AUTOMOTIVE PRODUCTS END USER LICENSE PROVISIONS ........................................ 81
Operating Instructions

PRECAUTIONS

IMPORTANT INFORMATION, PLEASE READ CAREFULLY BEFORE USING THIS PRODUCT.

This product is intended to safely provide turn-by-turn instructions to get you to a desired destination. Please read the following precautions to ensure that you use this navigation system correctly.

• This product is not a substitute for your personal judgement. Any route suggestions made by this navigation system should never supersede any local traffic regulations or your personal judgement and/or knowledge of safe driving practices. Do not follow route suggestions if the navigation system instructs you to perform an unsafe or illegal manoeuvre, places you in an unsafe situation, or routes you into an area which you consider unsafe.

• Glance at the screen only when necessary and safe to do so. If prolonged viewing of the screen is necessary, stop in a safe and legal manner and location.

• Do not input destinations, change settings, or access any functions requiring a prolonged view of the monitor while you are driving. Stop in a safe and legal manner and location before attempting to access the system.

• When using the navigation system to find/route to an emergency service, please contact the facility to validate and verify availability, prior to driving to it. Not all locations of emergency service providers such as police and fire stations, hospitals, and clinics are contained in the database. Please use your own judgement and your ability to ask for directions in these situations.

• The map database used in the navigation system is the most recent map data available at the time of production. Because of changes in streets and neighbourhoods, there may be situations where the navigation system may not be able to route you to your desired destination. In these cases, use your own personal judgement.

• The map database is designed to provide you with route suggestions, it does not take account of the relative safety of a suggested route, or of factors which may affect the time required to reach your destination. The system does not reflect road closures or construction, road characteristics (i.e. type of road surface, slope or grade, weight or height restrictions, etc.), traffic congestion, weather conditions, or any other factors which may affect the safety or timing of your driving experience. Use your personal judgement if the navigation system is unable to provide you with an alternate route.

• There may be situations where the navigation system may display the vehicle’s location erroneously. Use your own driving judgement in this situation, taking into account current driving conditions. Please be aware that in this situation, the navigation system should correct the vehicle’s position automatically; however, there may be times where you may have to correct the position yourself. If this is the case, stop in a safe and legal manner and location before attempting operation.

• Make certain that the volume level of the unit is set to a level which still allows you to hear outside traffic and emergency vehicles. Driving while unable to hear outside sounds could cause an accident.

• Please make certain that any other person who intends on using this navigation system reads these precautions and the following instructions carefully.

If there is anything in the manual about the operation of the navigation system which you are uncertain about, please contact your local Alpine authorised navigation dealer before using the navigation system.

WARNING

Points to Observe for Safe Usage

• Read this manual carefully before using this disc and the system components. They contain instructions on how to use this product in a safe and effective manner. Alpine cannot be responsible for problems resulting from failure to observe the instructions in this manual.

• This manual uses various pictorial displays to show you how to use this product safely and to alert you to potential dangers resulting from improper connections and operation. Following are the meanings of these pictorial displays. It is important to fully understand the meanings of these pictorial displays in order to use this manual and the system properly.

WARNING

• Operation of the system while driving is dangerous. Users should stop vehicle before operating the software.

• Road conditions and regulations take precedence over information contained on the map display: observe actual traffic restrictions and circumstances while driving.

• This software is designed for use exclusively in the unit. It cannot and may not be used in conjunction with other hardware.

WARNING

This symbol means important instructions. Failure to heed them can result in serious injury or death.
INSTALL THE PRODUCT CORRECTLY SO THAT THE DRIVER CANNOT WATCH TV/VIDEO UNLESS THE VEHICLE IS STOPPED AND THE EMERGENCY BRAKE IS APPLIED.

It is dangerous for the driver to watch TV/Video while driving a vehicle. Installing this product incorrectly enables the driver to watch TV/Video while driving. This may cause a distraction, preventing the driver from looking ahead, thus causing an accident. The driver or other people could be severely injured.

DO NOT WATCH VIDEO WHILE DRIVING.
Watching the video may distract the driver from looking ahead of the vehicle and cause an accident.

DO NOT OPERATE ANY FUNCTION THAT TAKES YOUR ATTENTION AWAY FROM SAFELY DRIVING YOUR VEHICLE.
Any function that requires your prolonged attention should only be performed after coming to a complete stop. Always stop the vehicle in a safe location before performing these functions. Failure to do so may result in an accident.

DO NOT FOLLOW ROUTE SUGGESTIONS IF THE NAVIGATION SYSTEM INSTRUCTS YOU TO PERFORM AN UNSAFE OR ILLEGAL MANEUVER, OR PLACES YOU IN AN UNSAFE SITUATION OR AREA.
This product is not a substitute for your personal judgment. Any route suggestions by this system should never supersede any local traffic regulations or your personal judgement or knowledge of safe driving practise.

KEEP THE VOLUME AT A LEVEL WHERE YOU CAN STILL HEAR OUTSIDE NOISES WHILE DRIVING.
Excessive volume levels that obscure sounds such as emergency vehicle sirens or road warning signals (train crossings, etc.) can be dangerous and may result in an accident. LISTENING AT LOUD VOLUME LEVELS IN A CAR MAY ALSO CAUSE HEARING DAMAGE.

MINIMIZE DISPLAY VIEWING WHILE DRIVING.
Viewing the display may distract the driver from looking ahead of the vehicle and cause an accident.

DO NOT DISASSEMBLE OR ALTER.
Doing so may result in an accident, fire or electric shock.

USE ONLY IN CARS WITH A 12 VOLT NEGATIVE GROUND.
( Check with your dealer if you are not sure.) Failure to do so may result in fire, etc.

KEEP SMALL OBJECTS SUCH AS SCREWS OUT OF THE REACH OF CHILDREN.
Swallowing them may result in serious injury. If swallowed, consult a physician immediately.

USE THE CORRECT AMPERE RATING WHEN REPLACING FUSES.
Failure to do so may result in fire or electric shock.

DO NOT BLOCK VENTS OR RADIATOR PANELS.
Doing so may cause heat to build up inside and may result in fire.

DO NOT WATCH VIDEO WHILE DRIVING.
Watching the video may distract the driver from looking ahead of the vehicle and cause an accident.

DO NOT OPERATE ANY FUNCTION THAT TAKES YOUR ATTENTION AWAY FROM SAFELY DRIVING YOUR VEHICLE.
Any function that requires your prolonged attention should only be performed after coming to a complete stop. Always stop the vehicle in a safe location before performing these functions. Failure to do so may result in an accident.

Failure to do so may result in fire or electric shock.

DO NOT BLOCK VENTS OR RADIATOR PANELS.
Doing so may cause heat to build up inside and may result in fire.
HALT USE IMMEDIATELY IF A PROBLEM APPEARS.
Failure to do so may cause personal injury or damage to the product. Return it to your authorized Alpine dealer or the nearest Alpine Service Centre for repairing.

HAVE THE WIRING AND INSTALLATION DONE BY EXPERTS.
The wiring and installation of this unit requires special technical skill and experience. To ensure safety, always contact the dealer where you purchased this product to have the work done.

USE SPECIFIED ACCESSORY PARTS AND INSTALL THEM SECURELY.
Be sure to use only the specified accessory parts. Use of other than designated parts may damage this unit internally or may not securely install the unit in place. This may cause parts to become loose resulting in hazards or product failure.

ARRANGE THE WIRING SO IT IS NOT CRIMPED OR PINCHED BY A SHARP METAL EDGE.
Route the cables and wiring away from moving parts (like the seat rails) or sharp or pointed edges. This will prevent crimping and damage to the wiring. If wiring passes through a hole in metal, use a rubber grommet to prevent the wire's insulation from being cut by the metal edge of the hole.

DO NOT INSTALL IN LOCATIONS WITH HIGH MOISTURE OR DUST.
Avoid installing the unit in locations with high incidence of moisture or dust. Moisture or dust that penetrates into this unit may result in product failure.

NOTICE
Product Cleaning
Use a soft dry cloth for periodic cleaning of the product. For more severe stains, please dampen the cloth with water only. Anything else has the chance of dissolving the paint or damaging the plastic.

Temperature
Be sure the temperature inside the vehicle is between +45°C (+113°F) and 0°C (+32°F) before turning your unit on.

Maintenance
If you have problems, do not attempt to repair the unit yourself. Return it to your Alpine dealer or the nearest Alpine Service Station for servicing.

Protecting the USB connector
- Only an iPod/iPhone, Android™ smartphone or USB flash drive can be connected to the USB connector on this unit. Correct performance using other USB products cannot be guaranteed.
- If the USB connector is used, be sure to use only the supplied connector cable with the unit. A USB hub is not supported.
- Depending on the connected USB flash drive, the unit may not function or some functions may not be performed.
- The audio file format that can be played back on the unit is MP3/WMA/AAC/FLAC.
- Artist/song name, etc., can be displayed. Certain, special characters may not be correctly displayed.
On Handling USB Flash drive

- This unit can control a memory storage device that supports the USB Mass Storage Class (MSC) protocol. Playable audio file formats are MP3, WMA, AAC and FLAC.
- USB Flash drive function is not guaranteed. Use USB flash drive according to the terms of agreement. Read the USB flash drive Owner’s Manual thoroughly.
- Avoid usage or storage in the following locations:
  - Anywhere in the car exposed to direct sunlight or high temperatures.
  - Anywhere the possibility of high humidity or corrosive substances are present.
- Fix the USB flash drive in a location where driver operation will not be hindered.
- USB Flash drive may not function correctly at high or low temperature.
- Use only certified USB flash drive. Note that even certified USB flash drive, may not function correctly depending on its type or state.
- Depending on the settings of the USB flash drive type, memory state or encoding software, the unit may not play back or display properly.
- USB Flash drive may take time to start playback. If there is a particular file other than audio in the USB flash drive, it may take considerable time before the file is played back or searched.
- The unit can play back “mp3,” “wma” or “m4a” file extensions.
- Do not add the above extensions to a file other than audio data. This non-audio data will not be recognised. The resulting playback may contain noise that can damage speakers and/or amplifiers.
- It is recommended to back up important data on a personal computer.
- Do not remove the USB device while playback is in progress. Change SOURCE to something other than USB, then remove the USB device to prevent possible damage to its memory.

- Windows Media are trademarks, or registered trademarks of Microsoft Corporation in the United States and/or other countries.
- Apple, iPhone, iPod, iPod nano, iPod touch and Siri are trademarks of Apple Inc., registered in the U.S. and other countries. Apple CarPlay is a trademark of Apple Inc.
- Use of the Made for Apple and Works with Apple badges means that an accessory has been designed to connect specifically to the Apple product(s) identified in the Made for Apple badge and to work specifically with the technology identified in the Works with Apple badge, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards.

Please note that the use of this accessory with an Apple product may affect wireless performance.

Made for iPhone SE, iPhone 6s, iPhone 6s Plus, iPhone 6, iPhone 6 Plus, iPhone 5s, iPhone 5c, iPhone 5, iPhone 4s, iPod touch (5th and 6th generation), iPod nano (7th generation).
The following screen examples of INE-F904D used in this manual are for reference only. They may differ from the actual screen displays.

**Favourite Function**

Frequently used functions such as the Audio source or Navigation are easily recalled. Register them to the Favourite screen. For details, see "Favourite Function" (page 21).

**Favourite screen example**

- Frequently used functions and useful functions can be customised for your convenience.
- You can register up to 54 functions.
- You cannot register a function more than once.

**About Swiping the Touch Screen**

You can change a page by swiping the touch screen horizontally with your finger. For details, see "Touch Screen Operation" (page 15).

*Swipe the display with your finger lightly.*
Switching the Audio Sources Screen to a Dedicated Screen

You can switch the Audio Sources screen to a dedicated screen by touching the icon on one of the three edges of the screen.

Shortcut Setup Screen (page 16)

You can set the BASS ENGINE SQ or Tone Adjustment.

Dual Screen (page 13)

You can switch between the displayed screens on the Dual Screen.

Preset button or Quick Search mode Screen *

* The Search mode differs depending on the audio source. For details, see the operating instructions of the audio source.
About Dual Screen

Dual Screen allows you to display the Navigation and Audio/Visual screens simultaneously.

**Audio full Screen**

![Audio full Screen](image)

Touch [ ] to switch to the Navigation menu screen. For details of navigation operations, refer to “Navigation System OM” in the CD-ROM.

**Dual Screen**

![Dual Screen](image)

You can switch the left/right positions of the Audio/Visual screen and Navigation screen. Each time you touch [ ], the positions of Audio/Visual screen and Navigation screen switch.

**Navigation full Screen**

![Navigation full Screen](image)

* Touch [ ] to switch to the Navigation menu screen. For details of navigation operations, refer to “Navigation System OM” in the CD-ROM.

**Dual Screen Display Position**

You can switch the left/right positions of the Audio/Visual screen and Navigation screen. Each time you touch [ ], the positions of Audio/Visual screen and Navigation screen switch.

* When [ ] is not displayed, touch [ ].
**Getting Started**

**Location of Controls**

1. **RESET switch**
   The system of this unit is reset.

2. **+/− (UP/DOWN) button**
   Press to adjust the volume.

3. **(MUTE)/★ (Favourite) button**
   Press to activate/deactivate the mute mode. Press and hold for at least 2 seconds to recall the Favourite screen.

4. **button**
   Depending on the connected smartphone, press to recall Siri function or voice recognition mode.

5. **小小的 (MENU)/ (Power Off) button**
   Recalls the Menu screen. Press and hold this button for at least 5 seconds to turn the power off.

6. ** السناب (NAV) button**
   Recalls the navigation map screen. Press again to switch to Navigation menu screen. Press and hold this button for at least 2 seconds to change to Go Home route screen. (If Home is not set yet, it will change to the Home setting screen.) For details of navigation operations, refer to “Navigation System OM” in the CD-ROM.

7. **מנות / أروع button**
   Press to seek up/down a station in radio mode or up/down a track, chapter, etc., in other audio/visual sources.

**Turning Power On or Off**

Some of this unit’s functions cannot be performed while the vehicle is in motion. Be sure to stop your vehicle in a safe location and apply the parking brake, before attempting these operations.

1. **Turn the ignition key to the ACC or ON position.**
   The system turns on.
   - When turned on, the system displays the last screen that was displayed before the ignition key was turned off. For example, if the unit is in radio mode when ignition is turned off, it will remain in radio mode when ignition is turned back on.

2. **Press and hold the (MENU)/ (Power Off) button for at least 5 seconds to turn the power off.**
   - The unit can be turned on by pressing any button.
   - The unit is a precision device. Careful handling of the unit should provide you with years of trouble-free operation.

**Turning the System On**

With the Alpine system, when the ignition key is turned to ACC or ON, the opening screen will be automatically displayed.

When the system is used for the first time, the language selection menu is displayed. Swipe the Language list screen vertically, then touch your choice from the list of 23 languages.

- For your driving safety, please read the warning prompt displayed on this unit carefully.
- Some of this unit’s functions cannot be performed while the vehicle is in motion. Be sure to stop your vehicle in a safe location and apply the parking brake before attempting these operations.

**Initial System Start-Up**

Be sure to press the RESET switch when using the unit for the first time, after changing the car battery, etc.

1. **Turn off the unit power.**
2. **Press the RESET switch with a ballpoint pen or similar pointed object.**

**About the button descriptions used in this Owner’s Manual**

The buttons found on the face of the unit are expressed in bold (e.g. 小小 (MENU)). The buttons found on the touch-screen display are shown in bold within brackets, [ ] (e.g. [X]).
Adjusting the Volume

Adjust the volume by pressing +/−.
Volume decreases/increases continuously by pressing and holding +/−.
Volume: 0 - 35

• To protect your hearing, when the volume value exceeds 20, the volume will rise step by step.

Lowering Volume Quickly

Audio Mute function instantly lowers the volume level to 0.

1 Press the (MUTE) button to activate the MUTE mode.
The audio level will be 0.

2 Pressing the (MUTE) button again will bring the audio back to its previous level.

Touch Screen Operation

You can operate the system by using the touch panel on the screen.

• Be sure to touch the onscreen button lightly with the pad of your finger to avoid scratching the display.

Touch operation

Touch a button or list item on the screen lightly.

• If you touch a button and there is no reaction, remove your finger.
• Onscreen buttons that cannot be operated are dimmed.

Swipe operation

Move your finger lightly with a swipe.

Drag & Drop operation

Touch and hold the desired item, then drag it to its new location by moving your finger, then release your finger to place the item.

Switching Sources

1 Press the (MENU) button.
The menu screen is displayed.

2 Touch your desired source in the Audio source selecting area.

• Some source such as USB, HDMI, Apple CarPlay, etc., is available only when related device is connected.
• HDMI/AUX source name differs depending on the setting. For details, refer to “HDMI Setup (page 40)/AUX Setup (page 40)”.
• To play Apple CarPlay music shall impact iPod source when an iPhone 5 or later is connected and vice versa. Refer to “Apple CarPlay Setup” (page 40).
• In the menu screen, you can change the Audio source directly or change the order in which sources change. For details, see “About the Menu Screen” (page 18).
Operating the Function Button on the Audio/Video Main Screen

Using the Function button on the Audio/Visual main screen.

Swipe to the right or left to change to the Function mode.

Radio main screen example

About Basic Operation for List Screen

Basic operations on the Setup list screen and the Search list screen. How to display on the list screen differs depending on the selected item.

- Switches to the previous screen.
- Item select button
- Closes the window.
- Displays the next list page.
- When the next selection item does not exist, the list item is not displayed.

About the Shortcut Setup Screen

Displaying the Sound Setup screen.

Touch the upper central area of the Audio source screen.

The Sound Setup screen is displayed.

Sound Setup screen (Tone Adjustment mode) example

① Closes the window.
② You can adjust the Navi voice interrupt volume (Navi Guide) and the Background Audio volume during Navi Guide.
   Navi Volume: 1-35
   Background Audio: 0-35
③ Button for Display Off *
④ Displays the registered Bluetooth Device List screen.
   - See “Registering the Bluetooth Device” (page 25).
⑤ Touch this to change to the currently playing source screen.
⑥ Displays the Hands-free Device Primary/Secondary setting screen.
   - See “Hands-free Device Primary/Secondary Setting” (page 26).

* Display Off mode
- To cancel Display Off mode, touch the screen or press any button (except +/ - button).
- Display Off mode is cancelled when the power or ACC is turned off.
- When the gear lever is shifted to the reverse (R) position and the rear camera is connected, the rear camera image is displayed.
- When a call is received on a Bluetooth-connected phone, the incoming call screen is displayed.
### Sound Setup Function

#### Tone Adjustment mode

- Button for changing the BASS ENGINE SQ mode screen
- Balance/Fader Image area*1
  - To reset to the initial settings (Balance: 0, Fader: 0), touch .
- Buttons for switching between Front/Rear when adjusting Bass/Treble*2
- Buttons for adjusting Bass Level/Treble Level*3, 4
- Buttons for adjusting Subwoofer On/Off and Subwoofer Level *1, 3
- Button for changing the Tone Adjustment mode screen
  - If changing to the Tone Adjustment mode, BASS ENGINE SQ mode will be disabled.
- Buttons for adjusting the BASS ENGINE Level*4
- Buttons for selecting the BASS ENGINE type *4

*1 You can perform a more detailed set up in “Sounds Setup” (page 27).
*2 You cannot switch when Front/Rear Sync in “Adjusting the Parametric Equalizer Curve (Dual HD EQ)” (page 29) is “On.”
*3 When you switch to the BASS ENGINE SQ mode, the value you have set is ignored.
*4 When the Defeat setting is “On,” you cannot perform the set up.

#### BASS ENGINE SQ mode

- Buttons for adjusting Bass Level/Treble Level*3, 4
- Buttons for adjusting Media Xpander *1, 3
- Buttons for adjusting Subwoofer On/Off and Subwoofer Level *1, 3
- Button for changing the Tone Adjustment mode screen
  - If changing to the Tone Adjustment mode, BASS ENGINE SQ mode will be disabled.
- Buttons for adjusting the BASS ENGINE Level*4
- Buttons for selecting the BASS ENGINE type *4

### Setting the BASS ENGINE SQ

#### Setting the BASS ENGINE Type
Creating the ideal Bass impact for your musical taste using BASS ENGINE SQ.

**Setting contents:**
- Standard (Initial setting) / Punch / Rich / Mid Bass / Low Bass
  - Standard: Mild low-end boost with mid-range focus for front-centre staging.
  - Punch: Mid-bass punched up with mid-range impact.
  - Rich: Accented highs and mid-bass giving outstanding balance for all types of music.
  - Mid Bass: Strong high frequency emphasis with mid-bass boost for more low-end attack.
  - Low Bass: Strong, low-bass boost with extended highs for a very dynamic sound.

#### Adjusting the BASS ENGINE Level
You can adjust the BASS ENGINE Level.

**Setting item:**
- BASS ENGINE Level

**Setting contents:**
- 0 to 6 (Initial setting: 3)
  - The BASS ENGINE Level of the BASS ENGINE SQ is common to all the types.

