Safety and Handling Instructions

Caring For Your Player

While your player is quite robust, observing these handling procedures will prolong its life.

- Do not store or use in areas exceeding 45°C or 113°F.
- Do not expose to heat or incinerate.
- Keep away from strong magnetic fields.
- Do not dismantle.
- Do not subject to excessive force or impact.
- Keep away from excessive moisture.
Introduction

Congratulations on making an excellent decision in purchasing the Creative NOMAD® MuVo® TX!

Your new multi-format portable player allows you to store songs in the player’s music library and also comes equipped with an USB 2.0™ connector, so you can transfer audio tracks and data quickly and easily.

Your player also supports Advanced EQ features for audio enhancement. Your portable digital audio player supports multiple audio file formats, including MP3 and WMA*.

* For more information on DRM-protected WMA files, see "Digital Rights Management" on page C-4.
Before You Begin

Package Contents
- NOMAD MuVo TX Player (consists of one USB Flash Drive and one battery module)
- Additional battery module
- Armband
- Installation CD incorporating PDF User’s Guide
- Quick Start Guide leaflet
- Stereo earphones
- One AAA size battery

Contents may vary depending on product model and region of purchase.

Software Included
- Creative Media Detector
- Creative MediaSource
- Adobe Acrobat Reader

Creative Media Detector
Media Detector makes it easy for you to access multimedia content from various internal or external media. There is no need to hunt through a maze of different software to play different types of files.

Media Detector automatically recognizes the insertion or connection of CDs, VCDs, and external devices like Creative NOMAD MP3 players. Upon recognition, the content in the media will automatically start playing.
Creative MediaSource

Creative MediaSource is your ultimate all-in-one digital entertainment software, designed for playing, creating, organizing and transferring digital music. It includes several applications like the Player and Organizer.

For more information and usage details on Creative MediaSource, refer to its online Help.

Creative MediaSource Player

Unlike other media players, Creative MediaSource Player provides exclusive features (such as SmartFit), specially designed to manage and configure your NOMAD MuVo TX more efficiently. With Creative MediaSource Player, you can play back a wide variety of digital audio and video formats such as MP3, WMA, WAV, Audio CD, Midi, VCD, AVI and MPEG-1 on the computer. You can also use the integrated recorder in Creative MediaSource to record audio.

Creative MediaSource Organizer

Creative MediaSource Organizer is an extended view of the Creative MediaSource Player, as it provides additional features to help you manage a huge music library more easily. With it, you can:

- rip Audio CDs and create high quality digital audio files (up to 320 kbps for MP3 and 160 kbps for WMA)
- configure the settings for the NOMAD MuVo TX while it is plugged-in to Creative MediaSource
- "squeeze" more audio tracks into your player with SmartFit, which employs intelligent track management and WMA compression
- view the contents of your computer and your NOMAD MuVo TX using the dual-window transfer panel, convenient for file transfer
- locate songs in a few seconds, just by typing some keywords into the sophisticated music search engine
Adobe Acrobat Reader

Adobe Acrobat Reader is a software application that enables you to view and print Adobe Portable Document Format (PDF) files on all major computer platforms.

- Intel® Pentium® II 350 MHz, AMD® K6-2® 450 MHz or better processor (Pentium III 450 MHz or higher recommended for MP3 encoding)
- CD-ROM drive with digital audio extraction support
- USB 1.1 port (USB 2.0 port recommended)
- 64 MB RAM (128 MB recommended)
- 30 MB free hard disk space (more needed for storing audio)
- Installed mouse
- SVGA graphics adapter (256 colors, 800 x 600 resolution or better)

The software applications on the installation CD may have higher requirements for basic functionality. Refer to each application’s documentation for details.
Document Conventions

We use icons to highlight useful or urgent information for you:

- **Tip.** This tells you about shortcuts or hints relating to a feature.

- **Note.** This highlights additional or important information about a feature.

- **Caution!** This highlights proper usage of your product. Follow these directions to prevent the loss of data, or damage to your product or system.

- **Warning!** This warns you of possible hazards that may result in bodily harm or life-threatening situations.
Web Information

Visit www.NOMADworld.com regularly for information on:
- firmware updates
- NOMAD accessories
- tips and tricks
- FAQs
- troubleshooting
- documentation updates
- software updates or purchases
- technologies used in your player
- an online glossary

Online Registration

Enjoy a host of benefits by registering your product during installation, or at www.creative.com/register.

