1 Important Information

Please Read Carefully Before Using This Product

This product is intended to safely provide turn by turn instruction to get you to a desired destination. Please read the following precautions to ensure that you use your navigation system correctly.

- This product is not a substitute for your personal judgment. Any route suggestions made by the navigation system may never supersede any local traffic regulations or your personal judgment and/or knowledge of safe driving practices. Do not follow route suggestions if the navigation system instructs you to perform an unsafe or illegal manoeuvre, places you in an unsafe situation, or routes you into an area which you consider unsafe.
- Glance at the monitor screen only when necessary and safe to do so. If prolonged viewing of the screen is necessary, stop the vehicle in a safe and legal manner and location.
- Do not input destinations, change settings, or access any functions requiring prolonged viewing of the monitor while you are driving. Stop the vehicle in safe and legal manner and location before attempting to access the system.
- Do not use the navigation system to route you to emergency services. Not all locations of emergency service providers such as police and fire stations, hospitals and clinics are contained in the database. Please use your own judgment and your ability to ask for directions in these situations.
- The map database contained within the media in which it is stored is the most recent map data available at the time of production. Because of changes in streets and neighbourhoods, there may be situations where the navigation system may not be able to route you to your desired destination. In these cases, use your own personal judgment.
- The map database is designed to provide you with route suggestions. It does not take account of the relative safety of a suggested route, or of factors which may affect the time required to reach your destination. The database does not reflect road closures or construction, road characteristics (i.e. type of road surface, slope or grade, weight or height restrictions, etc.), traffic congestion, weather conditions, or any other factors which may affect the safety or timing of your driving experience. Use your personal judgment if the navigation system is unable to provide you with an alternate route.
- There may be situations where the navigation system may display the vehicle’s location erroneously. Use your own driving judgment in this situation, taking into account current driving conditions. Please be aware that in this situation the navigation system should correct the vehicle’s position automatically; however, there may be times when you may have to correct the position yourself. If this is the case, stop the vehicle in safe and legal manner and location before attempting operation.
- Make certain that the volume level of the monitor is set to a level which still allows you to hear outside traffic and emergency vehicles. Driving while unable to hear outside sounds could cause an accident.
- Please make certain that any other person who intends on using the navigation system reads these precautions and the following instructions carefully.
- If there is anything in the manual which you do not understand, or are uncertain about the operation of the navigation system, please contact an authorised ALPINE representative before using the navigation system.

Correct Disposal of This Product

The product purchased by you is provided in accordance with the European directive 2002/96 EC on WEEE - Waste Electrical and Electronic Equipment. A symbol of the crossed out dustbin has therefore been printed on the product. This applies to all member states of the EC and indicates the fact that the product may not to be disposed of in the normal domestic waste. The product must be disposed of in accordance with the local regulations at separate collection points. Disposal in the normal domestic waste harms the environment. Please contact the responsible waste management authorities or your local dealer where you purchased the product for further information.
2 Warnings

Points to Observe for Safe Usage

- Read the manuals for this device and the system components carefully before using your navigation system. They contain instructions on how to use the system in a safe and effective manner. ALPINE cannot be held responsible for problems resulting from failure to observe the instructions in these manuals.
- This manual uses various pictorial displays to show you how to use this product safely and to alert you to potential dangers resulting from improper connections and operation. The meanings of these pictorial displays are shown below. It is important fully to understand the meanings of these pictorial displays in order to use this manual and the system properly.

Meaning of displays

<table>

</table>

2.1 Warning

**DO NOT OPERATE ANY FUNCTION THAT DIVERTS YOUR ATTENTION FROM SAFELY DRIVING YOUR VEHICLE.**

Any function that requires your prolonged attention should only be performed after coming to a complete stop. Always stop the vehicle in a safe location before performing these functions. Failure to do so may result in an accident.

**DO NOT DISASSEMBLE OR ALTER.**

Doing so may result in an accident, fire or electric shock.

**KEEP SMALL OBJECTS SUCH AS BATTERIES OUT OF THE REACH OF CHILDREN.**

Swallowing them may result in serious injury. If swallowed, consult a physician immediately.

**USE THIS PRODUCT AS SPECIFIED.**

Use for other than its designed application may result in fire, electric shock or other injury.

**DO NOT PLACE HANDS, FINGERS OR FOREIGN OBJECTS IN INSERTION SLOTS OR GAPS.**

Doing so may result in personal injury or damage to the product.

**MINIMISE DISPLAY VIEWING WHILE DRIVING.**

Viewing the display may distract the driver from looking ahead of the vehicle and cause an accident.

**DO NOT FOLLOW ROUTE SUGGESTIONS IF THE NAVIGATION SYSTEM INSTRUCTS YOU TO PERFORM AN UNSAFE OR ILLEGAL MANOEUVRE, OR PLACES YOU IN AN UNSAFE SITUATION OR AREA.**

This product is not a substitute for your personal judgment. Any route suggestions by this system should never supersede any local traffic regulations or your personal judgment or knowledge of safe driving practice.
2.2 Caution

HALT USE IMMEDIATELY IF A PROBLEM APPEARS.
Failure to do so may cause personal injury or damage to the product. Return it to your authorised ALPINE dealer or the nearest ALPINE Service Centre for repair.

KEEP FINGERS AWAY WHILE THE MOTORISED FRONT PANEL OR MOVING MONITOR IS IN MOTION.
Failure to do so may result in personal injury or damage to the product.

Temperature
Be sure the temperature inside the vehicle is between -10° to +50° C (14° to 122° F) before turning your unit on.

Fuse Replacement
When replacing the fuse(s), the replacement must be of the same amperage as shown on the fuse holder. If the fuse(s) blow(s) more than once, carefully check all electrical connections for short circuiting. Also have your vehicle’s voltage regulator checked.

Servicing the Unit
If you have problems, do not attempt to repair the unit yourself. Return it to your ALPINE dealer or the nearest ALPINE Service Station for servicing.

Installation Location
Make sure the NVE-M300P Navigation Module will not be exposed to:

- Direct sun and heat
- High humidity
- Excessive dust
- Excessive vibrations
3 End User Licence Agreement

1 The contracting parties

1.1 This Agreement has been entered into by and between Nav N Go Kft. (registered seat: 23 Bérc utca, H-1016 Budapest, Hungary; Company reg.no.: 01-09-891838) as Licensor (hereinafter: Licensor) and You as the User (hereinafter: User; the User and the Licensor jointly referred to as: Parties) in subject of the use of the software product specified in this Agreement.

2 Conclusion of the Agreement

2.1 The Parties hereby acknowledge that this Agreement shall be concluded by implicit conduct of the Parties without signing the Agreement.

2.2 The User hereby acknowledges that following the lawful acquisition of the software product constituting the object of this Agreement (Section 4), any degree of use, installation into a computer or other hardware, installation of such hardware into a vehicle, pressing of the “Accept” button displayed by the software during installation or use (hereinafter referred to as Use) shall mean that the User has accepted the terms and conditions of this Agreement as legally binding.

2.3 This Agreement shall by no means authorise use of the software product by those persons having unlawfully acquired the software product or having unlawfully installed it on a computer or in a vehicle.

3 Relevant laws and regulations

3.1 To all issues not regulated by this Agreement, the laws of the Republic of Hungary, with specific reference to Act IV of 1959 on the Civil Code and to Act LXXVI of 1999 on Copyrights shall apply.

3.2 The original language version of this Agreement is the Hungarian version. This Agreement has versions in other languages as well. In case of dispute the Hungarian version shall prevail.

4 Object of the Agreement

4.1 The object of this Agreement shall be the navigation guidance software product of Licensor (hereinafter referred to as the Software Product).

4.2 The Software Product shall include the operating computer program, its complete documentation, the map database pertaining thereto and any third-party content and services accessible through the Software Product (hereinafter: Database).

4.3 Any form of display, storage, coding, including printed, electronic or graphic display, storage, source or object code, or any other as yet undefined form of display, storage, or coding, or any medium thereof shall be deemed parts of the Software Product.

4.4 Error corrections, additions, updates used by the User following the conclusion of this Agreement shall also be deemed parts of the Software Product.

5 Rights under copyright

5.1 Unless otherwise provided by law or contractual provisions, the Licensor is the sole and exclusive owner of all material copyrights vested in the Software Product.

5.2 Copyrights extend to the whole Software Product and to its parts separately as well.

5.3 The owner(s) of the copyrights of the Database forming part of the Software Product is (are) the natural person(s) or corporate entity(ies) listed in the Appendix to this Agreement or in the “About” menu item of the operating computer programme (hereinafter referred to as Database Owner). The user's manual of the Software Product includes the name of the menu option where all the owners of the Database items are listed. The Licensor hereby states that it has obtained sufficient usage and representation rights from the Database owners in order to utilise the Database, to offer it for utilisation and to transfer it for utilisation as set forth in this Agreement.

5.4 Pursuant to this Agreement, all rights vested in the Software Product shall remain in the ownership of the Licensor, except for those to which the User is entitled under law or by virtue of this Agreement.

6 Rights of the User

6.1 The User is entitled to install the Software Product into one hardware device (desktop, handheld, portable computer, navigation device), and to run and use one copy of the Software Product or a preinstalled copy of the Software Product thereon.
6.2 The User is entitled to make one backup copy of the Software Product. However, if the Software Product operates after installation without the use of the original media copy, then the original media copy shall be deemed to be a backup copy. In all other cases, the User is only entitled to use the backup copy if the original media copy of the Software Product has been ascertainably and unequivocally rendered unsuitable for its lawful and intended use.

7 Limitations of use

7.1 The User is not entitled
7.1.1 to duplicate the Software Product (to make a copy thereof);
7.1.2 to lease, rent or lend it or to transfer it to a third person for any reason;
7.1.3 to translate the Software Product (including translation (compilation) to other programming languages);
7.1.4 to decompile the Software Product;
7.1.5 to evade the protection of the Software Product or to modify, circumvent or obviate such protection through technological or by any other means;
7.1.6 to modify, extend, transform the Software Product (in whole or in part), to separate it into parts, combine it with other products, install it in other products, utilise it in other products, not even for the purpose of achieving interoperability with other devices;
7.1.7 apart from using the computer program, to obtain information from the Database as a part of the Software Product, to decompile the Database, to use, copy, modify, extend, transform the Database in whole or in part or the group of data stored therein, or to install it in other products or otherwise, utilise it in other products or to transfer it, not even with the aim of achieving interoperability with other products.

7.2 The User may only use the contents available through the Software Product and provided by third parties and the data received through the services provided by third parties (including but not limited to the traffic data received from the RDS TMC traffic information service) for his/her own personal benefit and at his/her own risk. It is strictly prohibited to store, to transfer or to distribute these data or contents or to disclose them in full or in part to the public in any format or to download them from the product.

8 No warranty or limitation of responsibility

8.1 The Licensor hereby informs the User that although the greatest care was taken in producing the Software Product, given the nature of the Software Product and its technical limitations, the Licensor does not provide a warranty for the Software Product being completely error-free, and the Licensor is not bound by any contractual obligation whereby the Software Product obtained by the User should be completely error-free.

8.2 The Licensor does not warrant that the Software Product is suitable for any purpose defined either by the Licensor or the User, and does not warrant that the Software Product is capable of interoperating with any other system, device or product (e.g. software or hardware).

8.3 The Licensor does not assume any responsibility for damages incurred due to an error in the Software Product (including errors of the computer program, the documentation and the Database).

8.4 The Licensor does not assume any responsibility for damages incurred due to the Software Product not being applicable for any defined purpose, or due to the error or incompatibility of the Software Product with any other system, device or product (e.g. software or hardware).

8.5 The Licensor also draws the attention of the User to the fact that, when using the Software Product in any form of vehicle, observing the traffic regulations and rules (e.g. use of obligatory and/or reasonable and suitable security measures, proper and generally expected care and attention in the given situation, and special care and attention required due to the use of the Software Product) is the exclusive responsibility of the User. The Licensor shall not assume any responsibility for any damages occurred in relation to use of the Software Product in a motor vehicle.

8.6 By concluding the Agreement, the User shall, in particular, acknowledge the information stated in Section 8 above.
9 Sanctions

9.1 The Licensor hereby informs the User that, if the Licensor finds its rights under the Copyright Act to be breached, the Licensor may

9.1.1 seek judicial recognition of this breach;

9.1.2 demand that the breach cease and order the person in breach to refrain from continuing such actions;

9.1.3 demand that the person under breach give proper compensation (even by way of publicity at the expense of the person in breach);

9.1.4 claim the return of the increase of assets due to the breach;

9.1.5 demand the cease of the wrongful action and, demand restitution to its state before the breach was committed at the expense of the person in breach, and may demand the destruction of instruments and materials used to commit the breach as well as of the products created by the breach;

9.1.6 claim for damages.

9.2 The Licensor hereby also informs the User that the breach of copyrights and related rights is a crime under Act IV of 1978 on the Hungarian Criminal Code, which may be sentenced of two years in prison in basic cases and up to eight years in prison in aggravated cases.

9.3 Contents and services provided by third parties

The Licensor hereby excludes any liability of its own for the Database in the Software Product and for any content or service provided by a third party by using the Database. The Licensor does not warrant the quality, suitability, accuracy, fitness for a specific purpose or territorial coverage of the product or service or the availability of the service, and it specifically excludes any liability for the suspension of the service, and any damage arising in relation to the service or for complete cancellation of the service.

