To reload the current web page

• Press , then tap Refresh.

To add a webpage shortcut to your Home screen

1 When viewing a webpage, press .
2 Tap Bookmarks > Add.
3 If desired, you can edit the name and the web address. When you’re done, tap OK.
4 Tap and hold the bookmark to open a menu.
5 Tap Add shortcut to Home.

To share a link to the current web page

1 While browsing, press .
2 Tap More > Share page.
3 Select an available transfer method, and follow the on-screen instructions.

Managing bookmarks

Bookmarks let you access your favorite and frequently visited web pages quickly. Depending on your network operator, some bookmarks may be preinstalled on your phone.

To bookmark a web page

1 While you are viewing a web page, press .
2 Tap Bookmarks > Add.
3 If desired, you can edit the name and the web address.
4 When you’re done, tap OK.

To bookmark a web page, you can also tap the icon to the right of the search and address field.
To open a bookmark
1. When the Browser is open, press 📚.
2. Tap Bookmarks.
3. Tap the bookmark you want to open.

To edit a bookmark
1. When the Browser is open, press 📚.
2. Tap Bookmarks.
3. Touch and hold a bookmark to open a menu.
4. Tap Edit bookmark.
5. Edit the name and the web address, as desired.
6. When you’re done, tap OK.

To delete a bookmark
1. When the Browser is open, press 📚.
2. Tap Bookmarks.
3. Touch and hold a bookmark to open a menu.
4. Tap Delete bookmark to delete the selected bookmark.

To bookmark a previously visited web page
1. When the Browser is open, press 📚.
2. Tap Bookmarks.
3. Tap the History tab, or the Most visited tab, to view a list of previously visited web pages.
4. Tap the 🌟 icon to the right of the web page you want to add as a bookmark.

Managing text and images

To find text within a web page
1. When you are viewing a web page, press 📚.
2. Tap More > Find on page.
3. Enter your search text. Matching characters appear highlighted in green.
4. Tap the left or right arrow to go to the previous or next matching item.
5. Tap ✕ to close the search bar.

To copy text from a webpage
1. Locate the text you want to copy.
2. Press 📚.
3. Tap More > Select text.
4. Place your finger at the start of the text you want to select and then drag it to the desired end point. The text you select becomes highlighted.
5. Tap the selected text to copy it.
6. To paste text into an email, text message or multimedia message, touch and hold the text field in the relevant application and tap Paste in the menu that appears.

To save an image from a web page
1. On the active web page, touch and hold the desired image until a menu appears.
2. Tap Save image.
3. If an SD card is inserted, you can select where you want to save the image. Select a location. If you prefer to making the current download setting the default setting, mark the Set as default download memory checkbox.

! If both the internal storage and the SD card are unavailable, the image cannot be saved.

Multiple windows

Your browser can run in up to eight different windows at the same time. You can, for example, log in to your webmail in one window and read today’s news in another. You can easily switch from one window to another.
To open a new browser window
1 When the Browser is open, press 📱.
2 Tap New window.

To open a link in a new browser window
1 Touch and hold a link until a menu appears.
2 Tap Open in new window.

To switch between browser windows
1 When the Browser is open, press 📱.
2 Tap Windows to see a list of all open windows.
3 Tap the window you want to switch to.

Downloading from the web
You can download applications and content when you browse the web using the web browser in your phone. Usually you have to touch a download link for the desired file and the download then starts automatically.

To view your downloaded files
1 When the Browser is open, press 📱.
2 Tap More > Downloads.

To cancel an ongoing download
1 When the Browser is open, press 📱.
2 Tap More > Downloads.
3 Mark the checkbox beside the downloading file you want to delete.
4 Tap Cancel.

Browser settings
You can change the browser settings and customize your browser view. For example, you can change the size of the text displayed to suit your needs, or you can clear cache, cookies, browser history, and other data linked to the websites you visit.

To change your browser settings
1 When the Browser is open, press 📱.
2 Tap More > Settings.

To change the text size on web pages
1 When the browser is open, press 📱.
2 Tap More > Settings > Text size.
3 Select a text size.

To clear the cache memory from your phone
1 When the browser is open, press 📱.
2 Tap More > Settings.
3 Find and tap Clear cache, then tap OK to confirm.

To clear your browser cookies
1 When the browser is open, press 📱.
2 Tap More > Settings.
3 Find and tap Clear all cookie data, then tap OK to confirm.

To clear your browser history
1 When the browser is open, press 📱.
2 Tap More > Settings.
3 Find and tap Clear history, then tap OK to confirm.
Auto-fitting web pages

The auto-fit option makes it easier for you to read large websites with text and images, such as news sites. For example, if you zoom in on a web page when auto-fit is enabled, the text automatically adjusts to the new screen size. If auto-fit is disabled, you might need to scroll sideways to read a full sentence.

To auto-fit web pages
1. When the Browser is open, press 📱.

Using the floating touch™ feature to navigate in your browser

Use the floating touch™ feature to navigate in the browser. Hover your finger about 1 cm (0.4 inches) above the screen to get the same effect as if you were using your computer mouse to navigate.

To enable the floating touch™ feature in your browser
1. When the browser is open, press 📱.
2. Tap More > Settings.
3. Find and mark the Enable floating touch checkbox.

💡 You will get the option to enable floating touch™ the first time you start your browser.

Plugin settings

You can adjust how a plugin functions on a web page. For example, you can enable plugins to get optimal visual effect when you view a web page. Alternatively, to increase browsing speed, you can configure your browser to only run plugins on demand, or you can disable plugins completely.

To enable plug-ins on demand
1. When the browser is open, press 📱.
2. Tap More > Settings.
3. Find and tap Enable plug-ins.
4. Mark the On demand checkbox.

💡 You may need to restart your browser for the setting to take effect.
Music

Get the most out of your music player. Listen to and organize music, audio books and podcasts that you have transferred to your memory card from a computer, or purchased and downloaded from online stores.

To make content easily available to the music player, you can use the Media Go™ application. Media Go™ helps transfer music content between a computer and a phone. For more information, see Connecting your phone to a computer on page 121.

Protecting your hearing

Listening to the music player or other media players for a prolonged period of time can damage your hearing, even when the volume is at a moderate level. To alert you to such risks, a volume level warning appears when the volume is too high, and after the music player is used for over 20 hours.

To turn off the volume level warning

• When ▲ appears, tap OK to dismiss the warning.
• Every time you restart your phone, the media volume is automatically set to a safe level.

Copying media files to your memory card

Copy all your favorite media content from computer to phone and start using your phone’s entertainment features to the full. It’s easy to transfer music, photos, videos, and other files. Just connect your phone to a computer with a USB cable and use either the computer’s file manager application or the Media Go™ application to transfer your files.

See Connecting your phone to a computer on page 121 for more general information about connecting your phone to a computer and transferring files.

Using the music player

To play audio content

1 From your Home screen screen, tap Media > to open the music player. If is not displayed, tap , then find and tap .
2 Tap MY MUSIC to open the music library.
3 Select a music category and browse to the track that you want to open.
4 Tap a track to play it.

Music player overview
Browse the music on your memory card
Tap the infinite button to find related information online and plug-ins from Android Market™
Album art (if available)
Go to the previous track in the current play queue, or rewind
Play/Pause button
Progress indicator – drag the indicator or tap along the line to fast forward or rewind
Total time length of the track
Go to the next track in the current play queue, or fast forward
Elapsed time of current track

To change tracks
• When a track is playing, tap or .
• When a track is playing, swipe the album art left or right.

To pause a track
• In the music player, tap .

To fast forward and rewind music
• In the music player, touch and hold or .
  You can also drag the progress indicator marker right or left.

To adjust the audio volume
• When the music player is playing a track, press the volume key.

To improve the sound quality using the equalizer
1 When the music player is open, press .
2 Tap Equalizer. If you want to adjust the sound manually, drag the frequency band buttons up or down.
3 If you prefer to adjust the sound automatically, tap and select a style.

To turn on the Surround sound
1 When the music player is open, press .
2 Tap Equalizer > More > Headphone surround.
3 Select a setting.
4 Tap OK.

To view the current play queue
• While a track is playing in the music player, tap the album art and then tap .

To minimize the music player
• When the music player is playing, press to go to the previous screen, or press to go to the Home screen. The music player stays playing in the background.

To return to the music player when it is playing in the background
1 Drag the status bar downwards to open the Notification panel.
2 Tap the track title to open the music player.
  Alternatively, you can press and hold and then tap to return to the music player.

To delete a track
1 Open the music player library and browse to the track you want to delete.
2 Touch and hold the track title, then tap Delete.
  You can also delete albums this way.
To share a track
1. When browsing your tracks in the music player library, touch and hold a track title.
2. Tap Send.
3. Select an available transfer method, and follow the on-screen instructions.

💡 You can also share albums and playlists this way.

❗ You might not be able to copy, send or transfer copyright-protected items.

To recommend a track on Facebook™
1. While the track is playing in the music player, tap to show that you “Like” it on Facebook™. If desired, add a comment in the comments field.
2. Tap Share to send the track to Facebook™. If the track is received successfully, you will get a confirmation message from Facebook™.

Searching for related content with the infinite button
When a track is playing in the music player, you can use the infinite button to instantly search for audio content that is related to the artist or track.

The infinite button launches a search for the following:
- music and karaoke videos on YouTube™
- artist info on Wikipedia™
- lyrics on Google.com

To search for related content using the infinite button
- When a track is playing in the music player, tap .

Overview of My music

1. Browse the music on your memory card
2. Picture of the currently playing artist (if available)
3. Search all tracks saved on your phone
4. Browse your music by artist
5. Categorize your music using SensMe™ channels
6. Browse your favorite playlists
7. Browse all playlists
8. Browse audio by track
9. Browse by album
Using My music to organize your tracks

Tap the My Music tab in the Music player to get an overview of all the tracks you’ve saved to your phone’s memory card. In My Music you can manage your albums and playlists, create shortcuts, and arrange music by mood and tempo.

