Authorizing Pro Tools Using an Activation Code

(Pro Tools HD Purchased from a Dealer or Store Only).

If you purchased your Pro Tools HD software upgrade from a dealer or store (instead of purchasing it online), you need to authorize the software using an Activation Code (located on the Activation Card).

Your Pro Tools HD software is protected by an iLok license. The authorization procedure will allow you to move your Pro Tools HD software upgrade license from your iLok.com account to your iLok USB Smart Key, so that you can run Pro Tools HD.

If you have not already completed authorizing your software by following the instructions on the Activation Card, complete the steps in this section.

To authorize Pro Tools HD using an Activation Code:

1. Locate the enclosed Activation Card. The unique code on this card will allow you to retrieve your iLok license.

2. If you do not have an existing iLok.com account, visit www.iLok.com and sign up for an iLok.com account.

3. Transfer the license for Pro Tools HD to your iLok.com account by doing the following:
   - Input your Activation Code (listed on your Activation Card) and your iLok.com User ID. Your iLok.com User ID is the name you create for your iLok.com account.

4. Transfer the license from your iLok.com account to your iLok USB Smart Key by doing the following:
   - Insert the iLok into an available USB port on your computer.
   - Go to www.iLok.com and log in.
   - Follow the on-screen instructions for transferring your licence to your iLok.

5. Launch Pro Tools.

6. If you have any installed unauthorized plug-ins or software options, you are prompted to authorize them. Follow the on-screen instructions to complete the authorization process.

Installing QuickTime

(All Pro Tools Systems)

A Digidesign-qualified version of QuickTime is required for Pro Tools if you plan to include movie files, or import MP3 or MP4 (AAC) files in your sessions. QuickTime for Windows is available as a free download from the Apple website (www.apple.com).

⚠️ For information on which version of QuickTime is compatible with your version of Pro Tools, visit the compatibility pages of the Digidesign website (www.digidesign.com).

To install QuickTime:

1 Visit www.apple.com and go to the QuickTime page.

2 Download the QuickTime installer application to your computer.

3 Double-click the QuickTime installer application and follow the on-screen installation instructions.

4 Restart your computer.

⚠️ If the USB LED on the front panel of the Mbox 2 does not illuminate after installation, try unplugging the USB cable from the Mbox 2 USB port, and plugging it back in. If the USB LED still does not illuminate, shut down the computer, disconnect Mbox 2 and start the computer. Once the computer has fully restarted, reconnect Mbox 2.
Launching Pro Tools HD Software

To use Pro Tools HD, you must always have an inserted iLok with an authorization for Pro Tools HD. One pre-authorized iLok is included with your Pro Tools HD system.

3. Do one of the following:
   - Double-click the Pro Tools HD shortcut on the desktop.
   - or –
   - Locate and double-click the Pro Tools HD application on your hard drive.

⚠️ Do not remove the iLok during Pro Tools launch or use.

Launching Pro Tools LE Software

When launching Pro Tools the first time, you are prompted to enter an authorization code to validate your software.

1. Make sure your LE interface is connected to your computer and powered on if it has a power switch.
2. Do one of the following:
   - Double-click the Pro Tools LE shortcut on the desktop.

3. Enter the authorization code in the dialog (making sure to type it exactly as printed, and observing any spaces and capitalization), then click Validate.

The authorization code sticker is located on the inside cover of this guide.

💡 All letters are case sensitive. All “0” characters are zeros. You must include both spaces. The spaces separate 3 sets of 8 characters.
Upgrading 003 or 003 Rack Firmware

When you launch Pro Tools software, it automatically checks the version of the unit’s firmware, and prompts you to update it if a newer version is available.

If you update your unit’s firmware, let the update complete before disconnecting or turning off your system.

When a firmware update completes, Pro Tools quits, and you must relaunch Pro Tools.

If during the update process you get a message that Pro Tools cannot communicate with 003 or 003 Rack, wait up to 30 seconds for the message to close. If the message does not go away, power off 003 or 003 Rack and then power it on again.

Launching Pro Tools M-Powered

To use Pro Tools M-Powered with an M-Audio interface, you must always have an iLok with a license that authorizes the version of M-Powered software that you have installed. One pre-authorized iLok is included with the Pro Tools M-Powered package.
