Introduction
Thank you for purchasing Creative’s new multi-format player, Creative MuVo® V200! Your player can store thousands of songs in its music library, and comes equipped with an USB 2.0™ connector, so you can transfer audio tracks and data quickly and easily.

Minimum System Requirements
- Intel® Pentium® II 350 MHz, AMD® K6-2® 450 MHz or better processor (Pentium III 450 MHz or higher recommended for MP3 encoding)
- CD-ROM drive with digital audio extraction support
- USB 1.1 port (USB 2.0 port recommended)
- 64 MB RAM (128 MB recommended)
- 30 MB free hard disk space (more needed for storing audio)
- Functioning mouse
- SVGA graphics adapter (256 colors, 800 x 600 resolution or better)

Your player supports WMA files protected with Digital Rights Management (DRM) technology.

The software applications on the MuVo V200 CD may have higher requirements for basic functionality. Refer to each application’s documentation for details.

CREATIVE
Using the Scroller

Scroll Select

The Scroller is one of the most important features of your player. In this document, we will use the term, “Scroll Select”, to mean that you should use the Scroller to scroll through options, and then select the option by pressing the Scroller.

Selecting menu options

You can use the Scroller to make selections in menus. For example, if you are looking at the Menu screen:

1. Use the Scroller to scroll through the menu options.
2. Press the Scroller to select the menu item.

Getting Started
Getting Started

Step 1: Setting Up Your Computer

Your player comes with drivers for Windows 98 SE, together with software that helps you create audio tracks, manage your music library and use your player. Windows XP, Windows 2000 and Windows Me users do not need to install drivers.

1. Make sure that your player is NOT connected to your computer.
2. Insert the MuVo V200 CD into your CD-ROM/DVD-ROM drive. Your CD should start automatically. If it does not, follow the steps below:
   i. Start Windows Explorer.
   ii. On the left pane, click the My Computer icon.
   iii. Right-click the CD-ROM/DVD-ROM drive icon, and then click AutoPlay.
3. Click the MuVo V200 software option to select it.
4. Click the OK button.
5. Follow the instructions on the screen. Creative MediaSource™ and Windows 98 SE drivers (only if applicable) will be installed on your computer.
6. If prompted, restart your computer.

Windows 98 SE users must install the drivers to transfer tracks or files to the player.

To set up your player, Windows 2000 and Windows XP users must log in as the computer administrator. For more information, refer to your operating system’s online Help.
7. Connect your player to your computer.

Your computer’s USB port may be located on the back panel. If your USB Flash Drive does not fit into the USB port located on the front panel, connect it to the USB port located on the back panel.

Do not press the buttons on your USB Flash Drive while connecting it to your computer.
Step 2: Inserting the Battery
Power Source and Level Indicators

After inserting the battery, your player displays one of the following icons, depending on the battery’s status.

<table>
<thead>
<tr>
<th>Icon</th>
<th>What the icon means</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
<td>your player’s battery is full</td>
<td>♦ this battery state icon shows that the battery is full</td>
</tr>
<tr>
<td>☐</td>
<td>your player’s battery is 60% full</td>
<td></td>
</tr>
<tr>
<td>☐</td>
<td>your player’s battery is 30% full</td>
<td></td>
</tr>
<tr>
<td>☐</td>
<td>your player’s battery is nearly empty</td>
<td>♦ change the battery at the earliest opportunity</td>
</tr>
</tbody>
</table>

The amount of playback time available depends on various factors (for example, volume level used). For more information, see "Usage" on page C-2.
Step 3: Transferring Audio and Data

If you wish to download additional music tracks to your player, you can either download music tracks from Internet music sites (see "Downloading from the internet" on page 2-6) or rip them from your audio CDs to create digital files on your computer. For more information, see "Ripping From A CD" on page 2-7.

Music files can be encoded into the supported formats (MP3 or WMA file formats), then transferred to your player with Creative MediaSource Organizer.

Data files can also be transferred and stored in your player, for example, you can transfer a large data file from one computer to another.