To add a music track as a shortcut
1 In the music player, tap MY MUSIC.
2 Tap ☐, ☐, or ☐, and browse to the track you want to save as a shortcut.
3 Touch and hold the track title.
4 Tap Add as shortcut. The shortcut now appears in the My music main view.

To rearrange shortcuts
1 In the music player, tap MY MUSIC.
2 Touch and hold a shortcut until it magnifies and the phone vibrates, then drag the item to a new location.

To delete a shortcut
1 In the music player, tap MY MUSIC.
2 Touch and hold a shortcut until it magnifies and the phone vibrates, then drag the item to ☐.

!! You can’t delete the following tabs: Tracks, Albums, Artists, Playlists and SensMe™ channels.

To update your music with the latest information
1 In My music, press ☐.
2 Tap ☐. Your phone searches online and downloads the latest available album art and track information for your music.

!! Downloading music information also enables SensMe™ channels.

Categorizing your music using SensMe™ channels

The SensMe™ channels application helps you arrange your music by mood and tempo. SensMe™ groups all your tracks into twelve categories, or channels, so you can select music that matches your mood or suits the time of day.

To enable the SensMe™ channels application
1 In the music player, tap MY MUSIC.
2 Tap ☐ > ☐.

!! This application requires a mobile or Wi-Fi® network connection.

Playing music in random order

You can play tracks in playlists in random order. A playlist can be, for example, a playlist you have created yourself, or an album.

To play tracks in random order
1 In the music player, tap MY MUSIC.
2 Tap ☐ or ☐ and browse to an album or playlist.
3 Tap the album or playlist, to open it.
4 Tap ☐.

!! When an album or playlist is open, you can also tap ☐ and choose shuffle mode or repeat mode.
Playlists

The music player automatically creates Smart playlists on the playlist tab in the music player library. You can also create your own playlists from the music that is saved on your memory card.

In addition, you can install the Media Go™ application on a computer and use it to copy playlists from the computer to your phone’s memory card. For more information, see Connecting your phone to a computer on page 121.

To create your own playlists

1. In the music player, tap MY MUSIC.
2. To add an artist, album or a track to a playlist, touch and hold the name of the artist or the title of the album or track.
3. In the menu that opens, tap Add to playlist > Create new playlist.
4. Enter a name for the playlist and tap OK.

To add tracks to a playlist

1. When browsing the music player library, touch and hold the name of the artist or the title of the album or track you want to add.
2. Tap Add to playlist.
3. Tap the name of the playlist to which you want to add the artist, album or track. The artist, album or track is added to the playlist.

To play your own playlists

1. In the music player, tap MY MUSIC.
2. Tap .
3. Under Playlists, tap a playlist.
4. Tap a track to play it.

To remove a track from a playlist

1. In a playlist, touch and hold the title of the track you want to delete.
2. Tap Delete from playlist.

To delete a playlist

1. In the music player, tap MY MUSIC, then select Playlists.
2. Touch and hold the playlist you want to delete.
3. Tap Delete.
4. Tap Delete again to confirm.

Music player widget

The music player widget is a miniature application that gives you direct access to the music player from your Home screen. You need to add this widget to your Home screen before you can use it.

To add the music player widget to your Home screen

1. From your Home screen, press .
2. Tap Add > Widgets.
3. Tap .
Identifying music using TrackID technology

Use the TrackID™ music recognition service to identify a music track you hear playing in your surroundings. Just record a short sample of the song and you’ll get artist, title and album info within seconds. You can purchase tracks identified by TrackID™ and you can view TrackID charts to see what TrackID users around the globe are searching for. For best results, use TrackID™ technology in a quiet area. If you have problems using this application, see I cannot use Internet-based services on page 139.

The TrackID™ application and the TrackID™ service are not supported in all countries/regions, or by all networks and/or service providers in all areas.

To open the TrackID™ application
1. From your Home screen, tap 🎵.
2. Find and tap TrackID™ 🎵.

★ You can also use the TrackID™ widget to open the TrackID™ application.

To search for track information using TrackID™
1. When the TrackID™ application is open, hold the phone toward the music source.
2. Tap 🎵. If the track is recognized by the TrackID™ service, the results appear on the screen.

★ To return to the TrackID™ start screen, press 🔄.

To view your TrackID™ search history
• When the TrackID™ application is open, tap 📋.

To view TrackID™ charts
1. When the TrackID™ application is open, tap the 📊 tab. The first time you view a chart, it is set to your own region.
2. To see charts of the most popular searches in other regions, tap 📊 > Regions.
3. Select a country or region.

Using TrackID™ technology results

Track information appears when the TrackID™ application recognizes a track. You can choose to purchase the track, recommend it on Facebook™, or share it using email, Bluetooth or SMS. You can also get more information about the track’s artist, or search for related track content on YouTube™.

To buy a track using TrackID™ technology
1. When the TrackID™ application is open, tap a track title.
2. In the track information screen, tap Download.
3. Follow the instructions in your phone to complete your purchase.

★ The track purchase feature may not be supported in all countries/regions, or by all networks and/or service providers in all areas.

To recommend a track on Facebook™
1. When the TrackID™ application is open, tap a track title.
2. In the track information screen, wait for the 📌 tab to appear, then tap this tab.
3. Log in to Facebook and recommend the track.

★ The feature may not be supported in all countries/regions, or by all networks and/or service providers in all areas.
To share a track using TrackID™ technology
1. When the TrackID™ application is open, tap a track title.
2. In the track information screen, tap Share.
3. Select one of the available transfer methods.

! The track share feature may not be supported in all countries/regions, or by all networks and/or service providers in all areas.

Using TrackID™ to identify tracks on the FM Radio
You can use TrackID™ technology to identify music tracks as they play on your phone’s FM radio and share them on Facebook™.

To identify a track on the FM radio using TrackID™
1. Connect a headset or a set of headphones to your phone.
2. From your Home screen, tap .
3. To open the radio, find and tap FM radio . The available channels appear as you scroll through the frequency band.
4. While a song is playing on the FM radio, tap .
5. The TrackID™ application samples the song. If the track is recognized, you are presented with a track result, or a list of possible tracks.

! This feature is not supported in all countries/regions, or by all networks and/or service providers in all areas.

To share a radio track on Facebook™
1. Make sure Facebook integration is enabled.
2. Log in to Facebook™.
3. Open the FM radio.
4. When the FM radio plays a song you want to share, use the TrackID™ application to recognize the song.
5. When you are presented with a track result, tap to send details of the track to Facebook™. If desired, you can also enter a comment in the Facebook™ comment field.
Using the FM radio

The FM radio in your phone works like any FM radio. For example, you can browse and listen to FM radio stations and save them as favorites. You must connect a wired headset or headphones to the phone before you can use the radio. This is because the headset or headphones act as an antenna. After one of these devices is connected, you can then switch the radio sound to the phone speaker, if desired.

When you open the FM radio, available channels appear automatically. If a channel has RDS information, it appears a few seconds after you start listening to the channel.

To start the FM radio
1. Connect a headset or a set of headphones to your phone.
2. From your Home screen, tap 🎧.
3. Find and tap FM radio 🎧. The available channels appear as you scroll through the frequency band.

When you start the FM radio, available channels appear automatically. If a channel has RDS information, it appears a few seconds after you start listening to the channel.

**FM radio overview**

1. Tuned frequency
2. A saved favorite channel
3. Tuning dial
4. Launch the TrackID™ music recognition application
5. Move down the frequency band to the next favorite channel
6. Move up the frequency band to the next favorite channel
7. Save or remove a channel as a favorite
8. Move up the frequency band to search for a channel
9. Move down the frequency band to search for a channel
10. Radio on/off button

To move between radio channels
- Flick your finger left or right along the frequency band.
- Drag the tuning dial right or left.

**Using your favorite radio channels**

You can save the radio channels you most frequently listen to as favorites. By using favorites you can quickly return to a radio channel.
To save a channel as a favorite
1 When the radio is open, navigate to the channel that you want to save as a favorite.
2 Tap ☰, then select ☰.
3 Enter a name for the channel, then press Save.

To remove a channel as a favorite
1 When the radio is open, tap ☰.
2 Tap ☰ next to the channel you want to remove.
3 Tap Delete.

To move between favorite channels
* When the radio is open, tap ☰ or ☰.
! To move between favorites, you must first save at least two channels as favorites.

Making a new search for radio channels
If you have moved to a new location or the reception has improved in your current location, you can start a new scan for radio channels.

! Any favorites you have saved are not affected by a new scan.

To start a new search for radio channels
1 When the radio is open, press ☰.
2 Tap Search for channels. The radio scans the whole frequency band, and all available channels are displayed.

Switching the radio sound between devices
You can listen to the radio through a wired headset or through wired headphones. Once either device is connected, you can switch the sound to the phone speaker, if desired.

To switch the radio sound to the phone speaker
1 When the radio is open, press ☰.
2 Tap Play in speaker.

💡 To switch the sound back to the wired headset or headphones, press ☰ and tap Play in headphones.

Switching between mono and stereo sound mode
You can listen to your FM radio in either mono or stereo mode. In some situations, switching to mono mode can reduce noise and improve sound quality.

To switch between mono and stereo sound mode
1 When the radio is open, press ☰.
2 Tap Enable stereo sound.
3 To listen to the radio in mono sound mode again, press ☰ and tap Force mono sound.

Identifying radio tracks using TrackID™
Use TrackID™ technology to identify music tracks as they play on your phone’s FM radio.
To identify a song on the FM radio using TrackID™

1 While the song is playing on your phone’s FM radio, tap 🎧.
2 A progress indicator appears while the TrackID™ application samples the song. If successful, you are presented with a track result, or a list of possible tracks.
3 Press ↪ to return the FM Radio.