The relevant information and data in connection with the contents and services provided by third parties are available at www.navngo.com. The User hereby acknowledges that the contents and services provided by third parties may only be used at the risk of the User and for the personal benefit of the User.

9.4 Contents and services provided by the Licensor or an agent of the Licensor

The Licensor or a contractual partner may offer various products and services to the User through www.naviextras.com. The User may only use these services when the User has read and understood the relevant end user licence agreement(s) at www.naviextras.com and the User is obliged to use the services in line with the terms and conditions thereof.

9.5 The parties hereby agree that - depending on the nature of the dispute - either the Pest Central District Court (Pesti Központi Kerületi Bíróság) or the Metropolitan Court of Budapest (Fővárosi Bíróság) will have exclusive jurisdiction to rule on any disputes arising in connection with this Agreement.

6 Getting started with Alpine Navigation Software

Alpine Navigation Software is optimised for in-car use. You can use it easily by tapping the screen buttons and the map with your fingertips.

Alpine Navigation Software can plan routes throughout the whole installed map set; you do not need to change maps or switch to a poorly detailed general map to navigate between map segments or countries.

<table>
<thead>
<tr>
<th>Tasks</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Double tapping the screen</td>
<td>You do not need to tap the screen twice for any action. With buttons and controls, a single tap is enough.</td>
</tr>
<tr>
<td>Tapping and holding the screen</td>
<td>You do not need this to access the basic navigation functions. Tap and keep pressing the following buttons to reach extra functions:</td>
</tr>
<tr>
<td></td>
<td>• Tap and hold ▶️ on list and menu screens: the Navigation menu appears.</td>
</tr>
<tr>
<td></td>
<td>• Tap and hold any of the ◀️, ◀️, ◀️, ◀️, ◀️, and ◀️ buttons on the Map screen: you can rotate, tilt or scale the map continuously.</td>
</tr>
<tr>
<td></td>
<td>• Tap and hold ◀️ on keyboard screens: you can delete several characters quickly.</td>
</tr>
<tr>
<td></td>
<td>• Tap and hold ◀️ or ◀️ in long lists: you can scroll pages continuously.</td>
</tr>
<tr>
<td>Gestures (drag&amp;drop)</td>
<td>You do not need gestures to access the basic navigation features. You need to drag and drop the screen only in cases like:</td>
</tr>
<tr>
<td></td>
<td>• Moving the handle on a slider.</td>
</tr>
<tr>
<td></td>
<td>• Moving the map: grab the map, and move it in the desired direction.</td>
</tr>
<tr>
<td></td>
<td>• Shortcut to open the Map screen: slide your finger from the bottom right corner to the bottom left corner on any screen.</td>
</tr>
<tr>
<td></td>
<td>• Shortcut to open the Navigation menu: slide your finger from the top left corner to the bottom left corner on any screen.</td>
</tr>
</tbody>
</table>

Start using Alpine Navigation Software

When you turn on NVE-M300P Navigation Module for the first time, you need to do the following:

1. Select the written language of the application interface. Later you can change it in Settings (page 63).
2. Select the language and speaker used for voice guidance messages. Later you can change it in Settings (page 63).
3. Read and accept the End User Licence Agreement (page 5).

After this, the Navigation menu appears and you can start using Alpine Navigation Software.
The Navigation menu:

The typical way of using Alpine Navigation Software is to select a destination and start navigating. You can select your destination in the following ways:

- Use the selected location on the map (the Cursor) - (page 28).
- Enter a full address or a part of an address, for example a street name without a house number or the names of two intersecting streets (page 29).
- Enter an address with postal code (page 34). This way you do not need to select the name of the settlement and the search for street names might be faster as well.
- Use a coordinate (page 37)
- Use a saved location:
  - a Favourite (page 35)
  - a POI (page 35)
  - the History of previously set destinations and waypoints (page 36)
6.1 Buttons and other controls on the screen

When you are using Alpine Navigation Software, you usually tap buttons on the touch screen. You only need to confirm selections or changes in Alpine Navigation Software if the application needs to restart, it needs to perform a major reconfiguration, or you are about to lose some of your data or settings. Otherwise, Alpine Navigation Software saves your selections and applies the new settings without confirmation as soon as you use the controls.

</table>
| Slider         | ![Slider Example](image)                     | When a feature has several different unnamed values, Alpine Navigation Software shows an indicator on a gauge that displays and sets a value from a range. | • Drag the handle to move the slider to its new position.  
• Tap the slider where you want the handle to appear; the thumb jumps there. |
| Switch         | ![Switch Example](image)                     | When there are only two choices, a checkmark shows whether the feature is enabled. | Tap it to turn the switch on or off.               |
| Virtual keyboard | ![Virtual Keyboard Example](image) | Alphabetic and alphanumeric keyboards to enter text and numbers. | Each key is a touch screen button.                 |
6.1.1 Using keyboards
You only need to enter letters or numbers in Alpine Navigation Software when you cannot avoid it. You can type with your fingertips on the full-screen keyboards and you can switch between various keyboard layouts, for example ABC, QWERTY or numerical.

<table>
<thead>
<tr>
<th>Task</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Switching to another keyboard layout, for example from an English QWERTY keyboard to a Greek keyboard</td>
<td>Tap <img src="image" alt="Keys" /> and select from the list of available keyboard types. Alpine Navigation Software remembers your last keyboard choice and offers it the next time you need to enter data.</td>
</tr>
<tr>
<td>Correcting your entry on the keyboard</td>
<td>Tap <img src="image" alt="←" /> to remove the unneeded character(s). Tap and hold the button to delete the entire input string.</td>
</tr>
<tr>
<td>Entering a space, for example between a first name and a family name or in multi-word street names</td>
<td>Tap <img src="image" alt="Space" /></td>
</tr>
<tr>
<td>Entering symbols</td>
<td>Tap <img src="image" alt="@/!" /> to switch to a keyboard offering symbol characters.</td>
</tr>
<tr>
<td>Finalising the keyboard entry</td>
<td>Tap <img src="image" alt="OK" /></td>
</tr>
</tbody>
</table>

6.1.2 Permanent buttons (Menu, Return, Monitor Control and Map)
There are buttons that appear on most screens at the same place of NVE-M300P Navigation Module.

**Menu button (≡)**
Tap this button to open the Navigation menu, the main menu of NVE-M300P Navigation Module.

**Return button (←)**
Tap this button to return to the previous screen.
Tap and hold this button to return to the Navigation menu.

**Monitor Control button ( migraine icon)**
Tap this button to open the controls of the Alpine head unit NVE-M300P Navigation Module is connected to.
Map button

This button is context sensitive. It has multiple functions as described below:

<table>
<thead>
<tr>
<th>Context</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>The application displays any other screen than the Map screen.</td>
<td>Tap [ ] to open the Map screen.</td>
</tr>
<tr>
<td>The Map screen is open but the start of the active route is not the current GPS position.</td>
<td>Tap [ ] to jump to the starting point of the recommended route.</td>
</tr>
<tr>
<td>The map is moved or rotated, it does not follow the current GPS position and/or is not rotated automatically.</td>
<td>Tap [ ] to move the map back to the current GPS position. If the map has been rotated, automatic map rotation is also re-enabled.</td>
</tr>
<tr>
<td>The map is at the current GPS position with automatic map rotation (normal navigation).</td>
<td>Tap [ ] to repeat the current voice instruction. The distance is updated to always describe the current situation.</td>
</tr>
</tbody>
</table>

This means you can return to the Map screen from any other screen with one touch of this button, but sometimes you need to tap the button several times to play the current voice instruction.

6.2 Using the map

The map screen is the most frequently used screen of Alpine Navigation Software. It can be accessed from any other screen by tapping [ ].

For further information about the map screen, see page 42.

6.2.1 Manipulating the map

Position markers on the map:

- Current GPS position: [ ] (page 21)
-Selected location (Cursor): [ ] (page 22)
The following controls help you modify the map view to suit your actual needs the best. Most of these controls appear only if you tap the map once, and disappear after a few seconds of inactivity.

<table>
<thead>
<tr>
<th>Action</th>
<th>Button(s)</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Moving the map with drag&amp;drop</td>
<td>No buttons</td>
<td>You can move the map into any direction: tap and hold the map, and move your finger to the direction in which you want to move the map. If GPS position is available and you have moved the map, the button appears. Tap this button to return to the GPS position.</td>
</tr>
<tr>
<td>Zooming in and out</td>
<td>[ , ]</td>
<td>Changes how much of the map is displayed on the screen. Alpine Navigation Software uses high-quality vector maps that let you see the map at various zoom levels, always with optimised content. It always displays street names and other text with the same font size, never upside-down, and you only see the streets and objects that you need. Map scaling has different limits in 2D and in 3D map view modes.</td>
</tr>
<tr>
<td>Tilting up and down</td>
<td>[ , ]</td>
<td>Changes the vertical view angle of the map in 3D mode.</td>
</tr>
<tr>
<td>Rotating left and right</td>
<td>[ , ]</td>
<td>Changes the horizontal view angle of the map in 3D mode or in rotated 2D mode. When GPS position is available, Alpine Navigation Software always rotates the map so its top faces your direction of travel (Track-Up orientation). You can turn away from Track-Up with these buttons. If GPS position is available and you have rotated the map, tap to re-enable the automatic map rotation.</td>
</tr>
<tr>
<td>Viewing modes</td>
<td>[ , ]</td>
<td>Gives you the following map perspectives in Alpine Navigation Software:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• classic top-down view (2D), the top of the map always faces North</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• top-down view (2D), the top of the map always points in the current driving direction</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• perspective view (3D) the top of the map always points in the current driving direction</td>
</tr>
<tr>
<td>Multi-function button.</td>
<td>[ ]</td>
<td>Show Start position / Return to GPS position / Repeat voice instruction. See page 15 for details.</td>
</tr>
<tr>
<td>Map scale</td>
<td>![map_scale]</td>
<td>Alpine Navigation Software shows the scale of the map in 2D mode.</td>
</tr>
</tbody>
</table>
6.2.2 Lane information and Signposts

When navigating on multilane roads, it is important to take the appropriate lane in order to follow the recommended route. If lane informations are available in the map data, Alpine Navigation Software displays the lanes and their directions using small arrows at the bottom of the map. Arrows in yellow represent the lanes you need to take.

Where there is additional information available, signposts substitute arrows. Signposts are always displayed at the top of the map. The colour and style of the signposts are similar to the real ones you can see above road or by the roadside. They show the available destinations and the number of the road the lane leads to.

All signposts look similar when cruising (when there is no recommended route). When navigating a route, only that signpost is displayed in vivid colours that points to the lane(s) to be taken; all others are darkened out.

6.2.3 Status information and hidden controls on the map

The following information appears in the top left corner, the Turn Preview field. When tapping this area, the result depends on the information currently shown.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Information</th>
<th>Details</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Icon]</td>
<td>If the icon is a static picture, route calculation is needed</td>
<td>GPS position and an active route are available, but automatic off-route recalculation is switched off, and you deviated from the route.</td>
<td>Tap this area to make Alpine Navigation Software recalculate the recommended route. Automatic off-route recalculation is also re-enabled.</td>
</tr>
<tr>
<td>![Icon]</td>
<td>If the icon is animated, route calculation is in progress</td>
<td>Alpine Navigation Software is calculating or recalculating the route.</td>
<td>Nothing happens if you tap this area of the screen.</td>
</tr>
<tr>
<td>![Icon]</td>
<td>Next route event (next manoeuvre)</td>
<td>GPS position and an active route are available, and you navigate the recommended route. This area gives you information about the type and distance of the next route event.</td>
<td>Tap this area to open the Route Information screen.</td>
</tr>
</tbody>
</table>
The following information can be seen in the three data fields shown on the map screen. Tap this area to open the Trip Information screen where you can select which values to be shown in these three fields.

When there is no active route, these fields show the following information: current speed, compass and the current time of day.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Type</th>
<th>More information</th>
</tr>
</thead>
<tbody>
<tr>
<td>NE</td>
<td>Compass</td>
<td>Shows the direction of your heading both when the map is automatically rotated and when the map is always facing North.</td>
</tr>
</tbody>
</table>
| 24 km/h | Speed information | There are speed values that can be shown:  
- Current speed  
- Speed limit on the current road |
| 1:05 | Time information | There are time values that can be shown:  
- Local time  
- Time remaining to reach the destination  
- Time remaining to reach the next waypoint  
- Estimated arrival time at the destination  
- Estimated arrival time at the next waypoint |
| 230 m | Distance information | There are distance type values that can be shown:  
- Distance remaining to reach the destination  
- Distance remaining to reach the next waypoint  
- Current altitude |

The area in the bottom left corner is a combined status indicator field. Tap this area to open the GPS Data screen (page 53).

