Power off Xbox® 360 or PlayStation® 3. Connect a console specific Component AV cable* to the A/V port of the console. For PlayStation 3, you can leave the HDMI cable plugged in if you would like. For Xbox 360 the HDMI may need to be removed to make room for the Component AV cable. Next, plug the color corresponding Component Video and RCA Audio cables to the inputs on the Roxio GameCAP device.

*Console specific Component AV cable(s) are NOT INCLUDED.

PlayStation3

If you were using HDMI or Composite AV cables on your PlayStation 3 you will need to reset the video output for Component AV cables by following these steps:

1. Go to Display Settings.
2. Select Display Settings/Video Output Settings.
3. Select the type of connector on your TV.
4. Switch to Component/D-Terminal option and confirm the change.
5. Use your TV’s remote to change input to Component.
6. Check ALL the supported resolutions that your TV supports (480p/720p/1080i etc.)
7. Select (X) Enter to confirm change.

If you were using HDMI or Composite AV cables on your PlayStation 3 you will need to:

1. Go to Display Settings.
2. Select Display Settings/Video Output Settings.
3. Select all resolutions that are supported by your TV.
4. Press the (X) button to save settings.
5. Select (X) Enter to confirm change.
Xbox 360

Use the remote control for the TV to change the input to Component.

Tips:

- If you are not able to see the preview video in the Roxio Game Capture software, power off and then power on the console. The video signal should reset after you power back on.
- If your Xbox 360 comes with a hybrid A/V cable, make sure the switch on the cable is set to “HD” mode.