⚠️ The TrackID™ application and the TrackID™ service are not supported in all countries/regions, or by all networks and/or service providers in all areas.

Sharing the details of music you like on Facebook™

When you listen to music using the FM Radio, you can share details of tracks you like on Facebook. You need to be a Facebook user and must be logged in to Facebook.

To share details of music you like on Facebook™

1 When the FM radio is playing a music track that you want to share, find and tap 🎧.
2 Add a comment in the comment field, if desired.
3 Tap Share to send details of the track to Facebook.
4 Tap Cancel to return to the FM radio application.
5 Once you have posted a track to your Facebook account, a confirmation message appears on the FM radio screen.

⚠️ 🎧 will not appear on the FM radio screen if you are not logged in to Facebook.
Taking photos and recording videos

Your phone camera is equipped with the highly sensitive Exmor R™ sensor, which enables you to take sharp photos and videos even in low lighting conditions. With your phone camera, you can take regular 2D photos or you can shoot 3D photos in 3D Sweep Panorama mode and Sweep Multi Angle mode. Send your photos and videos to friends as multimedia messages, or upload them to a web service.

Camera controls overview

1. Camera key – Activate the camera/Take photos/Record videos
2. Switch between still and video camera
3. Display all settings
4. Take photos or record video clips
5. Go back a step or exit the camera
6. View photos and videos
7. Camera setting icons
8. Zoom in or out
9. Main camera screen

To activate the camera
• Press and hold down the camera key.

To close the camera
• Press  from the main camera screen.

Using the still camera

There are three ways to take photos with the still camera. You can press the camera key, tap the on-screen camera button, or touch a spot on the screen.

To take a photo by touching the screen
1. Activate the camera.
2. If the still camera is not selected, drag  to  .
3. To display all settings, press  .
4. Tap Capturing method and select Touch capture if it is not already selected.
5. Point the camera toward the subject.
6. To activate auto focus, touch and hold a spot on the screen. When the focus frame turns green, lift your finger to take the photo.

! Be careful not to touch  ,  or other icons when touching the screen to take a photo.
To take a photo by tapping the on-screen button

1. Activate the camera.
2. If the still camera is not selected, drag ⬋ to 📷.
3. To display all settings, press 📷.
4. Tap Capturing method and select On-screen button if it is not already selected.
5. Point the camera toward the subject.
6. Tap the on-screen button 📷. The photo is taken as soon as you release your finger.

To use the zoom function

- When the camera is open, press the volume key up or down to zoom in or out.

To use the still camera flash

1. When the camera is open, press 📷.
2. Tap Flash, and select your desired flash setting.
3. Take the photo.

To view your photos and videos

1. Open the camera, then tap a thumbnail at the bottom of the screen to open a photo or video.
2. Flick left or right to view your photos and videos. Videos are identified by 🎥.

💡 In step 1, you can also flick the thumbnails from right to left and then select the one you want to view.

To delete a photo

1. Open the photo you want to delete.
2. Press 📷, and then tap 📷.

💡 To delete a recently taken photo or video, you can also flick the thumbnail at the bottom right of the viewfinder, and then press and hold the item you want to delete.

Face detection

You can use face detection to bring an off-center face into focus. The camera automatically detects up to five faces, indicated by white frames. A yellow frame shows which face has been selected for focus. Focus is set to the face closest to the camera. You can also tap one of the frames to select which face should be in focus.

To turn on face detection

1. Activate the camera.
2. If the still camera is not selected, drag ⬋ to 📷.
3. Tap the icon on the top left, then select Normal.
4. To display all settings, press 📷.
5. Tap Focus mode > Face detection.

To take a photo using face detection

1. When the camera is open and Face detection is set, point the camera at your subject. Up to five faces can be detected, and each detected face is framed.
2. Tap the frame you want to select for focus. Do not tap if you want the camera to select focus automatically.
3. Press the camera key halfway down. A green frame shows which face is in focus.
4. To take the photo, press the camera key fully down.

Smile detection

Smile detection allows you to capture a face just as it smiles. The camera detects up to five faces and selects one face for smile detection and auto focus. A green frame shows which face is selected. When the selected face smiles, the camera automatically takes a photo.
To turn on smile detection
1 Activate the camera.
2 If the still camera is not selected, drag to .
3 To display all settings, press .
4 Tap Smile detection and select a smile level.

To take a photo using smile detection
1 When the camera is open and Smile detection is turned on, point the camera at your subject. Each detected face is framed in the viewfinder (not more than five faces).
2 The camera selects which face to focus on.
3 The face selected appears inside a green frame and the photo is taken automatically.
4 If no smile is detected, press the camera key to take the photo manually.

Adding the geographical position to your photos
Turn on geotagging to add the approximate geographical location (a geotag) to photos when you take them. The geographical location is determined either by wireless networks (mobile or Wi-Fi® networks) or GPS technology.

When appears on the camera screen, geotagging is turned on but the geographical position has not been found. When appears, geotagging is turned on and the geographical location is available, so your photo can get geotagged. When neither of these two symbols appear, geotagging is turned off.

To turn on geotagging
1 Activate the camera.
2 If the still camera is not selected, drag to .
3 Press , then tap Geotagging > On.
4 Tap OK to agree to enable GPS and/or wireless networks.
5 Check the options you want to select under My Location.
6 After you confirm your settings, press to return to the camera screen.
7 If appears on the camera screen, your location is available and your photo can get geotagged. If not, check your GPS and/or wireless network connection.

Using still camera settings

To adjust the still camera settings
1 Activate the camera.
2 If the still camera is not selected, drag to .
3 Tap one of the settings icons on the left of the screen.
4 To display all settings, press .
5 Select the setting you want to adjust, then edit as desired.

To customize the still camera settings panel
1 When the camera is open, press to display all settings.
2 Touch and hold the setting you want to move and drag it to the desired position.
   • If you drag the setting outside of the settings panel, the change is canceled.

Still camera settings overview

- Normal
- 3D Sweep Panorama
  3D Sweep Panorama lets you take wide-angle, panoramic photos of any scene in 3D. Just press the camera key and move the camera steadily from one side to the other.
- Sweep Multi Angle
In Sweep Multi Angle mode, the camera takes several images at different angles as you sweep across the scene. These images are saved together in an MPO (Multiple Picture Object) file.

**Sweep Panorama**
Use this setting to take wide-angle, panoramic photos. Just press the camera key and move the camera steadily from one side to the other.

**Focus mode**
The focus function controls which part of a photo should be sharp. When continuous autofocus is on, the camera keeps adjusting focus so the area within the white focus frame stays sharp.

- **Single autofocus**
  The camera automatically focuses on the selected subject. Continuous autofocus is on. Touch and hold the camera screen, the white focus frame turns green when the focus is set. The photo is taken when you release your finger.

- **Multi autofocus**
  The focus is automatically set on several areas of the image. Touch and hold the camera screen, the white focus frame turns green when the focus is set. The photo is taken when you release your finger. Continuous autofocus is off.

- **Face detection**
  The camera automatically detects up to five human faces, indicated by frames on the camera screen. The camera automatically focuses on the nearest face. You can also select which face to focus on by tapping it on the screen. Touch and hold the camera screen, the white focus frame turns green when the focus is set. The photo is taken when you release your finger. Face detection cannot be used for all scene types. Continuous autofocus is on.

- **Infinity**
  Use when taking photos from a distance. Focus is set on subjects far away. Subjects close to the camera may be blurred. Continuous autofocus is off.

- **Touch focus**
  Touch a specific area on the camera screen to set the area of focus. Continuous autofocus is off. Touch and hold the camera screen, the white focus frame turns green when the focus is set. The photo is taken when you release your finger.

![This setting is only available in Normal capturing mode.](image)

**Exposure value**
Determine the amount of light in the photo you want to take. A higher value indicates an increased amount of light.

![This setting is only available in Normal capturing mode.](image)

**Metering**
This function automatically determines a well-balanced exposure by measuring the amount of light striking the image you want to capture.

- **Center**
  Adjust the exposure to the center of the image.

- **Average**
  Calculate the exposure based on the amount of light striking the whole image.

- **Spot**
  Adjust the exposure in a very small part of image you want to capture.

![This setting is only available in Normal capturing mode.](image)

**White balance**
The white balance setting adjusts the color balance according to the lighting conditions.

- **Auto**
  Adjust the color balance automatically to the lighting conditions.
Incandescent
Adjusts the color balance for warm lighting conditions, such as under light bulbs.

Fluorescent
Adjust the color balance for fluorescent lighting.

Daylight
Adjust the color balance for sunny outdoor conditions.

Cloudy
Adjust the color balance for a cloudy sky.

⚠️ This setting is only available in Normal capturing mode.

Scenes
Use the Scenes feature to quickly set up the camera for common situations using pre-programmed scenes. The camera determines a number of settings for you to fit the selected scene, ensuring the best possible photo.

Off
The Scenes feature is off and photos can be taken manually.

Portrait
Use for portrait photos. Settings are optimized to give slightly softer skin tones.

Landscape
Use for landscape photos. The camera focuses on distant objects. When Landscape is selected, focus mode is changed to Infinity.

Night scene
Use when taking photos at night or in poorly lit environments (without the flash). Due to long exposure time, the camera must be held still or placed on a stable surface. When Night scene is selected, focus mode is changed to Infinity.

Night portrait
Use for portrait photos at night or in poorly lit environments (with or without the flash). Due to long exposure time, the camera must be held still or placed on a stable surface.

Beach and snow
Use in bright environments to avoid underexposed photos.

Sports
Use for photos of fast-moving objects. Short exposure time minimizes motion blurring.

Party
Use for indoor photos in poorly lit environments. This scene picks up indoor background lighting or candlelight. Due to long exposure time, the camera must be held still or placed on a stable surface.

Document
Use for photos of text or drawings. Gives the photo increased, sharper contrast.

⚠️ This setting is only available in Normal capturing mode.