Benefits include:
- Service and Product support from Creative
- Exclusive updates on promotions and events

The driver updates only work with NOMAD MuVo TX players. Do not install these updates if you own a NOMAD MuVo player.

Using the Scroller

Scroll Select

The Scroller is one of the most important features of your NOMAD MuVo TX. In this document, we will use a new term, “Scroll Select”, to indicate that you should use the Scroller to scroll through options and then select the option by pressing the Scroller.

Depending on the screen you are in, you can have different menu options. You can also choose options from a list or a confirmation box.

Selecting menu options

You can use the Scroller to make selections in menus. For example, if you are looking at the Menu screen:

1. Use the Scroller to scroll through the menu options.
2. Press the Scroller to select the menu item.
Getting Started
Inserting the Battery

1. Open the battery compartment.
2. Insert the battery.
3. Close the battery compartment.
**Power Source and Level Indicators**

The amount of playback time available depends on various factors (for example, volume level used). For more information, see "Usage" on page C-3.

After inserting the battery, your player displays one of the following icons, depending on the battery’s status.

<table>
<thead>
<tr>

<td>your player's battery is 30% full</td>
<td></td>
</tr>
<tr>
<td>✗</td>
<td>your player's battery is nearly empty</td>
<td>○ change the battery at the earliest opportunity</td>
</tr>
</tbody>
</table>
Installing Drivers and Software

Your NOMAD MuVo TX comes with drivers for all operating systems, together with software that helps you create audio tracks, manage your music library and use your player.

1. Make sure that your player is not connected to your computer.
2. Insert the Installation CD into your CD-ROM drive. The disc supports Windows AutoPlay mode and starts running automatically. If not, you need to enable your CD-ROM drive's auto-insert notification feature. For more details see "AutoPlay" on page C-1.
3. Click the **Install software for NOMAD MuVo TX** option to select it.
4. Click the **OK** button.
5. Follow the onscreen instructions to complete the installation.
6. If prompted, restart your computer.

**Windows 98 SE users** must install the drivers to transfer tracks or files to the player.

**To install the software,** Windows 2000/XP users must log in as the computer administrator. For more information, refer to your operating system’s online Help.
Getting Started 2-4

**Connecting the USB Flash Drive to your Computer**

You are now ready to connect your player to your computer. Your NOMAD MuVo TX comes with a USB 2.0 port for data transfers to and from your computer. Be sure that you have installed Creative MediaSource before connecting your player. To transfer audio or data files to your player, refer to "Transferring Tracks or Files" on page 3-3.

Your computer’s USB port may be located on the back panel. If your USB Flash Drive does not fit into the USB port located on the front panel, connect it to the USB port located on the back panel.

Do not press the buttons on your USB Flash Drive while connecting it to your computer.
Transferring Tracks or Files
Transferring Tracks or Files

Creative MediaSource is included on your installation CD (see "Installing Drivers and Software" on page 2-3).

Creative MediaSource is the best way to organize and transfer audio to and from your player. This chapter includes basic instructions on using MediaSource to rip audio CDs, transfer tracks by manual selection, edit track information as well as to create and edit playlists. Alternatively, you can use Windows Explorer to transfer tracks/files.

If you wish to download additional music tracks to your player, you can either download music tracks from Internet music sites (see "Downloading from the internet" on page 3-2) or "rip" them from audio CDs to your computer.

Music files must, however, be encoded into the supported formats (MP3 or WMA file formats), then transferred to your player with Creative MediaSource Organizer.

Data files can also be transferred and stored in your player. For example, if you want to transfer a large presentation or graphic file from one computer to another.
Downloading from the internet

To get MP3 files from the Internet, use a search engine to locate sites with MP3 content. You can also try out these sites (web sites listed here are correct at the time of this document's release):

- NOMADWorld  
  [http://www.NOMADworld.com](http://www.NOMADworld.com)
- SoundClick.com  
  [http://www.soundclick.com](http://www.soundclick.com)
- Epitonic.com  
  [http://www.epitonic.com](http://www.epitonic.com)
- AMP3.com  
  [http://www.amp3.com](http://www.amp3.com)
- ArtistOne.com  
  [http://www.artistone.com](http://www.artistone.com)
- Soundbuzz.com  
  [http://www.soundbuzz.com](http://www.soundbuzz.com)

It is illegal to encode MP3 files for trade or sale unless you have the express or explicit permission of the copyright holder(s).