#### About setup when the external power amplifier is connected

In order to optimise the BASS ENGINE SQ mode, we recommend the following procedure to set up the power amplifier.

1. Use your favourite music to make the following amplifier adjustment.
   1) Set GAIN of the power amplifier to “MIN.”
   2) Set the Crossover Mode Sector switch to “OFF.”
   - If the switch has no “OFF” position, set as near as possible to full range.
   3) Set the BASS ENGINE Level to “03.”
   4) Play a song of the genre you frequently listen to, and adjust GAIN of the power amplifier.

### Adjusting Bass Level/Treble Level
Bass Level and Treble Level can be set for each front seat and for each rear seat by touching [Front] or [Rear].

**Setting item:**
- Bass / Treble

**Setting contents:**
- -14 to +14 (Initial setting: 0)
  - When the Sound Setup of the Shortcut Setup is selected to “BASS ENGINE SQ,” you cannot perform the set up.
  - Adjustment cannot be performed when Defeat is set to “On.”
  - The Bass adjusted setting value is interlinked with Band2 of Dual HD EQ, and the Treble adjusted setting value is interlinked with Band8.
About the Menu Screen

In the menu screen, you can select the audio source and perform various setups or operations on the unit.

Press the \( \text{MENU} \) button.
The menu screen is displayed.

**Menu screen example**

1. Displays the currently playing audio source.
2. Displays the total number of the audio sources that can be selected. Also displays the current position, counting from the leftmost audio source.
3. Touch to return to previous source screen.
4. Audio source select area
   - Touch your desired source icon to change the audio source.
   - Swiping to the right or left in the Audio source select area, you can change the audio source.
   - The source icon displayed in the Audio source select area is the one checked on the Edit menu screen. For details on how to display/hide the source icon, see "Edit Menu" (page 18).
5. Displays Preset No., and information of the Search mode, etc., located in the middle of the Audio source select area.
   - Touch the desired preset number or the Search mode to change the audio source directly.
   - The displayed information differs depending on the audio source. Some sources are not displayed.
6. Setup button
   - Displays the Setup screen. (page 24)
7. Camera button*1
   - Displays camera images. (page 70)
8. Apple CarPlay button*2 or Android Auto button*3.
9. Vehicle Info button*4
   - Displays the Vehicle info mode screen. (page 74)
10. Phone button*5
    - Displays the Phone menu screen. (page 61)
    - Depending on the setting and connected devices, the displayed icons and orders may differ.

*1 Displays when the Camera Select is set to “Front,” “Rear,” or “Other.” (page 41)
*2 Displays the Apple CarPlay screen, displayed when Apple CarPlay is turned on and an iPhone 5 or later is connected. (page 46)
*3 Displays the Android Auto screen, displayed when an Android Smartphone installed Android Auto App is connected. (page 46)
*4 Displays when a compatible CAN-interface is connected.
*5 Displays when the Bluetooth setting is set to “On.” (page 25)

---

**Edit Menu**

In the Edit Menu screen, you can change the audio source order or set the display/hide settings.

1. **Touch the desired source icon in the Menu screen for at least 2 seconds.**
   - A checkbox (✓ or ○) is displayed on the upper left area of the source icon and switches to the edit mode.
   - The source icon displayed in the Edit Menu screen is displayed only when usable setup and conditions of each Audio source are fulfilled. For details on setup and conditions of each audio source, see "Switching Sources" (page 15).

2. **Touch [Done].**
   - The editing content is confirmed, and returns to the menu screen.

**Changing the order of Audio source**

Drag and drop the source icon to the desired location.

**Hiding/Displaying Audio source**

Place a check in the checkbox (✓) to display the Audio source icon. Uncheck the checkbox (○) to hide it.

- You cannot hide the icon of a source that is currently playing.

---

**About the Shortcut Key**

There are two shortcut keys on Audio source screen (Radio, USB Audio, etc.). You can quickly switch to Sound Setup screen or Phone Menu screen by touching the shortcut key.

1. **Sound setup shortcut button**
   - Touch to display Bal./Fad. Screen of Sound setup. Refer to “Setting the Balance/Fader/Rear Speaker/Subwoofer” (page 28).
2. **Phone shortcut button**
   - Touch to display Phone Menu screen. Refer to “Hands-free Phone Control” (page 61).
About the Indicator Display

The Indicator Bar at the bottom of the screen displays various types of information, like the current time.

1. Lights up when connected to a Bluetooth compatible device. (Does not display when connection is set to OFF.)
2. Indicates the battery level of the connected Bluetooth device.
3. Indicates the signal strength level of the connected Bluetooth compatible device.

<table>
<thead>
<tr>
<th>Battery Level</th>
<th>Level 3</th>
<th>Level 2</th>
<th>Level 1</th>
<th>No Battery</th>
</tr>
</thead>
<tbody>
<tr>
<td>Icon</td>
<td>0</td>
<td>1</td>
<td>2</td>
<td>3</td>
</tr>
</tbody>
</table>

This may not be displayed depending on the connected Bluetooth device. Whenever one battery level decreases, the alarm sounds.

4. The clock display
   You can switch between the 12 hour display and 24 hour display options.

   For details of the clock display settings, refer to “Navigation System OM” in the CD-ROM.

5. BLUETOOTH devices Name*

* When you connect two Hands-Free Phones, the information of the Bluetooth device set to Primary is displayed.

Opening screen Customisation

You can set a BMP image that is stored on a USB flash drive as the opening screen.

This setting requires the following image format, folder name and file name.

Usable file format:
- BMP image
- Image size: 800 x 480 pixels (RGB 24 bit or less/number of colour bit: 24, 8, 1 bit)
- Compression format: non-compressed
- Folder name*1: OPENINGFILE
- File name*2: openingfile.bmp

1. Connect the USB flash drive to the USB extension cable.
   A message confirming the opening screen change is displayed.

2. Touch [OK].
   An update indicator “ (Loading)” is displayed, and update for the opening screen starts.

3. After the update is complete, the following message is displayed.*3
   “Customisation succeeded. Please remove USB memory and press OK.”

4. After removing the USB flash drive, touch [OK].
   The opening screen setting is complete.

*1 Be sure to save the folder to the first layer of the USB flash drive.
*2 Only one BMP image can be set as the opening screen.
*3 If “Customisation failed,” is displayed, touch [OK] and then check that the folder name, file name and file format are correct.

- Do not perform the following actions during the update.
  - Do not turn off the ACC to the car.
  - Do not unplug the USB flash drive.
  - Do not turn off or operate the unit.
- To return the opening screen to its original image, you must Clear All Settings. Be careful of this operation, as your other settings are also initialised. For details, see “Initializing the System” (page 36).
How to Input Characters and Numbers (Keypad)

The displayed screens and procedures may vary slightly depending on the function used, but the basic input method is the same.

1. Input screen area.
2. Cursor position alteration switch
3. Cancel
   Keypad mode finishes.
4. \( \text{Delete} \)
   Returns to the previous character and erases it.
   Touching here for more than 2 seconds will erase all input characters.
5. Input number is confirmed.
6. Character keypad
7. Space
8. Special character selector switch
   Switches the Alphanumeric/Special characters/Symbols character type.
9. Uppercase letter switching key
Favourite Function

Using the Favourite Function

This unit enables you to recall functions easily by registering frequently used items such as the Audio source, the navigation search function, etc. to the Favourite screen. You can recall any of these items easily.

1 Press and hold the */(Favourite) button for at least 2 seconds.
The Favourite screen is displayed.

Favourite screen example

1 Changes to the Edit screen used for registering items or changing names.
2 Close the Favourite screen
3 Favourite registration item
   Swipe to the left and right to change the pages. You can add up to 6 pages.
4 Indicates the location of the currently displayed Favourite screen.

2 Touch your desired Favourite registered item.
The desired item is displayed.
   • When making a phone call by choosing shortcut dialing, after the message of confirmation of outgoing phone calls is displayed, touch [Call]. For details, see “Calling by Favourite Function” (page 63).

Editing the Favourite Screen

1 Touch [ ] (Edit).
   A checkbox is displayed on the upper left area of the registration icon and it changes to Edit mode.

   Setting item:
   Item registration / Item name change / Icon change / Layout change / Item deletion

2 After editing is complete, touch [ ] (Save).

3 After the caption for the confirmation is displayed, touch [Yes].

4 Editing is complete and the screen switches to the Favourite screen.
   • If you touch [ ] (Cancel) while editing, a confirmation prompt will appear. Touch [Yes], the screen switches to the previous Favourite Edit screen.

Registering Items

1 Touch [ ] (Add).
The items to be added (categories) are displayed.

2 Touch the desired item to be added (category).

3 Choose the desired item to be added.
   • You can add up to 54 items.
   • You cannot register an item more than once.

   List:
   Audio/Visual
   Navigation
   Phone
**Audio/Visual**

*1 You can choose the frequency from Preset 1 - 12, registered into each FM1/FM2/MW/LW band of Radio.
*2 You can choose a channel registered to Presets 1 - 18.
*3 You can register now playing Apple CarPlay Music or Google Play Music depending on the connected Smartphone.

- You can also register directly by touching [+★] in the Audio source screen.

![Audio/Visual](image)

**Navigation**

[Specific Place]:
You can display places registered in Favourite and set your destination.

[Quick Place search]:
Displays the address search keypad.

[Help Nearby]:
Displays the nearby search screen.

[POI category]:
Displays the selected POI category list.

- For details on navigation operations, refer to “Navigation System OM” in the CD-ROM.

**Phone (Shortcut Dialing)**

You can register the user’s shortcut dialing stored in the Phone Book.

- If multiple phone numbers are stored, select a number you want to register.
- You can register directly by touching [+★] of the Contacts list. (page 61)
- You can change the icon you registered. (page 22)

*4 You can only select Phone when a Smartphone is connected. For details on how to register a mobile phone and downloading Phone Book, see “Bluetooth Operation” (page 61).

**Changing Item Names**

1. Touch the text area of the registered item.

![Changing Item Names](image)

The Input User Name screen (Keypad) is displayed.

2. Input the name and touch [OK].

- For details on how to input characters using the keypad, see “How to Input Characters and Numbers (Keypad)” (page 20).

**Changing Icons (only the Shortcut Dialing and Navigation icons)**

You can change the icons of Shortcut Dialing and Navigation category. The following example explains how to change the Shortcut Dialing icon. Perform the same procedure to change the Navigation category icon.

1. Touch the icon that you want to change.

![Changing Icons](image)

The icon list is displayed.

2. Touch the icon you want to change from the icon list.

![Changing Icons](image)

The icon is changed to the selected icon.
Changing the Layout

Drag and drop the item to the desired location.

The item location is changed.

- When you move to other pages, switch pages, or when you make a new page and move to another, drag to the end of the screen, and lift your finger after the page changes.

Deleting Items

When deleting a selected item

1. Touch the checkbox at the left of the item you want to delete and place a check (✓) in it.

2. Touch [ ] (Delete).
   The selected item will be deleted.

When deleting all items

Touch [ ] (Delete All).

All items are deleted.

Applying Alpine TuneIt App

This unit’s sound tuning is programmable from a connected Smartphone. It is also possible to download specific parameters for certain vehicles from Alpine’s TuneIt database stored in the Cloud. Using the Alpine TuneIt App, customised parameters can also be uploaded for others to share and rate.

Through this unit, it is also possible to receive and respond to information from Alpine’s Social Network Service (SNS) available through the connected Smartphone. The installed Alpine TuneIt App should be launched on the Smartphone before connection to the head unit. Alpine TuneIt App, is downloadable from Apple’s App Store; the Android user can download it from Google Play. For details, consult your Alpine dealer.

Before these operations, set TuneIt to USB (iPhone) or Bluetooth (Android) depending on the connected Smartphone. For details, see “Application Setup” (page 45).

- The application programme and related specifications and data may be deleted or terminated without notice.
- Some Alpine TuneIt App functions may not be available if the Smartphone is not in a service area or receives no signal.
- Turn Apple CarPlay to Off before using Alpine TuneIt App. Refer to “Apple CarPlay Setup” (page 40).

Adjusting the sound via the Smartphone

After setting the above procedure, you can adjust the unit’s sound function on the Smartphone.

1. Make sure the unit is powered on.

2. Launch the Alpine TuneIt App on the Smartphone. Adjust the unit’s sound accordingly on the Smartphone.

- The setting cannot be done on both the Smartphone and this unit at the same time. While the sound function of this unit is set via Smartphone, the sound function settings on the unit will be displayed as “Sound APP Connected.”
- In some situations, such as the unit is powered off or during a call, etc., sound setting cannot be done via the Smartphone.
- This function may not be available depending on the paired Smartphone.
- Please obey all local traffic laws while using this function.
- When “Setting the External AP” (page 44) is “On,” this function is not available.
Setup Operation

1 Press the (MENU) button.
The Menu screen is displayed.

- Touch [X] will return to previous source screen.

2 Touch [Setup].
The Setup main screen is displayed.

3 Touch the required setting icon on the upper part of the Setup main screen or swipe the list area vertically, then touch the setting item.

Setting items:
- General: See “General Setup” (page 27).
- Sources: See “Sources Setup” (page 37).
- System: See “System Setup” (page 41).

*1 This setting is only available when “Bluetooth” is set to “On” ( ).
*2 Cannot be adjusted when Apple CarPlay is used/Android smartphone which installed Android Auto App is connected.

The following steps 1 to 3 are common to each “Setting item” of Wireless Setup. See each section for details.

1 Select the desired item.

2 To switch the setting, touch [ ], [ ], [ + ], [ - ], or mark the checkboxes “Off” ( ) or “On” ( ).
- If “ ” appears, there is a further hierarchy: Touch the desired item.

3 Touch [X] to return to the main source screen.
- To return to the previous List screen, touch [ ]. For details, see “About Basic Operation for List Screen” (page 16).
Bluetooth Setup

You can register and set up Bluetooth compatible devices.

Setting item: Bluetooth
Setting contents:
Off: On (Initial setting)
Off: Bluetooth function is not used.
On*: Select when you would like to pair your Bluetooth compatible phone with this unit.

* Turn this setting “On” to automatically connect a registered Bluetooth device whenever this unit is turned ON. See “Registering the Bluetooth Device” if no device is registered.
• Cannot be adjusted when Apple CarPlay is used/Android smartphone which installed Android Auto App is connected.

Displaying Bluetooth Information

Make sure the “Bluetooth” setting is “On” ( ). See “Bluetooth Setup” (page 25).
You can display the Bluetooth device name and device address of this unit.

Setting item: Bluetooth Information

Registering the Bluetooth Device

Make sure the “Bluetooth” setting is “On” ( ). See “Bluetooth Setup” (page 25).
The Bluetooth device is used when a connectable Bluetooth compatible device is searched and connected from this unit, or a new Bluetooth compatible device is registered.

Setting item: Set Bluetooth Device

1 Touch [ ] (Search) of “No Device.”

2 Touch [ ] (Audio), [ ] (Hands-free) or [ ] (Both) of the device you want to connect from the list.
   - Audio: Sets for use as an Audio device.
   - Hands-free: Sets for use as a Hands Free Device.
   - Both: Sets for use as both an Audio device and Hands Free Device.
     • You can register up to 5 Bluetooth compatible mobile phones.
     • When you register a Hands-Free Phone for the first time, Primary is set automatically. When you connect two Hands-Free Phones, select “Hands-free” or “Both.” You can then set the priority on the Primary/Secondary setting screen. For details, see “Hands-Free Device Primary/Secondary Setting” (page 26).

3 When the device registration is complete, a message appears and the device returns to normal mode.
   • The Bluetooth registration process differs depending on the device version and SSP (Simple Secure Pairing). If a 4 or 6 character Passcode appears on this device, enter the Passcode using the Bluetooth compatible device.
   • If a 6 character Passkey appears on this device, make sure the same passkey is displayed on the Bluetooth compatible device and touch “Yes.”
   • If all 5 devices have been registered, you cannot register a 6th device. To register another device, you need to delete one of the other 5 devices first.

Setting the Bluetooth Device

Select one of 5 paired Bluetooth compatible devices that you previously registered.

Touch [ ] (Audio) or [ ] (Hands free) of the device you want to connect from the Paired Device list.

Deleting a Bluetooth Device from the list

You can delete the information of a previously connected Bluetooth compatible device.

1 Touch [ ] (Delete) of the Bluetooth compatible device to delete from the Paired Device list.

2 Touch [OK].
   • Touching [Cancel] will cancel the setting.
Hands-free Device Primary/Secondary Setting

Make sure the “Bluetooth” setting is “On” ( ). See “Bluetooth Setup” (page 25).
When you connect two Hands-Free Phones, set the priority of the operation and the setting of incoming-outgoing calls.

Setting item: Hands-free Device Priority
Setting contents: Primary / Secondary

Touch the checkbox for Primary/Secondary of the device names that are registered to the unit to set them.

- When connected to two hands-free phones, operating restrictions apply to the hands-free phone registered to Secondary. For details, see “Hands-free Phone Control” (page 61).

iPhone Auto Pairing Setting

Make sure the “Bluetooth” setting is “On” ( ). See “Bluetooth Setup” (page 25).
When an iPhone is connected via USB and it is not on the Registered Device list, it will be paired automatically.

Setting item: iPhone Auto Pairing
Setting contents: On / Off (Initial setting)

- This setting supports iPhones with iOS Ver.5.5 or later.
- When more than 5 Bluetooth devices are registered, Auto Pairing does not start.

Phone Setup

You can make various settings for a Bluetooth compatible device.

Selecting the Output Speaker

You can select which speaker in the car will output the audio from the phone.

Setting item: Phone Speaker
Setting contents:
- All (Initial setting) / Front Left / Front Right / Front Left & Right
  - All: The sound is output from all speakers in car.
  - Front Left: The sound is only output from the front left speaker.
  - Front Right: The sound is only output from the front right speaker.
  - Front Left & Right: The sound is output from the front left and front right speakers.

- The setting cannot be adjusted during a phone call. Adjust the setting before placing a call.
- This option is not available when “External AP” (page 44) is set to On.

Changing the Character Code of the Phone Book

You can select the character code that is used when transferring the phone book or history from a mobile phone. If unreadable characters appear in the transferred data, select the correct character code.

Setting item: Default Phonebook Encoding
Setting contents:
- Latin-1 / Latin-9 (Initial setting) / Russian / Chinese /Thai / Arabic / UTF-8 / UTF-16LE / UTF-16BE
  - Latin-1: ISO 8859-1
  - Latin-9: ISO 8859-15
  - Russian: ISO 8859-5
  - Chinese: GB18030
  - Thai: CP874
  - Arabic: CP1256

Setting the Passcode

You can set the code for connecting with a Bluetooth compatible device.

Setting item: Passcode Change
1. Enter a 4-digit passcode (old), and then touch [OK].
   - The initial number is 0000.
   - For details on how to input the numeric keypad, see “How to Input Characters and Numbers (Keypad)” (page 20).
2. Enter a 4-digit passcode (new), and then touch [OK].
3. Enter the passcode that you entered in step 2 again, and then touch [OK].
General Setup

- General Setup Menu screen

- Artwork Position

The following steps 1 to 3 are common to each “Setting item” of General Setup. See each section for details.

1. Select the desired item.
2. To switch the setting, touch {↑, ↓}, {←, →}, or mark the checkboxes “Off” (□) or “On” (✓). • If “>” appears, there is a further hierarchy. Touch the desired item.
3. Touch [●] to return to the main source screen.
  • To return to the previous List screen, touch [▲]. For details, see “About Basic Operation for List Screen” (page 16).

Sounds Setup

[Sounds] is selected on the General Setup Menu screen in step 1. See “General Setup” (page 27).
You can set up items related to the sound quality.
Setting the Balance/Fader/Rear Speaker/Subwoofer

Set Balance/Fader/Rear Speaker/Subwoofer/Subwoofer Level/Subwoofer Phase in the Bal./Fad. screen.

Setting item:
- Balance*1
- Fader*1
- Rear Speaker
- Subwoofer*2
- Subwoofer Level*1, 2
- Subwoofer Phase*1

*1 When selecting either of the above setting items, the Bal./Fad. screen is displayed.
*2 When the Sound Setup of the Shortcut Setup is selected to “BASS ENGINE SQ,” you cannot perform the set up.

• This setting can also be activated by touching Sound Setup shortcut key on Audio source screen. Refer to “About the Shortcut Key” (page 18).

Fad./Bal. screen

1 Enables you to change to each setting screen.
2 Balance/Fader Image area

Setting the Balance/Fader

Touch the desired point within the image area. Or touch [↑][↓][←][→].

Balance:
- L15 to R15

Fader:
- F15 to R15

• To reset to the initial setting (Balance: 0, Fader: 0), touch [Centre].

Rear Speaker Setting

You can set the rear speaker output to “Off.”

Setting item:
- Rear Speaker

Setting contents:
- On (Initial setting) / Off

Turning Subwoofer ON/OFF

If an optional subwoofer is connected to the unit, make the following setting.