ISO
You can reduce image blurring caused by dark conditions or moving subjects by increasing the ISO sensitivity.

Auto
Sets the ISO sensitivity automatically.

100
Sets the ISO sensitivity to 100.

200
Sets the ISO sensitivity to 200.

400
Sets the ISO sensitivity to 400.

800
Sets the ISO sensitivity to 800.

- This setting is only available in Normal capturing mode.

**Flash**

Use the flash to take photos when lighting conditions are poor or when there is a backlight.

- **Auto**
  The camera automatically determines if the lighting conditions require the use of a flash.

- **Fill flash**
  Use this setting when the background is brighter than the subject. This removes unwanted dark shadows.

- **Off**
  The flash is turned off. Sometimes photo quality can be better without the flash, even if lighting conditions are poor. Taking a good photo without using the flash requires a steady hand. Use the self-timer to avoid blurred photos.

- **Red-eye reduction**
  Reduces the red color of eyes when taking a photo.

**Resolution**

Choose between several picture sizes and aspect ratios before taking a photo. A photo with a higher resolution requires more memory.

- **5MP 4:3**
  5 megapixel picture size with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays or print in high resolution.

- **3MP 16:9**
  3 megapixel picture size with 16:9 aspect ratio. A high resolution widescreen format. Has a higher resolution than full HD. Suitable for photos you want to view on widescreen displays.

- **2MP 4:3**
  2 megapixel picture size with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays.

- **2MP 16:9**
  2 megapixel picture size with 16:9 aspect ratio. Suitable for photos you want to view on widescreen displays.

**Self-timer**

With the self timer you can take a photo without holding the phone. Use this function to take self-portraits, or group photos where everyone can be in the photo. You can also use the self timer to avoid shaking the camera when taking photos.

- **On (10 sec.)**
  Set a 10-second delay from when you tap the camera screen until the photo is taken.

- **On (2 sec.)**
  Set a 2-second delay from when you tap the camera screen until the photo is taken.

- **Off**
  The photo is taken as soon as you tap the camera screen.

**Smile detection**

Use the smile detection function to determine what kind of smile the camera reacts to before taking a photo.

- **Big smile**
  Only take a photo when a big smile is detected.

- **Average smile**
  Take a photo when an average smile is detected.

- **Small smile**
  Take a photo when only a slight smile is detected.

- **Off**
  Smile detection function is off.
Geotagging

Tag photos with details of where you took them.

On
When geotagging is turned on, the approximate geographical location is added to photos when you take them. To use geotagging, you must enable location features from the Settings menu. See Using location services to find your position on page 124. For geotags to be added to a photo, the location must be determined before you take the photo. Your location is determined when 📍 appears on the camera screen. When the phone is searching for your position, 🔍 appears.

Off
When geotagging is turned off, you cannot view the location where you took a photo.

Shutter sound

Choose to have or not to have the sound when capturing a photo.

Capturing method

Select the method you use to take photos.

On-screen button
Take a photo by tapping the on-screen button on the camera screen. The photo is taken as soon as you release your finger.

Touch capture
Identify a particular focus area by touching the camera screen with your finger. The photo is taken as soon as you release your finger. This applies only when focus mode is set to touch focus.

Camera key only
Take a photo only using the hardware camera key. The photo is taken as soon as you release your finger.

Quick launch

Quick launch settings let you activate the camera from sleep mode by pressing and holding down the camera key.

Launch and capture
By pressing and holding down the camera key, the first photo is captured immediately after the camera is launched from sleep mode.

Launch only
By pressing and holding down the camera key, the camera is launched from sleep mode.

Off
While the phone is in sleep mode, the camera cannot be launched, even when you press and hold down the camera key.

Tips on using the camera

Rule of thirds
Don’t place your subject in the middle of the frame. By placing it a third of the way in, you achieve a better result.

Hold it steady
Avoid blurry photos by holding the camera steady. Try to steady your hand by leaning it against a solid object.

Get closer
By getting as close as possible to your subject, you can fill the camera screen view with your subject.

Consider variety
Think about different angles, and move towards the subject. Take some vertical photos. Try different positions.
Use a plain background
A plain background helps highlight your subject.

Keep your lens clean
Cell phones are used in all kinds of weather and places, and carried in pockets and bags. This results in the camera lens becoming dirty and covered with fingerprints. Use a soft cloth to clean the lens.

Using the video camera

To record a video using the camera key
1 Activate the camera.
2 If the video camera is not selected, drag to 📹.
3 To start recording a video, press the camera key.
4 To stop recording, press the camera key again.

💡 Shoot your videos in landscape orientation to get the best results.

To record a video by tapping the screen
1 Activate the camera.
2 If the video camera is not selected, drag to 📹.
3 To display all settings, press 📈.
4 Tap Capturing method > Touch capture if it is not already selected.
5 Tap the camera screen to start recording.
6 Tap the camera screen to stop recording.

💡 Shoot your videos in landscape orientation to get the best results.

To record a video by tapping the on-screen button
1 Activate the camera.
2 If the video camera is not selected, drag to 📹.
3 To display all settings, press 📈.
4 Tap Capturing method, then select On-screen button if it is not already selected.
5 Point the camera toward the subject.
6 Tap 📹 to start recording.
7 Tap 📹 to stop recording.

💡 Shoot your videos in landscape orientation to get the best results.

To play recorded videos
1 Activate the camera.
2 If the video camera is not selected, drag to 📹.
3 Tap the thumbnails on the bottom of the screen.
4 Flick left or right to browse all photo and video files. Videos are identified by 📹.
5 Tap 📹 to play the video.
6 To stop playing the video, tap the camera screen.

💡 You can also flick the thumbnails from right to left, and select the one you want to view.

To delete a recorded video
1 Browse to the video that you want to delete.
2 Press 📹, then tap 🗑️.

💡 To delete a recently taken photo or video, you can also flick the thumbnail at the bottom right of the viewfinder, and then press and hold the item you want to delete.
Using video camera settings

To adjust video camera settings
1 Activate the camera.
2 If the video camera is not selected, drag to .
3 Tap one of the settings icons on the left of the screen.
4 To display all settings, press .
5 Select the setting you want to adjust, then make your changes.

To customize the video camera settings panel
1 When the video camera is open, press to display all settings.
2 Touch and hold the setting you want to move and drag it to the desired position.

If you drag the setting outside of the settings panel, the change is canceled.

Video camera settings overview

Scenes
The Scenes feature helps you to quickly set up the camera for common situations using preprogrammed scenes. The camera determines a number of settings for you to fit the selected scene, ensuring the best possible video.

Off  The Scenes feature is off and photos can be taken manually.
Portrait  Use for portrait videos. Settings are optimized to give slightly softer skin tones.
Landscape  Use for videos of landscapes. The camera focuses on distant objects. When Landscape is selected, focus mode is changed to Single autofocus.
Night  When turned on, light sensitivity is increased. Use in poorly lit environments. Videos of fast moving objects may get blurred. Hold your hand steady, or use a support. Turn off night mode when lighting conditions are good, to improve the video quality.
Beach and snow  Use in bright environments to avoid underexposed videos.
Sports  Use for videos of fast-moving objects. Short exposure time minimizes motion blurring.
Party  Use for indoor videos in poorly lit environments. This scene picks up indoor background lighting or candlelight. Videos of fast moving objects may get blurred. Hold your hand steady, or use a support.

Photo light
Use the light to take photos when lighting conditions are poor or when there is a backlight

On

Off  Sometimes the video quality can be better without a light, even if lighting conditions are poor.

Metering
This function automatically determines a well-balanced exposure by measuring the amount of light striking the image you want to capture.

Center  Adjust the exposure to the center of the image.
Average  Calculate the exposure based on the amount of light striking the whole image.
Spot
Adjust the exposure in a very small part of image you want to capture.

This setting is only available in Normal capturing mode.

### Capturing method
Select the method you use to take photos.

- **On-screen button**
  Record a video by using the on-screen button on the camera screen.

- **Touch capture**
  Identify a particular focus area by touching the camera screen with your finger.

- **Camera key only**
  Record a video by using only the hardware camera key.

### Focus mode
The focus setting controls which part of a video should be sharp. When continuous autofocus is on, the camera keeps adjusting focus so that the area within the white focus frame stays sharp.

- **Single autofocus**
  The camera automatically focuses on the selected subject. Continuous autofocus is on.

- **Face detection**
  The camera automatically detects up to five human faces, indicated by frames on the screen. The camera automatically focuses on the nearest face. You can also select which face to focus on by tapping it on the screen. When you tap the camera screen, a green frame shows which face is selected and in focus. Face detection cannot be used for all scene types. Continuous autofocus is on.

- **Infinity**
  Use when recording videos from a distance. Focus is set on subjects far away. Subjects close to the camera may be blurred.

### Video size
Adjust the video size for different formats

- **HD 720p**
  HD (High Definition) format with 16:9 aspect ratio. 1280x720 pixels.

- **Full Wide VGA**
  Full Wide VGA format with 16:9 aspect ratio. 864x480 pixels.

- **VGA**
  VGA format with 4:3 aspect ratio. 640x480 pixels.

- **QVGA**
  Quarter VGA format with 4:3 aspect ratio. 320x240 pixels.

- **Multimedia message**
  Record videos suitable for sending in multimedia messages. The recording time of this video format is limited to fit in a multimedia message.

### Self-timer
With the self timer you can record a video without holding the phone. Use it to record group videos where everyone can be in the video. You can also use the self-timer to avoid shaking the camera when recording videos.

- **On (10 sec.)**
  Set a 10-second delay from when you tap the camera screen until the video begins to record.

- **On (2 sec.)**
  Set a 2-second delay from when you tap the camera screen until the video begins to record.

- **Off**
  The video begins to record as soon as you tap the camera screen.
Exposure value

This setting allows you to determine the amount of light in the image you capture. A higher value indicates an increased amount of light.