<table>
<thead>
<tr>
<th>Icon</th>
<th>Status for</th>
<th>More information</th>
</tr>
</thead>
<tbody>
<tr>
<td>GPS</td>
<td>GPS position quality</td>
<td>A higher number of lit bars indicates better GPS position accuracy.</td>
</tr>
<tr>
<td></td>
<td>Track log recording</td>
<td>Alpine Navigation Software records a Track log when GPS position is available.</td>
</tr>
</tbody>
</table>
6.2.4 Using the Cursor (the selected map location)

First, place the Cursor at the desired map location with one of the following options:

- Use the Destination menu to select a location. The map returns with the selected point (the Cursor) in the middle, and the Cursor menu appears with the available options.
- Tap the screen and tap again to place the Cursor at the desired location. Now tap **Select** to open the Cursor menu.

You can perform the following actions:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Go</strong></td>
<td>Creates a new route with the Cursor as the destination. The previous route (if exists) is deleted.</td>
</tr>
<tr>
<td><strong>Options</strong></td>
<td>Opens the full-screen Cursor menu with all the possible options.</td>
</tr>
<tr>
<td><strong>Set as Home</strong></td>
<td>The location of the Cursor is saved as the Home address.</td>
</tr>
<tr>
<td><strong>Save as POI</strong></td>
<td>The Cursor is saved as a user POI. Select the POI group and give a name for the POI, then select a suitable icon, enter a phone number, and additional information if you like.</td>
</tr>
<tr>
<td><strong>Set as Start</strong></td>
<td>The Cursor becomes the start point of the route. This means that the route is not started from the current GPS position, and Automatic Off-route Recalculation needs to be turned off to keep the selected point as the start point.</td>
</tr>
<tr>
<td><strong>Routing Methods</strong></td>
<td>This button is similar to the <strong>Go</strong> button, but a new screen opens, and the route is calculated with all the possible route calculation methods (Fast, Short, Economical and Easy). Observe the results, and choose one of the routes to navigate.</td>
</tr>
<tr>
<td><strong>New Waypoint</strong></td>
<td>The Cursor is added to the active route as an intermediate route point, a point to be reached before the destination. If there is already a waypoint in the route, the Edit Route screen opens to let you decide where the new waypoint is to appear in the route.</td>
</tr>
<tr>
<td><strong>Add to Favourites</strong></td>
<td>The location of the Cursor is added to the list of frequently visited destinations, the so called Favourites. You can give a name for the Favourite.</td>
</tr>
</tbody>
</table>
6.3 Alpine Navigation Software concepts

6.3.1 Auto Zoom

Auto Zoom provides much more than just a usual automatic zoom feature:

- **While following a route calculated by Alpine Navigation Software**: when approaching a turn, it will zoom in and raise the view angle to let you easily recognise your manoeuvre at the next junction. If the next turn is at a distance, it will zoom out and lower the view angle to be flat so you can see the road in front of you.

- **While driving without an active route in Alpine Navigation Software**: Auto Zoom will zoom in if you drive slowly and zoom out when you drive at high speed.

6.3.2 Position markers

6.3.2.1 Current GPS position and Lock-on-Road

When your GPS position is available, Alpine Navigation Software marks your current position with the icon on the map.

The exact location of the position marker depends on the vehicle type used for route calculation. The vehicle type can be selected in Route settings (page 61).

If you choose any of the vehicles, the icon may not show your exact GPS position and heading. If roads are near, it is aligned to the nearest road to suppress GPS position errors, and the direction of the icon is aligned to the direction of the road.

6.3.2.2 Returning to normal navigation

When GPS position is available, and you have moved the map (the icon is moving or is not even visible), or you have rotated the map in 3D or rotated 2D mode, tap to move the map back to the GPS position and re-enable automatic map rotation.

**Note!** Even if you move the map while you are driving, Alpine Navigation Software continues navigating if there is an active route: it plays the voice instructions and displays the turn preview icon according to your current GPS position.
6.3.2.3 Selected location (Cursor)
If you select a location in the Destination menu, or you tap the map when the map control buttons are visible, the Cursor appears at the selected point on the map. Alpine Navigation Software displays the Cursor with a large circle (⊙) to make it visible at all zoom levels, even when it is in the background of a 3D map view.

When the Cursor is set, tap Select. The Cursor menu appears and you can use the Cursor as one of the following:

- the start point of a route
- a waypoint in a route
- the destination of a route

You can also search for POIs around the Cursor.

Or you can save the location of the Cursor as:

- a Favourite
- a POI

6.3.3 Daytime and night colour profiles
Alpine Navigation Software uses different colour profiles during the day and during the night.

- Daytime colours are similar to paper road maps.
- The night colour profiles use dark colours for large objects to keep the average brightness of the screen low.

Alpine Navigation Software offers different daytime and night colour profiles. It can also switch automatically between the daytime and the night schemes based on the current time and GPS position a few minutes before sunrise, when the sky has already turned bright, and a few minutes after sunset, before it becomes dark.

6.3.4 Colour scheme in tunnels
When entering a tunnel, the colours of the map change. All buildings disappear, large objects (such as surface waters or forests) and empty areas between roads become black.

However, roads and streets keep their original colours from the daytime or night colour scheme currently used.

After leaving the tunnel, the original colours return.
6.3.5 Route calculation and recalculation

Alpine Navigation Software calculates the route based on your preferences:

- Route calculation method:
  - Fast
  - Short
  - Economical
  - Easy

- Vehicle types:
  - Car
  - Taxi
  - Bus
  - Emergency vehicles

- Road types:
  - Unpaved Roads
  - Permit Needed
  - Motorways
  - Per-use Toll
  - Period Charge
  - Ferries
  - Cross-border Planning

Alpine Navigation Software automatically recalculates the route if you deviate from the proposed itinerary.

Depending on the type of the TMC event, Alpine Navigation Software also recalculates the route if a TMC event concerns a part of the recommended route.

For further information about Route Planning options, see page 61.
6.3.6 Turn List (Itinerary)

The Itinerary is the list of the route events, it equals the driving instructions.

To display the Turn List, tap the following buttons:

You have the following options on the Itinerary screen:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Any of the list items</td>
<td>Opens the map with the selected manoeuvre in the middle.</td>
</tr>
<tr>
<td>Mode</td>
<td>Changes the detail level of the Itinerary. The levels are as follows:</td>
</tr>
<tr>
<td></td>
<td>• Detailed Instructions: all intersections are listed</td>
</tr>
<tr>
<td></td>
<td>• Turn List: only significant intersections (the ones announced in voice guidance) are listed</td>
</tr>
<tr>
<td></td>
<td>• Road List: the list of the roads used while navigating the route</td>
</tr>
<tr>
<td></td>
<td>Moves between pages for additional list items.</td>
</tr>
</tbody>
</table>

When the map is open with a manoeuvre in the middle:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Zooms in the map.</td>
</tr>
<tr>
<td></td>
<td>Zooms out the map.</td>
</tr>
<tr>
<td></td>
<td>Moves the map to show the previous or next manoeuvre.</td>
</tr>
<tr>
<td></td>
<td>Opens a screen where you can avoid a part of the route starting from the selected manoeuvre.</td>
</tr>
</tbody>
</table>
6.3.7 Track Logs
Alpine Navigation Software can log the track that you drive (page 39).

A Track Log is a recording of how your GPS position changed and it is independent of the route Alpine Navigation Software calculated.

Track Logs can be recorded, renamed, replayed, shown on the map, exported to a USB stick in GPX format, and deleted. See page 58.

Independently of the normal track log, you can instruct Alpine Navigation Software to record the native GPS data received from the GPS device. These logs are saved as separate text files on USB stick and they cannot be shown or replayed in Alpine Navigation Software.

To turn on NMEA/SIRF log saving, tap the following buttons:

6.3.8 Route demonstration
A simulation drives you through the route, following the driving instructions (page 38).

You can use it, for example, to see which bridge Alpine Navigation Software planned for the route; if you do not want to take that bridge, you can avoid it.

Tap the following buttons:

6.3.9 POI (Points of Interest)
A point of interest (POI) is a location that someone might find useful or interesting. Alpine Navigation Software is delivered with thousands of POIs and you can also create your own POIs in the application.

POI locations are marked on the map with special icons. POI icons are quite large so you can easily recognise the symbol. The icons are semi-transparent: they do not cover the streets and intersections behind them.

POIs are grouped into several levels of categories and subcategories. The icon of a POI that comes with the map shows the symbol of the POI category. If you save your own POI, you can select an icon for it independently of the POI category you have put it in.
Saving POIs

To save a POI, place the Cursor ( ) at the desired location, then tap the following buttons:

Select Options Save as POI

Managing POIs

You can select which POI groups to show and which ones to hide on the map, and from which zoom levels POI icons are visible. At the same place you can manage your saved POIs. A saved POI can be renamed, moved to a different POI group, its icon can be changed, or a phone number and additional information can be added to it. Tap the following buttons:

Personal POI

6.3.10 Road Safety Cameras

The location of a Road Safety Camera is a special POI. These cannot be searched like other POIs, and there is a special proximity warning only for cameras.

Is NVE-M300P Navigation Module shipped with a built-in database of Road Safety Cameras? Yes
Can Road Safety Camera locations be uploaded in a text file? Yes
Can you save the Cursor as the location of a Road Safety Camera? No

Camera warning

The warning for Road Safety Cameras can be turned on in Warning Settings. Tap the following buttons:

Settings Warnings Speed Camera Warning

When you approach a Road Safety Camera with the warning enabled, the following happens:

- Visible Warning: The type and distance of the camera is displayed on the Map screen (for example ).
- Audible Warning: If there is no speed limit specified for the camera, or your speed is under the specified speed limit, single beeps warn you about the camera.
- If you exceed the speed limit of the camera, the following also happens:
  - Visible Warning: A symbol with the speed limit appears in the corner of the map (for example: 50).
  - Audible Warning: A special alert sound is played.
6.3.11 Speed limit warning
Maps sometimes contain information about the speed limits of the road segments. This information may not be available for your region (ask your local dealer) or may not be fully correct for all roads on the map.

You can configure Alpine Navigation Software to warn you if you exceed the current limit. Tap the following buttons: | Settings | Warnings | Warn When Speeding |

When you exceed the speed limit, the following happens:
- **Visible Warning**: A symbol with the speed limit appears in the corner of the map (for example: 50).
- **Audible Warning**: A voice message is played using the selected voice guidance profile.

6.3.12 TMC (Traffic Message Channel)
Alpine Navigation Software can provide you with even better routes if Traffic Message Channel (TMC) information is available. TMC is a specific application of the FM Radio Data System (RDS) used for broadcasting real-time traffic and weather information.

TMC is enabled by default in Alpine Navigation Software.

| Note! | TMC is not a global service. It may not be available in your country or region. Ask your local dealer for coverage details. |

NVE-M300P Navigation Module is sold with a TMC module, which is needed to receive TMC data. To receive the signal, you also need a TMC antenna – several models can be purchased as accessory – ask your local dealer for further information.

If public TMC data are broadcasted at your location, Alpine Navigation Software automatically takes into account the TMC data received. You do not need to set anything in the program. The receiver will automatically search the FM radio stations for TMC data, and the decoded information will immediately be used in route planning. The moment Alpine Navigation Software receives traffic information that may affect your route, the program will warn you that it is recalculating the route, and navigation will continue with a new route that is optimal considering the most up-to-date traffic conditions.

You can access the list of TMC events, change TMC related settings, and select or ignore specific radio stations in the list of TMC events. On the Map screen, tap Traffic.
7 Navigating with Alpine Navigation Software

You can set up your route in Alpine Navigation Software in several ways:

- if you need a simple route (a route with only one destination, without any intermediate waypoints), you can select the destination and start navigating to it right away
- you can plan a multi-point route
- you can also plan a route independently of your current GPS position or even without GPS reception

7.1 Selecting the destination of a route

Alpine Navigation Software offers you several ways of choosing your destination and waypoints (intermediate destinations):

- Use the selected location on the map (the Cursor) (page 28).
- Enter a full address or a part of an address, for example a street name without a house number or the names of two intersecting streets (page 29).
- Enter an address with postal code (page 34). This way you do not need to select the name of the settlement and the search for street names might be faster as well.
- Use a coordinate (page 37)
- Use a saved location:
  - a Favourite (page 35)
  - a POI (page 35)
  - the History of previously set destinations and waypoints (page 36)

\[
\text{Tip! If you are going to use a route later, save it before you start navigating. Tap the following buttons:} \]

7.1.1 Selecting the Cursor as the destination

1. Locate your destination on the map: move and scale the map as needed (page 16).

2. Tap the location that you want to select as your destination. The Cursor (\(\text{Cursor}\)) appears.

3. Tap \(\text{Select}\) to open the Cursor menu.

4. The map appears with the selected point in the middle. Tap \(\text{Go}\). The route is then automatically calculated, and you can start navigating.

\[
\text{Tip! If you know that you will use a destination later, instead of tapping} \]

\[
\text{Tip! If you are going to use a route later, save it before you start navigating. Tap the following buttons:} \]

\[
\text{Tip! If you know that you will use a destination later, instead of tapping} \]

\[
\text{Tip! If you know that you will use a destination later, instead of tapping} \]
7.1.2 Entering an address or part of an address

If you know at least a part of the address, it is the quickest way to select the destination of the route. Using the same screen, you can find an address by entering:

- the exact address, including house number
- the centre of a settlement
- an intersection
- the midpoint of a street
- any of the above, starting the search with the postal code (page 34)

7.1.2.1 Entering an address

The parts of the address are shown on buttons. Start reading from the top, and if you want to change any of them, tap the button.