Setting item:
- Subwoofer

Setting contents:
- On / Off (Initial setting)

Adjusting the Subwoofer Level

You can set the Subwoofer level when a Subwoofer is connected.

Setting item:
- Subwoofer Level

Setting contents:
- 0 to 15 (Initial setting: 0)

• This setting is only available when “Subwoofer” is set to “On” ( ).

Setting the Subwoofer Phase

The subwoofer output phase is toggled Subwoofer Normal (0°) or Subwoofer Reverse (180°).

Setting item:
- Subwoofer Phase

Setting contents:
- 0° (Initial setting) / 180°

• This setting is only available when “Subwoofer” is set to “On” ( ).

Setting the Media Xpander (MX HD)

Media Xpander (MX HD) makes vocals or instruments sound distinct regardless of the music source. The Radio (FM)/DAB, USB Flash drive and iPod/iPhone, will be able to reproduce the music clearly even in cars with a lot of road noise.

Setting item:
- MX HD

• When the Defeat setting is “On,” you cannot perform the set up.
• When the Sound Setup of the Shortcut Setup is selected to “BASS ENGINE SQ,” you cannot perform the set up.
• The MX HD setting can be performed only when a source is currently selected.

Adjustable source (media) and setting value

FM/DAB: Off (Initial setting) / Level1 / Level2 / Level3
This corrects information that was omitted at the time of compression. This reproduces a well-balanced sound close to the original.

Compressed Media: Off (Initial setting) / Level1 / Level2 / Level3
Choose the MX HD mode (Compressed Media, Movie, or Music) that corresponds to the media connected.

(Movie)
The dialog portion of the video is reproduced more clearly

(Music)
This disc contains a large quantity of data such as music clip. MX uses this data to reproduce the sound accurately.

• The effectiveness increases as the MX HD setting value increases Level1 → Level2 → Level3.
• You can set this for each source.
• iPod/iPhone/USB Audio/Bluetooth Audio/Apple CarPlay Music/Google Play Music correspond to Compressed Media.

Equalizer Presets

10 typical equalizer settings are preset at the factory for a variety of musical source material.

Setting item:
- EQ Presets

Setting contents:
- FLAT (Initial setting) / POP / ROCK / NEWS / JAZZ / ELECTRONIC / HIP HOP / EASY LISTENING / COUNTRY / CLASSICAL

• Only one type can be set to ON.
• When Equalizer Presets is set, the linked Dual HD EQ settings are also changed. We recommend storing Dual HD EQ settings in a Preset in advance.
• The Equalizer Presets setting can be configured when Defeat is “Off.”
Adjusting the Parametric Equalizer Curve (Dual HD EQ)

Parametric Equalizer (Dual HD EQ) can adjust the centre frequency/Q Adjustment (bandwidth)/level in the front seats and the rear seats, respectively. You can adjust only to the approximate frequency zone, but can then compensate by performing advanced correction of the sound.

Setting item: Dual HD EQ

- When the Defeat setting is “On,” you cannot perform the set up.
- When the Sound Setup of the Shortcut Setup is selected to “BASS ENGINE SQ,” you cannot perform the set up.

1 Adjust the Dual HD EQ to your preference.

Adjusting the Band

Touch [Band] to select the band to be adjusted.

Band1 → Band2 → ⋮ → Band8 → Band9 → Band1

- You can select a band directly by touching the screen.

Adjusting the Frequency

Touch [<] or [>] of “Frequency” to adjust the frequency of the selected band.

Adjustable frequency bands:
20 Hz to 20 kHz (in 1/3 octave steps)

Band1: 20 Hz~100 Hz (63 Hz)
Band2: 63 Hz~315 Hz (125 Hz)
Band3: 125 Hz~500 Hz (250 Hz)
Band4: 250 Hz~1 kHz (500 Hz)
Band5: 500 Hz~2 kHz (1 kHz)
Band6: 1 kHz~4 kHz (2 kHz)
Band7: 2 kHz~7.2 kHz (4 kHz)
Band8: 5.8 kHz~12 kHz (8 kHz)
Band9: 9 kHz~20 kHz (16 kHz)

Adjusting the Level

Touch [−] or [+] of “Level” to adjust the level of selected band.

Setting contents:
-14 to +14 (Initial setting: 0)

Setting the Bandwidth

Touch [<] or [>] of “Q Adjustment” to select the bandwidth.

Setting contents:
Wide (Initial setting) / Medium / Narrow

2 To adjust another band, repeat step 1, and adjust all bands.

3 To store the adjusted setting value, touch and hold [Preset 1], [Preset 2], or [Preset 3] for at least 2 seconds.

- Band2 and Band8 are the same as the Bass and Treble controls.
- For details on setting Bass and Treble, see “Adjusting Bass Level/Treble Level” (page 17).
- Settings exceeding the frequency of adjacent bands are not available.
- While adjusting the Dual HD EQ, you should consider the frequency response of the connected speakers.
- When the Dual HD EQ is adjusted, the Equalizer Presets are overridden.
- When Equalizer Presets is set, the linked Dual HD EQ settings are also changed. We recommend storing Dual HD EQ settings in a Preset in advance.
- Touch [Flat] to initialise all values.

Calling the Dual HD EQ adjusted value

Calling the pre-set Dual HD EQ adjusted value.

Touch [Preset 1], [Preset 2], or [Preset 3] on the Dual HD EQ screen.

The setting stored in the Preset will be recalled.

Before performing the following procedures, see “About the Crossover” (page 32).

Adjusting the Crossover Settings (X-OVER)

Setting item: X-OVER

- When the Sound Setup of the Shortcut Setup is selected to “BASS ENGINE SQ,” you cannot perform the set up.

1 Touch [Channel] to select the channel.

Each time you touch, the channel switches.

- The channel being adjusted is displayed in red.

Adjusting the Cut-Off Frequency

Selecting the Cut-Off Frequency

Touch [<] or [>] of “Frequency,” and then select the cut-off frequency.

Setting contents:
20 / 25 / 31.5 / 40 / 50 / 63 / 80 (Initial setting) / 100 / 125 / 160 / 200 Hz
Adjusting the Slope
Touch [>] or [<] of “Slope,” and then adjust the HPF or LPF slope.

Setting contents:
0 (Initial setting) / 6 / 12 / 18 / 24 dB/oct.

Adjusting the Level
Touch [–] or [+] of “Level,” and then adjust the HPF or LPF level.

Setting contents:
-12 to 0 dB (Initial setting: 0)

3 Repeat steps 1 to 2 to make adjustment to the other channels.

4 To store the adjusted setting value, touch and hold [Preset 1], [Preset 2], or [Preset 3] for at least 2 seconds.

To store the adjusted setting value, touch and hold [Preset 1], [Preset 2], or [Preset 3] for at least 2 seconds.

Calling the X-OVER adjusted value
Calling the pre-set X-OVER adjusted value.

Touch [Preset 1], [Preset 2], or [Preset 3] on the X-OVER screen.
The setting stored in the Preset will be recalled.

Calling the Time Correction Value
Calling the pre-set time correction value.

Touch [Preset 1], [Preset 2], or [Preset 3] on the time correction screen.
The setting stored in the Preset will be recalled.

Setting Defeat
If Defeat is “On,” MX HD, Equalizer Presets and Dual HD EQ functions are turned Off. This disables any settings made for these functions.

Setting item:
Defeat
Setting contents:
Off (Initial setting) / On

Setting the Volume for Each Source

Setting item:

Setting contents*3:
-14 to +14 (Initial setting: 0)

Setting the Volume for Apple CarPlay
When an iPhone 5 or later is connected, after touching [Apple CarPlay], you can adjust Media, Phone Calls, Ringtones & Alerts level, Notifications & Guidance level, Siri and Microphone Level for Apple CarPlay mode.

Setting item:
Media / Phone Calls / Ringtones & Alerts / Notifications & Guidance / Siri / Microphone Level

Setting contents for Media:
-14 to +14 (Initial setting: 0)

Setting contents for Ringtones & Alerts:
1 to 6 (Initial setting: 3)

Setting contents for other items:
1 to 11 (Initial setting: 5)

Setting the Volume for Android Auto
When an Android Smartphone is connected, after touching [Android Auto], you can adjust Media, Phone Calls, Ringtones & Alerts level, Notifications & Guidance level, Voice Recognition and Microphone Level for Android Auto mode.

Setting item:
Media / Phone Calls / Ringtones & Alerts / Notifications & Guidance / Voice Recognition / Microphone Level

Setting contents for Media:
-14 to +14 (Initial setting: 0)

Setting contents for Ringtones & Alerts:
1 to 35 (Initial setting: 10)

Setting contents for other items:
1 to 11 (Initial setting: 5)

*1 Compressed Media is the music data in a USB flash drive (MP3/ WMA/AAC/FLAC).

*2 The source name set in “HDMI Setup” (page 40) is displayed.

*3 Except for Apple CarPlay/Android Auto mode.

• Settable source differs depending on the connected device and settings.
### Adjusting the Caller Level

You can adjust the volume of the incoming call.

**Setting item:**
- **Caller Level**

**Setting contents:**
- 1 to 35 (Initial setting: 10)

### Adjusting the Microphone Level

You can adjust the transmit volume, during the call.

**Setting item:**
- **Microphone Level**

**Setting contents:**
- 1 to 11 (Initial setting: 5)

### Adjusting the Ring Tone Level

You can adjust the receive volume, during the call.

**Setting item:**
- **Ring Tone Level**

**Setting contents:**
- 1 to 6 (Initial setting: 3)

### Key Sound Volume Setting

You can change the volume of the sound heard when a button is touched.

**Setting item:**
- **Key Sound**

**Setting contents:**
- 0 to 6 (Initial setting: 3)

### Auto Volume Setting

The volume of the sound heard is raised automatically according to the noise level by detecting engine noise and road noise.

**Setting item:**
- **Auto Volume**

**Setting contents:**
- Off (Initial setting) / Low / Middle / High

- The increasing rate of volume becomes large in this order: Low → Middle → High.

### Setting Audio Mute On/Off while Backing up

The sound can be muted when the shift gear lever is set to the reverse (R) position enabling you to easily hear sensors, etc., while reversing your car.

**Setting item:**
- **Mute while backing up**

**Setting contents:**
- Off: Does not mute.
- On: Mutes when the shift gear lever is set to the reverse (R) position.

### Setting the Microphone Effect

Set this item when Apple CarPlay is used/Android smartphone which installed Android Auto App is connected.

You can turn on or off the Microphone Effect.

This setting influences Apple CarPlay/Android Auto mode.

**Setting item:**
- **Microphone EC / NR**

**Setting contents:**
- On (Initial setting) / Off

### Default Sound Settings

You can restore the Dual HD EQ/X-OVER/Time Correction*/MX HD Level/Rear Speaker/Subwoofer Level/Subwoofer Phase to factory settings.

**Setting item:**
- **Default Sound Settings**

**Setting contents:**
- Touch [Set], and the confirmation message appears.
- To initialise, touch [OK].

* The setting values that are stored in Preset 1 to Preset 3 cannot be initialised.
About the Crossover

Crossover (X-OVER):
This unit is equipped with an active crossover. The crossover limits the frequencies delivered to the outputs. Each channel is controlled independently. Thus, each speaker pair can be driven by the frequencies for which they have been optimally designed. The crossover adjusts the HPF (high pass filter) or LPF (low pass filter) of each band, and also the slope (how fast the filter rolls off the highs or lows).

Adjustments should be made according to the reproduction characteristics of the speakers. Depending on the speakers, a passive network may not be necessary. If you are unsure about this point, please consult your authorized Alpine dealer.

- HPF (high pass filter): Cuts the lower frequencies and allows the higher frequencies to pass.
- LPF (low pass filter): Cuts the higher frequencies and allows the lower frequencies to pass.
- Slope: The level change (in dB) for a frequency change of one octave.
- The higher the slope value, the steeper the slope becomes.
- Adjust the slope to FLAT to bypass the HP or LP filters.
- Do not use a tweeter without the HPF on or set to a low frequency, as it may cause damage to the speaker due to the low frequency content.
- Adjustment should be made according to the recommended crossover frequency of the connected speakers. Determine the recommended crossover frequency of the speakers. Adjusting to a frequency range outside that recommended may cause damage to the speakers.

For the recommended crossover frequencies of Alpine speakers, refer to the respective Owner’s Manual.

We are not responsible for damage or malfunction of speakers caused by using the crossover outside the recommended value.

### About Time Correction

The distance between the listener and the speakers in a car vary widely due to the complex speaker placement. This difference in the distances from the speakers to the listener creates a shift in the sounds image and frequency characteristics. This is caused by the time delay between the sound reaching the listener’s right versus the left ear.

To correct this, this unit is able to delay the audio signal to the speakers closest to the listener. This effectively creates a perception of increased distance for those speakers. The listener can be placed at an equal distance between the left and right speakers for optimum staging. The adjustment will be made for each speaker in 3.4 cm steps.

#### Example 1. Listening Position: Front Left Seat

Adjust the time correction level of the front left speaker to a high value and the rear right to zero or a low value.

The sound is not balanced because the distance between the listening position and the various speakers is different. The difference in distance between the front left speaker and the rear right speaker is 1.75 m (68-7/8”).

Here we calculate the time correction value for the front left speaker in the diagram on the above.

**Conditions:**
- Farthest Speaker – listening position: 2.25 m (88-9/16”)
- Front left speaker – listening position: 0.5 m (19-11/16”)

**Calculation:**

\[
L = 2.25 \text{ m} - 0.5 \text{ m} = 1.75 \text{ m} (68-7/8")
\]

\[
\text{Time correction} = \frac{1.75 \times 343}{1000} = 6.1 \text{ ms}
\]

* Speed of sound: 343 m/s (765 mph) at 20°C

In other words, giving the front left speaker a time correction value of 5.1 ms makes it seem as if its distance from the listener is the same as the distance to the farthest speaker.

Time correction eliminates the differences in the time required for the sound to reach the listening position.

The time of the front left speaker is corrected by 5.1 ms so that its sound reaches the listening position at the same time as the sound of other speakers.
Example 2. Listening Position: All Seats

Adjust the time correction level of each speaker to almost the same level.

1 Sit in the listening position (driver’s seat, etc.) and measure the distance (in meters) between your head and the various speakers.

2 Calculate the difference between the distance correction value to the farthest speaker and the other speakers.

\[ L = (\text{distance to farthest speaker}) - (\text{distance to other speakers}) \]

These values are the time correction values for the different speakers. Setting these values to make each sound reach the listening position at the same time as the sound of other speakers.

Language Setting

The Setup menu, feedback information, etc. for this unit can be changed to appear in the selected language.

Setting item: Language*1 (Language*2)

Setting contents:
- English / Deutsch / Français / Español / Português / Italiano / Nederlands / Suomi / Norsk / Svenska / Dansk / русский язык / Slovenčina / Polski / Český / Magyar / Ελληνικά / العربية / Türkçe / 中文 / العربية / Bahasa Indonesia

*1 Display in the currently selected language.
*2 Always display in English.

Visual Setup

[Visual] is selected on the General Setup Menu screen in step 1. See “General Setup” (page 27).

You can set up items related to an image.

Settable items differ depending on the application.

[Video] (Video media)*1:
- Visual EQ / Brightness / Colour / Tint / Contrast / Sharpness

[Camera]*2:
- Brightness / Colour / Contrast

[Navigation]:
- Brightness / Contrast

*1 “Video” can be selected while a video is playing.
*2 The camera names are not displayed when “Off” is set (page 41).

Selecting the Visual EQ Mode (Factory’s setting)

You can select a mode suitable for the subject image.

Setting item: Visual EQ

Setting contents:
- Off (initial setting) / Night / Soft / Sharp / Contrast

- Off: Initial Setting
- Night: Suitable for movies in which dark scenes frequently appear.
- Soft: Suitable for CGs and animated films.
- Sharp: Suitable for old movies where images are not clearly shown.
- Contrast: Suitable for recent movies.

- To return to the default video settings, set this function to Off. Any Visual EQ selection or changes made are reset their initial settings.
### Adjusting Brightness

**Setting item:** Brightness  
**Setting content:** -15 to +15 (Initial setting: 0)

You can adjust the brightness between MIN (-15) and MAX (+15). When it reaches the minimum or maximum point, the display shows “MIN” or “MAX” respectively.

### Adjusting Colour of Picture

**Setting item:** Colour  
**Setting content:** -15 to +15 (Initial setting: 0)

You can adjust the colour between MIN (-15) and MAX (+15). When it reaches the minimum or maximum point, the display shows “MIN” or “MAX” respectively.

### Adjusting Tint of Picture

**Setting item:** Tint  
**Setting content:** R15 to G15 (Initial setting: 0)

Adjust the colour from R15 to G15.

### Adjusting Image Contrast

**Setting item:** Contrast  
**Setting content:** -15 to +15 (Initial setting: 0)

You can adjust the contrast between MIN (-15) and MAX (+15). When it reaches the minimum or maximum point, the display shows “MIN” or “MAX” respectively.

### Adjusting Picture Quality

**Setting item:** Sharpness  
**Setting content:** -5 to +5 (Initial setting: 0)

Picture quality adjustment range is -5 to +5. “SOFT” and “HARD” appear as the minimum and maximum values specified.

### Saving and calling the adjusted picture quality

When adjusting audio (video media), you can store the settings made for “Adjusting Brightness, Colour, Tint, Contrast and Sharpness.”

**Setting item:**  
**Preset 1 / Preset 2**

After completing “Adjusting Brightness, Colour, Tint, Contrast and Sharpness” (page 34), touch and hold [Preset 1] or [Preset 2] to save the settings.

Touch [Preset 1] or [Preset 2] to call the saved settings.

### Screen Setup

[Screen] is selected on the General Setup Menu screen in step 2. See “General Setup” (page 27).

You can set up the brightness, colour, display, etc., of the screen.

#### Screen Setup

- **Dimmer**
- **Screen Dimmer Level**

**Setting the Brightness of the Backlighting**

Backlighting is provided by LEDs light built into the liquid crystal panel. The illumination control adjusts the brightness of the backlighting based on the car ambient lighting for easier viewing.

**Setting item:** Dimmer  
**Setting contents:**  
- Auto (Initial setting) / On / Off

- **Auto:** Adjust the brightness of the background illumination of the monitor automatically to the brightness of the car interior.
- **On:** Keep the background illumination of the monitor dark.
- **Off:** Deactivate Auto Dimmer mode to keep the background illumination of the monitor bright.

- When “On” is set, the setting is also applied for the button lighting in “Adjusting the Dimmer of Button Lighting at Night” (page 34), and “Adjusting the Minimum Level of Backlight” (page 35).

**Adjusting the Dimmer of Button Lighting at Night**

You can adjust the brightness of the button lighting at night with the dimmer.

**Setting item:** Key Illumination Level  
**Setting level:** -2 to +2 (Initial setting: 0)

- **This setting is only available when “Dimmer” is set to “On.”**
Adjusting the Minimum Level of Backlight

You can adjust the brightness of the backlight. This function could be used, for instance, to change the screen brightness while travelling at night.

Setting item: Screen Dimmer Level
Setting content: -15 to +15 (Initial setting: 0)

You can adjust the level between MIN (-15) and MAX (+15). When it reaches the minimum or maximum point, the display shows “MIN” or “MAX” respectively.

• This setting is only available when “Dimmer” is set to “On” or “Auto.”

Switching the Display Colour

You can choose from 8 different display colours.

Setting item: Screen Colour
Setting contents:
- Sporty (Blue) / Sporty (Red) / Stylish (White) / Stylish (Red) / Blue (Initial setting) / Light Blue / Green / Amber

Switching the Text Scroll

Scroll display is available if folder name, file name or tag information is entered.

Setting item: Text Scroll
Setting contents:
- Off / On (Initial setting)
  Off: Turns off the scroll mode.
  On: Turns on the Auto scroll mode. Scroll display is repeated as long as the mode is turned on.

Switching the Artwork Position

You can set the artwork position to the centre or the left.

Setting item: Artwork Position
Setting contents:
- Centre / Left (Initial setting)
### Setting Security code

You can set the system to be unusable without entering a password. When you turn this setting to “On” and set a password, password input is required when the system is connected to a battery and turned on for the first time.

**Setting item:**
- Security Code

**Setting contents:**
- Off (Initial setting) / On

**Setting the password**

1. Touch the checkbox “Off” (□) of the Security Code.
2. After the confirmation message appears, touch [OK]. The password setting screen is displayed.
3. Enter a password, then touch [OK].
   - Enter the 6-digit number.
   - Input numbers are displayed as “*”.
   - Touch [X] to delete an entered number.
4. Enter the same password again, then touch [OK]. The password is set and the system returns to the General Setup Menu screen, then the checkbox of the Security Code is set to “On” (✓).
   - If you forget a registered password, you can not use this unit. In this case, service will be required.