White balance

The white balance setting adjusts the color balance according to the lighting conditions.

- Auto
  Adjust the color balance automatically to the lighting conditions.

- Incandescent
  Adjusts the color balance for warm lighting conditions, such as under light bulbs.

- Fluorescent
  Adjust the color balance for fluorescent lighting.

- Daylight
  Adjust the color balance for sunny outdoor conditions.

- Cloudy
  Adjust the color balance for a cloudy sky.

Image stabilizer

When recording a video, it can be difficult to hold the phone steady. The stabilizer helps you by compensating for small movements of the hand.

- On
  You can record a video with the stabilizer turned on.

- Off
  You can record a video with the stabilizer turned off.

Microphone

Select whether to pick up the surrounding sound when recording videos.

- On

- Off

Shutter sound

Select to turn on or turn off the shutter sound when you record a video.
3D camera

The 3D camera helps you take wide-angle, panoramic photos that capture more of the scene and add depth to the subject. 3D Sweep Panorama photos can be played back on a TV that supports 3D. In Sweep Multi Angle mode, the camera takes several images at different angles as you sweep across the scene. These images are saved together in an MPO (Multiple Picture Object) file. When you tilt the camera during playback, the camera sensor detects motion and displays the image in a 3D-like view on the camera screen.

To activate the 3D Camera
• From your Home screen, tap , then find and tap .

3D Camera overview

1 Switch between still and video camera
2 Take photos or record video clips
3 Directional arrow – helps you pan the camera
4 View photos and videos
5 Settings bar

To take a photo in 3D Sweep Panorama mode
1 Activate the 3D camera.
2 Tap the icon on the upper left of the screen, then select 3D Sweep Panorama if it is not already selected.
3 Press the camera key halfway down to lock the focus.
4 Press the camera key fully down, then pan the camera from left to right in a steady horizontal movement.

Tips for taking 3D Sweep Panorama photos
Note these limitations when taking 3D photos:
• 3D shooting is not suitable: when the subject is large or not stationary; when the main subject is too close to the camera; and when the subject offers little contrast, such as the sky, a sandy beach, or a lawn.
• 3D images consist of several JPEG images and associated MPO files. If you delete an MPO file on the camera (while it is connected to a computer), you will no longer be able to view the associated JPEG image.
• If you cannot pan the camera across the entire subject within the given shooting time, a gray area occurs in the composite image. If this happens, move the camera faster to record a full 3D image.
• Under low light conditions, images may be blurred. To get the best results, shoot images in bright outside light.
• Under lights that flicker, such as fluorescent lights, 3D shots may not be successful.
• When you press the camera key halfway down, you set the Auto Focus lock and the Auto Exposure lock. If the brightness, focus and other conditions change considerably between the time you set these two locks and the time you press the camera key fully down to take the shot, the shot might not be successful.
• The camera may cancel 3D shooting in the following situations: you pan the camera too quickly; you shake the camera too much; you pan the camera in the reverse direction.
To take a photo in a Sweep Multi Angle mode
1 Activate the 3D camera.
2 Tap the icon on the upper left of the screen, then select **Sweep Multi Angle**.
3 Press the camera key halfway down to lock the focus.
4 Press the camera key fully down, then pan the camera from left to right in a steady horizontal movement.

To take a photo in Sweep Panorama mode
1 Activate the 3D camera.
2 Tap the icon on the upper left of the screen, then select **Sweep Panorama**.
3 Tap  and select the direction to pan.
4 Press the camera key halfway to lock the focus and exposure.
5 Press the camera key fully down, then pan the camera steadily in the direction of the moving arrow.

**Tips for taking Sweep Panorama photos (2D)**

Note these limitations when you take Sweep Panorama photos:

- If you cannot pan the phone across the entire subject within the given time, a gray area occurs in the composite image. If this happens, move the camera faster to record a full panorama image.
- Since several images are stitched together, the stitched part does not always record smoothly.
- Under low light conditions, panorama images can be blurred or of low quality.
- Under lights that flicker, such as fluorescent lights, the brightness or color of the combined images may not be consistent.
- Sweep Panorama mode is not suitable for the following situations: when subjects are moving or are too close to the camera; when target images offer little contrast, such as photos of skies, sand beaches, or lawns; and when images change constantly, such as waves or waterfalls.
- The camera can cancel shooting in the following situations: you pan the camera too quickly; you shake the camera too much; you pan the camera in the reverse direction.
Viewing photos and videos in Gallery

Use Gallery to view photos and play videos that you’ve taken with your phone camera, or to view similar content that you’ve downloaded or copied to the memory card. In Gallery, you can also view photos and videos you’ve uploaded to an online. In Gallery, you can also view photos and videos you’ve uploaded to an online service, for example, to a Picasa™ web album or to Facebook™. From Gallery, you can also share your favorite photos and videos with friends by using Bluetooth™ wireless technology, email or messaging. And you can perform basic editing tasks on photos and set them as wallpaper or contact pictures. For more information, see Connecting your phone to a computer on page 121.

Mobile BRAVIA® Engine

Sony’s Mobile BRAVIA® Engine technology improves the viewing quality of photos and videos after you take them, giving you clearer, sharper, and more natural images. Mobile BRAVIA Engine is turned on by default, but you can turn it off if you want to reduce battery consumption.

To turn off Mobile BRAVIA® Engine
1. From your Home screen, tap settings.
2. Find and tap Settings > Display.
3. Unmark the Mobile BRAVIA Engine checkbox if it is already checked.

To open Gallery and view your albums
1. From your Home screen, tap Gallery.
2. Find and tap Gallery. Photos and videos on your memory card, including those you’ve taken with the camera and those you’ve downloaded from the web or other locations, appear in albums.

💡 If the screen orientation does not change automatically when you turn the phone sideways, mark the Auto-rotate screen checkbox under Settings > Display.

Working with albums

You can rearrange your photos and videos within albums as well as move content between albums. You can also upload content from your Gallery albums to online services such as Picasa™ and Facebook™, and you view content from such online services in Gallery.

To open an album in Gallery
1. From your Home screen, tap 📷.
2. Find and tap Gallery.
3. Tap the album you want to view. The album opens displaying its photo and video content in a chronologically ordered grid. The name of the album appears at the top of the screen.

To view photos and videos in Gallery
1. From your Home screen, tap 📷.
2. Find and tap Gallery.
3. Tap an album. Photos and videos are displayed in a chronologically ordered grid. Videos are indicated by 🎥.
4. Tap a photo or video to view it.
5. Flick left to view the next photo or video. Flick right to view the previous photo or video.

💡 If the screen orientation does not change automatically when you turn the phone sideways, mark the Auto-rotate screen checkbox under Settings > Display.
To view Facebook™ photos in Gallery

1. Make sure you are signed in to Facebook™.
2. From your Home screen, tap Gallery.
3. Find and tap Gallery.
4. Tap any album showing the icon. The first time you tap a Facebook™ album your Facebook™ photos are copied to Gallery.
5. Photos are displayed in a chronologically ordered grid. Tap a photo to view it.
6. In the photo viewer, flick left to view the next photo or video. Flick right to view the previous photo or video.
7. Return to the main Gallery screen at any time by tapping at the top left of the screen.

To change how the contents of an album are displayed in Gallery

1. When viewing an album in Gallery, drag the album view switch to the right to view the contents of the album in stacks.
2. Drag the album view switch to the left to view the album contents in a chronological grid.

Working with albums in Gallery

In addition to working with whole albums and with individual photos, you can select one or more photos or videos in an album to work on them in batches, for example, to send a few photos from an album to a friend.

To work with batches of photos or videos in Gallery

1. From your Home screen, tap Gallery.
2. Find and tap Gallery.
3. Open the album containing the content that you want to work with.
4. To activate selection mode, touch and hold one of the items that you want to work with.
5. Check or uncheck the items that you want to work with.
6. Press , then use the tools in the toolbar to work with your selected items.

To share an album in Gallery

! If you share an album, do not delete the original copy of the album before the items in the album are completely sent.

1. From the main Gallery screen, touch and hold an album that you want to work with. Selection mode is now activated.
2. Check the albums you want to share, then press .
3. Tap Share.
4. In the menu that opens, tap the application that you want to use to share the selected albums.

To delete an album in Gallery

1. From the main Gallery screen, touch and hold an album that you want to work with. Selection mode is now activated.
2. Check the albums that you want to delete, then press .
3. Tap Delete. In the dialog that opens, tap Delete again.

Working with photos in Gallery

You can edit and reorganize your photos in Gallery. For example, you can crop photos, use them as contact pictures and as wallpaper.

To zoom a photo

• When you are viewing a photo, double-tap the screen to zoom in. Double-tap again to zoom out.
• When you are viewing a photo, spread two fingers apart to zoom in, or pinch two fingers together to zoom out.
To watch a slideshow of your photos
1 From your Home screen, tap 📷.
2 Find and tap Gallery.
3 Tap an album to open it, then tap a photo and press 🎬.
4 In the toolbar at the bottom of the screen, tap Slideshow.
5 Tap a photo to end the slideshow.

To rotate a photo
1 When you are viewing a photo, press 🎬.
2 Tap More, then tap either Rotate Left or Rotate Right. The photo is saved in the new orientation.

To use a photo as a contact picture
1 When you are viewing a photo in the photo viewer, press 🎬.
2 In the toolbar at the bottom of the screen, tap Set as > Contact picture.
3 Select the contact you want to associate with the photo.
4 Crop the photo, if required.
5 Tap Save.

To use a photo as wallpaper
1 When you are viewing a photo in the photo viewer, press 🎬.
2 In the toolbar at the bottom of the screen, tap Set as > Wallpaper.
3 Crop the photo, if required.
4 Tap Save.