Follow the instructions on the site and download the music files to your computer.
Creative MediaSource

Transferring Tracks or Files

Only basic instructions on how to use MediaSource with your player are provided in this chapter—extensive instructions are found in the MediaSource Help file.

With Creative MediaSource, you can transfer files and audio tracks to and from your player.

**Using Creative MediaSource**

1. If you are not already in Creative MediaSource Organizer, click the **Player/Organizer View** button.
2. Click the **Show/Hide Right Panel** button.
3. In the **Sources** window, select the source device. If you are transferring files from PC Music Library to a portable hard disk, select PC Music Library as your source.
4. In the **Content** window, select the tracks to transfer. CTRL-click to select multiple tracks.
5. In the **Right Panel** window, click the **Source** bar and select the destination.
6. Click the **Destination Transfer** button to transfer the selected tracks. The **Now Transferring** dialog box appears, showing the current transfer status.

**Using Windows Explorer**

1. On your desktop, right-click the **My Computer** icon, and then click **Explore**.
2. Drag and drop tracks/files into your player.

![Image](https://via.placeholder.com/150)
Editing audio track information

You may need to edit track information when the information is incomplete or wrong.

To edit information about a track
1. If you are not already in Creative MediaSource Organizer, click the Player/Organizer View button.
2. In the Content window, locate the track you want to edit, and right-click it.
4. Select the Tag Information tab.
5. Click on any of the track properties under the Property column. The entire row of information is highlighted.
6. Click on information in the Value field to edit the information.
7. Repeat steps 5 and 6 to change other track properties.
8. Click the OK button when all changes have been made. The new track information will be stored.

To edit information about multiple tracks
1. If you are not already in Creative MediaSource Organizer, click the Player/Organizer View button.
2. In the Content window, locate the tracks you want to edit, hold down the CTRL key and select them.
3. Right-click to edit the Album, Artist or Genre.
4. Type in the new Album, Artist or Genre.
5. Click the OK button.
The first phase in making an MP3 file is extracting audio data from an audio CD. To extract audio data, you will need a CD-ROM drive that can extract digital audio data, and a program known as a Ripper. With Creative MediaSource Organizer, you can rip tracks from most audio CDs. This program uses the CD-ROM drive to read the audio tracks from the audio CD and stores it on your hard disk.

The time needed for a successful audio extraction depends on:
- CD-ROM drive speed
- defects, like scratches on the audio CD
- error-checking features on the CD-ROM drive

Encoding is the second phase of making an MP3 file. Encoders are used to convert the stored audio tracks, usually WAV files, into MP3 files. MP3 encoding is a lossy compression method where some data is loss during compression. However, using the standard sampling rate and bitrates will ensure that your MP3 files retain much of their audio quality. The standard bitrate of most MP3 files is 128 Kbps, although some are set higher, at 160 or 192 Kbps. Higher bitrates will result in larger MP3 file sizes, and may result in better audio quality. Use Creative MediaSource Organizer to extract audio tracks and encode MP3s.

You can rip an audio CD’s tracks to your player, hard disk or PC Music Library. You can choose to rip an entire CD, or selected tracks from the audio CD.
To rip a CD
1. Insert an audio CD into your CD-ROM drive.
2. If you are not already in Creative MediaSource Organizer, click the Player/Organizer View button.
3. In the Sources window, select [e:] Audio CD (where e: represents your CD-ROM drive).
4. In the Task bar, click the Rip Now button.

To rip tracks from an audio CD
1. Insert an audio CD into your CD-ROM drive.
2. If you are not already in Creative MediaSource Organizer, click the Player/Organizer View button.
3. In the Sources window, select [e:] Audio CD (where e: represents your CD-ROM drive).
4. In the Content window, select the tracks to rip. Ctrl-click or Shift-click to select multiple tracks.
5. Drag the selected tracks to PC Music Library in the Source window. The Transfer Queue dialog box appears, showing the current ripping status.
4 Using Your Player
Using Your Player

Your player can function in **Music** or **Voice** mode. In **Music** mode, only .MP3 or .WMA files are played back and in **Voice** mode, only recorded voice files are played back. To switch between modes, see "Music Playback" on page 4-3.