1. Tap the following buttons:

2. By default, Alpine Navigation Software proposes the country and settlement where you are. If needed, tap the button with the name of the country, and select a different one from the list.

3. If needed, change the settlement:

   - To select the settlement from the list of recently used ones, tap the button.
   - To enter a new settlement:
     1. Tap the button with the name of the settlement, or if you have changed the country/state, tap
     2. Start entering the settlement name on the keyboard.
     3. Get to the list of search results:
        - After entering a couple of characters, the names that match the string appear in a list.
        - Tap to open the list of results before it appears automatically.
     4. Select the settlement from the list.
4. Enter the street name:
   1. Start entering the street name on the keyboard.
   2. Get to the list of results:
      - After entering a couple of characters, the names that match the string appear in a list.
      - Tap \text{OK} to open the list of results before it appears automatically.
   3. Select the street from the list.

5. Enter the house number:
   1. Enter the house number on the keyboard.
   2. Tap \text{OK} to finish entering the address.

6. The map appears with the selected point in the middle. Tap \text{Go}. The route is then automatically calculated, and you can start navigating.

7.1.2.2 Entering an address if house numbering is restarted

There are long roads where house numbering is restarted at some point. This way the same house number can appear twice or even more times on the same road. If this is the case, after entering the house number, you need to select the appropriate address by the district/suburb information.

1. Tap the following buttons: \text{Destination}, \text{Address}.
2. By default, Alpine Navigation Software proposes the country/state and settlement where you are. If needed, tap the button with the name of the country/state, and select a different one from the list.
3. If needed, change the settlement:
   - To select the settlement from the list of recently used ones, tap the \checkmark button.
   - To enter a new settlement:
     1. Tap the button with the name of the settlement, or if you have changed the country/state, tap \text{<City Name>}
     2. Start entering the settlement name on the keyboard.
     3. Get to the list of search results:
        - After entering a couple of characters, the names that match the string appear in a list.
        - Tap \text{OK} to open the list of results before it appears automatically.
     4. Select the settlement from the list.

4. Enter the street name:
   1. Start entering the street name on the keyboard.
   2. Get to the list of results:
After entering a couple of characters, the names that match the string appear in a list.

Tap OK to open the list of results before it appears automatically.

3. Select the street from the list.

5. Enter the house number:
   1. Enter the house number on the keyboard.
   2. Tap OK to finish entering the address.

6. A list appears with the matching addresses. Tap the desired one.

7. The map appears with the selected point in the middle. Tap Go. The route is then automatically calculated, and you can start navigating.

7.1.2.3 Entering an address without knowing the district/suburb

Long roads can run across several districts or suburbs. You may not know what particular house number is located where. In this case, follow the instructions below:

1. Tap the following buttons:

2. By default, Alpine Navigation Software proposes the country/state and settlement where you are. If needed, tap the button with the name of the country/state, and select a different one from the list.

3. If needed, change the settlement:
   - To select the settlement from the list of recently used ones, tap the button.
   - To enter a new settlement:
     1. Tap the button with the name of the settlement, or if you have changed the country/state, tap the button.
     2. Start entering the settlement name on the keyboard.
     3. Get to the list of search results:
        - After entering a couple of characters, the names that match the string appear in a list.
        - Tap OK to open the list of results before it appears automatically.
     4. Select the settlement from the list.

4. Enter the street name:
   1. Start entering the street name on the keyboard.
   2. Get to the list of results:
      - After entering a couple of characters, the names that match the string appear in a list.
3. Instead of selecting one of the streets, tap to open the list of results before it appears automatically.

5. Enter the house number:
   1. Enter the house number on the keyboard.
   2. Tap to finish entering the address.

6. A list appears with the matching addresses. Tap the desired one.

7. The map appears with the selected point in the middle. Tap . The route is then automatically calculated, and you can start navigating.

7.1.2.4 Selecting an intersection as the destination

1. Tap the following buttons:

2. By default, Alpine Navigation Software proposes the country/state and settlement where you are. If needed, tap the button with the name of the country/state, and select a different one from the list.

3. If needed, change the settlement:
   - To select the settlement from the list of recently used ones, tap the button.
   - To enter a new settlement:
     1. Tap the button with the name of the settlement, or if you have changed the country/state, tap .
     2. Start entering the settlement name on the keyboard.
     3. Get to the list of search results:
        - After entering a couple of characters, the names that match the string appear in a list.
        - Tap to open the list of results before it appears automatically.
     4. Select the settlement from the list.

4. Enter the street name:
   1. Start entering the street name on the keyboard.
   2. Get to the list of results:
      - After entering a couple of characters, the names that match the string appear in a list.
      - Tap to open the list of results before it appears automatically.
   3. Select the street from the list.
5. Tap the **Intersection** button.

- If only a few intersecting streets exist, their list appears immediately.
- In case of a longer street, a keyboard screen appears. Start entering the name of the intersecting street on the keyboard. As you type, if the matching streets can be shown on one screen, their list appears automatically.

6. Tap the desired intersecting street in the list.

7. The map appears with the selected point in the middle. Tap **Go**. The route is then automatically calculated, and you can start navigating.

### 7.1.2.5 Selecting a city centre as the destination

The City Centre is not the geometric centre of the settlement but an arbitrary point the map creators have chosen. In towns and villages, it is usually the most important intersection; in larger cities, it is an important intersection.

1. Tap the following buttons: **Map**, **Destination**, **Address**.

2. By default, Alpine Navigation Software proposes the country/state and settlement where you are. If needed, tap the button with the name of the country/state, and select a different one from the list.

3. If needed, change the settlement:

   - To select the settlement from the list of recently used ones, tap the **button.
   - To enter a new settlement:
     1. Tap the button with the name of the settlement, or if you have changed the country/state, tap **<City Name>**.
     2. Start entering the settlement name on the keyboard.
     3. Get to the list of search results:
        - After entering a couple of characters, the names that match the string appear in a list.
        - Tap **OK** to open the list of results before it appears automatically.
     4. Select the settlement from the list.

4. Tap the **button.

5. The map appears with the selected point in the middle. Tap **Go**. The route is then automatically calculated, and you can start navigating.
7.1.2.6 Entering an address with a postal code

All of the above address searching possibilities can be performed with entering the postal code instead of the settlement name. Find below an example with a full address:

1. Tap the following buttons: 🏢, 🌐, 📍.
2. By default, Alpine Navigation Software proposes the country/state and settlement where you are. If needed, tap the button with the name of the country/state, and select a different one from the list.
3. Tap the button with the name of the settlement, and enter the postal code:
   1. Start entering the postal code on the keyboard.
   2. Get to the list of results:
      • After entering a couple of numbers, matching results appear in a list.
      • Tap 📋 to open the list of results before it appears automatically.
   3. Pick the settlement from the list.
4. Enter the street name:
   1. Start entering the street name on the keyboard.
   2. Get to the list of results:
      • After entering a couple of characters, the names that match the string appear in a list.
      • Tap 📋 to open the list of results before it appears automatically.
   3. Select the street from the list.
5. Enter the house number:
   1. Enter the house number on the keyboard.
   2. Tap 🌐 to finish entering the address.
6. The map appears with the selected point in the middle. Tap 🌐. The route is then automatically calculated, and you can start navigating.

7.1.2.7 Tips on entering addresses quickly

- When you are entering the name of a settlement or a street, Alpine Navigation Software only displays those characters that appear in possible search results. The other characters are greyed out.
- When entering the settlement name or the street name, tap the 🌐 button after a couple of letters; Alpine Navigation Software lists the items that contain the specified letters.
- You can speed up finding an intersection:
  - Search first for the street with a less common or less usual name; fewer letters are enough to find it.
  - If one of the streets is shorter, search for that one first. You can then find the second one faster.
• You can search for both the type and the name of a road. If the same word appears in several names, for example in the name of streets, roads and avenues, you can obtain the result faster if you enter the first letter of the street type: For example, enter Pi A to obtain Pine Avenue and skip all Pine Streets and Pickwick Roads.

• You can also search in postal codes. This is useful when a street name is common and it is used in several districts of a city.

7.1.3 Selecting the Home address
You can select your Home address if you have already saved it.

1. Tap the following buttons:

2. The map appears with the selected point in the middle. Tap Go. The route is then automatically calculated, and you can start navigating.

7.1.4 Selecting the destination from your Favourites
You can select a location that you have already saved as a Favourite to be your destination.

1. Tap the following buttons:

2. Tap the Favourite that you want to set as your destination.

3. The map appears with the selected point in the middle. Tap Go. The route is then automatically calculated, and you can start navigating.

7.1.5 Selecting the destination from the POIs
You can select your destination from the POIs included with Alpine Navigation Software or from the ones you have previously created.

1. Tap the following buttons:

2. Select the area around which the POI should be searched for:

   • Near Address: The POI will be searched for around a given address.
   • Near Here: The POI will be searched for around the current GPS position.
   • Near Destination: The POI will be searched for around the destination of the active route.
3. You can narrow the search with the following:
   - Select the POI group (e.g. Accommodation), and after that, if needed, select the POI subgroup (e.g. Hotel or Motel).
   - To find the POI by its name, tap [Search], and use the keyboard to enter a part of the name.
   - To list all POIs in a given POI group, tap [List All in this Group].
4. [optional] When finally the list of results appear, you can sort the list:
   - : sort the list alphabetically (available when you search around a single location)
   - : sort the list by the distance from your current position in a straight line (available when you search around a single location)
   - : sort the list by the distance to drive on route from your current position (available when you search along the active route)
   - : sort the list by the size of the needed detour (available when you search along the active route)
5. Tap the desired POI in the list.
6. Review the details of the selected item and tap the name of the POI.
7. The map appears with the selected point in the middle. Tap [Go]. The route is then automatically calculated, and you can start navigating.

7.1.6 Selecting the destination from the History
The destinations that you have set earlier appear in the History.
1. Tap the following buttons:
2. If necessary, move between pages with to see earlier destinations.
3. Tap the desired item.
4. The map appears with the selected point in the middle. Tap [Go]. The route is then automatically calculated, and you can start navigating.
7.1.7 Selecting the destination by entering its coordinates

1. Tap the following buttons: [Destination] [Coordinate] to enter the destination coordinates.
2. [optional] Tap [Coordinate Display Format] to change the format of the displayed coordinates.
3. Tap the latitude or longitude value to change the coordinates.
4. Enter the coordinate values in WGS84 format on the keyboard: the latitude (N or S) and the longitude (E or W).
5. Tap [OK].
6. The map appears with the selected point in the middle. Tap [Go]. The route is then automatically calculated, and you can start navigating.

7.2 Creating a multi-point route (inserting a waypoint)

Multi-point routes are created from simple routes, so a route must be active first with your final destination. The way of expanding the route is to keep the destination, and to add waypoints (intermediate destinations).

1. Select a new location as you did in the previous sections. This will be the additional destination in the route.
2. The map appears with the selected point in the middle.
3. Tap [Options].
4. Tap [New Waypoint] to add the point as an intermediate destination preceding the final destination of the route.
5. [optional] To add more points to the route, repeat the above steps as many times as you like.

If you insert a waypoint in a route that is already a multi-point route, you will automatically be taken to the Edit Route screen where you can determine the position of the intermediate route point. When you enter the screen, the new waypoint is placed as the first waypoint to be reached. The new point is the highlighted point in the list.

You have the following options:

<table>
<thead>
<tr>
<th>Button</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>↑</td>
<td>The selected point moves up in the list (becomes a waypoint to be reached earlier). Tap this button repeatedly, and the point becomes the start point of the route (when routing from a given location) or the first waypoint to reach (when routing from the GPS position).</td>
</tr>
<tr>
<td>↓</td>
<td>The selected point moves down in the list (becomes a waypoint to be reached later). Tap this button repeatedly, and the point becomes the final destination of the route.</td>
</tr>
<tr>
<td>Optimise</td>
<td>Tap this button to optimise the route. The start point and the destination remain at their position, but the waypoints are reordered to make the shortest possible route.</td>
</tr>
<tr>
<td>Remove</td>
<td>Tap this button to remove the selected point from the route. The route remains as it was before adding the new point.</td>
</tr>
</tbody>
</table>
Every time a new point is added, the route is recalculated automatically, and you can start navigating right away.

### 7.3 Editing the route

Tap the following buttons: ![Route](image), ![Edit Route](image).

The list of route points appear with the start point at the top of the list and the final destination at the bottom. If several waypoints exist, you might need to scroll between pages.

Tap one of the route points in the list. You have the following options:

<table>
<thead>
<tr>
<th>Button</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Up" /></td>
<td>The selected point moves up in the list (becomes a waypoint to be reached earlier). Tap this button repeatedly, and the point becomes the start point of the route (when routing from a given location) or the first waypoint to reach (when routing from the GPS position).</td>
</tr>
<tr>
<td><img src="image" alt="Down" /></td>
<td>The selected point moves down in the list (becomes a waypoint to be reached later). Tap this button repeatedly, and the point becomes the final destination of the route.</td>
</tr>
<tr>
<td><img src="image" alt="Optimise" /></td>
<td>Tap this button to optimise the route. The start point and the destination remain at their position, but the waypoints are reordered to make the shortest possible route.</td>
</tr>
<tr>
<td><img src="image" alt="Remove" /></td>
<td>Tap this button to remove the selected point from the route.</td>
</tr>
</tbody>
</table>

As soon as you leave this screen, the route is recalculated automatically, and you can start navigating right away.