To crop a photo
1 When you are viewing a photo in the photo viewer, press 🎬.
2 In the toolbar, tap More > Crop.
3 To adjust the crop frame, touch and hold the edge of the crop frame. When crop arrows appear, drag inward or outward to resize the frame.
4 To resize all sides of the crop frame at the same time, touch and hold one of the four corners to make the arrows appear, then drag the corner accordingly.
5 To move the crop frame to another area of the photo, touch and hold inside the frame, then drag it to the desired position.
6 To save a copy of the photo as you cropped it, tap Save. The original uncropped version remains on your phone’s memory card.

To share a photo
1 When you are viewing a photo in the photo viewer, press 🎬 if no controls are displayed.
2 In the toolbar at the bottom of the screen, tap Share.
3 Select one of the available transfer methods.

To delete a photo
1 When you are viewing a photo in the photo viewer, press 🎬.
2 In the toolbar at the bottom of the screen, tap Delete.
3 In the dialog that opens, tap Delete.

Viewing your photos on a map
If you enabled location detection when taking photos, you can use the information gathered at a later stage. For example, you can view your photos on a map and show friends and family where you were when you took the photo. Adding location information is also referred to as geotagging. To geotag your photos, you first need to enable location detection in your phone. You can select to use either GPS satellites or wireless networks, or both, to find your position.

For more information, see Using location services to find your position on page 124

To enable location detection
1 From your Home screen, press ‘Settings’.  
2 Tap Settings > Location & security.  
3 Mark the Use GPS satellites and/or Use wireless networks checkboxes.  

To view geotagged photos on a map  
1 When you are viewing a photo that you have geotagged, press ‘Settings’.  
2 Tap More > Show on map.  

**Working with videos**  
Use Gallery to watch videos that you’ve taken with the camera, downloaded, or copied to your memory card. You can also share your videos with friends, or upload them to YouTube™.  

To play a video  
1 In Gallery, browse to the album containing the video that you want to play.  
2 Tap the video to play it.  
3 If the playback controls are not displayed, tap the screen to display them. To hide the controls, tap the screen again.  

To pause a video  
1 When a video is playing, tap the screen to display the controls.  
2 Tap ‘Play’.  

To fast forward and rewind a video  
1 When a video is playing, tap the screen to display the controls.  
2 Drag the progress bar marker left to rewind, or right to fast forward.  

💡 Alternatively, you can tap ‘Fast Forward’ or ‘Rewind’.  

To adjust the volume of a video  
• Press the volume key.  

To share a video  
1 Open a Gallery album containing a video.  
2 To activate selection mode, touch and hold an item that you want to work with.  
3 Check the video or videos that you want to share.  
4 Press ‘Share’.  
5 Tap Share.  
6 In the menu that opens, tap the application that you want to use to share the selected video, then follow the relevant steps to send it.  

⚠ You might not be able to copy, send or transfer copyright-protected items. Also, some items may not send if the file size is too large.  

To delete a video  
1 Open a Gallery album containing a video.  
2 To activate selection mode, touch and hold an item that you want to work with.  
3 Check the video or videos that you want to delete.  
4 Press ‘Delete’, then tap Delete.  
5 In the dialog that opens, tap Delete.
Viewing photos in 3D Album

In 3D Album you can view and play all photos taken with your 3D camera. You can also play photos that you’ve taken using Sweep Multi Angle mode and view them from multiple angles.

To view your 3D photos in 3D Album
1. From your Home screen, tap 📱.
2. Find and tap 3D Album.
3. Tap a 3D photo.
4. Flick left to view the next 3D photo in 3D Album. Flick right to view the previous 3D photo.

To play a 3D photo in 3D Album
1. Open the 3D photo. If no controls are displayed, tap the screen.
2. Tap 🔁.

⚠️ You can only play 3D photos that have been captured in the standard panorama image size.

To zoom a 3D photo in 3D Album
• When you view a 3D photo in 3D Album, double-tap the photo to zoom in or out.
💡 To zoom in or out, you can also pinch two fingers together or spread them apart. Then drag the 3D photo to view different parts of it.

To view multi-angle photos in 3D Album
1. From your Home screen, tap 📱.
2. Find and tap 3D Album.
3. Tap 📷. All multi-angle photos are displayed.
4. Tap a photo.
5. Tilt the phone right or left to view the photo from different angles.

Managing your photos in 3D Album

Use 3D Album to upload your 3D photos to online web albums. For example, if you’re a Facebook™ user, you can upload your photos in 3D Album to your Facebook™ account. You can also use 3D Album to delete photos.

To share a 3D photo in 3D Album
1. When you view a 3D photo in 3D Album, tap the 3D photo if no controls are displayed.
2. Tap 🔁.
3. Select one of the available transfer methods.

To delete a 3D photo in 3D Album
1. When you view a 3D photo in 3D Album, tap the photo if no controls are displayed.
2. Tap 📱, then tap OK.
Bluetooth™ wireless technology

Use the Bluetooth™ function to send files to other Bluetooth™ compatible devices, or to connect to handsfree accessories. Turn on the Bluetooth™ function in your phone and create wireless connections to other Bluetooth™ compatible devices such as computers, handsfree accessories, and phones. Bluetooth™ connections work better within a 10 meter (33 foot) range, with no solid objects in between. In some cases you have to manually pair your phone with other Bluetooth™ devices. Remember to set your phone to "discoverable" if you want other Bluetooth™ devices to detect it.

! Interoperability and compatibility among Bluetooth™ devices can vary.

To turn on the Bluetooth™ function and make your phone visible
1 From your Home screen, tap 🔍.
2 Find and tap Settings > Wireless & networks.
3 Mark the Bluetooth checkbox. 📡 appears in the status bar.
4 Tap Bluetooth settings.
5 Mark the Discoverable checkbox. The phone will now be visible to other devices for 120 seconds.

Naming your phone

You can give your phone a name. This name is shown to other devices after you have turned on the Bluetooth™ function and your phone is set to visible.

To give your phone a name
1 Make sure the Bluetooth™ function is turned on.
2 From your Home screen, tap 🔍.
3 Find and tap Settings > Wireless & networks > Bluetooth settings > Device name.
4 Enter a name for your phone.
5 Tap OK.

Pairing with another Bluetooth™ device

When you pair your phone with another device, you can, for example, connect your phone to a Bluetooth™ headset or a Bluetooth™ car kit and use these devices to make and receive calls.

Once you pair your phone with a Bluetooth™ device, the phone will remember this pairing. When pairing the phone with a Bluetooth™ device, you may need to enter a passcode. Your phone will automatically try the generic passcode 0000. If this does not work, refer to your Bluetooth™ device documentation for the device passcode. You do not need to re-enter the passcode the next time you connect to a paired Bluetooth™ device.

Some Bluetooth™ devices, for example, most Bluetooth™ headsets, require you to both pair and connect with the other device.

You can pair your phone with several Bluetooth™ devices, but you can only connect to one Bluetooth™ profile at the same time.
To pair your phone with another Bluetooth™ device
1 From the Home screen, tap  
2 Find and tap Settings > Wireless & networks > Bluetooth settings.
3 Tap Scan for devices. The Bluetooth™ devices found will be listed under Bluetooth devices.
4 Tap the Bluetooth™ device that you want to pair with your phone.
5 Enter a passcode, if required.
6 The phone and the Bluetooth™ device are now paired. With some devices you also need to connect before you can start using them. The status of the pairing and connection is shown below the name of the Bluetooth™ device in the Bluetooth devices list.

! Make sure that the device you want to pair your phone with has the Bluetooth™ function activated and Bluetooth™ visibility turned on.

To connect your phone to another Bluetooth™ device

! Some Bluetooth™ devices, for example, most Bluetooth™ headsets, require you to first pair and then connect with other Bluetooth™ devices before a successful connection can be established.

1 From the Home screen, tap  
2 Find and tap Settings > Wireless & networks > Bluetooth settings.
3 In the Bluetooth devices list, tap the Bluetooth™ device to which you want to connect your phone.

To unpair a Bluetooth™ device
1 From the Home screen, tap  
2 Find and tap Settings > Wireless & networks > Bluetooth settings.
3 In the Bluetooth devices list, touch and hold the name of the paired but not connected Bluetooth™ device.
4 Tap Unpair.

Sending and receiving items using Bluetooth™ technology

Share items with other Bluetooth™ compatible devices such as phones or computers. You can send and receive several kinds of items using the Bluetooth™ function, such as:

- Photos and videos
- Music and other audio files
- Contacts
- Web pages

To send items using Bluetooth™
1 Receiving device: Make sure the Bluetooth™ device you want to send the item to has Bluetooth™ turned on and is in discoverable mode.
2 In your phone, open the application which contains the item you want to send and scroll to the item.
3 Depending on the application and the item you want to send, you may need to, for example, touch and hold the item, open the item or press . Other ways to send an item may exist.
4 Select a share or send menu item.
5 In the menu that appears, select Bluetooth.
6 Turn on Bluetooth™, if you are asked to do so.
7 Under Bluetooth devices, tap the name of the receiving device.
8 Receiving device: If asked, accept the connection.
9 If asked, enter the same passcode on both devices, or confirm the suggested passcode.
10 Receiving device: Accept the incoming item.
To receive items using Bluetooth™

1. From your Home screen, tap ⬇️.
3. Mark the Bluetooth checkbox. 📞 appears in the status bar.
4. Tap Bluetooth settings.
5. Mark the Discoverable checkbox. The phone is now visible to other devices for 120 seconds.
6. The sending device should now start sending data to your phone.
7. If prompted, enter the same passcode on both devices, or confirm the suggested passcode.
8. When you are notified of an incoming file to your phone, drag the status bar downward and tap the notification to accept the file transfer.
9. Tap Accept to start the file transfer.
10. To view the progress of the transfer, drag the status bar downward.
11. To open a received item, drag the status bar downward and tap the relevant notification.

⚠️ Your phone must have a memory card inserted to be able to receive items using Bluetooth™ wireless technology.
Connecting your phone to a computer

Connect your phone to a computer and start transferring pictures, music and other file types. The easiest ways to connect are using a USB cable or Bluetooth wireless technology.