Your player also has Play Modes that allow you to change how your tracks are played back. For more information, see "Play Modes" on page 4-5.

**Turning On/Off your Player**

**To turn on your player**

Press and hold the **Play/Pause** button [●/■] until your player turns on.

The **CREATIVE** logo appears onscreen, followed by the **MuVo TX** logo. Music tracks stored in your player are automatically played back.

**To turn off your player**

Press and hold the **Play/Pause** button [●/■] for a few seconds until after the **Power off** message disappears.

Audio track filenames are sorted in alphanumeric order.
Disconnecting your Player

To stop your player in Windows XP, Windows 2000 or Windows Me

Click the **Safely Remove Hardware** icon on the Taskbar, click **Safely remove USB Mass Storage Device**, and disconnect your player when you are prompted to do so.

![Safely remove USB Mass Storage Device](image)

To stop your player in Windows 98 SE

Make sure that the icon below appears on the LCD screen again for at least five seconds before disconnecting your player.

![Icon](image)
Music Playback

To add audio tracks to your player, see "Transferring Tracks or Files" on page 3-3.

If you are in **Voice** mode and the **Voice Mode** icon 🎤 appears onscreen, do the following to return to **Music** mode.

**To enable Music mode**
1. Press the Scroller.
   The Main Menu (Figure 4-1) appears.

2. Scroll Select the **Music** icon (Figure 4-2).

If you are in **Music** mode and the **Music Mode** icon 🎵 appears onscreen, do the following to return to **Voice** mode.

**To enable Voice mode**
1. Press the Scroller.
   The Main Menu (Figure 4-3) appears.

2. Scroll Select the **Voice** icon (Figure 4-4).
Playing music tracks

Follow these steps to play music tracks.

1. Press the **Play/Pause** button (▶/■) for a few seconds.
   The **Creative MuVo TX** logo appears onscreen, and music tracks stored in your player are automatically played back.

To pause a track

Press the **Play/Pause** button (▶/■).

To stop a track

Press the **Play/Pause** button (▶/■) to pause the track, and then push the Scroller forward. The **Stop** icon (■) appears onscreen.
Your player has Play Modes that allow you to change how your tracks are played back.

The following Play Modes are available:
- A-B
- Repeat Track
- Repeat All
- Repeat Folder
- Track Once
- Shuffle Repeat
- Shuffle Once
- Shuffle Folder
- Normal

Play Modes are disabled by setting the “Normal” mode as described in "Normal mode" on page 4-10.
Repeating music

You can choose to repeat a track, folder, all tracks or a portion of a track.

1. Press the Scroller.
   The Main Menu (Figure 4-5) appears.

2. Scroll Select the Play Mode icon. A list appears (Figure 4-6).

3. Depending on which mode you want, follow the corresponding step:

   **To repeat a track in the Playing List**

   Scroll Select the Repeat Track icon.
   The Repeat Track icon appears onscreen and the track is repeated continuously until you stop it or skip to another track.

   **To repeat a folder**

   Scroll Select the Repeat Folder icon.
   The Repeat Folder icon appears onscreen and tracks in the current folder is repeated continuously until you stop it or skip to another folder.

Repeat Folder Mode is only available in Music mode.
To repeat all tracks

Scroll Select the Repeat All icon.

The Repeat All icon appears onscreen and all tracks are repeated continuously until you stop playback.

To repeat a portion of a track

1. Scroll Select the A-B icon. The A-B icon appears, prompting you to select a start point for the portion of music to repeat.
2. Press the Scroller to mark the beginning of the portion you wish to repeat. The A-B icon appears, prompting you to select an end point for the repeat function.
3. Press the Scroller again, to mark the end point of the portion of music to repeat. The marked portion of music is played back repeatedly.
4. To resume normal playback, enable “Normal” mode as described in "Normal mode" on page 4-10.
Shuffling music

The Shuffle Play Mode can be used to shuffle all tracks (or tracks in a folder) once, or to repeatedly shuffle all tracks.