**To transfer audio and data with Creative MediaSource**

1. Connect your player’s USB Flash Drive to your computer’s USB port.
2. Launch Creative MediaSource on your computer.
3. On the left pane, locate and select the files you want to transfer to your player. Using the standard drag-and-drop method, transfer the files to your player.
   For information about transferring DRM protected WMA files, refer to "Digital Rights Management" on page C-3.
4. After the transfer is complete, make sure you stop your player properly before disconnecting it from your computer. For more details, see "Step 4: Stopping Your Player Properly" on page 2-8.
To get MP3 files from the Internet, use a search engine to locate sites with MP3 content. You can use your player to download audio files from all the major Internet music download services.

- Walmart.com
  [http://www.musicdownloads.walmart.com](http://www.musicdownloads.walmart.com)
- Bestbuy.com
  [http://www.bestbuy.com](http://www.bestbuy.com)
- Buy.com
  [http://www.buy.com](http://www.buy.com)
- Soundbuzz.com
  [http://www.soundbuzz.com](http://www.soundbuzz.com)
- Epitonic.com
  [http://www.epitonic.com](http://www.epitonic.com)

Follow the instructions on the site and download the music files to your computer.

It may be illegal to encode MP3 files for trade or sale unless you have the express or explicit permission of the copyright holder(s).

When connecting to your Internet Service Provider, usage charges are incurred.
Ripping From A CD

To get music tracks from your CDs to your player, you will need a CD-ROM drive that can extract digital audio data, and Creative MediaSource Organizer.

Creative MediaSource Organizer will read the audio information on your CD and convert it to MP3 files using the bitrate you choose.

The standard bitrate of most MP3 files is 128 Kbps, although some are set higher, at 160 or 192 Kbps. Using the standard bitrate will ensure that your MP3 files retain much of their audio quality. Higher bitrates will result in larger MP3 file sizes, with better audio quality.

The time needed to successfully extract audio from a CD depends on:
- CD-ROM drive speed
- Defects, like scratches on the audio CD
- Error-checking features on the CD-ROM drive
- Bitrate selected for encoding.

For more information on how to rip and encode audio CDs, see the Creative MediaSource online Help.
Step 4: Stopping Your Player Properly

**To stop your player in Windows XP, Windows 2000 or Windows Me**

- Click the **Safely Remove Hardware** icon on the Taskbar, click **Safely remove USB Mass Storage Device**, and disconnect your player when you are prompted to do so.

![Safely remove USB Mass Storage Device - Drive(E:)](image)

**To stop your player in Windows 98 SE**

- In Windows Explorer, right-click the **Removable Disk** icon, click the **Eject** option, and disconnect your player when you are prompted to do so. Make sure that the icon below appears on the LCD screen for at least five seconds before disconnecting your player.

![USB connection icon](image)
Using Your Player
Using Your Player

Your player can function in Music or Recordings mode. In Music mode, only MP3 or WMA files are played back and in Recordings mode, only microphone and FM radio recordings that are recorded by the player, are played back. To switch between modes, see "Enabling a Mode" on page 3-2.

Your player also has Play Modes that allow you to change how your tracks are played back. For more information, see "Play Modes" on page 3-12.

Turning On/Off your Player

Remember to unplug the USB Flash Drive from your computer and insert it into the battery module before turning on the player.

To turn on your player

Press and hold the Play/Pause button until your player turns on. The CREATIVE logo appears on the screen, followed by the MuVo V200 logo. Audio tracks stored in your player are automatically played back.

To turn off your player

Press and hold the Play/Pause button until the Power off message disappears.
Enabling a Mode

Your player can function in **Music** or **Recording** mode. Different modes enable you to select different functions.

1. Press the Scroller. The Main Menu (Figure 3-1) appears.
2. Scroll Select the **Music** icon 🎵 or **Recordings** icon 🎧.

Playing Audio Tracks

To add audio tracks to your player, see "Step 3: Transferring Audio and Data" on page 2-5.