When you connect your phone to the computer using a USB cable, you are prompted to install the PC Companion application on your computer. PC Companion helps you access additional computer applications to transfer and organize media files, update your phone, synchronize phone content, and more.

⚠️ You might not be able to transfer some copyright-protected material between your phone and computer.

Transferring and handling content using a USB cable

Use a USB cable connection between a computer and your phone for easy transfer and management of your files. Once the two devices are connected, you can drag and drop content between them using the computer’s file explorer. If you’re transferring music, video, pictures, or other media files to your phone, it’s best to use the Media Go™ application on your computer. Media Go™ converts media files so you can use them on your phone.

To transfer content between a phone and computer using a USB cable
1. Using a USB cable, connect your phone to a computer. Internal storage connected appears in the status bar.
2. **Computer**: Open Microsoft® Windows® Explorer from the desktop and wait until your phone’s memory card appears as an external disk in Microsoft® Windows® Explorer.
3. **Computer**: Drag and drop the desired files between your phone and the computer.

Transferring files using Media transfer mode via Wi-Fi®

You can transfer files between your phone and other MTP compatible devices, such as a computer, using a Wi-Fi® connection. Before connecting, you first need to pair the two devices. If you’re transferring music, video, pictures, or other media files between your phone and a computer, it’s best to use the Media Go™ application on the computer. Media Go™ converts media files so you can use them on your phone.

⚠️ In order to use this feature, you need a Wi-Fi® enabled device that supports Media transfer, for example, a computer running Microsoft® Windows Vista® or Windows® 7.

To pair your phone wirelessly with a computer using Media transfer mode
1. Make sure Media transfer mode is enabled on your phone. It is normally enabled by default.
2. Connect your phone to the computer using a USB cable.
3. **Computer**: Once the phone name appears on the screen, click Network configuration and follow the instructions to pair the computer.
4. When you are finished pairing, disconnect the USB cable from both devices.

⚠️ The above instructions only work if Windows® 7 is installed on your computer and the computer is connected to a Wi-Fi® Access Point via a network cable.
To connect paired devices wirelessly in Media transfer mode

1. Make sure Media transfer mode is enabled on your phone. It is normally enabled by default.
2. From your Home screen, tap.
3. Find and tap Settings > Xperia™ > Connectivity.
4. Tap the paired device that you want to connect to under Trusted devices.
5. Tap Connect.

! Make sure your phone’s Wi-Fi® function is turned on.

To disconnect a wirelessly paired device in Media transfer mode

1. From your Home screen, tap.
2. Find and tap Settings > Xperia™ > Connectivity.
3. Tap the paired device that you want to disconnect from under Trusted devices.
4. Tap Disconnect.

To remove a pairing with another device

1. From your Home screen, tap.
2. Find and tap Settings > Xperia™ > Connectivity.
3. Tap the paired device that you want to remove.
4. Tap Forget.

PC Companion

PC Companion is a computer application that gives you access to additional features and services which help you transfer music, video, and pictures to and from your phone. You can also use PC Companion to update your phone and get the latest software version available. The installation files for PC Companion are saved on your phone and the installation is launched from the phone when you connect it to a computer via USB cable.

You need an internet connected computer running one of the following operating systems to use the PC Companion application:

- Microsoft® Windows® 7
- Microsoft® Windows Vista®
- Microsoft® Windows® XP (Service Pack 3 or higher)

To install PC Companion

1. **New phone:** Turn on your new Android™ phone and connect it to a PC using a USB cable.
2. **New phone:** Tap Install to install PC Companion on the PC.
3. **Computer:** If a popup window appears, select Run Startme.exe. In the new popup window that appears, click Install to start the installation and then follow the instructions to complete the installation.

To start PC Companion

1. Make sure that PC Companion is installed on your PC.
2. Open the PC Companion application on the PC, then click Start to open one of the features you want to use.

Media Go™

The Media Go™ computer application helps you transfer and manage media content in your phone and computer. You can install and access Media Go™ from within the PC Companion application. See PC Companion on page 122 for more information.

You need one of these operating systems to use the Media Go™ application:

- Microsoft® Windows® 7
- Microsoft® Windows Vista®
- Microsoft® Windows® XP, Service Pack 3, or higher
To transfer content using the Media Go™ application

1. Connect your phone to a computer using a supported USB cable.

2. **Phone:** In the status bar, **Internal storage connected** appears.

3. **Computer:** Open the PC Companion application on the PC first. In PC Companion, click **Media Go** to start the Media Go™ application. In some cases, you may have to wait for Media Go™ to install.

4. Using Media Go™, drag and drop files between your computer and phone.

Media Go™ can also be downloaded from www.sonymobile.com.
Using location services to find your position

Use your phone to find out where you are. There are two methods: GPS and wireless networks. Enable the wireless networks option if you only need your approximate location, and want it fast. If you want a more exact position, and have a clear view of the sky, enable the GPS option. In situations where the wireless network connection is weak, you should enable both options to ensure that your location is found.

Sony does not warrant the accuracy of any location services including but not limited to navigational services.

To enable GPS
1. From the Home screen, tap .
2. Tap Settings > Location & security.
3. Mark the Use GPS satellites checkbox.

To enable wireless networks
1. From your Home screen, tap .
2. Tap Settings > Location & security.
3. Mark the Use wireless networks checkbox.

Using GPS
Your phone has a global positioning system (GPS) receiver that uses satellite signals to calculate your location.

When you use features that require the GPS receiver to find your location, make sure you have a clear view of the sky.

Getting the best performance
The first time you use the GPS it can take 5 to 10 minutes for your location to be found. To help the search, make sure you have a clear view of the sky. Stand still and don’t cover the GPS antenna (the highlighted area in the image). The GPS signals can pass through clouds and plastic, but not through most solid objects such as buildings and mountains. If your location isn’t found after a few minutes, move to another location.
Google Maps™

Track your current location, view real-time traffic situations and receive detailed directions to your destination. Before taking trips, you can download and save maps to your memory card to avoid high roaming costs.

⚠️ The Google Maps™ application requires an Internet connection. You may incur data connection charges when you connect to the Internet from your phone. Contact your service provider for more information. The Google Maps™ application may not be available in every market, country or region.

To use Google Maps™
1. From the Home screen, tap 📱.
2. Find and tap Maps.

⚠️ If you want to use your location, enable at least one of the location methods available under Settings > Location & security.

To learn more about Google Maps™
* When you use Google Maps™, press 📱, then tap Help.

Viewing your friends’ locations with Google Latitude™

Join Google Latitude™ to view your friends’ locations on maps and share your location and other information with them.

Using Google Maps™ to get directions

Use the Google Maps™ application to get directions when you travel by foot, public transportation, or car. You can add a shortcut to a destination on your Home screen to get quick directions from wherever you are.

When you view a map, you make an Internet connection, and data is transferred to your phone. So it’s a good idea to download and save maps to your phone before you take a trip. This way, you can avoid high roaming costs.

⚠️ Sony does not warrant the accuracy of any directional services.

Using the Navigation application

Use the Navigation application in your phone to get turn-by-turn instructions on how to get places. The directions are both spoken and displayed on the screen.

⚠️ The Navigation application may not be available in every market.

To start Navigation
1. From your Home screen, tap 📱.
2. Find and tap Navigation.

Using the Wisepilot™ application

Get turn-by-turn voice instructions on how to get places. You can also manage your trips and share routes and locations with friends via SMS, Twitter™ or Facebook™.

⚠️ Wisepilot™ might not be available in every market. For more information, including a Wisepilot User manual, go to www.sonymobile.com.

To start Wisepilot™
1. From the Home screen, tap 📱.
2. Find and tap Wisepilot.
Backing up and restoring phone content

Use the Backup and restore application to make backups of phone content to your internal storage or to an online storage account. Such backups can be used to restore your content and some phone settings in cases where your data gets lost or deleted.

Types of content you can back up

Use the Backup and restore application to back up the following types of data:

- Bookmarks
- Call log
- Contacts
- Applications downloaded from Android Market™
- Multimedia messages
- System settings (such as alarms, ringer volume)
- Text messages

⚠ You do not need to back up music files and photos or videos taken with the phone camera. They are backed up automatically to the phone’s memory card.

⚠ You may incur additional data transmission charges when you restore Android Market™ applications.
Locking and protecting your phone

**IMEI number**

Every phone has a unique IMEI (International Mobile Equipment Identity) number. You should keep a copy of this number. If your phone is stolen, your network provider can use your IMEI number to stop the phone from accessing the network in your country.

To view your IMEI number

- Remove the cover to view your IMEI number.

To view your IMEI number in the phone

1. From the Home screen, tap \( \text{Settings} \).
2. Find and tap \( \text{About phone} \) > \( \text{Status} \).
3. Scroll to \( \text{IMEI} \) to view the IMEI number.

**SIM card protection**

The SIM card lock only protects your subscription. Your phone will still work with a new SIM card. If the SIM card lock is on, you have to enter a PIN (Personal Identity Number). If you enter your PIN incorrectly more times than the maximum number of attempts allowed, your SIM card will become blocked. You need to enter your PUK (Personal Unblocking Key) and then a new PIN. Your PIN, PIN2, and PUK are supplied by your service provider.

To enable the SIM card PIN lock

1. From the Home screen, tap \( \text{Settings} \).
2. Find and tap \( \text{Location & security} \) > \( \text{Set up SIM card lock} \) > \( \text{Lock SIM card} \).
3. Enter the SIM card PIN and tap \( \text{OK} \).