1. Press the Scroller.
   The Main Menu (Figure 4-7) appears.

2. Scroll Select the Play Mode icon. A list appears (Figure 4-8).

   Depending on which mode you want, follow the corresponding step:

   **To shuffle all tracks once**

   Scroll Select the Shuffle Once icon.
   The Shuffle Once icon appears onscreen and a track is selected at random and played back. Playback stops playing once all the tracks in your player are played back once.

   **To shuffle a folder once**

   Scroll Select the Shuffle Folder icon.
   The Shuffle Folder icon appears onscreen and all tracks in the folder are selected at random and played back. Playback stops playing once all the tracks in the folder are played back once.
To Shuffle Repeat all tracks continuously

Scroll Select the **Shuffle Repeat** icon.
The **Shuffle Repeat** icon 🎧 appears onscreen and tracks are selected at random and played back continuously until you stop playback.

Playing a track once

*When the Track Once Play Mode is enabled, playback stops once the current track ends.*

1. Press the Scroller.
The Main Menu (Figure 4-9) appears.

2. Scroll Select the **Play Mode** icon. A list appears.
3. Scroll Select the **Track Once** icon (Figure 4-10).
The **Track Once** icon ✖️ appears onscreen.
Playback stops once the track ends.
Normal mode

Once the "Normal" mode is enabled, each track is played back in a sorted order, from the first track to the last.

1. Press the Scroller.
   The Main Menu (Figure 4-11) appears.

2. Scroll Select the **Play Mode** icon. A list appears.

3. Scroll Select the **Normal** icon (Figure 4-12). All tracks play back normally.
Voice Recording

A great NOMAD MuVo TX feature is its ability to record audio. Recorded audio is encoded directly into IMA ADPCM (at 8 kHz, 4-bit, Mono) file format.

When recording, note that the available recording time is determined by:
- available space in your player
- battery power remaining in your player

When recording, you will see the time available for recording. You will also see a bar showing you the elapsed recording time.

To make a voice recording

1. Press the Scroller.
   - Scroll Select the Record icon (Figure 4-13).
   - The recording bar appears onscreen.

2. Press the Play/Pause button to start the recording. You cannot pause the voice recording.

Press the Play/Pause button again to end the recording. A name is automatically assigned to your recording and it is saved in your player. The naming convention typically used is: VOC [Current File Number].

Figure 4-13

You cannot pause the voice recording.
EQ Settings

Enhancing Your Music

Your player allows you to enhance your listening experience with EQ settings. EQ settings available in your player include:

- Normal
- Rock
- Pop
- Classical
- Jazz
- Custom EQ

You can use EQ settings with the audio being played back. This simple process is described in the following instructions.

1. Press the Scroller. The Main Menu (Figure 4-14) appears.

2. Scroll Select the EQ icon (Figure 4-15).

Depending on which EQ setting you want, follow the corresponding step:

**To select Normal, Rock, Pop, Classical or Jazz**

Scroll Select the EQ setting you want.
The selected EQ setting icon appears onscreen.
To define your own EQ settings

1. Scroll Select the Custom EQ icon. The Custom EQ screen (Figure 4-16) appears.

2. Five vertical control levers will appear in the display. Each lever represents successively higher frequencies that can be controlled. 62 Hz controls bass frequency, 250 Hz adjusts the low mid-range frequency, 1 kHz adjusts the mid-range frequency, 4 kHz adjusts the upper mid-range frequency and 16 kHz adjusts the treble frequency.

3. Scroll Select each vertical control level. Use the Scroller to move the control knob up or down to vary the amount of boost or reduction in the selected frequency range.

4. Scroll Select the check mark to exit the Custom EQ window.
Skipping Folders

This action skips the playback to a selected folder.

**To skip to the next folder**
1. Press the Scroller.
2. Scroll Select the **Skip Folder** icon (Figure 4-17).
3. Scroll to the folder that you want to skip to.
4. To resume normal playback, press the Scroller again.

Dealing Tracks

This action permanently deletes tracks from your NOMAD MuVo TX.