### 7.4 Watching the simulation of the route

1. Tap the following buttons: ![Route](image).
2. The Route menu appears. Tap ![Simulate](image) to run the simulation at normal speed and with voice guidance instructions announced.
3. The simulation can be aborted any time by tapping ![Stop](image).

### 7.5 Pausing the active route

You do not need to pause the active route: when you start driving again, Alpine Navigation Software restarts the voice instructions from your position.
7.6 Deleting the next waypoint from the route
The easiest way to delete the upcoming route point (the next waypoint) is to open the Route Information screen by tapping the Turn Preview field (\(\rightarrow\)) on the Map screen, and then tapping Remove Next Waypoint.

Alternatively, you can do it through the Navigation menu:

Route Info  Remove Next Waypoint

7.7 Deleting the active route
The easiest way to delete the active route is to open the Route Information screen by tapping the Turn Preview field (\(\rightarrow\)) on the Map screen, and then tapping Delete Route.

Alternatively, you can do it through the Navigation menu:

Delete Route

Note! If waypoints exist in the active route, you cannot delete the route immediately on the Route Information screen. Tap Remove Next Waypoint repeatedly until all waypoints disappear and the Delete Route button appears. Tap it to cancel the whole route.

7.8 Using Track Logs
Alpine Navigation Software can record the track (how your GPS position changed) that you drive.

Tip! You do not need to select a destination and create a route for this; you can also record your driving path while cruising.

Recording the travelled path (creating a Track Log)

1. Start driving.
2. Tap the following buttons: Edit  Track Logs
3. Start the recording: tap the Record button.
You return to the map and you can continue driving.

4. Repeat the above steps, then tap later to stop the recording. Alpine Navigation Software labels the Track Log with a time stamp.

Simulating a Track Log on the map

1. Tap the following buttons: Edit

2. Locate the desired Track Log, and then tap the button next to it.

3. The map returns, and the Track Log simulation (a life-like replay) begins.

4. You can stop the replay any time by tapping the button.

Changing the colour of a Track Log

1. Tap the following buttons: Edit

2. Tap the desired Track Log and then tap one of the colour buttons.

7.9 Saving the active route

1. Tap the following buttons: Route

2. Enter a name for the saved route, and then tap OK.

When you save a route, Alpine Navigation Software not only saves the route points but the whole itinerary:

- The saved route might have been influenced by TMC information. When you later use the route, it appears as it was saved. But if it needs to be recalculated, the current TMC information will be used in the new route.

- If you updated your map since you first saved the route, Alpine Navigation Software recognises the change, and recalculates the driving instructions according to the latest available map information.

- If you want to save the route, you need to save it before you start navigating. During navigation, Alpine Navigation Software deletes any waypoints that you already left behind together with the road segments used to reach it.
7.10 Loading a saved route

1. Tap the following buttons: Route, Load Route.

2. Tap the route you wish to navigate.

3. In the very likely case when the start position of the saved route is different from the current GPS position, you need to confirm whether you want to stop navigating from the current GPS position to use the start point of the loaded route.
   - If you choose this option, automatic off-route recalculation will be disabled.
   - If you choose to keep the current GPS position as the start point, the route will be recalculated starting from your current position.

4. The map appears. Tap Go and start navigating.
8 Reference Guide

On the following pages you will find the description of the different menu screens of Alpine Navigation Software.

The Navigation menu:

Alpine Navigation Software starts with the Navigation menu. From there you can access the following screens:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Map screen" /></td>
<td>The Map screen.</td>
</tr>
<tr>
<td><img src="image" alt="Destination" /></td>
<td>Selecting the destination (for example an address or a POI) or using the search engine of Alpine Navigation Software for any other reason (for example to look for the phone number of a POI).</td>
</tr>
<tr>
<td><img src="image" alt="Route" /></td>
<td>Managing the active route (obtaining information about it, changing or deleting it or parts of it) or planning a route without GPS reception.</td>
</tr>
<tr>
<td><img src="image" alt="Edit" /></td>
<td>Managing user data, such as saved locations (POIs and Favourites), Saved Routes, and Track Logs.</td>
</tr>
<tr>
<td><img src="image" alt="Settings" /></td>
<td>Managing the behaviour of Alpine Navigation Software, for example the map layout during navigation, the used languages or the warnings.</td>
</tr>
</tbody>
</table>

8.1 Map screen

Alpine Navigation Software is primarily intended for land navigation. That is why maps in Alpine Navigation Software look similar to paper road maps. However, Alpine Navigation Software provides much more than regular paper maps: you can customise the look and the content of the map.

The most important and most often used screen of Alpine Navigation Software is the Map screen.

During navigation, the screen shows route information and trip data (left screenshot), but when you tap the map, additional buttons and controls appear for a few seconds (right screenshot). Most parts of the screen behave as buttons.
<table>
<thead>
<tr>
<th>Symbol</th>
<th>Name</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Symbol" /></td>
<td>Turn Preview (the next route event)</td>
<td>Opens the Route Information screen</td>
</tr>
<tr>
<td><img src="image" alt="Symbol" /></td>
<td>Traffic information</td>
<td>Opens the list of Traffic events</td>
</tr>
<tr>
<td><img src="image" alt="Symbol" /></td>
<td>Trip data</td>
<td>Opens the Trip Information screen</td>
</tr>
<tr>
<td><img src="image" alt="Symbol" /></td>
<td>GPS position quality</td>
<td>Opens the GPS Data screen</td>
</tr>
<tr>
<td><strong>Top row</strong></td>
<td>Next street or Next settlement</td>
<td>Additional buttons and controls appear for a few seconds</td>
</tr>
<tr>
<td><strong>Bottom row</strong></td>
<td>Current street and house numbers on left and right</td>
<td>Additional buttons and controls appear for a few seconds</td>
</tr>
</tbody>
</table>
| ![Symbol](image) | Map view modes | Switches between 2D and 3D map modes: 
  - 2D North-up 
  - 2D rotated 
  - 3D rotated |
| ![Symbol](image) | Monitor Control button | Opens the controls of the Alpine head unit NVE-M300P Navigation Module is connected to |
| ![Symbol](image) | Menu | Opens the Navigation menu |
| ![Symbol](image) | Cursor menu (appears when the Cursor is not at the current GPS position) | Opens the Cursor menu |
| ![Symbol](image) | Rotate left, rotate right | Rotates the map left or right (not available in 2D North-up mode) |
| ![Symbol](image) | Tilt up, tilt down | Tilts the 3D map |
| ![Symbol](image) | Zoom in, zoom out | Scales the map |
| ![Symbol](image) | Show Start position / Return to GPS position / Repeat voice instruction | This button has multiple functions (page 15) |
| ![Symbol](image) | Current GPS position (on nearest road) | n/a |
| ![Symbol](image) | Cursor (selected map location) | n/a |
8.1.1 Icons on the map
There are several status icons on the map. Most of them also function as a button. The information they provide is as follows:

- GPS position quality
- Track log recording status
- TMC reception and processing status

8.1.1.1 GPS position quality and Track log indicator
This area is a multiple status indicator, and also acts as a button that opens the GPS Data screen.

A red dot (■) is displayed in this field if a Track log is being recorded.
GPS reception quality shows the current accuracy of the position information.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="GPS Icon" /></td>
<td>Alpine Navigation Software is connected to the GPS receiver, but the signal is too weak and the receiver cannot determine the GPS position.</td>
</tr>
<tr>
<td><img src="image" alt="GPS Icon" /></td>
<td>Only a few satellites are received. Position information is available, but elevation (altitude) cannot be calculated.</td>
</tr>
<tr>
<td><img src="image" alt="GPS Icon" /></td>
<td>Altitude information is available, the position is a 3D position.</td>
</tr>
</tbody>
</table>

8.1.1.2 Next route event (Turn Preview field)

There is a field reserved on the Map screen to display the next manoeuvre (route events that are listed in the Turn List). Both the type of the event (turn, roundabout, exiting motorway, etc.) and its distance from the current GPS position is displayed.

Most of these icons are very intuitive and you also know them as road signs. The following table lists some of the frequently shown route events:

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Turn Icon" /></td>
<td>Turn left.</td>
</tr>
<tr>
<td><img src="image" alt="Turn Icon" /></td>
<td>Turn right.</td>
</tr>
<tr>
<td><img src="image" alt="Turn Icon" /></td>
<td>Turn back.</td>
</tr>
<tr>
<td><img src="image" alt="Turn Icon" /></td>
<td>Bear right.</td>
</tr>
<tr>
<td><img src="image" alt="Turn Icon" /></td>
<td>Turn sharp left.</td>
</tr>
<tr>
<td><img src="image" alt="Turn Icon" /></td>
<td>Keep left.</td>
</tr>
<tr>
<td><img src="image" alt="Turn Icon" /></td>
<td>Continue straight in the intersection.</td>
</tr>
<tr>
<td><img src="image" alt="Roundabout Icon" /></td>
<td>Enter roundabout. The number of the exit is shown in the circle, but only for the next turn.</td>
</tr>
<tr>
<td><img src="image" alt="Motorway Icon" /></td>
<td>Enter motorway.</td>
</tr>
<tr>
<td><img src="image" alt="Motorway Icon" /></td>
<td>Exit motorway.</td>
</tr>
<tr>
<td><img src="image" alt="Ferry Icon" /></td>
<td>Board ferry.</td>
</tr>
<tr>
<td><img src="image" alt="Ferry Icon" /></td>
<td>Leave ferry.</td>
</tr>
<tr>
<td><img src="image" alt="Waypoint Icon" /></td>
<td>Approaching the next waypoint.</td>
</tr>
<tr>
<td><img src="image" alt="Destination Icon" /></td>
<td>Approaching the destination.</td>
</tr>
</tbody>
</table>
8.1.2 Objects on the map

8.1.2.1 Streets and roads
Alpine Navigation Software shows the streets in a way that is similar to how the paper road maps show them. Their width and colours correspond to their importance: you can easily differentiate a motorway from a small street.

⚠️ Tip! If you prefer not to see street names during navigation, turn them off (page 59).

8.1.2.2 3D object types
Alpine Navigation Software supports the following 3D object types:

<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>3D landmarks</td>
<td>Landmarks are 3D artistic or block representations of prominent or well-known objects. 3D landmarks are only available in selected cities and countries.</td>
</tr>
<tr>
<td>Elevation model</td>
<td>Hills and mountains are shown in the background of the 3D map view, and illustrated by colour on the 2D map.</td>
</tr>
<tr>
<td>Elevated roads</td>
<td>Complex intersections and vertically isolated roads (such as overpasses or bridges) are displayed in 3D.</td>
</tr>
<tr>
<td>3D buildings</td>
<td>Full 3D city building data that represents actual building size and position on the map. Building data is limited to the city centres of major cities in the US and Europe.</td>
</tr>
<tr>
<td>3D terrain</td>
<td>3D terrain map data shows changes in terrain, elevations or depressions in the land when you view the map, and use it to plot the route map in 3D when you navigate.</td>
</tr>
</tbody>
</table>

To fine-tune 3D visualisation on the map, tap the following buttons:

Map Screen  3D Settings
8.1.2.3 Elements of the active route

Alpine Navigation Software shows the route in the following way:

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Symbol" /></td>
<td>Current GPS position</td>
<td>Your current position displayed on the map. If any vehicle type is selected for route calculation and roads are near, the symbol is put on the nearest road.</td>
</tr>
<tr>
<td><img src="image2" alt="Symbol" /></td>
<td>Cursor (selected map location)</td>
<td>The location selected in the Destination menu, or a map point selected by tapping the map.</td>
</tr>
<tr>
<td><img src="image3" alt="Symbol" /></td>
<td>Start point</td>
<td>The first point of the route. Normally if GPS position is available, it is the start point of the route. If there is no valid GPS position, Alpine Navigation Software uses the last known GPS position as the start point. When you are using a saved route, Alpine Navigation Software asks you if you want to use your GPS position or the first point in the saved route as the start point. You can also modify the start point in the Cursor menu. If you do so, automatic off-route recalculations needs to be turned off to keep the selected point as the start point. If automatic off-route recalculations is disabled for any of the above, tapping the icon in the Turn Preview field not only initiates route recalculations from the current GPS position, but it will re-enable the automatic off-route recalculations as well.</td>
</tr>
<tr>
<td><img src="image4" alt="Symbol" /></td>
<td>Waypoint</td>
<td>A waypoint is an intermediate destination. You can place as many waypoints as you want.</td>
</tr>
<tr>
<td><img src="image5" alt="Symbol" /></td>
<td>Destination (end point)</td>
<td>The last point of the route, the final destination.</td>
</tr>
<tr>
<td><img src="image6" alt="Symbol" /></td>
<td>Route colour</td>
<td>The route always stands out with its colour on the map, both in daytime and in night colour mode. The active leg of the route is always displayed in a brighter shade than the inactive (upcoming) legs.</td>
</tr>
<tr>
<td><img src="image7" alt="Symbol" /></td>
<td>Active leg of the route</td>
<td>The section of the route on which you are driving. If you have not added any waypoints (only a destination), the entire route is the active leg. If you have added waypoints, the active leg is the part of the route from your current location to the next route point (the next waypoint, or the destination if there are no more waypoints to reach).</td>
</tr>
<tr>
<td><img src="image8" alt="Symbol" /></td>
<td>Inactive legs of the route</td>
<td>The future sections of the route; each of them becomes active when you reach the waypoint at its beginning.</td>
</tr>
<tr>
<td><img src="image9" alt="Symbol" /></td>
<td>Streets and roads that are excluded from the navigation</td>
<td>You can choose whether you want to use or avoid certain road types (page 61). However, when Alpine</td>
</tr>
</tbody>
</table>
8.1.3 Cursor menu

As soon as you select one point in the Destination menu, the map appears with the Cursor menu, a menu with possible actions for the selected point.