**Clearing the password**

1. Touch the checkbox “On” (✓) of the Security Code. The password setting screen is displayed.
2. Enter the password you have set, then touch [OK]. The password is cleared and the system returns to the General Setup Menu screen, then the checkbox of the Security Code is set to “Off” (□).
   - Input numbers are displayed as “*”.

### About INE-F904D

[About] enables you to check the Serial Number, Firmware Version, Model Name, and to initialise various settings.

### Displaying the Product Information

You can view the version information of this product. Make note of this information and refer to it whenever you contact Alpine Tech Support or an Alpine-authorized dealer.

**Setting contents:**
- Serial Number / Firmware Version / Model Name

### Initializing the System

You can initialise all data, to restore the factory settings. Remove the USB flash drive, etc. from the system before operation

**Setting item:**
- Clear All Settings

1. Touch [Reset] of “Clear All Settings.”
2. After the confirmation message appears, touch [OK]. The confirmation screen appears again.
3. Touch [OK]. The system starts initialisation.
   - Do not turn on/off the power, change the ignition key position or remove the screen panel until system restart is completed.

### Setting Demo mode to Off/On

This unit has a Demonstration feature for the display. When you install and use the unit for the first time, the unit will enter demo mode automatically. To quit demo mode, set Demo mode to Off.

**Setting item:**
- Demo mode

**Setting contents:**
- Off / On (Initial setting)

   - If you perform an operation during the Demo mode, the demonstration is temporarily stopped.
Car Setup

[Car] is selected on the General Setup Menu screen in step 1. See “General Setup” (page 27).

Steering wheel Setting

Set this item when Apple CarPlay is used/Android smartphone which installed Android Auto App is connected. This setting influences Apple CarPlay/Android Auto mode.

Setting item:
Steering wheel
Setting contents:
Left (Initial setting) / Right

Installation Setup

Vehicle Setup enables you to check the installation status of Reverse Lead/Parking Brake Lead/Speed Signal/GPS Status/GPS Reception/VP Learning/Sensor Diagnosis, etc.

Setting item:
Installation Status

The Installation check screen is displayed.

- Depending on your vehicle, some installation status may not be checked via this function.

Rear Camera Cover Setup

Use this function when your vehicle's rear view camera is equipped with an electric protective cover. When you turn this setting to “On”, the rear view camera cover will be open automatically during rear camera source. Make sure the Rear Camera Cover is connected to Power Antenna Lead (Blue) correctly. Please refer to the “Connections” section of “Installation Manual” for details.

Setting item:
Rear Camera Cover
Setting contents:
Off (Initial setting) / On

Sources Setup

[Sources] is selected on the Setup main screen in step 3. See “Setup Operation” (page 24).

Sources Setup Menu screen

<Setting items>

Radio
- PI Seek
- RDS Regional
- PTY Language
- PTY31
- FM Tuner Setting

DAB
- Emergency Announcement
- Announcement Mode
- FM Linking
- DAB Antenna Power

AUX*1
- AUX Name*2
- Direct Touch*2
- Signal*2

HDMI*3
- Apple CarPlay*4

*1 This setting cannot be changed while the AUX source is being selected or “Camera with audio” is set to “On” (page 43).
*2 This setting is only available when “AUX” is set to “On” ( ).
*3 This setting cannot be changed while the HDMI source is being selected.
*4 This setting cannot be adjusted when an iPod/iPhone is connected or Apple CarPlay/iPod source is being selected.

The following steps 1 to 3 are common to each “Setting item” of Audio Setup. See each section for details.

1 Select the desired item.
2 To switch the setting, touch [ ], [ ], [ + ], [ — ], or mark the checkboxes “Off” ( ) or “On” ( ).
   - If “>” appears, there is a further hierarchy. Touch the desired item.
3 Touch [ ] to return to the main source screen.
   - To return to the previous List screen, touch [ ]. For details, see “About Basic Operation for List Screen” (page 16).
Radio Setup

[Radio] is selected on the Sources Setup Menu screen in step 1. See “Sources Setup” (page 37).

You can set up the items related to the radio reception sensitivity, etc.

PI SEEK Setting

Setting item: PI Seek
Setting contents: Auto / Off (Initial setting)

Receiving RDS Regional (Local) Stations

When Off is selected, the unit automatically keeps receiving the local RDS station.

Setting item: RDS Regional
Setting contents: On (Initial setting) / Off

Switching the Display Language of PTY (Programme Type)

Setting item: PTY Language
Setting contents:
- ENG (Initial setting) / GER / FRE / SPA / POR / ITA / DUT / DAN / FIN / NOR / SWE / RUS
- ENG: English
- GER: German
- FRE: French
- SPA: Spanish
- POR: Portuguese
- ITA: Italian
- DUT: Dutch
- DAN: Danish
- FIN: Finnish
- NOR: Norwegian
- SWE: Swedish
- RUS: Russian

Setting PTY31 (Emergency Broadcast) Reception

PTY31 (Emergency Broadcast) reception can be set to On/Off.

Setting item: PTY31
Setting contents: On (Initial setting) / Off

- The unit automatically gives priority to an emergency broadcast whenever it begins, and interrupts the programme you are currently listening to when PTY31 is set to “On”.
- The unit will show “Alarm” in the display during PTY31 reception.
- This setting works with the Alarm (Emergency Broadcast) of DAB.

Setting the TUNER (FM) Tone Quality (Tuner Condition)

This unit can set your preferred tone quality for FM radio source.

Setting item: FM Tuner Setting
Setting contents:
- Normal (Initial setting) / HiFi / Stable
  - Normal: Standard setting
  - HiFi: High-quality setting
  - Stable: Control noise

- Noise may be more noticeable when HiFi is set, depending on the reception status. In this case, the Normal setting is recommended.
DAB Setting

[DAB] is selected on the Sources setup menu in step 1. Refer to “Sources Setup” (page 37).

Setting Alarm (Emergency Broadcast) Reception

Turn Alarm (Emergency Broadcast) reception On/Off.

Setting item: 
   Emergency Announcement

Setting contents: 
   Off / On (Initial setting)

   - Off: Emergency Broadcasts will not be received.
   - On: Emergency broadcasts are received regardless of source.

   • This setting works with PTY31 (Emergency Broadcast) of RDS.
   • When an emergency broadcast is received, the volume level will be automatically changed to the memorised level in the traffic information mode. For details, see “Receiving Traffic Announcement” (page 53).

Setting Announcement Reception

You can select your desired station from 8 announcement types. If “On” is set, when the selected announcement is received, the unit will switch to the DAB source screen automatically and will receive the broadcast.

Setting item: 
   Announcement Mode → Transport News / Warning/Service / Area Weather News / Event Announcement / Special Event / Program Information / Sport News / Financial News

Setting contents: 
   Off (Initial setting) / On

Setting the FM Linking ON/OFF (Service Following)

This unit provides FM Linking function which can switch the source from DAB+/DMB to FM radio when the digital signal is weak.

Setting item: 
   FM Linking

Setting contents: 
   Off / On (Initial setting)

   - Off: Keep receiving the digital signal, even when the digital signal is weak.
   - On: If the digital signal is weak, this unit will automatically switch to the analogue FM station with the same PI code. When receiving an analogue FM radio signal, the “FM Linking” indicator is displayed.
AUX Setup

[AUX] is selected on the Sources Setup Menu screen in step 1. See “Sources Setup” (page 37).

You can set up the items related to the Auxiliary device.

- The items related to AUX cannot be changed while the AUX source is being selected or “Camera with audio” is set to “On” (page 43).

**Setting item:**
- AUX

**Setting contents:**

- **Off / On (Initial setting)**
  - Off: AUX source is not displayed.
  - On: AUX source is displayed.

- **Usable 4-pole mini AV plug**

The unit accepts the following 4-pole mini AV plug pin-out:

- Audio L (White)
- Audio R (Red)
- Ground
- Video (Yellow)

- Please check pin-out carefully before use of this product. Depending on the cable, there may be no picture and/or sound.

**Setting the Auxiliary (AUX) Name**

Make sure the AUX is set to “On” ( ). See “AUX Setup” (page 40).

**Setting item:**
- AUX Name

**Setting contents:**

- AUX (Initial setting) / AUX DVD / GAME / External DVD / DVD Changer / DVB-T / TV / USB Player

**Setting Direct Touch Operation**

If DVB-T is set as the AUX Name, this setting is available.

**Setting item:**
- Direct Touch

**Setting contents:**

- **On (Initial setting) / Off**
  - On: Direct Touch operation is available on the DVB-T screen.
  - Off: Direct Touch operation is not available on the DVB-T screen.

Switching the Visual Input Signal System

You can make this setting only when AUX is set to “On” ( ). See “AUX Setup” (page 40).

**Setting item:**
- **Signal**

**Setting contents:**

- Auto (Initial setting) / NTSC/PAL
  - Auto: The video input signal type (NTSC or PAL) will be automatically selected.
  - NTSC/PAL: Choose the video input signal type manually.

HDMI Setup

[HDMI] is selected on the Sources Setup Menu screen in step 1. See “Sources Setup” (page 37).

You can set the name of an external device connected via HDMI.

**Setting item:**
- **HDMI**

**Setting contents:**

- HDMI (Initial setting) / DVD / DVB-T / ACC Control
  - HDMI: Set when a smartphone is connected via HDMI.
  - DVD: Set when an external DVD player is connected.
  - DVB-T: Set when a Mobile Digital TV Receiver (DVB-T) is connected.
  - ACC Control: Set when an ACCESSORY CONTROL BOX is connected.

Apple CarPlay Setup

[Apple CarPlay] is selected on the Sources Setup Menu in step 1. See “Sources Setup” (page 37).

Before connecting an iPhone 5 or later, turn on this item to use the Apple CarPlay function.

**Setting item:**
- **Apple CarPlay**

**Setting contents:**

- **On (Initial setting) / Off**
  - On: Set before an iPhone 5 or later is connected, the Apple CarPlay can be used, but the iPod source, iHeartRadio and Spotify of Alpine Connect are not available at this time. Alpine TuneIt App is not available normally also.
  - Off: Set when you want to use the iPod source, etc., of the connected iPhone 5 or later.

- This setting is invalid for music playing of iPhone 4S and iPod.
System Setup

System Setup Menu screen

<Setting items>

Camera*1
- Camera Select
- Camera Signal*2, 7
- Guide Adjustment*3, 7
- Interrupt (Power OFF)*4
- Camera with Audio*5, 7
- Shutdown Delay*6

CAN-I/F
- Default Vehicle Screen
- Climate screen interrupt time
- Parking sensor interrupt

Unit
- External AP

Application
- Alpine Tunelt App*8

*1 When you select “Camera Selector” in “Camera Select”, the setting item is different. For details, see “Setting Multi Camera to On/Off” (page 43).

*2 When Camera Select is set to “Off,” you cannot select this item.

*3 You can select this item only when Camera Select is “Front” or “Rear.”

*4 You can select this item only when Camera Select is “Rear.”

*5 This setting is available when “Camera Select” is set to Rear and the current source is not “AUX.”

*6 You can set this item only when Camera Select is “Rear.”

*7 Cannot be set when “HDMI Camera” is set in “Setting the Camera Input” (page 41).

*8 Set this setting after closing the Alpine Tunelt App.

Camera Setup

[Camera] is selected on the System Setup Menu screen in step 1. See “System Setup” (page 41).

You can set up items related to the Camera.

Setting the Camera Input

Setting item: Camera Select
Setting contents:
Off (initial setting) / Front / Rear / Other / Camera Selector / HDMI Camera

Front: Front camera
Rear: Rear camera
Other: Side camera, Room camera, etc.
Camera Front Camera / Rear Camera / Side Camera connected to
Camera Selector*: the optional Multi Camera Interface module.
HDMI Camera: HDMI Camera

* When selecting Camera Selector, you can set the Front Camera / Rear Camera / Side Camera to On/Off. For details, see “Setting Multi Camera to On/Off” (page 43).

Setting the Camera Signal Input

When the camera is connected, the video input signal type can be chosen.

Further setting item: Camera Signal
Setting contents:
NTSC (initial setting) / PAL

Switching Video Patterns for Multi View Camera

The video pattern can be changed when connected to Multi View Camera.

When Camera Select is set to “Off” or “Other,” you cannot select this item.

Setting item: Guide Adjustment

1 Touch [Guide Adjustment].
   The camera guide adjustment screen is displayed.

Multi View compatible Side Camera

2 Touch [Front] or [Rear].
   The view will change to the selected view.

The following steps 1 to 3 are common to each “Setting item” of System Setup. See each section for details.

1 Select the desired item.

2 To switch the setting, touch [ ], [ ], [ ], [ ], or mark the checkboxes “Off” ( ) or “On” ( ).
   - If “ appears, there is a further hierarchy. Touch the desired item.

3 Touch [ ] to return to the main source screen.
   - To return to the previous List screen, touch [ ]. For details, see “About Basic Operation for List Screen” (page 16).
Multi View compatible Front Camera/Rear Camera

2 Touch [Back], [Panorama], [Corner], or [Top].
   The view will change to the selected view.
   • [Back] will not appear for the Front camera.
   • For an explanation of video patterns, see the camera Owner’s Manual.

Adjusting the Rear/Front/Side Camera Guide

You can adjust the camera guide position.

**Setting item:**
Guide Adjustment

1 Touch [Guide Adjustment].
   The camera guide adjustment screen is displayed.
   • If the video pattern is set to “Corner (Rear/Front Camera only),” the camera guide will not be displayed.
   • When you connect a Multi View compatible camera, select a Video Pattern to make a guide adjustment.
   • When you connect a Multi View compatible Side Camera, after selecting the Video Pattern, touch [ ] (Left steering) or [ ] (Right steering) to make the guide adjustment that matches the position of the steering wheel in your vehicle.

2 Touch [Adjust].
   • If [Adjust] does not appear, proceed to step 3.

3 Touch the guide you intend to adjust.
   Guide line can also be selected by touching [ ] [ ].

   **Rear Camera screen example**

   • You cannot adjust the position of the yellow guide line “ ” in the centre independently.
   It is controlled by a system to be the centre of the two yellow guide lines “ ” and “ ” on the left and right, or the central green line “ ” and red guide line “ ”.

   **Front Camera screen example**

   **Side Camera screen example**

4 Touch [ ], [ ], [ ] or [ ] to adjust the position of the guide.
   • Touching [Clear] clears adjustments and returns to the setting before guide line alteration.

5 After the adjustment is completed, touch [Set].

Adjusting Guides Simultaneously (for Rear/Side Camera only)

   **<Rear Camera>**

1 Touch [Link].
   The 3 vertical guides of the currently-selected guide link together, allowing them to be adjusted simultaneously.

   • Note on the yellow guide line “ ” in the centre
   The yellow guide line “ ” in the centre is controlled by a system that locates it in the centre of the two yellow guide lines, “ ” and “ ” on the left and right, or the green line “ ” on the top and red guide line “ ” below. Therefore you cannot move it manually.

   **<Side Camera>**

1 Touch [Link].
   The 2 vertical guides of the currently-selected guide link together, allowing them to be adjusted simultaneously.
Turning Guide Display On/Off (Rear/Front Camera only)

1 Touch [On/Off].
   The currently selected guide will turn off.
2 To turn the guide on, touch [On/Off] again.
   - Guides that are turned off are still adjustable.

Returning Guides to Default
1 Touch [Default].
   A message window will appear.
2 Touch [OK].
   Adjusted values will return to default settings.

Camera Interrupt Setting (Power OFF Mode) (Rear Camera Only)

You can set whether to display the rear camera image when the gear lever is moved to the reverse (R) position while the unit is turned off. You can select this item only when Camera Select is “Rear.”

Setting item:
Interrupt (Power OFF)
Setting contents:
On (Initial setting) / Off
   On: The rear camera image is displayed
   Off: The rear camera image is not displayed

Setting Camera with Audio On/Off

If your vehicle support the Rear camera with audio function, you can set whether to listen to the outside sound when the gear lever is moved to reverse(R) position. (e.g. the shouts of people outside your vehicle)
You can select this item only when Camera Select is “Rear” and current source is not AUX.

Setting item:
Camera with Audio
Setting contents:
Off (Initial setting) / On
   Off: The sound outside the vehicle will not be transmitted inside via speakers.
   On: The sound outside the vehicle will be transmitted inside via speakers.

Setting Multi Camera to On/Off

When connecting the optional Multi Camera Interface module, you can connect up to 3 cameras as Front Camera/Rear Camera/Side Camera.
- When using the optional Multi Camera Interface module, select “Camera Selector” to set the “Front Camera / Rear Camera/Side Camera” to “On”(✓)/“Off” ( ).

### Setting Item:

*1 You can change the Default Camera only when you set more than one camera for Front Camera/Rear Camera/Side Camera to “On.” For details, see “Setting a Default Camera” (page 43).
*2 You can select this item only when Rear Camera is selected and current source is not AUX.

Setting a Default Camera

When connecting an optional Multi View Camera, you can set which camera image is displayed when you touch the Camera button on the Menu screen.

Setting item:
Default Camera
Setting contents:
Front / Rear / Side

- The initial setting differs depending on the cameras set to “On” in “Setting Multi Camera to On/Off”

Setting Shutdown Delay to On/Off

You can select to view front or rear camera image for a moment even if you shift the gear lever from reverse(R) to other position.

Setting item:
Shutdown Delay*1
Setting contents:
On: The rear view image is displayed while the car remains in reverse. If you shift the gear lever to a position other than reverse(R), the monitor will display the front*2, 4 or rear*3, 4 view image for 10 seconds and then return to the previous screen.
Off: The rear view image is displayed while the car remains in reverse. If you shift the gear lever to a position other than reverse(R), the monitor will return to previous screen immediately.

*1 You can set this item only when Camera Select is “Rear”, or when “Camera Selector” is selected and “Rear Camera” is “On”.
*2 Only when front camera is connected.
*3 When there is no connected front camera.
*4 When the vehicle is moving forward and the speed is greater than a certain value, the monitor will return to previous source screen automatically.
CAN-I/F Setup

[CAN-I/F] is selected on the System Setup Menu screen in step 1. See “System Setup” (page 41).

- CAN-I/F BOX should be connected before this operation.

Setting the Default Vehicle Screen

Touch the Menu screen (page 18) to display the Info mode screen, and then set the following.

Setting item: Default Vehicle Screen
Setting contents: Climate / Park sensor / Last mode (Initial setting)

- For details on the Vehicle Info mode screen, see “About Vehicle Interlock Function” (page 74).

Setting the Climate Interrupt Time

You can set the time displayed in the Climate screen.

Setting item: Climate screen interrupt time
Setting contents:
- None: The Climate screen is not displayed when you adjust the air conditioner, etc.
- 5 sec/10 sec*: The Climate screen is displayed for 5 seconds/10 seconds, then returns to the previous screen.
- Continuous display: The Climate screen is continuously displayed.

* If you set the air conditioner, etc., while the Climate screen is displayed, the screen will continuously be displayed.

- For details, see “About Vehicle Interlock Function” (page 74).

Setting the Parking Sensor Interrupt On/Off

Set to “On” to display the Parking Assist screen if a vehicle detects an obstacle.

Setting item: Parking sensor interrupt
Setting contents:
- Off / On (Initial setting)

- For details, see “About Vehicle Interlock Function” (page 74).

Unit Setup

[Unit] is selected on the System Setup Menu screen in step 1. See “System Setup” (page 41).

Make this setting when you use an external audio processor.

Setting the External AP

When using an external audio processor, set to “On” ( ).

Setting item: External AP
Setting contents:
- Off (Initial setting) / On

- When this setting is “On,” the Volume level is fixed at 10. Also, Balance/Fader/Subwoofer Level/Subwoofer Phase/Bass/Treble/MX HD/EQ Presets/Dual HD EQ/X-OVER/Time Correction/Defeat/Phone Speaker/Default Sound Settings are set to “Off” or “Flat” and cannot be adjusted.
- Use the external AP to adjust volume.
Application Setup

Set Alpine TuneIt App to USB (iPhone) when an iPhone is connected, or set to Bluetooth (Android) when an Android Smartphone is paired.

**Setting Item:**
Alpine TuneIt App*

**Setting contents:**
Off / USB (iPhone) (Initial setting) / Bluetooth (Android)

- Off: No Smartphone is connected.
- USB (iPhone): When an iPhone is connected to the unit’s USB port, you can programme the unit’s sound tuning parameters, or communicate with SNS.
- Bluetooth (Android): Set this when an Android Smartphone is paired with this unit via Bluetooth technology. And after Bluetooth Audio is connected, you can programme the unit’s sound tuning parameters, or communicate with SNS.

- For this function to work properly, specific applications must be installed on your Smartphone before connection. Consult your Alpine dealer or the Alpine website for details.
- Only the iPhone and certain Android Smartphones support this function.

* Set this setting after closing the Alpine TuneIt App.
What is Android Auto

Android Auto is designed to make it easier to use apps from your phone while you’re on the road. Navigate with Google Maps, listen to playlists or podcasts from your favourite apps, and more.

Activate Android Auto

Download the Android Auto App from the Google Play store before continuing.
Just plug in your smartphone to the unit’s USB connector, then follow the prompt to pair your smartphone with the unit.