**To delete a track**
1. In **Music** mode, select the track that you want to delete.
2. Press the Scroller.
3. Scroll Select the **Delete** icon (Figure 4-18). A list appears.
4. Scroll Select the **Delete** icon (Figure 4-19). The track’s name appears onscreen and the track is permanently deleted from your player.
User Preferences

Your player offers many configuration options. You can
- change the LCD orientation
- specify contrast settings
- change the LCD screen’s backlight duration
- specify how long the player remains inactive before it automatically shuts down
- select the default language
- access the information screen

1. Press the Scroller.
2. Scroll Select the **Settings** icon (Figure 4-20). A list appears (Figure 4-21).

![Figure 4-20](image)

![Figure 4-21](image)
Depending on which configuration option you want, follow the corresponding step:

**To rotate the LCD screen 180 degrees**

Left-handed users may find this feature useful.

Scroll Select the **LCD Orientation** icon. The LCD screen rotates 180 degrees (Figure 4-22).
To set the contrast level for your player’s screen
1. Scroll Select the **Contrast** icon. The **Contrast** screen (Figure 4-23) appears.
2. Use the Scroller to increase or decrease the LCD contrast. The lower the number, the lower the LCD contrast.

To adjust the screen backlight duration
1. Scroll Select the **Backlight** icon.
2. Scroll Select the backlight duration or disable it. A lower number setting conserves battery power for longer playback time.

To specify how long the player remains inactive before it automatically shuts down
1. Scroll Select the **Idle Shutdown** icon.
2. Scroll Select the duration you want the player to wait before automatically shutting down.

To change the default language
1. Scroll Select the **Language** icon.
2. Scroll Select the language that you want.

To view firmware version, total storage space, remaining available space and track count
1. Scroll Select the **Information** icon.
Locking and unlocking your Player

Locking your NOMAD MuVo TX will disable all buttons on the player. This feature is useful when you do not want any buttons (for example, Pause) pressed accidentally.

If you press a button while the player is locked, a popup window appears, prompting you to unlock the player. This popup is only displayed for five seconds.

To lock your player
1. Press the Scroller.
2. Scroll Select the Lock icon (Figure 4-24). The player is locked.

To unlock your player
1. Press any button. A popup appears (Figure 4-25).
2. Scroll Select the Unlock icon. The player is unlocked.

Formatting Your Player

If you need to format your player, backup the files in your player first. When you format your player, all songs and files will be deleted. By default, your player is already formatted.

1. Connect your player to your computer’s USB port.
2. Launch Windows Explorer on your computer. Your player is recognized as a Removable Disk in Windows Explorer.
3. Right-click the Removable Disk icon and click the Format option. The Format f:\ dialog box appears (replace f:\ with the drive letter of your player).
4. Follow the onscreen instructions to format your player.
5. After the formatting is complete, make sure you stop your player before disconnecting it from your computer. See "Usage" on page C-3 for instructions on stopping your player.

For more information about using Windows Explorer, refer to its online Help.

Windows 98 SE users must install the NOMAD MuVo TX drivers before formatting the player. For more information on driver installation, see "Installing Drivers and Software" on page 2-3.

Windows 2000 and Windows XP users must select FAT only in the Format F:\ dialog box before formatting the player.
Technical Specifications
Technical Specifications

Size
- 36.7 mm (L) x 74.0 mm (H) x 16.0 mm (W)

Weight
- 31.5 g (without the battery) or 43 g (with a AAA battery)

Capacity
- 128 or 256 MB built-in memory

Battery type
- One Alkaline AAA size battery

Battery Life (playback time)*
- MP3 128 kbps, up to 14 hours of continuous playback from new AAA alkaline batteries.
- WMA 64 kbps, up to 11 hours of continuous playback from new AAA alkaline batteries.