Alternatively when you tap the map, control buttons appear. Tap again to place the Cursor (Select).

Now tap Select, and the Cursor menu opens with a list of options.

You can perform the following actions:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Closes the Cursor menu, and returns to the previous screen.</td>
<td></td>
</tr>
<tr>
<td>Displayed at the Cursor if it has been relocated since the Cursor menu was opened.</td>
<td></td>
</tr>
<tr>
<td>Zooms out the map.</td>
<td></td>
</tr>
<tr>
<td>Zooms in the map.</td>
<td></td>
</tr>
<tr>
<td>With the Cursor menu open, you can still move or scale the map, and tap the map anywhere to place the Cursor to a new location, but when you use this button, the Cursor jumps back to the place where it was at the time when you opened the Cursor menu.</td>
<td></td>
</tr>
<tr>
<td>Creates a new route with the Cursor as the destination. The previous route (if exists) is deleted.</td>
<td></td>
</tr>
<tr>
<td>Opens the full-screen Cursor menu with all the possible options.</td>
<td></td>
</tr>
<tr>
<td>The location of the Cursor is saved as the Home address.</td>
<td></td>
</tr>
<tr>
<td>The Cursor is saved as a user POI. Select the POI group and give a name for the POI, then select a suitable icon, enter a phone number and additional information if you like.</td>
<td></td>
</tr>
<tr>
<td>The Cursor becomes the start point of the route. This means that the route is not started from the current GPS position, and Automatic Off-route Recalculation needs to be turned off to keep the selected point as the start point.</td>
<td></td>
</tr>
<tr>
<td>If the Cursor is at or near the selected start point, this button replaces the previous one and deletes the start point from the route. The current GPS position is used again as the start point, and Automatic Off-route Recalculation is re-enabled.</td>
<td></td>
</tr>
<tr>
<td>This button is similar to the Go button, but a new screen opens, and the route is calculated with all the possible route calculation methods (Fast, Short, Economical and Easy). Observe the results, and</td>
<td></td>
</tr>
</tbody>
</table>
### Button Description

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="New Waypoint" /></td>
<td>The Cursor is added to the active route as an intermediate route point, a point to be reached before the destination. If there is already a waypoint in the route, the Edit Route screen opens to let you decide where the new waypoint is to appear in the route.</td>
</tr>
<tr>
<td><img src="image" alt="Remove Waypoint" /></td>
<td>If the Cursor is at or near one of the waypoints, this button replaces the previous one, and deletes the selected waypoint from the route. The route is recalculated without the deleted point.</td>
</tr>
<tr>
<td><img src="image" alt="Add to Favourites" /></td>
<td>The location of the Cursor is added to the list of frequently visited destinations, the so called Favourites. You can give a name for the Favourite.</td>
</tr>
</tbody>
</table>

### 8.1.4 Route Information screen

The Route Information screen has all the data and some of the functions you need while you navigate. There are two ways to open this screen:

- It can be opened directly from the Map screen by tapping the Turn Preview field (△).
- From any of the menu screens, tap the following buttons:

![Route Info](image)

In the top section of the screen you see information about the current route. The fields on this screen are continuously updated while you keep the screen open.

When you open the screen, all fields contain information about reaching your final destination. Tap any of the fields to see data on the waypoints starting from the first one through the final destination again.

You have the following data and functions on this screen:

<table>
<thead>
<tr>
<th>Name</th>
<th>Description</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Route line</td>
<td>The upper part of this screen shows your planned route as a horizontal line. Its leftmost point is the start of the route, the rightmost one is the final destination, and you can see your waypoint flags along the line, spaced in proportion to their distance.</td>
<td>Tap this field to change the content of all data fields to waypoint information.</td>
</tr>
<tr>
<td>Estimated Arrival</td>
<td>Shows the estimated arrival time at the final destination of the route based on information available for the remaining segments of the route. The calculation cannot take into account traffic jams and other possible delays.</td>
<td>n/a</td>
</tr>
<tr>
<td>Name</td>
<td>Description</td>
<td>Function</td>
</tr>
<tr>
<td>--------------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>--------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Time Left</td>
<td>Shows the time needed to reach the final destination of the route based on information available for the remaining segments of the route. The calculation cannot take into account traffic jams and other possible delays.</td>
<td>n/a</td>
</tr>
<tr>
<td>Distance Left</td>
<td>Shows the distance you need to travel on the route before reaching your final destination.</td>
<td>n/a</td>
</tr>
<tr>
<td>Method</td>
<td>This field shows how the route was calculated. It either displays the Route Calculation Method or the Vehicle field from the Route Planning options. If you have chosen Car, Taxi or Bus, the type of the route (Fast, Short, Easy or Economical) will be displayed here; if you have selected Emergency, only this information will be displayed here.</td>
<td>n/a</td>
</tr>
<tr>
<td>Warning icons</td>
<td>In these square fields graphical symbols are displayed in case warnings are attached to the planned route. These are warnings, so icons always show information for the whole route, even if the data fields display values from your current position to a waypoint only.</td>
<td>Tap any of the icons for an explanation.</td>
</tr>
</tbody>
</table>

8.1.5 Trip Information screen
The Trip Information screen has both route and travel data you might need during your journey. It can be opened directly from the Map screen by tapping the Trip Data field ( ).

The fields on this screen are continuously updated while you keep the screen open. All route data fields contain information about reaching your final destination.

If you want to change the content of the three data fields on the Map screen, tap .
You have the following data and functions on this screen:
### Name | Description
--- | ---
![checkered flag] or ![yellow flag] | Shows whether the route data fields show information about the final destination (checkered flag) or about the next waypoint (yellow flag).
Field next to the flag | Shows the name or number of the current street or road.
Turn Preview | Shows the type and distance of the next route event.
Compass | Shows the current heading.
Speedometer | Shows the current speed both graphically and as a number.
Distance Remaining | Shows the distance you need to travel on the route before reaching your final destination.
Time Remaining | Shows the time needed to reach the final destination of the route based on information available for the remaining segments of the route. The calculation cannot take into account traffic jams and other possible delays.
Arrival Time | Shows the estimated arrival time at the final destination of the route based on information available for the remaining segments of the route. The calculation cannot take into account traffic jams and other possible delays.
GPS Time | Shows the current time corrected with time zone offset. The accurate time comes from the GPS satellites, and the time zone information comes from the map or it can be set manually in Regional settings.
Altitude | Shows the elevation if it is provided by the GPS receiver.
Speed Limit | Shows the speed limit of the current road if the map contains it.
**Trip Computer** | Opens the Trip Computer screen.
**Set Info** | Tap this button if you want to change the content of the three data fields on the Map screen.

#### 8.1.5.1 Trip Computer screen

The Trip Computer screen provides collected trip data. It can be opened from the Trip Information screen by tapping ![Trip Computer].

The fields on this screen are continuously updated while you keep the screen open.

You can switch between the trips, pause then resume them, or reset their data.

You have the following functions on this screen:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Pause]</td>
<td>Pauses the trip currently shown on the screen. Values on the screen stop changing.</td>
</tr>
<tr>
<td>![Resume]</td>
<td>This button replaces the previous one if it has been activated. Tap it to resume collecting trip data.</td>
</tr>
<tr>
<td>![Reset]</td>
<td>Resets all counters of the currently shown trip. Collecting trip data is restarted only when Alpine Navigation Software receives a position from the GPS.</td>
</tr>
<tr>
<td>![Up] ![Down]</td>
<td>Cycles through all trips.</td>
</tr>
</tbody>
</table>
8.1.6 TMC Events screen

You can access the list of TMC events and select or ignore specific radio stations in the list of Traffic events. Tap the Traffic button on the Map screen.

The colour of the Traffic button show the Traffic status:

<table>
<thead>
<tr>
<th>Colour</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Traffic Icon]</td>
<td>There are no new (unread) Traffic events in the list.</td>
</tr>
<tr>
<td>![Traffic Icon]</td>
<td>There are new Traffic events but they are not concerning your recommended route.</td>
</tr>
<tr>
<td>![Traffic Icon]</td>
<td>There are Traffic events on your route. They were handled, but it is better to take the concerned road segments rather then to avoid them.</td>
</tr>
<tr>
<td>![Traffic Icon]</td>
<td>Manual Traffic handling is selected in Settings, and there are Traffic events on your route to be handled.</td>
</tr>
</tbody>
</table>

When you tap the button, the list of current TMC events is displayed first, ordered by their distance from your current position. You can change the content of the list:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>All</td>
<td>All TMC events received by Alpine Navigation Software appear in the list.</td>
</tr>
<tr>
<td>On Route</td>
<td>Only TMC events concerning a part of your active route appear in the list.</td>
</tr>
</tbody>
</table>

To check the currently received FM radio station, to exclude radio stations or to manually tune to a radio station, tap ![Stations Button]:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Auto-tuner]</td>
<td>If Auto-tuner is enabled, the tuner of Alpine Navigation Software sweeps through the FM CCIR radio band searching for a TMC signal. The first station with TMC data will be used automatically. When no TMC signal is available, the tuner keeps on searching. Turn off Auto-tuner to select a radio station manually.</td>
</tr>
<tr>
<td>![Previous, Next]</td>
<td>When Auto-tuner is turned off, search for the desired radio station manually with these buttons.</td>
</tr>
<tr>
<td>Exclude This Station</td>
<td>Push this button to put the currently received FM radio station on an exception list and make Alpine Navigation Software search for another station instead.</td>
</tr>
<tr>
<td>Show Excluded Stations</td>
<td>This button opens the list of radio stations previously excluded. You can re-enable any or all of the excluded stations.</td>
</tr>
</tbody>
</table>
8.1.7 GPS Data screen

Tap the status field to open the GPS Data screen and to see the status of GPS reception.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Colour</th>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Green" /></td>
<td>Green</td>
<td>GPS position quality indicator</td>
<td>Alpine Navigation Software has a connection to the GPS receiver and GPS position information is available in 3D: Alpine Navigation Software can calculate both your horizontal and vertical GPS position.</td>
</tr>
<tr>
<td><img src="image2" alt="Yellow" /></td>
<td>Yellow</td>
<td></td>
<td>Alpine Navigation Software has a connection to the GPS receiver and GPS position information is available in 2D: only the horizontal position is calculated, Alpine Navigation Software cannot calculate your vertical GPS position.</td>
</tr>
<tr>
<td><img src="image3" alt="Grey" /></td>
<td>Grey</td>
<td></td>
<td>Alpine Navigation Software has a connection to the GPS receiver but GPS position information is not available.</td>
</tr>
<tr>
<td><img src="image4" alt="Red" /></td>
<td>Red</td>
<td></td>
<td>Alpine Navigation Software has no connection to the GPS receiver.</td>
</tr>
<tr>
<td><img src="image1" alt="Green" /> <img src="image5" alt="Blinking" /></td>
<td>Green, blinking</td>
<td>GPS connection quality indicator</td>
<td>Alpine Navigation Software is connected to the GPS receiver.</td>
</tr>
<tr>
<td><img src="image2" alt="Yellow" /> <img src="image5" alt="Blinking" /></td>
<td>Yellow, blinking</td>
<td></td>
<td>Alpine Navigation Software has no connection to the GPS receiver but it is still trying to establish a connection.</td>
</tr>
<tr>
<td><img src="image4" alt="Red" /> <img src="image5" alt="Blinking" /></td>
<td>Red, blinking</td>
<td></td>
<td>Alpine Navigation Software has no connection to the GPS receiver and is not trying to establish a connection.</td>
</tr>
<tr>
<td><img src="image6" alt="Sky View Circle" /></td>
<td>Sky view circle</td>
<td></td>
<td>The virtual sky shows the visible part of the sky above you, with your position as the centre. The satellites are shown at their current positions. The GPS receives data from both the green and yellow satellites. Signals from the yellow satellites are only received, while green ones are used by the GPS receiver to calculate your current location.</td>
</tr>
</tbody>
</table>
### 8.2 Destination menu