To change the SIM card PIN

1. From the Home screen, tap \( \text{Settings} \).
2. Find and tap \( \text{Location & security} \) > \( \text{Set up SIM card lock} \) > \( \text{Change SIM PIN} \).
3. Enter the old SIM card PIN and tap \( \text{OK} \).
4. Enter the new SIM card PIN and tap \( \text{OK} \).
5. Retype the new SIM card PIN and tap \( \text{OK} \).
To change the SIM card PIN2
1 From the Home screen, tap 📱.
2 Find and tap Settings > Call settings > Fixed Dialing Numbers > Change PIN2.
3 Enter the old SIM card PIN2 and tap OK.
4 Enter the new SIM card PIN2 and tap OK.
5 Confirm the new PIN2 and tap OK.

To unblock a locked SIM card
1 When SIM card locked appears, enter the PUK code and tap OK.
2 Enter a new PIN code and tap OK.
3 Reenter the new PIN code and tap OK.

! If you enter an incorrect PUK code too many times, the SIM card becomes blocked. If this happens, contact your service provider to get a new SIM card.

Setting a screen lock

To set a screen lock
1 From your Home screen, tap 📱 > Settings > Location & security > Set up screen lock.
2 Select an option.

⚠️ It is very important that you remember your screen unlock pattern, PIN or password. If you forget this information, it may not be possible to restore important data such as contacts and messages. Refer to Sony Customer support for more information.

To create a screen unlock pattern
1 From the Home screen, tap 📱.
2 Find and tap Settings > Location & security > Set up screen lock > Pattern.
3 Follow the instructions in your phone. You are asked to select a security question that will be used to unlock the phone if you forget your screen unlock pattern.

To unlock the screen using a screen unlock pattern
1 Activate the screen.
2 Drag the lock icon 🗝 to the right across the screen.
3 Draw your screen unlock pattern.

⚠️ If the unlock pattern you draw on the screen is rejected five times in a row, you can select to either wait 30 seconds and then try again, or to answer the security question you have selected.

To change the screen unlock pattern
1 From the Home screen, tap 📱.
2 Find and tap Settings > Location & security > Change screen lock.
3 Follow the instructions in your phone.

To disable the screen unlock pattern
1 From your Home screen, tap 📱 > Settings > Location & security > Change screen lock.
2 Draw the screen unlock pattern.
3 Tap None.

To create a screen unlock PIN
1 From your Home screen, tap 📱 > Settings > Location & security > Set up screen lock > PIN.
2 Enter a numeric PIN and tap Continue.
3 Confirm you PIN and tap OK.
To disable the screen unlock PIN

1. From your Home screen, tap 🏛️ > Settings > Location & security > Change screen lock.
2. Enter your PIN and tap Continue.
3. Tap None.

To create a screen lock password

1. From your Home screen, tap 🏛️ > Settings > Location & security > Set up screen lock > Password.
2. Enter a password. The password must contain at least one letter and must be at least four characters long.
3. Tap Continue.
4. Confirm your password and tap OK.

To disable the screen unlock password

1. From your Home screen, tap 🏛️ > Settings > Location & security > Change screen lock.
2. Enter your password and tap Continue.
3. Tap None.
Updating your phone

Update your phone to the most recent software version to get optimal performance and the latest enhancements.

You can use the Update center application on your phone to run a wireless update, or you can use the PC Companion application on a computer to run an update using a USB cable connection. If you update wirelessly, then you can use either a mobile network or a Wi-Fi® network connection. Just make sure you back up and save all data stored on your phone before you update.

! When you run an update using the Update center application, a data connection is established and related charges may be incurred. Also, the availability of updates over a mobile network depends on your operator. Contact your network operator for more information.

Updating your phone wirelessly

Use the Update center application to update your phone wirelessly. You can download software updates manually, or you can allow Update service to update your phone automatically whenever downloads become available. When the automatic update feature is activated, a notification appears in the status bar every time an update becomes available.

To download software updates manually from Update center

1. From your Home screen, tap 
2. Find and tap Update Center.
3. Select the desired application or system update and tap Download, or tap Update all to download all application updates.

! Application updates launch automatically after download. With system updates, wait for your phone to restart, then install the update manually. Also, you may incur data connection charges when downloading updates over 3G/mobile networks.

To activate automatic software updates from Update center

1. From your Home screen, tap 
2. Find and tap Update Center.
3. Press 
4. Tap Allow automatic update: and select whether to download updates via 3G and Wi-Fi® networks, or via Wi-Fi® networks only. Updates are now downloaded automatically as soon as they become available.

! You may incur data connection charges when downloading updates over 3G/mobile networks.

To install system updates

1. From your Home screen, tap 
2. Find and tap Update Center.
3. Select a system update you want to install, then tap Install.

Updating your phone using a USB cable connection

Some updates are not available for wireless download. Notifications appear in the status bar to inform you of such updates. To download and run the updates, you need a USB cable and a computer running the PC Companion application. You can install PC Companion on the computer using installation files saved on your phone, or you can download the application directly from www.sonymobile.com.
To download the PC Companion application from your phone

1 Connect your phone to a computer using a USB cable.
2 When prompted, follow the instructions in the phone to launch the installation of PC Companion on the computer.

* PC Companion can also be downloaded from www.sonymobile.com.

To download software updates using a USB cable connection

1 Install the PC Companion application on the computer you are using, if it is not already installed.
2 Connect your phone to the computer using a USB cable.
3 **Computer:** Launch the PC Companion application. After a few moments, PC Companion detects your phone and searches for new phone software.
4 **Phone:** When notifications appear in the status bar, follow the on-screen instructions to carry out the relevant software updates.

To update your phone using an Apple® Mac® computer

1 Install the Bridge for Mac application on the Apple® Mac® computer you are using, if it is not already installed.
2 Using a USB cable, connect your phone to the Apple® Mac® computer.
3 **Computer:** Launch the Bridge for Mac application. After a few moments, Bridge for Mac detects your phone and searches for new phone software.
4 **Computer:** If a new phone software update is detected, a popup window appears. Follow the on-screen instructions to carry out the relevant software updates.

* The Bridge for Mac application is downloadable from www.sonymobile.com.
## Phone settings overview

Get to know the settings in your phone so that you can personalize them to your own requirements.

⚠️ Some applications are not supported by all networks and/or service providers in all areas.
User support

Access user support directly in your phone through the Help application. For example, you can open a User guide with instructions on how to use your phone. You can also get troubleshooting and other help from the Sony Mobile support zone, and from the Sony Mobile Customer support service.

- Help application features:
  - User guide in the phone—read and search information on how to use your phone.
  - Educate yourself—read tips and tricks, get the latest news, and watch how-to videos.
  - Email support—send an email to our support team.
  - Support zone—visit www.sonymobile.com to get comprehensive support for your phone.
  - Troubleshooting—find common problems and error messages at the end of our User guides and on the support zone.
  - Customer support—if all else fails. The relevant support numbers are listed in the supplied Important information leaflet.

! An extended User guide is also available at www.sonymobile.com.

To access the Help application

1. From your Application screen, find and tap 📚.
2. Find and tap the required support item.
Troubleshooting

My phone is not working as expected

If you experience problems with your phone, check these tips before you try anything else:

• Charge your phone if the battery level gets low.
• Use the power key to restart your phone.
• Try restarting your phone by removing and reinserting the SIM card.
• Force a restart of the phone. Press and hold both the power key and the volume up key for five seconds. After the phone vibrates once, release the keys. The phone restarts automatically.
• Update your phone software. Updating your phone ensures optimal performance and provides the latest enhancements. See Updating your phone on page 130 for more information.
• Reset your phone.

To force restart your phone

1 Press and hold both the volume up key and the power key for five seconds.
2 After your phone vibrates once, release the keys. The phone restarts automatically.

To force a phone shutdown

1 Press and hold both the volume up key and the power key for 10 seconds.
2 After your phone vibrates three times, release the keys. The phone turns off automatically.

Resetting the phone

You can reset your phone to its original settings, with or without deleting all of your personal data. It is possible to reset the phone to the state it was in before you first turned it on. But before you perform a reset, make sure to back up any important data saved on your phone.

To reset the phone

⚠️ To avoid permanent phone damage, do not restart the phone while a reset procedure is underway.
1. From your Home screen, tap 📱.
2. Find and tap Settings > Privacy.
3. Tap Factory data reset.
4. To erase not only internal storage but also other user data such as pictures and music, mark the Erase SD card checkbox.
5. Tap Reset phone.
6. To confirm, tap Erase everything.

No battery charging icon appears when phone starts charging
It may take a few minutes before the battery icon appears on the screen.

The battery performance is low
Follow our smart tips on how to get more out of your battery. See Improving battery performance on page 14.

I cannot transfer content between my phone and the computer, when using a USB cable
The software or the USB drivers have not been properly installed. Go to www.sonymobile.com for more detailed installation instructions and troubleshooting sections.

I cannot use Internet-based services
Make sure your subscription covers data downloads and that the Internet settings in your phone are correct. See Internet and messaging settings on page 32 for more information on how to enable data traffic, data roaming, and download Internet settings. Contact your network operator for more information about your subscription settings.

Error messages

No network coverage
- Your phone is in Airplane mode. Make sure Airplane mode is turned off.
- Your phone is not receiving any network signal, or the received signal is too weak. Contact your service provider and make sure that the network has coverage where you are.
- The SIM card is not working properly. Insert your SIM card in another phone. If this works, it is probably your phone that is causing the problem. In this case, contact the nearest Sony service center.

Emergency calls only
You are within range of a network, but you are not allowed to use it. However, in an emergency, some network operators allow you to call the international emergency number 112. See Emergency calls on page 36 for more information.

SIM card is locked.
You have entered your PIN incorrectly 3 times in a row. To unlock the phone, you need the PUK provided by your operator.

SIM card is PUK-locked
You have entered your PUK (Personal Unblocking Key) incorrectly 10 times in a row. Please contact your service provider.
Recycling your phone

Got an old phone lying around the house? Why not recycle it? By doing so, you will help us reuse its materials and components, and you’ll protect the environment, too! Find out more about the recycling options in your region at www.sonymobile.com.