- The connected smartphone with Android Auto will disconnect other phone’s Bluetooth connection and pair to the unit.

1 Press the (MENU) button.
The Menu screen is displayed.

2 Touch [Android Auto].
The Android Auto screen is displayed.
- When a used smartphone is reconnected, touch the pop-up message—“Android Auto connected” within 5 seconds to access to Android Auto screen, or you can ignore prompt by touching [X] on the top right.
- You can make a call, use voice recognition function and Android Auto’s compatible navigation app, etc.
- Only Google approved apps with necessary driver-safety measures in place can be used.

Access to Apple CarPlay

Apple CarPlay is a smarter, safer way to use your iPhone in the car. Apple CarPlay takes the things you want to do with your iPhone while driving and puts them right on the unit. You can get directions, make calls, send and receive messages, and listen to music, all in a way that allows you to stay focused on the road. Just plug in your iPhone to the unit and go.

- Before using this function, turn Apple CarPlay to On (page 40) and plug in your iPhone using Lightning to USB Cable (Supplied with iPhone) to the unit.
- Some functions may not be available while driving.
- About iPhone models usable with this unit, see “iPod/iPhone (Optional)” (page 57). Only an iPhone 5 or later compatible with Apple CarPlay function.

1 Press the (MENU) button.
The Menu screen is displayed.

2 Touch [Apple CarPlay].
The Apple CarPlay mode is activated.
Touch the desired App icon on the unit, or use Siri function by pressing  button.
- When a used iPhone 5 or later is reconnected, touch the pop-up message—“Apple CarPlay connected.” within 5 seconds to access to Apple CarPlay screen, or you can ignore prompt by touching [X] on the top right.
- The App must be Apple CarPlay compatible in order to appear in the Home screen.
Radio/RDS

RDS (FM1/FM2) main screen example

- **Function mode**
  - **① Source Title/Band display**
    - Displays the band of the signal currently being received.
  - **② RDS indicator**
  - **③ Info area**
    - Station Info. Mode: PTY / Frequency or PS / Artist Name / Song Name / Album Name
    - Radio Text Mode: Frequency / Radio Text
      - For details on switching the display of the Radio text, see "Displaying Radio Text" (page 50).
  - **④ Preset mode button**
    - Touch when you use the Preset mode screen.
  - **⑤ PTY list button**
    - Touch when you use the PTY list screen.

MW/LW band main screen example

- **① Band display**
  - Displays the band of the signal currently being received.
- **② Frequency display**
- **③ Preset mode button**
  - Touch when you use the Preset mode screen.

Preset mode screen example

- **④ Preset button**
  - Swipe vertically in the list to change pages.

Preset mode screen example

- **⑥ Preset button**
  - Swipe vertically in the list to change pages.
- **⑦ Touch to close the Preset mode screen**
Radio Basic Operation

Listening to the Radio

1. **Press the ♯ [MENU] button, then touch [Radio].**
   The display shows the radio mode screen.
   - You can select and change the source in Favourite screen (page 21).

2. **Touch [Radio].**
   The radio band select pop up screen is displayed.
   - [Radio] button displays the current selected band. (e.g. [FM1])

3. **Select the desired band from FM1/FM2/MW/LW.**

4. **Touch [[].**
   The tuning mode selection popup is displayed.
   - [ ] button displays the current selected mode. (e.g. [DX Seek])

5. **Touch the desired tuning mode.**
   The radio frequency up or down button changes depending on the tuning mode.
   - DX Seek
   - Local Seek
   - Manual
   - PTY
   - Preset

   • There are two modes you can select for auto tuning, DX and Local:
     - DX Seek (Distance) mode;
     - Local Seek mode;
     - Only strong stations will be tuned in.
     - The initial setting is DX.
     - Manual mode;
     - PTY Seek mode (RDS FM Radio Mode only);
     - The currently selected programme type station will be tuned.
     - Preset (Preset UP/DN) mode;
     - You can directly switch preset stations.

6. **Touch [[], [ ]], or [ [ ] ] to change the radio frequency up or down respectively.**
   In manual mode, touch and hold to change the frequency continuously.
   * The [[], [ ]], [ [ ] ] buttons provide the same functions above.

---

Presetting Stations Manually

1. **Tune in a desired radio station you wish to store in the preset memory by manual or automatic seek tuning.**

2. **Touch the Preset number you want to store, for at least 2 seconds.**
   The selected station is stored.

3. **Repeat the procedure to store up to 11 other stations onto the same band.**
   To use this procedure for other bands, simply select the desired band and repeat the procedure.
   A total of 48 stations can be stored in the preset memory (12 stations for each band; FM1, FM2, MW or LW).
   - For details on switching to the Preset mode screen, see 3 in “MW/LW band main screen example” (page 47).
   - If a preset memory has already been set in the same preset number, it will be cleared and the new station will be memorised.

---

Presetting Stations Automatically

The tuner can automatically seek and store 12 strong stations in the selected band in ascending order of frequency.

**Select the desired band then touch and hold [[ ] ] (Auto Memory).**

The tuner automatically seeks and stores 12 stations into the preset buttons according to signal strength.
When automatic storing has completed, the station stored in the preset 1 is selected.
   - If no stations are stored, the tuner will return to the original station you were listening to before the automatic storing procedure began.
   - You can cancel this process by touching [[ ] ] (Auto Memory) while the tuner is automatically seeking stations. Canceling will return the tuner preset to the previous setting.

---

Tuning to Preset Stations

You can tune in the preset stations in memory on either band using its preset number.

1. **Touch [[ ].**
   The radio band select pop up screen is displayed.
   - [[ ] ] button displays the current selected band. (e.g. [FM1])

2. **Select the desired band from FM1/FM2/MW/LW.**

3. **Touch any one of the Preset numbers you have already stored in the Preset mode screen.**
   The preset station is received.
   - For details on switching to the Preset mode screen, see 3 in “MW/LW band main screen example” (page 47).
   - You can also switch the preset station by touching [ ] or [ ] when the tuning mode of “Preset” is chosen.
Inputting Frequency Directly and Receiving the Radio Station

You can input a frequency of the same band directly and receive the radio station.

1. **Touch** [Direct Tune] (Direct Tune). The numeric keypad input mode screen appears.

2. **Touch a desired number.**

   Touch [Clear] to delete an entered number. Touch [Delete All] to delete all entered numbers.

3. **Touch [Enter] on the numeric keypad mode screen to confirm your selection.** Touch [X] to hide the keypad display.

RDS Operation

**Turning AF (Alternative Frequencies) On or Off**

The RDS (Radio Data System) is a radio information system using the 57 kHz subcarrier of regular FM broadcasts. The RDS allows you to receive a variety of information such as traffic information, station names, and to automatically re-tune to a stronger transmitter that is broadcasting the same programme.

**Touch** [AF] (AF) to select the AF (Alternative Frequency) ON or OFF mode. In AF ON mode, the “AF” indicator lights up.

- RDS mode is not be displayed for the MW or LW band.
- When the AF ON mode is selected, the unit automatically tunes to a strong signal station in the AF list.
- Use the AF OFF mode when automatic re-tuning is not required.

**Tips**

- The RDS digital data includes the following:
  - PI Programme Identification
  - PS Programme Service Name
  - AF List of Alternative Frequencies
  - TP Traffic Programme
  - TA Traffic Announcement
  - PTY Programme Type
  - EON Enhanced Other Networks
- Refer to page 38 about “PI SEEK Setting,” “Receiving RDS Regional (Local) Stations,” “Switching the Display Language of PTY (Programme Type)” and “Setting PTY31 (Emergency Broadcast) Reception.”

**Interruption Function**

If the Interruption Function is enabled, when the following broadcast is received, the unit switches to the Radio source screen automatically, and will receive broadcasts.

- PTY31 (Emergency Broadcast)*1, 2
- TA (Traffic Announcement)*1
- News programme*2

*1 Set PTY31 to “On” in “Setting PTY31 (Emergency Broadcast) Reception” (page 38).

*2 Not interrupted during the DAB broadcast reception.

**Tips**

- "RDS Alarm"/"RDS T.Info"/"RDS News" is displayed in the Band display section during each respective broadcast reception.
- To cancel the Interruption function, touch the RDS main screen or press any of the following buttons.
  - (MENU)/(NAV)
- When the interruption broadcast is over, the unit returns to the previous screen.
- Does not interrupt during Hands-free phone talk. During camera image display, only the sound may be interrupted.
- The volume level will be memorised if the volume is adjusted during interruption broadcast reception. When an interruption broadcast is received the next time, the volume level is automatically adjusted to the memorised level.
Receiving Traffic Announcement

Touch \( \textcolor{red}{\text{TA}} \) (TA).

The “TA” indicator lights up and the unit switches to standby mode for the traffic announcement.

When the traffic announcement is received, the “TP” indicator lights up and the unit switches to the radio source screen to receive it.

- The “TP” indicator lights up during standby mode off in a condition other than radio source to indicate that the unit is receiving the traffic announcement.
- If the traffic announcement broadcast signal falls below a certain level, the unit remains in the receiving mode for 1 minute. If the signal remains below a certain level for over 70 seconds, “TA” will blink in the display.

News Programme Interruption

The “NEWS” indicator lights up and the unit switches to standby mode for the News programme. When the News programme is received, the unit switches to the radio source screen to receive it.

Receiving Traffic Information Manually

1. Touch \( \textcolor{red}{\text{TA}} \) (TA) to turn on the Traffic Information mode.
   The “TA” indicator lights up.

2. Touch [\( \text{\textarrowright} \)] or [\( \text{\textarrowleft} \)].
   Seeks the broadcast station which is broadcasting the traffic information.

- You can seek the traffic information in DX Seek mode or Local Seek mode.

Selecting the Receivable PTY

You can select and receive the currently receivable stations in the PTY list screen.

1. Touch the PTY list button.
   The Select PTY list screen is displayed.
   - For details on switching to the PTY list screen, see Fig. in “Preset mode screen example” (page 47).

PTY list screen example

![PTY list screen example](image)

2. Select the desired programme type in the PTY list screen.
   PTY Seek starts and the receivable programme type is received.
   If no PTY station is found, “No PTY” will be displayed.
   - Touch [\( \text{\textarrowdown} \)] or [\( \text{\textarrowup} \) to select the same programme type station as the currently selected programme type after switching the tuning mode to PTY (PTY Seek) mode.

Displaying Radio Text

Text messages from a radio station can be displayed.

1. Tune in a radio station that transmits text messages.

2. Touch [Info] in the FM radio mode repeatedly to switch to the desired display.
   Station Info. Mode → Radio Text Mode → Station Info. Mode
   Station Info. Mode
   PTY/Frequency or PS/Artist Name/Song Name/Album Name

   Radio Text Mode
   Frequency/Radio Text
**DAB/DAB+/DMB**

**DAB main screen example**

1. Source Title/Announcement
2. DAB indicator (Signal Strength/Service Component/FM Linking)
3. Info area
   - Station Info Mode
     - Frequency, Channel No./Ensemble Label/Service Label/PTY Name
   - Dynamic Label Mode
     - Dynamic Label (Displaying the information related to the current receiving station)
     - For details on switching the display, see "Displaying DAB Text" (page 53).
4. Full Search mode button (All Service list, Current Ensemble list or PTY list is displayed)
   - Touch when you use the Full Search mode screen.
5. Slide Show
   - Displays the program information, artist photos, and advertisements that are synchronised with the Service component currently being received. *
   - You can change the artwork position. For details, see "Switching the Artwork Position" (page 35).
6. Preset mode button
   - Touch when you use the Preset mode screen.
   - They may not be displayed, depending on the Service component currently being received.

**Function mode**

- Ensemble Seek
- Ensemble Manual
- PTY
- Service
- Preset

**Listening to DAB/DAB+/DMB**

1. **Press the (MENU) button, then select DAB mode.**
   - The display shows the DAB mode screen.
     - You can select and change the source in Favourite screen (page 21).
2. **Touch [+-].**
   - The tuning mode selection popup is displayed.
     - [+-] button displays the current selected mode. (e.g. [Ensemble Seek])
3. **Touch the desired tuning mode.**
   - Ensemble Seek mode:
     - Receivable ensembles will be tuned in automatically.
   - Ensemble Manual mode:
     - Each ensemble is tuned in one step at a time manually.
   - PTY Seek mode:
     - Service (Primary Component) of the selected PTY will be tuned in.
   - Service (Service Up/Down) mode:
     - Service Components in the All Service list will be switched.
   - Preset (Preset UP/DN) mode:
     - The Preset station will be tuned in directly.
4 Touch [►]/[◄] or [▲]/[▼] to change the Service or Ensemble up or down respectively.
   Touch and hold to change the Service or Ensemble continuously.
   - The [◄, ►] buttons provide the same functions above.

Presetting Service

1 Select the band and ensemble, and then tune in a desired service you wish to store in the preset memory.
2 Touch the preset number you want to store, for at least 2 seconds.
   The selected station is stored.
   The display shows the service label or channel number memorised.
3 Repeat the procedure to store up to 17 other stations onto the same band.
   To use this procedure for other bands, simply select the desired band and repeat the procedure.
   - A total of 18 services can be stored in the preset memory.
   - If you store a service in a preset memory which already has a service, the current service will be cleared and replaced with the new service.
   - For details on switching to the Preset mode screen, see in "DAB main screen example" (page 51).

Tuning to Preset Service

You can tune in the preset stations in memory on either band using its preset number.

Touch any one of the preset buttons that has a service stored to it.
   The preset service is received.
   - For details on switching to the Preset mode screen, see in "DAB main screen example" (page 51).

Service Component/PTY Search Function

You can select your favourite Service Component from the All Service list, Current Ensemble Service list or PTY Search list.

Service Search Function

1 Touch [ ] (Search).
2 Touch (All) or (Current Ensemble).
   The All Service list or Current Ensemble list in the Full Search mode screen is displayed.
   - All: All the currently available Service Component (Primary/Secondary) lists are displayed.
   - Current Ensemble: Selectable Service Component (Primary/Secondary) lists from the Ensemble currently being received are displayed.
3 Touch the desired Service component.
   The selected service component is received.
   - A Secondary Service list that was derived from the Primary Services is displayed in the Service Component list.
   - The TP indicator is displayed in the Service Component (Primary) list currently being received.

• The PTY is displayed in the Service Component (Primary) list currently being received.
• You can also narrow down the options and search the Service name using the alphabet search function. (Primary Component only) For details, see "Alphabet Search Function" (page 59).

PTY Search Function

1 Touch [ ] (PTY Search).
   A programme type list that was derived from the Primary Services currently being received as Service components is displayed.
   - When the All Service list or Current Ensemble list screen is being displayed, touch [ ] (PTY).
2 Touch the desired programme type.
   The Service Component list that corresponds with the selected programme type is displayed.
3 Touch the desired Service Component.
   The selected Service Component is received.

List Update Function

You can update each list while it is being displayed.

Touch [ ] (List Update).
   The list is updated to the currently available list.

Interruption Function

If Interruption Function is enabled, when the following broadcast is received, the unit switches to the DAB source screen automatically, and will receive broadcasts.
- Alarm (Emergency Broadcast)*1, 2
- TA (Traffic Announcement)*4
- Announcement*2, 3
- News Announcement*2

*1 Set Alarm to “On” in “Setting Alarm (Emergency Broadcast) Reception” (page 39).
*2 Not interrupted during the RDS broadcast reception.
*3 Select the Announcement type received in “Setting Announcement Reception” (page 39), then set the Announcement setting to “On.”
*4 The Interruption Function for Traffic Announcements works with RDS broadcasts. Therefore, even if the current source is DAB, a Traffic Announcement by RDS broadcast may interrupt.
   - “DAB Alarm”/“DAB T.Info”/“DAB News” is displayed respectively on the Source title section during each broadcast reception.
   The display differs during announcement reception depending on the announcement type set in “Setting Announcement Reception” (page 39).
   - To cancel the Interruption function, touch the DAB main screen or press any of the following buttons. [MENU]/[◄, ►, ▲, ▼] (NAVI)
   - When the interruption broadcast is over, the unit returns to the previous screen.
   - Does not interrupted during Hands-free phone talk. During camera image display, only the sound may be interrupted.
   - The volume level will be memorised if the volume is adjusted during interruption broadcast reception. When an interruption broadcast is received the next time, the volume level is automatically adjusted to the memorised level.
Receiving Traffic Announcement

Touch (TA). The “TA” indicator lights up and the unit switches to standby mode for the traffic announcement.
When the traffic announcement is received, the “TP” indicator lights up and the unit switches to the DAB source screen to receive it.
- The “TP” indicator lights up during standby mode off in a condition other than the DAB source to indicate that the unit is receiving the traffic announcement.
- This setting works interlocked with the traffic announcement (Emergency Broadcast) of RDS.

News Programme Interruption

Touch (News). The “NEWS” indicator lights up and the unit switches to standby mode for the News announcement.
When the News announcement is received, the unit switches to the DAB source screen to receive it.
- This setting works interlocked with the News announcement (Emergency Broadcast) of RDS.

Inputting Channel Number Directly and Receiving the Broadcasts

You can receive your desired station by inputting the channel number directly.

1 Touch (Direct Tune). The numeric keypad input mode screen appears.

2 Input the desired channel number.

You can enter channel numbers of up to three digits.
Each time you enter a number, receivable channels will be narrowed down.
- Touch ( ) to delete an entered number.
- To delete all the numbers you have entered, touch ( ) for at least 2 seconds.

3 Touch (OK).

Switching to Secondary Service Components

When the current Service Component includes Secondary Service components, the Function mode switch (Sub.Ch) becomes available.

Touch (Sub.Ch). The Primary indicator switches to the Secondary indicator, and the Secondary Service Component is received.
- When the Secondary Service Component finishes, the unit automatically switches to the Primary Service Component.
- Touch (Sub.Ch) again to switch to the Primary Service Component while receiving the Secondary Service Component.
- If there are more than one Secondary Service Component, each time you touch (Sub.Ch) the indicator changes in the order of Secondary1 → Secondary2 ... → Primary.

Displaying DAB Text

Text messages from a DAB station can be displayed.

1 Tune in a DAB station that transmits text messages.

2 Touch (Info) in the DAB mode repeatedly to switch to the desired display.
Station Info Mode → Dynamic Label Mode → Station Info Mode
- Station Info Mode
Frequency, Channel No./Ensemble Label/Service Label/PTY Name
- Dynamic Label Mode
Dynamic Label (Displays the information related to the current receiving station)

About DAB/DAB+ / DMB

What is DAB?
DAB (Digital Audio Broadcasting) is the third generation broadcasting technology following the traditional analogue technologies such as FM. The advantages of DAB include being more robust with regard to noise, interference, instability, etc., during radio signal transmission. Also, it can provide stereo CD-quality sound and digital information, and it can resist multipath interference guaranteeing high-quality reception for fixed, portable and mobile devices.

What is DAB+?
WorldDMB, the organisation in charge of the DAB standards, announced DAB+, a major upgrade to the DAB standard in 2006, when the HE-AAC v2 audio codec (also known as eAAC+) was adopted. The new standard, which is called DAB+, has also adopted the MPEG Surround audio format and stronger error correction coding in the form of Reed-Solomon coding. DAB+ has been standardised as ETSI TS 102 563.

What is DMB?
DMB (Digital Multimedia Broadcasting) is a future-orientated, new generation broadcasting system based on DAB (Digital Audio Broadcasting). Where DAB upgraded the traditional analogue sound of FM to a CD-quality level, DMB advances simple sound broadcasting to the multimedia arena, striving to provide a visual service while transmitting high-quality sound. Users include entertainment programmes, intellectual traffic navigation, electronic newspapers and magazines, information provided by financial markets, the Internet, and integrated city information. It can be widely used by mobile carriers such as buses, taxis, light railways, underground railways, trains, ferries, airports, and by all kinds of people in the home and office.
You can play back music files (MP3/WMA/AAC/FLAC) and video files (AVI/MKV/MP4) stored in a USB flash drive on the internal player of this system.

**WARNING**

It is dangerous (and illegal in many states) for the driver to watch TV/video while driving the vehicle. The driver may be distracted from looking ahead and an accident could occur.

Install the unit correctly so that the driver cannot watch TV/video unless the vehicle is stopped and the emergency brake is applied.

If the unit is not installed correctly, the driver will be able to watch TV/video while driving the vehicle and may be distracted from looking ahead and cause an accident. The driver or other people could be severely injured.

---

**USB Audio main screen example**

- Artwork display
  - You can change the artwork position. For details, see "Switching the Artwork Position" (page 35).
- Current track no./Total song no.
- Artist title
- Song title
- Album title
- Elapsed time
- Info mode switching button
- Info mode display
- File Name
- Quick Search button
  - Touch to use the Quick Search mode.
- Full Search mode button
  - Touch when you use the Full Search mode screen.

**Quick Search mode screen example**

Swipe vertically in the list to change pages.