Select the destination of your route. Tap the following buttons:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Address</td>
<td>If you know at least a part of the address, this is the quickest way to find the location.</td>
<td>page 29</td>
</tr>
<tr>
<td>Home</td>
<td>You can select the previously saved Home location as your destination.</td>
<td>page 35</td>
</tr>
<tr>
<td>History</td>
<td>The destinations that you have already entered in Alpine Navigation Software are available in the History list.</td>
<td>page 36</td>
</tr>
<tr>
<td>POI</td>
<td>You can select your destination from the thousands of POIs included with Alpine Navigation Software or from the ones you have previously created.</td>
<td>page 35</td>
</tr>
<tr>
<td>Favourites</td>
<td>You can select a previously saved Favourite location as your destination.</td>
<td>page 35</td>
</tr>
<tr>
<td>Coordinate</td>
<td>You can select your destination by entering its coordinates.</td>
<td>page 37</td>
</tr>
</tbody>
</table>

### 8.3 Route menu

Save, load and edit your routes. Tap the following buttons:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Route Info</td>
<td>Opens a screen with useful route data.</td>
<td>page 49</td>
</tr>
<tr>
<td>Turn List</td>
<td>You can browse the driving instructions that Alpine Navigation Software follows during navigation. You can exclude manoeuvres or streets to adjust the route to your preferences.</td>
<td>page 24</td>
</tr>
<tr>
<td>Edit Route</td>
<td>You can modify the route: remove route points or change their order.</td>
<td>page 38</td>
</tr>
</tbody>
</table>
### Button Description Reference

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Change Method</td>
<td>You can modify the routing method used to calculate the recommended route.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Scroll to the next page of menu points.</td>
<td></td>
</tr>
<tr>
<td>Load Route</td>
<td>You can load a previously saved route for navigation.</td>
<td>page 41</td>
</tr>
<tr>
<td>Save Route</td>
<td>You can save the active route for later use.</td>
<td>page 40</td>
</tr>
<tr>
<td>Delete Route</td>
<td>Erase the active route with all its route points (start point, waypoints and destination). If you later decide that you need the same route, you will have to rebuild it from scratch.</td>
<td>page 39</td>
</tr>
<tr>
<td>Simulate</td>
<td>You can run a demonstration of the route at normal speed.</td>
<td>page 25</td>
</tr>
</tbody>
</table>

### 8.4 Edit menu

You can manage the content that Alpine Navigation Software stores.

Tap the following buttons:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Favourites</td>
<td>Renaming or deleting Favourites</td>
<td>page 56</td>
</tr>
<tr>
<td>Personal POI</td>
<td>Updating or deleting POIs</td>
<td>page 56</td>
</tr>
<tr>
<td></td>
<td>Creating, updating or deleting POI groups</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Modifying POI visibility settings</td>
<td></td>
</tr>
<tr>
<td>Saved Routes</td>
<td>Renaming or deleting saved routes</td>
<td>page 57</td>
</tr>
<tr>
<td>Track Logs</td>
<td>Recording, simulating, renaming or deleting track logs, assigning colour to them to be shown on the map</td>
<td>page 58</td>
</tr>
</tbody>
</table>
8.4.1 Manage Favourites
You can manage the list of your Favourites.

Tap the following buttons:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Button with the name of the Favourite</td>
<td>Opens the selected Favourite for editing.</td>
</tr>
<tr>
<td></td>
<td>Deletes the selected item in the list of Favourites.</td>
</tr>
<tr>
<td></td>
<td>Clears the list of Favourites.</td>
</tr>
<tr>
<td></td>
<td>Moves between pages for additional list items.</td>
</tr>
</tbody>
</table>

8.4.2 Manage POIs
You can manage your POIs and set POI visibility for both your POIs and the ones that came with the product. Tap the following buttons:

<table>
<thead>
<tr>
<th>Button / Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Button with the name of the POI group</td>
<td>Opens the list of the subgroups of this POI group. The new list behaves the same as this one.</td>
</tr>
<tr>
<td>Button with the name and address of a POI item</td>
<td>Opens the selected POI for editing. Only the POIs you have created appear in this list.</td>
</tr>
<tr>
<td></td>
<td>Opens the selected POI group for editing.</td>
</tr>
<tr>
<td></td>
<td>Tap to filter the list to contain only the POIs that you saved.</td>
</tr>
<tr>
<td></td>
<td>Tap to see all POIs in the list.</td>
</tr>
<tr>
<td></td>
<td>Creates a new POI group at the given group level.</td>
</tr>
<tr>
<td></td>
<td>Moves between pages for additional list items.</td>
</tr>
</tbody>
</table>
When a POI group is open for editing:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Off</strong></td>
<td>Items in the POI group will not be shown on the map.</td>
</tr>
<tr>
<td><strong>Edit</strong> &lt;br&gt; <strong>Medium</strong> &lt;br&gt; ...</td>
<td>The distance buttons set the zoom level from which the items in the POI group will be shown on the map.</td>
</tr>
<tr>
<td><strong>Same Visibility in Subgroups</strong></td>
<td>Subgroups under the edited POI group will inherit the visibility settings of the POI group.</td>
</tr>
<tr>
<td>Button with the icon of the POI group</td>
<td>Tap this button to select a new icon for the POI group.</td>
</tr>
<tr>
<td><strong>Rename</strong></td>
<td>Tap this button to rename the POI group.</td>
</tr>
<tr>
<td><strong>Remove</strong></td>
<td>Deletes the edited POI group. You are only allowed to remove POI groups that you have created.</td>
</tr>
</tbody>
</table>

When a POI item is open for editing:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Button with the name of the POI</td>
<td>Tap this button to rename the POI.</td>
</tr>
<tr>
<td>Button with the icon of the POI</td>
<td>Tap this button to select a new icon for the POI.</td>
</tr>
<tr>
<td>Button with the address of the POI</td>
<td>Tap this button to modify the location of the POI. Select a new location on the map and tap [Select] to relocate the POI.</td>
</tr>
<tr>
<td>Phone Number</td>
<td>Tap this button to enter a telephone number for the POI.</td>
</tr>
<tr>
<td>Additional Info</td>
<td>Tap this button to enter additional information for the POI.</td>
</tr>
<tr>
<td><strong>Delete</strong></td>
<td>Tap this button to delete the selected POI.</td>
</tr>
<tr>
<td><strong>Change Group</strong></td>
<td>Tap this button to move the POI to another POI group or subgroup.</td>
</tr>
</tbody>
</table>

8.4.3 Manage Saved Routes

You can manage the previously saved routes.

Tap the following buttons:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Button with the name of the saved route</td>
<td>Opens the selected route for editing.</td>
</tr>
<tr>
<td><strong>Delete</strong></td>
<td>Deletes the selected route.</td>
</tr>
<tr>
<td><strong>Clear All</strong></td>
<td>Clears the list of saved routes.</td>
</tr>
<tr>
<td>![Page Up/Down]</td>
<td>Moves between pages for additional list items.</td>
</tr>
</tbody>
</table>
8.4.4 Manage Track Logs
You can record Track Logs, then play them back, display them on the map and view their details.

Tap the following buttons:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Record</td>
<td>Starts recording the track that you drive.</td>
</tr>
<tr>
<td>Stop Recording</td>
<td>Stops the ongoing Track Log recording.</td>
</tr>
<tr>
<td>Button with the name of the track log</td>
<td>Shows the details of the selected Track Log.</td>
</tr>
<tr>
<td></td>
<td>Starts a simulated playback of the selected Track Log on the map.</td>
</tr>
<tr>
<td></td>
<td>Moves between pages for additional list items.</td>
</tr>
</tbody>
</table>

When track log details are shown:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Button with the name of the Track Log</td>
<td>Opens a keyboard screen to let you rename the Track Log.</td>
</tr>
<tr>
<td></td>
<td>Tap this button to hide the Track Log on the map. No colour will be assigned to the Track Log.</td>
</tr>
<tr>
<td></td>
<td>Tap one of the coloured buttons to assign a colour to the Track Log. The Track Log will be shown on the map with this colour.</td>
</tr>
<tr>
<td>Fit to Screen</td>
<td>The map returns with the Track Log. The map is scaled to show the whole Track Log.</td>
</tr>
<tr>
<td>Delete</td>
<td>Deletes the selected Track Log.</td>
</tr>
<tr>
<td>Export</td>
<td>Saves the Track Log onto an inserted USB stick in GPX format.</td>
</tr>
</tbody>
</table>

8.5 Settings menu
You can configure the program settings and modify the behaviour of Alpine Navigation Software.

Tap the following buttons:

The Settings menu has more pages of submenus. Tap to access the other options.
### 8.5.1 Map Screen settings

You can fine-tune the appearance and content of the Map screen.

Tap the following buttons:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Map Screen</td>
<td>You can fine-tune the appearance and content of the Map screen.</td>
<td>page 59</td>
</tr>
<tr>
<td>Sound</td>
<td>You can adjust the sounds of Alpine Navigation Software.</td>
<td>page 60</td>
</tr>
<tr>
<td>Route Planning</td>
<td>These settings determine how routes will be calculated.</td>
<td>page 61</td>
</tr>
<tr>
<td>Regional</td>
<td>These settings allow you to customise the application for your local language, measurement units, time and date settings and formats as well as to choose the voice guidance profile you prefer.</td>
<td>page 63</td>
</tr>
<tr>
<td>Display Adjustment</td>
<td>You can fine-tune display related settings in this menu.</td>
<td>page 63</td>
</tr>
<tr>
<td>Navigation</td>
<td>You can control how Alpine Navigation Software behaves during navigation.</td>
<td>page 64</td>
</tr>
<tr>
<td>Warnings</td>
<td>You can enable and fine-tune some useful warnings.</td>
<td>page 64</td>
</tr>
<tr>
<td>GPS</td>
<td>You can open the GPS Data screen.</td>
<td>page 65</td>
</tr>
<tr>
<td>TMC</td>
<td>You can select the FM radio station to be received for TMC messages.</td>
<td>page 65</td>
</tr>
<tr>
<td>Track Logs</td>
<td>You can set up automatic Track Log saving and fine-tune related settings.</td>
<td>page 66</td>
</tr>
<tr>
<td>User Data Management</td>
<td>You can manage the data you have saved (e.g. POIs, Favourites or History) and the settings you have made in the program.</td>
<td>page 67</td>
</tr>
<tr>
<td>About</td>
<td>This screen has no navigation feature. It merely provides information about the maps and licenses included with your navigation system.</td>
<td></td>
</tr>
</tbody>
</table>

#### 3D Settings

Use 3D settings to determine which of the present 3D objects are shown on the map, and adjust the level of 3D visual detail. The options are as follows:

- **Landmarks**: Landmarks are 3D artistic or block representations of prominent or well-known objects. 3D landmarks are only available in selected cities and countries.
- **Elevated Roads**: Complex intersections and vertically isolated roads (such as overpasses or underground tunnels) are displayed in 3D.
### Colour Profiles
Alpine Navigation Software is able to show the map and the menus in different colours during the day and during the night. Select the colour profiles to be used in each mode and select the automatic or manual switching between the daytime and night colour profiles.

### Elevation on 2D Map
2D maps can also display 3D information. These top-down maps can display elevation by colours and shading.

### Street Names During Navigation
Street names and POI icons can be disturbing on the map during navigation. With this switch you can suppress these map elements when Alpine Navigation Software is following your position on the map. If you move the map, both the street names and POI icons reappear immediately.

### 2D Auto Zoom Level
Turn off or set the zoom level of the Auto Zoom feature in 2D map view modes.

---

#### 8.5.2 Sound settings
You can adjust the sounds of Alpine Navigation Software.

Tap the following buttons:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Key Beep</td>
<td>Key sounds provide audible confirmation of either pressing hardware buttons or tapping the touch screen. The switch turns key sounds on or off. Key sounds are played at the master volume level.</td>
</tr>
</tbody>
</table>
8.5.3 Route Planning options

These settings determine how routes will be calculated.