*Follow these steps to play audio tracks.*

1. Press the **Play/Pause** button 🎧 until the **MuVo V200** logo appears on the screen, and audio tracks stored in your player are automatically played back.

   **To pause a track**

   Press the **Play/Pause** button 🎧.

   **To stop a track**

   Press the **Play/Pause** button 🎧 to pause the track. Turn the Scroller towards the left to resume playback at the beginning of the track or turn the Scroller towards the right to resume playback at the beginning of the next track. The **Stop** icon ■ appears on the screen.
Deleting Audio Tracks

This action permanently deletes tracks from your player.

To delete a track
1. In Music mode, select the track that you want to delete.
2. Press the Scroller.
3. Scroll Select the Delete icon (Figure 3-2). A list appears.

4. Scroll Select the Delete icon (Figure 3-3). The track’s name appears on the screen and the track is permanently deleted from your player.

Managing Audio Tracks

For more advanced song management tasks, such as creating and managing playlists, you can use Creative MediaSource Organizer. Creative MediaSource Player/Organizer is your digital audio center for playing, creating, organizing and transferring digital audio. To launch Creative MediaSource Player/Organizer, double-click the Creative MediaSource Player/Organizer icon on your desktop.

For more information about using Creative MediaSource, refer to its online Help.
Skipping Folders

Your player can only recognize up to one sub folder level in the root directory.

Listening to FM Radio

If there are no saved preset channels in your player, the "No preset found" message will appear on the screen.

This action skips the playback to a selected folder.

To go to the next folder
1. Press the Scroller.
2. Scroll Select the Skip Folder icon (Figure 3-4).
3. Scroll to the folder that you want to go to.
4. To resume normal playback, press the Scroller again.

With your player, you can listen to your favorite radio station. Your player can automatically scan for stations available in your region, and store the stations as channels for you. In FM Radio mode, your player will display the current radio channel and its preset number.
To change the FM region

Perform these steps when scanning for stations for the first time.

1. Press the Scroller.
   The Main Menu (Figure 3-6) appears.

2. Scroll Select the Settings icon (Figure 3-7).
   A list appears.

3. Scroll Select the FM Region icon (Figure 3-8). A list appears.
4. Scroll Select the region that you are in.

To perform an autoscan and autosave

1. Connect your earphones to the earphone jack.
2. Press the Scroller.
   The Main Menu similar to Figure 3-9 appears.
3. Scroll Select the FM Radio icon (Figure 3-10).
   A radio frequency appears on the LCD screen (Figure 3-11).
4. Press the Scroller.

5. Scroll Select the Autoscan icon (Figure 3-12).
   The player scans and stores channels it detects. At the end of the autoscan, it automatically saves all channels and plays the first channel.
To manually set a preset channel

1. Press the Scroller.
   The Main Menu similar to Figure 3-13 appears.

2. Scroll Select the **FM Radio** icon (Figure 3-14).
   A radio frequency appears on the LCD screen (Figure 3-15).

3. If you see a preset channel, press the **Play/Pause** button to switch to Manual Scan view. The preset channel disappears.

4. To scan for a channel, turn the Scroller towards the right or left, and hold for one second.

5. Press the Scroller.

6. Scroll Select the **Save Preset** icon (Figure 3-16).

7. Turn the Scroller to select the preset number you want. Your channel is stored and appears at the bottom-left corner of your screen.

8. Repeat steps 2 to 6 to store another channel.
To select a channel
1. Press the Scroller. The Main Menu similar to Figure 3-17 appears.

2. Scroll Select the **FM Radio** icon (Figure 3-18). A radio frequency appears on the LCD screen (Figure 3-19).

3. Turn the Scroller to select the preset channel you want.

To delete a preset channel
1. Press the Scroller. The Main Menu similar to Figure 3-20 appears.

2. Scroll Select the **FM Radio** icon (Figure 3-21). A radio frequency appears on the LCD screen (Figure 3-22).

3. Turn the Scroller to select the preset channel you want.

4. Press the Scroller.
5. Scroll Select the **Delete Preset** icon (Figure 3-23).

6. Scroll Select the **Delete Preset x** icon (Figure 3-24). The preset channel is deleted and your player plays the next available preset channel.