**USB Video main screen example**

- Touch to close the Quick Search mode

**The USB Video operation screen display during video file playback**

Touch the screen while the USB Video playback screen is displayed.

The USB Video operation screen is displayed.

- The operation screen changes to the visual screen in the USB Video mode for 5 seconds after an operation has been performed.
- For your safety, video is not displayed and only audio can be heard while driving.
Playback

1 Press the (MENU) button, then touch [USB].
   The display shows the USB mode screen.
   • You can select and change the source in Favourite screen (page 21).

2 Touch [ ] or [ ] to select the desired track (file).
Returning to the beginning of the current (or previous) track (file):
   Touch [ ].

Fast reverse*:
   Touch and hold [ ].

Advancing to the beginning of the next track (file):
   Touch [ ].

Fast forward*:
   Touch and hold [ ].
   • The [ ], [ ] buttons provide the same functions above.

3 To pause playback, touch [ ].
   Touching [ ] again will resume playback.
   During playback, the [ ] indicator is displayed in Audio main screen. During a pause, the [ ] indicator is displayed in the Audio main screen.

* For details on Fast-forwarding/Fast-reversing during USB video playback, see “Fast-forwarding/Fast-reversing (USB Video only)” (page 55).
   • The playback time may not be correctly displayed when a VBR (Variable Bit Rate) recorded file is played back.
   • If there is tag information, artist name/album name/track name is displayed.
   • ID3 tag/WMA tag
   If an MP3/WMA/AAC/FLAC file contains ID3 tag/WMA tag information, the ID3 tag/WMA tag information is displayed. (e.g., song name, artist name, and album name)

Stopping Playback (USB Video only)

Touch [ ] during playback.
   “STOP” indicator is displayed, and playback stops.
   • Playback starts from the beginning when [ ] is touched while playback is stopped.

Repeat Play

1 Touch [ ].
   The Repeat mode select pop up screen is displayed.
   • The [ ] button displays the currently selected mode.

2 Select your desired Repeat mode.
   Folder : Only files in a folder are repeatedly played back.
   File : Only the file currently playing is repeatedly played back.
   OFF : Repeat mode Off.

Random Play (USB Audio only)

1 Touch [ ].
   The Random Play mode select pop up screen is displayed.
   • The [ ] button displays the currently selected mode.

2 Select your desired Random Play mode.
   ALL : All songs in the USB flash drive are played back in random sequence. Any one song does not play back again until all songs have been played back.
   Folder : A Folder is selected randomly and songs in the Folder are played back in order. After all songs are played in a Folder, the next Folder is selected randomly.
   File : Only files in a folder are played back in random sequence.
   OFF : Random mode Off.
   • If you select a track by using the search mode, the Random Play mode will be cancelled.

Fast-forwarding/Fast-reversing (USB Video only)

1 During playback, touch and hold [ ] (Fast-reverse) or touch and hold [ ] (Fast-forward).
   Touch and hold for more than 1 second to forward/reverse at 8x speed. Keep touching to switch the speed to 16x and 32x.

2 Release [ ] or [ ] to return to normal playback.
   • No sound is played back during fast-forwarding/fast-reversing.
Searching for a Desired Song

You can search for your desired song by using one of two modes; the Quick Search mode and the Full Search mode.

Quick Search mode

Touch your desired Folder name or File name.
The selected Folder*1 or File is played.

*1 The first file in the selected folder is played back.

- For details on switching to the Quick Search mode, see  in “USB Audio main screen example” (page 54).

Full Search mode

1 Touch [Audio] or [Video] to switch whether the search list displays music files or video files.

2 Touch your desired Folder name*2 or File name.
When you select a File name, the selected song is played.
When you select a Folder name, repeat the same procedure to select another Folder name or File name.

*2 When you touch the [ ] by a Folder name, the unit plays from the first song in the Folder.

- For details on switching to the Full Search mode, see  in “USB Audio main screen example” (page 54).
- To switch the displayed list or return to the previous page in the Full Search mode, see “About Basic Operation for List Screen” (page 16).

Switching Display Modes (During Video File Playback)

You can switch the Display Mode while playing a Video File.

Touch [ ].
Each time you touch, the Display Mode is switched.
Fit → Fill → Fit

- The [ ] button displays the currently selected mode. (e.g. [Fit])
- You cannot operate them while driving.

Fit mode

The mode displays a picture while holding its aspect ratio.

- Black bands appear at the top/bottom or right/left side of the screen depending on the picture.

Fill mode

The mode displays a picture to fit its size vertically and horizontally with the monitor size.

About USB Video format

The video formats (USB Flash drive) supported by the unit are as follows.

- Supported Container: AVI, MKV, MP4
- Supported Video Coding: H.264/MPEG-4 AVC
- Supported Audio Coding: MP3, ACC, MPEG2 audio
- MAX File Size: 4GB

About USB Video format

The video formats (USB Flash drive) supported by the unit are as follows.

- Supported Container: AVI, MKV, MP4
- Supported Video Coding: H.264/MPEG-4 AVC
- Supported Audio Coding: MP3, ACC, MPEG2 audio
- MAX File Size: 4GB
iPod/iPhone (Optional)

A separately sold Lightning to USB cable (KCU-471i), etc., is required. When the unit is connected by the above cable, the controls on the iPod are disabled.

- This unit does not support video playback from iPod/iPhone which connected to this unit via USB Connector.
- Internet or telephone functions, etc., of the iPhone or iPod touch are not controllable from the unit, but these functions can be controlled using the iPhone or iPod touch itself.
- Before an iPhone 5 or later is connected, turn Apple CarPlay to Off, then play iPod music. (page 40)

### iPod/iPhone main screen example

#### Audio mode

1. Artwork display
   - You can change the artwork position. For details, see "Switching the Artwork Position" (page 35).
2. Current song no./Total song no.
3. Artist title/Release Date*1
4. Song title/Episode title*1
5. Album title/Podcast title*1
6. Total time for playing
7. Full Search button
   - Touch when using Full Search mode.
8. Elapsed time
9. Quick Search button*2
   - Touch when using Quick Search mode.

*1 Podcast mode.
*2 If you have never used Search mode with the currently connected iPod/iPhone, pressing the Quick Search button switches the screen to the Full Search mode screen.

#### Function mode

- Touch to close the Quick Search mode
- Swipe vertically in the list to change pages.

**Playback**

1. Press the (MENU) button, then touch [iPod]. The display shows the iPod mode screen.
   - You can select and change the source in Favourite screen (page 21).

2. Touch [ or ] or to select the desired track (file).

   **Returning to the beginning of the current (or previous) track (file):**
   - Touch [ ].

   **Fast reverse the current track:**
   - Touch and hold [ ].

   **Advancing to the beginning of the next track (file):**
   - Touch [ ].

   **Fast forward the current track:**
   - Touch and hold [ ].

   - The [ , ] buttons provide the same functions above.

3. To pause playback, touch [ / ].
   - If a song is playing on the iPod/iPhone before it is connected to the unit, it will continue playing when it is connected.
   - An episode may have several chapters. The chapter can be changed by touching [ or ].
   - If the artist, album or song name, created in iTunes, has too many characters, songs may not be played back when connected to the unit. Therefore, a maximum of 64 characters is recommended. The maximum number of characters for the unit is 64.
   - Some characters may not be correctly displayed.
Searching for a Music File

An iPod/iPhone can contain thousands of songs. For this reason, this unit can make various searches using the search function as shown below.

Using the Playlist/Artist/Album/Podcast/Audiobook/Genre/Composer/Song/iTunes Radio search mode's individual hierarchy, you can narrow down your search as shown in the table below.

**<MUSIC Search Menu>**

<table>

**Quick Search Mode**

In Quick Search mode, the list from the previous search mode is displayed. For example, if the last time you searched for songs was in Albums, the Album list is displayed. If you have not used the search mode, the list is not displayed in the Quick Search mode. In this case, go to the Full Search mode.

**In Quick Search mode, touch the desired list (for example, Album list).**

The selected Album is played.

- **To switch into Quick Search mode**, see  in "iPod/iPhone main screen example" (page 57).
- **To search within an Album**, go to the Full Search mode.

**Full Search Mode**

**For example: Searching by Artist name**

The following example explains how an Artists search is performed. Another search mode can be used for the same operation, although the hierarchy differs.

1. **Touch [Artists] in the Full Search mode screen.**
   The Artists search screen is displayed.
   - To switch into Full Search mode, see  in "iPod/iPhone main screen example" (page 57).

2. **Select the desired artist.**

**To play back the Artist directly**

1. Touch [▶] of the artist’s name.
   All songs of the selected artist are played back.

**To search for the Album of the Artist**

1. Touch the selected artist name.
   The Albums search screen of the selected artist is displayed.
2. Touch [▶] of the desired album’s name.
   All songs of the selected album are played back.

**To search for a Song in the Album of the Artist**

1. Touch the desired artist’s name.
   All albums of the selected artist are displayed.

3. **Touch the desired album’s name.**
   All songs of the selected album are displayed.

4. **Touch the desired song’s name.**
   The selected song is played back.
   - An alphabet skip function is available. See "Alphabet Search Function" (page 59).
   - To switch the displayed list or return to the previous page in the Full Search mode, see "About Basic Operation for List Screen" (page 16).
**Alphabet Search Function**

The unit is provided with an alphabet search function for effective searching. When you use this function in the search mode, you can quickly search an artist or a song, etc.

This is an example of how to search Artist Name for names beginning with “R”.

1. **Touch “O-U” of the alphabet group.**

   “O P Q R S T U” of the alphabet group “O - U” is displayed.

2. **Touch “R” you want to search.**

   Artist names beginning with “R” are displayed.

3. **Touch your desired artist name.**

   - If there are no names in the list beginning with that letter, the next letter of the alphabet is searched.
     For example: If there are no names beginning with “R,” the search list begins with “S.”

**Repeat Play**

1. **Touch [ ].**

   The Repeat mode select pop up screen is displayed.
   - [ ] displays the currently selected mode.

2. **Select your desired Repeat mode.**

   The selected Repeat mode changes the button.
   Repeat All [ ] / Track Repeat [ ] / OFF [ ]

**Random Play (Shuffle)**

1. **Touch [ ].**

   The Random Play mode select pop up screen is displayed.
   - [ ] button displays the currently selected mode.

2. **Select your desired Random Play mode.**

   The selected Random Play mode changes the button.
   - Album [ ]: The songs on each album are played back in proper order. Upon completing of all the songs on the album, the next album is selected randomly. This continues until all albums have been played.
   - Songs [ ]: Song shuffle randomly plays back songs within a selected category (playlist, album, etc.). The songs within the category are played just once until all songs have been played.
   - OFF [ ]: Random mode Off.

   - The action depends on the connected iPod.
HDMI Device
(Optional)

Devices supporting HDMI can connect and play back through this unit (for example, DVB-T Box, iPhone or other Smartphones). When making HDMI connections, you need to set HDMI on the unit suitable for the connected device. For details, see "HDMI Setup" (page 40).

- The HDMI/MHL connecting cable differs depending on the connected device corresponding to HDMI. Prepare optional HDMI/MHL connecting cable sets suitable for your device.

HDMI Operation

- iPhone, Smartphone, etc.

The output of your electronic device will be mirrored on this unit through the HDMI connector. Control from this unit is not possible.

- The electronic device must possess an HDMI output interface.
- Not all devices with an HDMI output interface can be recognised by this unit.
- Use only the Alpine Special HDMI connection cable.

1. Press the \( \text{[MENU]} \) button, then select HDMI mode.
   The display shows the HDMI mode screen.
   - You can select and change the source in Favourite screen (page 21).
   - For your safety, video is not displayed and only audio can be heard while driving.

2. In HDMI player mode, the screen of the device displays the content of electronic equipment by mirror image.

   ![Image]

   \( \text{① You can select Display Mode.}
   \text{For details, see “Switching Display Modes” (page 60).}

   - You cannot operate them while driving.

Switching Display Modes

While your vehicle is parked, touch [WIDE] to display a popup list of Display Mode.
Select the desired mode from the list.

<table>
<thead>
<tr>
<th>WIDE</th>
<th>CINEMA</th>
<th>NORMAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>(Mode 1)</td>
<td>(Mode 2)</td>
<td>(Mode 3)</td>
</tr>
</tbody>
</table>

In Mode 1 (Wide), the monitor displays a normal picture wider to fit in a wide-screen monitor by evenly stretching out the picture horizontally.

In Mode 2 (Cinema), the monitor displays a normal picture by stretching out the picture horizontally and vertically. This mode is good for displaying a cinema type picture at the 16:9 ratio.

In Mode 3 (Normal), the monitor displays a normal picture at the centre of the screen with a vertical black band at each side.
Before Using Bluetooth

Before using the hands-free phone/audio function, the following settings need to be made.

2. Register a Bluetooth device in this unit (page 25).
   - See “Bluetooth Setup” (page 25).
   - You can search for this unit using a Bluetooth compatible device, and then connect that Bluetooth compatible device to this unit. The unit name INE-F904D is displayed on your phone and the initial number of the passcode is ‘0000.’ Also refer to the Owner’s Manual of the connected device(s).

Hands-free Phone Control

Touch [Phone] in the Menu screen to display the Phone menu screen (page 61).

- You can also recall Phone menu screen by touching the Sound setup shortcut key on Audio source screen. Refer to “About the Shortcut Key” (page 18).

Phone menu screen example

1. Recent Events list*
   You can display up to 60 items, such as phone numbers of the most recent incoming calls, missed calls and outgoing calls, and contact names that are registered in the Phone Book. When 60 items exist in the list, the oldest item is deleted when a further item is to be added.
2. Contacts list*
   You can make a phone call from the Phone Book, or edit the Phone book.
3. Keypad screen
   Use to type a phone number.
4. Edit*
   Use to edit the Contacts list.

* When you connect two Hands-Free Phones, the information of the Bluetooth device set to Primary is displayed.

** About Bluetooth

Bluetooth is a wireless technology allowing communication between a mobile device or personal computer over short distances. This enables a hands-free call or data transmission between Bluetooth compatible devices. Bluetooth transmission is available in the unlicensed 2.4 GHz spectrum if the distance between devices is within 10 metres. For details, refer to the Bluetooth website (http://www.bluetooth.com/).

- Depending on the Bluetooth version, a Bluetooth compatible device may not be able to communicate with this unit.
- Proper function of this unit with all Bluetooth compatible devices is not guaranteed. For handling of the Bluetooth compatible device, consult your Alpine dealer or Alpine website.
- Depending on the surroundings, Bluetooth wireless connection may be unstable.
- When you place a call, or perform setup operations, be sure to stop your car in a safe place.
- Depending on the connected Bluetooth compatible device(s), the function may differ. Also refer to the Owner’s Manual of the connected device(s).

** About the Hands-free Phone

Hands-free calls are possible when using a HFP (Hands-Free Profile) compatible mobile phone with this unit.

- Avoid performing a hands-free call in heavy traffic or on narrow or winding streets.
- Close the windows while calling to reduce background noise.
- If both calling parties are using hands-free devices, or the call is made in a noisy location, difficulty hearing the other person’s voice is normal.
- Depending on telephone line conditions or certain mobile devices used, voices may sound unnatural.
- When using a microphone, speak as directly as you can into the microphone to obtain the best sound quality.
- Certain mobile phone features are dependent on the capabilities and settings of your service provider’s network. Additionally, certain features may not be activated by your service provider, and/or the provider’s network settings may limit the feature’s functionality.

All features, functionality, and other product specifications, as well as the information contained in the Owner’s Manual are based upon the latest available information and are believed to be accurate at the time of printing.

Alpine reserves the right to change or modify any information or specifications without notice or obligation.

- Notice that when you connect an iPhone 5 or later/Android smartphone which installed Android Auto App, the operation screen may differ from this section.
Answering a Call

Incoming calls are announced by the received call ring tone and a displayed message (PHONE No., etc.).

1 An incoming call triggers the ringtone and an incoming call display.

2 Touch incoming call notification screen. The call starts.

- During a call, the audio for the current mode on the unit is muted. After calling, playback will resume.
- When the caller's number is transmitted to the system, if the caller's name is stored in the phone book, the name is displayed. If the name is not stored, the number is displayed. When neither the name or the number is unavailable, “Unknown” is displayed.
- Touch [Decline] to reject an incoming call.
- Touch the call info area during a phone call to switch to the Phone Operation screen. Then you can adjust the speech volume, etc. For details, see “Operations During a Conversation” (page 65).
- Touch [X] during a conversation to hide the call info area. To display it again, Touch or swipe downward on [ ] on the upper part of the screen.
- During an incoming call or a conversation on the Primary (Secondary) Hands-Free Phone, if there is an incoming call on the Secondary (Primary) Hands-Free Phone, you cannot answer the call on the Secondary (Primary) Hands-Free Phone without first ending the call on the Primary (Secondary) Hands-Free Phone.

Hanging up the Telephone

1 Touch [End Call]. The call finishes.

Call Waiting Function

If a call comes in from another phone during a call, a notice is displayed on the screen. This function can only be used if the connected mobile phone has a call waiting function service included.

Second incoming call during a conversation in the call info area

By touching the second incoming call notification screen, you can put the current call on hold and answer the second call.

- To switch between calling parties, touch the on-hold screen.
- To finish a call, touch [End Call].
Second incoming call during a conversation in the Phone Operation screen

• The display or operation may differ depending on the connected mobile phone or the caller's mobile phone.

Second incoming call notification screen

By touching the second incoming call notification screen, you can put the current call on hold and answer the second call.

Call On Hold screen

• To switch between calling parties, touch the on-hold screen.
• To finish a call, touch [End Call].
• This unit supports only the Call Waiting function of a mobile phone. The second call function and three-way calling function of a mobile phone cannot be operated from this unit. Also the screen display may malfunction.

Calling

Calling by Favourite Function

You can make a phone call using the Short Cut function of numbers that have been registered in Favourite. For details, see “Favourite Function” (page 21).

1 Press and hold the ★ (Favourite) button for at least 2 seconds.
The Favourite screen is displayed.

Favourite screen

2 Touch the Short Cut icon.
A contact's name, phone number, and a confirmation message of the phone number are displayed.

3 Touch [Call].
The phone call is started.

Making a phone call using the Phone Menu

Making a phone call from the Recent Events list

1 Touch [Recents] to change to the Recent Events list screen.

Dialled history: Names or Numbers/Date
Received history: Names or Numbers/Date
Missed Incoming history: Names or Numbers/Date

2 Touch the name of the contact you want to call.
The Detail info screen is displayed.

3 Touch [ ].
The phone call is started.

Calling from the Contacts list (Phone Book)

1 Touch [Contacts] to change to the Contacts list screen.

2 Touch the name of the contact you want to call.
The Phone Operation screen is displayed.

3 Touch [ ].
The phone call is started.
Entering a Phone Number to Make a Call

1 Touch [Keypad].
   The number input screen (Keypad) appears.

   Touch [ ] to delete an entered number.
   Touch [Delete All] to delete all entered numbers.

2 Enter the phone number you wish to call.
   • You can enter up to 31 digits.

3 Touch [Call].
   A confirmation message of the phone number appears.

4 Touch [Call].
   The phone call is started.

Using Voice Recognition function

You can use Siri function of your iPhone or make a telephone call by using voice operation of your smartphone.

Using Siri

You can use the Siri function of your iPhone. To use this function, set the Siri setting of your iPhone to ON.

• Connect your iPhone to the unit via Bluetooth, then set to "Hands-free" or "Both" (page 25).
• The available functions differ depending on the connected iPhone.
• Siri and other streaming services are enabled by connecting to compatible smartphones that are able to receive data. Please ensure that cellular data and/or Wi-Fi is turned on in the smartphone to enjoy these features.
• Extensive use of Siri or other streaming services may increase your phone's data usage. Please check with your phone company to ensure you have an appropriate Data plan.

1 Press the  (VOICE) button.

The Voice Control mode screen is displayed.

2 Speak into the microphone supplied with this unit.
   • If no speech is detected, the unit may pause depending on version of the connected iPhone. In that case, touch the microphone icon [1] in the centre of the Voice Control mode screen. You can continue to use the Voice Control mode.

3 To finish the Voice Control mode, touch [X] or press the $ button.
   • Depending on the iPhone, the Siri function may finish automatically.

Adjusting the volume

Adjust the speaker/microphone volumes in Voice Control mode.
Perform the same procedure to adjust the speaker/microphone volumes of hands-free phone.

Touch [—] or [+].
Adjust the speaker and microphone volumes.

Stopping input to the microphone

If the surrounding sound (road noise, etc.) is loud, you may wish to cut input to the microphone for 3 seconds.

Touch [X].

You can make a telephone call by using voice operation.

• Connect your smartphone to the unit via Bluetooth, then set to "Hands-free" or "Both" (page 25).

1 Press the  button.

The Voice Dial mode screen is activated.

2 Say the telephone number* or name* you want to call, into the microphone.
   * The number and name depend on the voice dial information stored in the smartphone.