The following may reduce the playback time:
- skipping, fast forward or reverse during playback
- using passive speakers or high-power headphones
- long backlight timeout setting (more than 10 secs)
- playback of .WMA files with a high bitrate and/or heavy bass

Interface
- USB 2.0

Playback Formats
- MP3 (at 8, 11.025, 12, 16, 22.05, 24, 32, 44.1 and 48 kHz)
- WMA (at 8, 11.025, 16, 22.05, 32, 44.1 and 48 kHz)

Voice Recording Formats
- IMA ADPCM (at 8 kHz, 4-bit, Mono)

* Battery life estimated for playback of tracks encoded at 128 kbps.
Signal to Noise Ratio  ❑ Up to 90 dB

Channel Separation  ❑ Up to 63 dB

Frequency Response  ❑ 20 Hz~20000 Hz

Harmonic Distortion  ❑ <0.05%

Operating System/Firmware  ❑ Upgradeable via Internet

Headphone Out  ❑ 1/8" stereo minijack, 5~7 mW

LCD Display  ❑ Large 96 x 32 pixel, blue EL backlit display

Data Connector  ❑ USB 1.1  ❑ USB 2.0

Firmware Support**  ❑ Programmable

** Firmware upgrades are available from www.NOMADworld.com

Frequently Asked Questions and Troubleshooting
FAQs and Troubleshooting

AutoPlay

What do I do when the installation does not start automatically after the Installation CD is inserted?
The AutoPlay feature in your Windows system may not be enabled.

To start the installation program through the My Computer shortcut menu
1. On your Windows desktop, double-click the My Computer icon.
2. Right-click the CD-ROM drive icon, and then click AutoPlay.
3. Follow the onscreen instructions.

To enable AutoPlay through Auto Insert Notification
4. Click Start -> Settings -> Control Panel.
5. Double-click the System icon. The System Properties dialog box appears.
6. Click the Device Manager tab and select your CD-ROM drive.
7. Click the Properties button.
8. Click the Settings tab, and then select Auto Insert Notification.
9. Click the OK button.

To start the installation program through Windows Explorer
1. In Windows Explorer, search and locate the d:\ctrun folder (replace d:\ with the drive letter of your CD-ROM drive).
2. Double-click the ctrun.exe file.
General

Where can I get official information on all NOMAD products?
Visit NOMADworld for updates and downloads relating to all NOMAD products, Creative's MP3 players and accessories.

Windows XP tells me that the software for the player is not certified. What do I do?
At the time of this product's release, Microsoft strongly encouraged companies to submit their hardware solutions for certification. If a hardware device driver is not submitted, or does not qualify, for Microsoft certification, a warning message similar to the one below appears.

You may see this message when installing this driver or update. If you do, you may choose to click the Continue Anyway button. Creative has tested this driver or update on Windows XP, and it does not impair or destabilize your computer.
Usage

After playing a sequence of tracks, the player skips a track.
The player will only play valid formats (.MP3, .WMA or .WAV recordings). Other types of files will be skipped.

Files/tracks are corrupted when transferred to the player.
Transfer may have been interrupted. Before disconnecting your player from your computer, make sure that you stop your player properly first.

To stop your player in Windows XP, Windows 2000 or Windows Me

- Click the **Safely Remove Hardware** icon on the Taskbar, click **Safely remove USB Mass Storage Device**, and disconnect your player when you are prompted to do so.

To stop your player in Windows 98 SE

- Make sure that the icon below appears on the LCD screen again for at least five seconds before disconnecting your player.

The player turns off immediately after it is turned on.
Do one or more of the following:

- format your player. For more information, refer to "Formatting Your Player" on page 4-19.
- check that the batteries used are not depleted.
How many files can I store in my player?
The number of files you can store in your player’s root directory is determined by the file names in your player and your computer's operating system.

- If all your file names are in lower case and comply with the 8.3 or 9.3 file naming convention (for example, 12345678.MP3) you can store up to 256 files in your player’s root directory. Note that a folder is considered as one file.
- If your files are comply with the 8.3 file naming convention and have a mix of upper and lower case letters, you can store up to 128 files in your player’s root directory.
- If you are using a very long file name, the maximum number of files you can store in your player’s root directory is dependant on the number of characters in the file name.

Can I use the NOMAD MuVo TX for portable data storage?  
Yes, you can.

I have to change the battery quite often. Is there anything I can do to make it last longer?  
Some operations consume more battery power:
- a long backlight timeout setting. A shorter timeout conserves battery power.
- a high contrast setting. Position the player so that you can read the display without using a high contrast setting.
- too much use of fast forward/reverse.
- turning the player on/off too many times.
- use of passive speakers or high-powered headphones.
- playback of .WMA files
Digital Rights Management

Can I play DRM-protected WMA files on my Nomad MuVo TX?
Yes.