**To switch to FM Preset view or Manual Scan view**

In FM Preset view, you can see the preset channels and scroll from one preset channel to another. If you need to fine-tune the radio channel, switch to Manual Scan view.

1. Press the Scroller.
   The Main Menu similar to Figure 3-25 appears.

2. Scroll Select the **FM Radio** icon (Figure 3-26).
   A radio frequency appears on the LCD screen (Figure 3-27).

3. Press the Scroller.

4. Scroll Select the **Scroller mode** icon (Figure 3-28) to switch to the different views. Alternatively, you can press the **Play/Pause** button to switch to the different views while playing a station.
Audio and FM Recording

Another great MuVo V200 feature is its ability to record audio and FM radio. Recorded audio is encoded directly into IMA ADPCM (at 8 kHz, 4-bit, Mono) file format and recorded FM radio is encoded directly into IMA ADPCM (at 16 kHz, 4-bit, Stereo) file format.

When recording, note that the available recording time is determined by:
- available space in your player
- battery power remaining in your player

Recording Audio

When recording, you will see the time available for recording. You will also see a bar showing you the elapsed recording time.

To make a recording

1. Press the Scroller.
   Scroll Select the Microphone icon (Figure 3-29). The recording bar appears on the screen.

2. Press the Play/Pause button to start the recording.

3. Press the Play/Pause button again to end the recording. A name is automatically assigned to your recording and it is saved in your player. The naming convention used is: VOC [Current File Number].
Recording FM Radio

When recording FM radio, you will see one bar showing you the time available for recording, and another showing you the elapsed recording time. Also the FM Radio icon appears in the bottom-left corner of the LCD screen.

To make an FM radio recording

1. Press the Scroller. The Main Menu similar to Figure 3-31 appears.

2. Scroll Select the **FM Radio** icon (Figure 3-32). A radio frequency appears on the LCD screen (Figure 3-33).

3. Turn the Scroller to select the preset channel you want.

4. Press the Scroller.

5. Scroll Select the **FM Recording** icon (Figure 3-34). A recording bar appears on the LCD screen and recording starts.
6. Press the **Play/Pause** button to end the recording. A name is automatically assigned to your FM radio recording and the file is saved in your player. The naming convention typically used is: **FM [Current File Number]**.

It is simple to play back the audio and FM Radio tracks you have recorded. In Recordings mode, your player will display the elapsed time, track number and file name of the recorded track.

**To play a recording**

1. Press the Scroller. The Main Menu similar to Figure 3-36 appears.

2. Scroll Select the **Recordings** icon (Figure 3-37).

3. Scroll Select a recording you want to listen to. The track is played back automatically.

To delete a recording, see "Deleting Audio Tracks" on page 3-3.
Play Modes

Your player has Play Modes that allow you to change how your tracks are played back. Play Modes are disabled by setting the “Normal” mode as described on page 15.

The following Play Modes are available:
- A-B
- Repeat Track
- Repeat All
- Repeat Folder
- Track Once
- Shuffle Repeat
- Shuffle Once
- Shuffle Folder
- Normal

To enter Play Mode
1. Press the Scroller.
   The Main Menu (Figure 3-38) appears.

2. Scroll Select the Play Mode icon. A list appears (Figure 3-39).

Depending on which mode you want, follow the corresponding step:
Repeat track

**To repeat a track**

Scroll Select the **Repeat Track** icon 

The **Repeat Track** icon appears on the screen and the track is repeated continuously until you stop it or go to another track.

Repeat Folder

**To repeat a folder**

Scroll Select the **Repeat Folder** icon .

The **Repeat Folder** icon appears on the screen and tracks in the current folder are repeated continuously until you stop them or go to another folder.

Repeat All

**To repeat all tracks**

Scroll Select the **Repeat All** icon .

The **Repeat All** icon appears on the screen and all tracks are repeated continuously until you stop playback.