3 To finish the Voice Dial mode, touch [X].
   • You can perform this operation only when a voice dial compatible smartphone is connected.
   • The Voice Dial function performance depends on the recognition range of the smartphone and mounting location of the microphone.
   • Note when the microphone is mounted.
   • Voice dial operation depends on the function being available on the smartphone. For details, refer to the owner’s manual of the smartphone.
   • Depending on the smartphone, the Voice Dial operation may finish automatically.
Adjusting the volume
Adjust the speaker/microphone volume in Voice Dial mode. Perform the same procedure to adjust the speaker/microphone volume of hands-free phone.

Touch [−] or [+].
Adjust the speaker and microphone volumes.

Stopping input to the microphone
If the surrounding sound (road noise, etc.) is loud, you may wish to cut input to the microphone for 3 seconds.

Touch [× ]

Operations During a Conversation

Phone Operation screen

Name and phone number
- If registered with a Group, the Group Name is also displayed. Although, depending on the connected mobile phone, it may not be displayed.

Conversation time

Adjusting the Speech Volume
You can adjust Caller Level and Mic. Level (Microphone Level) during a phone call.

Touch [−] or [+].
You can adjust the Caller volume in 35 levels and Microphone volume in 11 levels.

Changing the Voice Output
The voice output for calls is switchable between car speakers and the mobile phone speaker.

Touch [Switch] (Speaker).
- Depending on the mobile phone, this operation may not be possible.

DTMF (Touch-Tone) Function
Transmits a DTMF (Touch-Tone) during a call.

1 Touch [Tone].
   The number input screen (Keypad) appears.

2 Input number.
   - You can transmit a Touch-Tone signal during a call.

Phone Book Function

Phone Book screen example

1 Use to search by directly inputting a name or phone number with the Keypad.
   For details, see “How to Input Characters and Numbers (Keypad)” (page 20).
2 Displayed when multiple phone numbers are registered.
   Touch [× ] to display the registered phone number list.
3 Use to narrow down your search for names, etc.
   For details, see “Alphabet Search Function” (page 59).
4 Touch [+] to register as Favourite.

Synchronising the Phone Book
You can synchronise the system’s phone book with the mobile phone’s phone book.

1 Touch [Edit].
2 Touch [Download].
3 Touch [SYNC].
   Synchronisation of the phone books starts.
   - You can store up to 1,000 registered name in the phone book.
   - You can store up to 5 phone numbers by one persons name.

Adding the Phone Book

1 Touch [Edit].
2 Touch [Download].
3 Touch [Add].
   Stays on standby for connection of the mobile phone.
   - Touch [Cancel] to cancel the standby mode.

4 The mobile phone accesses this unit and then transfers the phone book from the mobile phone to this unit.
   - Mobile phone connection is cancelled while the phone book is being transferred.
Deleting the Phone Book Entries

Deleting One Entry from the Phone Book

1 Touch \[ Edit \].

2 Touch the checkbox \[ ] of the contact name (or phone number) you want to delete. A tick (✓) appears in the checkbox.
   • You can choose up to 10 names and numbers at a time.

3 Touch \[ Delete \].
The confirmation screen is displayed. If multiple phone numbers are registered, they are all deleted.

4 Touch \[ OK \].
The selected number is deleted.

Deleting All Entries from the Phone Book

1 Touch \[ Edit \].

2 Touch \[ Delete All \].
The confirmation screen is displayed.

3 Touch \[ OK \].
All entries of the phone book are deleted.

Searching in the Phone Book

You can make a call using the phone book search function.

1 Touch \[ Search \].
The Input User Name screen (Keypad) is displayed.

2 Input the string of letters of the name that you want to search, then touch \[ OK \].
A list of names beginning with the string of letters you entered is displayed.

3 Touch the name you want to call.
The Phone Operation screen is displayed.

4 Touch \[ \].
The phone call is started.
   • For details of how to input characters using the keypad, see “How to Input Characters and Numbers (Keypad)” (page 20).
   • If there are fewer than five registered items in the phone book, you cannot use the phone book search function.

Bluetooth Audio

If a Bluetooth compatible mobile phone, portable player, etc. is connected by wireless, you can play back a song (operation is controllable from the unit).

• Operation may vary, depending on the Bluetooth compatible device.

Bluetooth Audio main screen example

Function mode

1 Current track no./Total song no.
2 Artist title
3 Song title
4 Album title
5 Elapsed time
6 Touch to use the Quick Search mode and Full Search mode.
7 Full Search button
   Touch when using Full Search mode.

Quick Search mode screen example

Swipe vertically in the list to change pages.

8 Touch to close the Quick Search mode
   • The displayed onscreen buttons may differ depending on the AVRCP version.
   • Song title/Artist title/Album title/Elapsed time do not display for AVRCP Ver. 1.6.
   • To play back audio, a mobile phone or a portable player conforming to A2DP (Advanced Audio Distribution Profile) or AVRCP (Audio/Video Remote Control Profile) is required.
   Not all functions work with all devices.
   • During a call, sound on the Bluetooth audio source is paused.

Compatible AVRCP versions: 1.0, 1.3, 1.4, 1.5
• Available functions may differ depending on the AVRCP version.
Playback

1. Press the \( \text{(MENU)} \) button, then select Bluetooth Audio mode.
   - The display shows the Bluetooth Audio mode screen.
   - You can also select and change the source in the Favourite screen (page 21).

2. Touch \([\text{[} \backslash \text{]}\) or \([\text{[} \backslash \text{]}\) to select the desired track (file).
   - Returning to the beginning of the current file:
     - Touch \([\text{[} \backslash \text{]}\).
   - Fast backward the current file:
     - Touch and hold \([\text{[} \backslash \text{]}\).
   - Advance to the beginning of the next file:
     - Touch \([\text{[} \backslash \text{]}\).
   - Fast forward the current file:
     - Touch and hold \([\text{[} \backslash \text{]}\).
     - The \([\text{[} \backslash \text{]}\), \([\text{[} \backslash \text{]}\) buttons provide the same functions above.

3. To pause playback, touch \([\text{[} \backslash \text{]}\).
   - Operations may differ depending on the connected Bluetooth compatible device.

Repeat Play

Available for AVRCP Ver. 1.3, 1.4 and 1.5 only.

1. Touch \([\text{[} \backslash \text{]}\).
   - The Repeat mode select pop up screen is displayed.
   - \([\text{[} \backslash \text{]}\) displays the currently selected mode.

2. Select your desired Repeat mode.
   - The selected Repeat mode changes the button.
   - All Track \(\Rightarrow\): Once all of the songs have finished playing, play back is repeated, starting with the first song.
   - Group \(\Rightarrow\): Only files in a group are repeatedly played back.
   - Single Track \(\Rightarrow\): Only the track currently playing is repeatedly played back.
   - Off \(\Rightarrow\): Repeat mode Off.
   - Operations may differ depending on the connected Bluetooth compatible device.

Random Play

Available for AVRCP Ver. 1.3, 1.4 and 1.5 only.

1. Touch \([\times]\).
   - The Random Play mode select pop up screen is displayed.
   - \([\times]\) button displays the currently selected mode.

2. Select your desired Random Play mode.
   - The selected Random Play mode changes the button.
   - All Track \(\Rightarrow\): All songs in the BLUETOOTH compatible devices are played back in random sequence. Any one song does not play back again until all songs have been played back.
   - Group \(\Rightarrow\): A Group is selected randomly and songs in the Group are played back in order. After all songs are played in the Group, the next Group is selected randomly.
   - Off \(\Rightarrow\): Random mode Off.
   - Operations may differ depending on the connected Bluetooth compatible device.

Search Function

Available for AVRCP Ver. 1.4 and 1.5 only.
The displayed list differs with the connected Bluetooth device.
You can search for your desired song by using one of two modes; the Quick Search mode and the Full Search mode.

Quick Search mode

Touch your desired Group name or File name.
- The selected Group*1 or file is played back.
- *1 The first file in the selected Group is played back.

Full Search mode

Touch your desired Group name*2 or File name.
When you select a File name, the selected song is played.
When you select a Group name, repeat the same procedure to select another Group name or File name.
- *2 When you touch the \([\text{[} \backslash \text{]}\) by a Group name, the unit plays from the first song in the Group.

- To switch into Quick Search mode, see 6 in "Bluetooth Audio main screen example" (page 66).
- To switch into Full Search mode, see 7 in "Bluetooth Audio main screen example" (page 66).
- To switch the displayed list or return to the previous page in the List screen, see "About Basic Operation for List Screen" (page 16).
Connecting a Bluetooth Device

Registering a Bluetooth device in the unit enables automatic connection. If it does not connect automatically, run through the connection procedure again.

1. Touch [ ] (Phone Setting).
   The Device Setting select pop up screen is displayed.

2. Touch [Reconnect].
   Bluetooth connection will start.

Disconnected the Bluetooth Connection

1. Touch [ ] (Phone Setting).
   The Device Setting select pop up screen is displayed.

2. Touch [Disconnect].
   The Bluetooth connection is disconnected.

Changing the connecting Bluetooth Device

If multiple Bluetooth devices are registered in this device, you can change the connection among the registered devices.

1. Touch [ ] (Phone Setting).

2. Touch [Change Phone].

3. Touch [ ] (Audio) or [ ] (Hands-free) of the selected device.
   The connection will transfer to the selected device.
To operate devices connected to the AUX terminals of the unit, follow the procedure described below.

- Set AUX to "On." See "AUX Setup" (page 40).
- Depending on the connected unit, the onscreen buttons may not work, or their operation may differ.

**WARNING**

It is dangerous (and illegal in many states) for the driver to watch TV/video while driving the vehicle. The driver may be distracted from looking ahead and an accident could occur.

Install the unit correctly so that the driver cannot watch TV/video unless the car is stopped and the parking brake is applied.

If the unit is not installed correctly, the driver will be able to watch TV/video while driving and may be distracted from looking ahead and cause an accident. The driver or other people could be severely injured.

Press the **MENU** button, then select Auxiliary (AUX)* mode.

The display shows the Auxiliary (AUX) mode screen.

* The name which is given as the mode name in "Setting the Auxiliary (AUX) Name" (page 40) is displayed.

- For your safety, video is not displayed and only audio can be heard while driving.
- You can select and change the source in Favourite screen (page 21).
- For details on the connected auxiliary device, refer to its owner’s manual.

**AUX Operation Screen Display During Video File Playback**

Touch the screen.

The Auxiliary (AUX) operation screen is displayed.

- The operation screen changes to the visual screen in the Auxiliary (AUX) mode for 5 seconds after an operation has been performed. To hide the Auxiliary (AUX) operation screen, touch the video display area.
Camera Operation (Optional)

When an optional camera is connected, the view video of camera can be output to the monitor. Front camera or Rear camera can be connected to this unit. Make the Camera Select setting (Front, Rear or Other) according to your connected camera. For details, see “Setting the Camera Input” (page 41).

Front camera:
When the HCE-C257FD/HCE-C212FD is connected, conditions in front of the vehicle, such as objects, people and other hazards, can be seen.

Rear camera:
If an HCE-C127D/HCE-C157D/HCE-C252RD, etc., camera is connected, when the vehicle is reversed, the rear camera view (guide marks for vehicle width and available distance) is displayed automatically on the screen of this unit.

Other camera:
Set when connecting to a camera other than the Front camera or Rear camera, such as a room camera and side camera.

HDMI Camera:
Set when a HDMI Camera is connected.

You can adjust the quality of the camera image.
Setting items: Brightness / Colour / Contrast
See “Visual Setup” (page 33).

Rear Camera Operation

Displaying the Rear Camera Image from the Menu screen

1 Press the (MENU) button. The menu screen is displayed.

2 Touch [Camera]. The Rear Camera view is displayed.

- If your vehicle support the Rear camera with audio function, you can choose whether to listen to the outside sound. Refer to “Setting Camera with Audio On/Off” (page 43).
- Touch the screen while the camera image is being displayed, and touch [X] or [ (!$)] to return to the main source screen or previous screen.
- You can perform a Guide Adjustment. For details, see “Adjusting the Rear/Front/Side Camera Guide” (page 42).

Displaying the rear view video while the car is in reverse

1 Shift the gear lever to the reverse (R) position. The rear view image is displayed while the car remains in reverse.

2-1 When “Shutdown Delay” is On:
If you shift the gear lever to a position other than reverse (R), the monitor will display the front*1, 3 or rear*2, 3 view image for 10 seconds and then return to the previous screen.

2-2 When “Shutdown Delay” is Off:
If you shift the gear lever to a position other than reverse (R), the display returns to previous screen soon.

*1 Only when front camera is connected.
*2 When there is no connected front camera.
*3 When the vehicle is moving forward and the speed is greater than a certain value, the monitor will return to previous source screen automatically.

- Never depend solely on the camera when backing up. Always turn and look and only use the camera for additional assistance.
- About Shutdown Delay function, refer to “Setting Shutdown Delay to On/Off” (page 43).
- This function is effective when the reverse wire is properly connected.
- You can perform a Guide Adjustment. For details, see “Adjusting the Rear/Front/Side Camera Guide” (page 42).

Switching the Image Pattern for the Rear Camera

If the camera has a view switch function, the Direct Change switch is displayed.

1 Touch the screen when the image from the camera is displayed. The operation screen is displayed on the screen.

2 Touch [Back], [Panorama], [Corner] or [Top]. The image pattern changes.

- For detailed information about image patterns, see the camera Owner’s Manual.
- You can perform a Guide Adjustment. For details, see “Adjusting the Rear/Front/Side Camera Guide” (page 42).

Guide Display ON/OFF Setting

1 Touch the screen when the image from the camera is displayed. The operation screen is displayed on the screen.

Adjusting the Caution Display Location

1  Touch the screen when the image from the camera is displayed.
   The operation screen is displayed on the screen.
   - After a 5-second time-out, the operation screen returns to the camera display screen.

2  Touch [Cautions].
   - For each touch, the caution location moves to the top or bottom of the screen.

About the Rear Camera Guide

To display the guide, set “Guide Display ON/OFF Setting” (page 70) to On. Also, to adjust the guide, see “Adjusting the Rear/Front/Side Camera Guide” (page 42). You can also turn off the guide in the Rear camera display screen.

Indication mark meaning

When the car is put into reverse gear, the monitor switches to the rear view camera image. Guides appear to help visualise the car’s width and distance from the rear bumper.

1  Car width extension marks (red, yellow and green in order of distance)
   If properly calibrated, the marks indicate the car’s width. This helps guide the car’s path when backing up in a straight line.
   The marks represent the distance from the rear of the car (from the rear end of the bumper).
   - The marks do not move in synchronisation with the steering wheel.
   - Set the marks to suit the car’s width.

2  Distance guidance marks
   The marks represent the distance from the rear of the car (from the rear end of the bumper).
   - The marks do not move in synchronisation with the steering wheel.
   - We recommend that you measure the actual distance to the marks when parked on a level surface.

   - Depending on the condition of the car or road surface, the range of vision may vary.
   - The camera has a limited range of vision. Objects at extreme angles to the camera (e.g. under the bumper or at opposite ends of the bumper) may not be in its field-of-vision.
   - The rear camera image may have a tint which is different from the actual surroundings.
   - Depending on the car, the guidance may deviate to the right or left. This is not a malfunction.

Distance guidance mark

The distance guides represent the ground level distance from the rear bumper. It is difficult to accurately estimate the distance to objects above ground level.

In the following example, the distance to A is 0.5 m and the distance to B is 1 m.

<Screen>

<Positions of A, B and C>

Error between the screen and the actual road surface

In the following conditions, errors are produced between the screen guidance and the actual road surface. (The illustrations represent a case when the camera is installed in the standard position.)

When there is a steep upward slope behind the car (example)

<Screen>

Distance guidance marks
<Situation of the car>

The distance guidance mark represents the distance to a flat road surface. Therefore in the case of an upward slope behind the car, the distance guides are displayed closer to the rear bumper than the actual distance. For example, if there is an obstacle on the upward slope, it may appear farther away than its actual position. Also, an error may occur between the guidance and the actual path of the car on the road surface.

When there is a steep downward slope behind the car (example)

<Screen>

In the case of a downward slope behind the car, the distance guides are displayed farther from the rear bumper than the actual distance. If there is an obstacle on the downward slope, it seems closer than its actual position. Also, an error may occur between the guidance and the actual path of the car on the road surface.

Front Camera Operation

Displaying the Front Camera image from the Menu screen.

1. Press the (MENU) button.
   The menu screen is displayed.

2. Touch [Camera].
   The Front Camera view is displayed.
   - Touch the screen while the camera image is being displayed, and touch [ ] or [ ] to return to the main source screen or previous screen.
   - You can perform a Guide Adjustment. For details, see “Adjusting the Rear/Front/Side Camera Guide” (page 42).

Switching the Image Pattern for the Front Camera

If the camera has a view switch function, the Direct Change switch is displayed.

1. Touch the screen when the image from the front camera is displayed.
   The operation screen is displayed on the screen.
   - After a 5-second time-out, the operation screen returns to the camera display screen.

2. Touch [Panorama], [Corner] or [Top].
   The image pattern changes.
   - For detailed information about image patterns, see the camera Owner’s Manual.
   - You can perform a Guide Adjustment. For details, see “Adjusting the Rear/Front/Side Camera Guide” (page 42).

About the adjustment of guide display ON/OFF setting and adjustment of Caution display location

As with the rear camera, the front camera guide display ON/OFF setting and Caution display location can be adjusted. See “Guide Display ON/OFF Setting” (page 70) and “Adjusting the Caution Display Location” (page 71) for the operations.
Side Camera Operation

Displaying the Side Camera image from the Menu screen

1 Press the \((\text{MENU})\) button.
The menu screen is displayed.

2 Touch \([\text{Camera}]\).
The Side Camera view is displayed.

   - Touch the screen while the camera image is being displayed, and touch \([\times]\) or \([\downarrow]\) to return to the main source screen or previous screen.
   - You can perform a Guide Adjustment. For details, see “Adjusting the Rear/Front/Side Camera Guide” (page 42).
   - If you connect a Side Camera using the optional Multi Camera Interface module, you can display the Side camera image using the \([\text{Camera}]\) button only when you set “Setting a Default Camera” (page 43) to “Side”. If you connect a Rear Camera and Front Camera at the same time, touch \([\text{Rear}]\) or \([\text{Front}]\) in the Rear Camera image to switch the Camera image.

Switching the Image Pattern for the Side Camera

If the camera has a view switch function, the Direct Change switch is displayed.

1 Touch the screen when the image from the side camera is displayed.
The operation screen is displayed on the screen.

   - After a 5-second time-out, the operation screen returns to the camera display screen.

2 Touch \([\text{Rear}]\) or \([\text{Front}]\).
The image pattern changes.

   Rear: Vehicle Rear view
   Front: Vehicle Front view

   - For detailed information about image patterns, see the camera Owner’s Manual.
   - You can perform a Guide Adjustment. For details, see “Adjusting the Rear/Front/Side Camera Guide” (page 42).
About Vehicle Interlock Function

Communication between your vehicle and the unit allows you to set and display various functions of your vehicle.*1 Available functions differ depending on your vehicle. For details, refer to your vehicle's instruction manual.

Available Main Functions

- You can check the air conditioner settings on the Climate screen.*2
- You can check for obstacles on the Parking Sensor screen.*2
- You can adjust various settings for your vehicle from the unit.

*1 Prerequisite is a compatible CAN-Interface, e.g. from the APF-X3xxx series.
*2 When the Interruption function is set to "On," the screen changes automatically when you adjust the air conditioner or the unit detects an obstacle. For details on the Interruption setup, see “CAN-I/F Setup” (page 44).

Vehicle Info mode

You can check the Climate screen and Park sensor screen from the Menu screen of the unit. For how to display the Menu screen, see "About the Menu Screen" (page 18).

1 Touch [Vehicle Info] on the Menu screen.
The Vehicle Info mode screen is displayed.

2 Touch the desired tab on the upper part of the screen.
The Climate screen or Park sensor screen is displayed.

- By touching [Car Setting] on the Vehicle Info mode screen, you can use the unit to turn various settings related to your vehicle On/Off, set display formats, etc. For details on what functions you can set, refer to your vehicle's instruction manual.

Function Screen Examples

The screens that can be displayed on this unit differ, depending on the type of vehicle.

Climate screen example

The Climate screen turns on when you adjust the air conditioning in your vehicle. The icons of adjusted items are high-lighted.

Parking Sensor screen

The Parking sensor screen turns on when the front or rear sensor on your vehicle detects an obstacle within a certain distance.

Parking Sensor Full screen example

When the front or rear sensor detects an obstacle within a certain distance, the Parking Sensor screen is displayed, and the indicator that corresponds with that area lights up.

Indicator colours when an obstacle is detected.
Red: close distance
Orange: medium distance
Yellow: long distance

- Depending on the speed of the vehicle, when moving faster than a certain speed, the Parking Sensor screen may not be displayed.
- Vehicles that do not have the obstacle detection sensor cannot use this function.

Parking Sensor Camera interlock screen example (Rear camera)

You can check for obstacles through an interlocked camera image by connecting a Front or Rear Camera.