Tap the following buttons: 🔄 Settings 🔄 Route Planning

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vehicle</td>
<td>You can set the type of vehicle you will use to navigate the route. Based upon this setting, some of the road types can be excluded from the route or some of the restrictions may not be taken into account in route calculation.</td>
</tr>
<tr>
<td>Road Types Used for Route Planning</td>
<td>To let the route fit your needs, you can also set which road types are to be considered for or to be excluded from the route if possible. Excluding a road type is a preference. It does not necessarily mean total prohibition. If your destination can only be accessed using some of the excluded road types, they will be used but only as much as necessary. In this case a warning icon will be shown on the Route Information screen, and the part of the route not matching your preference will be displayed in a different colour on the map.</td>
</tr>
<tr>
<td>Route Calculation Method</td>
<td>You can choose from different route types. The routing method can be changed temporarily while creating the route: when the destination is selected, tap 🔄 in the Cursor menu.</td>
</tr>
</tbody>
</table>
| TMC Reroute Method                          | This setting determines how Alpine Navigation Software uses the received TMC information in route recalculation:  
  - Auto: When route recalculation becomes necessary based on the received TMC events, Alpine Navigation Software recalculates the route automatically.  
  - Manual: When route recalculation becomes necessary based on the received TMC events, Alpine Navigation Software notifies you, but you can decide whether to recalculate the route or not.  
  - Off: TMC events are only taken into account when the route is recalculated in an off-route situation. |

Vehicle types:

- Car
- Taxi
- Bus
- Emergency vehicles
Road Types Used for Route Planning:

<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Motorways</td>
<td>You might need to avoid motorways when you are driving a slow car or you are towing another vehicle.</td>
</tr>
<tr>
<td>Unpaved roads</td>
<td>Alpine Navigation Software excludes unpaved roads by default: unpaved roads can be in a bad condition and usually you cannot reach the speed limit on them.</td>
</tr>
<tr>
<td>Per-use Toll</td>
<td>By default Alpine Navigation Software includes toll roads (pay roads where there is a per-use charge) in the routes. If you disable toll roads, Alpine Navigation Software plans the best toll-free route.</td>
</tr>
<tr>
<td>Period Charge</td>
<td>Charge roads are pay roads where you can purchase a pass or vignette to use the road for a longer period of time. They can be enabled or disabled separately from toll roads.</td>
</tr>
<tr>
<td>Permit needed</td>
<td>You might need a permit or permission from the owners to use certain roads or to enter certain areas. Alpine Navigation Software excludes these roads from the route calculation by default.</td>
</tr>
<tr>
<td>Ferries</td>
<td>Alpine Navigation Software includes ferries in a planned route by default. However, a map does not necessarily contain information about the accessibility of temporary ferries. You might also need to pay a fare on ferries.</td>
</tr>
<tr>
<td>Cross-border planning</td>
<td>In some cases the route calculated according to your other navigation and route preferences would lead through another country. If you wish to always stay within the same country, turn this option off.</td>
</tr>
</tbody>
</table>

Route Calculation Method types:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fast</td>
<td>Gives the quickest possible route if you can travel at or near the speed limit on all roads. Usually the best selection for fast and normal cars.</td>
</tr>
<tr>
<td>Short</td>
<td>Gives a route that has the smallest total distance of all possible routes between the route points. Usually practical for slow vehicles.</td>
</tr>
<tr>
<td>Economical</td>
<td>Combines the benefits of Fast and Short: Alpine Navigation Software calculates as if it were calculating the Fast route, but it takes other roads as well to save fuel.</td>
</tr>
<tr>
<td>Easy</td>
<td>Results in a route with fewer turns. With this option, you can make Alpine Navigation Software to take, for example, the motorway instead of series of smaller roads or streets.</td>
</tr>
</tbody>
</table>
8.5.4 Regional settings

These settings allow you to customise the application for your local language, measurement units, time and date settings and formats as well as to choose the voice guidance profile you prefer.

Tap the following buttons:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Program Language</td>
<td>This button displays the current written language of the Alpine Navigation Software user interface. By tapping the button, you can select a new language from the list of available languages. The application will restart if you change this setting; you are asked to confirm this.</td>
</tr>
<tr>
<td>Voice Profile</td>
<td>This button shows the current voice guidance profile. By tapping the button, you can select a new profile from the list of available languages and speakers. Tap any of these to hear a sample voice prompt. Just tap OK when you have selected the new spoken language.</td>
</tr>
<tr>
<td>Units</td>
<td>You can set the distance units to be used by the program. Alpine Navigation Software may not support all the listed units in some voice guidance languages. If you select a measurement unit not supported by the chosen voice guidance language, a warning message will appear.</td>
</tr>
<tr>
<td>Set Date &amp; Time Format</td>
<td>You can set the date and time format. Various international formats are available.</td>
</tr>
<tr>
<td>Time and Time Zone Settings</td>
<td>You can access time and time zone settings. Alpine Navigation Software helps you with correcting the device time to the ever accurate GPS time. Alpine Navigation Software can also help you set the time zone based on your current GPS position.</td>
</tr>
</tbody>
</table>

Time and Time Zone Settings:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto Time Correction to GPS</td>
<td>Use this feature to synchronise the clock of your device to the highly accurate time provided by the GPS receiver.</td>
</tr>
<tr>
<td>Use Auto Time Zone</td>
<td>Use this feature to synchronise the time zone of the clock of your device to the time zone based on your current GPS position. This is useful if you travel abroad.</td>
</tr>
<tr>
<td>Set Time Zone</td>
<td>Set time zone manually if you do not want to synchronise the time zone automatically. This allows you to use Auto Time Correction and apply a time zone offset to obtain the desired time.</td>
</tr>
<tr>
<td>Compare GPS and device times</td>
<td>The current time of the GPS receiver and the device clock are displayed. Please note that the GPS clock is only available with GPS reception. This allows you to check whether any correction is needed.</td>
</tr>
</tbody>
</table>

8.5.5 Adjust Display

You can fine-tune device related settings in this menu.

Tap the following buttons:
8.5.6 Navigation settings

You can control how Alpine Navigation Software behaves during navigation.

Tap the following buttons:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Keep Position on Road</td>
<td>This feature allows drivers to always correct GPS position errors by matching the vehicle position to the road network. By turning off this feature you also turn off the GPS position error filtering. The position shown on the map will be subject to all position errors and position fluctuations.</td>
</tr>
<tr>
<td>Off-route Recalculation</td>
<td>This switch tells Alpine Navigation Software whether to automatically recalculate the route when you deviate from it. If this feature is turned off, you need to initiate route recalculation manually otherwise navigation will be stopped until you return to the originally recommended route. Setting another point than the current GPS position as the start point of the active route will automatically disable this feature.</td>
</tr>
<tr>
<td>Restore Lock-to-Position</td>
<td>If you have moved or rotated the map during navigation, this feature moves the map back to your current GPS position and re-enables automatic map rotation after the given period of inactivity.</td>
</tr>
</tbody>
</table>

8.5.7 Warning settings

You can enable some useful warnings and disable the touch screen in a moving vehicle with Safety Mode. Tap the following buttons:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Warn When Speeding</td>
<td>Maps may contain information about the speed limits of the road segments. Alpine Navigation Software is able to warn you if you exceed the current limit. This information may not be available for your region (ask your local dealer) or may not be fully correct for all roads in the map. This setting lets you decide whether you wish to receive the warnings. You can set the relative speeding level at which the application warns you (100% represents the current speed limit): • In Built-up Areas: in cities and towns • Elsewhere: at all other locations</td>
</tr>
</tbody>
</table>

Table: | Button | Description |
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Display Adjustment</td>
<td>You can fine-tune the position of the screen content on the display. Tap this button, use the arrows to reposition the application window, and then tap to save the changes and exit.</td>
<td></td>
</tr>
</tbody>
</table>
8.5.8 GPS
You can open the GPS Data screen.
Tap the following buttons:

8.5.9 TMC
You can select the FM radio station to be received for TMC messages.
Tap the following buttons:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use Auto-tuner</td>
<td>If Auto-tuner is enabled, the tuner of Alpine Navigation Software sweeps through the FM CCIR radio band searching for a TMC signal. The first station with TMC data will be used automatically. When no TMC signal is available, the tuner keeps on searching. Turn off Auto-tuner to select a radio station manually.</td>
</tr>
<tr>
<td></td>
<td>When Auto-tuner is turned off, search for the desired radio station manually with these buttons.</td>
</tr>
<tr>
<td>Exclude This Station</td>
<td>Push this button to put the currently received FM radio station on an exception list, and make Alpine Navigation Software search for another station instead.</td>
</tr>
</tbody>
</table>
8.5.10 Track Log settings

You can set up automatic Track log saving and fine-tune related settings.

Tap the following buttons:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Show Excluded Stations</td>
<td>This button opens the list of radio stations previously excluded. You can re-enable any or all of the excluded stations.</td>
</tr>
<tr>
<td>Update Interval</td>
<td>This determines how often track points will be saved. Position information is normally received once a second from the GPS. If you do not need such a detailed log, you can increase this number to save track log space.</td>
</tr>
<tr>
<td>Enable Auto-saving</td>
<td>When auto-saving is enabled, you do not need to turn track log saving on and off manually. Alpine Navigation Software will automatically start recording the track log as soon as GPS position is available.</td>
</tr>
<tr>
<td>Track Logs Max. Size</td>
<td>You can set the maximum database size for the automatically saved track logs. When the limit is reached, the oldest automatically saved track logs will be deleted.</td>
</tr>
<tr>
<td>Create NMEA/SIRF Log</td>
<td>Independently of the normal track log, you can instruct Alpine Navigation Software to record the native GPS data received from the GPS device. These logs are saved as separate text files on an inserted USB stick and they cannot be shown or replayed in Alpine Navigation Software.</td>
</tr>
</tbody>
</table>
8.5.11 User Data Management

You can manage the data you have saved (e.g. POIs, Favourites or History) and the settings you have made in the program.

Tap the following buttons:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Backup User Data</td>
<td>All user data and the current settings will be saved on an inserted USB stick. There is always one backup file. If you perform a backup later, the previous backup will be overwritten with the new information.</td>
</tr>
<tr>
<td>Restore User Data</td>
<td>All user data and settings will be overwritten with the information stored in the backup file. Data and settings created after the latest backup will be lost.</td>
</tr>
<tr>
<td>Reset All Settings</td>
<td>All settings will return to their factory defaults, but no user data will be deleted. The application needs to restart.</td>
</tr>
</tbody>
</table>
9 Glossary

2D/3D GPS reception

The GPS receiver uses satellite signals to calculate its (your) position and needs at least four signals to give a three-dimensional position including elevation. Because the satellites are moving and because objects can block the signals, your GPS device might not receive four signals. If three satellites are available, the receiver can calculate the horizontal GPS position but the accuracy is lower and the GPS device does not give you elevation data: only 2D reception is possible.

Active route

The currently navigated route. You can save and load routes in Alpine Navigation Software, but only one route can be active at any given time and it is always active until you delete it, reach your destination or you quit Alpine Navigation Software. See also: Route.

City Centre

The City Centre is not the geometric centre of the settlement but an arbitrary point the map creators have chosen. In towns and villages, it is usually the most important intersection; in larger cities, it is an important intersection.

GPS accuracy

Several factors have impact on the deviation between your real position and the one given by the GPS device. For example, signal delay in the ionosphere or reflecting objects near the GPS device have a different and varying impact on how accurately the GPS device can calculate your position.

Map

Alpine Navigation Software works with digital maps which are not simply the computerised versions of traditional paper maps. Similarly to the paper road maps, the 2D mode of digital maps show you streets, roads and elevation is also shown by colours.

In 3D mode, you can see the altitude differences, for example valleys and mountains, elevated roads, and in selected cities 3D landmarks and 3D buildings are also displayed.

You can use digital maps interactively: you can zoom in and out (increase or decrease the scale), you can tilt them up and down and rotate them left and right. In GPS-supported navigation, digital maps facilitate route planning.

North-up map orientation

In North-up mode the map is rotated so its top always faces North. This is the orientation in 2D North-up view mode. See also: Track-up map orientation.

Route

A series of destinations to be reached one after the other. A simple route contains one start point and only one destination. Multi-point routes contain one or more waypoints (intermediate destinations). The last route point is the final destination and the route is cut into different legs (from one destination to the next).

Scheme

Alpine Navigation Software comes with different colour schemes for the map for daytime or night use. Schemes are custom graphic settings for the map and they can have different colours for streets, blocks or surface waters in 2D and 3D modes and they display shades or shadows in different ways in 3D mode.

One daytime scheme and one night scheme is always selected. Alpine Navigation Software uses them when it switches from day to night and back.

Track-up map orientation

In Track-up mode the map is rotated so its top always points in the current driving direction. This is the default orientation in 3D map view mode. See also: North-up map orientation.

Road Safety Camera

A special POI type for speed cameras and red light cameras. Different data sources are available and you can also mark the position of a Road Safety Camera on the map.

You can configure Alpine Navigation Software to warn you when you approach one of these cameras. Detecting the location of Road Safety Cameras is prohibited in certain countries. It is the sole responsibility of the driver to check whether this feature can be used during the trip.
10 In the Box

10.1 Accessories

- NVE-M300P Navigation Module 1x
- TMC Module 1x
- Power Vehicle Hanes Cable 1x
- Velcro Fastener 2x
- Flanged Self-tapping Screw (M4×14) 4x
- 13pin RGB Extension Cable 1x
- USB Mini Cable 1x
- External GPS Antenna 1x
- GPS Waterproof Pad 1x
- Cable Clamp (for GPS Antenna) 5x
- Antenna Mounting Plate 1x
- Installation Guide Booklet 1x
- Quick Reference Guide Booklet 1x
- Owner’s Manual CD-ROM 1x

10.2 Optional Accessories

- FM RDS Antenna KAE-500FM (TMC Antenna)
11 Specifications

Main Unit Size (WxHxD)  85mm x 25mm x 110mm (3.35” x 0.98” x 4.33”)
Main Unit Weight     265g (9.35oz)
CPU                  Atlas III Titan (600 MHz)
Sensor               Built-In Gyro and Built-In Acceleration Sensor,
                      12 channel (32 channel acquisition) GPS Receiver
RDS-TMC Tuner        TMC Module
Internal Storage     2GB Built-In flash memory with Pre-Loaded Maps of
                      Western and Eastern Europe
USB Interface        2.0
Audio                Fixed line level audio output (Mono)
Display Resolution   400 x 234 pixels – external analog RGB out
Power Requirements   12V DC (10-16V allowable)
Fuse                 AGC/3AG – 7.5Amp
Operating Temperatur -10°C to +50°C (14°F to 122°F)
Storage Temperatur   -25°C to +70°C (-13°F to 158°F)

Note:
Due to continuous product improvement, specifications are subject to change without notice.
