SAR
Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by the independent scientific organization ICNIRP and include safety margins to assure your health.

Disposal of Your Old Appliance
1. When this crossed-out wheeled bin symbol is attached to a product, it means the product is covered by the Directive 2002/95/EC of the European Commission on waste electrical and electronic equipment (WEEE).

Connecting to the Internet

Connecting via Wi-Fi
1. Touch the Home Key ➜ Menu ➜ System settings ➜ Wi-Fi.
2. Slide the ON/OFF switch on/off if it is off.
Your smartphone automatically searches for Wi-Fi networks in range and displays their names and security settings. Your phone also connects to pre-viously linked networks when they are in range. Touch a network name to connect to it.
3. If the network is secured, enter a password or other credentials. (Ask your network administrator for details.)

Connecting via Mobile Network
To connect to the Internet using mobile network you can use the default Access Point Names (APNs). If you want to use a different APN, please contact the service provider to get the necessary information. Do not change the default settings unless instructed by the service provider. Otherwise the service might stop working.
1. Touch the Home Key ➜ Menu ➜ System settings ➜ Mobile networks ➜ Access Point Names.
2. Touch APN.
3. Touch the Menu Key ➜ New APN.
4. Touch each item to enter the information you get from your service provider.
5. Touch the Menu Key ➜ Save to complete.
