Quick Start Guide

ZTE BLADE V8

Getting to Know Your Phone

Installing the nano-SIM Card and the microSD™ Card (Optional)

The nano-SIM card can be installed or removed while the phone is turned on. By by-passing the phone, you should fully charge the battery before as soon as possible.

WARNING!

To avoid damage to the phone, do not use any other kind of SIM card, or any non-standard nano-SIM card cut from a SIM card. You can get a standard nano-SIM card from your service provider.

1. Insert the tip of the tray eject tool into the hole next to the card tray.

2. Pull out the card tray. You can place a nano-SIM card on the right card slot, and place a microSD™ card on the left card slot, as shown. Carefully slide the tray back into place.

WARNING!

The nano-SIM card can be installed or removed while the phone is turned on. By by-passing the phone, you should fully charge the battery before as soon as possible.

WARNING!

Do not remove the back cover. The battery is not removable. Removal may cause fire or explosion.

Charging the Phone

Your phone's battery should have enough power for the phone to turn on, find a signal, and make a few calls. You should fully charge the battery as soon as possible.

WARNING!

If the screen freezes or takes too long to respond, try pressing and holding the Power key for about 10 seconds to restart the phone.

NOTE:

- Don't make or receive phone calls while driving. Never text while driving.
- Keep your phone at least 5 mm away from your ear while making calls.
- Small parts may cause choking.
- Your phone can produce a loud sound.
- To prevent possible hearing damage, do not listen at high volume levels for long periods. Exercise caution when holding your phone near your ear while the loudspeaker is in use.

Specific Absorption Rate (SAR)

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by its international standards. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to ensure the protection of all persons, regardless of age and health.

The SAR limit for mobile devices is 2 W/kg and is tested using specific test methods as described by international guidelines. These guidelines use a unit of measurement known as Specific Absorption Rate, or SAR. Your mobile device is designed not to exceed the limits of 2 W/kg.

The SAR limit for mobile devices is 2 W/kg and is tested using specific test methods as described by international guidelines. These guidelines use a unit of measurement known as Specific Absorption Rate, or SAR. Your mobile device is designed not to exceed the limits of 2 W/kg.

Your mobile device is designed not to exceed the SAR limits set by the ICNIRP. These limits assure the protection of all persons, regardless of age and health. For this product, the highest SAR value for this device when tested at the body was 1.500 W/kg* with 5 mm distance. As SAR is measured utilizing the device's highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum power required to communicate with the network.

* The tests are carried out in accordance with EN 50360, EN 50566, EN 62479, EN 62209-1 and EN 62209-2.** Please see body worn operation in the user manual.

CE Caution

Battery Caution

Risks of explosion when battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.

USB Port

This product shall only be connected to a USB interface of version USB 2.0. An incorrect type. Dispose of used batteries according to the instructions.

Radio equipment type ZTE BLADE V8 is in compliance with Directive 2014/53/EU. Hereby, ZTE Corporation declares that the radio equipment type ZTE BLADE V8 is in conformity with the Directives 2014/53/EU. This product was tested and found to comply with the following standards: EN 300 328 V2.1.2, EN 301 511 V9.0.2, EN 301 489-3 V1.8.1, EN 301 489-7 V1.3.2, EN 301 893 V1.6.1, and EN 300 440-21 V1.4.1.