---

Repeat Folder Mode is only available in Music mode.

A portion of a track can only be repeated once; marking a new portion will automatically remove any markers in the track.
Repeat Portion

**To repeat a portion of a track**

1. Scroll Select the A-B icon. The A-B icon appears, prompting you to select a start point for the portion of music to repeat.
2. Press the Scroller to mark the beginning of the portion you wish to repeat. The A-B icon appears, prompting you to select an end point for the repeat function.
3. Press the Scroller again, to mark the end point of the portion of music to repeat. The marked portion of music is played back repeatedly.
4. To resume normal playback, enable “Normal” mode as described in "Normal" on page 3-15.

Shuffle Once

**To shuffle all tracks once**

Scroll Select the Shuffle Once icon. The Shuffle Once icon appears on the screen and tracks are selected in random sequence and played back. Playback stops once all the tracks in your player are played back once.

**To shuffle a folder once**

Scroll Select the Shuffle Folder icon. The Shuffle Folder icon appears on the screen and all tracks in the folder are selected at random and played back. Playback stops once all the tracks in the folder are played back once.
Shuffle Repeat  

**To Shuffle Repeat all tracks continuously**

Scroll Select the **Shuffle Repeat** icon. The **Shuffle Repeat** icon appears on the screen. Selected tracks are in random sequence and played back continuously until you stop playback.

Track Once  

**To stop playback once the current track ends**

Scroll Select the **Track Once** icon. The Track Once icon \( x_1 \) appears on the screen. Playback stops once the track ends.

Normal  

**To play all tracks, from the first track to the last**

Scroll Select the **Normal** icon. All tracks play back normally.
Enhancing Audio

EQ is a collection of equalizer settings that can enhance the sound of your audio. Select preset settings such as Rock or Jazz, or customize your own setting.

1. Press the Scroller. The Main Menu (Figure 3-40) appears.

2. Scroll Select the EQ icon (Figure 3-41).

3. Select one of the following options:
   - Normal
   - Rock
   - Pop
   - Classical
   - Jazz
   - Custom EQ

EQ settings are only available in Music mode.
Defining Custom EQ

1. Scroll Select the Custom EQ icon. The Custom EQ screen (Figure 3-42) appears.

2. Five vertical control levers appears in the display. Each lever represents successively higher frequencies that can be controlled. 62 Hz controls bass frequency, 250 Hz adjusts the low mid-range frequency, 1 kHz adjusts the mid-range frequency, 4 kHz adjusts the upper mid-range frequency and 16 kHz adjusts the treble frequency.

3. Scroll Select each vertical control level. Use the Scroller to move the control knob up or down to vary the amount of boost or reduction in the selected frequency range.

4. Scroll Select the check mark to exit the Custom EQ window.
Setting Preferences

Settings

Settings is a collection of options that enable you to adjust your preferences. You can adjust preset display settings such as Contrast or Backlight, change your player’s default language and view useful information such as available memory space.

1. Press the Scroller.
2. Scroll Select the **Settings** icon (Figure 3-43). A list appears (Figure 3-44).

Depending on which setting you want, follow the corresponding step:

**To set the contrast level for your player’s screen**

1. Scroll Select the **Contrast** icon. The **Contrast** screen (Figure 3-45) appears.
2. Use the Scroller to increase or decrease the LCD screen contrast. The lower the number, the lower the LCD screen contrast.
To rotate the LCD screen 180 degrees

Your player has a handy feature: you can rotate the LCD screen by 180 degrees. This may be useful for left-handed users. Follow the step below to rotate the LCD screen on your player.

Scroll Select the **LCD Orientation** icon. The LCD screen rotates 180 degrees (Figure 3-46).

To adjust the screen backlight duration

1. Scroll Select the **Backlight** icon.
2. Scroll Select the backlight duration or disable it. A lower number setting conserves battery power for longer playback time.
To specify how long the player remains inactive before it automatically shuts down
1. Scroll Select the **Idle Shutdown** icon.
2. Scroll Select the duration you want the player to wait before automatically shutting down.