- Touch the Camera image area to switch to the Camera full screen. (While displaying the Camera full screen, touch the Camera screen, then touch [Sensor] to return to the Parking Sensor Camera interlock screen.)
- Touch the car icon to switch to the Parking sensor full screen. (Touch [Sensor] on the Parking sensor full screen to return to the Parking Sensor Camera interlock display.)
- To use this function, set the Camera Select setting to "Front/Other" or "Rear." For details, see "Setting the Camera Input" (page 41).
Information

Product Software Update

This product uses software that can be updated through a USB flash drive. Download the software from the Alpine website and update the product using the USB flash drive.

Updating this product
Check the Alpine website for details on updating.
http://www.alpine-europe.com

Important information on the software
About the software licence of the product
The software installed in the product contains open-source software. See the following Alpine website for details on the open source software.
http://www.alpine.com/e/oss/download

About the Supported Formats

- For the list of video formats supported from a USB flash drive, see “About USB Video format” (page 56).

About MP3/WMA/AAC/FLAC

What is MP3?
MP3, whose official name is “MPEG Audio Layer 3,” is a compression standard prescribed by the ISO, the International Standardisation Organisation and MPEG which is a joint activity institution of the IEC.
MP3 files contain compressed audio data. MP3 encoding is capable of compressing audio data at extremely high ratios, reducing the size of music files to as much as one-tenth their original size. This is achieved while still maintaining near CD quality. The MP3 format realises such high compression ratios by eliminating the sounds that are either inaudible to the human ear or masked by other sounds.

What is WMA?
WMA, or “Windows Media” Audio, is compressed audio data. WMA is similar to MP3 audio data.

What is AAC?
AAC is the abbreviation for “Advanced Audio Coding,” and is a basic format of audio compression used by MPEG2 or MPEG4.

What is FLAC?
FLAC (Free Lossless Audio Codec) is an audio file codec for lossless compression, developed and offered as open source software. Codecs with lossy compression forms, such as MP3 and AAC, reduce part of the data to improve compression efficiency. However, FLAC can reconstruct compressed data to be an identical copy of the original data by performing lossless compression. The compression ratio of FLAC is about 50%.

Method for creating MP3/WMA/AAC/FLAC (USB Flash drive) files
Audio data is compressed using software with MP3/WMA/AAC/FLAC (USB Flash drive) codecs. For details on creating MP3/WMA/AAC/FLAC (USB Flash drive) files, refer to the user’s manual for that software.
MP3/WMA/AAC/FLAC (USB Flash drive) files that are playable on this device have the file extensions.
MP3: “mp3”
WMA: “wma”
AAC: “m4a”
FLAC: “flac”/ “fla”
WMA is not supported for the following files, Windows Media Audio Professional, Windows Media Audio 10 std or Windows Media Audio 10 Pro Lossless.
There are many different versions of the AAC format. Confirm that the software being used conforms to the acceptable formats listed above. It’s possible that the format may be unplayable even though the extension is valid.
Playback of AAC files encoded by iTunes is supported.

Supported playback sampling rates and bit rates

**ID3 tags/WMA tags**

This device supports ID3 tag v1.0, v1.1, v2.2, v2.3, v2.4, and WMA tag Ver.1.x. If tag data is in an MP3/WMA/AAC file, this device can display the title (track title), artist name, and album name ID3 tag/WMA tag data.

For non-supported characters, “?” is displayed.

The number of characters may be limited, or not correctly displayed, depending on the tag information.

**Playing back MP3/WMA/AAC/FLAC**

MP3/WMA/AAC files are prepared, then written to a USB flash drive.

- Maximum numbers of playable files/folders
  - USB Flash drive: 10,000 files/folders (including Root Folder)
  - Largest playable file size: 512 MB

Playback may not be performed if a disc exceeds the limitations described above.

If a file/folder name is long, the maximum possible number of files may decrease.

- Both Audio and Video files are counted if their formats are playable on this unit.

**Media supported**

The media that this device can play back a USB flash drive.

**Corresponding File Systems**

This device supports FAT 16/32.

The maximum nested folder depth is 8 (including the root directory). File names are limited to 256 characters (including the extension).

Valid characters for folder/file names are letters A-Z (all caps), numbers 0-9, and '_' (underscore).

**Order of files**

Files are played back in the order that the writing software writes them to the disc. Therefore, the playback order may not be what’s expected. Verify the writing order in the software’s documentation. The playback order of the folders and files is as follows. (The following numbers may differ from actually displayed numbers.)

**Terminology**

**Bit rate**

This is the “sound” compression rate specified for encoding. The higher the bit rate, the higher the sound quality, but also the larger the files.

**Sampling rate**

This value shows how many times per second the data is sampled (recorded). For example, music CDs use a sampling rate of 44.1 kHz, so the sound is sampled (recorded) 44,100 times per second. The higher the sampling rate, the higher the sound quality, but also the larger the volume of data.

**Encoding**

Converting music CDs, WAVE (AIFF) files, and other sound files into the specified audio compression format.

**Tag**

Song information such as track titles, artist names, album names, etc., written into MP3/WMA/AAC/FLAC (USB flash drive) files.

**Root folder**

The root folder (or root directory) is found at the top of the file system. The root folder contains all folders and files. It is created automatically for all burned discs.
In Case of Difficulty

If you encounter a problem, please turn the power off, then on again. If the unit is still not functioning normally, please review the items in the following checklist. This guide will help you isolate the problem if the unit is at fault. Otherwise, make sure the rest of your system is properly connected, or then consult your authorized Alpine dealer.

**Basic**

**No function or display.**
- Vehicle's ignition is off.
  - If connected according to the instructions, the unit will not operate with the vehicle's ignition off.
- Improper power lead connections.
  - Check power lead connections.
- Blown fuse.
  - Check the fuse on the battery lead of the unit; replace with the proper value if necessary.
- Internal micro-computer malfunctioned due to interference noise, etc.
  - Press the RESET switch with a ballpoint pen or other pointed article.

**No sound or unnatural sound.**
- Incorrect setting of volume/balance/fader controls.
  - Readjust the controls.
- Connections are not properly or securely made.
  - Check the connections and firmly connect.

**Screen not displayed.**
- Brightness/Contrast control is set at the minimum position.
  - Adjust the Brightness/Contrast control.
- Temperature in the vehicle is too low.
  - Increase the vehicle's interior temperature to operation temperature range.
- Connections to the Auxiliary Device are not securely made.
  - Check the connections and firmly connect.
- The Parking Brake Lead is not connected.
- The Parking Brake is not engaged.
  - Connect the Parking Brake Lead, then engage the Parking Brake.

**Movement of displayed picture is abnormal.**
- Temperature in the vehicle is too high.
  - Allow the vehicle's interior temperature to cool.

**Radio**

**Unable to receive stations.**
- No antenna, or open connection in the antenna cable.
  - Make sure the antenna is properly connected; replace the antenna or cable if necessary.

**Unable to tune stations in the seek mode.**
- You are in a weak signal area.
  - Make sure the tuner is in DX mode.
- If the area you are in is a primary signal area, the antenna may not be grounded and connected properly.
  - Check your antenna connections; make sure the antenna is properly grounded at its mounting location.
- The antenna may not be the proper length.
  - Make sure the antenna is fully extended; if broken, replace the antenna with a new one.

**Broadcast is noisy.**
- The antenna is not the proper length.
  - Extend the antenna fully; replace it if it is broken.
- The antenna is poorly grounded.
  - Make sure the antenna is grounded properly at its mounting location.
- The station signal is weak and noisy.
  - If above solution does not work, tune in another station.

**USB Audio**

**Unit does not operate.**
- Condensation.
  - Wait a while (about 1 hour) for the condensation to dry.

**Picture is unclear or noisy.**
- Vehicle's battery power is weak.
  - Check the battery power and wiring.
  (The unit may malfunction if the battery power is under 11 volts with a load applied.)

**Navigation**

**The Navigation cannot work properly.**
- Reset Navigation system.
  - Turn the ignition key off, and then set to ON again.
If this Message Appears

Various messages are displayed on the screen during operation. In addition to the messages telling you the current status or providing guidance for the next operation, there are also the following error messages. If one of these error messages is displayed, carefully follow the instructions in the solution column.

System

If you are driving, please pull over before using this function.
- A setup operation, etc., was carried out while the vehicle was running.
  - Move the vehicle to a safe location, stop, and engage the parking brake, then carry out this operation.

USB current error.
- Abnormal current is run to the USB connector device.
  - Turn the ignition key off, and then set to ON again.
  - Attempt to connect another iPod/iPhone/USB Flash drive.

USB HUB is not supported.
- A USB flash drive with a hub is connected.
  - You cannot play back from a USB flash drive with a hub. USB hub connections are also not supported.

File Format not supported.
- A USB Video file that is not supported by this unit is selected.
  - Check if the video file is playable by seeing "About USB Video format" (page 56).

Audio/Visual

Connected USB device is not supported.
- An iPod/iPhone that is not supported by the unit is connected.
  - Connect an iPod/iPhone that is supported by the unit.
  - Reset the iPod.
- A USB device that is not supported by the unit is connected.
  - Attempt to connect another USB flash drive.
  - Communication error.
    - Turn the ignition key off, and then set to ON again.
    - Check the display by reconnecting between the iPod/iPhone and the unit, using the iPod/iPhone cable.
    - Check the display by reconnecting between the USB flash drive and the unit.
- Caused by the iPod/iPhone Software Version not being compatible with this unit.
  - Update the iPod/iPhone Software Version to be compatible with this unit.
- The iPod/iPhone is not verified.
  - Change to another iPod/iPhone.

No data.
- There are no data in the iPod/iPhone.
  - Download data to the iPod/iPhone and connect to the unit.
- There are no data in the USB flash drive.
  - Download data to the USB flash drive and connect to this unit.

Un-readable song was skipped.
- A copy-protected WMA file has been detected.
  - You can only play back non-copy-protected files.
- A sampling rate/bit rate not supported by the unit is used.
  - Use a sampling rate/bit rate supported by the unit.

DAB Antenna error
- The DAB antenna cable is either damaged or not connected correctly to the product.
  - Check that the antenna cable is not kinked or otherwise damaged. Replace the antenna if necessary.
- Abnormal current is run to the DAB Antenna.
  - Connect the antenna properly to a car with a 12 volt negative ground.

Bluetooth

Please connect Bluetooth audio device.
- The Bluetooth audio device was not connected correctly.
  - Check the settings for the unit and the Bluetooth audio device and reconnect.

Unable to download phonebook.
- Phonebook failed to read due to mobile phone disconnection, etc.
  - Check the mobile phone connection, and then conduct synchronising and adding again. (See page 65)
- The connected mobile phone does not support synchronising of its phone book.
  - Connect the mobile phone that supports synchronising the phone book, then synchronise again. (See page 65)

HDMI

HDMI communication error,
Please check your device and operate it again.
- Communication error.
  - Turn the ignition key off, and then set to ON again.
  - Check the display by reconnecting between the HDMI and the unit, using the HDMI cable.
  - Check the display by reconnecting between the HDMI device and the unit.

HDMI current error,
Please Connect your device again.
- Abnormal current is run to the HDMI connector device.
  - Turn the ignition key off, and then set to ON again.
  - Disconnect the HDMI device from the unit, and then reconnect it.

CAN Interface

CAN Communication Error
- Communication error.
  - Check the CAN Interface box connection.
  - This error might occur if the ignition of the vehicle is switched off, but the device still is live on the red line (e.g. additional switch in caravans).

Applying Alpine TuneIt App

You can not use Sound App
Because External AP is on.
- "Setting the External AP" (page 44) is "On."
  - When "External AP" (page 44) is set to "On," you cannot perform Sound Tuning from the Alpine TuneIt App. Set "External AP" to "Off" to perform Sound Tuning from the Alpine TuneIt App.
**Navigation**

*The vehicle’s position is erroneous.*

- The GPS reception is poor.
  - Drive the vehicle in an area of good GPS reception to allow the unit to recalibrate itself. Move to a location where strong GPS reception is possible.
- No correct speed signal.
  - In the case that no speed signal or no correct speed signal is received by the vehicle, the positioning cannot take place accurately. Check the VP learning mode (page 37).

**No operation**

- Moisture condensation
  - Allow enough time for the condensation to evaporate (about 1 hour).
- Ambient Temperature
  - Make sure the temperature inside the vehicle is between 0°C and 45°C (32°F and 113°F).

---

**Specifications**

**MONITOR SECTION**

Screen Size: 9"
LCD Type: Transparent type TN LCD
Operation System: TFT active matrix
Number of Picture Elements: 1,152,000 pcs. (800 x 480 x 3 (RGB))
Effective Number of Picture Elements: 99% or more
Illumination System: LED

**FM TUNER SECTION**

Tuning Range: 87.5 – 108.0 MHz
Mono Usable Sensitivity: 8.1 dBf (0.7 μV/75 ohms)
50 dB Quieting Sensitivity: 12 dBf (1.1 μV/75 ohms)
Alternate Channel Selectivity: 80 dB
Signal-to-Noise Ratio: 65 dB
Stereo Separation: 35 dB
Capture Ratio: 2.0 dB

**MW TUNER SECTION**

Tuning Range: 531 – 1,602 kHz
Usable Sensitivity: 25.1 μV/28 dBf

**LW TUNER SECTION**

Tuning Range: 153 – 281 kHz
Sensitivity (IEC Standard): 31.6 μV/30 dBf

**DAB SECTION**

Tuning Range BAND III: 174.93 – 239.2 MHz
Tuning Range L-BAND: 1,452.96 – 1,490.6 MHz
Usable Sensitivity: -103 dBm
Signal-to-Noise Ratio: 95 dB
Stereo Separation: 85 dB

**USB SECTION**

USB requirements: USB 2.0
Max. Power Consumption: 1,500 mA (CDP Support)
USB Class: USB (Mass Storage Class)
File System: FAT16/32
Number of Channels: 2-Channels (Stereo)
Frequency Response: 5 – 20,000 Hz (+1 dB)
Total Harmonic Distortion: 0.008% (at 1 kHz)
Dynamic Range: 95 dB (at 1 kHz)
Signal-to-Noise Ratio: 100 dB
Channel Separation: 85 dB (at 1 kHz)
*1 Frequency response may differ depending on the encoder software/bit rate.

**HDMI SECTION**

Input Format: 480p/VGA
GPS SECTION

GPS Reception frequency 1,575.42 ±1 MHz
GPS Reception sensitivity -130 dB max.

GLONASS SECTION

GLONASS Reception frequency
1,597.807 MHz - 1,605.6305 MHz
GLONASS Reception sensitivity
-130 dB max.

Bluetooth SECTION

Bluetooth Specification Bluetooth V3.0
Frequency band 2.402 - 2.480 MHz
Output Power +4 dBm Max. (Power class 2)
Profile HFP (Hands-Free Profile)
OPP (Object Push Profile)
PBAP (Phone Book Access Profile)
A2DP (Advanced Audio Distribution Profile)
AVRCP (Audio/Video Remote Control Profile)
SPP (Serial Port Profile)

GENERAL

Power Requirement 14.4 V DC
(11–16 V allowable)
Operating temperature -4°F to +140°F
(-20°C to + 60°C)
Maximum Power Output 50 W × 4
Audio output level
Preout (Front, Rear): 4V/10k ohms (max.)
Preout (Subwoofer): 4V/10k ohms (max.)
Weight 2.56 kg (5 lbs. 10 oz)

CHASSIS SIZE

Width 178 mm (7")
Height 50 mm (2")
Depth 160 mm (6-1/4")

- Due to continuous product improvement, specifications and design are subject to change without notice.
- The LCD panel is manufactured using an extremely high precision manufacturing technology. Its effective pixel ratio is over 99.99%. This means that there is a possibility that 0.01% of the pixels could be either always ON or OFF.

About the Rules of Bluetooth Electromagnetic Radiation Regulation
1. **GRANT OF LICENSE**: The TomTom Services are provided to you on a non-exclusive basis and you may only use the TomTom Services for your personal use and solely in combination with the hardware device which is incorporated into your vehicle. The license granted is non-transferable. If any software is provided as part of the TomTom services the you are only entitled to use the binary form of such software and have no right to receive the source code. If upgrades, updates or supplements to the TomTom Services are obtained or made available to you, the use of such upgrades, updates or supplements is subject to the foregoing unless other terms accompany such upgrades, updates or supplements in which case those terms apply. All other rights not specifically granted under this paragraph are reserved by TomTom.

2. **SAFETY**: The TomTom Services are intended to be used for providing information and navigation services related to your journey only and are not intended to be used as a safety related tool and cannot warn you about all dangers and hazards with respect to the road you are driving. Therefore, it remains your duty to drive in a careful and safe manner (paying all due care and attention to the road) as well as observing all applicable traffic regulations and rules. It is your responsibility not to use the TomTom Services in a manner that would distract you from driving safely.

3. **UPDATES AND CHANGES TO THE SERVICES AND THESE TERMS**: TomTom reserves the right, with or without notice, to discontinue, update, modify, upgrade and supplement the TomTom Services and to modify these terms.

4. **RESTRICTIONS**: You are prohibited from renting, lending, public presentation, performance or broadcasting or any other kind of distribution of the TomTom Services. Other than as permitted by applicable legislation, you will not, and you will not allow any person to, copy or modify the TomTom Services or any part thereof or to reverse engineer, decompile or disassemble the TomTom Services. You may not use the Services in connection with any illegal, fraudulent, dishonest or unethical activity or behaviour.

5. **OWNERSHIP**: All intellectual property rights related to the TomTom Services are owned by TomTom and/or its suppliers.

6. **LIMITED WARRANTY**:

   6.1. You acknowledge that the TomTom Services have not been developed to meet your individual requirements and that it is therefore your responsibility to ensure that the facilities and functions of the TomTom Services meet your requirements. TomTom does not and cannot warrant that the TomTom Services operate uninterrupted or error-free. You should be particularly aware of the fact that calculation errors may occur when using software in a navigation system which may, for example, be caused by local environmental conditions and/or incomplete data. TomTom does not warrant that the TomTom Services are capable of interoperating with any other system, device or product (e.g. software or hardware).

6.2. Without limiting clause 6.1 above, the TomTom Services, and any results generated by the Services are provided on an "as is" and with all faults basis" and TomTom expressly disclaims all other warranties, express or implied, including, but not limited to, the implied warranties of non-infringement, merchantability, satisfactory quality, accuracy, title and fitness for a particular purpose.

6.3. The provisions of this Clause do not affect any of your legal rights under applicable mandatory national legislation, including but not limited to any mandatory statutory warranties. If any part of this limited warranty is held to be invalid or unenforceable, the remainder of the limited warranty shall nonetheless remain in full force and effect.

7. **LIMITATION OF LIABILITY**:

   7.1. To the maximum extent permitted by applicable law, neither TomTom nor its suppliers, officers, directors or employees shall be liable to you or to any third party for any damages, whether direct, special, incidental, indirect or consequential (including but not limited to, damages for the inability to use or access the services, loss of data, loss of business, loss of profits, business interruption or the like) arising out of or related to the use of, the inability to use or access, or otherwise the performance of the Services, even if TomTom has been advised of the possibility of such damages.

   7.2. To the extent TomTom is not permitted under applicable law to exclude its liability pursuant to clause 7.1 above, TomTom’s total aggregate liability to you shall be limited to the amount of US $100.00.

   7.3. The above limitations of liability under this clause 7 do not: (i) affect your rights under any applicable mandatory national legislation; (ii) exclude or limit any liability that cannot be excluded or limited under applicable law.
8. **LINKS TO THIRD PARTY SITES**: TomTom is not responsible for the contents of any third-party sites or services, any links contained in third-party sites or services, or any changes or updates to third-party sites or services which are delivered by the TomTom Services or otherwise. TomTom is providing these links and access to third-party sites and services to you only as a convenience, and the inclusion of any link or access does not imply an endorsement by TomTom or any Third Parties of the third-party site or service. Any use by you of such links or third party sites and the manner in which you use such third party sites and links shall be your responsibility and at your risk and you shall not use them in any illegal or fraudulent manner.

9. **TERMINATION AND DIRECT ENFORCEMENT**: Without prejudice to any other rights, TomTom may immediately terminate this EULA if you fail to comply with any of its terms and conditions. The provisions of this Agreement, which by their nature are intended to survive termination, will remain in effect after termination of this EULA. Furthermore, you agree that TomTom may directly enforce these terms against you.
Hereby, ALPINE ELECTRONICS, INC. declares that the radio equipment type INE-F904D is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address:

Information on Disposal of Old Electrical and Electronic Equipment and Battery (applicable for countries that have adopted separate waste collection systems)

If you want to dispose this product, do not mix it with general household waste. There is a separate collection system for used electronic products in accordance with legislation that requires proper treatment, recovery and recycling. Contact your local authority for details in locating a recycle facility nearest to you. Proper recycling and waste disposal will help conserve resources whilst preventing detrimental effects on our health and the environment.