To change the default language
1. Scroll Select the **Language** icon.
2. Scroll Select the language that you want.

To view firmware version, total storage space, remaining available space and track count
1. Scroll Select the **Information** icon.
Locking and unlocking your Player

Locking your player will disable all buttons except the Scroller on the player. This feature is useful when you do not want any buttons (for example, Play/Pause) pressed accidentally.

If you press a button while the player is locked, a popup window appears, prompting you to unlock the player. This window is only displayed for five seconds.

To lock your player
1. Press the Scroller.
2. Scroll Select the Lock icon (Figure 3-47). The player is locked.

To unlock your player
1. Press any button. A popup window appears (Figure 3-48).
2. Scroll Select the Unlock icon. The player is unlocked.
If you need to format your player, first backup the files on your player to your computer. When you format your player, all songs and files will be deleted. By default, your player is already formatted.

1. Connect your player to your computer’s USB port.
2. Launch Windows Explorer on your computer. Your player is recognized as a Removable Disk in Windows Explorer.
3. Right-click the Removable Disk icon and click the Format option. The Format f:\ dialog box appears (replace f:\ with the drive letter of your player).
4. Follow the instructions on the screen to format your player.
5. After the formatting is complete, make sure you stop your player before disconnecting it from your computer. See "Usage" on page C-2 for instructions on stopping your player.

For more information about using Windows Explorer, refer to its online Help.

</table>

*Technical Specifications A-1*
Channel Separation

- Up to 63 dB

Frequency Response

- 20 Hz~20000 Hz

Harmonic Distortion

- <0.05%

Operating System/Firmware

- Upgradeable via Internet

Headphone Out

- 1/8" stereo minijack, 5~7 mW

LCD Display

- Large 96 x 32 pixel, blue EL backlight display

Data Connector

- USB 1.1
- USB 2.0

Firmware Support*

- Programmable

* Firmware upgrades are available from www.creative.com

Frequently Asked Questions
Frequently Asked Questions

This section covers questions you might have while using your player. It has been divided into a few categories for your easy reference. For further assistance, you may wish to consult our self-help tool “Knowledge Base”. Go to www.creative.com and select your region.

AutoPlay

To start the installation program through the My Computer shortcut menu
1. Double-click the My Computer icon on your desktop or Windows Start menu.
2. Right-click the CD-ROM drive icon, and then click AutoPlay.
3. Follow the instructions on the screen.

To start the installation program through Windows Explorer
1. In Windows Explorer, search and locate the d:\ctrun folder (replace d:\ with the drive letter of your CD-ROM drive).
2. Double-click the ctrun.exe file.

General

Where can I get official information on all MuVo products?
Visit www.creative.com for updates and downloads relating to all MuVo products, Creative’s MP3 players and accessories.
Frequently Asked Questions C-2

Usage

I have to change the battery quite often. Is there anything I can do to make it last longer?

Some operations consume more battery power:

❖ a long backlight timeout setting. A shorter timeout conserves battery power.
❖ a high contrast setting. Position the player so that you can read the display without using a high contrast setting.
❖ too much moving ahead or moving back within a track.
❖ turning the player on/off too many times.
❖ use of passive speakers or high-powered headphones.
❖ playback of WMA files

After playing a sequence of tracks, the player skips a track.
The player will only play valid formats (MP3, WMA or WAV recordings). Other types of files will be skipped.

Files/tracks are corrupted when transferred to the player.
Transfer may have been interrupted. Before disconnecting your player from your computer, make sure that you stop your player properly first. See "Step 4: Stopping Your Player Properly" on page 2-8.

The player turns off immediately after it is turned on.
Do one or more of the following:
❖ format your player. For more information, refer to "Formatting Your Player" on page 3-22.
❖ use a fresh battery if the battery used is depleted.

Can I use the player for portable data storage?
Yes, you can.
Can I play DRM-protected WMA files on my player?
Yes. To transfer DRM protected WMA files to your player, you can use Creative MediaSource.
